To-day in the second restoration we are faced with a problem similar to that which faced the Jew of the Babylonian Exile—the lack of a spiritual centre. In our own time the danger of disorganisation and disintegration is far greater than it ever was at any other period of our history. The old centres of Jewish life in Russia are breaking up, and conditions in Western Europe, while allowing greater individual freedom, give little opportunity for the development of Judaism. . . . Those who are concerned for the perpetuation and development of Jewish cultural and religious life must unite to establish a centre where Jewish life, philosophy, and religion may be developed in harmony with the true spirit of the "Torah," and in accord with the needs of modern life; and once we establish our religious life for ourselves, may it not be hoped that we may again give new spiritual values to the world, that we may yet be a light unto the nations to guide and to give hope in these troubled days of doubt and disillusion? . . . We must, of course, have political guarantees for the security of life and property, for the freedom to settle, and for the autonomy of cultural and spiritual life in our own communities. But Jewish history and Jewish philosophy cannot bear the thought of political ambition and domination. We are an old people, and the teachings of Prophets and Rabbis have combined with historical circumstances to convince us of the vanity and futility of political mastery. I have no doubt that the masses of our people and its leaders understand this very well. But I sometimes fear that the stress of circumstances and the tasks of the moment have led some to make statements which, misinterpreted and torn from their context, have given watchful enemies an opportunity to twist them into caricatures of our aim. . . . It is not in the spirit of "What will the nations say?" but in the desire of being true to ourselves, to our own history, to the teachings of our prophets and rabbis, and to the commandments of our "Torah," that I say the above. But we *have* a duty to the world at large which we must not neglect, and naturally enough it is altogether in harmony with the duty that we have to ourselves. "To thine own self be true." What shall we accomplish for the world if we merely set up in Palestine a petty nation with no definite character of our own? What significance will there be if we produce a few more professors, a few more lawyers, a few more scientists? There are enough Jewish professional men in the world, many universities in Europe and America think that there are already too many. It is not a quantitative contribution, but a qualitative one that the world expects from us.

Later.

I learn that yesterday the Executive of the Moslem-Christian Association issued a proclamation forbidding any participation in either the census or the elections.

YUGOSLAVIA.

Liubliana, October 21.

The Parliamentary Situation.

In spite of shortcomings and faultfindings, the Coalition between Radicals and Democrats still seems to be the best solution of the Parliamentary situation in Belgrade. At least, so far nobody has been successful in producing a workable substitute.

Certainly it did appear a little while ago as if the country were to be offered a regrouping of parties in consequence of the Zagreb Congress of Public Workers. A definite effort was made at the Congress to find a settlement of the Serbo-Croat question, and as the Congress was attended by several notable Serbian politicians, ex-Ministers, who appeared amicably on the same platform with Croatian leaders, there was reason to hope that their joint efforts would achieve some satisfactory result. But the subsequent Congress of the Democratic Party in Belgrade showed that the attempt had been premature; that the ground had not been sufficiently prepared. And the Radical Congress a few days later confirmed this impression.

The crux of the anticipated Government crisis lies in this. The inconsequent methods of the Opposition, and its relatively small numbers make

a change in the governing Coalition impossible. At the same time the whole situation would be transformed if the Croats were in Belgrade and prepared to enter the Government. In that case there might be an election, and a new Government, which would result from that. Beyond all doubt we should then have a Government formed either by Democrats and Croats, or by Radicals and Croats. In the latter case it would be a Radical Ministry under M. Protitch, and in the former a Democratic Ministry under M. Davidovitch. But neither of these things is likely to happen for the moment; for no Parliamentary settlement on these lines is possible without M. Raditch, and so far Raditch refuses to come in The promoters of the Congress were perfectly aware of this. But—as is often the case—the wish was father to the thought, and they counted on a Protitch-Davidovitch Government. They argued that M. Protitch has long been in favour of a friendly settlement of the Croatian difficulty. At the Conference M. Davidovitch expressed a similar point of view. Both men have a strong backing, so why not a majority between them? Unfortunately, this argument fails to take into account that both M. Protitch and M. Davidovitch are party men, which means that they look at everything in the light of party interests. Now party interest says quite clearly that a split would be dangerous, nay, disastrous, to the party in which it was allowed to occur. Let us assume that the Democrat Congress had brought about a split in that party. The Radicals would at once dominate the situation; and *mutatis mutandis*, the result would be the same were the Radical party to split. For this reason both parties have remained as they were before, and the Government crisis has been put off, too, until the end of the month, and probably for longer, although the difference between Radicals and Democrats has grown decidedly more acute.

This further estrangement is due to the Zagreb Conference. Until recently it was tacitly assumed in Croatia that the Democrats presented the chief obstacle to a friendly settlement with the Croats. Hence for Croatia M. Protitch was the only coming man. But M. Davidovitch's recent action has considerably modified this opinion, and the Croats have begun to count on him as well. And since M. Davidovitch as party leader had been authorised from Belgrade to negotiate with the Croats, the Democrats may even be said to have scored off the Radicals over the business. And herein lies the key to the situation, which may be described as a latent crisis.

There are two ways out. Either the old Coalition will remain, but with a change in the Ministry, or there will be a General Election and a new Cabinet as the result of it. The latter course is finding more and more advocates, but it is not likely that it will be taken. There is much urgent legislative work on hand; Prince George's case calls for settlement; finally, the general situation is not sufficiently steady to risk further consolidation in a General Election. That is why many leading men consider that an election would be inopportune at the moment; and as this is also the opinion of M. Pashitch, it will most probably carry the day. But it is almost certain that there will be changes in the Ministry.

Briefly then, the Parliamentary situation may be summed up by predicting that the Croats will shortly abandon their passive attitude, and that their influence is bound to tell upon the Government. Preliminary tokens of this change are already apparent. The former Raditch deputy, Dr. Häusler (Hajzler), has gone to Belgrade, and in the Skupshtina solemnly declared in favour of national unity and against a revision of the Constitution. From the gallery he was applauded by a second Raditch deputy, M. Lovrekovitch. "One swallow does not make a summer," says the *Zagreber Tagblatt*. But it shows that summer is being expected. The Raditch party has begun to veer round. Under this influence, M. Raditch himself has pronounced in favour of national unity and as an earnest of this view he declares himself prepared to take part in the Kumanovo celebrations and the Prague festivities.

In spite of the Government crisis (the Opposition would say: *because* of it) the position has improved considerably, and affords fresh proof that the Kingdom of Serbs, Croats and Slovenes stands upon a sound foundation.

Improvement of the Dinar.

After rising steadily but slowly for a time, the dinar has made a sudden spurt. This very welcome phenomenon is credited variously to the ability of M. Kumanudi's new assistant, M. Plavsitch, and to the Government crisis. Be that as it may, the improved rate of exchange is already affecting the price of household commodities. The cost of living has begun to come down, and the spirits of the harassed householder are going up in sympathy.

The Case of Prince George.

A little while ago Prince George, the eldest son of the late King, put forward an urgent demand that his position should be defined, and a sufficient allowance settled upon him. From this demand have sprung the lengthy negotiations referred to as the case of Prince George. The general view is that this is a matter which ought never to have been dragged into publicity; that it ought to have remained a family affair. In any case it is a purely internal question. Prince George is one of those of whom it may truly be said that they are their own worst enemies; but whatever his faults or eccentricities, he is a whole-hearted patriot, and nothing would induce him to play a part calculated to imperil the peace or stability of the country.

ROUMANIA.

Bucharest, October 17.

The Coronation.

The Coronation festivities, for which preparations had been in progress for well-nigh two years, have at last taken place without the slightest hitch and in accordance with the pre-announced programme, despite the numerous difficulties that had to be confronted. The pageantry was certainly gorgeous both in Alba Julia and in Bucharest, and its organisers deserve unreserved praise.

At earliest dawn of the Coronation Day, October 15, thousands of peasants in their different national costumes, from all parts of Transylvania, began to stream into Alba Julia—a very unassuming little country town, but of great historical importance. Neither the anything-but-comfortable travelling nor the unfavourable weather—not to mention the very strict police measures, which may possibly have been necessary in that part of the country in the circumstances—could damp the enthusiasm of the 20,000 peasants who came to see their King and Queen crowned Sovereigns of Greater Roumania.

By nine in the morning the little station of Alba Julia, festively decorated for the occasion, was already thronged with the large number of guests, brought by twenty special trains from Bucharest and Sinaia, and now waiting the arrival of the Royal train. Among those on the station platform were the Duke of York, the Duke of Genoa, Prince Paul of Greece, the Infante of Spain, Don Alfonso of Orleans, the Infanta Beatrice, the sister of the Queen of Roumania, Marshal Foch, the entire Diplomatic Corps, the members of the Cabinet, the

Digitized by Google

leaders and prominent members of the Opposition (excepting those of the Transylvanian National Party and the Peasants' Party), and other high State dignitaries, and a large number of generals. When the Royal train drew up the King and Queen alighted from it, followed by the Crown Prince and Crown Princess of Roumania, Queen Elizabeth of Greece, Queen Marie of Yugoslavia, Prince Nicholas, Princess Ileana and Princess Irene of Greece. The Royal family and their guests then proceeded to the new Cathedral, specially built for the occasion in the old fortress of Alba Julia, where a Te Deum was celebrated by the Primate and other heads of the Roumanian Orthodox Church.

As the interior of the Cathedral is very small—accommodating barely three hundred people—the actual Coronation took place outside on a canopy-covered daïs, which could easily be seen by the guests from two specially erected stands, as well as by the troops and peasantry, who were lined round the courtyard. It was a most picturesque sight to see the King and Queen, followed by the Presidents of the Senate and Chamber, bearing the two crowns—the King's iron crown, fashioned from one of the cannons captured by the Roumanians from the Turks at the Battle of Plevna, and the Queen's crown, made from Roumanian gold and set with precious stones—the procession being completed by the Royal guests and the foreign Missions in their handsome gala uniforms, the ladies in their magnificent dresses of brocade with gold and silver embroidery, the bishops in their richest robes, not to mention the diplomatists and the generals in their imposing gala uniforms, walking from the Cathedral to the daïs, which the Sovereigns mounted, while the others formed a semicircle before it. The King wore the uniform of a general of chasseurs, while the Queen, beautiful as ever and dressed in rich gold brocade, over which she wore a velvet cloak trimmed with ermine, looked like a queen out of fairyland.

The Iron Crown and the Golden.

It was an impressive moment when the King took the crown from the hands of the President of the Senate and placed it on his own head, and then took the Queen's crown from the President of the Chamber and placed it on his Consort's head, as she knelt before him. The Sovereigns then embraced each other. For a moment there was deep silence, charged with emotion, then followed prolonged cheers, accompanied by firing of cannon and ringing of church bells. The two Presidents, each in his turn, thereupon addressed the Sovereigns in the name of the people in fitting speeches, to which the King responding, said that he received this crown, inherited from his never-forgotten and wise uncle, as a symbol of Roumanian heroism and of unity between King and country. "Forty-one years ago this crown was placed on the head of the first King of Roumania after the War of Independence and the proclamation of the Kingdom, and the Almighty has helped to see it even more glorious, for to-day, after the heavy trials borne by the entire Roumanian nation, it symbolises the fulfilment of that great and holy age-long wish—the union of all provinces inhabited by Roumanians."

Amidst the cheers of the people, the Sovereigns were then accompanied, under the canopy, as far as the royal apartments, where the crowns were deposited. Then followed a gala dinner, attended by the Royal family, the foreign Princes, the Diplomatic Corps, the members of the Cabinet and leaders of the Opposition, generals, and other high State dignitaries. At the same time a banquet was given to the members of Parliament and the Press, and in specially erected stalls a mammoth feast was served to the tens of thousands of peasants who came to Alba Julia for the Coronation. During the afternoon about 40,000 Roumanian troops were reviewed by the King and Queen and the Royal guests and foreign military Missions, all on horseback.

In the Capital.

In the evening the Royal couple and their guests left Alba Julia for Bucharest to attend the continuation of the festivities in the capital. The Royal cortège started from Mogosoaia station (outside Bucharest), passing through the magnificent triumphal arch specially erected for the occasion on the Chaussée Kisseleff, and proceeding along the Calea Victoriei to the Primate's Cathedral. Despite the rainy weather, the streets, beautifully beflagged and decorated in the national colours, were alive with crowds, who cheered heartily as the King and Queen and the Royal guests passed along the route.

After the service at the "Metropolie," the Royal party betook themselves to a pavilion erected on the boulevard in front of the statue of Michael the Brave to witness the parade of 10,000 mayors from all parts of the country and the historic pageant, which lasted well-nigh two hours. The pageant depicted the history of Roumania from the time of the Emperor Trajan (104 B.C.) to present days. It goes without saying that it was most interesting and impressive. In the evening a gala dinner took place at the Royal palace. The third day was devoted in the forenoon to a reception at the palace of the various foreign Missions, the Diplomatic Corps, and members of the legislative bodies, and at noon a huge dinner was given in the "Parcul Carol" to the 10,000 mayors, in the presence of the Sovereigns. In the evening a gala performance took place at the National Theatre, and the principal streets were brilliantly illuminated.

The Duke of York.

On Tuesday, October 17, the British Minister (Sir Herbert) and Lady Dering entertained the Duke of York and his suite to luncheon at the British Legation. In the afternoon His Royal Highness held a reception of the members of the British colony in Roumania, which was very largely attended. His Royal Highness shook hands and conversed with everyone of those present.

On the occasion of the Coronation King Ferdinand conferred on the Duke of York the Grand Cordon of the Order of Charles the First, and on the Duke of Genoa and Marshal Foch the Grand Cross of the same order.

To promote good relations between Indians and Britons in India, a non-party organisation, to be known as the Indo-British Empire League, has been formed at Simla, with Mr. P. V. Iyer as general secretary. It is proposed to form a mixed club and to issue a monthly magazine.

CORRESPONDENCE.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

THE PLIGHT OF THE GREEKS.

To the Editor of The Near East.

Sir,—We have continuously protested against the Near Eastern policy of the late Government. That policy is now proved to have been disastrous to all concerned. Its worst calamity has fallen upon those Greeks from Asia Minor and Thrace who have become starving refugees. We feel that this country cannot dissociate itself from its share of the responsibility in the tragedy. The desire for economy is natural and legitimate, but it is open for us to do essential rescue work without adding to the obligations of the taxpayer. We therefore suggest that Great Britain place the balance of the loan promised to Greece in 1918, and withheld on the return of King Constantine, to the credit of the League of Nations for the purpose of relief to those thus rendered homeless. France and the United States have corresponding obligations, with which, in this unprecedented disaster, they will, no doubt, deal.—We are, etc.,

AN ARMENIAN SETTLEMENT.

To the Editor of The Near East.

Sir,—Nationalist Turkey has been victorious over Greece. In three years of teeth-to-throat fighting in Anatolia, which caused the loss of lives of tens of thousands of Greeks, Armenians, and Turks, and which brought to ruin the fair lands of Smyrna, the responsibility mainly lies on the shoulders of France, Bolshevist Russia, and to a certain degree of England, for they did not sincerely wish to settle the Eastern Question in a spirit of bringing real peace between themselves, Turkey, and the Christian minorities of Asia Minor. After the terrible blunders committed since the Armistice with Turkey, everyone to-day interested in the affairs of the Near East is anxiously looking at the Great Powers to see if they will honestly and fairly settle the most bloody of all contemporary clashes of political and commercial interests before the gates of Constantinople. The East wants real and lasting peace, which will inevitably contribute to its invigorating renaissance. Justice should be done, and can be done, to the Turk, Greek, and Armenian, with as little concern for the present victory or defeat as possible, if only the Allies will it. For it is primarily a question of good will and unselfishness.

There is really no sensible Eastern who can think that Turkey can be content in any arrangement that will deprive her of Constantinople, and the necessary hinterland for its defence. So far as Greece is considered, she will not cherish any more hopes of territorial expansion in Asia Minor, but she has every right to demand security for the lives and property of the millions of Greeks in the Pontus, Asia Minor, and Constantinople. The Turks likewise demand securities for the Moslems who will remain in Western Thrace.

There remains yet the question of the legitimate Armenian national aspirations, viz., to have *a national independent home, under the supervision of the League of Nations, in the districts of Van, Bitlis, and Erzerum, with a stretch of littoral on the Black Sea*, the cradle of the race, where it lived for four thousand years before the appearance of the Turk on the threshold of history, or the highlands of Asia Minor; also some adequate measures for the protection of the Christians of Cilicia.

To-day, as Mr. Paul Hymans, at a general meeting of the League of Nations, states, there are 700,000 Armenians from the Armenian vilayets within the frontiers of Russian Armenia, in Europe, Egypt, and America, who have stretched their arms towards their mother country, and are waiting for the dawn of liberty, in order that they may return to their ruined homes.

The Turks have their National Pact, and it is their right to have it. We do not envy it, and we cherish no real ill-feeling towards Islam. I, for one, have always had respect for the simplicity of the Mohammedan religion, and the holy lives of Khalifs like Omar, Osman, and Abu Bekir. But we demand for the security of our race, and even for the future welfare of the Turks, to be treated justly by the Allies. We have our own national pact, which is over one hundred years old: that we should live free and independent in our mother country—Armenia, as the Turks in their country—Anatolia. Fortunately, the Indian Moslems duly appreciate the benefits of a fair arrangement for the Armenians. And I hope the Turkish statesmen will rise above the average and do justice to the Armenian cause in the name of "real politics," as we have to be good neighbours sooner or later.

Any effort to kill the Armenian question will be a dead failure; for we shall never get tired, or disappointed by losses, in our forward march for a sufficient corner under the sun. If only one conscientious Armenian be left in the world, he will sacrifice all he has to see his country free one day. And if this time, too, the Armenian people be disappointed, as in 1878 and 1914, in their minimum demands, surely they will act in ways and deeds which cruelly disappointed men and people act. *A fair, honest settlement* of the Near Eastern Question will bring sweetness and prosperity in the natural homes of the Turks, Greeks, and Armenians. *We want a just, lasting peace.*—I am, etc.,

Yepradi Arev
(an Armenian).

October 15.

"THE SPIRIT OF ISLAM."

To the Editor of The Near East.

Sir,—I have read with interest the review in The Near East of my "Spirit of Islam." The reviewer, however, has made a mistake in supposing I am a Sunni. I am a Mutazili, and belong neither to the Sunni nor the Shiah sect. The Mutazili doctrines are described at considerable length in the book.—I am, etc.,

Ameer Ali.

London, October 28, 1922.

The Athens *Official Gazette* publishes a Royal decree recognising as valid the late King Alexander's marriage with Aspasia Manos, which was solemnised at Athens on November 17, 1919. By virtue of the decree King Alexander's child has no rights to the throne, but becomes the legal heir of the deceased King and is entitled to appanage.

PRESS ON THE NEAR EAST.

Palestine.

In view of the forthcoming elections in this country, during which the question of holding Palestine is bound to arise, the following defence of past British policy, taken from *Palestine* of October 14-21, may prove of interest :—

> *Palestine* has from the first insisted that the grant of a Jewish national home in Palestine was not a mere gesture of sentiment on the part of Great Britain towards the Jews, but was also an act of service to British interests in the East. We invaded Palestine and Mesopotamia because we had no alternative. Had the war been prolonged, and the German resources not broken down, a serious attack would have been developed by Germany, both against India and against Egypt. The attack on India would have gone by way of Mesopotamia, and the attack on Egypt would have been directed through Palestine, and would have interrupted the main artery of our communication with the Empire in the East. What was possible in the past may be possible in the future to any Power which, like Germany, happens to be both friendly with the Turks and unfriendly to us, and in proportion as Turkey returns to her old strength that danger becomes more real. And the lesson of the past war is that any Power unfriendly to us in the future will attack us in the East, where we are chiefly vulnerable.
>
> The British answer during the war to the Turco-German combination was twofold. First, we made it our business to raise up a new Arab nation to take the place vacated by Turkey as the buffer between the European system and the British Empire in the East. King Feisul's dominion in Mesopotamia is the embodiment of this policy. Secondly, we promised the Jews a national home in Palestine, not only because it was justice to the Jews, but also because the defence of Egypt needed Palestine as a bastion. The Turkish attack on the Suez Canal during the war was not very serious. The attack of any future enemy might be. And with Palestine in the hands of a possible enemy the successful defence of Egypt would be a matter of enormous difficulty. That is why the British Government attached such importance to the creation of a strong and independent Palestine, populated by those who had a real attachment to the soil, and could be trusted to put up a stout defence against any enemy who sought to make their country the Belgium of the East, and the base for an attack upon Egypt.
>
> The course of events since the war has greatly strengthened this argument. It seems as certain as anything can be that if we are to have peace in Egypt we shall have to withdraw our forces from Egypt proper and concentrate them in the neighbourhood of the Canal. Cairo will cease to be the base of the army of the Canal. What other base is possible than Jerusalem? One could understand the Jews and Arabs objecting to their capital being made the base for the defence of the Suez Canal. One cannot understand how any Englishman who has thought about these problems can fail to see that they are absolutely insoluble except with the help of Palestine. And Palestine will not be a help unless there is a patriotic nation there, nor again are materials present for the creation of a strong patriotic nation of Palestine without the Jews. One must cease, therefore, to think of the Mandate as a pure act of generosity on the part of England to the Jews, though we have no doubt that generosity played some part in shaping the policy. We ought rather to think of our relations as those of an equal partnership, each doing for the other a service that could be rendered by no one else.
>
> Two further points should be made. Much is heard about the cost of the British Mandate in Palestine. The truth is that alone amongst all mandated territories Palestine already pays its own way in civil administration. The sole charge which it makes on the British Exchequer is for the maintenance of a small British garrison there. But how much of the two millions that that garrison costs is to be put down to Imperial objects, such as we have already outlined, and how much to the maintenance of fair play to the Jewish immigrants in Palestine? Our own opinion is that if there were no question of a Mandate for the Jews, we should still require to keep as many troops in Palestine as we do now.

The Situation in Persia.

The *Morning Post* of October 26 contained an instructive message from its Teheran correspondent, who commented on the necessity for British action in Persia. His article began thus :—

> Persia is a country where events seldom lead to their expected results. If it were not so, one would be certain that a *coup d'état* was imminent. The Treasury empty, no sign of any money with which it might be replenished, the Minister for War at variance with the Mejliss, the Bolshevist agitators very busy —all this would lead one to think that a crash was inevitable. It is astonishing how patient the people are, but their patience is not, doubtless, inexhaustible, and, if a *coup d'état* does not take place, it is difficult to see how very sweeping changes in the Administration are to be avoided. It is becoming daily more evident that before very long some steps must be taken by the British Government to review their whole relationship with Persia. For over a year the country's representatives, both diplomatic and commercial, have patiently borne a storm of abuse and libellous calumny that would be punishable at law in any civilised country. Even the all-powerful Reza Khan appears to be unable to deal effectively with the

unruly editors and with those who make venomous anti-British speeches in the Mejliss.

He then spoke of a huge anti-British demonstration recently held near Teheran, and continued :—

It is estimated that about 30,000 attended the meeting, at which their hatred to the British was fanned to white heat. There were long processions, with banners inscribed "Long live Islam" and "Death to the English." It seems impossible to suppose that British policy in Persia is solely responsible for such an extreme reversal of the former friendship which existed between the two countries. No doubt, one reason may be found in the unrest present throughout the whole Mohammedan world.

You may hear of friction between the Mejliss and the War Minister. The latter cannot seemingly comprehend that the country is unable to bear the cost of the large army that he insists on forming. Recruiting continues daily without any definite plan of how the men are either to be clothed or fed. All Government administrations are being starved in favour of the Ministry of War, but the war chest is as empty as the Government Treasury. Obviously the Government of the country cannot be carried on indefinitely in the present hand-to-mouth fashion. Great things are hoped of the American financial advisers, who are expected to turn Persia into a land flowing with milk and "money," but their task is likely to prove extremely difficult in face of the passive resistance and intrigue that they are likely to encounter. There can be no doubt that the Minister for War will not be inclined to submit to financial control of his department. Those rich grandees who have never paid any taxes in their lives are hardly likely to relish the idea of beginning to do so now.

MUSICAL NOTES.

Two Song Recitals.

During the last week two series of song recitals were begun—one by Mr. John Coates at Chelsea Town Hall, the other by Miss Gladys Moger at Æolian Hall. Both these singers are artists whose programmes are always interesting and instructive. Mr. Coates is showing in his recitals the growth and history of English song, and Miss Moger's programmes are proof both of her originality and of her taste.

Mr. Coates knows the highway of English song probably better than anyone else living, but where he is so refreshing is in his zest for and discovery of the lesser known paths. All his songs in this first recital were drawn from the period before Purcell—that is, from the sixteenth and seventeenth centuries—and though everyone knows how well the Tudors and Elizabethans did the lighter form of lyric, few people realise how great in conception, as well as finished in execution, some of these old composers were. Mr. Coates had no difficulty in convincing us that the anonymous composer of "O death, rock me asleep," a song perhaps written by Anne Boleyn and certainly sung by her (tradition says on the day of her execution), and William Corkine, author of "Goe, heavy thoughts," were really and worthily the forerunners of Handel and of Gluck. Nothing else that was sung by Mr. Coates came up in breadth and in dignity to these two songs, though that is not to say that he did not several times attain perfection. It is impossible to resist the genial, conquering way in which he delivers such tunes as Henry VIII.'s "Pastyme with good companye," the anonymous "Phillida flouts me," Robert Jones's "What if I speede?", or John Gamble's "A kiss I begged." Mr. Coates makes his songs popular: they are for him English songs, to be sung by Englishmen. This is a most worthy intent of his, but there does lurk a danger in his method of pursuing it. To popularise these songs with the modern Englishman, he in certain cases alters the line or the accompaniment, and I do not think it is wholly a purist objection which finds fault with such indulgences as Mr. Berkeley Mason, the accompanist, enjoyed himself in in John Bartlet's "When from my love I lookte for love," and as (especially) Mr. Coates revelled in in Henry Lawes' "The Angler's Song." But I know that two opinions are possible about the redecoration of old songs, and that irreverence is the last thing of which Mr. Coates could be accused. It is merely a question of propriety, and he certainly can bring most lavish aids to his interpretation. His next recital, which is to contain songs from the Stuart, Georgian, and Victorian periods, is to be on November 21.

Miss Moger's first recital was on October 25: there are three more to follow. Here is a singer of uncommon preferences and style. Personally, I do not think she sang in this recital as well as she can, and largely, I am fairly sure, because of the shortcomings of her accompanist, Mr. Whitaker-Wilson. Miss Moger is a singer of fine subtlety; she has a beautiful elasticity of rhythm, and is capable of many individual nuances. Mr. Wilson is a player to himself; he could neither subdue nor submerge himself; he often miscalculated his tone; his rhythm was as dissimilar from Miss Moger's as might be; and he did not spare us wrong notes. I do not say he is a bad pianist, but he is a most unhelpful accompanist. But compare him with Mr. Berkeley Mason, and see how Mr. Coates gains what Miss Moger loses. It was not perhaps his fault that Miss Moger's first group, consisting of Campra, Bach, Scarlatti, and Losgroscino, did not go well, but it was very definitely his fault that the last group, consisting of songs in dance rhythms, sounded unimpressive. I have heard Miss Moger sing Herbert Howells' "Old Gavotte" so that it seemed the delightfullest of modern English songs, but here it came as a patched-up, mal-joined affair. Actually, it is a work of consummate artistry. Again, Denis Browne's "To Gratiana, Dancing and Singing," is far broader and nobler than Mr. Wilson could suggest it. Of Debussy's Mallarmé songs I liked only "Soupir," in which Miss Moger's voice floated superbly, and might, with an accompanist who could create atmosphere, have been made memorable. Perhaps things will be better in the next recital, which is to be devoted to Schubert, Brahms, and Strauss. Miss Moger occupies an important place in the artistic life of this country, and must be encouraged, though to suggest that she has not imperfections would be dishonest. She has: her enunciation is often faulty, and some of her vowel sounds are perversions. Her Italian is far inferior to her French. Her intonation, more particularly at the beginning of a recital, is apt to be faulty. But, if she gets a good accompanist, her many virtues will make us partly forgive her these things.

The "Emperor" Concerto.

There are still, in spite of all the critics' say, a few pianists who can make of Beethoven's "Emperor" Concerto a living thing. In the hands of the lesser fry it is almost intolerable to listen to, with its wearisome scales and arpeggios and apparent padding; but to decry its worth is yet an unpopular cry. Now one of the pianists who can make great music of it is Lamond, and it is he who, with Eugene Goossens and the Albert Hall Orchestra, has recently made a record of its for "His Master's Voice" Company. The Concerto is quite complete on five double-sided discs, and really the Gramophone Company are to be congratulated on their enterprise. But I should imagine that the records will prove to be far more of educational than of æsthetic value. For the production of the solo instrument's tone is only an approximation, and several of the finer nuances which Lamond does in fact put into the "Emperor" do not appear at all on the records. Remember, for instance, how he can shock you with that sudden burst to the last movement, and then turn to the tame transition which is its recorded representation. It does not seem to me, moreover, that Goossens has done his share very enthusiastically, for I have never heard such slack orchestral playing by him before. Most of these defects are possibly due to the difficulty of obtaining a correct balance of sound, but the fact remains that neither Lamond nor Goossens is done justice by these records. But, as I have said, to students of this Concerto they ought to be extremely useful.

Andante.

A MAP OF THE WORLD.

We have received from Messrs. Edward Stanford, Ltd., a copy of their recently published "General Map of the World." This map was composed in August of this year, and is therefore in certain parts pertaining to the Near East out of date. The Smyrna enclave, for instance, is still marked as belonging to Greece, and Armenia is coloured as an independent State. Such procedure is no doubt based on the Peace Treaties, but facts have had an unpleasant way of outrunning the Treaties. However, this general map is in many ways extremely useful, and from a non-specialist point of view, it will, with its clear indication of the mandated territories, of the chief shipping routes, and of the principal railway lines, be found very serviceable. The price of the map ranges, according to its mounting, from 5s. to 10s. 6d.

Near East Bookshelf.

INDIA IN 1921-22.

"INDIA IN 1921-22." A Report prepared for presentation to Parliament. By L. F. Rushbrook Williams. (Calcutta: Superintendent of Government Printing. Re. 1-8.)

This is the latest issue of the annual which used to be known as the "Material and Moral Progress Report," as metamorphosed to meet the new conditions. It has the great merit of readability, and gives a clear account of the surface movements in India during the first year of the new Constitution. That it does not go much below the surface is probably inevitable, in view of the conditions of its production. Decidedly the best chapters are those which describe the political events of the year, though we should have liked to be told a little more regarding the unseen hands which pull so many of the strings. The economic chapters strike us as slight, and a little destructive analysis might show that in the official view economic tendencies are subservient just now to practical politics, but in the long run they can be trusted to look after themselves. There are no statistical tables, their place being taken by a few moderately enlightening diagrams, and the appendices contain a valuable collection of important political documents. Altogether, the report is suitable for its main object, which is, we take it, to prevent members of Parliament making fools of themselves in Indian questions.

A NOVEL OF INDIAN UNREST.

"THE INCENDIARIES." By W. P. Drury. (London: Mills and Boon. 7s. 6d.)

Colonel Drury writes his novel in a businesslike way. The characters are marshalled into our view and then thrown together with the greatest economy of speech and action. These characters consist of seditious Indians, a chivalrous Rajah, some well-meaning blunderers in England—who in their desire to emancipate India become the tools of rogues—and of English officials in India. The moral of the story is that the cranks and theorists at home should leave the government of India to the men on the spot, but the incident moves along too quickly to allow of our being much troubled with the moral. Even when the course of true love is kept from running too smooth by means of two most improbable coincidences, Colonel Drury quite disarms us by the air of brisk determination with which he makes use of them. There is one well-arranged comic situation, and, although the whole thing is somewhat mechanical, this is a well worked out and an exciting tale.

"THE NOVEL OF THE PLAY."

"LASS O'LAUGHTER." By Winifre Carter. The Novel of the Play. (London: Thornton Butterworth. 3s. 6d. net.)

We suppose that a "Novel of the Play" is written partly with a view to making the most out of a plot once it has been evolved, and partly to remind those who saw the play of their enjoyment and to console those who did not for their loss. "Lass o' Laughter," as a play, met, we believe, with some success, chiefly because of the personality and talent of the actress who played the heroine's part, but as a novel it is too slight, and its connection with real life is too remote to make it worth reading. It is a variation on the Cinderella theme, which always appeals to all ages, and it should be pleasant to contemplate anyone who regarded life with such simple gaiety as Lass, but the story suggests nothing so much as an oversweetened and otherwise flavourless soufflé.

AN INGENIOUS PLOT.

"THE MYSTERY GIRL." A "Fleming Stone" Detective Story. By Carolyne Wells. (Philadelphia and London: J. B. Lippincott Company. 7s. 6d. net.)

Miss Wells has succeeded in devising a mystery—that of the murder or suicide of Dr. Waring—of which it is most improbable that any of her readers will be able to guess the solution. It is at last solved, by means of the volume of "Martial" which Dr. Waring was reading before he died, not by Fleming Stone, but by his young assistant Fibsy, described—as one felt he inevitably would be—as "inimitable" in the publisher's note. We have not read any of Miss Wells's other stories about the exploits of Fleming Stone, and cannot, therefore, tell whether it is usually his way to leave the solution of his problems to others. As depicted in this book, he is certainly not—to use a favourite adjective of the author's—a "worthwhile" detective. The mystery of the identity and purpose of Anita Austin, from which the story gets its title, is more commonplace and less baffling than that of Dr. Waring's death. The two are, however, intermingled and turned and twisted cleverly enough to keep the reader's attention until the unexpected end.

THE INDIAN CONSTITUTION.

"THE POLITICAL SYSTEM OF BRITISH INDIA." By E. A. Horne (Oxford: Clarendon Press. 10s. 6d. net.)

In this book, based on lectures delivered last year at Harvard, Mr. Horne gives a clear account of the new Indian Constitution, placed in an appropriate historical setting. It is the best account of its size we have yet seen, and can be recommended with confidence to readers, who, without practical knowledge of India, desire to understand the great experiment now in progress. We have noticed no mistakes of fact, but if, as we hope, further editions are called for, perhaps Mr. Horne will correct the sentence on p. 2, which at present implies that the earliest British settlements were confined to Mogul territory; Masulipatam was in Golconda, while Armagon was in territory still nominally subject to the remnant of the Vijayanagar dynasty.

BOOKS RECEIVED.

"Europe Since 1870." By Edward Raymond Turner. (London: William Heinemann. 21s. net.)

"Russia After Four Years of Revolution." By S. S. Masloff. (London: P. S. King and Son, Ltd. 5s. 6d. net.)

"Iranians and Greeks in South Russia." By M. Rostoutzeff, Hon.D.Litt. Illustrated. (Oxford: Clarendon Press. 84s. net.)

"The Jews in Egypt and in Palestine Under the Fatimid Caliphs." Vol. II. By Jacob Mann, M.A., D.Lit. (Lond.). (London: Oxford University Press. 21s. net.)

The *Figaro* recently published a poem written by the Queen of Roumania, in which she recalls memories of her grandmother, Queen Victoria, and of her native land. The Queen composed a lyric poem on the occasion of the recent coronation ceremonies at Alba Julia.

PERSIAN SELF-TAUGHT

By SHEYKH HASAN.

In Roman Characters.

Containing the Persian Alphabet, Transliteration and Pronunciation Outline of Grammar with Persian Characters; Classified Vocabularies and Conversations; Travel Talk; Trade and Commerce; Persian Handwriting; Money with English and American Values, Weights and Measures. PERSONAL AND GENERAL.

TO-DAY.

November 2 (New Style).
October 20 (Old Style).
Rabia I., 13, 1341 A.H. of the Moslem Calendar,
Marheshvan 11, 5683, of the Jewish Calendar.

The Aga Khan has left for Paris.

The Shah of Persia, according to present arrangements, will leave Paris shortly for Persia.

The Earl of Altamont has left London to rejoin his regiment in India.

The Roumanian Minister has returned to London from Paris.

Mr. Roy Treloar and Dr. Henry Chasseaud have arrived in England from Smyrna.

Mr. J. T. Marriner, Secretary at the American Legation in Roumania, is just now visiting in London.

Edib Bey, who has been the Chargé d'Affaires at the Afghan Legation in Berlin, is now Counsellor at the Legation in Paris.

The Afghan Minister has returned to town from France, where he had gone to meet at Marseilles the new Minister to that country, Mahmud Tarzi.

The Bishop of Bombay, who has recently undergone an operation in a nursing home in London, is making a satisfactory recovery.

M. Caclamanos, the new Greek Minister, has taken up his residence at the Legation, 51, Upper Brook Street.

Dr. Milspaul, Financial Adviser to the Persian Government, has left Paris for Teheran. He will proceed via Bombay and Basrah, and should arrive at Teheran in about two months' time.

Lady Manning, wife of Brigadier-General Sir W. H. Manning, G.C.M.G., K.B.E., C.B., Governor of Ceylon, gave birth to a daughter on Thursday at 29, Lower Seymour Street, W.

Among the passengers for Bombay by the P. and O. Company's s.s. Kaisar-i-Hind, which left London last week, were Sir A. R. Anderson, Sir Frank Carter, Lady Laird Clowes, and Sir John and Lady Struthers.

A correspondent informs us that Mrs. Fryatt, who recently left Smyrna, has given birth to a son: and that Mrs. Mary Haydon, also a recent arrival from Smyrna, has given birth to a daughter.

The betrothal is announced of Margery, only daughter of Sir Robert and Lady Aitken, Kinellan, Malabar Hill, Bombay, to Mr. A. B. Hay, D.S.O., elder son of the late Major C. D. Hay, formerly of the 74th Highlanders.

M. Constantin Fotitch, First Secretary at the Legation for the Kingdom of Serbs, Croats, and Slovenes, who was recently married in Vienna, will return to London this week with Madame Fotitch.

The marriage of Mr. William E. D. Allen, of Commonwood House, Chipperfield, Herts, with Lady Phyllis King, second daughter of the Earl and Countess of Lovelace, will take place in London on December 6.

The Maharaja of Kapurthala has arrived at Cannes from Paris, and will leave at the end of the week for Kapurthala, where the marriage of his only daughter, Princess Amrit Kor, with the Rajah of Mandi will take place on February 5, 1923.

Dame Louisa Constance Block, of Maison Melhame, Rue Telegraph, Pera, Constantinople, who died on March 11 last, daughter of the late Robert Cumberbatch, Consul at Smyrna, and wife of Sir Adam Block, K.C.M.G., left property valued at £485.

The engagement is announced between Mr. Eric Vaughan Hamilton Hudson, the Middlesex Regiment, eldest son of Mr. and Mrs. E. Hamilton Hudson, of Rajpore, Behar, India, and Molly Lepel, only daughter of Major Lepel Glass, late the Middlesex Regiment, and Mrs. Lepel Glass.

It is understood that Lord Inchcape has applied for the services of Colonel J. C. Harding Newman, C.B., C.M.G., as an additional member of his Committee, and that his request has been complied with by the Government of India and the Commander-in-Chief.

Professor Georgina Sweet, Assistant Professor of Biology in the University of Melbourne, and Miss Webb, Lecturer in the same University, are making a tour through Kenya Colony and Uganda, and were expected in the Sudan about the middle of October.

The marriage of Llewellyn Brigstocke Lewis, Inspector of Factories, Bengal, ex-lieutenant R.N.V.R., third son of Frank Lewis, solicitor, Newport, Mon., and of the late Mrs. Lewis, to Dorothy Margaret, younger daughter of Henry J. Beavis, Brentwood, Woodberry Down, N., will take place in Calcutta at the end of December.

The engagement is announced, and the marriage will take place this month, between Captain Stewart Marjoribanks, Indian Army, son of Mr. and Mrs. Dudley Marjoribanks, of Newcastle-on-Tyne, and Nancye, only daughter of Mr. and Mrs. Sydney Lee, of 12, Chester Terrace, Regent's Park, and The Close, near Wrotham, Kent.

A marriage is arranged, and will shortly take place, between Major T. C. Fowle, I.A., Foreign and Political Department, Government of India, only surviving son of the late Colonel F. T. Fowle, C.B., R.A., and Mrs. Fowle, Summer Cove, Kinsale, Co. Cork, and Honor, younger daughter of the late Harry Williams and Mrs. Williams, of Beckbury, Shrewsbury.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.
President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Mr. Richard McGillivray Dawkins, M.A., formerly Fellow and Director of the British School at Athens, now Bywater and Sotheby Professor of Byzantine and Modern Greek Language and Literature, and Fellow of Exeter College in the University of Oxford, has been elected to an honorary Fellowship of Emmanuel College, Cambridge.

APPOINTMENTS, Etc.

Mr. Louis Stuart has been appointed a Puisne Judge of the Allahabad High Court, in succession to Sir William Tudball, who is retiring from the Bench.

The Bishop of Egypt and the Sudan has appointed the Rev. Archibald Shaw Archdeacon of the Southern Provinces of the Anglo-Egyptian Sudan.

Signor Giuliano Cora, Counsellor at the Italian Embassy, whose appointment as Minister to Abyssinia was recently notified, has arranged to leave London next month to take up his post at Adis Ababa.

The King has been pleased to approve the appointment of Mr. James Donald, C.I.E., I.C.S., to be a member of the Executive Council of the Governor of Bengal in succession to Sir John Kerr, K.C.S.I., K.C.I.E., who has assumed the office of Governor of Assam.

The King has been pleased to appoint Sir Geoffrey Francis Archer, K.C.M.G., to be Governor and Commander-in-Chief of the Uganda Protectorate. Sir G. F. Archer has been Governor since 1919, and was formerly Commissioner and Commander-in-Chief of the Somaliland Protectorate. He entered the East African Service in 1902.

OBITUARY.

The death is announced of Sir James Galloway, who acted during the War as Chief Commissioner for Medical Service under the Ministry of National Services. Sir James was the son of a Calcutta merchant, and was born in Calcutta.

The death is announced of Admiral A. J. Pocklington. He served during the Abyssinian Campaign, was promoted for his services during the Ashanti Campaign in 1873-4, and afterwards took part in the naval and military operations in Eastern Sudan.

The death has occurred of Admiral Sir Algernon de Horsey, the *doyen* of the Naval Service. Sir Algernon was born in 1827, and entered the Navy in 1840. As a youngster he was present at the operations on the coast of Syria in that year. On several occasions he was under fire, and he received the bar for Syria given with the Naval General Service medal for these operations, as well as the medal for Acre given by the Sultan of Turkey.

The death occurred last week of Brigadier-General Offley Bohun Stovin Fairless Shore, C.B., C.I.E., D.S.O. General Shore saw service with the Malakand Field Force and Tirah Expedition in 1897-8, while later he was successively Deputy Assistant Adjutant-General in India, A.A.G., Indian Staff College, and Director of Staff Duties and Military Training in India. From 1916 to 1919 he was Deputy Inspector-General of Communications of an Indian Expeditionary Force, and he acted as Chief of Staff to General Maude in Mesopotamia. He was later specially selected to assist in saving British troops in Russia

The death has occurred recently at Sandringham of Colonel Sir Arthur Davidson, Equerry and Private Secretary to Queen Alexandra. Sir Arthur Davidson saw much active service before he obtained his first Court appointment. Having joined the 60th Rifles in 1876, he went through the Afghan War of 1878-80, took part in the occupation of Kandahar and Kelat-i-Ghilzai, was at the engagement of Ahmed Khel, and was present at the fight of Urzoo, near Ghuznee. He was Sir Donald Stewart's A.D.C. at Kabul, and was in Lord Roberts's march from Kabul to Kandahar. He took part in the battle of Kandahar. He was also in the Maori Expedition under General MacGregor, in the Boer War of 1881, and in the Egyptian War of the following year, being present at the battle of Tel-el-Kebir and obtaining the medal with clasp, the 5th Class Medjidie, and the Khedive's Star. His final service in the field was with the Bechuanaland Expedition of 1884-5, and he was mentioned in despatches.

THURSDAY, NOVEMBER 2, 1922.

THE CAPITULATIONS IN TURKEY.

No question that will have to be settled at the Near Eastern Peace Conference is being canvassed so eagerly beforehand as that of the Turkish Capitulations. The first instinct of the Turks will be to demand their complete abolition; an insistent appeal has already been made on the part of the foreign residents of Constantinople for their retention as they stand. The way of a compromise would seem to lie in drawing a distinction between different features of the Capitulations. There should be no cause for anxiety on the part of the foreign population that any attempt will be made for the present to interfere with the juridical rights of foreigners, nor is it to be supposed that the Turks, when it comes to the point, will seriously press this part of their claim. The Treaty of Sèvres, it will be remembered, re-enacted the Capitulations, and extended them to any of the Allied States that may not have possessed them before. Article 149 stated that "the Turkish Government confirms, and will uphold in their entirety, the prerogatives and immunities of an ecclesiastical, scholastic, or judicial nature granted by the Sultans to non-Moslem races. . . . All laws, decrees, regulations, and circulars issued by the Turkish Government, and containing abrogations, restrictions, or amendments of such prerogatives and immunities shall be considered to such extent null and void." Again, in regard to economic matters, Article 261 stipulated that "the capitulatory régime resulting from treaties, conventions, or usage shall be re-established in favour of the Allied Powers, which, directly or indirectly, enjoyed the benefit thereof before August 1, 1914, and shall be extended to the Allied Powers which did not enjoy the benefit thereof on that date." Already by last March the Allies had realised that the Treaty of Sèvres, in this matter, as in others, went too far. The proposals elaborated by the Foreign Ministers of the three Entente Powers in Paris offered Turkey "the largest measure of economic independence consistent with the due protection of the interests of the nationals of their respective countries," and promised a Commission, on which Turkey would be represented, to prepare proposals for the revision of the capitulatory régime in fiscal matters. It was added, however, that the proposals, while providing fiscal equality between foreign and Turkish subjects, would safeguard the former against excessive taxation and abuses in collection. Provision would also be made for any necessary modifications of the Customs taxes with the consent of the Powers concerned. With regard to the capitulations in judicial matters, the Ministers' proposal was to set up a Commission to prepare a scheme of judicial reform to replace the capitulatory system, either by means of a mixed or a unified judicial system, but that in the meantime the Capitulations should continue provisionally pending the introduction of the proposed scheme.

It would seem as if the March proposals provided the basis for a fair compromise between the pre-war situation and the total abolition of the Capitulations urged by the Turks. In all that concerns the administration of justice and other matters, such as marriage and succession, in regard to which the law of Islam is at variance with modern principles, there can be no immediate compromise. There will have to be more tangible evidence of a new spirit in Turkish courts of justice and of reforms in their procedure than is supplied merely by the good intentions of the Angora authorities. On the other hand, it is admitted that some of the fiscal privileges enjoyed by foreigners impose an unfair burden on the Turks, and are in themselves hindrances to the progress that it is so desirable that Turkey should make. By virtue of the Capitulations, foreigners are exempt from many taxes and dues that have to be levied on Turkish nationals alone; even customs duties are regulated by foreign Powers, and not by the Turkish Government. The Turks, however, cannot pretend that the extent of their grievance is to be measured by the difference between conditions in their own country and the complete freedom enjoyed in other independent States. The Capitulations were not in the first place extorted by foreign Governments from an unwilling Turkey. They represented a *modus vivendi* which had its advantages for both sides. In course of time they have been extended, and, in some respects, abused; but this fact does not entitle the Turks to take undue advantage of the exceptional conditions that have been built up by the Capitulations. Foreign interests have prospered under a system of privileges, but those interests cannot now be subjected to all the abuses of an unregenerate Turkish system. They are ready to submit to what is fair and equitable, and the knowledge of the value of these assets to a decent administration should in itself be an incentive to the Turks to set their house in order.

The action of the French Chamber of Commerce in Constantinople in associating itself with the British Chamber in representations to the Allied Governments regarding the Capitulations will, it is to be hoped, serve to remind the Angora authorities that they have still to justify their claims. There are many people in Great Britain and France who are prepared to believe that Turkey is going to be far better served by the Nationalists than she was by the Committee of Union and Progress, or any who were before them. But it would be a grave blunder on their part, and will not help their cause, to expect to be given credit for more than they can actually show. Two or three years are a very small item in the history of a nation, and if Turkey is now to go ahead and attain not merely nominal, but also real, independence, the Nationalists had better begin to build slowly and surely. They have gained their point in regard to territorial integrity; the harder task of administering the country in such a way that it can achieve economic prosperity lies ahead of them. Already they have made false moves in attempting to repudiate Constantinople's debts since 1920 and in the fiscal policy that they are adopting in Smyrna. Such measures may be in keeping with Angora's mood at the moment, but they argue neither statesmanship nor ordinary commonsense. Territorial integrity alone will not pay for the building up of a modern State, and the new Turkey will not be able to travel far without foreign loans. The more the Kemalists try to extort from the Allies in regard to Capitulations or seek to penalise foreign trade and traders the more unlikely they are to

Digitized by Google

obtain the financial assistance that Turkey so urgently needs. Every allowance will be made for the exuberance of spirits of a victorious army, but the country has every right to look to Mustapha Kemal and his associates for political wisdom and a practical policy at this stage. The failure of Turkey in the past has been due to her inability to assimilate the principles of reciprocity and good faith, on which the political relations of Europe are based.

FRANCE, GREAT BRITAIN, AND ISLAM.

Syria and Cilicia.

The resignation of General Gouraud, French High Commissioner in Syria, may well mark a new epoch in French relations with that country, but it is to be hoped that France does not intend to repeat in Syria comparatively recent events in Cilicia. Immediately after the Armistice, France, it will be remembered, began to agitate for the surrender to her of Cilicia and Syria, in spite of the pledge that the British and French Governments had given that their joint aim in regard to the peoples freed from the Turks was "to establish national governments and administrations, which shall derive their authority from the initiative and free will of the peoples themselves." In September, 1919, Great Britain handed over to a French military administration the control of the two coveted territories. Some four months later, however, the Turkish Nationalists began active operations against Marash, and the value of Cilicia seemed to depreciate almost at once in French eyes. Marash was evacuated, and the hapless Armenians, some of whom had been armed to support the French troops, were left to the tender mercies of the victorious Turks. Other towns shared the same fate, the defence of the country being left for the most part to locally raised troops, with or without French leadership. An armistice of brief duration towards the end of May suggested that French policy in Cilicia was about to receive a fresh orientation. The process of evacuation before the Kemalist forces was continued throughout 1920, with what seemed to others as half-hearted attempts to stem the tide, although General Gouraud has referred to it as a "magnificent and hard campaign against the Turks," but it was not until October, 1921, that the Angora agreement, negotiated by M. Franklin-Bouillon after many months' delay, set an official seal on France's surrender of Cilicia. In the light of these events, the French must not be surprised if in some quarters it is held that there is an uncomfortable resemblance between Cilicia's recent history and their present attitude towards Syria, for which much less entnusiasm is being shown than formerly.

It is at this stage that the need for whole-hearted agreement and co-operation between France and Great Britain in the domain of foreign affairs would seem to be paramount. A feeling of solidarity in the Moslem world is growing before the world's eyes to-day, and there is no room for divergent policies on the part of the two great Mohammedan Powers. In Egypt and Iraq, and to a less degree, owing to Zionist complications, in Palestine, Great Britain has embarked on the only sound course of action in regard to Mohammedan countries of the present day, and France must realise the fact by now. There is, however, a great difference between a grant of self-government, whether complete or with reservations, and the return to a régime from which the same people were solemnly promised "complete and final emancipation." If for one reason or another the French were to allow the Turks back into Syria, they would be guilty of the cruellest breach of faith, which would not be so easily glossed over as the cynical betrayal of the Armenians of Cilicia.

They might think that they were conserving their power, and that by surrendering Syria they would be in a better position to hold Tunisia. There could be no greater mistake. It did not take long for the Angora Agreement to awaken an echo in France's North African possessions, where the independence movement cannot be indefinitely suppressed. The connection between Tunisia and Near Eastern events has not escaped French observers. French policy in Tunisia was the subject of an interpellation in the Angora Assembly last April, when the Commissar for Foreign Affairs stated, in reply, that the National Government could not abandon its interest in the fate of Mohammedans who still found themselves under a foreign yoke, and he expressed the hope that the friendship affected by France towards Turkey would lead the French Cabinet to adopt in its Moslem colonies a policy conformable with the right of self-determination. General Gouraud must have had this connection in mind when, in the course of a Press interview last June, he spoke of the French mandate bringing about the formation of a State that might be one of the strongest guarantees for the balance of power in the East. He added: "If the balance is once re-established in this vital spot, there will be peace not merely in the East, but in the whole of French Northern Africa."

Recent Events in Tunisia.

It may contribute to an understanding of France's difficulties if reference is made to recent Tunisian history. For some time past the Tunisians, Berbers, and Arabs, have been chafing under French rule, and the unrest came to a head last April, when, on the eve of the French President's visit, undertaken specifically for the purpose of trying to win back Moslem goodwill, the Bey abdicated, and disturbances occurred in the capital. Every effort was made to hush up the incident, which turned largely on the rejection by the French authorities of certain Tunisian demands. These demands, embodied in a document known as "The Eighteen Points," were as follows:—

THE EIGHTEEN POINTS.

1. The re-establishment of the absolute power of the Bey, who would have the sole right of appointing and dismissing Ministers.
2. Improvement of the financial and moral position of the Beylical family.
3. The five Departments of State—Finance, Posts and Telegraphs, Agriculture, Education, Public Works—to be under native Ministers with French assistants.
4. A Deliberative Assembly of Tunisians and French, elected by adult suffrage and having extensive financial control.
5. Government to be responsible to the Assembly.
6. Separation of legislative, executive, and judicial powers.
7. All administrative posts to be open to Tunisians subject to their possessing the intellectual and moral qualifications required of Frenchmen.
8. Equal pay as between Tunisians and Europeans for officials performing similar duties with equal competence.
9. Respect for the Harbous, both public and private (*i.e.*, moneys, lands, etc., left by will for special purposes).
10. Reorganisation of and respect of the Chara (*i.e.*, Mussulman tribunals responsible for the administration of the Religious Law).
11. Compulsory education, and provision for the sending to Europe of native pupils, who have finished with distinction their studies in Tunisia.
12. The establishment in Tunis and all large towns of primary and higher schools.
13. Abolition of the system of grants of land to new colonists.
14. The right of Tunisians to participate in the purchase of agricultural lots from State lands.
15. Suppression of the system of (French) naturalisation. Every person, except those of French (? European) nationality, after five years' residence to be considered a Tunisian subject and to be amenable to Tunisian courts of justice.

Digitized by Google

16. Compulsory military service for all Tunisians. The Tunisian army to carry the Tunisian flag, and not to serve outside Tunisia.

17. Consolidation of the Debt into a single Loan.

18. Liberty of the Press and freedom of meeting and assembly.

It is significant of the French attitude towards the Tunisian problem that the most drastic steps were taken to suppress all public reference to these demands. The Bey was compelled to return to Tunis and to withdraw his abdication. He contrived to present M. Millerand with a copy of "The Eighteen Points," and it is understood that some minor concessions have since been made to native susceptibilities.

With the prospect of Egypt and Iraq entering the League of Nations, it is unlikely that Tunisia will be content to forgo much longer her emancipation. Already some disillusionment has overtaken the French public in regard to the Angora Treaty, and it must be evident by now that the agreement with the Turkish Nationalists is likely to have different results from those originally contemplated by M. Franklin-Bouillon. In these circumstances the French, we may hope, will see the wisdom of not allowing their Near Eastern policy to jeopardise their alliance with Great Britain. Under the mistaken idea that they have had something to gain by trying to steal a march on the British in the Near and Middle East, they have failed to promote their real interests in any part of the world. If French and British policy in regard to Moslem peoples could be brought into line, the world might be spared the considerable amount of unrest that is likely to occur if Turkey or any other country imagines that it can play off France against Great Britain.

REFUGEES AT SALONIKA.

We have received from Mrs. Archibald Little a copy of a letter written to her by Sister Augustine, of Salonika. The letter was written under the very obvious dread of war breaking out in Thrace, and depicts the misery in which people of that district are living. On top of the thousands of Caucasians and Russians came 60,000 refugees from Asia Minor, and that when bread in Salonika was scarce, and what there was of it black and indigestible! Every effort, the letter-writer states, is being made on behalf of the refugees, but the task is enormous. "Bread is at Dr.2.70 the oke; everybody must have at least half an oke, that is Dr.1.35, for bread alone. At Zeitenlik we are giving tea and bread in the morning, soup and bread at midday. It is very little, but means a lot of money. God will provide!" On behalf of these refugees at Salonika the Hon. Katherine Thring, 5, Queen's Gate Gardens, S.W.7, will gladly forward any gifts of clothes sent to her; and Mrs. Archibald Little, 52, Morpeth Mansions, S.W.1, will be grateful for any gifts of money to forward to the Sisters of Charity, Salonika.

REFUGEES FROM SMYRNA.

We have received the following additional temporary addresses of some of the British refugees from Smyrna:—

Mr. and Mrs. H. W. Carter and two small children, Cleopatra Hotel, Nicosia, Cyprus.

Mr. M. Gallia, Cleopatra Hotel, Nicosia, Cyprus.

Misses Amy and Grace Joly, Cleopatra Hotel, Nicosia, Cyprus.

Mrs. J. D. Langdon, Cleopatra Hotel, Nicosia, Cyprus.

Mr. and Mrs. J. W. Maltass and daughter Ferrah and son William, Cleopatra Hotel, Nicosia, Cyprus.

Mr. and Mrs. R. J. Stokes and three small children, Cleopatra Hotel, Nicosia, Cyprus.

Mr. H. A. Walker, c/o Mr. R. A. Pengelley, Imperial Ottoman Bank, Limassol, Cyprus.

The Directorate of the All-British Appeal for the Relief of the Famine in Russia and distress in the Near East have supplied the "British Refugees from Smyrna Relief Fund" with £500 for distribution in the United Kingdom. They have sent £1,500 to Lord Plumer's Committee for the British refugees at Malta, and have transmitted £250 through the Foreign Office to H.M.'s Commissioner at Cyprus. They have also despatched goods amounting to £12,000 to Athens. At the present time the Directorate's funds are very limited, and the calls on them very great. It is hoped that the Lord Mayor's fund will be generously supported.

A RETIRED EGYPTIAN OFFICIAL.

A correspondent writes from Cairo, apropos of the departure of British officials:—"The placing on pension of Arthur McKillop Bey, Inspector-General and Acting Under-Secretary of State for the Department of Agriculture, would seem to be somewhat injudicious, as during the period of transition it would possibly have been wiser to retain the services of some of the officials of known experience and efficiency. . . . He entered the Egyptian Service in 1891, at first in the Irrigation Service, and shortly afterwards was appointed to the Cadastral Survey Department. In 1899-1907 he was in charge of the Readjustment of Land Tax operations, and was later appointed Chief Inspector of Finance. In 1910, when the Agricultural Department was created, he was placed in charge of the administration, and when the Department became a Ministry he was appointed Inspector-General and Acting Under-Secretary. That position he held until March of this year, when an Egyptian was appointed Under-Secretary. Contrary to the usual attitude of the superannuated, Arthur McKillop is leaving the Egyptian Service without a 'grouse,' and he has no grievance against the Government."

Proposals have been made to establish a French Legation in Afghanistan.

The Colonial Office have received a dispatch from Aden stating that the Emir of Asir is alive and well.

The Postmaster-General points out that within recent months 80 per cent. of the letters addressed to the troops serving in Iraq have been insufficiently prepaid, and that all correspondence posted to Iraq, whether to soldiers or civilians, should be prepaid at the international rate of 3d. for the first ounce and 1½d. for each subsequent ounce. Letters to the troops in Iraq should bear on the envelope the name of the last-known station at which the unit was serving.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

Cotton Growing in the Sudan.

An extremely satisfactory report is forthcoming from the Sudan Plantations Syndicate for the year ended June 30. The cotton which passed through the company's ginning factories amounted to 11,386 bales, an increase of 6,819 bales, due mainly to the production at the company's new station at Hosh, and the net profits amounted to £131,627, as compared with £38,968. An interim dividend of 3s. per share has been paid, and a final dividend of 2s. per share is now proposed, together with a bonus of 2s. per share, making 35 per cent. for the year, as compared with 15 per cent. for 1920-21 and 35 per cent. for 1919-20. A pumping station is being erected at Wad-el-Nau under arrangements made with the Sudan Government for the more rapid development of the Gezireh, and it is expected that this station will produce a crop in 1923-24. The temporary difficulties which stood in the way of the completion of the Blue Nile Dam at Sennar have been overcome, and the directors believe that every effort will be made to complete this great work within the next three years.

The New Indian Loan.

Another Indian loan was put on the market last week, subscriptions being invited for the substantial amount of £20,000,000, the price of issue being 85 and the interest 4½ per cent., the yield being thus roughly £5 6s. The loan is repayable at par on May 15, 1955, but it may be redeemed on any interest date after May 15, 1950, provided three months' notice is given. As was to be expected in the case of such a large loan, the terms of subscription are easy, the final instalment not being payable until February 12. As in the case of previous issues, the loan is for railway and general purposes. It is worthy of note that this is the fourth Indian loan within a year and a-half. In April, 1921, a loan was issued for £7,500,000 in 7 per cent. stock at par; the next loan was for an amount of £10,000,000 in 5½ per cent. stock at 93½; while the third was for £12,500,000 stock, again at 5½ per cent., but issued at 93. Thus, while the loans have gradually increased in amount, the rate of yield has continually decreased, and between the first and the last there is a very substantial difference.

Bengal-Nagpur Railway.

The Bengal-Nagpur Railway report illustrates the difficult conditions under which Indian railways have been labouring in the past year or so. While there was a decrease of about 1¼ per cent. on Rs. 2,79,659 in respect of the passenger traffic, there was a substantial increase in respect of the goods traffic, and there was an increase in the gross earnings of Rs. 34,34,000. There was an increase in working expenses, however, of Rs. 60.21 lakhs, or 14.20 per cent., and there is thus a decline in the net earnings of Rs. 25,86,600 or just under 12 per cent. The increase in expenses has been due partly to higher wages and the high cost of materials, and partly to the increased repairs to engines and wagons. Deducting the interest on open line capital, a deficit is shown as regards surplus profits of Rs. 8,03,628, and there are thus no surplus profits for division between the Government and the company, and the company have obtained a refund of approximately £6,000 in respect of taxes paid to the Government in advance in respect of estimated surplus profits. For the first half of the year the shareholders received as guaranteed interest £1 15s. and an interim dividend of 15s. per cent., together with a bonus of 10s. per cent., both these latter items being paid from the reserve. Besides the second half of the guaranteed interest, the directors recommend the payment from the reserve of 15s. per cent. and a bonus of 10s. per cent., making 6 per cent. for the year, as for the previous twelve months. The directors state that in view of the favourable prospects of the current year, they feel fully justified in this course.

New Suez Canal Director.

The interesting announcement is made that Mr. J. T. Davies, C.B., who has been private secretary to Mr. Lloyd George since 1912, has been offered and has accepted the position of a director of the Suez Canal Company. This seat on the board is one of the three occupied by representatives of the British Government, Mr. Davies' colleagues being Sir Ian Malcolm and Mr. H. T. Anstruther. Including these three directorships, there are ten British representatives on the board, which is composed of thirty members. The remuneration of the directors is dependent on the results of the company's working, 2 per cent. of the divisible profits being divided among them.

A Banking Amalgamation.

It is announced that the famous banking firm of Messrs. Henry S. King and Co. and their Indian branches have been acquired by Messrs. Cox and Co. The firm was founded in 1816 under the name of Smith, Elder, and Co., and in 1853 Mr. H. S. King joined the firm, the name being changed to its present title fifteen years later. Sir Henry Seymour King, who has been the sole partner for the past forty-four years, is now over seventy, and it is believed that the amalgamation was decided upon in view of his advancing years. The development is from every point of view a satisfactory one. It is greatly in the interests of this old-established bank that it should come under the control of Messrs. Cox and Co., while the famous Army bank cannot but benefit from the enlarged scope that will accrue to it as the result of the amalgamation.

COMMENTATOR.

BANK OF ROUMANIA LIMITED
(FOUNDED 1866).

BRITISH INDUSTRIES FAIR · 1923

LONDON & BIRMINGHAM

February 19th to March 2nd 1923

Organised by H.M. Department of Overseas Trade

IMPORTANT TO MERCHANTS AND BUYERS

The Ninth British Industries Fair provides an unequalled opportunity for home and overseas buyers to inspect conveniently and in comfort the best British goods. The most enterprising and dependable firms in Great Britain will be in keen competition, at this great demonstration of British manufacturing resources, to supply home buyers and overseas importers with new goods for the coming season's trade. Come yourself, or send your buyers.

SCHEDULES:

LONDON

White City,
:: W. ::

Musical Instruments. Furniture and Basketware. Sports Goods, Toys, etc. Jewellery, Silverware, Cutlery, etc. Scientific and Photographic Goods. Chemicals and Drugs. Stationery and Printing. Fancy Goods, Travelling Requisites, etc. Brushware. China, Earthenware, Stoneware and Glassware. Foodstuffs and Beverages. Fancy Leather Goods, Leather, etc.

BIRMINGHAM

Exhibition Buildings,
:: Castle Bromwich ::

Brassfoundry, Hardware and Ironmongery. Metals. Construction, Building and Decoration. Power, Lighting, Heating, Cooking and Ventilating. Engineering in all Branches. Agricultural Machinery. Mining Appliances. Motors, Motor Cycles, Cycle Accessories. Perambulators. Guns, Saddlery and Harness, Fishing Tackle. Brewing and Distilling Appliances.

The finest display of Quality Goods in the World

Descriptive Booklets and Invitation Tickets may be obtained from nearest British Legation, Consulate, or on request to the Secretary, British Industries Fair, 35, Old Queen Street, Westminster, London, or the General Manager, Chamber of Commerce, Birmingham, England.

GREAT BRITAIN AND THE NEAR EAST MARKETS.

I.—The Scope for Enterprise.

It is not difficult for a whole region to lose popularity as a trade centre because of the unfortunate experiences of merchants and manufacturers in one district, and that is what has happened with regard to the Near East, judging from the attitude of the great majority of the business community. Competition before the war in the Balkans, trading conditions which British firms do not care for elsewhere, and, after the war, the unfortunate "slump" following the short-lived boom, which led to many firms incurring serious losses, have had the effect of making many British firms averse from hearing of the Near East as a business centre. They are not inclined to discriminate between the markets; good or indifferent are lumped together, those where there is no exchange problem with those whose exchanges are at an impossible level; those which are within the Empire and offer splendid scope for trade endeavour with those which are not, and where the position is at present unfavourable for British commerce; those where there is a very special opening for British goods with those where our produce could find no such demand.

It is an absurd situation, and one which arises in the main from lack of knowledge, and in part from lack of energy on the part of our traders. If the Empire is due to a series of accidents, it is at least as certain that our trade is. Of enterprise of the individual type there has never been any lack, but continued effort has been conspicuous by its absence. The considerable British trade with the Near East before the war was due, in the main, to the initiative of comparatively a few firms, and many of them reaped a rich harvest by their recognition of the possibilities of that region. Of their achievements far too little is known, but throughout the Near East there is hardly a district but bears traces of British enterprise in one form or another. Smyrna affords an outstanding example. The great trading centre of Asia Minor, its development was due to the work of British firms, and it will be surprising if, in its renewed ascent to importance, they do not again take the predominant part. In many other places British traders have played an almost equally prominent rôle, and one would think that only a knowledge of what has been done in the past and of the greater opportunities that will present themselves in the future is needed to induce British firms as a whole to take a much wider interest in the Near East.

Certain it is that in the future Great Britain will need all the markets it can obtain, and it is incumbent on our traders henceforward to pay the fullest attention to the commercial openings in the Near East. Apathy to individual markets was possible before the war, when the whole world was open to our trade, but industrial developments in so many countries during the last few years have made it obvious beyond argument that if this country is to support its present population the fullest utilisation must be made of every trade outlet. It is a choice between initiative on the part of the commercial community or emigration on a wholesale scale. Admittedly at the moment there is little to be done in some of the Near East markets, partly on account of the adverse exchanges, partly owing to the impoverishment of the population; but in others—and they are a large number—there is almost as much scope as there was before the war. In the present conditions it is unthinkable that advantage should not be taken of the possibilities. The late Administration lost popularity among the commercial community because it did so little to remedy the trade position, and, indeed, by its policy in regard to Turkey, actually made matters worse. Mr. Bonar Law has made it clear in his election address that the trade position will be a primary concern of the new Government, and the policy he has outlined of the development of trade relations within the Empire as the only way of tiding over the period of abnormal economic conditions should help to give a most useful impetus to trade with the Near East; for if, as may be assumed, the policy will be sufficiently elastic to include Mandated Territories, then the majority of the markets in the Near East where trade is now feasible will be covered.

This policy can only meet with the expected success, given the wholehearted co-operation of the trading community, and that will mean an end to apathy as far as the Near East markets are concerned, for the development of satisfactory relations with many districts of that region could not fail to have the most favourable repercussion on British relations elsewhere when conditions permit of normal trade enterprise. As we have said, ignorance has been the chief barrier to commerce with the Near East, and until a wider knowledge of these markets exists, nothing considerable can be achieved. At present the number of merchants and manufacturers who concern themselves with such markets as Palestine, Egypt, and the Sudan is relatively small. The conviction has to be brought home to the majority that a large and remunerative business can be done given the requisite will to trade, knowledge of local conditions and enterprise. Once the facts are known, it is difficult to believe that there will not be an adequate response.

Commencing shortly, THE NEAR EAST proposes to publish a series of articles on the various Near East markets giving the latest information as to the prospects of business in these outlets. The articles will deal principally with the regions where trade is immediately practicable, but will also cover the other markets which, it must be emphasised, ought on no account to be neglected by British traders because of the temporary obstacle of the exchanges, for otherwise the advent of normal conditions will find our trade rivals securely seated there and the scope for business severely limited.

BANQUE FRANCO-SERBE

EGYPT'S IMPROVED FINANCIAL POSITION.

(From Our Own Correspondent.)

Cairo, October 20.

The details of the accounts for the last financial year make very pleasant reading. It is certainly satisfactory to find that the anticipated deficit has been converted into such a substantial surplus, and that notwithstanding the additional calls made on the Government the expenditure has been kept well under the estimate. The information available with regard to the current year is equally comforting. It was recently announced that Unified Debt, costing £E1,000,000, had been purchased by the Egyptian Government. This amount forms part of the surplus so far available, and it is confidently believed that it will be possible to bring the Reserve Fund, which on April 1, 1921, stood at little over £E1,500,000 to £E8,000,000 on April 1 next. This extrication of the country from the very serious financial situation which confronted it on April 1, 1921, redounds to the credit of the financial staff of the Government as well as the departmental heads, who have so loyally collaborated in keeping expenditure down; and the present satisfactory condition of the country's finances fully justifies the confidence reposed by the financial and commercial communities in the present Minister of Finance, Ismail Pasha Sidky.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Clothing, etc.—The Lunacy Division, Abbâsiya, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers, brushes, and other household necessaries required for Abbâsiya and Khanka Asylums for one year from April 1, 1923. November 21.

Rations.—The headquarters of the Ministry of Education, Sharia El Turka el Gharbi, El Insha, Cairo, invites tenders for the supply of rations required for certain Government schools, for a period beginning from January 1, 1923, and ending December 31, 1923: November 21.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer Egypt and the Sudan Governments' Office, London: January 2.

Paving Stones.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 130,000 paving stones and 8,000 head stones (boutisses) required for the maintenance of the Port of Alexandria. December 15.

Electric Cranes and Lifts.—The Administration of Ports and Lighthouses, Alexandria, invites tenders for the following fixed and movable lifting apparatus for service at the Port of Alexandria:—

Eight travelling electric portico quay cranes, six of which are to be of 2,500 kilogs., the other two being double-power cranes of 2,500-5,000 kilogs.

Eight travelling balcony cranes of 500 kilogs.

Eight electric lifts; maximum carrying power, 1,500 kilogs.; speed per second, 0.50 metre.

Supply and laying 320 metres of rails for the running of the quay cranes.

Supply and laying of 280 metres of rails for the running of the balcony cranes.

(The electric power will be furnished by the Railways Administration's Power Station, as three-phase current at 220 volts, 40 cycles.)

Sealed tenders are to be addressed to the Directeur-Général, Administration des Ports et Phares, Alexandria, Egypt. December 20. (D.O.T.)

India.

Stoneware Pipes, Cast Iron Pipes, etc.—The High Commissioner for India invites tenders for the supply of:—(1) Glazed stoneware drainage pipes, syphons, etc. (various); (2) cast iron pipes, socket and spigot, turned and bored 15 in. (No. 667); (3) railway wheel turning lathes, 48 in., motor driven (No. 2); (4) D.c. low tension three-core and two-core cables (81,373 yds.). Form of tender may be obtained from the Director-General, India Store Department, No. 10, Belvedere Road, Lambeth, S.E.1. Nov. 17.

Tyres.—The directors of the Burma Railways Company, Ltd., invite tenders for the supply of 520 steel tyres for carriages and wagons. Tenders to be addressed to the company's offices, 199, Gresham House, Old Broad Street, E.C. November 6.

Wheel Lathe.—The Bengal-Nagpur Railway Company, Ltd., invites tenders for the supply of a wheel lathe. Specification and form of tender can be obtained at the company's offices, 132, Gresham House, Old Broad Street, London, E.C.2. November 10.

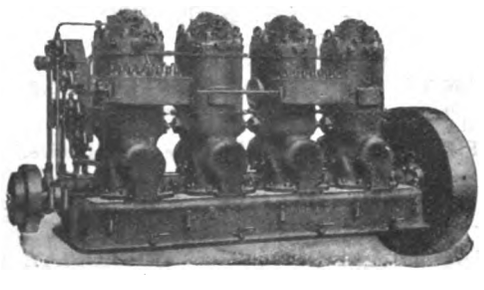
Malta.

Malta Mail Service.—The Government of Malta invites tenders for the conveyance of mails between Malta and Syracuse. Tenders must be sent sealed to the Director of Contracts, Malta. December 21.

Iraq.

Timber Wagons.—The Ministry of Defence, Government of Iraq, Baghdad, invites tenders for the supply and delivery of:—(a) (Section No. 21a).—24 fore and 24 hind general service timber wagons, complete with accessories and fitted with the No. 45 wheel. (b) (Section No. 5a)—24 double lead sets of harness and 24 double wheel sets of harness, each complete with whip and legging. November 30 (D.O.T.).

Stirrup Irons.—The Ministry of Defence, Baghdad, invites tenders (covering delivery c.i.f. Basrah) for the supply of—980 extra large stirrup irons (5-in. tread), and 420 large stirrup irons (4¾-in. tread), of British Army regulation pattern, standard, and quality. November 30.



Power at Minimum Cost.
The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.
It is easy to start and runs unattended for long periods.

THE 'ALLEN' HEAVY FUEL OIL ENGINE

From 15 BHP to 200 BHP.

For Quotations apply direct to Head Office or to :—

EDWARDS & SONS (Near East), LTD., Gulbenkian Han, Sirkedji, Stamboul, Constantinople

YUGOSLAVIA'S ECONOMIC RESOURCES.

The Need for Railways.

At the City of London College, Moorfields, on October 30, Dr. Dragutin P. Subotitch gave an interesting lecture on the economic resources of Yugoslavia. Dr. Seton Watson presided, and among those present were the Ministers of Yugoslavia and Bulgaria and representatives of the Roumanian Legation.

Dealing with agricultural production, Dr. Subotitch said that in the production of maize Yugoslavia occupied the first place in Europe and the second in the world; in wheat, fifth in Europe and eighth in the world; in rye, ninth in Europe and tenth in the world; in oats, fifth in Europe and seventh in the world; in barley, sixth in Europe and tenth in the world; in potatoes, seventh in Europe and ninth in the world; in flax, fourth in Europe and eighth in the world. In the course of 1920 Yugoslavia imported over 24,000 ploughs alone, in addition to a large number of other implements, most of which were bought by the Ministry of Agriculture and retailed to peasants at half the purchasing price. Perhaps no other country was importing such a large quantity of agricultural implements, and yet the number of imported implements was still greater in Serbia alone before the war.

Next to grain-growing came fruit farming—in particular, plum-growing. Plum orchards were the pride of Yugoslavia, for in the production of plums the Yugoslavs occupied the first place in the world. The plum crop of Yugoslavia exceeded the combined plum crops of France and the United States, the next highest producer of plums. There were in the whole kingdom about 642,000 acres laid out in plum orchards. Two-fifths of the whole production were dried into prunes. From two-fifths plum brandy was distilled, and one-fifth was made into jam.

Grape-growing was a not less important branch of Yugoslav fruit farming. It was estimated that the total production of wine was about 52,000,000 gallons annually, but it must be remembered that the vineyards in a considerable portion of the country had been destroyed. There was, however, a surplus of about 9,000,000 gallons to be exported, which went mainly to Austria, Czecho-Slovakia, and Poland. The growing of other fruits was also very important, and great quantities of apples, pears, walnuts, olives, dates, etc., could be exported. The farming of cherries and morella cherries had a great future. The Dalmatian cherry brandy called "Marskin" had already found its way into foreign markets.

Next to fruit farming came the breeding of live stock. There were thirteen Government stations devoted to improving the breeding of horses, and the live-stock industry as a whole was extensive. In 1921 Yugoslavia exported over 22,000 head of horses, over 100,000 cattle, 220,000 pigs, about 135,000 sheep and goats, and nearly 300,000 fowls.

Among the principal riches of the country were the forests and the mines. The total forest area amounted to about 18½ million acres (35 per cent. of the total surface), of which nearly eight millions were State property; about four millions were in the hands of municipalities and parishes; over one million were owned by monasteries and churches, and about 5½ million acres were in private hands. In the course of the year 1920, two hundred and fifty thousand tons of timber, or timber products were exported, which represented 25 per cent. of the total export. Slovenia grew juniper, deal and beech. It had 2,000 water sawmills and 35 steam sawmills. Before the war much furniture was produced for export, but at present home needs only were supplied. Croatian or Slavonian oak was well known on all markets, and bentwood furniture used to be produced for export to all parts of the world. Distillation of wood was carried on at one or two factories in Bosnia.

There were minerals of practically all sorts, and the mining industry had a great future. An American mining engineer, who made an extensive and official survey, said in his report, "The kingdom contains a greater variety of minerals useful to mankind than any other similar area in Europe. Here one can find areas of iron, nickel, aluminium, lead, antimony and bismuth, copper, arsenic, sulphur, mercury, gold, silver, building and ornamental stone, gypsum, kaolin and clays, and probably mica and asbestos. In addition to which there are many mineral and hot-water springs of commercial and therapeutic value. Among the organic minerals there are bituminous shales, brown coal, lignite, anthracite, asphalt, graphite, oil and gas."

Several parts of the Serbo-Croat-Slovene kingdom presented apparently favourable conditions for the occurrence of oil, but as yet the only area in which it had been proved to exist in any quantity was Croatia. The Ministry of Mines and Forests in Belgrade, which directly supervised and administrated the mining industry in Yugoslavia, had entrusted the examination of this oil area to the American Standard Oil Company, which was to form a limited company for the exploitation of the petroleum, the State reserving 25 per cent. of the shares for itself.

On the whole, Yugoslavia might be regarded as a country of great mineral wealth which was practically unexploited. The development of the mining industry, however, depended not only upon more active encouragement from the State, but especially upon capital and the solution of the existing transport problem.

Transport difficulties had been one of the chief obstacles to Yugoslav trade since the war. A great improvement had been achieved during the last two years, but some years yet would have to pass before the old lines were properly restored and the new ones laid down. Serbia and Montenegro alone required 2,400 miles of lines more, which meant that seven or eight years of work and some 40,000,000 dinars a year were required.

There was great need for the construction of many local lines, but the greatest of all needs was for a railway line leading to the Adriatic Sea, because the only line, a narrow gauge one, built by the Austrians for strategical purposes, did not lead to a proper port, and because there was no traffic between Yugoslavia and Fiume. In the opinion of the great majority of Yugoslavs the economic restoration of the country almost wholly depended on the construction of an Adriatic railway. The Yugoslav Government realised, that to carry out this work a substantial sum of money was necessary, which could not be raised in the country. An attempt therefore was made, not long ago, to obtain a loan in England, but it did not succeed. The Yugoslav Government then decided to wait for a more favourable time, when foreign capital would be offered, not asked for. And indeed, such an offer was made several months ago, and at last a loan of one hundred million dollars was concluded with an American financial group.

At present Yugoslav trade was turning towards the countries whose rates of exchange were most favourable, namely, to Austria, Germany, Czecho-Slovakia and Italy, while other countries were as yet but little represented. Great Britain's share was very small. The United States, on the other hand, was pushing her trade with effect, and had almost doubled it during the last year. The rate of exchange in both these countries was very much against the Yugoslavs, yet the Americans seemed to be somehow quicker in establishing commercial and other connections with Yugoslavia.

The recently issued statistics of foreign trade for the year 1920-21 gave an interesting survey of the development of Yugoslav trade during the last three years. In 1919 the imports amounted to roughly 28½ million pounds and the exports to 6½ million pounds, at the present rate of exchange. In 1920 the imports increased to roughly 38½ million pounds, but the export was double that of the previous year, amounting to just over 13 million pounds. In the first nine months of 1921 the imports, for the first time since the formation of the new Yugoslav kingdom, began to fall off, owing mainly to the saturation of the country with imported articles and partly to the difficulties of paying for imports as the result of the fall of the dinar.

The reason for the adverse balance of imports and exports was to be found in the fact that in a great part of the country, after the liberation, recourse had to be made to the importation of every kind of article owing to the lack of almost all manufactured goods, both for the reconstruction of the country and to supply the needs of the population. The export of foodstuffs, on the other hand, was hindered by frequent prohibitions and restrictions, imposed in order to assure home needs as well as by costly railway transport.

Taking into consideration this year's harvest, the constant though slow improvement of transportation, as well as the arrival of a big supply of technical articles and machinery from Germany, on account of reparations (which represented a considerable part of their imports), there was every hope of a favourable balance of trade in the near future, even with Great Britain, provided the English people were not too slow in restarting connections with Yugoslavia.

Mr. A. G. M. Dickson, Chairman of the London Committee of the National Bank of Turkey, has been elected to a seat on the Boards of the British Trade Corporation and the Chile Telephone Company.

LONDON PRODUCE REPORT.

Lemon Demand Good.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in good demand at last rates. Tate's cubes have come to business at 56s. 6d., and mineral water sugar has been a steady feature at 51s. London and Lyle's granulated are 51s. 7½d. and 50s. 10½d. respectively. Foreign descriptions show no change. West Indian crystallized has been firm at 43s. 6d., while white Mauritius has been steady at 47s. 9d. Quotations are:—October, 22s. 6d.; November, 21s. 6d.; December, 21s. 6d.; January, 21s. 6d.; March, 21s. 7½d.; May, 21s. 9d.

Coffee.—Quotations remain unchanged. East Indian is the same at 116s. Costa Rica is firm at 110s., as also Nairobi at 100-102s. The futures market is firmer. Quotations are:—December, 61s. 9d.; March, 61s., May, 61s.

Desiccated Coconut.—A good home trade has been in evidence during the week, while the market is firmer.

Rice.—All growths of the new crop rices are being met with a ready market, while the quality is of an excellent character. Prices for most new crops are comparatively low, with the exception of Italian Japan, which has gone entirely out of favour owing to the high prices demanded.

Green Fruit.—South African orange arrivals have been very poor, while further advances are to be noted. The season for this fruit must now be considered practically at an end. Quotations are:—Bold fruit, 27s. 6d. box (96 and 112's); medium size, 27s. 6d. box (252's); and the Popular Counts, 30s. box (200's and 216's). Malaga lemons are being met with a good demand at firm rates. Although only in a semi-coloured condition they have found a ready market. Owing to the green condition of the new crop Messina fruit, which has just arrived, buyers are neglecting them for Malagas. Prices are: Malaga lemons, 26s. box (300's) for good clean; and 27s. 6d. to 30s. case (420's) for good clean to extra superior clean. Naples lemons have come to business at 50s. to 60s. a large box (300's). The demand for onions has been in excess of the supply, with the result of an all-round hardening of prices.

Dried Fruit.—A good demand has been noticeable for all kinds of dried fruit, and prices have been firmer than for some weeks past. Sultanas have been a very firm market, and prices have hardened. The demand for figs has been very poor, while quotations for layers and locoums are far too high for the general trade.

Oilseeds.—Unsteadiness prevails throughout. Indian linseed has shed 3d. at 20s., and La Plata is 1s. 4½d. down at 15s. 9d. Rapeseed shows no change with Toria at 18s., and bold Ferozepore at 16s. 7½d. Cottonseed has advanced. Egyptian black is 1½d. up at 10s. 1½d., while Indian has gained a like amount at 8s. 4½d. Sakellarides is 6d. up at 9s. 10½d.

Oils.—An upward tendency has been in evidence. Linseed oil has gained 6d. at 40s., while crude rape oil and refined are both 9d. up at 41s. 3d. and 44s. 3d. respectively. Cotton oil has been fairly steady. Egyptian has advanced 6d. at 35s., while refined is 1s. up at 44s. Deodorised and technical show no change at 48s. and 37s. respectively.

Oilcakes.—A slight advance has taken place for linseed cake and cottonmeal cake, which are both 10s up at 260s. and 240s. respectively. Cottonseed cake at 140s., and coconut cake at 170s. are both unchanged.

AGRICULTURAL SITUATION IN IRAQ.

The following extracts are taken from the *Agricultural Bulletin* of Iraq for the period August 16 to September 15:—

Water has everywhere been reported as plentiful except on the Khalis and Yusufiah Canals, where temporary shortages have had an adverse effect on crops. Sesamum appears to be doing particularly well this year, and from reports available there are indications of a good rice crop.

Experimental Farms.

Kut-Amara.—Grain, stores, implements, etc., have been transferred to the Central Farm at Rustam prior to closing down in October.

Baquba.—Cotton, sun hemp, lucerne, ground-nuts, and mulberry seedlings are all doing well. The cotton plots have been carefully and systematically rogued with a view to securing a good supply of seed for further propagation in 1923.

Central Farm, Rustam.—Ploughing, cross-ploughing, and harrowing have been continued throughout the month. The calm weather experienced towards the end of the month has retarded the winnowing of the Punjab wheat which has been grown, and reserved for distribution this coming winter. The total quantity available is not known as yet, but it is confidently expected to be more than sufficient to meet all demands.

Cotton picking has been in progress, but first pickings have not been heavy. The profusion of bolls, however, gives every indication of good subsequent yields. Other summer crops are in good condition with the exception of lubin, which suffered for lack of water purposely withheld in favour of other more important crops.

Cotton.

Favourable reports are to hand from the Saklawia area, where water supply has been favourable this year. The estate of the Koyumdjian Brothers has been severely attacked by boll-worm. The severity of the attack is a present under investigation. Water shortage on the Yusufiah has given the cotton a temporary set-back. Otherwise crops in this area are reported to be doing well. Cotton in the Baquba area continues to suffer through indifferent treatment by fellah and malak alike.

Research.

Threshing and winnowing of single-line varieties of wheats has been completed. About 120 single-plant selections have been made. Weekly bolling and daily flowering records of cotton continue to be maintained, in addition to which monthly height records are being taken.

Throughout the month soil and water analyses were conducted, the former for Royal Estates, and the latter in connection with experimental flax-retting operations conducted at Shaikh Janaid. Estimates of dry matter produced as a result of green manuring experiments were also conducted.

Boll-worm attacks were noted on the cotton grown on the Royal Estates. The absence of stem-borer attacks on imported varieties of American maize is particularly noticeable this year, although it was noticed on "Dukhn." A number of caterpillars and eggs of the hawk-moth, "Theretra Alleta," were collected, and the life-history is under investigation.

Miscellaneous.

Harvesting of the date crop is now in full swing. High prices have been maintained so far despite the good yields and reduced price of food and labour. This may be due partly to the fact that one of the firms of packers have taken to exporting on their own behalf.

Training in selecting of cocoons and reeling of silk has been continued at Baquba. There is considerable room for expansion in silk propaganda work should funds permit in the coming year.

ZAGREB SAMPLES FAIR.

According to the *Zagreber Tagblatt*, the promoters of the Zagreb Samples Fair, which was held between June 17 and July 2, regard the fair as a great success, and exhibitors are stated in the majority of cases to have been very satisfied with results. It is claimed that the total value of business transacted exceeded a milliard kroner. The bulk of the orders was taken by the metal, leather, and textile trades. The number of visitors was about 300,000, including 8,000 foreign visitors, mostly from Czecho-Slovakia, Germany, and Austria.

Several British firms participated. French and Czecho-Slovakian exhibitors occupied separate pavilions, and Italy and Poland were also represented. Germany was well to the fore, and although German goods did not occupy a separate pavilion, the German firms appear to have taken

Digitized by Google

greater trouble than any other exhibitors to make their stands attractive. Austria had a good display, mostly shown by Zagreb agents of Austrian firms, and the wide range of goods shown created a good impression. Swiss representation consisted of a propaganda section for trade, tourists, railways, etc.

The management of the fair would like to see a larger representation of British goods, for which there is an increasing demand, notwithstanding the depreciated exchange and competition from adjacent countries. The next fair will be held in March, 1923.

LONDON FUR TRADE REPORT.

The report of the London Fur Trade Association on the October sales states that the sales just closed were supported by many buyers from many countries. The quality of most articles offered was somewhat inferior to the goods catalogued in May, excepting musquash, which was decidedly better. The competition was, considering the various world-wide complexities, keen for articles really in demand. The home trade bought freely considering the advanced period of the year. American buyers were much in evidence, and purchased very freely the articles in which they were interested. Continental buyers did not secure so many goods as usual. The comparison of prices are with those of May last.

American badger, sold well; Russian badger, advanced 75 per cent.; black bear, declined 20 per cent.; brown bear, unaltered; grizzly bear, unaltered; white bear, unaltered; beaver, declined 5 per cent.; Civet cat, unaltered; chinchilla, unaltered; ermine, unaltered; fisher, unaltered; fitch, unaltered; blue fox, declined 20 per cent.; cross fox, advanced 15 per cent.; grey fox, advanced 10 per cent.; red fox, better sorts advanced 10 per cent., common sorts advanced 30 per cent., Mongolian advanced 20 per cent.; silver fox, best silvery skins unchanged, blacks advanced 10 per cent., low grades advanced 20 per cent.; white fox, unaltered; South American fox, best goods unaltered, lower grades advanced 30 per cent.; white hare, mostly unsold; kolinsky, advanced 10 per cent.; Persian lamb, unaltered; lynx, declined 25 per cent.; American marten, advanced 12½ per cent.; Baum marten, advanced about 15 per cent.; stone marten, advanced about 20 per cent.; mink, declined 10 per cent.; mole, poor collection, sold well; monkey, declined 25 per cent.; black musquash, unaltered; brown musquash, prices slightly higher, but quality better; southern musquash, advanced 20 per cent.; nutria, unaltered; American opossum, advanced 15 per cent.; otter, best sorts declined 20 per cent., lower grades unaltered; raccoon, unaltered; Russian sable, unaltered; skunk, unaltered; squirrel, declined 10 per cent.; wolf, advanced 45 per cent.; wolverine, declined 17½ per cent.; fur seals, Cape of Good Hope advanced 30 per cent., other sorts sold well.

Australian Furs.—Australian red fox, advanced 20 per cent.; Australian opossum, declined 15 per cent.; wallaby, advanced 20 per cent.

Chinese and Japanese Furs.—Civet cat, slightly lower; red fox, advanced 20 per cent.; goat rugs, unaltered; black goat skins, advanced 10 per cent.; grey goat skins, firsts advanced 10 per cent., others unaltered; white goat skins, advanced 10 per cent.; kid skins and crosses, fine white moiré fetched extreme prices, others unaltered; kolinsky, unaltered; slink lamb, crosses unaltered, skins declined 10 per cent.; Thibet lamb skins, advanced 20 per cent.; Thibet lamb robes, none offered; leopard, unaltered; marmot, advanced 25 per cent.; mink or weasel, advanced 25 per cent.; pahmi, advanced 25 per cent.; white rabbit, best skins advanced 50 per cent., poorer skins advanced 20 per cent., crosses advanced 15 per cent.; raccoon, advanced 10 per cent.; wolf, advanced 40 per cent.; Japanese badger, advanced 15 per cent.; Japanese fox, declined 10 per cent., Mongolian steady; Japanese marten, none offered; flying squirrel, advanced 30 per cent.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated October 16:—

Season.—During the week ending October 15 rainfall was nearly general in South-East Madras and Konkan, and local in Bombay, Deccan, Mysore, Hyderabad (Deccan), Malabar, Burma, and Gujerat. October 14 and 15: There was light rain in Kashmir and North-West Frontier Province.

Condition of Crops.—October 13: In Bengal prospects of paddy crops are excellent outside flood areas, and sowing of spring crops is proceeding satisfactorily. Punjab: Light rain in north and western districts only. Standing karif crops average to good. Harvesting continued and yield reported normal. Sowing of oil-seeds and grains continues, and sowing of unirrigated wheat has commenced. Prospects of rabi sowings are good. Bihar and Orissa: Full crop of winter paddy is now assured, and prospects of rabi sowings are good. Bombay: Outlook in areas in Deccan and East Karnatak now much improved by widespread but not universal rain during last week. Elsewhere, including Sind, conditions are good. Central Provinces and United Provinces prospects are unchanged.

Markets.—October 12: Bombay cotton market weak. Fine M.G. Oomras, Rs.381 December-January. Bombay cotton arrivals from September 1 to October 7 were 41,000 bales, as compared with 188,000 bales during the same period of the last year. Healthier tone now prevailing since failure of corner in Oomra section. Bombay imported piece-goods market unchanged and local goods quiet. October 14: Calcutta jute market quiet but steady. Hessian market closed quiet. 9 porters at Rs.16.14 and 11 porters Rs.22. Heavies quiet, with rates easier. At tea sale on October 10 useful selections from all districts and qualities improving. Market about 1 anna dearer for all grades. Dusts firm to slightly dearer. All markets interested. Buying general and competition keen. This sale's average price was 12 annas 11 pies per lb., against last week's average price of 11 annas 6 pies per lb. 369,521 packages sold to date at an average price of 11 annas 3 pies per lb. September crop figures show decrease of three-quarter million on last year. October 14: Rangoon rice market stronger, with advance in prices. Large mills refused at Rs.460, small mills sold from Rs.482 to Rs.485, for deliveries before October 25. Also Rs.500 October and Rs.502.8 to Rs.505 for immediate delivery. Paddy, boat Rs.197, rail Rs.185. Shellac.—October 13: Market very irregular. T.N. Rs.125 to Rs.135, and closed at Rs.135. No change in Bank rate.

A further cable dated October 23 states:—

Season.—During the week ending October 22, local rain fell in Burma, Madras Deccan, and North Madras Coast, with few falls in South-East Madras, Mysore, South Hyderabad (Deccan), Kashmir, and Punjab.

Markets.—October 18.—Bombay cotton market steady. Trade gradually settling down after failure of corner. Fine M.G. Oomras Rs. 399 December-January. Bombay cotton arrivals from September 1 to October 14 were 43,000 bales, as compared with 230,000 bales during the same period of the last year. During the week from October 8 to 14 the arrivals were only 2,000 bales, against 42,000 bales during the same week of the last year. Bombay imported piece-goods market continues dull. Local goods moving steadily. October 18.—Calcutta jute and gunny markets quiet. Market subsequently closed owing to Puja holidays. At tea sale on October 17, good selections were offered from all districts, except Darjeelings, which were few. Qualities continue good, showing further improvements generally. Market strong for all grades, and further general rise of 1 anna over former sale. Bombay and Persian buyers operating on fairly large scale and increasing inquiries were manifest from all other out markets. This sale's average price was 14 annas against last week's price of 12 annas 11 pies per lb. 397,131 packages sold to date at an average price of 11 annas 5 pies per lb. October 17.—Rangoon rice market quiet but steady. Quotations: Old crop—Special Straits quality, Rs. 432, October 8; Rs. 420, November. New crop—Special Straits quality, Rs. 377, February 8 to April; Rs. 387, January 8. Millers did no business. Market subsequently closed owing to holidays. October 21.—Special Straits quality rice, Rs. 450. October 20.—Shellac.—Market steady with fair demand for practically all qualities. T.N., Rs. 135 to Rs. 145, and closed firm at Rs. 145.

No change in Bank rates.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on October 20 were as follows: Agricultural Bank of Egypt, £5¼; Alexandria Water Company, Ltd., £9; Anglo-American Nile Steam, £3⅜; Associated Cotton Ginners, £1; Banque d'Orient, 46 fr.; Behera Ord., £E7 7-16; Brasseries d'Egypte, 58 fr.; Building Lands of Egypt, £29-32; Cassi di Sconto Priv., 98 fr.; Comptoir Fin et Com. d'Egypte, £1¼; Consolidated Lands £T7; Credit Foncier Fondateur, 1025 fr.; Credit Foncier Act, 718 fr.; Credit Foncier 1886 Oblig., 318 fr.; Eaux du Caire, Capital, 86½ fr., Eaux du Caire Jouissance, 115 fr.; Egypt and Levant, S.S. Ord., 30s. 7½d.; Egyptian Delta Light Railways, £4⅝; Filature National d'Egypt £10 13-32; Immeubles d'Egypt Soc. an des., £6⅜; Khedivial Mail S.S. Ord., 80s.; Khedivial Mail S.S. Company Pref., £3½; Kom Ombo Ste an de Wadi, £4 1-16; Kom Ombo Ste An Fondateur, £32; Land Bank of Egypt, Parts de Fond, £47; Lots Turc., £42⅜; Menzaleh Canal Navigation, £T291; Grand Hotels d'Egypte, £8 7-16; Ramleh Railways, £3½; Urbaines et Rurales, £4; Union Fonciere Fond., £½.

The traffic receipts of the Egyptian Delta Light Railways for the week ended September 30 amounted to £E9.971, total for the year £E145,232. For the corresponding week of last year receipts amounted to £E12,644, total for the year £E172,241.

DECREASED TOBACCO PRODUCTION IN GREECE.

Due to the satisfactory prices which obtained in the tobacco market in Greece for the crop of 1921, efforts were made to increase the tobacco crop of 1922 by approximately 30 per cent. over the preceding year, but the seed beds suffered from unseasonable weather in the early spring, and in the western and southern districts of Greece the rainfall was insufficient to make it seasonable for transplanting (says an American Consular Report). Therefore, the crop of 1922 in the southern districts, including the Ægean Sea Islands, where the medium and common types are produced, is estimated to be 40 per cent. below the production of 1921, though in Northern Greece it is normal in both quality and quantity. The total production of tobacco for 1922 is estimated at 46,556,000 lb., as compared with 63,777,000 lb. in 1921. For the year April 1, 1921, to March 31, 1922, there was exported through the port of Salonika 5,077,000 lb. of tobacco, of which 1,375,000 lb. went to Germany, 1,175,000 to Italy, and 914,000 to the United States. In the first three months of 1922 the total amount of tobacco exported from Kavalla was 8,672,000 lb., more than one-half of which was shipped to the United States. Italy received the next largest quantity, or 2,315,000 lb., Germany 750,000 lb., and Great Britain 470,000 lb. The good quality of Macedonian tobacco, the short production in Southern Greece, the depletion of the stock, and the depreciation of the Greek currency are all factors which should prove favourable to the foreign investor.

PALESTINE TEXTILE AND CLOTHING MARKET.

At present there are no factories for ready-made clothing in Palestine, and such tailoring shops as exist are very small, says an American Consular report. The imports of textiles for the year ending March 31, 1921, amounted to £E1,300,000 distributed as follows: silk, £E50,000; cotton fabrics, £E680,000; cotton yarn, £E120,000; clothing, £E200,000; other articles, £E250,000. There are 700,000 potential consumers of manufactured goods within the frontiers of Palestine, and a definite increase of this number will be made by several thousand adults arriving each year through immigration. From Palestine can also be directly supplied the demands of a neighbouring population which, with increased trade efforts and communication development, should easily grow shortly into a total of three or more millions of people, mainly in the long strip of territory east of Syria and Palestine which merges into the Arabian Desert. There is also a considerable transit trade with Damascus. The value of textiles passing through Haifa for export to Damascus during the year ending March 31, 1921, was £E140,000. The Palestine market has always been a comparatively small one, but with the native slowly bettering his living standards the market bids fair measurably to increase in volume and importance. The advent of the British into Palestine has resulted in the adoption of English styles, manners, and customs. Great Britain exports to Palestine more textiles than all the other countries combined, and British standards, grades, and prices have gained a strong hold on the population. Imports from England consist of ready-made clothing, woollens, worsteds, and cotton goods. India supplies a cheap grade of cotton goods, Egypt largely Arab clothes, and Japan silk goods.

COMMERCIAL BANK OF GREECE, LTD.

(Limited Liability Registered in Athens.)

CAPITAL PAID UP - Drs. 20,000,000.

RESERVE FUNDS - Drs. 11,360,832.45.

Head Office: ATHENS.

Branches: Piraeus, Argos, Pyrgos, Patras, Corfu, Cephalonia, Nauplia, Vostizza (Aegion), Calamata, Syra, Chio, Candia, Volo, Salonica, Larrissa, Triccala, Mitylene, Canea, CONSTANTINOPLE

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking, Commercial and Stock Exchange business and extends special facilities to traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts.

MERCHANDISE DEPARTMENT.

The Bank undertakes the warehousing and sale of goods consigned.

CURRENT PRICES.

General Produce.—Bacon (Continental), 128s. per cwt.; (Canadian), 106s. cwt.; (American), 97s. cwt.; butter (Danish), 217s. 6d. cwt.; (Australian), 196s. cwt.; (New Zealand), 205s. cwt.; cheese (Canadian), 102s. cwt.; (New Zealand), 102s. cwt.; lard, 76s. cwt.; eggs (Danish), 23s. 6d. per 120; (Styrian), 18s. per 120; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 82s. 6d. cwt.; coffee (Costa Rica), 117s. 6d. cwt.; (East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 97s. 6d. cwt.; (Santos superior), 72s. 6d. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 50s. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d.; (Muntok white), 6¼d. lb.; pimento, 2⅛d. lb.; raisins (Valencias), 110s. cwt.; currants (Vostizza), 95s. cwt.; currants (Amalias), 79s. cwt.; sultanas (Smyrna), 148s. cwt.; sugar (Tate's cubes), 56s. 7½d. cwt.; (Lyle's granulated), 51s. 6d. cwt.; (Mauritius crystals), 47s. 3d. cwt.; (West Indian crystallised), 44s. 3d. cwt.; (centrifugal), 18s. 3d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 1½d. cwt.; bran (Rangoon), £6 6s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. lb.; wheat (English white), 44s. 6d. qr.; wheat (Australian), 52s. 3d. qr.; oats (English), 27s. qr.; oats (La Plata, ex ship), 28s. qr.; maize (La Plata), 39s. 9d. qr.; flour, 37s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 2s. 0½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £46 10s. ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 104s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £37 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bi-carbonate, £10 12s. 6d. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. per ton; hyposulphite, £14 10s. ton; prussiate, 11d. lb.; nitrate, £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £40 10s. ton; white ground lead, £49 2s. 6d. ton; sulphate of copper, £26 12s. 6d. ton; sulphate of iron, 55s. ton.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 10d. lb.; 80 to 89 lb., 10d. lb.; 70 to 79 lb., 9¾d. lb.; 60 to 69 lb., 9⅛d. lb.; 59 lb. and under, 7¾d. lb.; (second), 90 lb. and up, 9d. lb.; 80 to 89 lb., 9d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb., 7⅞d. lb.; 59 lb. and under, 5¾d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6d. lb.; (second), 5½d. lb.; (third), 4d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7.8 to 12.8; Durbhangas, 7 to 8; Patnas, 5.8 to 6.8. Salted cows: 6.8 to 9.4. Arsenic hides (buffalo): 3.8 to 6. Skins: Calf, 8 to 10; goat (per 100 pieces), 250 to 290.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £32 2s. 6d. ton; bismuth, 10s. lb.; copper (standard), £61 18s. 9d. ton; copper (electro), £70 5s. ton; gold bars, 92s. 3d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £16 10s. ton; lead (soft foreign), £24 17s. 6d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 43s. 9d. unit; nickel, £140 ton; platinum, 440s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £11 15s. bottle; spelter (G.O.B.), £36 14s. ton; tin (standard), £171 16s. 9d. ton; wolfram, 13s. 9d. unit; zinc sheets, £39 10s. ton; tin plates (20 x 14), 18s. 9d. box; silver bars, 34⅜d. oz.

Miscellaneous.—Cotton (American), 13.50d. lb.; Egyptian (Sakel), 16.50d. lb.; jute (first grade), c.i.f., £32 10s. ton; jute (lightnings), £30 5s. ton. Oilseeds: Linseed (La Plata), £19 7s. 6d. ton; palm kernels, £16 18s. 1½d. ton; castor seed (Bombay), £16 1s. 3d. ton; sesame seed (China), £21 2s. 6d. ton; olive (Spanish), £74 ton; rape (crude), £40 10s. ton; soya, £34 15s. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £37 13s. ton; cotton (crude), £34 5s. ton.

The Greek Moratorium Law has been further extended to December 31.

It is announced that orders for £70,000 worth of oil-storage tanks have been placed by Messrs. Cory Brothers, the Cardiff coal firm. The tanks are to be established at their coaling depots, of which Messrs. Cory have about one hundred on the chief steamship routes.

Shipping Intelligence.

THE KHEDIVIAL MAIL COMPANY.

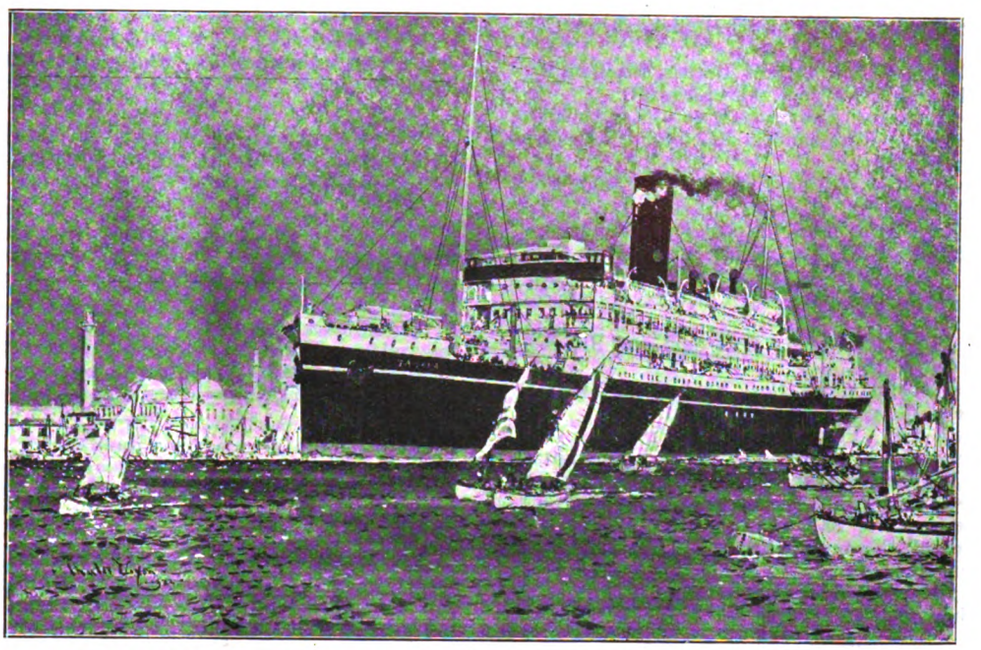
New Mail and Passenger Steamers.

The launch, on October 20, by Messrs. Alexander Stephen and Sons, at Glasgow, of the Famaka, the first of two new 6,000-ton mail and passenger steamers building for the Alexandria-Constantinople Mail Service of the Khedivial Mail Company, is an event of considerable significance to those directly interested in trade and sea-traffic between Egypt, Greece, and Turkey, and at the same time marks an important development in British shipping policy in the Near East. The vessels of the Khedivial Company have long been among the most popular on the Alexandria-Constantinople route, but it is clear that the new ships will place them at once above competition. The company's new policy is admittedly a bold one; but with the restoration of peace in the Near East, no one conversant with the potentialities of these regions under progressive government will doubt that it will be entirely justified by results.

The Famaka will be completed at an early date, and she will, by the end of December, have been placed on the line to which she and her sister ship are assigned. The vessels are expected to show a trial speed of over 15 knots. They will have handsome accommodation in their saloons and cabins for eighty first-class and forty-four second-class passengers, which will all be situated amidships on the upper deck and on the bridge and promenade decks. An attractive feature will be ranges of single-berth cabins on the uppermost deck, where also are the first-class music and smoking saloons. All cabins, whether of the first or second class, are outside cabins with direct access by their own port-holes to light and air, are constructed of the builders' patent fire-proof material, and are fitted with bedsteads and with wash-basins having a continuous fresh-water supply. The first-class dining saloon is on the bridge deck, and is naturally lighted on three sides by twenty-one large windows. Restaurant tables will enable passengers so desiring to take their meals in small parties, and provision is made for screening off a portion of the dining saloon, with a separate entrance, if desired for the use of Mohammedan ladies. In addition to natural ventilation, all the public apartments are to be fitted with electric "sweep-fans." In both first and second-class accommodation is an ample installation of bathrooms and lavatories, placed in different compartments suited to various nationalities and customs. On each of the two decks there are broad sheltered promenade deck spaces for saloon passengers. Superior third-class accommodation is being provided, and includes a reserved shelter 'tween decks, aft, with a separate galley, ample washhouses, etc., sanitation being by automatic tanks.

A powerful motor-launch forms, for use in open roadsteads, part of the ample boat equipment. The ship's hull is divided by bulkheads into water-tight compartments with water-tight doors electrically controlled from the navigating bridge. The vessel will be driven by Brown-Curtis single-reduction geared turbines, supplied with steam from four single-ended boilers, with Howden's forced draught, which are arranged to burn either oil-fuel or coal. The vessel is fitted for the quick handling of cargo, having at each hatch winches and steel tubular derricks of the self-adjusting type. There are, besides, two special derricks capable of lifts up to twenty tons. The new steamers will, it is confidently expected by their builders and owners, exhibit characteristics eminently suiting them to their especial trade, and they should be an advance upon any vessels hitherto provided for the important traffic with which they are intended to deal.

The ceremony of christening the vessel was performed by Lady Ernest Hamilton, wife of Lord Ernest Hamilton, chairman of the Khedivial Mail Company. Among those present were Mr. and Mrs. Charles Holland, Commander George Hodgkinson, R.N., of the British India Steam Navigation Company; Mr. F. A. Hook, of the P. and O. Company; Mr. and Mrs. A. E. Stephen, Mr. and Mrs. F. J. Stephen, Mr. Mathew Hunter, and representatives of the builders, owners, Lloyd's, and the Board of Trade. At the subsequent luncheon Lady Ernest Hamilton was presented with a salver of old London silver as a memento of the launch.



THE KHEDIVIAL MAIL STEAMER "FAMAKA."

NEW PILOT VESSEL FOR THE DANUBE

The pilot vessel Hirondelle, built by Messrs. J. Samuel White and Co., Ltd., of East Cowes, Isle of Wight, for the European Commission of the Danube, arrived at her station —Sulina, Roumania—on the 23rd ult., after a run of twenty-one days. She experienced heavy weather en route, calls being made at Gibraltar and Malta. She eventually reached her station in excellent condition, the machinery, notwithstanding the exceptional calls made upon it, having run without a hitch during the whole voyage.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Olympia for Bombay (Liverpool, November 4); s.s. Castalia for Bombay (Liverpool, November 18).

Anchor Brocklebank Line.—S.s. Maidan for Port Said, Colombo, Madras, and Calcutta (London, November 7); s.s. Maihar for Calcutta (Birkenhead, November 8); s.s. Mala-

kuta for Calcutta (Birkenhead, November 18); s.s. Manaar for Port Said, Colombo, Madras, and Calcutta (London, November 25); s.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9).

British India Line.—S.s. Morvada for Colombo, Madras, and Calcutta (London, November 10); s.s. Mashobra for Bombay and Karachi (London, November 17); s.s. Merkara for Colombo, Madras, and Calcutta (London, November 24); s.s. Gazana for Bombay and Karachi (London, December 2).

Bibby Line.—S.s. Gloucestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, November 8); s.s. Oxfordshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, November 22).

Clan Line.—S.s. Clan Buchanan for Bombay and Persian Gulf (Birkenhead, November 9); s.s. Clan Macfarlane for Colombo, Madras, and Calcutta (Birkenhead, November 16).

Ellerman Line.—S.s. Amatonga for Gibraltar, Malta, Patras, Piræus, Syra, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, November 11).

Ellerman's "City" Line.—S.s. City of Calcutta for Calcutta (Birkenhead, November 13); s.s. City of Manchester for Bombay and Karachi (Birkenhead, November 22); s.s. City of Agra for Bombay and Karachi (Birkenhead, November 22).

Ellerman's Hall Line.—S.s. City of Baroda for Bombay, Karachi and the Punjab (Liverpool, November 14).

Ellerman's Westcott and Laurance Line.—S.s. Orlando for Gibraltar, Malta, and Alexandria (London, November 22).

Glen and Shire Line.—S.s. Glensanda for Port Said, Port Swettenham, Singapore, etc. (London, November 16); s.s. Radnorshire for Port Said, Port Swettenham, Singapore, etc. (London, November 30); s.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, December 14).

Harrison Line.—S.s. Diplomat for Calcutta (Liverpool, November 6).

Henderson Line.—S.s. Burma for Port Said and Rangoon (Birkenhead, November 15).

Holt Line.—S.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, November 16).

Johnston Line.—S.s. Peruviana for Piræus, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, November 4) (this steamer is the last sailing this season to the Danube); s.s. Dromore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, November 18).

P. and O. Line.—S.s. Nyanza for Colombo, Madras, and Calcutta (London, November 3); s.s. Caledonia for Bombay (London, November 10); s.s. Khiva for Bombay (London, November 17).

CZECHO-SLOVAK FINANCE PROGRAMME.

M. Rasin, the new Czecho-Slovak Finance Minister, in giving the Press representatives an outline of his financial programme, very energetically repudiated any attempt at devaluation in view of the fact that to introduce a monetary gold standard would inevitably result in failure. As long as the neighbouring States take no steps towards a process of deflation, which in Czecho-Slovakia is making favourable progress, any reform affecting the basis of the monetary system will be inappropriate. As regards foreign securities, M. Rasin proposes to continue the policy now in force, by endeavouring to secure for the Czecho-Slovak crown an exchange level which will not fluctuate, and thus place difficulties in the way of industrial transactions. The tax on capital, which has hitherto yielded 1¾ milliards of crowns, will make it possible to release the banknotes which were retained at the time of stamping.

M. Rasin further pointed out that the Czecho-Slovak budget now produces nearly a credit balance, although the revenues are nearly 900 million crowns less than last year, 800 million crowns of this being accounted for by the reduction of the coal tax and the tax on business turnover. Referring to trade matters, M. Rasin pointed out that although Czecho-Slovakia has no Customs rights against dumping, except in the case of motor-cars, the home industry must be protected by guarding the rights of entry. If Czecho-Slovakia hoped to maintain a regular rate of exchange, the trade co-efficients would have to be revised from time to time, and the system of licences would have to be abolished except where obviously indispensable.

NEW COMPANIES.

Papageorgiou.

Messrs. Papageorgiou have been registered as a private company with a capital of £20,000 in £1 shares. Objects: To carry on in England, Greece, and elsewhere the business of merchants, bankers, traders, manufacturers, commission agents, brokers, etc. Registered office: 353-354, Winchester House, Old Broad Street, E.C.

COMMERCIAL BREVITIES.

The export duty on grapes exported from Roumania is now fixed at 10 bani per kilog.

It is reported that the use of rubber heels is increasing in the Aleppo district of Syria.

The free importation of wheat flour and cereals into Greece has been sanctioned.

Roumania's oil exports for August amounted to 30,525 tons, as against 13,492 tons in August, 1921.

In August Roumania's timber exports consisted of 65,822 tons of various products, and 8,099 cm. of pine trunks.

The strike at the refineries of the Burma Oil Company, Ltd., at Rangoon, has now terminated, the workers agreeing to resume work unconditionally.

Messrs. Dorman, Long, and Company have secured the contract for the steel for bridges required by the Indian State Railways. 9,000 tons of steel will be required.

The coal exports of Yugoslavia for 1921 amounted to 41,511 tons, and the imports to 101,553. The greater part of the imports came from Great Britain.

The weight of the Roumanian cereal exports during August amounted to 50,368 tons, as against 182,136 tons for the same month last year.

Aden has a promising industry in the manufacture of cigarettes. There are already ten concerns, but there is only one cigarette-making machine in use so far, and there is an undoubted market for these machines.

Coupons and drawn bonds due October 15 of the Piræus, Athens and Peloponnesus Railway 4½ per cent. bonds are being paid by Messrs. R. Raphael and Sons, Austin Friars House, E.C.

The directors of the Anglo-Egyptian Bank recommend a dividend of 10s. per share, free of tax, making with interim dividend 15 per cent. for the year; that £17,000 be written off premises, and £52,187 carried forward.

A bonded warehouse has recently been established at Alexandretta. Goods placed in bond will be regarded as outside Syrian territory from the point of view of the collection of duties.

The oil output of the Anglo-Egyptian Oilfields was as follows for the week ended October 20:—Gemsah, 39 tons (last week 37 tons); Hurghada, 2,680 tons (last week 3,609 tons).

Yugoslavia's coal output in 1921 amounted to three million tons, of which 40 per cent. came from the mines of Slovenia. The output in Serbia was 401,472 tons, or 60,000 tons more than in 1920.

Messrs. Thomas Cook and Son's Nile steamers will resume their sailings this month for the winter season in Egypt. There will be three weekly services:—Cairo-Assuan (twenty days); Assuit-Assuan (fourteen days); Assuan-Halfa, Second Cataract (seven days). Arrangements have been made, as in pre-war days, for visiting the architectural relics of the Nile Valley from the steamers.

A Decree has been issued by the Greek Government modifying existing regulations dealing with exchange transactions. Drachma transactions are now free, and foreign exchange can be purchased in the open market. The Government will, however, still control exchange coming into Greece from the export of currants, tobacco, figs, and olive oil at a fixed rate.

The Bulgarian Government is prepared to pay to French, British, and Belgian bondholders Coupon No. 40 of the Bulgarian Five per Cent. Loan of 1902, maturing September 14, 1922, at French francs 12.50 each and the bonds drawn for redemption on that date at French francs 500 each. Holders of bonds which have been in British ownership since August 1, 1914, who are desirous of availing themselves of the offer, should present coupons and drawn bonds to Messrs. Stern Brothers, 6, Angel Court, E.C.2.

Stock and Share Markets.

MARKETS GENERALLY DULL.

A Bulgarian Loan?

(From Our Own Correspondent.)

London, Tuesday morning.

It has been one of the worst weeks we have had for some time. What with the general carry-over, the weakness of the exchanges, and last, but not least, the home political situation, it is, perhaps, not surprising that business should have been on a restricted scale. Of these factors the political one has, of course, been the most important. There is nothing like a pending election for creating unsettled conditions, and until the secrets of the ballot-boxes have been revealed and we know where we are the markets will be unstable. Anything but a Conservative Government is looked upon as an impossibility, but strange things happen at elections, and the Labour programme is calculated to give shivers to the most stoic individual.

For quite a long time there have been no new issues, and quite suddenly we have had a flood of them, chief among them the large Indian loan of £20,000,000, the size of which should have a severely restrictive influence on the efforts of the "stags," for it is obvious that in the case of a loan of this size the probability of an immediate rise of any consequence, even were the conditions favourable, which they are not, must be very remote. I assume that the reason for this rush of new issues is to be found in the anxiety to escape the atmosphere that will prevail at the General Election period. While on the subject of loans, I may mention that I hear that the negotiations for a Bulgarian loan, if not actually completed, are on the verge of being so, and I imagine that it will not be very long before the lists are opened here for subscription. The effect of the loan on British trade with Bulgaria should be considerable.

The Rubber market continues to be in the doldrums. There is no obvious reason why this should be so, for the profit takers have done their worst, and one can only assume that here, too, the election is having an effect. I shall be surprised if before long this market does not show a vast improvement, for the raw commodity is very firm, and must advance before very long unless all the calculations are wrong. I do not think it would be going too far to anticipate that shares will go up to the levels at which they stood before the commencement of the surprising "slump," but it is bound to be a gradual process with abundant profit-taking, and those who read the markets accurately enough to get out and in again should have every reason to feel satisfied with themselves.

Gilt-Edged Dull.

Gilt-edged securities have been somewhat markedly affected by the prevailing influences this week, and prices are lower in many cases.

Consols at 57⅛ are ¼ lower, while War Loan Fives at 98 9-16 x.d. are considerably below the previous level. The Conversion Loan at 74¼ is exceptionally 1-16 up, while Fundings at 85⅜ have gained ⅜. Indian stocks have been rather dull, and have been influenced, presumably, by the new loan. The 7 per cent. stock at 111½ is 2 down, the 3½ per cent. stock at 65½ has shed ½, while the 3 per cent. stock at 55¼ is a point lower.

There has not been a great deal of activity in foreign Government securities, but in view of the adverse movements of some of the exchanges this section of the market can only be said to have been quite firm—at any rate in comparison with some of the other sections. French stocks have again been very dull on the depreciation of the franc, War Loan Fives being 2½ down at 31, while the 4 per cents. are 1¼ lower at 5. German 3 per cents. are fractionally harder at 1, while Italian Rentes have not been affected by political conditions in Italy, and are unchanged at 22. In Near Eastern securities Turkish Unified have weakened, and at 28¼ are 1⅜ lower, while Greek Monopolies are a point down at 30½. Czecho-Slovak 8 per cents. have eased off, and at 92 are 2 down. In South American securities there has been little doing, except for a little activity in certain Argentine stocks. In Far Eastern stocks Chinese securities have been a feature with the 5 per cent. loan of 1896 up to 92½.

Industrials Quiet, but Firm.

In view of the coming election business in this group has been more restricted than before, but the undertone has been very firm, and it is evident that if the political situation develops as expected buoyant conditions will prevail in this market.

Textiles have varied somewhat. Coats have been a firm spot, and at 66s. are 1s. 3d. up. Courtaulds, however, have been rather dull, and at 53s. 9d. are 9d. down. Listers, on the other hand, have resumed their rise, and at 29s. 6d. are 2s. up. Tobaccos have been inclined to ease, Bats being 1s. down at 85s. 6d., while Imperial Tobaccos are 9d. lower at 64s. Iron and Steel shares have been notably firm. Vickers at 12s. are 6d. up, Armstrongs are 1s. up at 17s. 6d. while Guest Keens remain at 35s. In the Indian Railway group Burmas are 102, Delhi Umballas are unchanged at 180½, and Nizams are 82.

In shipping securities P. and O. Deferred at 310 are 3 up, Cunards are unchanged at 20s. 3d., Khedivial Mails remain at 3¼, while Furness-Withys are 31s. 6d.

Oils Dull.

It has again been a poor week in the Oil market, and prices have generally tended to ease off. The political situation has, of course, not been without its effect, but the most important factor has been Continental selling from more than one centre.

Anglo-Persian have been rather a weak spot, and at 5⅜ are 3-16 lower, while Burmahs at 5 3-16 are 1-32 down. Mexican Eagles at 2 11-16 have shed 3-16, while Shell Transport at 4 7-32 are 1-32 down. Trinidad issues have eased off. Apex are unchanged at 2⅛, but Centrals at 1 9-16 are 1-16 down, while Leaseholds at 1 3-16 are also 1-16 lower.

Russians have been rather variable. Spies are 6d. down at 5s. 6d. Anglo Maikop are unchanged at 3s., North Caucasians at 11-16 are ⅛ down, Ural Caspians at 23-32 are unchanged, while Uroz are 1s. lower at 7s. 6d.

Among Egyptians Anglo-Egyptian B at 1½ are 1-16 up, while Oilfields of Egypt are unchanged at 1s. In the Roumanian group Phœnix are 1s. down at 25s. 6d. The report of this company is expected to be issued very shortly, and if in accordance with anticipations a dividend is forthcoming the shares should be in for a considerable rise. I should not be at all surprised if as soon as political conditions are settled they went to the neighbourhood of £2. Dacia Romanos are unchanged at ⅜, Roumanian Consolidated are 3d. down at 12s. 3d., while Hamilton's Oil Concessions remain at 2s.

The following preliminary estimate of the Czecho-Slovak Budget for 1923 has been announced (the figures in parentheses indicate the amount for 1922): Ordinary expenditure, 13,600,000,000 crowns (13,280,000,000); extraordinary expenditure, 5,750,000,000 crowns (6,520,000,000); ordinary revenue, 17,960,000,000 crowns (17,290,000,000); extraordinary revenue, 850,000,000 crowns (1,593,000,000). Accordingly there is a deficit of 540 million crowns, as compared with 928 millions in the Budget for 1922.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Homs, October 6.

There is nothing new to report regarding the crop. The forecasts made previously have proved to be very accurate. As regards commerce, generally speaking, except for some activity in the cereal market, the situation has little changed. The position as regards imports is about the same. Despite a rapid rise in the prices of certain articles of colonial produce (rice and sugar) the arrivals remain restricted to the needs of the town for from two to four weeks. Although most of the merchants are preparing to purchase articles of clothing at Beyrout for the winter, considerable reserve is shown by them, which is to be attributed beyond doubt to the bad harvest, the excessively low prices at which it has been sold, the lack of work in the weaving trade, and the generally unfavourable economic situation. It has been reported that during the past week the emigration from this district to America has been particularly extensive. There will probably be a further increase if the situation continues as it is for a long time.

The export of cotton fabrics for Palestine continues in the same volume as before. That of silk stuffs ought to have notably increased during the past month. Exporters hoped that their houses and correspondents in Egypt would be able to dispose of the goods without difficulty, as a result of the appearance of the new cotton crop. Unfortunately, they report that their forecasts have not been borne out with the closeness hoped for: the relatively low price of cotton (31 tallaris instead of 38 to 40 that was anticipated) and the political uncertainty have made the fellahin very reserved in their purchases. It is hoped that the position will improve with the settlement of the Near Eastern question. The situation as regards exports for Turkey remains the same.

Apart from the exports of wheat and barley for Tripoli, 2-3,000 tons of lentils, beans, maize and caraway seeds were exported during the month from Marseilles and Alexandria, and all the indications suggest that if the prices of these commodities remain as low as they are at present the exports will continue to the extent of the 3-4,000 tons of disposable stocks. Supplies of butter are more and more limited, and do not now exceed 3-4,000 cases of 35 kg. Although the arrivals of sheep from Deir-el-Zor have decreased, prices, which ought to have firmed up, have tended to fall, as a result of a decreased demand for the littoral.

Subject to audit, the directors of the Burma Railways Company recommend a final distribution of £1 15s. per cent., plus bonus of £1 per cent., both subject to tax, on account of surplus profits, to be distributed with guaranteed interest payable January 1, making £7 per cent. for 1922-23.

The attention of United Kingdom exporters is directed to the fact that goods of British origin imported into the French zone of Morocco after loading or transshipment at a German port are subject to the special taxes of 25 or 30 per cent. *ad valorem* imposed on goods of German origin imported into the zone.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Tone Rather Firmer.

The Commercial Company of Egypt, in their report for the week ended October 13, state:—

Since our last report the futures market has been rather active, both in Sakellaridis and Ashmouni. The rather firmer tone of the market can be attributed to the larger quantity of orders received and booked for account of spinners and to speculative covering, the latter being due to the more satisfactory turn of political affairs in the Near East. Had it not been for the heavy daily arrivals from up-country and the pressure of sales by the many indebted cultivators, the market would have been still better and the higher level of prices which was attained yesterday would have been maintained. Spinners in general do not appear to be well supplied with cotton; their stocks have been considerably reduced during the last few months, but they do not seem anxious to replenish them on account of the bad financial position which exists practically all over the world, impeding business and creating distrust. We do not think that the market will be pushed much higher in the immediate future, but assuming that the demand from abroad keeps for some time as active as it has been of late, we consider that a much sounder position will be developed as soon as the first rush of the new crop will be over, and prices will be influenced accordingly.

Spot.—We have had a week of active markets at Minet el Bassal though the demand has fallen away considerably to-day. Sales for the five days amount to about 28,900 bales, of which we estimate 17,600 bales Sakellaridis, 11,100 bales uppers, 150 bales brown, and 50 bales white. Arrivals are heavy, and the movement of cotton in the interior continues freely.

Sakellaridis.—All styles have been dealt in, and the good grades continue to be offered cheaply, to which fact we again draw spinners' attention, as, in our opinion, the present cheap premiums will not last long and the premiums for good qualities will increase. The prices of spot against contracts generally are without much change, but fully good is rather dearer and is not in plentiful supply.

Uppers.—A good business has been done in all styles, fully good fair and below finding a ready sale at very good prices. The prices of spot against contracts are generally dearer and below fully good fair markedly so.

Brown.—A small business has been done at easier rates.

White.—A retail business has been done at slightly easier rates.

Crop, 1922.—Climatic conditions continue favourable. Picking is well advanced and in some districts is nearing completion. All ginning factories are in full swing, and some of them have already begun working day and night. Many small cultivators are hard pressed for money, and to relieve their financial burdens sell their cotton very freely.

Activity Continued.

A further report for the week ended October 20, states:—Since our last report, the futures market has again been very active, but whilst the undertone for Sakellarides futures has been rather heavy, that of Ashmouni has been very firm indeed. The extraordinary firmness of the American markets, where during the week the quotation of 23 cents has been touched for January in New York, and the good demand from abroad have had the effect of checking the bearish tendency of our market. The arrivals from the interior, especially Sakellaridis, continue to be very heavy, and the hedges put out against them had the effect of counterbalancing the speculative covering and trade purchases. The demand for Ashmouni was very good, being the consequence of the extensive sales put through in America and in Liverpool during the end of September and early October. Speculators have shown more interest in the market this week, but we think that in general they are still bearish. The difference between Sakellaridis and uppers has again narrowed, and at one time November (Sakellaridis) has been quoted at only 6 over December (uppers). We think that the difference is now rather small, and we expect a widening as soon as the sales of Ashmouni are covered. International politics are neither better nor worse than last week, but the Continental exchanges all round show further heavy depreciations, and this can but impede fresh business.

Spot.—We have had another week of active markets at Minet el Bassal, and sales amount to about 34,100 bales, of which we estimate 13,200 bales uppers, 200 bales brown, 100 bales white, and 20,600 bales Sakellaridis. Arrivals continue on a large scale, and the stock shows a considerable increase. A feature of the week has been the eager demand for uppers, and the high prices paid for fully good fair and below, in many cases fully fair and good fair being sold at hardly any discount from fully good fair.

Sakellaridis.—All styles have been dealt in. The prices of spot against contracts show no change from last week.

Uppers.—All styles have been dealt in. Grades below fully good fair are extremely scarce, and much in demand, and any lots offered have been readily sold at very good prices. The prices of spot against contracts are generally considerably dearer than last week, except good and fully good, which are without much change.

Brown.—A small business has been done. Fair and fully fair are rather dearer than last week. Good fair is about at unchanged rates, and fully good fair and above are rather cheaper. Supplies are very small.

White.—A small business has been done, as supplies are very limited. Prices are unchanged.

Crop.—Picking is nearly completed in the majority of the districts. The results are more or less those anticipated, perhaps slightly above. Cotton is moving freely all over in the interior, and the small growers do not fail to sell their cotton whenever they can get reasonable bids.

LIVERPOOL REPORT.

Good Inquiry for Sudan Cotton.

Messrs. Reynolds and Gibson report as follows for the week ended October 25:—

A very fair inquiry has been in evidence throughout the week, and, if the net result has been somewhat disappointing as regards actual business, there is at least plenty of proof that interest in the present position of cotton is well maintained. Following on the distinct improvement in spot business last week, a series of strong and active American markets appear to have rather nonplussed the trade as a whole, with the unfortunate result of slightly checking business here. Why the Egyptian section should hold off is somewhat of a mystery, as our futures market has remained very stable as compared with its American neighbours, although as we write the tendency is decidedly upwards. Except for the heavy arrivals in Alexandria, and the consequent hedge-selling, both there and in Liverpool, there is little doubt that our market would have registered a substantial rise in sympathy. With a short supply of American cotton indicated more clearly every day, and with American staple particularly demanding exorbitant premiums, even at this early stage, it would appear, judging by past experience (and present indications), as if America would call largely on the Egyptian crop, particularly as the 7 cent import duty has been removed. Looking ahead, therefore, to a time when the receipts in Alexandria dwindle, and there is a dearth of hedge-selling, and pre-supposing a steady demand from America and some slight improvement in our overseas trade, it would seem as if to-day's prices for Egyptian cotton were *right*, and that in the future higher prices were probable. It is all the more surprising, therefore, that a week of comparatively steady markets should not have been utilised to more advantage by the trade.

We have seen what has happened recently to the basis of Upper Egyptian cotton, and the brown varieties are already following suit. Is it reasonable to suppose that Sakellaridis, the "bread-and-butter" cotton of the Egyptian trade, is going to remain unmoved? We have already pointed out the possibilities existing in the better grades of Sakellaridis.

Digitized by Google

The tendency at present is for "fine" Sakellaridis to close in towards "good" (a further narrowing in the premium has been registered this week). The trade demand has almost entirely neglected fine Sakellaridis for the past six months or more. This demand will come again, but an opportunity for picking up really high-class cotton on such a cheap basis may not recur for a long time. The demand for uppers has rather fallen off—the rise in the basis having discounted the previous attractiveness of this cotton as compared with American. Odd inquiries still come in from the American section of the trade, but these represent the belated efforts of would-be buyers of cheap cotton to follow in the footsteps of their more enterprising brethren. On hearing to-day's prices (15¼d.-½d. for F.G.F.) they are frightened off. The usual demand for G.F. to F.G.F. Sakellaridis is still well to the fore, and low cotton, any description, from 5d. to 9d., has many seekers. The cream of this market has been very well skimmed already, we imagine, and the residue contains mostly re-cleaned cotton, or "high limit" lots of straight cotton that are not very attractive at the price. It is remarkable the number of American spinners who lately have been scouring the Egyptian market for this style of cotton in the hope of picking up some "plum" which will enable them to cheapen their yarn. Sudan cotton has found a good market, and during the past two days quite a feature has been the inquiry for white Sudan; we have, however, heard of little actual business resulting. C.i.f. business has been rather quieter.

Manchester reports speak of considerable inquiry for India, but buying is irregular. China startled the market on one day by taking some good lines, but since then has not followed up. There is a little inquiry going on from that country, however, and even these few signs of an awakening are very welcome after that country's long silence. The yarn trade, on the whole, seems better, but in all sections of the trade the cry of "bids too low" is heard. The political crisis has not helped matters. Such new crop cotton as we have inspected so far is attractive in appearance and of good staple. Total sales, 2,900 (includes 1,250 Sudan). Quotations of brown are raised 50 points, with the exception of fine and extra fine, which are 25 points higher. Upper cotton is 75 points higher on the week. Sakellaridis remains unchanged, with the exception of fine and extra fine, which are reduced 50 points. Fully good fair Sakellaridis 17.75d.

COTTON TRADE REVIEW.

Conditions Practically Unchanged.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended October 28 states:—

General.—Conditions have changed but little during the past week. The principal feature of interest has been the continued advance in the price of the raw material, as referred to below. Spinners and manufacturers are in consequence obliged to quote higher prices, which buyers are reluctant to pay. It would seem that there is no real evidence that these higher quotations can be maintained; consuming markets abroad appear prepared to sit tight and watch the course of events for the time being. Inquiry has been on a good scale, but the prices offered have been those ruling two or three weeks ago, which are now impracticable.

Yarn.—No material increase in business can be reported. As has been the case so often of late, spinners are unable to obtain the higher prices necessitated owing to the advance in raw cotton. It is, in fact, asserted that practically all sales at the present time are being effected at a substantial loss to the spinners. There is a good deal of discussion as to the possibility of further combined action in order to relieve the situation.

Cloth.—There has been a fairly good inquiry not represented, however, by actual business booked. Much of the demand is quite unworkable, and overseas buyers appear in no frame of mind to buy to-day goods which they declined to purchase at a time the raw material was several pence per pound cheaper. Most of the inquiry still comes from India, and there has been more doing for China. Reports of better purchases in a quiet way are reported for Egypt and one or two of the minor markets.

Raw Cotton.—This market has been fairly active, but the week ends with business quiet though firm, after a substantial rise in prices in the first two or three days. Apparently growers in America are still dissatisfied with prices, as the American Cotton Association is recommending farmers to cut down their acreage for next year by 25 per cent. Closing prices are as follows:—American fully middling, 14.29; Egyptian fully good fair, 17.75.

MANCHESTER COTTON TRADE.

Egypt and Levant Inquiry Good.

(From Our Own Correspondent.)

Manchester, Saturday.

Although a firm tone has prevailed in the market during the past week it is not possible to record any developments. The steadiness displayed in raw cotton circles at the beginning of the week forced out more inquiry, but the majority of the offers had to be turned down. It is quite apparent that most of the dealers abroad are not prepared to pay current prices. There has been talk of more machinery being stopped in the weaving districts, and certain manufacturers of staple makes are piling up stocks. A steady demand has been met with in cloth for Egypt and the Levant, and every day transactions have been recorded, and at the moment there is no tendency for any slackening off in the amount of workable inquiry. Egyptian spinning quotations have continued firm, but sales for home use have not been of any weight. Scattered cloth sales have taken place for India in staple makes. At the beginning of the week rather more inquiry was met with for China, but during the past few days it has fizzled out, and no sales of any importance have been recorded. There has been a falling off in the demand in fancies for the United States. Spinners of American yarns have been full of complaints, and no sales of any weight have occurred. Prices, however, have been comparatively well held.

COMPANY NOTES AND REPORTS.

North Anantapur Gold Mines.

The report for the year to June 30 last states that at the mill 7,000 tons of quartz were crushed, producing 7,211 ozs. gold, at cyanide plant 8,450 tons of tailings yielded 707 ozs., and 524 ozs. were obtained by dump re-treatment, making a total production for the year 8,442 ozs., which realised £42,432. There was a further receipt of £527, being adjustment of 1920-21 account. Expenditure on revenue account totalled £22,193, and receipts, after allowing for adjustment of 1920-21 gold account and deduction for royalty paid to Indian Government, amounted to £43,502, leaving a profit of £21,309.

A dividend of 20 per cent. on preference shares for the year was paid on March 15 last, and a further payment on October 4 of 6d. per share and a bonus of 6d. per share on both preference and ordinary shares, making 5s. per share on preference and 1s. per share on ordinary, both less tax, and leaving £4,044 to carry forward, subject to corporation profits tax; £10,000 has been allocated to reserve fund and £1,500 to insurance and contingency account.

Mining operations, confined to 950 ft. level south of No. 5 shaft and cross-cuts therefrom, did not result in opening up further payable ore, and all development work was stopped. The final crushing took place in July last, and attention has since been directed to cleaning up the mill. A return from this source of 1,756 ozs. gold was made in August, and a further 965 ozs. in September. Regarding the retreatment of old dumps, the superintendent states: "It is impossible to give a tonnage figure, but we think there will be sufficient to run the cyanide plant at its full capacity until about January next." The directors received information concerning a discovery of ancient workings on the gold-bearing quartz reefs in Southern India, about thirty-five miles from Anantapur goldfield, and prospecting licences have been taken out by the company over three areas containing ancient workings of a considerable extent. At Sidesbur option block machinery has been installed, and exploratory work to prove the value of copper lodes in this property is in progress.

A company, under the title of "Continental and General Exploration Co., Ltd.," has been formed to carry out, *inter alia*, exploration work on a gold-mining property of considerable promise in Sumatra. The capital is £20,000 in shares of £1 each, one-third of which has been applied for by this company. Considerable attention is now being directed to mining in Canada, where production of precious metal during recent years has greatly increased, and there is reason to believe mining properties of value can be acquired on reasonable terms. A company has been formed, named "Anglo-Canadian Explorers, Ltd.," with a nominal capital of £65,000 in shares of £1 each, for investigating and exploring areas in Canada, with a view to securing such of them as are deemed worthy of acquisition. Information received by directors causes them to view this enterprise as one of increasing interest, and they have applied on behalf of this company for 10,000 shares in the Anglo-Canadian Explorers, Ltd.

NOTES OF THE WEEK.

The Whirlwind in Turkey.

For three years or more the Allies, and Great Britain in particular, have been sowing the wind in Turkey. They are now reaping the whirlwind. It would certainly be in the Allies' interests if the Turkish Nationalists would show some restraint at this stage, and those in this country who have been pressing for a sane handling of the Turkish question hoped that they would. It is not, however, altogether a matter for surprise in the circumstances that the first tendency of the Turks is to kick over the traces. As they will do themselves no good in the process, the Allies can afford to adopt a waiting and dispassionate attitude, provided that foreign interests are not directly prejudiced. Accordingly, in any demands made or steps taken by the Kemalists, care should be exercised to distinguish between matters which concern the Turks alone and those which impinge on the Allies' rights. To the former category belong the future of the Khalifate, and possibly the changes now being made in the personnel of the Constantinople Administration; in the second category would fall any attempt to override the Mudania agreement or to interfere with the status or privileges of foreigners, as established by treaty or the Capitulations, before a settlement has been reached at the Peace Conference. Many impossible demands may be expected from the Turks. Firmness in meeting them should be accompanied by a united front among the Allies and the tolerance that only confidence in superior strength can inspire.

Ex-King Constantine.

Hard on the news of the arrest of Prince Andrew of Greece come reports from Athens that ex-King Constantine is to be tried on what amounts to a charge of abandoning his post in the hour of danger. It is represented that when at Eskishehr he assumed supreme command of the army then confronting the Turks, and that when the operations unexpectedly took an unfavourable turn, he hastened off to Mudania. He is to be invited to return to Greece to answer the charges against him, and, failing his appearance, he will be tried *in absentia* by the special Court Martial which is to try many of the leading politicians and generals lately arrested. King Constantine, we imagine, is not likely to feel tempted to appear before such a tribunal at the present time, and very few people would blame him for refusing to do so. What purpose can be served by all this raking up of the past just now, it is hard to see—unless, of course, the whole campaign is the work of the republicans! It is at such times, and in such circumstances as Greece now finds herself, that the best policy to follow is that of letting the dead bury their dead; and none but self-seekers would advise otherwise.

Yugoslavia and Italy.

As was only to be expected, the change of Government in Italy caused no little excitement in Yugoslavia, and reports of fighting at Sushak between Fascisti and Yugoslav frontier troops did nothing to allay the excitement. Fortunately, however, M. Nintchitch, the Yugoslav Foreign Minister, took prompt measures to calm the excitement, summoning the journalists, and impressing on them the need of refraining from alarmist reports. He also reminded them that the new Italian Premier had during the War shown himself a true friend to Serbia and the Serbians; and his arguments seem to have produced an excellent effect. At all events, Yugoslavia has calmed down, and now looks to see the recently signed Treaty of Rapallo duly carried out. It is possible that the arrival of a mission sent by the League of Nations has also exercised a steadying effect upon the situation. The mission, which includes Sir Eric Drummond, Secretary-General to the League, is understood to be gathering information upon and examining into the question of minorities.

A New Egyptian Party.

A new Egyptian political party, the Liberal Constitutional Party, under the leadership of Adly Pasha, was formally inaugurated last week at a meeting held at Shepheard's Hotel. In his opening speech Adly Pasha remarked that individual efforts were not sufficient at the present time: that parties, with definite programmes, and less likely to fall a prey to passions than individuals, were necessary; and upon the whole the argument

Digitized by Google

would appear to be a sound one. Many of the ills that Egypt has suffered of late years have been due to the Egyptians' proneness to be carried away by passion, and not a few of them to their disposition to think more of personality than of principles. Adly Pasha's party, it is to be hoped, stands, and will stand, for saner and longer views, and the manner in which it conducted this first meeting indicates its ability to raise the tone of Egyptian politics. Nevertheless, Adly's friends and admirers in this country will have noted with regret his declaration—made at the meeting—regarding the Sudan, which, he said, must remain under Egyptian sovereignty. Such declarations, as we have pointed out before, can do no good, and may do harm; and though lesser men may find it necessary to seek a little cheap applause by making them, we are surprised that a statesman of Adly Pasha's standing did not find it possible to preserve silence on the subject.

Egypt at Lausanne.

There seems to be some chance that Egypt may be very much over-represented, or misrepresented, at the Lausanne Conference, if all the delegations appointed, officially and unofficially, should obtain a hearing. According to Cairo telegrams, the Egyptian Government is now selecting its representatives, and by the time these lines are in print their names will probably be known. But meanwhile there are at least a couple more Richmonds in the field; for an extremist delegation left Cairo for Lausanne on November 1 or 2, and another party, despatched by the Zaghloulist *Wafd*, followed on the 3rd. In the very unlikely event of either or both of these strictly unofficial parties obtaining a hearing at Lausanne, it would be interesting to know what effect the varying views of rival delegations would have upon the Conference. In point of fact, their mere presence in the town is likely to set the Conference wondering how far Egyptians are divided among themselves. That idea has—rather late in the day—occurred to some of the hotheads in Cairo, and it is possible, if not probable, that the unofficial delegations may yet be persuaded to keep themselves in the background.

Elections in Iraq.

It is unusual for the King of any country to take any active share in the elections, but Iraq is in some ways so new a State that King Faisal must be allowed to create his own precedents. This he appears to have done, in one respect, by issuing a proclamation to his people, impressing on them the importance of the General Election, now in progress, and the responsibility that attaches to them in choosing their representatives. He also points out that his Government is now to be responsible for the internal administration, and calls on the people to shoulder their burdens boldly. Such a proclamation can do nothing but good, and it is to be hoped that Iraq will respond to it in a right spirit. Meanwhile it is gratifying to be told that the bombing operations of the Air Force on the northern frontier are held to have been satisfactory, and we hope that the results will be lasting. Turkish influence among the Kurds and Arabs of that region appears to be on the wane, and it is to be hoped that it will make no quick recovery.

Turco-Arab Relations.

During the Great War he would have been a bold man who would have prophesied that, once freed from the Turkish yoke, Syria and the other Arab provinces of the Ottoman Empire would soon afterwards contemplate something like an alliance with the Turks. Yet something of the kind appears to be actually under discussion at the present moment. Translating from *Al Mokattam*, the Cairo correspondent of *The Times* telegraphs that: "Two months ago it was known that Kemal Pasha favoured the creation of an Arab Government, to include all the Arab countries which were formerly part of the Turkish Empire, to work with the Turkish Government in regard to questions of military, financial, and foreign policy in a manner similar to that which obtained in Austria-Hungary before the war." From the Turkish point of view, there is, of course, much to be said in favour of such a proposal, but, bearing in mind past relations between Arab and Turk, it would naturally be thought that it would make but a poor appeal to the former. And, in all probability, the Arabs of Arabia proper will look upon it with suspicion. Ibn Saud of Nejd, who, before the War, drove the Turk out of El Hasa "bag and baggage," and King Hussein of the Hejaz, who, with his sons, suffered much at the hands of Constantinople, will have their own views on the matter. But, we learn from the same *Times* message, a party of representative Syrians are now in Angora to discuss the fate of Syria and the question of the Arab countries.

For and Against "Alliance."

Our readers will need no help from us in endeavouring to account for the presence of this Syrian deputation in Angora, and if, later, we should hear of similar deputations arriving at Mustapha Kemal's headquarters from Palestine and Iraq, we should feel no particular astonishment. The political memory of the Arab is short, and the irritation of to-day—though it may be comparatively slight—effaces memories of the wrongs of yesterday. Moreover, the powerful impulse given lately to the growth of Moslem sentiment undoubtedly places in the hands of the Turks a trump card of high value; while the prestige gained by the Nationalists by their victory over the Greeks counts for much. So, we need not, after all, be greatly surprised by the change in Turco-Arab relations. The only question is: How far will it extend? Kept within reasonable bounds, a working "alliance" between Turks and Arabs might be beneficial to both; for the Turk has certain solid qualities which are lacking in the Arab, while the latter would bring to the partnership gifts of imagination, appreciation of the arts—which is all too rare in the Turk—a sense of chivalry, and an idealism which would all have their value. But if the combination should be concerned only with "questions of military, financial, and foreign policy," it would almost inevitably mean that the Arabs would be compelled to follow meekly in the wake of the Turk, and even if they were not dragged into some fresh "holy war," would have the growth of their national spirit greatly retarded.

Changes in the Governor-General's Council.

The past week's Indian news has consisted for the most part of announcements of various high appointments, a topic which seems to appeal to new India at least as much as it interested the old. Lord Winterton's retention of his position as Under-Secretary of State serves to strengthen what we said last week regarding the continuity of British policy in India, and we have heard no criticism of the arrangement on its merits, but a good deal is being, or might be, said regarding the changes in the Governor-General's Council, which have been published so many months after they became due. Sir Malcolm Hailey's keenest critics would, we think, admit that he has had exceedingly bad luck with his budgets, but at the same time his most ardent admirers must recognise that he has been more successful as parliamentarian than

Digitized by Google

as financier. His transfer to the charge of the Home Department doubtless means that he will be the leader of the Government in the Legislature, and nobody on the Council has equal claims for that onerous position, while there are obvious advantages in the arrangement under which Sir Basil Blackett goes out as Finance Member in time to handle Lord Inchcape's report, but untrammelled by any responsibility for the facts which have rendered its preparation necessary.

The New Finance Member.

The obvious criticism on Sir Basil Blackett's appointment as Finance Member is that of the British taxpayer, who considers that Treasury control has broken down, and that the institution at present contains everything except the tradition, or the practice, of such strict economy as is called for by the situation in India. It would, however, be most unfair to condemn the appointment on that ground, if only for the reason that the environment at Delhi would be immediately fatal to finance of the British after-war type, and, if we were dealing with the old India, we should be confident that Sir Basil is the right man to carry out so much of the Inchcape report as may be accepted by the Government. The real question is whether he possesses the parliamentary ability to convince an unfamiliar legislature of the wisdom of the measures he may have to propound. There is a distinct probability that Lord Inchcape and his colleagues will be thoroughly unpopular in India before next April, and if that should prove to be the case, the Finance Member will have a task which would tax the capacities of a Gladstone or a Peel. For India's sake we hope the task will be less onerous than that, and that, whatever the need, Sir Basil will prove himself equal to the occasion.

The Future of the Council.

The vital question of the composition of the Council at Delhi is raised once more by the selection—an excellent one, by the way—of Mr. C. D. M. Hindley as Chief Commissioner for Railways, because the Commission which proposed the establishment of that post recommended it as part of a scheme under which one of the members of Council should be specially charged with the Department's dealing with communications, and should be fully in touch with their daily work. In the same way, every other important Department wants an expert member of its own, and if these natural claims are acceded to, the Council will come to consist of departmental experts at a time when the country's needs call for a group of statesmen as nearly as may be relieved of departmental work. The allocation of portfolios among the members of Council has been under consideration for we forget how many years: increase in their number is condemned by considerations of efficiency, as well as of economy; and, though the doctrine may be unpopular just now, we must urge once again that the true solution of the problem is not to put in men on the ground of departmental qualifications but to free the members from the mass of departmental work which now sticks to them like barnacles. The voyage ahead presents quite sufficient difficulties to make it necessary to insist on a clean hull.

Rev. H. B. Rivington has been transferred by the C.M.S. from Omdurman to their Egypt Mission for work in Old Cairo.

An Arab resident of Mombasa has been sentenced to ten years' rigorous imprisonment and fined £100 for kidnapping. It appears that two negro boys were abducted and sent to Arabia as slaves. Efforts to trace the lads have been unsuccessful.

THE WEEK AT HOME.

London, Monday Evening.

Unopposed M.P.s.

Nearly one-tenth of the new House of Commons is already elected—the fifty-nine members who are lucky enough to be returned unopposed. So far the Conservatives (forty-two) have a big majority over all other parties, the remainder being Lloyd George Liberals, seven (including the ex-Prime Minister); Liberals, five; Labour, four; and Nationalist, one. These figures, of course, are of no value whatever as indicating the ultimate result.

For the remaining 550 odd seats there are about 1,409 candidates. In several there is a straight fight between Conservative and Liberal or Labour; in a good many cases the two brands of Liberals are finding a fearful joy in opposing and denouncing each other, much to the amusement but hardly to the edification of the rest of the political world. There are many triangular contests between Conservative, Labour, and Liberal; and in one or two cases, such as Dundee, there are no fewer than six candidates for the two seats.

The Campaign.

The usual flood of oratory is raging in almost every constituency. Mr. Bonar Law has been heard two or three times—in London, Leeds, and Glasgow; Mr. Asquith is fighting Labour with weapons of precision at Paisley—he is fortunate enough to have secured the support of the local Conservatives, which almost ensures him the seat; Mr. Lloyd George, who was spared a fight in Wales, has chartered a special train all to himself, and is rushing all over England and Scotland, succouring the faithful National Liberals—who are very hard-pressed—with torrents of eloquence.

But the campaign is a very orderly one; there are signs that everybody is obeying the old Sunday-school injunction: "Let not your angry passions rise." Eatanswill and its mob belong to old England; the new England seldom interrupts the speaker, listens impartially, only occasionally heckles, but at the end of the speech, when questions are asked for, shows that it has kept an open mind. With memories of the riotous scenes of 1906 and 1910—the last time I sat on a party political platform the whole stage was mobbed by an angry crowd, who refused to hear a word the wretched candidate was saying, and threw bags of flour, carrots, and herring-guts at us all—the

present election rather reminds me of what I imagine a mothers' meeting must be like.

Possibly woman suffrage has something to do with it; at any rate, ladies are attending meetings in large numbers, and show an obvious desire for political information. The quiet, argumentative candidate rather likes these meetings, as he can fire off his whole speech without interruption; the more robust type of politician, who looks upon challenges as an opportunity for a gibe or a smart retort, rather regrets the good manners of the day.

One seasoned speaker told me that "the hopeless thing about women is that they never cheer or hoot, and therefore you never know whether your point has gone home or whether you are boring them." He complained particularly that two young ladies were knitting jumpers in the front row the whole time he was trying to work up enthusiasm over his own programme, and then quietly asked him a devastating question at the end.

Cross Currents.

So far as one can tell from external signs, the most popular man is still Lloyd George; his name never fails to evoke cheers, rather to the embarrassment of those who have been attacking him. But there is no possibility of his getting a majority. For the rest, the crowd seem to cheer every public man irrespective of party; I looked in at a Conservative meeting the other day, and in ten minutes the same audience cheered both Mr. Asquith and Mr. Bonar Law. Personal passion, and both love and hatred, are at a low ebb.

On the other hand, I heard a Liberal (of the old school) give a lecture—I can call it nothing else—on national finance to an interested meeting. Except for the placards on the walls and one or two sentences, I should hardly have known it was an election meeting; it was the kind of thing one hears, or, rather, avoids hearing, at the School of Economics. All this shows that the new electorate is conscientious and impartial; for I discovered afterwards that this particular candidate knew he was addressing a hostile audience. But they gave him a perfectly fair hearing, and a consolatory cheer at the end.

The Liberals report that they are making enormous headway, and the Wee Free tail—what is left of it—is very much up. I do not hear quite the same accents of conviction from the Tory camp; and for some reason Labour has suddenly become pessimistic. Possibly it was the manifesto; more probably the result of the municipal elections last week, in which Labour councillors were swept clean off the board.

That is not very surprising, after their extravagance with the rates; but the connection between municipal and national elections is notoriously very slight, and at the moment I think Labour rather under-estimates its own chances. Perhaps, like Mr. Bonar Law's celebrated confession, it does not quite know where it is. No politician does at the moment. The cat shows no sign whatever of the way it intends to jump.

The New Appointments.

The new members of the Government include Mr. Ormsby-Gore, Lord Wolmer, and Mr. F. S. Jackson. The last is best known to fame as the first cricketer who has made a success of the greater game, and he is universally wished well. Lord Wolmer is so interested in Church matters that he seems rather curiously placed at the Board of Trade—the very last place one would have expected to find him. Mr. Ormsby-Gore is one of the ablest and straightest young men in politics to-day, and he should go far. The remainder are a fair average of samples from bulk—sound, but still with their spurs to win.

Some wit the other day called it "the Safety First Government"; its motto obviously is, "Be good, and let who will be clever." In fact, it reminds me of the old Winchester master's remark: "Brilliant boys? Thank Heaven, we don't turn that sort out at Winchester. We manufacture character, not brains, at this school."

Father Bernard Vaughan.

Father Vaughan, who died last week, was one of the few men who made his name as a popular preacher after he was fifty. He was a provincial rector of the Roman Church for twenty years before he came to London; but when he arrived in the West End his fearlessness, and what one can only call his journalistic flair for the topics of the day, soon made him a personage. Perhaps his best known course of sermons was on "The Sins of Society." Mayfair rather likes to hear itself denounced from the pulpit, and it got what it bargained for—perhaps a little more. This was the more obvious side of Father Vaughan's character; much of his real work was done in the East End slums, where the people knew him and reverenced him.

The Marriage Service.

There seems to be some difficulty about the revision of the marriage service in the Anglican Prayer Book. The service at present runs, "O God, who by Thy mighty power, etc. . . . didst appoint that out of man created after Thine own image and similitude, woman should take her beginning." It was proposed to revise this to "didst after Thine own image and similitude create man and woman." But the English Church Union objects to the alteration, and it is suggested that this in some way explains the objection of the High Anglicans to women in orders. I do not quite see the connection myself—I should have thought that the High Anglicans' objection to the latter could have been defended directly from St. Paul, who is rather a formidable person to set aside. But the marriage service seems to raise unsuspected problems in ecclesiastical circles.

The Week's Book.

"My Memories," 1878-1918 (Cassell), by the ex-Kaiser Wilhelm II., is a poor book. It seems incredible that it should be so, but the late Emperor shows little grasp of statecraft, no political wisdom whatever, and no sense of history on any but its most obvious side. He contradicts himself frequently; the one thing that emerges is the author's conviction that everybody was wrong except himself. The book is a revelation of the Kaiser's mentality, but nothing else. It will have to be read by historians, but they will get little out of it.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, October 27.

Local Effect of Home Crisis.

The Ministerial crisis at home is a subject of much interest out here, vying in this respect with the question of the country's participation in the Peace Conference, and considerable anxiety is being felt in regard to the policy which the new Cabinet will adopt towards Near and Middle Eastern affairs in general and towards Egypt in particular. Curiously enough, many Egyptains seem to think that the fall of the Lloyd George Cabinet will be to the advantage of Egypt, though how they can expect a more ultra-Liberal policy than that adopted in February last by the outgoing Cabinet no one can understand. A regrettable feature in the leading articles of the vernacular Press is the general hostility which the writers show to Mr. Lloyd George. No doubt they resent his attacks on the Turks, but they seem to forget that it was thanks to his personal intervention last February on the occasion of Lord Allenby's visit to London that Egypt obtained a recognition of her independence; and, to a Western mind, it would have seemed but in accordance with the ordinary dictates of gratitude if, in recognition of what the ex-Premier had done for Egypt, they had tempered their criticism of his anti-Turkish diatribes.

The New Parliament.

Much interest is being taken in the construction of the buildings in which the new Parliament is to be housed, and officials who watch operations from the adjoining offices, or who pass the site every day on their way to and from their work, declare that the walls "jump" overnight, just as travellers on the Helwan Line averred years ago about the "Kitchener" road to Cairo. Considerable progress has, indeed, been made by the contractors, who have undertaken under heavy penalty to have it ready by next March, and there is every probability that the building will be completed by the date promised; but it is still a matter for conjecture whether the future inmates will have been elected by then. The Chamber is being erected in the garden of the Public Works at the back of the old Legislative Assembly, which is to be the Senate House, and to which the new building is to be connected. It is intended to provide only temporary accommodation for the deputies, but there is every reason to believe that it will in the long run become the permanent Parliament building, for it will be many years before Egypt will feel itself justified in spending a quarter of a million or so, which a permanent building of proper dimensions will cost.

The English School in Cairo.

Those interested in educational matters in general, and in the prestige of the British community in Egypt in particular, will rejoice to learn that the English School in Cairo has been reopened. This school was started in 1916 in order, on the one hand, to meet a want felt by the British community, the members of which were experiencing great difficulty in sending their young children home to England to be educated, and, on the other hand, in order to repair the damage done to British prestige by the fact that, alone of all the important foreign communities in Egypt, the British had no national school of its own. Pressure was brought to bear on the British Government, which in due course promised a subsidy of £1,400 for two years and a grant of £600 towards building whenever a decision to this effect might be come to. Time went on, and certain difficulties arose which necessitated an inquiry being made by a special committee appointed by the High Commissioner. Before this inquiry could be terminated, however, an intimation was received that the British Government grant would be withdrawn, and the school had to be closed for want of funds in the summer of 1921.

The need for a school, however, continued to make itself felt, and recently the High Commissioner called a meeting at the Residency to consider the subject. As a result thereof an urgent request for a subsidy was sent home to the Government and an appeal was made locally for financial support. Responding to the High Commissioner's request, the British Government promised to renew its subsidy for the current and next financial years; and the necessary support having been promised locally, it was found possible to make a fresh start. It has, however, been necessary to raise the fees to £10 per term, *i.e.*, double what they were before; and since there will be quite a number of parents who will not be able to afford this extra expense, a Bursary Fund will be raised by local subscription to afford assistance in bonâ-fide cases.

The statistics show that there are well over 800 British (Island and Dominion born) children in Egypt between the ages of eight and fourteen, so that there ought to be no difficulty in filling vacancies. In course of time the purely British community is bound to shrink in consequence of the introduction of the new régime; and in order to be able to make the school a paying concern it has

been decided to admit children other than British and Dominion born, on the understanding, however, that they will pay full fees and will never at any time exceed 20 per cent. of the total possible attendance.

The British Officials.

Little official information is transpiring with regard to the case of the foreign officials in the service of the Egyptian Government, but from the conversations in British circles and occasional paragraphs in the local Press, it is evident that the emigration of British personnel has started. Whatever retirements are taking place, however, are, it is understood, by arrangement between the Residency and the Cabinet, in view of Sarwat Pasha's declaration that he could not agree to a general scheme, but was prepared, in consultation with the High Commissioner, to deal with any cases where prejudice had been suffered. So far, except in the case of "contract men," the Egyptian Government has not carried out any dismissals, and it will not be able to do so until such time as a definite scheme has been effected. It is stated that over one hundred officials have applied to go, and that about one-third have had their applications accepted by the Residency and the Cabinet.

PALESTINE.

Jerusalem, October 22.

The Change in the British Cabinet.

Hope springs eternal in the breast of the Palestinian Arab malcontent. The resignation of Mr. Lloyd George's Ministry has been seized upon with joyful avidity, and an excited, expectant feeling is abroad. Some of the wilder optimists speak confidently of the new Government's withdrawal from its rashly assumed mandatory obligations, but one and all look to some modifications in the terms of the Mandate, including, naturally, a drastic "reinterpretation" of that excessively reinterpreted Balfour Declaration. A report which came through yesterday—that Lord Selborne was one of the most likely candidates for the Colonial Office in place of Mr. Churchill—has served to reinforce these hopes. The local Arab politicians are rarely capable of envisaging a policy apart from a man, or the tyranny apart from the tyrant. Therefore *mafish* Lloyd George is equivalent to *mafish* every act of State carried through under the Lloyd Georgian régime—Balfour Declaration, Jewish High Commissioner, British Mandate, and the new Palestine Constitution.

The local Jews are, on the other hand, not quite so perturbed. They are unquestionably nervous, but they are capable of a larger political perspective. They know well enough that their position in Palestine is dependent on the influence and purse of international Jewry, even more than on English internal politics. They have for long supported themselves with the notion that the "Jewish National Home" is not an act of grace from Great Britain, but an act of *weltpolitik* bearing the guarantee of the "League of Nations," not to mention the *imprimatur* of America. A change of the Cabinet in Great Britain they see as but a small detail. And even, they argue, if the Jewish future in Palestine is a matter which should come up for revision by a Bonar Law Ministry, the Jews may still retain their peace of mind. Was not Mr. Bonar Law a member of that Cabinet under whose auspices, in 1917, the Balfour Declaration was promulgated? And when a Zionist Delegation appeared to offer its thanks to the British Government, was it not Mr. Bonar Law himself and none other who received it in the name of the Government?

The Census and its Opponents.

There have been one or two slight incidents, but the Government is pressing through the Palestine census and ignoring the opposition of the Moslem-Christian Association. The response of the Census Department to the objections raised by the Association did not meet with the latter's approval; therefore last Sunday a long proclamation was distributed by the President of the association withdrawing the approval it had given some weeks earlier to Arab participation in the census. That consent, the proclamation explains, was granted under the impression that such a census would "prove that we are the majority. . . . The Executive Council supposed that the Government was taking the required steps to ensure the accuracy of the census returns"; whereas, in reality, the methods adopted were quite unsuitable, involving manifest harm to the nation, and the Government refused to accept the Council's ideas on how a census ought to be taken; also the Council found that the chief object of the census was the drawing up of the electoral list, and that the census was being taken simply and solely with this end in view. "The Council considers that the present Government census involves actual danger to the nation from two sides, administrative and political, and therefore it withdraws its previous expression of consent." The concluding section of the proclamation is interesting as showing the Moslem-Christian's foreign politics: "The Kemalist victory has already destroyed those pronouncements which had oppressed weak nations and deprived them of their rights, and the Mudania Congress resolved that the Treaty of Sèvres must be changed—the same Treaty that contains the Mandate and the National Home for the Jews. Consequently our nation must do nothing of fundamental import before it is clear what the condition of things will be after peace has

been signed. The Executive Council determined at its last session to send a delegation (to Mudania) to discuss the Palestine question, because at Mudania were annulled all the treaties previously bearing on the Constantinople Government, and it was agreed to discuss the legal status of Kemalist Nationalism, the first article of which lays it down that a referendum be held in all Arab territories on what their lot shall be. The delegation has already been chosen, and will shortly leave for the Peace Congress to defend the rights of our people, who must wait confidently and patiently for the results, and do nothing that may compromise the delegation's negotiations, such as, for example, taking part in elections to the Legislative Council and in whatever is connected with it. And success is in the hands of Allah!"

The Government at once informed Musa Kazim Pasha, the President of the Executive Council, that it regarded this proclamation as a breach of the law, but before taking legal action, and in view of the promises made by the Arab leaders to conduct their politics only along constitutional lines, the Government gives him an opportunity to remove any possible misunderstanding and state publicly that the proclamation had no intention of provoking popular opposition to the census. Kazim Pasha replied, expressing regret and astonishment at the misunderstanding, urging that there was nothing illegal or unconstitutional in the proclamation; the Council had simply read the census regulations, and found that, instead of good, they were productive of serious harm, and the Council felt compelled to recall its first proclamation in order that responsibility for the harm should not fall on the Council; but it left complete freedom to individuals to do as they thought best. The Council, moreover, expressed its surprise that the Government had confiscated copies of the proclamation and imprisoned some of those who were distributing them; the Council feared that this action of the Government might cause disturbances, and would the Government, therefore "please, release the imprisoned men and forward the confiscated copies to the people for whom they were intended."

The reply of the Government to this was to say that it would abide by results. If there should be any opposition, it would take legal measures.

Some Minor Difficulties.

There has been opposition, mainly concentrated in Nablus. Elsewhere threat of fine and imprisonment quickly induced the majority of the malcontents to toe the line. Whether the totals will be such as to inspire confidence is doubtful. The Arabs are utterly unable to see why all Arabs who left the country should not be included. As the enumerator who delivered the census form to the present writer explained, he, like every patriotic Arab, desired that their numbers should be not less than a million; and he was quite convinced that the Jews were including in their returns all their relatives in Germany, Poland, and Russia. The Jews are certainly straining every nerve to see that not a soul of them is overlooked, and are exercising an unofficial but watchful care that the forms reach every household.

The question of language is greatly concerning them. The census asks for the "Mother-tongue." Some bright individual turned this in the official Hebrew version of the form into "tongue of the mother"; and since the mothers of mostly every Jew in the world, till a few years ago, spoke anything but Hebrew, the language returns threatened to be hardly according to the likings of the Jewish Nationalists, for whom the Hebrew language is the Alpha and Omega of the Jewish cultural revival. Hence the following interesting definition of "Mother-tongue" in *Ha-Aretz* of to-day: "The intention (of the census) is to discover what each inhabitant of the Land of Israel considers his national language. And it is not of the least importance if he should happen to talk Yiddish or Spaniolish, Arabic or Persian, Russian or German, English or French. The English write "nationality" when they mean "citizenship," and so also they write "Mother-tongue" meaning "national language." . . . Therefore let all Jews and Hebrews in spirit and national consciousness write down everyone, without any exception: "Hebrew—and Hebrew only." As for the orthodox and pious Jews, to whom Hebrew is too sacred to be used as an everyday language, let them remember what Rabbi Meir said: "Everyone who lives in the Holy Land, and talks in the Holy Language, is safe for the world to come!"

GREECE.

Athens, October 25.

A Monster Meeting.

A very imposing meeting, in which more than eighty thousand people participated, was held last Sunday at the old Palace square. The demonstration was organised by the Union of Trade Federations with a view to demonstrating the wish of the people for the restoration of the old bonds of friendship between Greece and the Allied nations, also to express the people's confidence and full approval of the actions and the programme adopted by the revolutionary committee. After the president of the Union of Trade Federations, M. Vrettos, greeted the army and the navy in the name of the people, the following resolutions were unanimously passed:

1. The Greek people having from the very first approved with enthusiasm of the principles of the Revolution, to-day confirms its (the Revolution's) programme, and is determined at all costs to contribute towards a successful issue of the work of the national defence and towards the reconstruction of the country.
2. It approves of the forced abdication of King Constantine, who could not, in any circumstances, return to the Greek Throne.
3. It proclaims its unwavering determination that Greece should stand with her natural and traditional friends and Allies, by whose side she fought. It asks that every effort should be made to dissipate any misunderstanding which may have arisen during the recent past.
4. It expresses its deepest sympathy to the people of Asia Minor and Thrace who were hit directly by the national calamity.

Immediately afterwards the revolutionary leader, Colonel Gonatas, in a short speech, described the Revolution as the expression of the national will to abolish the régime responsible for the disasters which had befallen the nation.

Colonel Gonatas was followed by Colonel Plastiras—probably the most popular officer in the Greek army to-day—whose appearance on the old Palace balcony was greeted with prolonged cheering. Colonel Plastiras spoke of the glorious deeds of the Greek army during the Balkan Wars and the Great War, which were now totally eclipsed by the shameful defeat and rout in Ionia. "And when," added Colonel Plastiras, "the catastrophe was complete, the great criminals who were responsible for it attempted to put the blame on the army by saying that it had refused to fight. That was a slander! The fight had been betrayed." When the speaker announced that the guilty would be punished, the crowd in the square broke out in cries of "Curse them!" "Hang them!" and "Put them to death!"

The meeting broke up in a very orderly manner, and the organising committee called at the Allied Legations, as well as those of the United States, Serbia, Roumania, Belgium, and Japan, to hand in a copy of the resolutions passed. At the British Legation the committee was received by Mr. Lindley himself, who, after thanking it, pointed out that only by unity and co-operation would the country

Digitized by Google

succeed in accomplishing the heavy work of reorganisation which lay before it.

Although the demonstration was purely national, and every endeavour was made to avoid giving it any party colouring, it is now, unfortunately, known that many of the ex-King's fanatical sympathisers not only refrained from taking part in it themselves, but exercised all their influence to persuade the more conciliatory elements of the party to do likewise, as, they pointed out, the meeting was a Venizelist one. Despite this very unpatriotic conduct of the irreconcilable royalists, the success of the meeting surpassed all expectations of the organising committee. Colonels Gonatas and Plastiras, whom I saw on the following morning, told me that they were perfectly satisfied with the result of the demonstration, which proved beyond doubt that they had the full support of the people, and added that the revolutionary committee would now continue its national work with greater confidence and renewed energy.

Athens was beflagged on Sunday, and the main arteries of the city and the public buildings were illuminated at night, while all cafés, cinemas, and other places of entertainment, which had remained closed during the demonstration; reopened in the evening. At eight o'clock about two thousand Venizelists demonstrated outside the Liberal Club.

The Elections.

Nothing has yet been decided with regard to the date of the elections. The Government and the revolutionary committee are in favour of holding them after the signature of peace, when Greece, having settled all outstanding external questions, would be able to turn her full attention to her internal affairs. The Liberals, on the other hand, maintain that the elections should take place as early as possible, but, in any case, before the peace conference is held. In that way, it is argued, there will be a responsible Government in the country possessing full powers to sign or to reject the Peace Treaty. The question will remain in abeyance pending the arrival of the Prime Minister, M. Zaimis, who is expected in Athens next week.

Doctor Nansen.

Dr. Nansen, who arrived here last Saturday, left on Monday morning by a Greek destroyer for Mudania, and subsequently for Broussa, in order to meet Mustapha Kemal. During his short stay in Athens he conferred several times with the Acting Premier, M. Krokidas, and the Foreign Minister, M. Politis, whom he informed that the League of Nations had placed the sum of £200,000 at the disposal of the Greek Government, to be used for the requirements of the Asia Minor and Thracian refugees. He also declared that the League of Nations would look after the wheat which is abandoned in Thrace by the departing population. Some of this wheat has been already removed to safety by the Greek authorities, but there still remain about 25,000 tons, which Dr. Nansen will purchase on behalf of the League of Nations and on account of the Greek Government, to which it will be handed over after the Turks have reinstalled themselves in Thrace. The removal of the wheat will be effected under protection of the flag of the League of Nations.

Dr. Nansen's object in seeing Mustapha Kemal is to urge the Turkish dictator to put a stop to the wholesale deportations of the Christian population to the interior of Asia Minor, and also to make arrangements with regard to the mutual exchange of hostages and prisoners of war. Mrs. Nansen, who accompanied her husband to Athens, remains here pending his return.

Miscellaneous News.

Queen Elizabeth has returned to Athens from Bucharest. Prince Andrew, M. George Baltadjis (formerly Minister for Foreign Affairs), General Stratigos (formerly Minister of Communications), and M. Vozikis (formerly Governor-General of Thrace) have been arrested by order of the revolutionary committee.

M. George Ralli, son of the late Demetrius Ralli, who was offered one of the vacant portfolios in the Krokidas Cabinet, has declined the offer.

M. Venizelos has offered 80,000 drachmæ for the relief of the Asia Minor refugees who are now in Candia.

The Minister of Public Assistance, M. Doxiadis, left last night for Macedonia and Western Thrace to make arrangements for the installation of refugees in those regions.

BULGARIA.

Sofia, November 1.

Bulgaria and the Conference.

The Allies, through their diplomatic representatives at Sofia, have sent an invitation to Bulgaria to take part in the Lausanne Conference. M. Stambolisky will himself attend, and will be accompanied by a commission of five experts. The Prime Minister will leave Sofia at the end of this week for Bucharest and Belgrade, in order to inform himself what Roumanian and Serbian policy will be regarding the future of the Straits. Bulgaria herself stands for the freedom of the Straits; she does not want Turkey to be able to close the path to the Bulgarian ports on the Black Sea. With regard to Russia's part in the question, it is as yet too early to define Bulgaria's attitude.

M. Stambolisky has latterly been inclined to favour a more Russophile policy. Perhaps he sees the day approaching when Bulgaria may once again need Russia's help. He follows Russia's Near Eastern policy very closely, and the ever-present Russian threat to Bessarabia has not passed unnoticed in official Bulgarian circles. The Sofia Government realises full well that although Russia is now Soviet, she has not lost sight of her needs in the Orient. It will be extremely interesting to note the relations that prevail between Bulgarians and Bolshevists at Lausanne. M. Stambolisky has so often been accused of being in secret *liaison* with Moscow, that it would surprise but few and please many if these accusations turned out to be correct.

It is, however, unlikely that they will turn out to be correct; M. Stambolisky is certainly not hostile to Moscow. He knows his own interests too well to be that; but he also knows that any pronounced sign of friendship would be viewed by England and France with misgiving, and this he is not anxious to cause those two Powers.

Bulgaria a Home for Refugees.

As M. Daskaloff, the Minister of the Interior, remarked last week, Bulgaria is fast becoming a refugees' home.

In 1919 Bulgaria had within her frontiers close on half a million Thracians, Macedonians, and Dobrujans. These refugees constituted ten per cent. of the population of the country. Since then, approximately forty thousand Russians have been allowed to enter Bulgaria. Recently the Armenians began to arrive from Thrace, and it is estimated that between 20,000 and 25,000 have so far crossed the frontier. Even Greeks are taking advantage of Bulgaria's hospitality, although in considerably

Digitized by Google

smaller numbers. Viewed politically, this huge influx of refugees is a heavy burden on the State, as refugees are notoriously troublesome people to deal with. Economically, it is extraordinary how they have been and are being absorbed. As a general rule, it can be said that if an able-bodied man in Bulgaria wants to find work, he can find it. The problem of women and children is, of course, different; but even they, owing to the extremely low cost of living, are, for the majority, able to keep body and soul alive.

When Bulgaria is criticised, as she so often is, for the way she treats refugees, especially Russians, the cardinal fact that she has opened her doors to these unhappy people is often forgotten. During the last six months every Balkan country, excepting Bulgaria, has refused to accept the Russians. During the same period Bulgaria has accepted over ten thousand. It is to be hoped that refugee organisations in England, as well as in other European countries, will remember Bulgaria's attitude, and will give her due credit for what she has done.

The Government's Foreign Policy.

At the end of last week the Prime Minister made a long speech concerning the foreign policy of the Agrarian Government. The following were the principal points: Speaking of the Reparations, he said that the situation appeared more favourable than it had done for a long time. The fall of the mark was a warning to the creditor States.

The present Government is still of the opinion that Bulgaria must pay reparations, but that it will be impossible to do so before 1925. The Prime Minister believes that after the Near Eastern Conference the Bulgarian Reparation problem will be discussed. He added that the Ministry of Finance is engaged in preparing a detailed statement concerning reparations, and that this statement will be presented to the Reparations Commission and the Governments of the Great Powers.

M. Stambolisky referred to the League of Nations in flattering terms, but added that its activities were restricted by the non-membership of Germany, Russia, and America. He hopes that the League of Nations will play an important part in the settlement of the Near Eastern Question, and will afterwards correct the injustices committed by the Peace Treaties.

The most important part of M. Stambolisky's speech dealt with the question of Thrace. He declared that Bulgaria's relations with Turkey were good, but that Turkish claims to Western Thrace could not be admitted. He repeated his desire that Western Thrace should be made autonomous. He also claimed that it was essential for Bulgaria to have a free outlet to the Ægean. Referring to the absolute neutrality which Bulgaria had observed in the Greco-Turkish War, he said that it was surely a proof of the Agrarian Government's desire to maintain peace in the Balkans.

His speech ended with a few remarks concerning Bulgaria's relations with the Great and the Little Entente. The Sobranje received it enthusiastically, and passed a resolution approving the foreign policy of the Government.

ROUMANIA.

Bucharest, October 27.

Political.

The Parliamentary session, which was opened on the 12th inst. merely for the purpose of inviting the members to attend the Coronation, was adjourned until after the festivities, and it began its real work on the 23rd inst. This session lasted for three days. The members of the Transylvanian National Party and of the Peasants' Party, it may be mentioned, still abstained from attending.

Although this session was a short one, yet a good deal of useful work was done. Among the measures discussed and passed was one for the improvement of the State officials' status, for which a sum of over 600 million lei, arising from the budgetary surplus, was allocated. The amended Bill for the Treasury Bonds Consolidation was passed without any comment, following on a statement as to the satisfactory financial situation of the State made by the Minister of Finance.

On Tuesday the Premier entertained the members of the Majority to a Parliamentary tea at the Ministry of Foreign Affairs, for the purpose of a political discussion. Speaking of the external situation, M. Bratianu said that while peace in Europe is far from being ensured, the situation is less grave than it was a few weeks ago. The danger had passed, because all difficulties arose from the misunderstanding between Great Britain and France, and this misunderstanding is now cleared up. M. Bratianu also laid special stress on the very friendly relations that exist between this country and France, which were further strengthened by the visit of Marshal Foch. In conclusion, he pointed out that Roumania's relations with her neighbours, Czecho-Slovakia, Yugoslavia, and Poland are good, and of such a nature as to remove any danger of aggression from unfriendly quarters.

General Berthelot.

At one of the Parliamentary sittings, M. Jorga, one of the Opposition leaders, moved that a piece of land, with a house on it, should be presented to the French General Berthelot. This proposal was immediately accepted with enthusiasm by the House, and a similar scene took place in the Senate.

General Berthelot, who this time visited Roumania on the occasion of the Coronation, together with General Foch, was, during the war, head of the French Military Mission in Roumania. He shared the trials of the Roumanian Army during its retreat to Moldavia; subsequently contributed with his counsel to its glorious exploits at Marasheshti and other memorable battles in Moldavia; and was also present when it made its triumphal entry into Bucharest. As a token of gratitude for services rendered to this country, the French General was some time back granted honorary Roumanian citizenship, and the present gift supplements the earlier grant. It is in keeping with the old Roumanian tradition of rewarding distinguished warriors with freehold land.

ALBANIA.

Tirana, October 23.

The Eternal Frontier Question.

In previous communications I have told you how the International Frontier Commission, though inspired by the best possible intentions, has been meeting difficulties in the accomplishment of its labours. The Serbo-Albanian frontier from the Adriatic to the Lake of Scutari has been definitely traced and ratified by the Conference of Ambassadors at Paris; and boundary marks have been erected.

The Commission has further studied the frontier from the Lake of Scutari as far as Klementi, has drawn up its report, and has duly submitted it to the Conference of Ambassadors. Unfortunately, the Conference, though it has had this report for five months, has not yet ratified anything.

On the other hand, the Commission has encountered difficulties, not only from Greece, but also

Digitized by Google

from Serbia. I have already described the intransigent attitude of the Greek delegate, who left the Commission upon a futile pretext, and has caused the interruption of the task from the Koritsa side. The Conference of Ambassadors has decided to proceed with the tracing of the frontier, even without the participation of a Greek delegate, and in spite of the refusal of the Greek Government—a decision, however, that has not yet been applied.

When the Frontier Commission wanted to fix the line to the south of Lake Ochrida, it intended to form a neutral zone, that is, to insist on the withdrawal of Albanian and Serbian troops in the region of the monastery of St. Naoum. Serbia refused to accede to this request, maintaining that the frontier at this point should remain without alteration. But as a matter of fact, St. Naoum is Albanian territory; it was recognised as such by the French Army of the Orient (1916-1920), and also by all the experts. The text of the Conference of London in 1913 admits not the slightest doubt on this point.

In face of these difficulties the Commission has been obliged to work to the north of Lake Ochrida, in spite of the approach of winter.

From the foregoing facts it can be seen how precarious the situation in Albania is. Patience is still necessary, but there is a limit to everything. And people are asking here whether, because of the rivalries and jealousies of the Great Powers, Albania should suffer and her frontiers await the Big Men's whims. Further, they ask, why should Albania endure these things because of European rivalries.

Relations with Greece.

Foreign journals have recently published yet another ridiculous report, according to which Albania had sent assistance to the Turks against the Greeks. I have carefully followed this question, and from the beginning I have told my readers that the Greek *débâcle*, with the complete defeat of the Army in Asia Minor, and the anarchy prevailing in the Athens Government, leaves the Albanians perfectly indifferent, for they are determined, so long as the Greeks do not disturb the peace of Albania, to preserve a strict neutrality. The reports that have been circulated are devoid of all foundation, and have no other aim than to mislead public opinion, and to further the cause of international intrigue.

The Position of the Government.

It is probable that the present Chamber will vote that the Constituent Assembly should be summoned next year. The general opinion in the country is in favour of such an Assembly, and the elections of next spring—for the present legislative session expires with this year—may be held in view of an Assembly. Such a convocation is urgently desired to fix definitely the form of the Government, a form which is at the moment republican, but which might well be made monarchist. A body of men from Valona has, in a message sent to the Government, demanded the convocation of the Assembly.

In regard to Valona, it may be remembered that in a by-election, which was held in this prefecture, it was an Opposition candidate—Qazim Kotzanli—who obtained all the votes except one, which went to the Government candidate. So the number of Opposition members in the Chamber has increased to fourteen, a number that was in evidence on October 14, when a discussion arose on the project of a hide and skin concession to a French company. Nevertheless, on the 21st inst. the Vice-President of the Chamber, who is to replace Nicolas Koja (compromised in the affair of last March, and at the moment out of the country) was elected almost unanimously, obtaining fifty-four votes out of sixty-five. The new Vice-President, Michel Mosi, belongs to the majority, and some of the votes which he obtained are evidently those of the Opposition, for the eleven votes against him were given to two other candidates also of the majority members.

In spite of this, rumours are circulating on the necessity of remodelling the present Cabinet. A minor crisis is possible, and so the two members who have to complete the High Council have not yet been elected, the Chamber having on two occasions, postponed this election.

The Bektashis.

The Chamber of Deputies has been engaged in the proposal of a law concerning the sect of Bektashis, and their official recognition as a community possessing all the rights of a society acknowledged by the Law.

The Bektashis are a sect of the Mohammedan religion, with very liberal principles; they have great toleration for Christians, and are not strong in their observance of the prescriptions of the Koran, such as the practice of prayers and the fast of Ramadan. Their scant attachment to the external forms of Islam causes them to be considered as heretics by the Sunni Moslems. With their monasteries (Tekié), and their officers (Baba), they rendered great service in the Albanian renaissance, and especially in awakening the sentiments of nationality in this race. The sect is found chiefly in the South of Albania, where they had numerous monasteries with very flourishing gardens—which, however, were burned and destroyed by the Greeks in 1914. But Bektashi *tekiés* are also to be found at Elbasan, at Martanesh (to the north of Elbasan), at Kroya, at Dibra, at Yakova, at Tetova, at Uskub, and at Monastir. After the destruction of the Janissaries by the Sultan Mahmoud, the Bektashis were persecuted by the Turks, and their order was not officially recognised, so that under the Ottoman régime the Bektashi monasteries were obliged to enrol themselves under another name, and the members of this sect were deprived of permission to organise. It is to remedy this lack of organisation, from which they have suffered until the present time, that the Bektashis—adopting a decision taken by them at the Congress which they held in the summer of 1921—have presented a request to obtain, not indeed the liberty of practising their creed, for this liberty has never been contested, but their recognition as a community.

Parliament has decided that, since Albania has no State religion, all communities have full liberty if their statutes do not clash with the relative laws.

JAMES ELROY FLECKER.

HASSAN OF BAGHDAD.

"HASSAN." By J. E. FLECKER." (Heinemann. 5s. net.)
"JAMES ELROY FLECKER." By Douglas Goldring. (Chapman and Hall. 7s. 6d. net.)

II.

It is important to realise how much the writing and the placing of his play "Hassan" meant to Flecker. Poets do not always rightly appreciate their own works, but Flecker knew "Hassan" to be his biggest work, his masterpiece; and feverish anxiety to complete it and then to place it (with Mr. Granville Barker) is evident in his letters. He intended, moreover, with "Hassan" very definitely to awaken the public to the fact of his existence. He was tired, in 1913, of general indifference to his work, and deliberately calculated, with the tragic ending to his play, to shock the slow fools who supply fame. In July 1913, he wrote thus of "Hassan" in a letter from Leysin, Switzerland, which Mr. Goldring quotes:—"If it doesn't give the public shivers down the back when it is acted in its place, I'll never write again." All his last months were consumed with the desire to have the play produced in London—its publication he wished to come some time afterwards. It was to have been produced in the autumn of 1914, but the outbreak of the War made that impossible. What a disappointment this must have been to the dying poet, can be guessed from the following extract of a letter writen from Montana: "There is perpetual sunshine here and perpetual leisure. Otherwise there's no particular reason for my continued existence. I get neither better nor worse and wait all day for news of 'Hassan.'" Long before either production or publication of the play could be accomplished, Flecker was dead.

What is this "Hassan," which all the connoisseurs have hailed as putting Flecker in the line of the Elizabethan dramatists, and which all cultured playgoers are eagerly expecting? It is the simple story of Hassan, an old confectioner of Baghdad, how through services to Haroun-al-Rashid he came to power, fell from it, and finally started from the capital, with Ishak, the poet of Islam, upon the golden journey to Samarkand. In general language, it is the old theme of the transience of earthly power and of the immortality of love that Flecker has decorated. There are a handful of beautiful verses in the play, but for the most part it is written in poetical prose. It begins with a dialogue between Hassan, steeped in the illusion of untimely love, and Selim, a worldly rogue who knows well the object (for she belongs to a type) of Hassan's admiration. Through the craftiness of this Selim, Hassan's intentions to woo Yasmin are frustrated, and the first attempt at making love by the old confectioner leaves him crushed and fallen under the shadow of a fountain outside a house in Baghdad. The Caliph, with Safar, his Vizier, Masrar, his executioner, and Ishak, his poet, now enters the play. These men, disguised as merchants and bent on amusement, have gone out at night in the city. From a room near where Hassan in stupid disappointment had fallen they hear music, and demand entrance to the house. After some talk and an explanation that they are no Baghdadis, but merchants come from Basrah, they are admitted, to find that they are the guests of Rafi, King of the Beggars of Baghdad, who, for a wrong done him years ago intends that night to murder the Caliph and to usurp his power. But Ishak, the poet, had refused the adventure of being hauled up from the street to Rafi's room, and had put in the basket instead of himself the slumbering form of Hassan. After being entertained by Rafi and his beggars, and being told by Rafi that it is for the sake of Pervaneh, his betrothed on the Mosul hills who was carried away a slave by the Caliph's men, that he intends to kill the Caliph, the party find themselves imprisoned, and with the helpless knowledge that the Throne of Islam is almost at that moment being assailed. But Hassan is fortunate enough to perceive a chink in the wall large enough to admit of a message on paper being pushed through, so to fall into the street below. The paper falls near two tired Mendicants, who are lying asleep. Almost by the time that they are sufficiently awake to realise the importance of the message they have found, Ishak has arrived with police and soldiers. The rescue of the Caliph and his fellow-prisoners is thus effected; Rafi and his followers are captured; and Hassan is subsequently promoted to the highest office in the Court save that of Grand Vizier. Conversation takes place between the Caliph and Hassan in the garden of the palace, in which Hassan is bade follow his poetical leanings and leave alone the world of action. Hassan is then shown the little pavilion in the garden which the Caliph has bestowed upon him, and finds therein all his supposed desires—carpets, slaves, and—Yasmin. But in his glory of sudden and dazzling power the ex-confectioner has to witness the trial of Rafi, the meeting of the Beggar King with Pervaneh his beloved, and their condemnation by the Caliph to eternal separation or death. The lovers choose death. Hassan is so moved by their love, and confirmed in his humanity by Ishak, as to intercede with and threaten the Caliph on their behalf. As a consequence, he is deprived of power, is forced by the Caliph—an artist in the agony of men—to watch the racking execution of Rafi and Pervaneh, and is crazed by the sight. A little after Ishak finds him, and tells him of his own determination to abjure the Caliph and to start on the golden journey to Samarkand. Before the end of the play the ghosts of the dead Rafi and Pervaneh mingle and converse with other ghosts whose lives on earth were ended by Caliphs; and after that comes the unforgettable scene at the Gate of the Moon, Baghdad, whence the pilgrims start for Samarkand.

It is an intensely dramatic play, wonderfully impressive to read. In the stage production there may be found faults of disproportion, but we must wait before we can state what we now gently assume, that Hassan holds too little, and Rafi too large, a place in the play. We are certain that, as literature pure and simple, "Hassan" is Flecker's masterpiece. It contains his best prose and his best verse. There is distinguished wit in much of the speech of the lowlier characters; there are dignity and depth in the higher talk. And of the verse in the play one need only say that it includes the famous "War Song of the Saracens," "Yasmin," and, of course, "The Golden Journey." Nowhere else has Flecker so abundantly shown the magnificent diversity of his gifts, for here, in perfect unison, are humour and tragedy—the vulgar and the sublime. The outlines of "Hassan" are superbly cut, the characterisation is finished with vivid art, and the impetus of the whole is surely, if irregularly, kept. Its dramatic qualities are its most obvious and, for purposes of production, its most essential but perhaps its least distinctive possession. What holds us, binds us, enthrals us, is the vision of the East—the simple and crafty, the kind and cruel, the lovely and ugly East. The most remarkable feature of this play is the subtle yet certain chording of the various notes, the conjecting of many contrasted details. No one scene more than another clings to the memory: it is the whole play that thrills or charms us. We might have found Flecker depending upon verbal

Digitized by Google

enchantment or photographic accuracy to move us, but the artist has everywhere proved larger than the craftsman. Dispassionate "Hassan" may be, but never precious, for no mere external effort on the part of a poet, however great, could so shiver the emotions as does this play. His love of purple patches, which, had it been indulged, would have ruined the play, is happily absent. And, indeed, if "Hassan" is to live, it is as a whole that it must live. Not the delicious humour of the two Mendicants, Abdu and Ali, nor the crystal beauty of Ishak's songs, nor the terribly affecting end of Rafi and Pervaneh will of themselves save it. But the whole is far greater than the sum of its parts. And we believe that this unity can be preserved on the stage and easily made communicable. Such impressive details as the loveliness of the moonlight on Baghdad or the sad light and sound of the garden fountains we may not be able literally to realise with our eyes, but, since we have read the play, our minds can supplement what our sight cannot seize.

"Hassan" has now been arranged for the stage by Mr. Basil Dean, and will, it is hoped, shortly be produced in London with the Reandean Company, with incidental music by Delius. It may well be that this event will prove the experience of a lifetime. If there is anything that Flecker or his arranger may have left unsuggested, it will certainly be filled in by Delius, one of the greatest of living composers. What added poignancy and splendour Delius has given to "Hassan" we do not yet know, but no composer could so easily and beautifully as he support the diffused distance and rarity of Flecker's lines, and one cannot imagine that the weaving and shifting lacery of Delius's ideas will not fitly match the exquisite joinery of Flecker.

PRESS ON THE NEAR EAST.

Persia in Perspective.

Under the above title a writer in the October issue of the *Contemporary Review*, who calls himself "Traveller," gives an instructive sketch of Persia and of British relations with that country. He begins by referring to the kaleidoscopic changes in the political situation, which, though confusing, must signify something. Then he briefly reviews the Persian problem since the Armistice. The first period which succeeded the Armistice was marked by a "vigorous forward policy" on the part of Great Britain, but the success of this policy "depended on our keeping indefinitely in Persia, more especially in North Persia, forces of British troops adequate to withstand the entry of Bolshevist forces and influence into the country. . . . But it was precisely this garrisoning of Persia for an indefinite period which we could not afford." He then turns from our war policy in Persia to our peace policy during the two all-important years which followed the Armistice, and this he pronounces "an absolute and expensive failure." We should, he thinks, have insisted on "a voluntary and dignified removal of our troops from Persia directly after the Armistice." If this had been carried out, "the actual Persian situation would have been essentially the same; if there was a Bolshevist danger of the absorption of Persia then, so is there now, but the vast sums wasted during those two years would have been saved, and our prestige and popularity in Persia would have stood on a far higher plane than, unhappily, they do at present." He continues:—

> In our Persian policy of to-day the pendulum has swung far back, and our "vigorous forward policy" has been followed—as so often happens in our history—by an equally vigorous backward one. We have removed our troops, disbanded our *gendarmerie*, and generally "cut our losses" as far as possible. History repeats itself, and it seems probable that Persia—as in previous periods—having been unduly over-estimated as a factor in British foreign politics, will now be equally under-estimated. Persia cannot fail to be of reasonable importance to us, but unfortunately, saddled with the deplorable Persian expenditure of the last few years, we are without funds to give effect to this importance. A very small proportion of the huge sums thrown away on grandiose schemes directed at establishing our influence over the *whole* of Persia would have sufficed to have consolidated our position in the one *part* of the country where our interests are at once paramount and capable of being supported, *i.e.*, the South.
>
> From the above very brief review of our recent relations with Persia what useful conclusions can be drawn? There is one apparent anomaly which has perhaps already struck the reader. Here we have a country practically incapable of any serious self-defence, surrounded by much stronger neighbours who have at various times and for various reasons interfered fundamentally in her politics. Yet this country, Persia, remains an independent State. What is the reason? Doubtless the mutual jealousies of the neighbouring Powers in question—jealousies of which the Tehran Government has known how to make use—have had not a little to say to the continued independence of Persia, but for a fundamental reason we must look deeper. *The main reason appears to be that Persia is not worth taking.* A sickly sentimentality and a futile glossing over of realities are so popular nowadays in political discussions that this may appear a hard saying. But the first aim of any serious student of politics is to think straight and pursue his facts to their logical conclusion. In the present instance it is sufficient to ask the following question. Supposing Persia were a country like India, Egypt, or the island of Java, for instance, rich in resources, agricultural and mineral, well watered, teeming with population, offering vast markets for Western goods, instead of being as she is, would she have remained independent? We all know the answer: Certainly not. She would long ago, perhaps a century ago, have passed under British or Russian rule, in some form or other, or have been divided up between the two Powers. Persia's poverty—paradoxically enough—is, and will, of course, remain, her best protection. There is thus little fear of the Bolshevists "taking over" Persia, as one sees it stated, or hinted at, now and then. The Bolshevists can get all they want out of Persia, as did the old Czarist Government, not by "taking over" a perennially bankrupt country, but by using their influence in a thousand ways to force the administration of that country to serve their ends.

The third point that he considers is—India. Persia, he says, is of importance to us not in terms of herself, but of India. And his concluding point is "the necessity for a sense of proportion—proportion both with regard to Persia's importance to us and the means to be employed in giving effect to that importance." On this he says:—

> There is no doubt that at various epochs, principally during the war and the three years that followed, we exaggerated the first, and

Digitized by Google

employed the second in a way that was out of all proportion to the advantages which could be gained. We have bought our experience dearly enough, and it is to be hoped that we shall profit by it. One cannot fight against geography (which, however, is exactly what we have been trying to do in Persia), and geographical conditions have laid it down very clearly that our sphere of political activity lies in the South. The importance of the Persian Gulf to Great Britain was laid down twenty years ago by Captain Mahan in the following memorable words, which would seem to be as true to-day as when they were penned: "Concession in the Persian Gulf, whether by formal arrangement with other Powers or by neglect of the local commercial interests which now underlie political and military control, will imperil Great Britain's naval situation in the Farther East, her political position in India, her commercial interests in both, and the Imperial tie between herself and Australasia." Turning to commerce, we find that all British trade enters Persia from the South—a very large proportion of it through the Persian Gulf ports, and the remainder from Mesopotamia through the Bagdad-Kermanshah-Hamadan route, or from India direct via Baluchistan to Seistan. The important Anglo-Persian Oil Company also has its chief oil wells in the South, principally north of Ahwaz, on the Karun river. In brief, concentration on the South, and not a vague diffusion over the whole country, should be the guiding principle for our Persian policy.

From our late military experience in Persia we can draw the conclusion that, should we ever be faced with a serious menace to India in the shape of an invasion through that country, we shall have to abandon our ideas of a military, as we have already done those of a political, forward policy, and fight the enemy on the frontiers of India. The number of actual fighting troops we kept in Persia during the war was ridiculously small—probably not much more than a couple of brigades altogether—a force, of course, quite inadequate to oppose any serious hostile advance. Our troops, in fact, only acted as the merest of "bluffs," which, very fortunately for us, the Bolshevists did not "see." Yet such exiguous forces necessitated long and exposed lines of communication, were with some difficulty rationed, and cost the vast sums already indicated. What, then, would be the result of our attempting to keep large forces—divisions instead of brigades—in Persia? The pre-war idea on this subject was to fight the invader far from the frontiers of India. As far as invasion through Persia is concerned, this conception stands in need of revision. It would seem to be better to allow the enemy to waste his strength in crossing the mountains and deserts of Persia, and to fall upon him at the end of his advance. However, let us hope that any such invasion is of purely academic interest for a considerable time to come.

NEAR EAST BOOKSHELF.

FRANCE AND ANGORA.

"ANGORA ET BERLIN." By Omer Kiazim. (Paris: L'Edition Universelle.)

The Turkish author of "L'Aventure Kémaliste" follows up his denunciation of the Kemalist movement with a volume intended to disillusion the French in regard to the expectations formed of their pro-Turkish policy. M. Kiazim quotes a memorandum drawn up by three Turkish Ministers for the benefit of the Grand Vizier on the Angora movement, with special reference to the understanding with France. The gist of their report is that the Angora Government is merely making use of the French for its own ends, and has not bound itself to any *quid pro quo* that it cannot easily repudiate on the ground of changed circumstances. For the further discomfiture of the French, stress is laid on the campaign inaugurated by the Turkish Nationalists for undermining French influence in Syria and Tunis. The author mentions a series of demands made last March by the Bey of Tunis at the time of the visit of the French President, which were regarded with such disfavour in French official circles that they were not allowed to be published in France. Whether those demands, which, incidentally, were published in the last issue of THE NEAR EAST, were inspired by Angora may be open to question; but there can be little doubt that both in Syria and in Tunis France will sooner or later have to make more generous concessions to the movement for independence, unless, in the case of Syria, she is thinking of handing over the bulk of the country to the Turks.

For any diligent reader of the world's Press it is not difficult to find support for any preconceived theory, and our author has an easy task in proving to his own satisfaction that the Angora movement is a manifestation of a German-Bolshevist-Kemalist combine to defeat the Entente Powers. For the moment the unknown quantity is Nationalist Turkey. That the Kemalists should look to the enemies of the Allies for help when they regarded themselves as fighting with their backs to a wall is a natural proceeding. It remains to be seen, however, whether, when Angora is merged in a new Turkey, the latter will do violence to its instincts, traditions, and interests by making itself the tool of Bolshevism. Our author, it need hardly be said, has nothing good to say of Turkish nationalism. It is on this note that he ends his indictment:—

La paix de l'Orient ne sera pas obtenue par une capitulation, même animée des meilleures intentions, devant le bluff de malfaiteurs dont nous connaissons tous les crimes. Loin de se montrer intimidée par leur arrogance et de les encourager à continuer leur œuvre déstructive, l'Europe doit leur appliquer une politique de force et leur faire sentir sa volonté d'en finir.

Everyone interested in the Near East must read

The Balkan Peninsula and the Near East

By FERDINAND SCHEVILL

Just out. With numerous maps. Price 20s. net.

An important and comprehensive survey of the political evolution of the Balkans and the international problems of the Near East. The author's main purpose has been to communicate to the reader the leading present-day issues of the Balkans, not formulated theoretically, but shown, as it were, on the march, in practical historical operation. Nearly two-thirds of the book is devoted to the story of the rise and fall of the Ottoman Empire.

November 9 (New Style).
October 27 (Old Style).
Rabia 1, 29, 1341 A.H. of the Moslem Calendar.
Marheshvan 18, 5683 of the Jewish Calendar.

Lord Newton has arrived at 75, Eaton Square from the Near East.

Lord and Lady Lamington have returned to London from Lamington.

Lord Inchcape arrived in Bombay on November 3, and left immediately for Delhi by special train.

Captain Yovan Yovanovitch, Yugoslav Consul-General, has returned to town from Belgrade.

M. M. Yovanovitch, who was chief of the Yugoslav Financial Delegation in London after the War, has arrived in town from Belgrade.

The Shah of Persia, who is shortly returning to Persia, had an interview with President Millerand at the Elysée on November 3.

Major Sir Francis Burdett, Bart., sailed from Toulon on Friday last on the Orient liner Osterley for Ceylon and China.

Mr. Leonard Jennings, sculptor, of Cheyne Gardens, Chelsea, has been commissioned to execute a statue of the Prince of Wales, which is to be erected at Bombay.

The third annual dinner of the E.E.F. staff was due to be held yesterday (Wednesday) at the Hotel Cecil, with Lieut.-General Sir Philip Chetwode, Bart., presiding.

M. Constantin Fotitch, Secretary of the Legation of the Kingdom of Serbs, Croats, and Slovenes, and Mme. Fotitch arrived in London on Sunday from Vienna, where they were recently married.

The Secretary of State for India, Viscount Peel, gave a luncheon at his house on November 3 to the Emir Abdullah of Transjordania and his suite. The other guests included the Duke of Devonshire, Secretary for the Colonies, and Sir William Duke.

The engagement is announced between Major Brian G. Nixon, 41st Dogras, I.A., younger son of the late Surgeon-Major G. M. Nixon, I.M.S., and Mrs. Nixon, of Bedford, and Rosemary, only child of Mr. and Mrs. Max Adamson, 16, Washington House, Basil Street, S.W.3.

A marriage has been arranged, and will take place at the New Year, between Walter N. U. Dunlop, I.C.S., eldest son of the late D. J. Dunlop and Mrs. Dunlop, of Oudley House, Beckenham, and Marguerite Irene, daughter of Sir Walter and Lady Shakerley, of Somerford Park, Cheshire.

The engagement is announced of Fred. W. Hebblethwaite, M.B., Ch.B., son of Mr. H. F. Hebblethwaite, of Saltburn-by-Sea, Yorks, and Annette G. T. Anderson, M.B., Ch.B., D.P.H. (Cantab.), youngest daughter of the late Thomas Anderson, A.M.Inst.C.E., Royal Indian Marine, and Mrs. Anderson, 9, Belsize Park, N.W.

Under the auspices of the Central Asian Society, Lieut.-Colonel C. E. Vickery, C.M.G., D.S.O., R.F.A., is lecturing to-day (Thursday) at 5 p.m. on "Arabia and the Hejaz." The meeting, over which Lord Carnock is presiding, will take place at the Royal United Service Institution, Whitehall, and there will be lantern illustrations.

The Emir Abdullah was received at the Colonial Office on November 1 by the Duke of Devonshire, Secretary of State for the Colonies. His Highness was accompanied by El Rikaby, Chief Adviser, Transjordan Administration, Mr. St. John Philby, and Sir Gilbert Clayton, Chief Secretary to the Palestine Government.

A marriage has been arranged between John Christopher Druce, second son of Mr. G. C. Druce and Mrs. Druce, of Ravenscar, Wimbledon, and Kathleen, only daughter of Colonel H. G. Howorth, C.M.G., and Mrs. Howorth, of 10, Grove Park Road, Eltham, and granddaughter of Sir Henry Howorth, K.C.I.E., F.R.S.

At the University of London, King's College, Lady Grogan will, on November 16 and 23, deliver two public lectures on "The Rise of Modern Bulgaria." Both lectures are to begin at 5.30 p.m., and at the first the chair will be taken by His Excellency the Bulgarian Minister. These lectures are among those arranged by the School of Slavonic Studies.

Sir Dhunjibhoy and Lady Bomanji, Lady Susan Dawnay, Countess Roberts, and Sir Watson and Lady Smyth are among the passengers for Bombay by the P. and O. express which left London last week to join the Kaisar-i-Hind at Marseilles. The Maharaja of Kapurthala, Prince Karaingit Singh, and Lady Rawlinson embarked on the Kaisar-i-Hind at Marseilles.

Under the auspices of the Persia Society, Mr. G. P. Baker will lecture, on November 14, at 5.30 p.m., upon "Calico Painting and Printing in the East Indies and Persia during the 17th and 18th centuries." The lecture, which is to be given in the Alpine Club Gallery, Mill Street, Conduit Street, will be illustrated with lantern slides and examples.

In Convocation on October 31, on the motion of the Vice-Chancellor, the University of Oxford gratefully accepted the offer of Dr. Nanabhai Navrosji Katrak, of Bombay, to give to the University, in memory of his late wife, a sum to be devoted to the promotion of the study of the religion of Zoroaster, and decreed the establishment of a lectureship to be called the Ratanbai Katrak Lectureship.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
For particulars, apply to Sir E. DENISON ROSS, Director.

Professor Edward Nickoley, who has been acting as President of the American University at Beyrout since the death of its President, the late Dr. Howard Bliss, has announced that the Board of Trustees of the University at New York has appointed Mr. Bayard Dodge, M.A., Associate-Principal of the University's Preparatory Department, as President of the University. Mr. Dodge, however, will not assume his new duties at present, but intends to proceed to America first to study the present University activities there.

An exhibition of pictures and sketches of Iraq (Mesopotamia), by Miss Edith Cheesman, will be held at Walker's Galleries, 118, New Bond Street, from November 15 to 28. The collection comprises portraits of eminent Arabs, national types, and landscapes, covering the country from Hit to Basrah, including the cities of Kerbela, Nejef, Kufa, and Kazimain. There are also sketches of less known places in Iraq, which have hitherto been visited by only one or two other Englishwomen.

His Majesty has been graciously pleased to approve of the appointment of Honorary Major-General his Highness Maharajadhiraja Sir Bhupindar Singh, Mahindar Bahadur, G.C.S.I., G.C.I.E., G.C.V.O., G.B.E., Maharajah of Patiala, Honorary Colonel, 15th Ludhiana Sikhs, Indian Army, to be Honorary Aide-de-Camp to the King, with effect from September 5, 1922, in succession to the late Honorary Lieutenant-General his Highness Maharajadhiraja Sir Pratap Singh, Bahadur (of Jodhpur), G.C.B., G.C.S.I., G.C.V.O., Honorary Colonel, 34th Horse, Indian Army.

Under the auspices of the Department of Roumanian, King's College, University of London, a course of five public lectures will be delivered at 5.30 p.m. on Thursdays, November 9, 16, 23, 30, and December 7 respectively. They are to be as follows: November 9, "The Turks in Roumanian Literature," by M. Gaster; November 16, "The Story of Cupid and Psyche in Roumanian Folk-lore," by M. Beza; November 23, "Roumanian Legends and Superstitions on the Moon," by M. Beza; November 30, "Common Law and Usage in Roumania," by M. Titulescu, Roumanian Minister in London; and December 7, "Agrarian Reform in Roumania," by M. D. Mitrany.

APPOINTMENTS, Etc.

Mr. Linton Theodore Thorp has been appointed Judge of His Majesty's Supreme Court for the Dominions of the Sublime Ottoman Porte.

Sir Benjamin Robertson, K.C.S.I., K.C.I.E., who has been identified with the inquiry into Indian migration within the Empire, has been appointed member of the Council of India.

The King has been pleased to approve of the appointment of Sir Basil Phillott Blackett, K.C.B., Controller of Finance in His Majesty's Treasury, to be a Member of the Executive Council of the Governor-General of India, to fill one of the two vacancies which will occur during the next few months. The Governor-General proposes to place Sir Malcolm Hailey in charge of the Home Department on the retirement of Sir William Vincent in December next, and to assign the portfolio of Finance to Sir Basil Blackett on the latter's arrival in India. Other consequential appointments will be announced later.

PICTURES OF CENTRAL ASIA.

An unusually interesting set of water-colours by Miss E. G. Kemp, F.R.S.G.S., are now being shown at Walker's Galleries, New Bond Street. The exhibition, which contains subjects from China, Italy, England, and Central Asia, remains open until November 12. Miss Kemp is an artist of quiet methods; she revels neither in high colour nor in exaggerated content. But there is beauty in her line and much fitness in her composition. It is with admirable faithfulness that she sets down what she sees, and this is by no means to say that her work is done with mere photographic accuracy. Here we can refer only to the Eastern pictures, but there is enough in these to describe her general mode. Look, for instance, at "The Great Square of Samarkand," in which the scientific intent is manifest in eminent blend with artistic execution. Miss Kemp does not reproduce any of the false glamour of the Orient or suggest the perhaps spurious romance with which legend has invested her subject; what she does is, by her dust and coloured architecture and a curiously effective dim brightness, to bring before us a more real and no less attractive Samarkand. The East for Miss Kemp is not, as it often is with inferior intelligences, the land of perennial major tones and blazing lights; and, indeed, it is in the representation of its minor tones and lesser hues that her most pleasing work, as it seems to us, is done. An excellent example of this facility in darkened shades is the "Mausoleum of Tamerlane"; while other sides of her gifts can be seen in "Tewak Dawan Pass, Turkestan," and "On the Edge of the Kardong Glacier." We may suggest, particularly, that those who found interest in the Mount Everest Expedition pictures will also be intrigued by a visit to Miss Kemp's exhibition.

Where to stay in the East

CAIRO

THE
CONTINENTAL - SAVOY
THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO.

Entirely Renewed. Overlooking Ezbekieh Gardens. Opera Square. Famous Terraces. 400 Rooms. 200 Bathrooms. Cairo's Fashionable Grill-Room Restaurant. Daily Concerts. Weekly Dances. Open all the year round

NATIONALIST TURKEY.

Nationalism is pressing heavily upon Angora. Some of its more recent manifestations are calculated to be as much a source of trouble and weakness to the new Turkey as others appear ominous to the outside world. To Great Britain, however, the prospect of civil unrest among the Turks is as of much concern as their foreign policy, and the moment is clearly opportune for the new Government to subject the question of Anglo-Turkish relations to a searching and dispassionate analysis. No one in Great Britain, with the possible exception of the late Prime Minister, is now interested in Turkey's past. The whole country wants peace abroad, as well as at home, and it is essential to the world's peace that there should be a better Turkey than existed before. As far as can be foreseen to-day, the future of Turkey will be in the hands of the Nationalists, who are represented for the time being by the Grand National Assembly at Angora. Whether everything that Angora says to-day will be law throughout Turkey to-morrow and the day after only the future can tell; but as Angora will clearly be in charge of the country immediately after the Peace Conference, it is with the Angora spirit that Great Britain will have to deal. There cannot be the least doubt in the mind of any unbiassed observer that the Nationalists are inspired by an intense patriotism. Whatever they do—the earliest indications are that they will commit many foolish acts—they can be given credit for being actuated at first by a desire to promote, according to their lights, Turkish interests. Past history suggests that this phase may, unhappily, be followed by a less creditable stage. It is, therefore, desirable that Great Britain's mistake in 1908 of holding aloof from the Young Turkish revolution should not be repeated. Turkey, left to herself, must inevitably make many more or less serious blunders. There is only one country that can lend her a helping hand, and that is Great Britain. For the moment the Turks may not be very eager to accept either help or advice. Such an attitude, however, need not worry the British public. It is hardly to be wondered at if the Turks have their heads turned by the events of the last three years. The fact that the need for a better Turkey is imperative, and that it can only be achieved by British advice and help, should be sufficient to prompt the patience and sympathy of the British Government, whose immediate concern should be to make sure that Nationalist Turkey knows where it can find practical assistance as soon as it feels the need of it.

In the defeat of the Greeks the Turkish Nationalists would seem to have accomplished the easiest part of their task, and in the Mudania Conference to have exhausted their immediate supply of statesmanship. None of their subsequent acts, and, indeed, none of the resolutions of the Angora Assembly, has been calculated to impress favourably the outside world. It is not unnatural, perhaps, that ardent Nationalism should seize upon the admitted abuses of the old Yildiz Kiosk régime as one of the first objectives of its reforming zeal. New Turkey would be a misnomer if any part of the Abdul Hamid system of autocratic rule survived. Common prudence, however, it would be thought, would have prompted the Nationalists to hold their hand in regard to the details of their reforms until they were established in Constantinople. Their authority will then be greater, not less, than it is at present, and they will have the advantage of being able, before carrying them into effect, to adjust in the light of practical politics any theories that may not seem so sound in Europe as they do in the remoteness of the Anatolian capital. In elaborating a programme from Angora they run the risk of stultifying their whole movement by jeopardising the unity on which its success depends. The future of the Khalifate is a question on which non-Moslems will refrain from dogmatising. For the British public the main interest lies in the fact that Moslem opinion in India must either rise up and denounce Nationalist Turkey for its action in regard to the Khalifate, or admit the hollowness of the recent agitation in connection with this very question. Even if Nationalist Turkey considers that it has nothing to fear from a cleavage of opinion in the country on this question, it can be under no illusions as to its capacity to carry on the administration of the country without financial support from abroad. So little, however, is Angora in touch with realities that it would seem to regard a repudiation of all the indebtedness that Turkey has incurred since March, 1920, as a recommendation to foreign Powers to help the new Government with the loans which it will quickly find to be indispensable.

In these contradictions of an inexperienced and headstrong Nationalism, the British Government can appreciate all the more the necessity for dealing with it patiently and sympathetically. At bottom, unless all the indications are at fault, there is the striving after better things, although the methods may be altogether at fault. Even if the sincerity of the Nationalists be doubted, the need felt by the world outside for a better Turkey is there; and, in view of the fact that there are reasons against any other country than Great Britain being able to fill adequately the rôle of friend, helper, and guide, the policy of the British Government would seem to be quite clear. The chief difficulty lies in preventing harm from being done to established British interests in Turkey. If these were not at stake, it would be easy to watch the Turkish Nationalists take the bit between their teeth and to wait until they had exhausted themselves. There will be need, however, to cry halt on many points during the Peace Conference. This can be done, we believe, for Turkey's good, and without prejudice to Anglo-Turkish relations, if care is taken beforehand to convince the Turks of the single-mindedness of British policy and of the genuine sympathy with which their efforts, as a whole, to construct a new Turkey will be followed. There can be no sympathy with any individual measures that Western experience knows to be unpractical or harmful, and, in return for material support, Great Britain will expect her advice to be considered by men of intelligence, and not by inexperienced bigots.

IRAQ AND THE GENERAL ELECTION.

Catchwords have a special vogue at elections. On the present occasion the advocates of the evacuation of Mesopotamia, whose knowledge of their subject would seem to be restricted to certain outstanding data connected with the War, are particularly vocal, if that term may be used to cover the sending of postcards to candidates as well as a stereotyped question at meetings. It is to be hoped, however, that the conscientious candidate, who may often find it difficult to keep himself fully informed on all the subjects that may serve as heckling topics in a many-headed constituency, will not allow himself to be bluffed into any rash promise. The Prime Minister has declared that his policy will be one of curtailment of expenditure abroad where, after investigation, this is found compatible with the commitments already entered into by Great Britain. Such an answer is good enough for any candidate, and the most ardent supporter of the retention of the British political connection with Iraq will admit its wisdom. Little is to be feared from a careful, dispassionate investigation; but, judging by the way some Press organs approach the questions of the day, the country would have cause to rue a policy dictated solely by the slapdash slogans of a paper, however "popular."

Those who urge the evacuation of Mesopotamia wax eloquent on the amount of money that has been squandered on the country. The waste was a by-product, inevitable or otherwise, of the War. In itself it is not an argument on which present or future policy should be based. The "evacuationists," therefore, may well be required to reflect on the results of the course of action that they are advocating. There can be little doubt that the withdrawal of Great Britain from Iraq, even if Basrah were retained, would mean sooner or later the return to the country of the Turks, and not only to Iraq, but also to the rest of the Arab territories, from which they were ejected as a result of the War. Now, there is everything to be said for the redrafting of the Treaty of Sèvres in the light of previous pledges that the Turks should retain Anatolia and Eastern Thrace; but even those who are indifferent to the question of Britain's prestige in the East would, it is to be hoped, hesitate to play the whole Arab world false at this stage. It is the fashion to state that the Arabs of Iraq, as of Palestine, do not want the British. The allegation is not true. There has been a controversy over the designation rather than the substance of the political relationship between Great Britain and Iraq; and there is a group of Iraqis who denounce Great Britain because she seems to stand between them and the gratification of their personal ambitions. The articulate section, however, are more than counter-balanced in numbers by those who appreciate the sense of security and the improvement in administrative methods associated with the presence in the country of the British. Deference to an extremist gang could never be urged in justification of a breach of faith to the great majority of the people, to whom a desire to work out their own political salvation does not seem incompatible with an anxiety that British support should not be removed from the country.

Our "evacuationists," however, will urge that a hold on Iraq on these terms is a luxury that the British taxpayer cannot afford. The statement is not necessarily true because it is often repeated. Against the relatively small charge on the British Exchequer that Iraq promises to become in the near future may be set the national need for fresh markets overseas. With the abandonment of the British connection it is certain that no progress can be expected in the development of Iraq's natural resources. There is no need to over-rate those resources to enable it to be realised that British trade may one day be glad of the close association between the two countries. Iraq's potentialities, apart from the unknown factor of oil, lie mainly in the direction of agriculture, which must be developed by local enterprise, but requires foreign capital, foreign machinery, and foreign scientists. Under a proper system of irrigation the country is estimated to be capable of producing annually a million bales (of 500 lb.) of cotton of long staple, equal to best Egyptian. "Other staples," writes Sir Arnold Wilson in the *Asiatic Review*, "such as dates, wheat, barley, skins, wool, etc., can be produced in far larger quantities, and of better quality than at present, if science be brought to the aid of the tiller of the soil, as it is beginning to be under the present régime by an Agricultural Department staffed by wise and patient enthusiasts." As the development of the country proceeds, so will the standard of living improve and the population increase. Again, can it be doubted that the day of Persia's rehabilitation will be advanced considerably if British influence is not altogether removed from the country with which the Persians are in close economic touch?

It is true that all this is music of the future; but it cannot be regarded as altogether wide of the mark, if there is a reasonable prospect of a steady reduction in British expenditure in Iraq. Already under the late Government there was the expectation of the annual cost falling to four millions sterling. A genuine settlement of the Near Eastern question and the smooth working of the Iraq Treaty must inevitably lead to further reductions. The development of Iraq will be carried out by private enterprise, and will not be a drain on the British Exchequer, for the necessary funds will be forthcoming as soon as there is the certainty of a settled policy.

In spite of adverse conditions, progress is being reported in several directions. Last year the Iraq railways showed a substantial loss; this year promises to close with a very small deficit, if any. Considerable economies have been made; improved facilities and reductions in the cost of transport have led to a development of traffic. For the first time in the history of the railway system the export of grain, fostered by low rates, is providing return loads to the port at Basrah. The principal area providing grain traffic for the railways is the

BY APPOINTMENT.

Digitized by Google

Euphrates valley from Hillah to Diwaniyah, but this year grain from as far north as Mosul is being transported on camels to Shargat, and thence by rail to Basrah. The Iraq Railway system, it must be remembered, was built to serve military ends rather than for the development of the country, or according to local traffic needs. It is true that the railway runs through or alongside the more intensively cultivated and densely populated tracts; but the absence of feeder lines is a grave handicap to the marketing of agricultural produce, and the original track ignored the main movements of population. Only this year has a short branch to Musseiyib, on the road to the pilgrimage city of Kerbela, been opened; funds would not allow the extension to the latter city, twenty-one miles from railhead. An economy to be effected with the advent of the rainy season is the closing of the section, Khanikin Road to Tiaruq, which is being replaced by a short, cheaply worked branch into Khanikin City. The latter is the natural jumping-off place for traffic into Persia: but the railway line, as originally built, had passed a few miles to the west, and had been continued for a score or so of miles over difficult country, involving high working costs, towards the Persian frontier. Handicapped by shortage of rolling-stock, and by the bad condition of much of what it does possess, the railway system is confronted with a heavy task to make ends meet. The fact that it has contrived to come near to equilibrium this year, even if it does not actually reach it, is a testimony to the management, and suggests that Iraq may ultimately achieve prosperity by gradual development, which, *pari passu*, will relieve the British taxpayer of even the few millions that it is still costing him.

THE KNIGHTS OF SAINT JOHN.

On October 31, Dr. Gilbert Bagnani lectured for the Central Asian Society at the Royal United Service Institution, his subject being "The Knights of Saint John in Rhodes and Asia Minor." Lord Carnock (president) was in the chair, and the Italian Ambassador was among those in the audience.

Dr. Bagnani said that early in the Eleventh Century some merchants of Amalfi were allowed by the Khalif of Egypt to found within the walls of Jerusalem a hospice for pilgrims, tended by a body which called itself the "Poor Brethren of the Hospital of Saint John." This was the origin of the Order, which was then, as once more to-day, a purely humanitarian fraternity. The Crusades caused it to assume a strong military organisation similar to that of the Knights Templar. It was an international Order, divided into "tongues"—Provence, Auvergne, France, Italy, Spain, and Germany—Spain being afterwards divided into Aragon and Castile. The knights of each tongue were commanded by a Bailly, who also was responsible for some special branch of the administration. The English Bailly's special function was to have charge of the Turcopolae, a body of light cavalry recruited locally. When Jerusalem fell before Saladin in 1187 the Order withdrew to Acre, and from Acre later it went to Cyprus. Rhodes was acquired very early in the Fourteenth Century, and, soon after the knights had gone there, the necessity for having a base on the mainland of Anatolia led to the erection on the abandoned Acropolis of the ancient city of Halicarnassos of the formidable Castle of Saint Peter—now Budrun.

The lecturer gave a long description of this castle, which seventy years ago was in an almost perfect state of preservation, but which had suffered severely during the War. While the Italians were for a very short time in occupation of Budrun, he said, they repaired the towers of France and Italy, but had not time to do the same for the tower of England, which remains in consequence in imminent danger of collapse. One of its many interesting features is a continuous frieze of English coats-of-arms—twenty-eight in all—running across the façade.

Of Rhodes itself, the lecturer said that it surpassed all the mediæval cities he had ever seen, alike in the grandeur of its monuments and the excellent state of preservation in which those monuments were. In this connection the Italian Government, and private individuals also, had done a great deal of work restoring the ancient hospital and the auberges of the various tongues. Each auberge was formerly the headquarters of a tongue, and the residence of its Bailly. That of England had been thoroughly restored through the interest of Colonel Yate and the munificence of Colonel Vivien Gabriel.

BRITISH REFUGEES FROM SMYRNA RELIEF FUND.

Under date of November 2, the Secretary of the above fund writes:—

This committee has received several cables from the Malta "British Refugees from Smyrna Committee," stating that their protégés housed in the Lazaretto, Malta, are in a lamentable condition. The food supplied is unfit for human consumption. To this date they have not received any part of the £1,000 sent to Malta for them by the "All-British Appeal" Directorate, who are now trying hard to find out why this money has not been paid out, at the rate of 5s. per head per day, as promised to the British refugees. It is feared that, as in the case of another refugee centre, the money has been handed over to a local native contractor, who is supplying uneatable food and making an unholy profit out of the helpless British refugees. Mr. H. O. Whittall has advised the London Committee that unless immediate steps are taken there will be deaths among the British refugees in Malta.

Besides the sums sent to Malta and Cyprus, the "All-British Appeal" Directorate has also sent £100 to Mytilene for the British refugees there, and a like sum for the British refugees in Greece, Syria, and the smaller Ægean Islands.

Funds are urgently needed and subscriptions and donations should be sent to the Imperial War Relief Fund, General Buildings, Aldwych, London, W.C.2, for the British Refugees from Smyrna.

The Armenian Soviet Minister at Teheran has left, and his return is uncertain. The office is attached to the Russian Legation temporarily.

It is stated from Cairo that the work of the Special Commission investigating political crimes has sufficiently progressed to enable it to bring two Egyptians accused of attempting to kill Badr-ed-Din Bey, Director-General of Public Security, before a Military Court.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

Sudan Plantations' Progress.

Those who desire to realise something of the potentialities of the Sudan cannot do better than follow the progress of the Sudan Plantations Syndicate as it is unfolded each year at the annual meeting. The history of the company has so far been one of uninterrupted development, and, as it is still only in its early days, it is clear that it promises to write a chapter in the history of Empire development that may challenge comparison with what some of the greatest concerns in our history have accomplished. But that is still for the future, and it is sufficient to know that the company's advance continues its even tenour. How the company's ambitious plans for the extension of cotton cultivation in the Sudan are gradually being carried out was the subject of an interesting review by the chairman, Mr. Eckstein, at the general meeting, a report of which will be found in another column. The company has now 10,000 acres under cotton in the Gezira, and next year it is hoped that this number will be doubled, while, with the completion of the Makwar Dam, which is to be carried out by Messrs. Pearson and Sons, the cultivation of 100,000 acres will be rendered possible.

Cotton Growing in Kassala District.

The chairman also referred in the course of his speech to recent negotiations with the Sudan Government, through its representatives in London, in regard to the development of cotton-growing in Kassala district, and stated that the company had been invited to co-operate with the Government for that purpose. Last year, with Mr. MacIntyre, the managing director in the Sudan, and Mr. Harrison, the head of the Agricultural Department of the Sudan, Mr. Eckstein visited various promising cotton-growing districts in the Sudan. He stated that they were much impressed by the fertility of the soil in Kassala district, but they formed the opinion that its exploitation must depend on the construction of a railway from Kassala to the Port Sudan-Atbara line, reference to which has already been made in these columns. There is a prospect of the early commencement of the construction of the line, and a concession for growing cotton is to be granted by the Sudan Government to a new company, which will be known as the Kassala Cotton Company, and in which there will be, Mr. Eckstein stated, a kind of three-cornered partnership between the Sudan Government, the cultivators, and the Kassala Cotton Company, in which concern the Sudan Plantations Syndicate will take a substantial interest.

America and Roumanian Oil.

Since the Armistice, America's activity in the pursuit of oil-bearing territories has been very pronounced. Roumania has now come in for attention, for, according to a statement in the *Chicago Tribune*, a powerful group of American financiers is negotiating with the Roumanian Government in an attempt to obtain control of valuable petroliferous properties in that country. It is added that British financiers are reported to be bidding against the American group, and it is to be hoped that this is correct, for there is no reason why America should have a monopoly of enterprise in regard to new oil-fields, and there is still ample scope in Roumania for British capital.

The Indian Loan Failure.

The result of the Indian loan was not unexpected in the City. With the markets in their present condition, new issues require to have something very special to recommend them if their success is to be ensured. The Indian loan was for a very large amount, and the yield was not particularly attractive; and with Government issues still under a cloud it was to be expected that the underwriters would be left with a large part of the issue.

Bengal-Nagpur Railway.

The Bengal-Nagpur Railway was affected during the past year by the heavy increase in expenditure and other adverse conditions. In his speech at the general meeting Mr. Robert Miller, the chairman, pointed out that the position in 1921-22 was strained and abnormal, and gave no indication of the true form of the undertaking as a dividend-paying concern. The heavy rate of expenditure was not likely to be recurring, and the working expenses of the current year were expected to show a decrease in the percentage of gross earnings absorbed in working from 71.53 to 60.14. As regards the current year, he was able to give a very encouraging forecast. The gross earnings are expected to be something like Rs. 100 lakhs ahead of the figures for the past year, while the working expenses are expected to be about Rs. 20 lakhs lower. The periodical returns from India indicate that these expectations are likely to be fully realised. Mr. Miller added that after a careful review of the present position he adhered to the opinion which he had always held—that the undertaking would steadily maintain its position and increase its prosperity. It passed through a country rich with undeveloped resources, and every year added to the progress of their development.

COMMENTATOR.

BANK OF ROUMANIA LIMITED
(FOUNDED 1866).

(Reports from Our Own Correspondents).

ROUMANIA.

Bucharest, October 27.

Roumanian Debts in America.

In answer to the invitation received from the U.S. Government—in accordance with the decision of the American Parliament to settle separately with each State in regard to war debts contracted in America—the Roumanian Government has appointed a Commission, which will leave very shortly for Washington. The Roumanian delegation is to deal solely with the settlement of debts incurred since 1916 for supplies of food and clothing, the amount in question being about twenty-two million dollars, or, at the present rate of exchange, about three milliard lei. The delegation is also to check and consolidate the Roumanian Treasury bills existing in America, and especially those which were issued for goods purchased by the Paris Supplies Commission.

Suspension of Export of Oil Products.

In view of the fact that the local oil refineries have lately reduced the output of oil products, the Ministry of Industry and Commerce is about to suspend the exportation of petrol, refined oil, etc., until home requirements are fully covered. The oil companies claim that they cannot afford tc supply the quantities required for the home market at the maximum prices fixed by the Government, and, in order to force the Government to increase the prices, they have resorted to the system of reducing production. The Government, however, claims that the oil companies are only bent on exporting in order to procure the high prices obtainable abroad, and have no consideration whatever for home requirements, which is proved by the high dividends (some even 100 per cent. per annum) paid by the companies.

In other words, there is a tacit war going on between the Government and the oil companies, and it is only to be hoped that an understanding will soon be reached for the benefit of all concerned, and especially for the people of this country, who are suffering owing to the scarcity of fuel prevailing at the present time.

Sir Basil Zaharoff.

The well-known financier Sir Basil Zaharoff arrived the other day in Bucharest. The local Press connects the visit with various financial schemes that the Government have in view; but so far nothing certain is known. Nevertheless, there is no doubt that his visit is partly in connection with the Treasury Bonds Consolidation deal; for M. V. Bratianu, the Minister of Finance, admitted some time ago that it was Sir Basil Zaharoff who gave him the greatest support in carrying out the consolidation in London and Paris. It is thought that the object of his visit is also in connection with a loan of five to six million pounds which the Roumanian Government need for the reconstruction of the railways; and, further, that, as Sir Basil Zaharoff is one of the principal shareholders of Vickers, which company some time ago acquired a share in the big Roumanian steel works, "Reshitza," the London financier will take this opportunity to reorganise the "Reshitza" company in conjunction with the Roumanian Government.

EGYPT.

Cairo, October 27.

Financing the Fellahin.

The fellahin are rapidly availing themselves, according to the bank reports, of the facilities afforded to them for borrowing money from the Agricultural Bank of Egypt, and thus avoiding having to rush and sell their cotton crop in order to have some ready money for their daily needs. On the other hand, the dealers and ginners are finding little difficulty in obtaining their requirements, as the small cotton growers are still pressing them to buy. It is unfortunate for the fellahin that the Government delayed so long in making the arrangement, for it is to be feared that during the interval that has intervened, and certainly until the news of this facility has filtered through to the outlying districts, a large number of growers will have disposed of their crop at relatively unremunerative prices.

LUBRICATION PROBLEMS.

To the Editor of The Near East.

Sir,—I have noted with interest an article appearing under "Lubrication Problems" in your issue of August 24, and whilst I am in agreement with a good deal of what your correspondent says, I cannot admit that probably three oils would suit the manifold conditions prevailing to-day. On the confrary, it is necessary that every type of engine should be specially studied, and this is where a wise user of lubricants makes a point of consulting well-established firms of lubricant manufacturers, who make it their business through their technical experts to study these conditions and to furnish the right lubricant for the job.—Yours faithfully,

M. Bell Thompson,
General Manager,

Sterns, Ltd.,
Royal London House,
Finsbury Square, E.C.2,
November 3.

According to the *Gazette de Prague*, the tax on the exportation of onions and fresh cabbages from Czecho-Slovakia has been fixed at 1 per cent. of the invoice price.

The production of the Anglo-Egyptian Oilfields for the week ended October 27 amounted to: Gemsah, 42 tons; Hurghada, 2,488 tons.

At the Prague Autumn Fair, which was held from September 3 to 10, 2,186 firms exhibited, and out of this total only seven were British.

The surcharge levied when Bulgarian Customs duties are paid in paper currency has been increased from 1,400 to 1,500 per cent.—i.e., 16 paper leva must now be paid for each gold leu prescribed in the Customs Tariff.

THE MOTOR SHOW.

Some Impressions.

(From Our Own Correspondent.)

I suppose to be in the fashion it is quite essential to refer to the Motor Show as the greatest on record, whether it is so or not. But I propose to abstain from any such eulogies, for, apart from the fact that it is rather suggestive of the absence of the critical quality, there is something singularly uninformative about such a statement. One could imagine a show easily first in point of numbers and containing more indifferent exhibits than were ever seen in one building at the same time. And, after all, these unreal comparisons are apt to be very unsatisfactory.

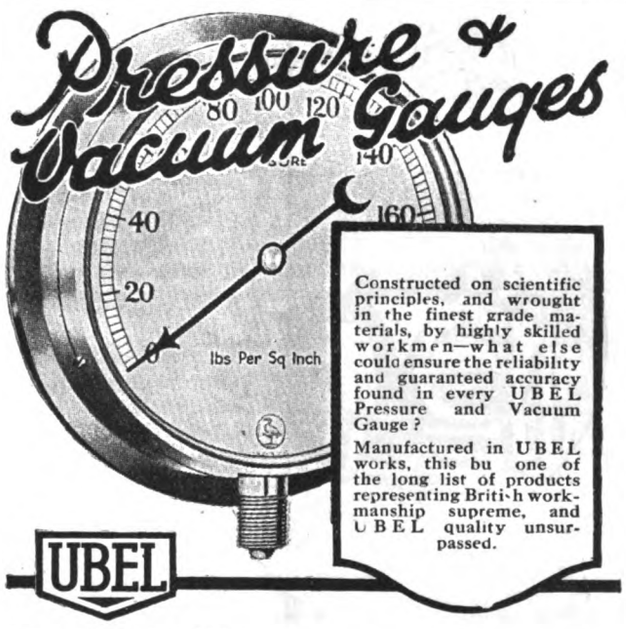
But, while making this reservation, I have no hesitation whatever in saying that this year's Motor Show is from every point of view excellent. Anyone who entertains feelings of pessimism as to the future of British industry ought not to neglect to pay it a visit. The experience would have a tonic effect. Since the Armistice permitted motor firms to resume their normal activities there has been a constant striving after progress, and each year has seen a new and very definite advance. Looking at the miles of cars at Olympia and the White City, with their graceful outlines, delicate colours, and new ideas, one might well think that there was not very much more to be done. Needless to say, there is, but there is no doubt at all that the motor industry is very closely approaching perfection. Certainly our firms can challenge comparison in this line of endeavour with the productions of any country.

A feature of the show is the development of the White City section. The idea obtains among many people that if one has seen Olympia that is sufficient. That view can be put aside. The exhibits at the White City do not as a whole compare with those at Olympia—that is not to be expected, because firms naturally choose Olympia if they have the preference—but those who only go to the latter place will miss seeing some magnificent cars that are equal to anything that Olympia can show.

It is noteworthy that prices are distinctly lower than last year, but while the previous decline had little or no effect on sales, because it was certain that bedrock had not been reached, the general feeling now is that prices are not likely to go much lower. In other words, the purchaser of a car now will not be in the position of one who makes an indifferent investment, but can rely upon buying a commodity whose market value will keep fairly stable. That fact, it may be anticipated, will have a considerable effect on the market, and it will be surprising in the circumstances if orders for cars in this country do not increase rapidly in the coming months.

But, when all is said and done, it is perfectly obvious that local consumption will not suffice to keep all our motor-car firms going. America may have one motor to every eleven inhabitants, and it is even possible that this remarkable proportion may be increased, for the United States is a land of strange happenings. But anything of that kind is inconceivable here, for the conditions are entirely different. America has no network of railways, such as we have, and the extensive use of the motor-car is the natural result. Here there are adequate communications in every district and thus the incentive is lacking for any great extension of motor traffic. That apart, it needs no demonstration that our roads would be impossibly congested if the proportion of motors in the country was anything like one to every eleven of the population. At the present time, when the proportion is comparatively negligible, the position is bad enough, as everyone knows who has business in the City. Thoroughfares like Bishopsgate are almost continuously thronged with vehicles, and the feat of crossing the road is not lightly to be undertaken at any period of the day. Elsewhere in London it is little better, while some of the country roads at holiday periods are beyond description. What it would be like if we reached the American standard will not bear thinking about. We should need subways from one end of the country to the other. But, as I have said, that is an impossibility, and it is not in this country that our firms will have to look in the main for their market.

It is, in short, to the markets abroad that our firms must chiefly look for the absorption of their products, and that demands two things on their part: enterprise in bringing their cars to the attention of the foreign consumer, and, above all things, the concentration on a light car eminently serviceable, but withal cheap, that will meet requirements abroad. It cannot be said that hitherto our firms—with a few notable exceptions—have shown any undue enterprise overseas. They have looked to the home market, and in doing so have suffered more from the depression than would otherwise have been the case. The fact that the great markets of the Near and Middle East are capable of taking—and are taking—a very considerable number of cars every year now seems not to be realised by them. At any rate they have made little or no effort to divert the chief part of the trade to this country. India during



STANDARD GAUGES, ready for quick delivery, include:

the past few years has aptly illustrated the kind of thing that has been going on. The general stagnation of trade has not brought India's imports of cars to a standstill. India has continued to buy cars, but mainly from America, who is finding our great Dependency an increasingly satisfactory market in this direction. Yet in that market this country should be supreme, if anywhere. With regard to the second point—the production of a suitable car—it is perfectly obvious that in regions like the Near and Middle East the ordinary run of car simply will not do. For one thing, people cannot afford to pay the price; for another, the calls made on a car in those regions are more severe than in Europe. The car required, as I have said, must be light and serviceable. It must be at a price which will enable competition with American productions, and, above all, it must be calculated to stand hard wear without coming to a premature old age. British firms have performed such wonders in the development of the motoring industry that I cannot believe it to be beyond their powers to produce such a car.

OUTSTANDING EXHIBITS.

In an exhibition of this character a selection of the principal exhibits is an invidious task. There is so little to choose in many cases between the productions of the various firms. But it is impossible to deal with all, or nearly all, and do justice to any in the space at one's disposal, and one is perforce confined to reviewing the productions of relatively a few firms.

There is one stand that everyone instinctively looks for at the Motor Show. I need scarcely say that it is that of Messrs. Rolls-Royce, Limited, and I propose to deal with this famous firm's exhibits first. Three cars are shown, all 40-50 h.p., and all, need it be said, fully up to the high standard that the firm has so consistently maintained. Indeed, the cars are second to none in the exhibition, and for grace of outline, beauty of finish, and general features, would be very hard to beat. The cars are respectively a limousine, a landaulet, and an open touring car. The limousine, which is similar to the car supplied to the Prince of Wales, has an enclosed drive limousine body by Messrs. Barker and Co., Limited, and is made to seat six or seven persons, including the driver. It is painted claret and black, the success of which combination is very striking. The landaulet, the body of which is by Messrs. Hooper and Co., is made to seat six persons. It is in dark blue, and, like the limousine, is a very fine production. The tourer, which is similar to the car supplied to Prince Carol of Roumania, has an open four-seater body, made, like that of the limousine, by Messrs. Barker and Co. It strikes one as being in every way a most useful car. The 20 h.p. Rolls-Royce, of which so much has been heard, was not on view, to the general disappointment.

Austin Cars.

One of the most interesting stands at the Show is that of Messrs. The Austin Motor Co., Limited, who show a variety of their well-known cars. This firm has long established a solid reputation for the production of reliable cars for all purposes. In this year's exhibits there are only slight changes in design, as the system followed has proved so satisfactory that the firm has wisely been content to let well alone for the most part. The exhibits include two "twenties," a limousine, and a coupé, two "twelves," a touring car "de luxe" and a coupé, two "sevens," a 4-cylinder Austin polished chassis, and a 4-cylinder Austin car. The last seats two passengers and two children. It has water circulation, forced feed lubrication, and magneto ignition, while it works by a single plate-clutch, three-speed gear-box, and helical bevel final drive. It seems a very comfortable car, and should, I think, prove very popular, as at £225 it is certainly a bargain.

(To be continued.)

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Clothing, etc.—The Lunacy Division, Abbâsiya, invites tenders for the supply of clothing, bedding, furniture, hardware, slippers, brushes, and other household necessaries required for Abbâsiya and Khanka Asylums for one year from April 1, 1923. November 21.

Rations.—The headquarters of the Ministry of Education, Sharia El Turka el Gharbi, El Insha, Cairo, invites tenders for the supply of rations required for certain Government schools, for a period beginning from January 1, 1923, and ending December 31, 1923. November 21.

Paving Stones.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 130,000 paving stones and 8,000 head stones (boutisses) required for the maintenance of the Port of Alexandria. December 15.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer Egypt and the Sudan Governments' Office, London. January 2.

Wood Naphtha and Tierol.—The Egyptian Customs Administration invite tenders for the supply of 130,000 kilogs. of wood naphtha (wood spirit) and 5,000 kilogs. of tierol, for denaturing ethyl alcohol. January 6 (D.O.T.).

India.

Firebox Plates.—The directors of the Bengal-Nagpur Railway Company invite tenders for the supply of copper firebox plates. November 14.

Springs and Plates.—The directors of the East Indian Railway invite tenders for the supply of laminated springs and back plates. November 15.

Stoneware Pipes, Cast Iron Pipes, etc.—The High Commissioner for India invites tenders for the supply of:—(1) Glazed stoneware drainage pipes, syphons, etc. (various); (2) cast iron pipes, socket and spigot, turned and bored 15 in. (No. 667); (3) railway wheel turning lathes, 48 in., motor driven (No. 2); (4) D.c. low tension three-core and two-core cables (81,373 yds.). Form of tender may be obtained from the Director-General, India Store Department, No. 10, Belvedere Road, Lambeth, S.E.1. November 17.

Bunting, etc.—The directors of the Bombay, Baroda, and Central India Railway Company invite tenders for the supply of canvas, bunting, etc.; indiarubber hose, sheeting, etc.; red lead, dog spikes. November 22.

Gas Lights, etc.—The High Commissioner for India invites tenders for the supply of flexible steel wire rope, galvanised and ungalvanised; copper tubing, mantles for Kitson's lights, mantles for Pintsch's oil gas lights, etc.; buffers, wrought iron, and washers for buffer springs; axle-boxes, malleable cast iron or cast steel, for carriages and wagons. November 23.

Iraq.

Limber Wagons.—The Ministry of Defence, Government of Iraq, Baghdad, invites tenders for the supply and delivery of:—(a) (Section No. 21a).—24 fore and 24 hind general service limber wagons, complete with accessories and fitted with the No. 45 wheel. (b) (Section No. 5a)—24 double lead sets of harness and 24 double wheel sets of harness, each complete with whip and legging. November 30 (D.O.T.).

Stirrup Irons.—The Ministry of Defence, Baghdad, invites tenders (covering delivery c.i.f. Basrah) for the supply of—980 extra large stirrup irons (5-in. tread), and 420 large stirrup irons (4¾-in. tread), of British Army regulation pattern, standard, and quality. November 30.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

The Commercial Company of Egypt, in their report for the week ended October 27, state :—

Since our last report the futures market has again been very active, but prices on balance show practically no change for both Sakellaridis and Ashmouni. The market has again been subjected to the influence of the factors mentioned in our last week's report, on the one hand, a good demand from abroad and the extraordinary firmness of Americans—in New York quotations have this week been pushed for the near positions to about 24 cents—and, on the other hand, extremely heavy sales from up-country resulting in heavy hedges in "futures." The quantity of the latter has been these last three days abnormally heavy, and the market would have been badly broken had it not been for the purchases by export houses and speculators due to the reasons given above. Seldom have cultivators shown such haste and anxiety in sending their cotton to be sold in the market. Lack of cash and the dangerous state of local politics, owing to the pending elections for the first Egyptian Parliament, may have contributed to this state of things. A feature worth mentioning is that this week's total exports, amounting to about 31,000 bales, surpass last year's for the first time this season. Continental exchanges are worse than ever, and this may eventually have very bad effects on the development of the commercial demand from these countries.

Spot.—A good business has been done at Minet el Bassal this week and sales amount to about 31,500 bales, of which we estimate 20,600 bales Sakellaridis, 10,400 bales uppers, 300 bales brown, and 200 bales white. The movement of cotton in the Interior continues on a large scale and arrivals are again heavy. Sakellaridis is pressed for sale on account of the lack of financial facilities in the Interior and the cultivators' pressing need of funds. This fact is undoubtedly depressing the market unduly, and we would draw spinners' attention to the intrinsic cheapness of Egyptian cotton in comparison with any other growth and with American futures.

Sakellaridis.—All qualities have been dealt in and there has been rather more enquiry for fully good at comparatively high prices. The prices of spot against contracts show practically no change for fully good fair and below, but good is dearer, and fully good markedly so.

Uppers.—We have once more had a good week's business in all grades, but mainly in the medium and lower qualities, which continue to be eagerly sought after at very good prices. The prices of spot against contracts are without much change except fair and extra, which are fractionally dearer.

Brown.—A moderate business has been done at a small increase over last week's rates.

White.—A small business has been done at somewhat dearer prices than last week. This cotton is in demand at good prices but is very scarce.

Crop.—Picking is completed in the southern and central districts of the Delta, and very little cotton is left in the fields in the north districts. Recent reports confirm our estimate of total production this year of about 4,750,000 kantars; to this must be added about 125,000 kantars held up-country on August 31 last.

MANCHESTER COTTON TRADE.

Balkan Business Improving.

(From Our Own Correspondent.)

Manchester, Saturday.

Without there being any decided improvement in the amount of business passing in the market this week, the turnover has been better. Certain buyers and sellers have been able to get to closer quarters, and on the whole the sales show an improvement. Many people are of opinion that Egyptian cotton is cheap in relation to American, and certain users of the latter qualities are turning on to Egyptian sorts. The business done in long staple cotton has therefore been rather more encouraging. The crop continues to do well, and there is a possibility of a yield of nearly 5,500,000 kantars. Egyptian yarns have also attracted increased attention, especially the higher numbers. The industrial situation in Bolton is brighter, and there is now very little machinery standing idle. Some yarn producers are fully sold well into next year. In cloth for Egypt there has been a steady demand, and some moderate lots have been sold in grey and white shirtings. A few more orders have been booked for the Balkan States. There has been some improvement in bids for India, and more lines have been put through for Calcutta and Madras. Only isolated sales have occurred for China. Some Burnley manufacturers are being compelled to reduce production.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows, under date November 1 :—

Quite a good inquiry has been in evidence throughout the week, and a satisfactory increase in the sales effected has been registered. The demand has been general in character, practically every growth of Egyptian cotton being included. An improved trade has taken place in brown Egyptian, and although the supply of this variety is strictly limited, some very nice lots of cotton have changed hands in the neighbourhood of 15½d. per lb. The best lots, however, can still command considerable premiums over this price. Another feature has been a distinct improvement in the inquiry for good to fine Sakellaridis, and it is interesting to note that this improvement coincides with the recent action of the spot quotation committee here, who, during the week, not only reduced fine and extra fine Sakellaridis by a further farthing per lb., but also, this time, included the quotation of good. White cotton round about 17.00d. has been in request, but the price was on the low side, and but little business resulted. Sudan and Tokar cottons have been quieter, and the latter certainly offers but a very poor selection nowadays. On October 27, the stock of Sudan cotton held in Liverpool was officially returned at 11,829 bales. Pilion has been neglected, and the interest lately displayed in uppers has not been maintained. The market still continues active for Sakellaridis good fair to fully good fair, and for low cottons of all descriptions from 5.00d. to 9.00d. per lb.

A good business has taken place in cotton for forward delivery, and owing to the heavy arrivals which continue to pour daily into Alexandria, the market over there is overloaded with cotton, and exporters are in a position to make reasonable offers to this side. Looking at the situation of cotton as a whole, it would appear as if the present was a good opportunity to cover future requirements, at any rate, in part, and it is obvious that many spinners are taking this view. We should, like, in this connection, to point out (as we have so often done in the past) the advantage of leaving bids lying out in Alexandria. When a spinner is in a position to know at what price it will pay him to buy cotton, if he can, he should send his bid out, say, in force for a week. This gives the shipper a much better chance to look round, and to secure the cotton, should a temporary setback occur in the market there. We realise, of course, that it is not always possible to work on this system, but, when it is, the advantages resulting are mutual as between buyer and seller. The former obtains cheap cotton, and the latter is able to clinch a contract which otherwise he might have to turn down.

Manchester reports commenced the week with a poor tone, but have improved considerably during the last few days. There is evidently more doing both with India and China. At first, the rise in cotton acted as a check on business, but when the rise continued steadily, and hopes of a quick reaction faded away, buyers were drawn in in spite of themselves. The Egyptian market has remained extraordinarily steady, taking no notice of the advances which have been of almost daily occurrence in the American markets, and this should prove of material assistance to spinners, one of their chief complaints being that owing to the vagaries of the Liverpool futures markets they can never count on the price of cotton from one day to another. This apparent lethargy in a department, which is generally very sensitive to outside influences, is caused mainly by the weight of cotton arriving in Egypt, and the very large amount of hedge selling that has lately taken place. But it is as well to remember that the Egyptian crop is only a small one, and sooner or later it is bound to respond to any cry of "scarcity" in the cotton world taken as a whole. Private advices to-day from Alexandria report that America has now commenced to buy Sakellaridis. This needs confirmation, but is only what we have been daily expecting and what we foreshadowed in a previous circular. Total sales 3,500 bales (including 900 Sudan). Quotations are unchanged on the week, with the exception of good, fine, and extra fine Sakellaridis, which are reduced ¼d. per lb.

The Steaua Romana (British), Ltd., are advised that the crude production (gross) of the Steaua Romana, Bucharest, during the month of October, was 19,900 tons.

The Commercial Secretary to H.M. Legation at Bucharest reports the formation of a bureau for the purpose of furnishing reliable information and detailed reports upon technical and commercial matters in Roumania.

(The Cotton Trade Review of the Imperial Ottoman Bank will be found on page 620.)

Near East Markets.

LONDON PRODUCE REPORT.

Steady Tone Throughout.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in good demand at last prices. Tate's cubes are 56s. 6d., and mineral water sugar has been done at 51s. London and Lyle's granulated are 51s. 7½d. and 50s. 10½d. respectively. Foreign descriptions remain unaltered. West Indian crystallised is steady at 43s. 6d., and white Mauritius shows no change at 47s. 9d. Quotations are:—October, 22s. 6d.; November, 21s. 6d.; December, 21s. 6d.; January, 21s. 6d.; March, 21s. 7½d.; May, 21s. 9d.

Coffee.—All quotations are lower. East Indian has declined 6s. at 110s., while Nairobi has shed a similar amount at 94s. Costa Rica is 10s. down at 100s. Quotations are:—December, 61s. 9d.; March, 61s.; and May, 61s.

Desiccated Coconut.—An active tone has been the feature throughout the week. Prices have advanced in most cases. Shipments at the moment are light, and very little forward business is being transacted.

Rice.—The general position remains as last week, with a good all-round demand. Quotations remain normal.

Green Fruit.—The season for South African oranges has now officially terminated. A small shipment which arrived a few days ago fetched excessive prices. No quotations for this fruit can now be given. Malaga lemons continue in good request. Since the season for this fruit commenced, keen business has been in evidence, while a steady advance has been maintained for quotations for the past few weeks. Further small consignments of Messina lemons have just arrived, and high prices have been paid for the best quality fruit. Prices are:—Malaga lemons, good clean, colouring bold, 26s. box (300's); superior clean, 27s. case (420's); extra superior clean, 30s. case (420's). Messina lemons, 23s. 6d. to 37s. 6d. box (300's); 37s. 6d. to 52s. 6d. case (360's and 300's). The market for Valencia onions has eased considerably with the advent of large shipments.

Dried Fruit.—Valencia raisins have been in excellent request, with an easing off in prices. Sultanas and currants are showing a good market at firm rates. Quotations for figs are also slightly lower with a much better business passing. Calamata and Algerian figs are attracting most attention and take the place of Smyrna Naturals, which are 14s. to 15s. cwt. dearer. Almonds are in steady request, but unfortunately the present stock is small and will not last for more than a few weeks. Jordans show an advance of about 10s. cwt., while Valencias are fairly steady.

Oilseeds.—A variable tone prevails. Indian linseed is 9d. up at 20s. 9d., but La Plata has shed 3d. at 15s. 6d. Rapeseed is unsteady, with Toria 3d. up at 18s. 3d., and bold Ferozepore unchanged at 16s. 7½d. Cottonseed is higher with Egyptian black 1½d. up at 10s. 3d., and Sakellarides 3d. up at 10s. 1½d. Indian remains the same at 8s. 4½d.

Oils.—All prices remain unchanged with the exception of linseed oil, which has shed 3s. 6d. at 36s. 6d. Crude rape oil and refined are both firm at 41s. 3d. and 44s. 3d. respectively. Cotton oil shows no change. Egyptian is 35s., refined 44s., deodorised 48s., and technical 37s.

Oilcakes.—Linseed cake has gained 10s. at 270s. Other quotations unchanged. Cottonseed cake has come to business at 140s.; cottonmeal cake is the same at 240s., and coconut cake is firm at 170s.

BEET SUGAR CROP OF ROUMANIA.

According to the *Independence Roumaine*, the sugar production for this year will not come up to earlier expectations owing to a disease of the beetroot caused by the summer drought.

The total production is estimated at 3,400 wagons, and the quantity required for home consumption is placed at 6,000 wagons; the difference of 2,600 wagons will therefore have to be imported. A commission has been nominated to fix the prices of sugar of different qualities, but this cannot be done yet, owing to the lack of certain figures which must serve as a basis of calculation. In order to avoid the "cornering" of sugar it has been decided to institute an office for the sale of sugar in connection with the Ministry of Industry.

YUGOSLAVIA'S WINE HARVEST.

Foreign Markets Required.

From reports appearing in the local press and from information gathered from various sources, the vine crop of the Serb-Croat-Slovene Kingdom this year promises to be the most abundant harvested since the war, says the Commercial Secretary to H.M. Legation, Belgrade. It is estimated that the total yield will reach 13 million hectolitres, and that an exportable surplus of about 3 million hectolitres will remain after the needs of the country are provided for. In point of quality, however, it is stated that this year's wines will be somewhat inferior to those of the 1921 vintage.

At a conference of vine-growers recently held at Zagreb, at which the Minister of Agriculture took part, the need for finding foreign markets for wine was referred to, and mention was made of the commercial agreement with Czecho-Slovakia, by which Yugoslavia will permit the importation of 150,000 hectolitres of beer and Czecho-Slovakia the importation of a similar quantity of Yugoslavian wine. It was stated that of this wine the Vojvodina would provide 40,000, Dalmatia 40,000, Slovenia 30,000, and Herzegovina 10,000 hectolitres.

It is thought by many that the exportation of wine to Czecho-Slovakia will not reach very large proportions, as that country requires stronger wines than are produced here, excepting in Dalmatia; and because the high cost of freight from Yugoslavia makes it difficult to compete with the Italian vine-growers. The trade with France in Dalmatian wine is at present good, and a consignment of 30,000 to 40,000 hectolitres is about to be shipped from Split.

TOBACCO CULTIVATION IN PALESTINE

The report received by the Imperial Ottoman Bank from Palestine for the month of October states:—

German and Austrian goods imported during August were as follows:—Jaffa, £34,016.980, an increase of £6,595.980 on the total of the previous month; Haifa, £4,087, a decrease of £9,521; Jerusalem, £228.260, an increase of £140.175.

Unemployment showed a further diminution during October, and there are probably at present not more than 500 or 600 unemployed men in Palestine. To a considerable extent this is due to the building activity in the towns. With the end of the vintage more men will become available for employment, but these should be absorbed by the new undertakings that are about to be commenced.

There are at present forty-five tractors actually working in Palestine, twenty-seven in the Northern Circle and eighteen in the Southern Circle.

An effort is being made to encourage local cultivators in the use of imported tobacco seed. Samples are being obtained from Bessarabian tobacco seed grown near Rishon-le-Zion, tobacco of Anatolian origin grown at Petah-Tekrah, and native tobacco seed grown at Gaza, which will be submitted to the principal cigarette factories in the country.

During the first six months of this year the exports of soap were as follows (in kilos):—Egypt, 1,386,336 (£67,580); Syria, 259,133 (£14,081); Iraq, 25,191 (£1,126); Turkey, 2,400 (£144); Holland, 177 (£7). In addition, about one ton of toilet soap manufactured in Palestine was exported to various countries.

In the same period some 25 tons of refined oil were exported to various countries, of which Egypt imported 10 tons, Syria 10 tons, and the United States one ton.

In 1921 Palestine produced more than 60,000 tons of barley, valued approximately at £600,000. The bulk of it came from the south, and very little from the north, as can be seen from the following particulars of production:—Samaria district, 41,300 tons, or 67 per cent.; Jerusalem district, 10,600 tons, or 17 per cent.; Northern district, 7,900 tons, or 13 per cent.; Samaria, 1,700 tons, or 3 per cent. Of the exports for the same period 23,070 tons went to Syria, 237 tons to Egypt, and 146 tons to other countries. Syria is now the chief market for export.

The Government of India has appointed Mr. J. W. Bhore, C.B.E., of the Indian Civil Service, to act as High Commissioner for India in London in place of the late Sir William Meyer.

The Council of the Suez Canal Company has decided that on and after March 1, 1923, the rates for passage shall be reduced by 25c., says *The Times* Paris correspondent in a message dated November 6. The rates for loaded vessels will thus be reduced to 7f. 75c. per ton, and for vessels in ballast to 5f. 25c. per ton.

DRIED FRUIT REPORT.

Messrs. J. C. Houghton and Co., Liverpool, report as follows, under date November 1:—

Currants.—The position has not materially altered during the period under review. A very heavy forward and floating business has been done, by far the larger portion of the cargoes per Cavallo, Etrib, Alpha, and Malia being already disposed of before arrival. The little available by the first named, consisting of Zante, realised 82s. to 85s. The following steamer Etrib brought Vostizza, and sales were reported at 80s. to 85s. Shade dried 90s. to 97s. The Alpha's cargo was mostly Pyrgos, and the few parcels offering were disposed of at 75s. to 78s. With the arrival towards the end of the month of the Malia and Poznan, a better selection was available for the market, and naturally after the heavy purchases referred to, buyers are not showing any great anxiety to add to their stocks, being more anxious to distribute their forward purchases before renewing activities on the market. While all grades are good, Pyrgos stands out, showing excellent value, and commands most attention, selling readily at 72s., 74s.

Valencia Raisins.—In sympathy with the drop in value at the London auction prices fell 10s. to 20s. per cwt. At the decline a better demand sprang up, and a healthier tone was experienced, ½ boxes closing 75s. to 85s., and ¼ boxes 80s. to 100s., showing 5s. to 10s. recovery from the bottom. At yesterday's auction, unfortunately, the advance was not maintained, and prices declined 5s. per cwt.

Cape Raisins.—Selling slowly, which is surprising considering the good value they show compared with Valencia prices: faced, 60s., 65s.; unfaced, 40s., 55s.

Sultanas.—During the latter part of the month a great change has come over the situation, buyers becoming increasingly nervous and the market extremely sensitive with growing uneasiness as to the possibilities of further supplies from Smyrna. Reports are to hand that about 20 to 30 per cent. of the crop has been saved. The further news that the Egyptian sailed on October 25 with fruit on board brought prices down, and good quality changed hands at 134s. to 145s., showing a fall of 30s. from the highest point reached.

Afghan Sultanas on the spot neglected, and new crop offered November shipment at 67s. 6d. c.i.f. reds, and 82s. 6d. yellow, without finding buyers.

Cape Sultanas.—Difficult to sell. Sundried 80s. to 90s., and sulphured 110s. to 120s.

California soda bleached quoted 74s. c.i.f. immediate shipment, without attracting buyers.

Figs.—Samples ex s.s. Cavallo were available in the early days of the month, but met with a most disappointing reception, buyers adopting a very cautious policy. A few cases changed hands. Layers, 190s., 200s.; small boxes, 200s.; locoums, 250s.; but these prices quickly fell away, owing to poor demand, and progress was only possible at considerably reduced figures, the tender condition of some of the parcels necessitating quick sale. Recent sales were: Large boxes, 110s., 125s.; small boxes, 140s., 160s.; locoums, 180s., 200s. Bags natural prima quality opened 80s., quickly dropping to 60s. Spanish figs selling 32s. to 50s., according to quality and style of package.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated October 30:—

During the week ended Oct. 29 there was local rainfall in South Peninsula and Burma, and a few falls in Bombay, Deccan and Central Provinces in the latter part of week. Condition of crops, Oct. 27: In Bengal, weather continues favourable for flowering. Winter paddy prospects good. Sowing of spring crops continues. In Punjab, standing crops are average to good and rice yield normal. In United Provinces, North-East Districts, sowing of wheat started. Sowing of grams in full swing. Rice yield good.

Markets.—October 26: Bombay cotton market steady. Fine M.G. Oomras, Rs. 416.8 December-January; Rs. 421.8 March. Bombay cotton arrivals from September 1 to October 19 were 44,000 bales, as compared with 254,000 bales during the same period of the last year. In Bombay imported piece-goods market takes-off are very small, and stocks of all kinds are accumulating. Local goods quiet. October 28: Calcutta jute market steady. Firsts Rs. 74 November. In Gunnies, little business passing. Ready 9 Porters Rs. 15.8; 11 Porters Rs. 19. At tea sale on October 24 there were good selections and market was strong with general rise of ½ anna. Good Liquoring Fannings and Brokens with Tips in keen demand. Former advanced 2 annas and latter ½ to 1 anna. Dusts again dearer. This sale's average price was 14 annas 6 pies against last week's average price of 14 annas per lb. 421,930 packages sold to date at an average price of 11 annas 7 pies per lb. Rangoon rice market, October 28: Little business done. Large mills quoted at Rs. 450, small mills Rs. 495. Paddy, rail Rs. 185. Shellac, October 27: Market firm. Good demand from shippers and fair business done in almost all qualities, T.N. Rs. 145 to Rs. 163. Closed at Rs. 155. Imperial Bank of India rate 5 per cent. from October 26.

CURRENT PRICES.

General Produce.—Bacon (Continental), 130s. per cwt.; (Canadian), 113s. cwt.; (American), 99s. cwt.; butter (Danish), 214s. cwt.; (Australian), 186s. cwt.; (New Zealand), 204s. cwt.; cheese (Canadian), 105s. cwt.; (New Zealand), 106s. cwt.; lard, 76s. cwt.; eggs (Danish), 25s. 9d. per 120; (Styrian), 18s. per 120; chillies, 140s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 85s. cwt.; coffee (Costa Rica), 118s. 3d. cwt.; (East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 97s. 6d. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 50s. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3⅞d.; (Muntok white), 6¼d. lb.; pimento, 2½d. lb.; raisins (Valencias), 102s. 6d. cwt.; currants (Vostizza), 96s. cwt.; currants (Amalias), 77s. cwt.; sultanas (Smyrna), 145s. cwt.; sugar (Tate's cubes), 56s. 7½d. cwt.; (Lyle's granulated), 51s. 6d. cwt.; (Mauritius crystals), 47s. 3d. cwt.; (West Indian crystallised), 44s. 3d. cwt.; (centrifugal), 18s. 3d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 11s. 3d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1⅞d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. lb.; wheat (English white), 43s. 9d. qr.; wheat (Australian), —— qr.; oats (English), 27s. qr.; oats (La Plata, ex ship), 28s. qr.; maize (La Plata), 39s. 9d. qr.; flour, 37s. 6d. sack.

Metals.—Aluminium, £100 ton; antimony (English Regulus), £32 2s. 6d. ton; bismuth, 10s. lb.; copper (standard), £62 13s. 9d. ton; copper (electro), £70 10s. ton; gold bars, 92s. 3d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £16 15s. ton; lead (soft foreign), £24 7s. 6d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 43s. 9d. unit; nickel, £140 ton; platinum, 440s. oz.; graphite (80-90), £13 10s. ton; quicksilver, £12 1s. 3d. bottle; spelter (G.O.B.), £36 15s. ton; tin (standard), £180 12s. 6d. ton; wolfram, 14s. 7½d. unit; zinc sheets, £40 ton; tin plates (20 x 14), 18s. 9d. box; silver bars, 34⅜d. oz.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric 1s. 9½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £47 10s. ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 104s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £37 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £19 17s. 6d. per ton; hyposulphite, £14 10s. ton; prussiate, 11d. lb.; nitrate £13 7s. 6d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 ton; sulphate of copper, £26 12s. 6d. ton; sulphate of iron, 55s. ton.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 10d. lb.; 80 to 89 lb., 10d. lb.; 70 to 79 lb., 10d. lb.; 60 to 69 lb., 9⅛d. lb.; 59 lb. and under, 8¼d. lb.; (second), 90 lb. and up, 9d. lb.; 80 to 89 lb., 9d. lb.; 70 to 79 lb., 9d. lb.; 60 to 69 lb., 7⅝d. lb.; 59 lb. and under, 6½d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6d. lb.; (second), 5d. lb.; (third), 3d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7 to 12.8; Durbhangas, 5.8 to 8; Patnas, 5.8 to 8; salted cows, 6.8 to 9; arsenic hides (buffalo), 4 to 6. Skins: Calf, 8 to 10 per 20 lb.; goat, 260 to 300 per 100 pieces.

Miscellaneous.—Cotton (American), 14.30d. lb.; Egyptian (Sakel), 16.70d. lb.; jute (first grade), c.i.f., £30 17s. 6d. ton; jute (lightnings), £29 2s. 6d. ton. Oilseeds: Linseed (La Plata), £19 2s. 6d. ton; palm kernels, £17 1s. 3d. ton; castor seed (Bombay), £16 12s. 6d. ton; sesame seed (China), £21 7s. 6d. ton; olive (Spanish), £74 ton; rape (crude), £40 5s. ton; soya, £41 2s. 6d. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex-tank), 65s. ton; coconut (Ceylon), £37 13s. ton; cotton (crude), £34 5s. ton.

Shipping Intelligence.

MOTOR BOATS FOR INDIA AND THE NEAR EAST.

It is stated that Messrs. John J. Thornycroft and Co., Ltd., are well occupied just now with numerous foreign contracts, including a 48½-ft. cabin launch, on account of the India Office, for service at Madras, in which will be installed a four-cylinder 30 b.h.p. Thornycroft motor with reducing reverse gear. The launch is to have a speed of 8½ knots.

Boats in course of construction include six auxiliary motor cruisers, each of 67 feet in length, to be equipped with Thornycroft machinery, developing 180 b.h.p. All these are for service in the Mediterranean. Two river motor launches of 30 and 35 feet in length, respectively, are being built for India. Each is to be equipped with one of the new Thornycroft type DB/2 marine engines of 9 b.h.p. Another boat for India is in hand; a cabin cruiser of 48 feet, to be equipped with a Thornycroft type NI/4, 30 b.h.p. motor with reducing reversing gear, which is expected to give the boat a speed of about 8½ knots.

For service in Egypt they have in hand a fast cabin launch of 40 feet in length, in which are to be installed two Thornycroft type Z/6 engines, each developing 70 b.h.p., which are designed to develop a speed of 18 knots.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Castalia for Bombay (Liverpool, November 18).

Anchor Brocklebank Line.—S.s. Malakuta for Calcutta (Birkenhead, November 18); s.s. Manaar for Port Said, Colombo, Madras, and Calcutta (London, November 25); s.s. Mahsonda for Calcutta (Birkenhead, November 29); s.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9).

Bibby Line.—S.s. Lancashire for Rangoon (London, November 16); s.s. Stanley Hall for Rangoon (London, November 16); s.s. Oxfordshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, November 22).

British India Line.—S.s. Morvada for Colombo, Madras, and Calcutta (London, November 10); s.s. Mashobra for Bombay and Karachi (London, November 17); s.s. Merkara for Colombo, Madras, and Calcutta (London, November 24); s.s. Gazana for Bombay and Karachi (London, December 2); s.s. Magina for Colombo, Madras, and Calcutta (London, December 9); s.s. Gamaria for Bombay and Karachi (London, December 16).

Clan Line.—S.s. Clan Buchanan for Bombay and Persian Gulf (Birkenhead, November 9); s.s. Clan Macfarlane for Colombo, Madras, and Calcutta (Birkenhead, November 16); s.s. Clan Mackinnon for Bombay and Persian Gulf (Birkenhead, November 27); s.s. Clan Macnab for Malabar Coast and Tuticorin (Birkenhead, December 7).

Cunard Line.—S.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Corfu, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, November 30).

Ellerman Line.—S.s. Amatonga for Gibraltar, Malta, Patras, Piræus, Syra, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, November 11).

Ellerman, Bucknall, and Strick Line.—S.s. Braunfels for the Persian Gulf (London, November 18); s.s. Kormark for Persian Gulf (London, December 18).

Ellerman's "City" Line.—S.s. City of Calcutta for Calcutta (Birkenhead, November 13); s.s. City of Manchester for Bombay and Karachi (Birkenhead, November 22); s.s. City of Agra for Bombay and Karachi (Birkenhead, November 22).

Ellerman's Hall Line.—S.s. City of Baroda for Bombay, Karachi, and the Punjab (Liverpool, November 14).

Ellerman's Westcott and Laurance Line.—S.s. Vigo for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, November 15); s.s. Venetian for Gibraltar, Malta, and Alexandria (London, November 22); s.s. Castilian for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, November 25).

Glen and Shire Line.—S.s. Glensanda for Port Said, Port Swettenham, Singapore, etc. (London, November 16); s.s. Radnorshire for Port Said, Port Swettenham, Singapore, etc. (London, November 30); s.s. Glenshale for Port Said, Port Swettenham, Singapore, etc. (London, December 14).

Glynn Line.—S.s. Ravenspoint for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, November 17).

Harrison Line.—S.s. Collegian for Calcutta (Liverpool, November 22).

Henderson Line.—S.s. Burma for Port Said and Rangoon (Birkenhead, November 15); s.s. Pegu for Port Said and Rangoon (Birkenhead, November 29).

Holt Line.—S.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, November 16); s.s. Theseus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, November 16); s.s. Diomed for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, November 18); s.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, November 23); s.s. Ningchow for Port Said, Port Swettenham, Singapore, etc. (Swansea, November 23).

Johnston Line.—S.s. Dromore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, November 18).

Moss Line.—S.s. Assiout for Gibraltar, Oran, Algiers, Malta, and Alexandria (Liverpool, November 11); s.s. Hatasu for Gibraltar, Malta, Syra, Smyrna, and Constantinople (Liverpool, November 18).

Papayanni Line.—S.s. Malatian for Malta and Alexandria (Liverpool, November 18); s.s. Grodno for Oran, Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, November 25).

P. and O. Line.—S.s. Caledonia for Bombay (London, November 10); s.s. Khiva for Bombay (London, November 17); s.s. China for Bombay (London, December 1); s.s. Novara for Colombo, Madras, and Calcutta (London, December 1).

Prince Line.—S.s. Merchant Prince for Tunis, Malta, Alexandria, Beyrout, Jaffa, and Haifa (Manchester, November 10).

Messrs. Ramage and Ferguson, of Leith, have secured an order to build a 200-ft. steam yacht for one of the Egyptian princes.

The agency of the Bank of British West Africa, Ltd., at 100, Beaver Street, New York, will be transferred to the Standard Bank of South Africa, Ltd., at 68, Wall Street, New York, as from January 1, 1923.

It is reported that Messrs. Denny Bros., of Dumbarton, have received an order to build two liners, of about 5,000 tons each, for Messrs. P. Henderson and Co., Glasgow.

The Ellerman liner City of Paris, which left London on October 5 with over 300 passengers on board, arrived at Colombo on October 28, and at Singapore in the early morning of November 2, after a remarkably fast passage to the latter port of just over twenty-seven days.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Jaffa.

The report for September states :—

Because of the lack of exports the grain market continues to be quiet and featureless. However, as stocks decrease daily through local consumption an increase in prices is to be anticipated during the winter, as the crops have generally been poor. Towards the end of the month some shipments of sesame were made to Syria.

Some small parcels of almonds have been consigned to Egypt and Syria. The prices vary from £T14 to £T15 per rotl, according to quality. The crop of olives is reported to be short, and the yield is estimated at only 50 per cent. of that of a good year. As a result of the damage done at Smyrna, and the lack of exports from that centre, prices are firm with a marked tendency to rise. The crop of oranges is good. Exports commence towards the end of October.

Aleppo, September 30.

Cereals.—In consequence of the discord that has broken out again among the various nomadic tribes, harvesting of the crops has been carried out rapidly. Dealers in futures, returning to the attack during the month, have succeeded in bringing about a rise of 10 to 15 per cent. Wheat is quoted at present at Ps.360-365 per 100 kilos, as compared with Ps.320 last month; and barley at Ps.165, as against Ps.160.

It is becoming more and more evident that the cotton crop is good. It is estimated at 15,000 bales. Up to the present the temperature has favoured the plants. The picking will take place about October 15-20. There has been no production of pistachio nuts in the Aleppo district. That of Aintab is very short, being given at about 400 tons, as compared with 2,000 tons in 1921. The crop of olives, on the other hand, is very abundant this year. The price of oil has fallen in consequence.

The events in Anatolia and the approach of winter have had a very slight effect on the import trade of this centre. A certain number of caravans, which had been held back during August, have been despatched to Anatolia in exchange for the flocks of sheep and the products of the country that begin to appear on our market. It is to be hoped that the Customs problem, so much discussed by the French and Kemalist representatives, will be satisfactorily solved at an early date, so as to permit trade between the two countries.

In the export trade there has been great activity as regards wool, which is sought by America. The increased demand has resulted in a rise in prices of 10 to 15 per cent. 2,000 bales have been despatched to America via Alexandretta. Stocks of sweated wool are completely exhausted. Those of washed wool are being prepared, and are estimated at only 1,000-1,200 bales. It is to be noted that this activity is due to the fear of the putting into force of the prohibitive American tariff.

The importation into Greece, from any source, of old and used clothing and articles of clothing and second-hand footwear, bedding, bed-covers, mattresses and pillows for commercial purposes, is now prohibited.

Stock and Share Markets.

VARIABLE TENDENCY PREVAILS.

Gilt-Edged Strong.

(*From Our Own Correspondent.*)

London, Monday Night.

It has been a short week, with the usual holiday on November 1, but it has been far from devoid of vicissitudes, for there have been some decided changes in the temperature of the markets. The week opened with the thermometer rather below the normal; then came the Labour *débâcle* in the municipal elections, which sent it up with a bound; but to-day it is again down as a result of adverse developments in the Near Eastern situation.

One can well imagine how trying it is to the patience of those who hold really sound shares, and are waiting for them to go up to encounter these only too frequent interludes of semi-depression. Only a super-optimist, however, could really expect settled markets until we have passed the General Election and the international barometer is set fair. The election is a minor obstacle, and should indeed soon be a "bull" point, while the international outlook will be vastly improved once the Near Eastern situation is satisfactory. According to all accounts, conditions are rapidly improving in Russia, and the only difficulty ahead in the immediate future, so far as can be seen, is the everlasting Reparations question, a solution of which would do more to advance reconstruction than anything else, and would mean buoyant markets on the Stock Exchange.

After a renewed period of depression, due as much as anything to profit-taking, Rubbers are again on the up-grade, helped by a further advance in the raw commodity. It is said that the lands hold a good deal of rubber, and if that is so the rise is likely to prove temporary; but once these holdings have been absorbed the market should rapidly go ahead. The talk is of rubber at 1s. 6d., and this seems not at all improbable considering all the circumstances. At that figure any company can make good profits, and it should therefore not be long before long-suffering holders see a renewal of dividends.

Gilt-Edged Firm.

The gilt-edged market has been less affected by the prevailing conditions than many other markets; though yesterday the tendency was for dullness to develop on the Near East situation. Prices are, on the whole, better than last week.

Consols at 57⅛ are unchanged, but War Loan Fives at 98 15-16 x.d. have gained ⅜, while the Conversion Loan at 75 1-16 is 13-16 up, and Fundings at 87 have gained 1¼. Indian stocks have been rather depressed in consequence of the result of the loan. The 7 per cent. stock at 110½ is a point lower, the 3½ per cent. stock is ¼ down at 65¼, while the 3 per cent. stock is unchanged at 55¼.

The Foreign group has been very irregular as a result of the adverse movements of the exchanges, and anxiety with regard to the Near East. French stocks have been notably dull, War Loan Fives at 28¾ being 2¼ lower, while the 4 per cents. at 22⅜ are also 2¼ down. The German exchange has reached a point at which its influence is very small, but German 3 per cents. are fractionally lower at 15-16. Italian Rentes have remained very steady at 22. Near Eastern securities have displayed weakness. Turkish Unified are down to 25¼, a decline of 3, while Greek Monopolies at 28½ are two points lower. Czecho-Slovak 8 per cent. are unchanged at 92. Russians have been rather weak. The 5 per cent. 1906 loan is 10, the 4½ per cent. 1909 loan is 8, and the 4 per cents. are also 8. Except for the development of some weakness in Brazilians there has not been much doing in South American securities. The Far Eastern group has been quiet.

Industrials Quiet.

Up to yesterday the week has been quite a good one in the Industrial group, and it has not been influenced by the prevailing conditions to anything like the extent of other markets. Business, however, has been on a very restricted scale.

Textiles have been harder. Coats at 66s. 9d. are 9d. up, while Courtaulds at 55s. 3d. have gained 2s. 6d. Listers at 28s. are 1s. 6d. down. Tobaccos have also improved, Bats being 86s. 9d., at which they are 1s. 3d. up, while Imperial Tobaccos at 69s. 3d. have gained 5s. 3d. In Iron and Steel shares, Vickers at 13s. 6d. are 1s. 6d. up, Armstrongs are 1s. up at 18s. 6d.; while Guest Keens are unchanged at 35s. In Indian Railways, Bengal and North-Western are 135, Bombay Barodas are 93⅜, Delhi Umballas are ½ up at 181, Madras and Southern Mahratta are 105, and South Indian are 108.

In Shipping securities P. and O. Deferred are 305 x.d., Cunards are 3d. down at 20s., Khedivial Mails are unchanged at 3¼, while Furness Withys at 31s. 3d. are 3d. lower.

Oils Dull.

The general situation, which has led to some foreign liquidation, has had a considerable repercussion on this market, which has shown a dull tendency.

Anglo-Persians have been a firm spot, and at 5⅜ are ¼ up; while Burmahs are 5½ x.d. Mexican Eagles at 2 21-32 are 1-32 lower; while Shell Transport at 4 5-32 are 1-16 down. In Trinidad issues Apex at 2 3-16 are 5-16 down, Centrals at 1 11-16 are ⅛ up; while Leaseholds at 1 3-16 are unchanged.

Russians are about the same. Spies are unchanged at 5s. 6d., Anglo-Maikop remain at 3s., North Caucasians at 21-32 are 1-16 lower, Ural Caspians are ⅝, while Uroz are 6d. up at 8s.

Among Egyptians, Anglo-Egyptians B are 1⅜, at which they are ⅛ lower; while Oilfields of Egypt remain at 1s. In the Roumanian group, Phœnix at 27s. 3d. are 1s. 9d. up. Roumanian Consolidated are 1s. 3d. up at 13s. 6d., Dacia Romanos are unchanged at ¾, while Hamilton's Oil Concessions are 3d. down at 1s. 9d.

The guarantee fund of the British Empire Exhibition now totals £1,190,000.

Messrs. Vickers, Ltd., have succeeded, in the face of very keen competition, in securing a contract for a first-class passenger liner of approximately 20,000 tons measurement for the Orient Line.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

129.—Principal of old-established textile manufacturing and import firm in Aleppo (Syria) now in Switzerland wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

130.—Import and export merchants in Beirut (Syria) in a position to export dried carobs in any desired quantity wish to be connected with interested British firms.

FOREIGN EXCHANGES.

Four Low Records.

This week the foreign exchange market has seen exceptional fluctuations, new low records being established for the German, Belgian, Greek, and Turkish exchanges.

Company Meetings.

SUDAN PLANTATIONS SYNDICATE.

Continued Prosperity and Further Expansion.

Increase of Capital.

The fifteenth ordinary general meeting of the Sudan Plantations Syndicate, Ltd., was held on November 2 at Winchester House, Old Broad Street, E.C.

Mr. F. Eckstein (the chairman of the company) presided.

The Secretary having read the notice convening the meeting and the report of the auditors,

The Chairman said:—Gentlemen,—I rise to propose "That the report of the directors and statement of accounts to June 30, 1922, now laid before the meeting, be, and that the same are hereby, received and adopted." Your directors have once more the privilege of presenting a report and accounts which cannot but give you satisfaction. At our annual meeting last year we stated that the prospects for the coming year looked promising, and this forecast has been fulfilled.

The Accounts.

As usual, we will first go through our accounts. On the debit side you will find the first four items unchanged; then comes a new account, "Hosh Reserve Account, £40,000," which constitutes the first instalment of the amortisation of the pumping installation of that station. The staff provident fund figures at £12,500. This amount was formerly included among London creditors, but we thought it advisable to show it as a distinct item. The rest of the debit side is practically unchanged, except the profit and loss account, which is increased from £215,000 to £272,000. Coming to the credit side, we have made various alterations and additions compared with last year's balance-sheet.

To give you a better illustration of the big works we are engaged in we show you now separately the cost of our present pumping stations, but under this heading you will find an entirely new item—viz., Wad el Nau, to which I will refer more fully later on. Most of the items, such as development, agricultural implements, machinery, etc., are higher, due to our constantly increasing work of expansion. Our cotton crop, of which we sold very little up to June 30—the date on which our accounts are made up—is shown at cost, and I may say at once that we regard this as a safe figure. British Government securities are £511,000, as against £574,000, and cash £89,000, as against £122,000 in the previous year.

If you will now turn to the profit and loss account, you will see that our gross revenue was £270,000, against £98,000 in the year before. From this have to be deducted our general and cultivation expenses and £40,000 Hosh reserve already mentioned, and, subject to your approval, we have again provided a sum of £4,000 as bonus to our staff and £5,000 as an addition to our staff provident fund. I feel sure you will heartily agree to these two items, which I cannot too warmly recommend to your acceptance. The final result is that we add the sum of £131,000 to our balance-sheet, this being £93,000 more than in 1921.

Anticipating this excellent result, your board was able to make an innovation by declaring and paying you in July an interim dividend of 15 per cent. We felt that it would not be right to keep you waiting for a dividend until the end of the year, when we were in the happy position to pay you something on account at an earlier date, but it must not be assumed that this pleasant precedent can be acted up to with any regularity, as naturally so much depends year by year on the successful growing of our crops and on the prices we can realise for them. I sometimes wonder, gentlemen, whether any of you really realise that your board is accomplishing the almost impossible—namely, in paying you regular and good dividends legitimately earned while engaged on big development work. This completes all that I think it necessary to say with regard to our accounts. You will, of course, have seen from the directors' report that we propose to declare a final dividend of 10 per cent., plus a bonus of a further 10 per cent., thus making a distribution of 35 per cent. for the past year.

Work in the Sudan.

I will now deal with our work in the Sudan. Our four stations yielded a crop of altogether 11,386 bales, of 400 lb. each, against 4,567 bales from three stations last year. Out of these 11,386 bales we have sold to date 7,452 bales, and I need not tell you that the textile trade is at present in an extremely difficult and unsettled condition, and that consequently sales are not easy to effect.

Turning to our individual stations, I can report that Zeidab produced 2,124 bales, all of which are now sold. This year we have there a similar area under cultivation, and we have picked up to date about 9,000 kantars, which we consider highly satisfactory and constitutes a record at this date. From this you can gather that our prospects at this station for this season are very good indeed. At Tayiba we were worried to some extent with certain minor pests, but we cropped 1,398 bales, of which we have sold 1,015 bales so far. The new crop I can describe as promising to be up to fair average. From Barakat we were able to ship 1,937 bales, most of which are disposed of. On this station the new crop looks likewise promising, but it is too early to make a forecast. I now come to our new station, Hosh, where we had for our first year 6,040 feddans under cotton. The new crop came up to expectation, and yielded us 5,927 bales, of which we have sold 2,508 bales up to date. For this year we have 6,700 feddans under cotton, and the latest reports I have from there are that we may expect a fair average crop.

New Pumping Station.

We realised that we must train further English staff and native cultivators as a stepping stone to the greatly extended area which we shall have to manage a few years hence, and, anticipating at the end of last year that there would be some delay in the completion of the Blue Nile Dam at Makwar, we approached the Sudan Government with the proposal of erecting a further pumping station at a place called Wad el Nau. Thanks to the active co-operation of the officials of the Sudan Government, the necessary negotiations were speedily concluded, and our staff, as in the case of Hosh Station, working against time, succeeded in completing the preliminary works in record time before the rise of the Nile. The contracts for pumps, engines, etc., were given to British firms (all the machinery so far is coming forward up to time), and in July next year we hope to have an additional 10,000 feddans of cotton under cultivation. Gentlemen, this is a wonderful piece of work, and only possible when one has, as I am happy to say we have, a really first-class staff, and in this connection I wish to thank specially our manager, Mr. H. Poyntz-Wright, and our senior inspector, Mr. Archdale. Last, but not least, I wish to place on record the board's, and I feel sure I am right in adding the shareholders', thanks to our respected colleague in the Sudan, Mr. Alexander MacIntyre.

Makwar Dam.

At our meeting last year I made a statement to the effect that your board contemplated an early issue of 150,000 shares at a moderate premium. Gentlemen, almost as soon as I made this statement we changed our minds and made no issue, for the simple reason that we foresaw, as I have already stated, that owing to certain financial difficulties there would be a delay in the completion of the Makwar Dam, and consequently some delay in our own development work. Meanwhile you have no doubt read in the daily papers that these difficulties have been overcome, and our thanks are due to the British Government for their timely assistance, and we must congratulate the Governor-General of the Sudan, Sir Lee Stack, and the members of the mission, who carried through so successfully the important negotiations with the British Government.

THE ESSENCE OF INSURANCE IS SECURITY.

Digitized by Google

The eminent firm of Messrs. Pearson and Sons have secured the contract for the completion of the dam. In their able hands the work will now be brought to a final and speedy conclusion, and if all goes well we ought to have gravitation water on the Gezira Plan in 1925 or 1926.

New Issue.

Now, gentlemen, this means that we have to speed up our part of the work and spend money. We shall therefore proceed immediately with the issue of 150,000 shares, which will be offered to shareholders on the register of Tuesday, November 28, and shortly after that date shareholders will receive application forms showing the number of shares they are entitled to apply for—namely, one for every two held. Shareholders may renounce their rights to take up the new shares in favour of others if they desire to do so. Fractions of shares will be ignored. The price of the new shares will be 50s. This will constitute a further handsome bonus to all shareholders. On the other hand, this issue means that we increase our capital by one-third, and you will readily understand that it is difficult for your board to maintain the same standard of dividends in the immediately following year.

May I add that we are to-day only in our infancy? This year we have 10,000 acres under cotton in the Gezira; next year we hope to have 20,000 acres under cotton, which is a long step forward, but also a long way off the 100,000 acres we have to cultivate as soon as possible after the gravitation water arrives. It has always been our custom to take you fully into our confidence and to tell you exactly what passes through our minds. Therefore I add quite frankly that this is in all likelihood not the last time we shall call on you for further working capital. When next we need money from you it may or may not be practicable or convenient to raise it in whole or in part by a preference issue.

The headquarters of our immense undertaking are situated at Barakat, and are practically completed and paid for. My colleague, Brig.-General A. M. Asquith, paid a visit to our plantations early this year, and I have asked him to second the resolution I moved at the beginning of my address. He will tell you that our tenants are happy and contented, and also that we have a staff to be proud of and to whom I wish to extend our cordial thanks for their loyal and efficient work. I propose to go to the Sudan towards the end of this year, and spend some considerable time there for the purpose of looking into various matters on the spot.

Development of the New Area.

Gentlemen, I now crave your attention to a matter of great importance which I want to put before you. During the past few weeks the Sudan Government, through its representatives in London, has honoured your syndicate with an invitation to co-operate with them in arranging for the development of the Kassala district for the purpose of growing cotton on an extensive scale. The province of Kassala lies east of Khartoum, and is at present almost isolated as far as means of communication are concerned.

Last year your managing director in the Sudan, Mr. Alexander MacIntyre, and I, accompanied by Mr. Hewison, the head of the agricultural department of the Sudan, paid a visit to various likely cotton-producing districts in the Sudan, including Kassala. We were much impressed on this occasion with the fertility of the soil, but at the same time we formed the opinion that its exploitation from a commercial point of view was impracticable unless a railway was constructed from a point on the Port Sudan-Atbara main line to Kassala, a distance of something over 200 miles.

The town of Kassala—well known in history and particularly during the Mahdi's *régime*—is situated close to the frontier of Eritrea, an Italian colony adjoining Abyssinia, and a long and wide valley extends from there northward and towards the Port Sudan railway line. This valley receives every year, through the River Gash, which rises from the Abyssinian mountains, an immense amount of flood water containing a large percentage of the same sort of silt as the Blue Nile carries with it every year. This water arrives year by year in July, and its continuous flow lasts between two and three months, and so floods an extensive area in the above-mentioned valley for something like 50 miles northwards. Egyptian cotton of good quality and long strong staple is grown there every year to a limited extent, but limited only through lack of means of transportation. Up to now the cotton so grown has had to be carried on camels for a distance of over 300 miles.

Now, my colleague, Mr. MacIntyre, and I have had protracted negotiations of late with the representatives of the Sudan Government for the purpose of arriving at a practicable commercial basis for undertaking the systematic development of this area. In this connection I desire to take the opportunity of tendering my sincere thanks to Sir James Currie, the Director of the Empire Cotton Growing Corporation, and also to Mr. Himbury, of the British Cotton Growing Association in Manchester, for much valuable advice and support. I trust that both these institutions will see their way to take a financial interest in this new expansion of cotton growing in the Sudan.

Kassala Cotton Company.

I am happy to say we have arrived at a provisional agreement regarding the terms. Some details have still to be settled, but the essential points are that there is a prospect of the early commencement of the construction of a railway to Kassala, and that a concession for growing cotton will be granted by the Sudan Government to a new company to be called the Kassala Cotton Company. This concession would be based to some extent on the old Gezira agreement, establishing a kind of three-cornered partnership as between the Sudan Government, the Native Cultivator, and the new company, that is to say, the Kassala Cotton Company. In this Kassala Cotton Company the Sudan Plantations Syndicate will take a substantial interest, and to a certain extent any one of you who wishes to subscribe towards the capital of the new company will have an opportunity of doing so. This is as far as I can go to-day.

What I want you to realise is that the cultivation of cotton in this Kassala district is an entirely different problem from our work in the Gezira, and that it requires careful, steady and cautious development.

The cotton in the Kassala Province will be planted after the cessation of the annual flood, and receive no further watering except what we may get by natural rainfall. The yield per acre will, in those circumstances, not come up to what we get in the Gezira, but notwithstanding this, the possibilities are considerable, only one must not expect too much during the first few years. The new company's greatest problem lies in the distribution of the flood water, and in its direction into the most suitable areas.

In bringing my remarks to a close, I would just like to say this, and without a trace of vanity, that I am proud to be connected with work of such absorbing interest, that I am proud to have something to do in trying to add further, and, if possible, lasting prosperity to the Sudan, and, lastly, I feel proud to be the chairman of your syndicate, which is thus rendering a service to our Empire by augmenting its supply of raw cotton from within.

Brigadier-General A. M. Asquith, D.S.O., seconded the motion, which was carried unanimously, and the dividend and bonus recommended were declared.

The retiring directors (Mr. J. Arthur Hutton and Mr. Fredric Wise) were re-elected. Messrs. Cooper Brothers and Co. were re-appointed auditors, and a vote of thanks to the chairman and the other directors concluded the proceedings.

BENGAL-NAGPUR RAILWAY.

Prospects for Current Year.

The sixty-fourth ordinary general meeting of the Bengal-Nagpur Railway Co., Ltd., was held on November 2, at Gresham House, Old Broad Street, E.C., Mr. Robert Miller (the Chairman) presiding.

The Chairman said that the gross earnings for the past year were Rs. 677 lakhs, which gave an average of Rs. 482 per mile per week and Rs. 5.63 per train mile. These figures were the highest on record for the undertaking. Passenger traffic continued to show an increase in numbers, though the total receipts fell slightly short of the figures of the previous year, being Rs. 188.7 lakhs, as compared with Rs. 191.5 lakhs. During the year now in progress, 1922-23, the company had obtained sanction to raise passenger fares. Goods traffic showed a falling off in tonnage and an increase in freight, the figures for public traffic being in volume 7,611,308 tons and in freight Rs. 3,92,90,312, as compared with 7,717,815 tons and Rs. 3,76,77,094. The working expenses during the year were Rs. 4,84,29,146, absorbing 71.53 per cent. of gross earnings, as compared with Rs. 4,24,08,509, absorbing 66 per cent. of gross earnings. The amount was admittedly very high, and would no doubt be regarded as serious if it were indicative of a permanent alteration in the normal rate of working expenses. That, however, was not the case. Though there was some increase in operating expenses, which had come to stay, it was not large. The bulk of the increase occurred under maintenance and renewals, mainly rolling stock, and was due to an unusually large number of engines having been repaired, to more coaches than usual having been repaired, to heavy repairs done to a large number of goods vehicles and to an adjustment against working expenses of the cost of 135 American wagons put on the line, being part of a consignment obtained by Government and later apportioned to various railways. The working expenses of the current year were estimated to show a decrease in the percentage of gross earnings absorbed in working from 71.53 to 60.14, which was less than the percentage (65.98) of 1920-21, and not much in advance of the percentage of 1919-20—namely, 58.54.

Digitized by Google

The direct effect of the heavy outlay on working expenses was shown in the net earnings, which fell to Rs. 1,92,71,087, as compared with Rs. 2,18,57,718 in the previous year, a difference of Rs. 25.87 lakhs. This shortage by itself was nothing much to worry about, but, unfortunately, the abnormality of the year was not confined to working expenses, and reappeared in the charge on net earnings for interest on capital, where under the influence of the rapid decline that occurred in the exchange value of the rupee the charge for sterling interest paid during the year in this country (amounting roughly to £500,000) was converted into rupees at an average rate of a little over 16d. to the rupee, as compared with an average rate of about 25d. in the previous year. This decline in exchange had the effect of increasing the rupee equivalent of the sterling paid by Rs. 25 lakhs. During the present year the downward tendency of exchange had been arrested, and the value of the rupee had varied between 15$\frac{3}{4}$d. and 15$\frac{1}{4}$d., so that the element which disturbed the financial net results of the undertaking during 1921-22 was unlikely to operate in creating any appreciable rise in the rupee equivalent of sterling interest charges since made.

The gross earnings of the current year were expected to be something like Rs. 100 lakhs ahead of the corresponding figures for 1921-22, while the working expenses were estimated at some Rs. 20 lakhs less than those of last year. The periodic returns from India indicated that expectations as to gross earnings would be fully realised, the approximate figures for the half-year ended September 30 last being about Rs. 54 lakhs in advance of the figures of the corresponding half of the previous year. At the same time the expenses were likely to be a little less than the estimated figures. It was on the strength of these facts that the directors had felt themselves fully justified in recommending the payment of a dividend from reserve.

The development of industries in India had not increased to the extent that might have been expected. One cause of this retardation arose out of the fact that various industries which were started some two years ago failed to come up to expectation, with the result that capital for industrial enterprises could not at the present time be raised in India. Moreover, this reluctance of capital to invest in industrial enterprise had been aggravated by the large loans raised by Government on very favourable terms to the investor. With reference to the development of the company's main sources of traffic—namely, coal—stockholders would be interested to hear the progress that had been made in the opening out of the new Karanpura and Talchir coalfields—two great fields widely apart and of great value to India. The development of the Karanpura field had progressed rapidly, and the Mohuda branch line of this company was now in course of extension to this field. It had now been established that the Talchir area contained a large tonnage of excellent coal sufficient to justify the immediate construction of a branch line from a point near Cuttack to open the field out.

The report and accounts were unanimously adopted.

COMPANY NOTES AND REPORTS.

Egyptian Consolidated Lands.

The report of the Egyptian Consolidated Lands for the year to June 30 states that on Kom-el-Akhdar estate sales totalling 100 feddans were made, at the average price of £E89 per feddan. About seven feddans reverted to the company owing to cancellation of previous sale, leaving the area unsold of 1,293 feddans. Of unsold land about 350 feddans are under cultivation and ready for sale. Towards the end of the year the scheme was put into operation for advertising and developing Rodah Island building estate, and as a result sales had been made before the close aggregating 4,414 square metres, at an average price of approximately £E1.4 per square metre. Two houses have already been built and two villas are in course of construction. In order that the company should retain full advantage of the development scheme, further plots of land adjoining the original property, representing 50,000 square metres (exclusive of roads), were purchased on satisfactory terms. The total area held at June 30 last was 135,678 square metres, exclusive of roads. A number of financial transactions of an investment nature were entered into during the year and have proved remunerative. Meeting, Winchester House, E.C., November 14, 12.30 p.m.

Bengal Dooars Railway.

The net earnings of the Bengal Dooars Railway Company for the year ended March 31 amounted to Rs. 5.58,189 (against Rs.5,99,435). The net revenue account shows a credit balance of £63,024, of which the interim dividend absorbed £8,000. It is proposed to pay a final dividend of 5 per cent. on the ordinary stock, less tax, making 7 per cent. for the year, the balance of £40,024 being carried forward. The dividend for the previous year was 6 per cent.

COTTON TRADE REVIEW.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended November 4 states:—

General.—Although raw cotton has maintained the strength shown recently, it cannot be said that this has imparted a better tone to this market, which remains in a dull and lifeless condition. Neither in the large consuming centres in the East nor in Manchester does there appear to be any conviction that the rise is justified by the state of trade or that it can be maintained for very long. Spinners and manufacturers here have been obliged to quote higher rates in order to cover themselves, but it is doubtful whether, on transactions actually concluded, they have been able to obtain the full amount of the advance. The main interest continues to be centred in the various suggestions put forward from time to time for dealing with the very unsatisfactory state of affairs prevailing.

Yarn.—Business continues to be very limited, and such as is negotiated is mainly in small lots. The organised short time inaugurated a month ago has not had the effect of entirely clearing the accumulated stocks, but the probability is that these are now smaller than for a little time back.

Cloth.—As in so many weeks recently, inquiry has been on a fair scale, but quite out of proportion to the business which results. It does not appear likely that buyers abroad, who refused to operate when raw cotton was 2$\frac{1}{2}$d. per lb. cheaper, are going to do so now. There is little doubt that many of the purchases made on the lower level were of a speculative nature, and the rise has, under the circumstances prevailing, made further similar transactions unattractive. There has been a little more life in the China section, but India is, as usual, the biggest buyer. It is said that Egypt and some of the Balkan countries have made rather freer purchases.

Raw Cotton.—As stated above, this market has been firm. Spot sales in Liverpool have been on a moderate basis, but there still appears no specific reason for the continued rise in prices, reports with regard to the crop showing practically no change. Closing prices are as follows:—American Fully Middling, 14.66; Egyptian Fully Good Fair, 17.75.

BULGARIAN INDUSTRIES.

Bulgaria is represented at the exhibition at St. Albans organised by the League of Nations Union, which was opened on November 6, and will continue until November 14. We have received from the Bulgarian Legation a statement regarding that country's exhibits, from which we give the following:—

The standard of the exhibition does not allow the participating countries to be represented as fully as they have been in other cases. Nevertheless, the Bulgarian Government have endeavoured to make the best, though restricted, choice of material and articles designed to give to the visiting public a definite idea of her special handicrafts and industries, which differ from those of the neighbouring countries, and are the basis of her commercial and economic prosperity.

Among her national industries Bulgaria gives the first place to the production of attar of roses and the cultivation of tobacco. It has often been the case that attar of roses exported by business profiteers has been mixed with geranium essence with marked prejudice to its value and reputation abroad. The St. Albans exhibition gives an opportunity to the Bulgarian Government to export for the first time the most pure attar of roses, prepared and distilled under strict control of Government authorities. Attar of roses will be sold at the exhibition in small flasks.

As for the tobacco industry of Bulgaria, it is thriving apace, and it is represented at St. Albans by tobacco leaves and manufactured cigarettes. The Bulgarian tobacco growers hope that the attention of specialists may be drawn to the excellence of their exhibits.

It is well known that although a country of modern aspirations, of culture, there still remain in Bulgaria signs of her traditional history in the preservation of original and often very artistic national costumes, models of which were exhibited with success during the last year in Geneva. National costumes are to be seen at the St. Albans exhibition, and embroideries—many of which date from fifty or sixty years, in a few cases even a hundred—are being shown.

It will be possible to purchase rare and precious examples of the work of Bulgarian peasantry, and more modern reproductions of silk, china, and wooden handicrafts. In connection with the above exhibits the flourishing industry of carpets and rugs will prove of interest if judged by the specimens sent from Bulgaria.

NOTES OF THE WEEK.

Nationalist Turkey.

A few weeks ago a substantial section of Europe was prepared to see in Nationalist Turkey a new and welcome factor in the rehabilitation of the Near East. Inspired by keen patriotism, and realising the shortcomings of the old Turkey, the Kemalists, it was supposed, would hasten to range themselves with the Powers of Europe and to show that they possessed other and more practical qualifications for their new rôle in the family of nations than a capacity to inflict defeat on a weak army. What Angora has succeeded in doing is to convince the world at large that, unless sanity and sobriety succeed at once to arrogance and fanaticism, the new Turkey will have to be classed in the same category as any undeveloped Asiatic State—a factor that cannot be ignored, but on an inferior plane to that occupied by the bulk of civilised countries. A wonderful opportunity has been lost in Angora, and the most charitable explanation to offer is that Mustapha Kemal chose his best material for his representatives abroad, and has so weakened his own position at home that he has been entirely overruled by the extremists among his followers. Even Rafet Pasha, sent as Kemalist autocrat to Constantinople, has entirely belied the opinion previously formed of him, and has made no attempt in his dealings with the Allied High Commissioners to modify the senseless aggressiveness of Angora tactics.

A Suicidal Policy.

The Angora authorities have overlooked the fact that normal intercourse between civilised States is based on the principle of reciprocity and good faith. Old Turkey would have nothing to do with this principle, and became the Sick Man of Europe. As a result of the upheaval caused by the Great War and the subsequent difficulties of a post-war settlement, Turkey has been given a fresh lease of life; but history can hardly fail to repeat itself, if the events of the last few weeks are to be the measure of Nationalist Turkey's statesmanship. In the course of a weighty indictment Lord Curzon characterised their actions as "a policy of Nationalism gone wild, a policy almost suicidal in its character," for in banishing, exporting, or exterminating the non-Turkish populations of Asia Minor, the Turks are sweeping away all that is essential to their agriculture, their industry, and their very existence, simply because the people are not Turks. Their actions in Constantinople and their attitude towards the Allies are equally prejudicial to their own interests.

The Lausanne Conference.

With things as they are in Constantinople it is highly regrettable that there should be any delay in the meeting of the Peace Conference at Lausanne. The Allies, however, have not yet agreed upon the common front that in their own interests and in those of Europe they ought to present to the Turks. In view of the General Election taking place on November 15, the British Government had a strong case for desiring that the Conference should open at a later date; but every effort ought to have been made at least a fortnight ago or earlier to decide with France and Italy upon a joint policy. On this point there would seem to have been delay that might have been avoided. No doubt France has been difficult in the matter; but there was a strong case for expediting the Conference, and, with a common policy settled, it would have been possible to have the opening day, as arranged, on November 13, and to have postponed the first business session until a day or two after the General Election in Great Britain. At the moment of writing, the Conference cannot now begin until November 20, and in some quarters the fear is entertained that it may not meet because of France's refusal to agree to a common policy beforehand.

The Changes at Constantinople.

Events at Constantinople have followed one another so swiftly during the past week, and Nationalist Notes to the Allies have been presented at such short intervals, as to be almost bewildering to anyone in this country who has attempted to follow the situation there at all closely. It may, therefore, serve a useful purpose to endeavour to disentangle the principal events, and to set them down in their sequence, without comment. The situation at the beginning of last week was that Angora had announced its intention of replacing

Digitized by Google

the present Khalif by one of its own choice, had decided not to recognise the Government of Constantinople, and had informed the Allies that it considered as null and void all treaties, conventions, and contracts concluded by the Constantinople Administration since March 16, 1920. Then came the staggering "request" for the immediate evacuation of Constantinople by the Allies and the handing over of its control to the Nationalists. The Allied High Commissioners returned an emphatic refusal to the request; but the Kemalists were able to extend their control swiftly, because the former officials and functionaries went over to them almost *en masse*. The Senate was dissolved, and the police were put into Kemalist uniforms forthwith.

Dangerous Days.

The High Commissioners had informed the Angora representatives that if a Nationalist administration were to be installed in the capital, it must be subject to the same restrictions as the late administration. The Nationalists, however, paid no heed to this warning; on the contrary, they proceeded to "suppress" the Allied Mixed Tribunal and the Sanitary Commission; and they also interfered with the Ottoman Debt and the Allied Provisional Financial Control Commission. Meanwhile they had despatched a second Note to the Allies, suggesting that ships wishing to pass the Straits should obtain permission from them (the Nationalists), and that ships in port should salute the new Government. On November 8 an answer to the Allied Note was received in Constantinople from Angora. It repeated the demand for the withdrawal of Allied troops and Allied ships of war, the presence of which was described as incompatible with the administration of Constantinople by the Kemalists. Nationalist encroachments on the public services still continued; the Customs was seriously interfered with, and disorders occurred in many parts of the city. At the same time it was reported that the Turkish forces at Chanak were showing a very aggressive spirit towards the British.

Angora Unyielding.

The news received on Thursday and Friday was rather less disturbing. Rafet Pasha, it was reported, had promised the Allies that some of the more far-reaching of Angora's demands would be cancelled. On the other hand, what were described as the Angora Peace Terms, which were presented to General Pellé, were certainly startling. It was announced that the Allied authorities had been authorised to proclaim martial law if they considered it necessary; that a British soldier had been killed in a conflict with Turkish police; and that telegraphic communication between Constantinople and London was interrupted. On Saturday (November 11) we learned that Rafet Pasha's suggestions to Angora for co-operation with the Allies in the administration of the city had been rejected at Nationalist headquarters; while the Allies' communications regarding the Customs and the Courts remained unanswered by Angora. Ismet Pasha, who left Constantinople for Lausanne on November 10, had two days earlier complained to General Harington of "the constant adjournments of the Peace Conference"; and, according to Paris reports, it was probable that the Turkish delegation might take advantage of any delay in the assembling of the Conference to go on to Paris, where "M. Poincaré could not refuse to receive them." The news of the week closed on a more hopeful note; for it was announced that, as the result of an interview between the British, French, and Italian officers in charge of the Inter-Allied police and gendarmerie on the one hand and Rafet Pasha on the other, "the situation was considerably less strained."

Good News from Belgrade.

The calmness and confidence shown by M. Nintchitch, Yugoslavia's Foreign Minister, in regard to the change of Government in Rome have been fully justified so far. Signor Mussolini has sent him an extremely cordial message, assuring him that relations between the two States will be consolidated into cordial friendship. M. Nintchitch has replied equally cordially, and it is to be hoped that the goodwill expressed in these telegrams will translate itself into wise action, to the mutual benefit of Italy and Yugoslavia. Besides this satisfactory news, Belgrade is able to report that the visits of the Greek Foreign Minister and of the Bulgarian Premier have both produced good results, which should help forward the peace of the world. As to Greece, she and Yugoslavia have renewed the Salonika Convention of 1914, and have agreed to a commercial treaty; while Yugoslavia will lend her support to Greece at the Lausanne Conference, and the question of minorities is to be put upon a satisfactory basis. Trustworthy details of the understanding reached between M. Stambolisky and MM. Pashitch and Nintchitch are not yet available; but it is stated that the result of their conversations is entirely satisfactory to both parties, and that the questions of the Bulgarian outlet to the Ægean and of the future of Western Thrace were discussed.

Yugoslavia's Armaments.

A Belgrade telegram of November 12 announces that "the National Assembly in secret session has voted a credit of 800,000,000 dinars [£3,200,000] for armaments." The Minister for War was careful to explain that the intentions of the Government were most peaceful, but that it was necessary to be prepared to ensure execution of the peace treaties. The armaments asked for, it was also explained, were only those of "normal necessity," and it was purely coincidence that caused the estimates to be brought forward at a time when complications in the Eastern situation were manifesting themselves. The same line was followed by the Foreign Minister and by M. Pashitch, who supported the Minister for War, and it is possible that the National Assembly allowed itself to be convinced. Outside Yugoslavia, however, regret will be felt that such a large sum should be voted for armaments for a country that has already spent so much on the same object since the War, and that has an army of which it may be thoroughly proud, and which is surely equal to any call that is likely to be made upon it in the near future. Yugoslavia is sometimes accused of showing a militaristic spirit. We should be sorry to believe that that accusation was well founded, but we fear that Sunday's vote will do nothing towards dispelling the uneasy feeling, and that in some foreign countries there will be jests made on the subject of strange coincidences.

Ignorance and Prejudice.

Under a galaxy of headlines, headed by the words "Mesopotamia Waste," the *Daily Mail*, with the help of a special correspondent, tells its readers what the late Colonial Secretary had informed them many months ago, that British expenditure in Iraq for the current year amounts to £8,000,000. Mr. Churchill added—but the statement is not repeated in the *Daily Mail*—that this expenditure might shortly be reduced to £4,000,000. No one will contend that there is not room for effecting economies in Iraq, but a survey of present conditions can lay no claim to being "dispassionate" if it does not take into account how and why the British come to be in the country. The expenditure of any country could be indicted with equal effect if the reason for any expenditure at all is ignored. The *Daily*

Digitized by Google

Mail makes no mention of the fact that it is not Iraq's fault that an armed enemy, theoretically at war with Great Britain, stands on her northern frontier, and that the cost of building up an army to relieve a much larger force must necessarily be disproportionate to the number of men under arms in the earlier stages. For the Royal Air Force Iraq is probably the finest training ground in the world, apart from being an indispensable base, if ever the air is to be a factor in the defence of the British Empire. Of this the *Daily Mail* says nothing, but inveighs against the cost. For the reader who may be scared by headlines there is one crumb of comfort: "A better feeling," we are told, "has prevailed (in Iraq) since the signing of the treaty of alliance with Great Britain (on October 9)." As the correspondent, in order to reach Marseilles on November 11, must, unless conveyed by air to Cairo by the Air Force that he seeks to belittle, have left Baghdad only a few days after the signing of the treaty, this early acknowledgment of a new spirit goes far to invalidate the basis of his report. It would be an ill day for the Empire if British policy were to be dictated by the slapdash considerations that the *Daily Mail* commends to Parliamentary candidates.

THE WEEK AT HOME.

London, Monday Evening.

The Election.

Political speeches continue, but there is nothing really new in them, and most people—candidates certainly and constituents probably—will be glad when the end comes on Tuesday night. Wednesday is polling-day, on Wednesday night and Thursday morning the votes will be counted, and we shall know the best and the worst by Thursday evening.

The Conservative reports remain good, the Liberals are even more enthusiastic; Labour, except in Scotland, is still rather pessimistic. But all these forecasts are based on fragmentary evidence, and it is difficult to believe there is very much substance in them. What is certain is that party labels and orthodoxy have not quite the same power as of old, and the electors will many of them indulge in the luxury of making up their own minds who is the best man. The results may be curious.

New Appointments.

Mr. Bonar Law has issued his final list of appointments, and all the minor offices are now filled. Two things are noticeable about the personnel of the new Ministry. The head is a Scot, but there are hardly any other Scots in it, apart from the Secretary for Scotland—who happens to be a Liberal. (It looks as though Mr. Law was not convinced of the safety of too many seats North of the Tweed.) On the other hand, there has not been a Government for many years which has had so many Yorkshiremen.

It used to be said ten years ago by exultant Radicals that Toryism could only flourish in the soft atmosphere of the South, and that what was picturesquely called "the platform of progress" was all-powerful in the North. However that may have been in the heyday of Tariff Reform—which nobody liked in Yorkshire and Lancashire—the solid underlying Conservatism of the North is now rallying strongly to the new Government.

The Government Programme.

Mr. Law is still being attacked for having no programme: somebody said the other day that he had even left his Ulster at home. The Liberal Press is talking about Tory reaction in quite the good old way, and predicts that the Die-Hards will compel the Prime Minister to repeal the Parliament Act. But Mr. Law remains good-naturedly deaf to these taunts, and he will open the new Parliament free from awkward pledges—the carrying of the Irish Free State Act always excepted. That is, of course, an obligation of honour which he inherited from his predecessors.

The Honours List.

Mr. Lloyd George's last honours list was quite unexceptionable. Lord Birkenhead becomes an Earl, Lord Lee a Viscount, Sir E. A. Goulding and Sir Joseph Maclay leave the Commons for the Lords, Dr. Walford Davies and Dr. R. R. Terry receive knighthoods for services to music, Sir Hall Caine and Mr. Winston Churchill—a quaint pair—become Companions of Honour. There are no journalists, authors, nor actors. The late Government seems to have made a death-bed repentance and to have expired in a mood of unwonted discretion.

Mr. Conrad's Play.

The London playgoer is really incorrigible. "Chu Chin Chow" lasted six years, and was only taken off, according to the story, because the actors felt their brains were beginning to go. Last week Mr. Joseph Conrad put on a play. It was powerful, a really considerable drama, worthy of its author's reputation. The critics did not know what to make of it and showed their embarrassment, "praising with faint damns"; the public ignored it, and, after a few nights, it was taken off. Mr. Conrad has taken his disappointment philosophically, and the metropolis troops to revues with lots of legs, back and chest, with a little dialogue thrown in. That is the contemporary stage. It is almost worse than the cinema, if that is possible.

Newspaper Insurance.

There seems to be a great pother again about newspaper insurance. The *Evening Standard*, which does not insure its readers against breaking their necks, railway disasters, peritonitis, twins, or any of the other evils that flesh is heir to, has been publishing some illuminating articles on the working of these schemes. It seems that the conditions are so strict that very few claimants ever get their money, and the insurance is, in effect, worth very little. As you pay nothing for it, I cannot see that you are entitled to grumble, but naturally people do, and both newspaper and insurance company suffer from the suspicion of sharp practice.

Apparently both sides are sick of it, and the game is not worth the candle; but it will not be an easy matter for Fleet Street to drop it, as the insuring newspapers have undertaken certain contractual obligations to their readers. I should never be surprised to see some big law case arise out of this practice.

Some Recent Books.

If I were an American I should not like "Babbitt" (Jonathan Cape), by Sinclair Lewis. It is a description by an American of business and social life in Zenith City, and a Yankee assures me that it is (to use his own words) "too damnably true." It is extraordinarily clever, and the satire is bitter. But I think I would sooner live in some of the milder circles of the Inferno than in the atmosphere of Zenith City.

"Modern French Philosophy" (T. Fisher Unwin), by J. Alexander Gunn, is an admirable summary of recent Gallic thought, which the author claims, and justly, has hardly had the attention paid to it that it deserves, while German philosophy has been perhaps rather over-esteemed. The book is not confined to the discussion of sub-

Digitized by Google

jective and objective or those other metaphysical matters which drive ordinary people to despair, but includes a full discussion of clerical and anti-clerical movements, and some reference to French theories of the State. With due deference to the mysteries of philosophy, I will admit that I found this the most interesting section of the whole work.

"The Private Diaries of Sir Algernon West" (Murray) is a posthumous sequel to the evergreen recollections of the same author published some years ago. These last records of the man who was known as the "Deputy Prime Minister"—so indispensable was he to Gladstone—will be essential to a full knowledge of politics in the late eighties and early nineties. They give an extraordinary picture of the last Gladstone Government, with Morley and Harcourt not on speaking terms, ignoring each other at Cabinet meetings, and even quarrelling on the Government bench in full view of an astonished House of Commons, while the relations of Harcourt and Rosebery were, if possible, even more strained. Harcourt was indeed an impossible person. There are further details, too, of Gladstone's reluctance to resign, when the whole Cabinet expected it, and of Queen Victoria's frigid farewell to her great Minister. One further point: When Tennyson died, there was a dispute as to his successor in the Laureateship. The Prince of Wales (afterwards Edward VII.) wished for Swinburne but this was thought impossible on account of his republicanism; somebody suggested Bridges, the present holder, but nobody else knew anything about him; eventually Alfred Austin, a leader-writer on the *Standard*, was appointed, to the general amazement. When Lord Salisbury was asked why, he replied: "Because he asked for it!"

A curious and interesting little book is "Lives Enshrined in Language" (Walter Scott Publishing Co.), by the Rev. T. Stenhouse, a record of surnames that have become ordinary substantives. To boycott, as is well known, is derived from Captain Boycott, an unpopular Irish land agent; July and August are, of course, named after Julius Cæsar and Augustus; but Mr. Stenhouse has discovered that "coal miners talk about their "sankey"—a certain percentage of wages awarded on arbitration by Judge Sankey, whose name bids fair to be included in our language as a common noun. Whitley and Whitleyism is another instance, like Cobdenism; and the author suggests that in some future dictionaries we shall find such entries as:—

"To bradbury: to cozen; to give a worthless thing in exchange; to be wastefully extravagant; to plunge: compare to fisher: to gull; to deceive." This is a little hard, one fancies, on Mr. H. A. L. Fisher. A more suitable example would have been: "To macnamara: to continue for ever doing much the same thing but achieving nothing."

A certain number of people still read Hazlitt, and the literary critics still swear by him. For that reason, the "Life of William Hazlitt" (Martin Secker), by Mr. P. P. Howe, seems sure of a welcome. I have glanced through some of the chapters, and although I cannot confess to any enthusiasm for a writer who seems to me both overrated as a critic and a rather bad-tempered person as a man, I must confess that the biography is well done.

"The Coming of the Fairies" (Hodder and Stoughton), by Sir Arthur Conan Doyle, is a documented and illustrated account of the fairies with which the author of Sherlock Holmes startled the public a few years ago. Sir Arthur, I understand, firmly believes in the veridical existence of these beings, whose "normal working body" is a luminous cloud of colour, lighter than gas, but which, under the influence of sympathetic human environment, may assume a diminutive human form In England, I gather, "the emerald green kind is probably the commonest," while the South and West of Ireland is inhabited by an "intensely active and mischievous little red and black race." But the author admits that it is "easy for us who respond only to the more material vibrations to declare that all these seers are self-deluded," and it appears that a highly-developed intellect is in itself "a bar to psychic perception."

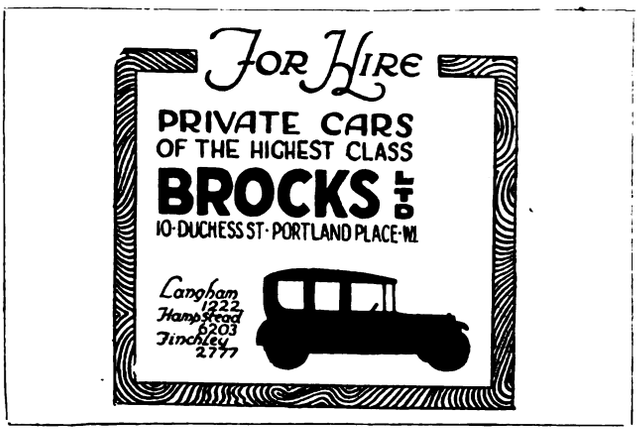
"H. G. Hawker, Airman" (Hutchinson) is a very interesting detailed account of the brilliant career of the great airman. The book is likely to become something more than a classic of flight, for it appeals to the adventurous in man. Unlike most airmen, Hawker had no superstitions, but he appears to have been a convinced Christian Scientist.

"Peradventure, or the Silence of God" (Constable), by Robert Keable, is a new novel by the author of "Simon Called Peter," which long since reached the dimensions of a best-seller. As its title indicates, it is a novel with a religious interest; and it is less preoccupied with sex than its predecessors. It is likely to become the "Robert Elsmere" of the time, but, to be quite honest, I prefer Mr. Keable to Mrs. Humphry Ward.

"The Wandering Years" (Constable), by Katharine Tynan, contains many interesting recollections. I quote one rather cruel anecdote. Tennyson was once caught with Lady Ritchie and other ladies in a shower, and unluckily the party only possessed one mackintosh. "I had better take that," said the poet, wrapping himself in it, "for my life is the most valuable."

The publishers are now issuing the puffs preliminary of the autumn season, and the usual crop of immortal masterpieces is promised. Several books are held over from the spring, when a strike made business difficult, but I gather that a good season is anticipated. The publisher, like the farmer, always loses money, and only continues in business from patriotic motives, but he manages to keep reasonably cheerful under the prospect of impending ruin.

OCELLUS.



The Greek Government has decided for reasons of economy to suppress the Legations at Berlin, Vienna, Madrid, Tokyo, Petrograd, Copenhagen, Christiania, Brussels, The Hague, Stockholm, Warsaw, and Durazzo.

The Viceroy of India left Simla on October 20 for a tour of Central India, during which he will invest with ruling powers the Maharaja of Rewa. Early in December the Viceroy proceeds to Calcutta for a long stay.

Owing to the unsettled state of affairs in Greece, the negotiations between the Vatican and the Greeks for the conclusion of a concordat have been indefinitely postponed.

The Near and Middle East.

From Our Own Correspondents.

TURKEY.

Constantinople, October 30.

The Evacuation of Thrace.

The evacuation of Eastern Thrace is being carried out in strict accordance with the dispositions of the Mudania Convention, in spite of the very serious difficulties arising from insufficient means of transport. Were the Greek army in Thrace alone concerned, the problem would not be so difficult, but in a country possessing only one railway line, the transference of an entire population numbering over 200,000 souls, in addition to the army, must necessarily involve terrible suffering and hardship when carried out in the space of a few short weeks. Further difficulty has arisen in regard to the removal of this year's wheat harvest, which is estimated to amount to about 60,000 tons. There is not enough transport to permit the removal of all the grain as well as the army and the population, and while the Greeks need the grain to feed the refugees, its removal will certainly aggravate the food shortage which is beginning to be felt already in Constantinople owing to the cessation of business on the part of Greek and Armenian importers, uncertain of their future. The Committee of the League of Nations is understood to have been negotiating for the purchase of the grain, but up to the present the matter is still in suspense.

The Kemalist gendarmerie will, in the course of the next few days, be installed in the "redeemed" province, and the sequel will be awaited with interest and trepidation, for, in spite of the wholesale emigration of the Greeks, a small percentage of the population will probably prefer to risk anything to abandoning the native hearth. The attitude of the new Turkish administration towards this small remnant will afford some small indication of what the Christians of Constantinople may expect when their turn arrives.

The League of Nations.

It would be unfair to omit some tribute of acknowledgment to the League of Nations in connection with the agony through which so many hundreds of thousands of inoffensive people are passing in this tortured corner of the world. Dr. Nansen and his committee are working night and day to alleviate the suffering of the refugees, and well deserve the support of all humane people. One thousand tons of flour have been purchased in Bulgaria, 500 of which have been sent to Constantinople, which is one of the principal distributing centres. Another 500 tons of Australian flour purchased in Egypt have been sent to Samos, which will be the supply centre for Mitylene and Chios. Dr. Nansen also expects to meet Mustapha Kemal Pasha at Brousa in the near future, for the purpose of discussing plans for the reconstruction of the devastated areas of Anatolia. The importance of the League's work in Turkey and the Balkans cannot well be measured, for a precedent is being established which may in the future permit the League to be the means for the solution in a humane and peaceful manner of still other arduous problems. Once confidence in the League is established, it may at last be possible to bring some reasonable measure of peace and tranquillity to the unhappy peasants of Turkey and the Balkans, who have for too many centuries been the victims of wars far beyond their own seeking.

The New British Cabinet.

In Turkish circles the fall of Mr. Lloyd George's Cabinet is attributed to the late Premier's mistakes in the Near East, and, in view of Mr. Lloyd George's undisguised predilections, it is not surprising that the change of Government should have been hailed with joy. Curiously enough, the general satisfaction is not based so much upon a feeling of confidence that Mr. Bonar Law's policy will be weaker in regard to Turkey, but that the methods of the new Administration will be very different, and that honesty will be substituted for bluff. The following extract from a recent issue of the official Angora paper, *Hakimet-i-Millie*, is, perhaps, the most succinct expression of Turkish sentiment in the matter.

> Bonar Law is a personality of well-known experience, and the present changes in England are not merely changes of personality, but changes of conception, methods, and party. It is the Conservative Party which to-day succeeds the Liberals, who have always been hostile to us, whilst the Conservative Party has always been friendly to us. We cannot nevertheless assume that British foreign policy will at once change to our advantage, and we must wait for Bonar Law's political programme before we can form an idea of the policy he intends to follow. There is, however, a great advantage in the retirement of Mr. Lloyd George.

Rafet Pasha in Constantinople.

Rafet Pasha, who has been appointed Special High Commissioner for Thrace by the Angora Government, has been having a very busy time in the capital, and has probably broken the record for the number of visits made by any official personage in one day. On the 29th inst. he was received in audience by the Sultan, and, although nothing is positively known as to the subject of conversation between the Sovereign and the Nationalist leader, it may be safely surmised that the Sultan's position and that of the Imperial delegates at the Peace Conference formed at least an important item of the conversation.

The Angora Government's Peace Terms.

Now that the Angora Government is more certain of its position, the National Pact is being explained in more detail, and readers of THE NEAR EAST will find that the statements made by the writer in this connection upon several occasions will be fully borne out. In regard to the Capitulations, for instance, these are regarded by the Angora Government as definitely abolished, and it is doubtful whether the Turkish delegates will be authorised to discuss the matter, although it is possible that they may be prepared to consider entirely new proposals bearing upon the juridical status of foreign subjects in Turkey. They will certainly not be prepared to proceed very far in that direction, however. The British Government will also be faced with a demand for the reconsideration of the entire Iraq situation, for Mosul is claimed as essentially Turkish territory on the grounds of the Kurdish majority of the inhabitants, and because the Kurds have adhered to Turkey.

Digitized by Google

The recognition of the Palestine mandate will also involve peculiar difficulties. It will thus become more and more clear that peace with Turkey is by no means a problem of which the territorial factor is the principal issue. It should also be remembered that the terms to which the Greeks will be asked to submit include the suppression of the Greek fleet, the payment of a heavy indemnity, the neutralisation of the islands of Mitylene, Chios, Imbros, and Tenedos, the surrender of Turkish prisoners and the retention of Greek prisoners as hostages, and the attribution of Thrace in accordance with a so-called plebiscite based upon the population of that province prior to the Balkan War! If the Kemalists insist upon these terms, which the Greeks will certainly resist, will the Allies make their own terms and leave Turk and Greek to fight it out in the Balkans?

The French Chamber of Commerce.

The sequel to the issue of the circular of the French Chamber of Commerce in Constantinople mentioned in a previous letter has been the resignation on October 27 of M. Ernest Giraud as President and member of the Chamber. M. Giraud has been connected with the Chamber for thirty-five years, and for thirty-two years has been the sole editor of the invaluable *Revue Commerciale du Levant*. There is reason to believe, however, that the matter is not altogether at an end, but that there will be some resounding echoes in the French Parliament.

Constantinople, November 6.

Evolution or Revolution?

A full account of the events of the past week is not yet available, and it is consequently difficult to judge with accuracy the degree to which the Great National Assembly may have been influenced in their decisions by other than purely political considerations. It certainly seems strange that after three days and two nights of constant and violent debates, the Assembly should have voted *unanimously* in favour of the resolutions abolishing the Government of the Sultanate. According to the account of the opening debate on the subject of the relations between the two administrations, matters were brought to a head by the telegram addressed by Tewfik Pasha to the Great National Assembly of Angora, urging that the presence of delegates of the Sublime Porte at the Lausanne Conference would be an advantage and even a necessity. At the beginning of the debate, on October 30, Mustapha Kemal Pasha, who presided in person, first read a previous telegram from Tewfik Pasha, dated October 17, sent through the agency of an unnamed individual in Constantinople to Mustapha Kemal personally. In this telegram Tewfik Pasha stated that the Powers would issue a double invitation to the forthcoming Peace Conference, and he, therefore, begged that a person in whom every confidence could be reposed should be sent without delay to Constantinople in order that the two administrations might decide upon a common course of action. To this telegram, Mustapha Kemal stated, he sent a reply through the same intermediary. In this reply Tewfik Pasha was informed that the only legal Government of Turkey was that of the Great National Assembly of *Turkey*, which alone had the right to send delegates to the forthcoming conference, and Mustapha Kemal terminated by warning Tewfik Pasha of the serious responsibility that would be risked if this was contested. Mustapha Kemal then read Tewfik Pasha's second telegram, the contents of which are generally known, to which the Assembly resolved not to reply. According, however, to Tewfik Pasha's own statement, contained in a published telegram to the Great National Assembly on November 3, Mustapha Kemal Pasha's reply to his first telegram of October 17 was never delivered, and Tewfik Pasha first learnt its contents from the newspapers. It is conceivable that had the reply reached Tewfik Pasha in time, the policy of the Sublime Porte would have been different in regard to the despatch of delegates to the Peace Conference. Unfortunately, the published accounts give no date to that reply, but in any case it should have reached Tewfik Pasha by October 29-31 at the latest. It seems clear, therefore, that the telegram in question went astray, and the question arises how this could have occurred.

In addition to the decision not to reply to Tewfik Pasha's telegram, the Assembly immediately discussed the measures to be taken against the Central Government, and Riza Nur Bey submitted a motion bearing the signatures of seventy-six deputies. According to the official accounts, the debates were long and stormy, and the motion in question was replaced by another after voting invalidated by the absence of a quorum had taken place. This announcement was made in a telegram from Angora dated November 1. According to another account, the second motion was simply a revised version of the first. On the same day, however, that is to say, November 1, the Assembly *unanimously* adopted the motion proclaiming the abolition of the Government of the Sultanate, but, again by a significant omission, no figures regarding the voting have been published.

The demonstrations which have taken place in Constantinople to celebrate the end of the Sultanate can only be described as half-hearted, for,

Digitized by Google

unlike the demonstrations which followed the defeat of the Greeks, on this occasion the better-class Turks were conspicuously absent. The great meeting which was to have been held at the Sultan Ahmed Square on Sunday proved a fiasco, and was a poor affair in every way. The bulk of the demonstrators consisted of the scum of the city, and in some cases shouted "Down with the Khalifate!"

The Turkish Press.

Not a single Turkish paper has had the courage to defend the Sultan personally, or the office of the Sultanate, although various pamphlets condemnatory of the revolutionary policy of the Angora Government have been published, both in Constantinople and in Anatolia. Some of the endeavours to justify the action of the Angora Government are singularly reminiscent of the early adulation of the Committee of Union and Progress. It is admitted, for instance, that the Angora Government may be revolutionary, but they have saved the nation from shame and slavery. One would have thought that the Turkish nation would have had enough ere now of being "liberated." Once again we are told that the administration has been completely transformed, and that the new administration realises that corruption was the cause of the old administration's failure. Once again we are assured that "science, light, experience, and the force of intellect" are to dominate a new and regenerate Turkey, but, in the meantime, the miserable remnant of the Greek and Armenian populations of Anatolia are being expelled or interned in "concentration camps," and, unless the Powers suddenly awaken to a sense of their obligations of honour, there will shortly be another half a million souls condemned to death or misery.

The Sultan.

Although there have been repeated rumours of the Sultan's abdication, it would appear that the Sovereign has no intention of taking such action of his own free will. The Sultan contends that he is not only Sultan of Turkey, but Khalif of the Moslem world, and that he cannot abdicate merely on the strength of what he has read in the Press concerning the actions of a revolutionary body in Angora, unsupported by the general opinion of Islam. It is, however, doubtful whether His Majesty will be able to maintain this attitude in face of the daily increasing influence of the Angora Government in Constantinople.

The New Order.

With the disappearance of the Government of the Sublime Porte, the administration of Constantinople and the neighbourhood has come under the Department of Interior Affairs of the Angora Government, and the laws of the Angora Government are to be applied as from November 4 at midday. Although Rafet Pasha stated that he had not been instructed to take any action, he had a scheme for the creation of a provisional administration all ready in his pocket when he assumed control of affairs. The various Ministries unconnected with foreign or imperial affairs have been transformed into departments under the orders of the Governorate and the Prefecture. The military garrison and the fire brigade are placed under order of the military governor, who himself is under the orders of Rafet Pasha, while the gendarmerie and police are under the direction of the Governorate and Prefecture respectively. The University and the schools have been placed under the authority of the Public Instruction Department of the Angora Government.

How it will be possible to reconcile the new order with the Inter-Allied Occupation remains to be seen, and, although the Allied representatives have emphatically refused to agree to the evacuation of the capital, there can be no doubt that a crisis must arise within the next few days. The object of the Angora Government in the matter is obvious: the occupation of Thrace cannot be regarded as secure as long as foreign forces hold the bridge which connects Thrace with Anatolia, and it is essential to secure this bridge before the conference of Lausanne, in order that the Kemalist delegates may *preserve full liberty of action*. As the Allies apparently have not yet realised, it is foolish to refuse a demand brusquely without being resolved to maintain that refusal by force if necessary. A further illustration of this maxim is to be anticipated in the near future.

IRAQ.

Baghdad, October 26.

Political Stagnation.

One who had been absent from Baghdad for three months and returned to-day might well be surprised at the great change which has come over the people during that period. Three months ago Baghdad was a seething torrent of political controversy and angry passions; the Mandate, the Treaty, the removal or retention of British advisers were the common, if not the sole, topic of conversation among all classes, from Ashraf to coolies, and in all places, from mosques to coffee shops; and many were the quarrels and many the disputes which these subjects provoked. To-day the Treaty has been signed and published, the question of the Mandate has been decided for the time being, it is certain that a number of British advisers are to remain, and elections are, for the first time for centuries, if not for the first time in history, about to be held to establish an Iraqi National Assembly.

The Treaty is a document of the greatest importance to the country; the decision regarding the Mandate is one on which, in all probability, the fate of the country during the next few years depends more than on anything else. The constitution of a National Assembly is one of the outstanding landmarks in the history of the country. Now, above all times, one might have expected excitement to run high. Now might one have expected to hear the various clauses of the Treaty picked to pieces in the meeting-houses, and now to hear speculations regarding the probability of the candidature of Iraq for a place in the League of Nations being successful, or to be regaled with forecasts of the probable composition of the Assembly. But such expectations are proved to be groundless. Apathy is the outstanding feature of

Digitized by Google

Baghdad, and, indeed, of the whole of Iraq at the moment. The Treaty is not discussed; no heed is paid to it, and one might well remain in the country a long time without ever hearing it mentioned. Some nine or ten days after the publication of the text the *Hizb al Hurr* issued a party manifesto in which it gave it as the opinion of the party that while the Treaty did not fulfil completely all the hopes of the Iraqis, yet it was a great step in the right direction, and, in a general way, made it known that it was approved of by the party. As the *Hizb al Hurr* probably commands the allegiance of a majority of the voters in this country, this manifesto may reasonably be regarded as setting out the views of the majority, but it is by no means easy to obtain any expressions of opinion.

Election Preparations.

This same apathy is evinced towards the elections. Preparations are being made to hold these at an early date in order that the Treaty may be ratified and the Constitutional Law passed as soon as possible. A committee of supervision to regulate the conduct of the elections has been appointed, composed of four Mohammedans: S. Muhi ud Din al Naqib, S. Abdallah al Naqib, Naji Beg as Suwaidi, and Rif'at Beg Chadirchi; one Jew—Menahem Eff Saleh; and one Christian, Yusuf Eff Ghanimah, and has aroused but little comment, though there are some who cavil at the appointment of two members of the Naqib's family.

When home politics are able to arouse so little interest, it is not surprising that developments in foreign politics pass more or less unnoticed. But for the prevailing note of apathy, one might have expected the fall of Mr. Lloyd George's Cabinet and the appointment of a new Secretary of State for the Colonies in the place of Mr. Winston Churchill to receive attention here, but it, too, has passed unheeded.

Cultivators' Troubles.

Meanwhile, trade remains at a standstill, and the big fall in the price of dates and cereals threatens to cause distress among cultivators. Especially is this so among pump owners. Encouraged by the high prices to be obtained for cereals and vegetables during the War, and as long as the big army of occupation remained, many cultivators invested in pumps and engines, hoping to reap big profits from their use. With the heavy fall in the price of their products, which means that wheat and barley can scarcely be grown at a profit on land watered by rain or by flow irrigation, they find it impossible to use their pumps profitably, and they are seriously perturbed at the prospect. Their difficulties may be met gradually by their growing cotton or other more valuable crops in the place of cereals, but this will be a matter of time, as, though the pump owner may be anxious to make the change, he still has to reckon with the fellah, who is conservative to the backbone, and views with suspicion any attempt to rouse him from his old ways.

Miscellaneous News.

A serious fire occurred in Kingerban station a few days ago, when a train load of petrol and bombs caught fire and exploded. The station was wrecked, but, fortunately, no lives were lost, and a new, temporarys tationh aving been provided, booking is continuing as usual.

There is an epidemic of smallpox now in the city. Always present here to a certain extent, the disease has recently spread very considerably, and active measures have had to be taken to combat it. It is said that a modified form of compulsory vaccination of schoolchildren has been resorted to.

Sir Arnold and Lady Wilson have arrived at Mohammerah on return from London.

EGYPT.

Cairo, November 3.

A New Departure in Egyptian Politics.

What one may hope will prove to be a new and auspicious chapter in Egyptian politics was opened this week with the official inauguration of the new political party, "The Liberal Constitutional Party," which has been formed with Adly Pasha Yeghen at its head. The inauguration took place at Shepheard's Hotel on Monday morning when a representative gathering assembled in the large dining-room to hear the Party's declaration of policy and elect its executive. This declaration of policy was made by Adly Pasha in a speech which was admirable in every respect, and, like the proceedings, was fully in keeping with the dignified character of the man who has had, and if his fellow countrymen will only continue to listen to him will have, such an influence for good on all the conflicting elements of the Egyptian population.

Adly Pasha declared that they desired an agreement with Great Britain, frank and sincere, free from any vestige of bargaining or of ulterior motives, but founded on mutual friendship and good-will. He and his friends firmly believed that it would be a great service to the country to set up the constitutional régime without delay; and, since it would be through their Parliamentary activities that their political destiny would be worked out, the time had come for the formation of political parties with definite programmes based on definite principles, which alone could ensure the organisation of the forces of the nation, its unanimity, and the direction of its efforts to the complete realisation of their practical independence.

He then proceeded to explain the policy of his party, which would be based on one general principle, that whatever guarantees Egypt may be called upon to give, they should in no circumstances prejudice her independence or all that that independence implies. His party fully approved of the attitude of the Official Delegation in London last year when they refused all suggestions involving military occupation or foreign interference in Egyptian affairs, whether internal or external, and he added that should the success of the coming negotiations demand a change of the policy adopted last year, it would not be the Egyptians that would make the change.

On the question of the Sudan, he stated that any solution leading to its separation from Egypt, diminishing Egyptian rights in that territory, inter-

fering with Egyptian suzerainty over it, or hindering Egypt from directing its vital interests in the Sudan, would be a solution which not only no justice or friendliness could justify, but which could never meet with the approval of the Egyptian people. He went on to say that in the matter of the Capitulations, these should be the subject of negotiations with the Capitulatory Powers, but that, in any case, Egypt considered it a very agreeable duty, in recognition of the valuable services rendered by the foreign element towards the development of the country from many points of view, to make life in Egypt congenial to them in the future as it has been in the past, and to safeguard their interests and maintain their security and protection.

Referring to Egypt's participation in the Near Eastern Conference, Adly Pasha declared that they welcomed such participation, provided, however, that Egypt were invited in the same way as other countries, and that she appear as an independent and free State to defend her rights, which were infringed by the Treaty of Sèvres, and to secure to Egypt the recognition by an International Treaty of all the rights inherent in an independent Sovereign State. He declared that there was nothing to prevent the Government from establishing legations and consulates abroad, or from applying for membership of the League of Nations. Further, they saw no justification for foreign martial law being still in force, and the Liberal Constitutional Party regarded with the greatest aversion the continuance of any restriction upon individual liberty in the country.

He concluded his speech, which was listened to with attention and was punctuated with applause, by an assertion that they were actuated by no feelings of enmity towards those who may differ from them in principle or in policy, and by an appeal to all Egyptians to show a united front.

New Party's Programme.

The published programme of the Liberal Constitutional Party includes the following principles: (1) To make the independence of Egypt real and complete by putting an end to the British Occupation, by preventing future negotiations from infringing on that independence, and by insisting on the non-separation of the Sudan from Egypt and on the maintenance of the latter's sovereignty and rights over that country. (2) To effect the admission of Egypt to the League of Nations as an independent sovereign State. (3) To support the constitutional régime and safeguard the authority of the nation and the rights of the Throne. (4) To promote local representative Government. (5) To defend the rights of the individual. (6) To enable the country to defend herself against foreign aggression. (7) To extend education by making it compulsory and free, by making Arabic the linguistic medium, and by encouraging everything which would keep Egypt in intellectual touch with the world. (8) To secure an equitable distribution of taxation. (9) To protect Egyptian industry, promote agriculture, encourage industrial enterprise, assure the exploitation of the country's natural resources for the benefit of the nation, and bring about an understanding between labour and capital so as to avoid disputes.

As far as one can ascertain, the new party has been well received. There has, of course, been opposition from quarters which feared the effect of its incursion on the political arena, but to a certain extent even that opposition has latterly diminished, and there is a hope that as a result of the advent of a political party animated with such good intentions towards its opponents, the political development of Egypt will from now on proceed in a more cordial atmosphere; for while there may be differences of opinion as to the means to be employed, there is no doubt that there is unity of idea as to the end to be aimed at.

The Constitution.

Adly Pasha's reference to the urgent need for the introduction of the new constitutional régime reflects the general view. The recommendations of the Constitution Commission (which are printed on another page) have been exceedingly well received. And well they might be, for they are exceedingly liberal in character, and they entirely respond to the views of the people as expressed in the demands received from all parts of the country and the articles published in the vernacular Press during the past few months. So far there has, indeed, been very little criticism of the recommendations, even from the extremist side, but it is stated that some difficulty has arisen in quarters which are directly affected by the recommendations, and that there may be some delay in the promulgation of the decrees.

YUGOSLAVIA.

Liubliana, November 3.

The Government Crisis.

Owing to the position abroad, the Government crisis did not develop, nor is it likely to recur in the immediate future. All the same, there will probably be changes in the Ministry. It is pretty confidently assumed that M. Rafailovitch and M. Mladinovitch will resign, and a few other Ministers are likely to follow their example.

The New Italian Government.

The change of Government in Italy is taken seriously, yet without pessimism, although at the first glance it is unfavourable to Yugoslavia. This country will certainly do nothing to make the position between the two neighbours worse, but will honestly and loyally discharge all her obligations. The only cause for real anxiety lies in the possibility that the new Government might proceed tyrannically against Italy's Yugoslav subjects, with disastrous effects on public feeling over here, and incalculable consequences. On the whole, however, the opinion prevails that the Allies will exercise a restraining influence upon Italy, seeing that it was they who urged Yugoslavia to agree to the disadvantageous Treaty of Rapallo. It is surely superfluous to point out the impossibility of localising a conflagration in the Balkans. Yugoslavia is fully aware of the fact. It is to be hoped that the new Italian Government will likewise realise it; because then peace would be assured.

New British Cabinet.

Comment upon the new British Government is very reticent, pending a declaration of its attitude towards the Reparations question. It must not be forgotten that Yugoslavia is interested in the German reparations, and pity for Germany is not altogether understood here. The population has had too much experience of the ruthlessness with which the Germans during the War seized upon everything of value and carried it off to Germany. Germany is rich even to-day, and pity for her is felt here to be misplaced. Had she been the victor, the vanquished would have sued for pity in vain.

The Agricultural Party.

The Agricultural Party has just concluded its Second Congress at the Bosnian town of Banjaluka. The Congress was well attended. It is significant that M. Komadinitch, hitherto General Secretary, was unanimously excluded from the party. He leans towards Communism, and his exclusion is

Digitized by Google

proof of a tendency to the Right. This tendency was borne out by the whole proceedings of the Congress. People are sobering down, and less inclined to be captious.

The Commercial Treaty with Poland.

A Commercial Treaty was recently concluded at Warsaw between Poland and Yugoslavia. Poland will export sugar, petroleum, and textiles to Yugoslavia, whereas the latter will export wine, fruit, and, above all, dried prunes. So far it has been forbidden to import wine into Poland. Polish-Yugoslav relations are steadily improving, and the Little Entente will gain proportionately in importance and extent.

Sokol Congress in Zagreb.

The annual Congress of the Yugoslav Sokol Union took place in Zagreb on October 29 and 30. The anniversary of the day on which, in 1918, the Croatian Diet solemnly proclaimed the secession from the Austro-Hungarian Empire and the Hapsburg rule was duly commemorated at a sitting in the building of the Croatian Diet itself. Sokoldom is one of the most vital forces for national consolidation in the country, whose inhabitants are only just beginning to realise the difference between a realm such as they are citizens of now, and a little State as any of its component parts might be—as Serbia was before the War. A new sense of responsibility and of tolerance, of unity in diversity, has to be cultivated, and Sokoldom is the ideal organisation for the purpose, with its non-party patriotism, and its non-class spirit of brotherhood and its well-regulated physical training. All Sokol units were represented, except one, which telegraphed its excuses and good wishes. The influence of Sokoldom on its members is one that strikes the foreigner at once as soon as he gets to know the Sokol badge. Paraphrasing a very famous statement, one might say that the enemy front in Macedonia was very largely broken in the Yugoslav Sokol gymnasiums. Most of the Yugoslav volunteers in the Great War were Sokols, and it was thanks to the reinforcements from the ranks of these volunteers that the gallant Serbian Army was enabled to play its brilliant part in that final thrust.

To-day the chief task of Sokoldom is to keep the youth of the nation in condition—body and soul—during these trying years when the young State is finding its place in the polity of civilised nations..

Czecho-Slovak Independence Day.

October 28 was kept throughout Yugoslavia with brotherly enthusiasm and cordiality. There were gala performances at the national theatres, and many congratulatory messages were sent from all parts of the country to President Masaryk.

BULGARIA.

Sofia, November 9.

M. Stambolisky in Bucharest.

According to telegrams received from Bucharest, M. Stambolisky has discussed with M. Bratianu a variety of questions relative to Bulgaria and Roumania. The most important matter that the Bulgarian Prime Minister raised was that of Roumania's attitude towards Bulgaria's outlet to the Ægean Sea. M. Stambolisky apparently solicited Roumania's support towards the granting of the outlet, in return promising free passage of Roumanian merchandise across Bulgaria to the Ægean. It is not thought that Roumania will agree to this proposition. However advantageous it may be for the Roumanians to have their merchandise transported across Bulgaria Customs free, it must not be forgotten that they have certain liens with Greece which will make it extremely difficult for them to support Bulgaria's demand for a free economic outlet through Western Thrace. Apart from this consideration, the proposal to divert Roumanian merchandise from the Black Sea ports to the Ægean is bound to evoke a great deal of hostile criticism from the important commercial communities of Braila, Galatz, and Constantza. Added to this there is the question of communication. The only direct railway communication between Roumania and Bulgaria is by way of Tchernavoda, Dobritch, and Shumen. From the latter town onwards there is a devious route to Adrianople and Dedeagatch. M. Stambolisky's scheme may be feasible when better railway communications exist, but at the present it would seem difficult of realisation. Another request made by M. Stambolisky to M. Bratianu was that the sequestration placed on the money and property of Bulgarian subjects residing in Roumania might be raised. It is understood that the total of the sequestrated funds is not very considerable, and that M. Bratianu was sympathetic to M. Stambolisky's request.

In general the reception accorded to M. Stambolisky in Bucharest was distinctly favourable. When he visited Roumania shortly after the signing of the Neuilly Peace Treaty two years ago, relations between the two countries were strained. To-day Bulgaria and Roumania have no reason to be enemies.

Bolshevist Intrigues.

Your Sofia correspondent has always been inclined to scoff at the numberless and wild accusations levelled against Bulgaria concerning her supposed flirtations with Moscow. Recent events necessitate the taking up of a new attitude. For some time past there have been indications that Bolshevism and Bolshevist agents are being allowed to enter Bulgaria with impunity. This is perhaps no crime, as practically every European country is in the same position, but it is surely idle for the Government to declare that Bolshevism is unpopular in Bulgaria. The Bolshevists are endeavouring to establish a complete organisation throughout the country, and the following concrete facts will support the truth of this statement.

During the month of October many Russians living in Varna were arrested for petty crimes, and instead of being brought before the local police, were tried by Russians. These Russians were Bolshevists, and were presided over by Midshipman Tchaikin, a name well known in Russian circles in Bulgaria. The way in which justice was administered corresponded exactly with the way in which the Che-ka functions in Russia.

Secondly, it is now practically proved that General Bonch-Brouevitch, ex-Chief of the Staff of Trotsky's Army, has been and is living secretly in Bulgaria. As far back as September this rumour was reported, but was at once contradicted, it being said that Bonch-Brouevitch was a harmless Varna business man. This is not correct.

Yet another instance is the continual expulsion of Russians living in Bulgaria who are known to be anti-Bolshevist. Only to-day twelve Russian Cossacks were ordered to leave the country in twenty-four hours. It was stated that the reason for this was the attempted assassination of M. Agueeff, the editor of *New Russia*, a Communist newspaper. This is as may be, but the consideration displayed by the authorities towards M. Agueeff and his friends is somewhat striking when it is compared to that shown to any other Russian who is molested.

The truth is that Bolshevist money is being very freely spent in Bulgaria, and unless the

Digitized by Google

authorities take a firm grip of the situation, they may shortly find themselves placed in a very awkward position.

The Young Agrarians.

Yesterday the Congress of the Young Agrarian Party began. Many thousand peasants came to Sofia to attend the meeting, and a large procession took place. Although opinions differ as to the definite policy of the Young Agrarians, it is fairly certain that, sooner or later, the dissolution of the Sobranye will be demanded by this group of the Government. At present the Agrarian Party presents a fairly united appearance, but it is no secret that the younger members would very much like to obtain fuller control. This they cannot do unless the Sobranye is dissolved. A great many of the present Agrarian Deputies are not "young" Agrarians, and, therefore, stand in the way of the latter.

Although he has never officially proclaimed himself the leader of this group, it is known that M. Stambolisky has decided leanings towards it. The group claims that the Government's policy must be more "go ahead." It is not quite clear in what manner they define the words "go ahead," but it is feared they wish to be "extreme," or, in other words, more anti-Bourgeois than they are at present. Their Congress will last until the 12th, and it will be thus possible to give fuller details in my next letter.

GREECE.

Athens, November 4.

The Foreign Minister in Yugoslavia.

The Minister for Foreign Affairs, M. Politis, left for Belgrade on Thursday night by the Orient Express. The object of his visit to the Yugoslavian capital is to confer with the Serbian Foreign Minister, M. Ninchitch, with a view to arriving at an understanding concerning the attitude of the two nations at the coming Peace Conference. It is also understood that M. Politis will point out to his Serbian colleague that Greece is to-day relying more than ever on Serbia's friendship and support.

It had been originally decided that the meeting between the two diplomats would take place at Uskub. Quite unexpectedly, however, the Serbian Minister in Athens informed the Greek Government that M. Ninchitch was unable at present to absent himself from Belgrade owing to internal reasons. It looked, therefore, as if the meeting had definitely fallen through, when it was suddenly announced that M. Politis was leaving in all haste for Belgrade. To those who follow closely the affairs of the Balkan Peninsula, the reasons which prompted the hurried departure of the Greek Foreign Minister require but little guessing. On the very same day that the Greek Government was informed that the meeting at Uskub was "off," a wireless message received here from Bucharest intimated that the Bulgarian Premier, M. Stambolisky, had already arrived in the latter town, and that, after conferring with the Roumanian Premier, M. Bratianu, would proceed to Belgrade in order to meet M. Ninchitch. Needless to say, the Greek Government was alarmed by this news. Hence M. Politis' journey to Belgrade. Greece has never made the mistake of under-estimating M. Stambolisky's capabilities, and a *rapprochement* between Serbia and Bulgaria would be the very last thing this country could wish for—especially on the eve of a peace conference, upon the decisions of which so much depends.

If M. Stambolisky arrives in Belgrade before M. Politis has started on his homeward journey, a meeting between the three politicians would be only natural. It would probably help a good deal towards the solution of many puzzling problems, and might easily sow the seed of a new Balkan alliance.

The *Eleftheros Typos*, commenting on M. Politis' journey to Belgrade, says that only by close collaboration will the small Balkan States be able to resist the pressure and the imperialistic tendencies of the more powerful nations.

A Meeting and its Consequences.

Regrettable incidents occurred in Athens last Sunday evening, resulting in a temporary panic in the two principal squares of the city.

At five o'clock in the afternoon a mass meeting, organised by the editor of the *Metarythmisis*, M. Frangoudis, a British subject, with a view to demanding prompt punishment of M. Gounaris and the other political prisoners now awaiting trial, was held in Constitution Square. The meeting, which was not attended by more than 5,000 people, was carried out in a very orderly manner, and broke up immediately after M. Frangoudis had concluded his speech. A small party of soldiers, however, who had taken part in the demonstration, wishing to exhibit in a more tangible way their anti-Constantinist sentiments, entered the large Café Zavoritis, at the corner of Constitution Square and Hermes Street, and, without any warning whatsoever, commenced throwing glasses and plates at the portraits of the ex-King and Queen which were prominently hanging in the establishment. When these had been entirely smashed, the invaders turned their attention to the huge mirrors in the café, one of which was likewise broken. As the day was Sunday, the café was packed with people at the time the soldiers made their appearance. When, however, glasses and other dangerous missiles began to fly about, everybody made for the doors without troubling to finish the cakes and ice-creams of which they were peacefully partaking, and, naturally, without attempting to pay their bill!

The rowdies then went to the Zacharatos Café, at the other end of the Square, but, finding only the photographs of the late King George and Queen Olga, proceeded to Omonia Square, where they visited, one after another, every café in the vicinity, with disastrous results for those whose walls were still adorned with the portraits of the ex-King and Queen. Only when the work of destruction was completed did the police appear on the scene. Several arrests were subsequently made, but it is doubtful whether the authorities have got hold of the right persons. At all events, the President of the Revolutionary Committee, Colonel Gonatas, promised that the guilty will be severely punished.

Miscellaneous News.

Prince Christopher, the present King's uncle, has arrived here on private business. The Revolutionary Committee has given him permission to stay in Greece for a fortnight. The Prince has offered 500,000 drachmæ for the Asia Minor and Thracian refugees.

M. Mylonas has been appointed Minister of Agriculture.

The Prime Minister, M. Zaimis, is expected in Athens at the beginning of next week.

The 1917 class will be demobilised within the next ten days.

ROUMANIA

Bucharest, November 4.

M. Stambolisky's Visit.

The Bulgarian Prime Minister, on his way to Lausanne for the Near Eastern Conference, arrived

Digitized by Google

in Bucharest on Saturday morning. His arrival had been delayed eleven hours, owing to the fact that the train in which he travelled in Bulgaria ran off the rails, so that the journey had to be continued on a long roundabout way. The object of M. Stambolisky's visit here is to discuss with the Roumanian Government the different questions which will be treated at the Lausanne Conference. He will also break his journey at Belgrade for the same purpose. It is said that his object is to ask the Governments of the two neighbouring countries to support the demands which Bulgaria will make at Lausanne, notably that Bulgaria be granted an outlet to the Ægean Sea, and that Western Thrace be made autonomous. It is further rumoured that on this occasion the Bulgarian Premier will endeavour to induce the Roumanian Government to lift the sequestration existing on Bulgarian property in Roumania. The building of a bridge over the Danube, which would connect the two countries, might also be discussed during this visit.

M. Stambolisky, on the first day of his arrival, had a long interview with M. Duca, Roumanian Minister for Foreign Affairs, and then called on M. I. C. Bratianu, the Prime Minister, with whom he also conferred at length. The Bulgarian Premier met throughout with a courteous and amicable reception. A gala dinner was given in his honour at the Foreign Office. M. Stambolisky is accompanied by two Agrarian Deputies, M. Radeff and M. Boyadjieff, by M. Mincoff, Under-Secretary of the Bulgarian Foreign Office, and by Miss Stancioff, his secretary, who also acts as his interpreter.

It is said that M. Stambolisky's proposals are favourably regarded by the Roumanian Government.

Roumania and the Lausanne Conference.

The British Minister, accompanied by the French and Italian *Chargés d'Affaires*, called at the Ministry for Foreign Affairs to hand over to M. Duca the official invitation to participate at the Lausanne Conference. Roumania will be represented by M. Duca and M. C. Diamandy, Minister Plenipotentiary, accompanied probably by a military expert. The delegation will leave for Lausanne on the 8th inst., provided no postponement takes place in the meantime.

Sir Basil Zaharoff.

After a stay of about a week in this country, Sir Basil Zaharoff left by the Orient Express for Paris. He has certainly had a very busy time during his sojourn here. He was constantly in touch with the various Ministers, and especially with the Minister of Finance, as well as with the Directors of the National Bank. He met the Prime Minister at a dinner given in his honour by Prince Stirbey—the Premier's brother-in-law—at the latter's country house near Bucharest. He also had an audience with the King at Sinaia, on which occasion the Sovereign conferred on him the Grand Cross of the Order of the Roumanian Star.

Nothing, however, has yet leaked out with regard to the real object of the financier's visit, and even the different interviews have been shrouded in mystery.

Roumanian-Hungarian Incident.

A regrettable scene occurred a short while ago in the Hungarian Parliament, apropos of the Roumanian Coronation at Alba Julia. The Opposition deputy, M. Szilaggi, in his interpellation on this event, made a most violent speech against Roumania, declaring, *inter alia*, that the Hungarian nation will use all means, legal and illegal, in order to restore the old boundaries, and at the same time exhorting the Magyars in Transylvania to continue to consider themselves as loyal subjects of the Holy Hungarian Crown. The entire speech, full of invective and threats addressed to Roumania, was frantically cheered by the whole Assembly. The point that has aggravated the Roumanian Government and the people here is that the Ministerial Bench did not deem it opportune to temper the speaker's violent address, thus tacitly approving it, although conditions of peace and diplomatic relations exist between the two States. This outburst of enmity on the part of the Hungarians naturally evoked no little indignation on this side. Parliamentary interpellations ensued during the late session, urging the Government to demand diplomatic satisfaction. M. Jorga's authoritative voice, however, moved that the Magyar bravado should be dealt with on its own merits—namely, with silent contempt. M. Duca responded that as soon as the Government is in possession of the official minutes of the provocative speech in the Hungarian Parliament, representations will be made accordingly through the Roumanian Minister at Budapest, conjointly with the Governments of Czecho-Slovakia and Yugoslavia, for the proffered threat to disregard the boundaries fixed by the Peace Treaty concerns the Succession States alike. The immediate sequel of this incident was the refusal by the Hungarian Consul in Bucharest to *visé* Roumanian passports for Hungary, on the unfounded pretext that the Roumanian Consul in Budapest is proceeding similarly towards Hungarians.

As to the diplomatic steps which have been initiated with regard to the offending speech and the silence thereon of the Hungarian Government, negotiations are in progress to obtain a formula to satisfy Roumanian feelings. Furthermore, subsequent reports announce that the Hungarian Consulate in Bucharest has resumed the *visé*-ing of Roumanian passports for Hungary, acknowledging, at the same time, the misunderstanding.

EXCAVATIONS IN GREECE.

The annual meeting of subscribers of the British School at Athens was held recently in the rooms of the Society of Antiquaries, Burlington House, Piccadilly, with Sir Arthur Evans in the chair.

In a report on the work of the School it was observed that a most satisfactory feature of the past session had been the increase in the number of foreign students. The excavations at Mycenæ have been most successful, and it is stated that the number and importance of the finds would necessitate a short campaign next spring.

A generous offer to the School has been made by Sir Arthur Evans. He proposes to transfer to the School his property at Cnossos, including the Villa Ariadne, the site of the Palace of Minos. The committee have accepted this offer and have received the assent of the necessary Greek authorities to the principle of the proposed gift.

A resolution, proposed by Sir Arthur Evans, was carried unanimously to the effect that the meeting desired to impress upon the Government the urgent need of assistance on a national scale to save the refugees from Anatolia and Thrace.

EGYPTIAN BOOKS OF THE DEAD.

Antiques from Egypt, Greece, and Rome, the property of the late Mr. W. H. Smith, R.B.A., the Baroness Zouche, and others, have been sold at Sotheby's during the last weeks. The total amounted to £2,192. An important feature of the sale consisted of the antiques collected in Egypt by Lord Zouche, author of "Monasteries of the Levant," a once famous book, first published in 1849. This collection included some important Papyri Books of the Dead. For these, the highest price paid was for a fine example of the twenty-first dynasty, "The Osirian, the Divine Father of Amen-Ra, King of the Gods, the Chief Sailors of the Ship of the Estate of Amen," which went for £210 (Muller and Co.). Other prices were: "The Chief Over the Secrets of Anubis, the Astronomer in Karnak, and Chief Lector of the Eternal Horizon," also a fine example, £170 (Permain); "Sistrum-Player of Amen-Ra" (twenty-fourth dynasty), £96 (Permain); "The Osirian, the Divine Father of Amen-Ra" (twenty-second dynasty), an abridged copy, £92 (Muller and Co.).

GREEK FOLK-SONGS.

"A SHEAF OF GREEK FOLK-SONGS." Gleaned by an Old Philhellene. With an Introduction by Countess Evelyn Martinengo Cesaresco. (Oxford: Basil Blackwell. 5s. net.)

In a rather rambling introduction to this book of folk-songs, which, however, is packed with curious information, Countess Martinengo Cesaresco remarks that "The Hellenic balladist is not only unconsciously but also consciously the articulate voice of his natural surroundings. His imagination is touched by impressions which come from the outside; he does not try to create a new heaven and a new earth—he looks around; he *sees*, and he sings." This is a most important fact, at one time, we imagine, true of all countries, and yet true of Greece, and indeed of all the Balkan countries. Folk-songs are in Western countries mostly things of old and dim origin; but in places like Greece, Albania, or Serbia, where reaction to natural events is more acute, they are every-day creations.

It was well, therefore, to get these Greek folk-songs set down and translated while there was still time, for the faster the approach of civilisation in the Balkans, the more probable the perishing of these folk-songs. An "Old Philhellene" has here brought together a fairly representative selection, illustrative, among other things, of the Greeks' love of hero-worship, of the admiration of the Klephts, of the attributing of personality to natural objects, and of their love of animals. The beauty of the original songs is not often apparent in the English translation, but one pathetic, and, we think, beautiful song, "Bebros and His Horse," at least we will quote:—

At Vardari, at Vardari,
Upon the Plain of Vardari,
Bebros was lying weak and sped;
His coal-black steed came up and said,
"Rise, master, let us now begone,
Your company is passing on."
"My horse, no longer rise can I;
For now I know that I shall die.
And with your hoofs all silver shod,
Come now and hollow out the sod;
And lift my body with your teeth,
And bury me the earth beneath.
And take my arms, my faithful steed,
And with them to my neighbours speed.
And take my handkerchief and bear
The relic to my mistress dear.
That when she sees it she may shed
Some tears of pity for the dead."

We may suggest, as a final word to this well-printed and tastefully-produced book, that some one should set down and publish the tunes to which these translated songs are sung, for it is the melody of folk-songs that counts far more than their text.

A NOTEWORTHY MONOGRAPH.

"THE LHOTA NAGAS." By J. P. Mills, I.C.S. (London: Macmillan and Co., Ltd. 25s. net.)

Southwards of the Indian Province of Assam there lies a region known as the Naga Hills, occupied by a congeries of tribes whose social organisation is full of interest for students of ethnology. Although the Assam-Chittagong Railway has brought their habitat within easy reach of twentieth-century civilisation, they retain many customs which carry one back to the era when our own ancestors lived by hunting wild animals. Until recent years they were regarded as irreclaimable savages, but deeper knowledge proves that they have many saving virtues, and respond readily to sympathetic treatment. The local government has done well to publish monographs on their tribal life. The first of the series, describing that of the Angami Nagas, has been noticed in these columns. Its author, Mr. J. H. Hutton, C.I.E., contributes an admirable introduction to a similar account of the Lhota Nagas by Mr. J. P. Mills, I.C.S. He considers that they do not deserve the evil repute in which they are held. The Lhota, he writes, is

Absurdly sensitive to ridicule, and partly, no doubt, for that reason extremely reticent. He is not so readily moved to hilarity as his neighbours the Sema, or even the Angami. Dour he is, and very canny. . . . If the Sema among Naga tribes be likened to the Irishman, then the Lhota is the Scot amongst them. . . . I can state without reserve that Mr. Mills during the three and a half years in which he had to decide the Lhotas' disputes, and deal with them in various ways, has fully gained their confidence, and has doubtless found them, as I have myself, very pleasant companions, particularly on the river, in jungle, or after dangerous game.

The first point that strikes one in Mr. Mills' delightful study is the similarity of tribal customs throughout the world. In old days head-hunting was the Lhota's absorbing passion. The environs of every village were scouted at dawn by its young men, fully armed, in order to detect raiders lying in ambush; and the women-folk were confined within the village palisade until they were assured that no enemy lurked in the adjacent jungles, but

Like all Nagas, the Lhota was very keen to take heads, although he preferred to do so with a minimum of risk to himself. A strong, forewarned enemy was rarely attacked. Usually a party of raiders would lie in ambush by the village spring and kill a woman as she came to take water, or rush an unsuspecting party working in the fields, or cut off a straggler on some path.

A Lhota warrior's social status depended on the number of these gruesome trophies which he could exhibit. In Mr. Mills' opinion, the British Government has, by sternly repressing the quest for heads, profoundly changed the mode of life in every tribe in the administered area of the Naga Hills. Again, every Lhota village has its *Champo*, a building which serves as a dormitory and club for the unmarried men. Albeit that the *Champo* is dirty, smoky, and full of fleas, the married Lhota is apt to look back on his communal life with the fond regret which elderly Europeans feel, or affect to feel, with regard to their school days.

It is passing strange that the custom of head-hunting should still be endemic throughout Malaysia, and that Mrs. McGovern, in her recent work "Among the Head-Hunters of Formosa," should describe the bachelor dwellings of that distant island. Mr. Mills' coloured frontispiece depicts a Lhota warrior wearing a small apron of cowrie shells, which strongly resembles our Highland kilt. In common with other Naga tribes, the Lhotas possess an immense store of traditional tales. The samples given by Mr. Mills remind one of folk-lore current in regions as far apart as Lapland and Japan.

In the interest of comparative ethnology it is highly desirable that other British administrations should follow the lead given by Assam in rescuing these quaint survivals from the oblivion to which they are doomed by the influence of Christian missions and foreign immigration. F. H. S.

SERBO-CROATIAN SELF-TAUGHT

By J. J. O'BEIRNE.

For learning the language by the Natural Method, with Phonetic Pronunciation. Containing the Serbian and Croatian Characters, Phonetic System, Comparison of the Alphabets, Vocabularies, Travel by Rail, Road and Sea, Conversational Phrases; Naval and Military Terms. PERSONAL AND GENERAL.

TO-DAY.

November 16 (New Style).
November 3 (Old Style).
Rabia I., 27, 1341 A.H. of the Moslem Calendar.
Marheshvan 25, 5683 of the Jewish Calendar.

Brigadier-General Sir W. H. Manning, Governor of Ceylon, has arrived in England.

General Sir Archibald Hunter has resigned his commission as Deputy Lieutenant of Ayrshire.

King George of Greece has conferred upon Dr. Nansen the Grand Cross of the Order of George I.

Sir Rennell Rodd has left London to join Lady Rodd in Rome, where they will spend the winter.

Mr. Rudyard Kipling has been elected Rector of St. Andrews University in succession to Sir James M. Barrie.

Sir Ian Malcolm has left London for the Suez Canal. He will be absent until the middle of December.

The Persian Minister is now in Paris and will afterwards proceed to Berlin, returning to town in a week's time.

Sir John and Miss Norton-Griffiths arrived last week at 90, Eaton Square from South America. Telephone, Victoria 1426.

The Shah of Persia and his suite embarked last week at Marseilles in the P. and O. steamship Naldera en route to Bombay.

Prince Antoine Bibesco, Roumanian Minister in Washington, and Princess Antoine Bibesco sail from England on the 25th inst. for the United States.

Prince Nadar Mirza Arestch, the newly appointed Counsellor to the Persian Legation, has arrived in London from Teheran, and entered upon his duties.

At St. James's Palace on November 10 the Emir Abdullah of Transjordania was received by the Prince of Wales. He expects to leave London this week for Palestine.

M. Kostoff, Director of the Bulgarian Technegraphical Museum, has arrived in London in connection with the League of Nations Union Exhibition at St. Albans, opened last week by the Marchioness of Salisbury.

A lecture on "Bulgaria" was delivered on Monday at the City of London College, Moorfields, by M. Petroff Tchomakoff, First Secretary of the Bulgarian Legation. The chair was taken by the Right Hon. Lord Newton.

A marriage has been arranged between Yolande Doreen Clifford Stoveld, younger daughter of William Clifford Townshend Stoveld, The Old House, Debenham, Suffolk, late of Starston, Norfolk, and Arthur F. Jones, R.A.F., Ambala, India.

Admiral Mark Kerr, late Commander-in-Chief of the Royal Hellenic Navy and Head of the British Naval Mission to Greece, contributes a preface to Mr. G. F. Abbott's new book, "Greece and the Allies," which will be published shortly by Messrs. Methuen.

There will be a service in the Royal Military Chapel, Wellington Barracks, at 11 o'clock next Saturday, at which the memorial to Lieut.-General Sir F. S. Maude, late Coldstream Guards, will be unveiled by Lieut.-General Sir A. E. Codrington, Colonel of the Coldstream Guards.

The engagement is announced between Allan L. A. Perry-Keene, of the Royal Air Force, eldest son of Mr. L. H. A. Perry-Keene, of Rednal, Birmingham, and Katrine Lucy, only daughter of Mr. C. A. Silberrad, I.C.S. (retired), and Mrs. Silberrad, of Park House, Combe Martin, N. Devon.

A marriage has been arranged, and will take place at the end of the year, between Captain A. A. E. Chitty, the Queen's Own Royal West Kent Regiment, only son of the late Lieutenant-Colonel E. R. I. Chitty, Indian Army, and Anna, younger daughter of Colonel W. H. Ogilvie, C.M.G., I.M.S.

A marriage has been arranged, and will take place quietly in London in December, between John R. M. Stephen, late Indian Army, son of Mr. and Mrs. C. R. Stephen, Fairfield, Scartho, near Grimsby, and Blanche, youngest daughter of the late Captain W. Hathway, Wiltshire Regiment, and the late Mrs. Hathway, The Cottage, Bicknoller, Somerset.

The engagement is announced between Captain A. M. Waistell, D.S.C. (R.A.F., retired), youngest son of the late Mr. Charles Waistell, Northallerton, Yorkshire, and Mrs. Waistell, Totland Bay, I.W., and Honora Mary, elder daughter of Mr. and Mrs. F. H. Christian, Midlington, Droxford, Hants. The marriage will take place in India early in March.

A marriage has been arranged, and will take place shortly in Montevideo, between David Anderson Craig, D.S.O. (late lieutenant and adjutant, Grenadier Guards), son of Mr. D. A. Craig, of Arbroath, and Kathleen Mary, only daughter of the late Major Harry Chalmers Hudson, I.M.S., 16th Bengal Lancers, and Mrs. Alec Reid, of 39, St. Paul's Avenue, N.W.2.

A marriage has been arranged and will take place in January between Major Harold Neil Robinson, late "The King's," fourth son of the late Arthur Robinson, of Liverpool, and of Mrs. Robinson, Ash Priors, Cheltenham, and Alice Frances Holbrow, widow of Sir John Tankerville Goldney, of Monks Park, Corsham, Wilts, and eldest daughter of Major F. C. N. Goldney, Indian Army, retired, 8th Gurkha Rifles.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

The engagement is announced between Captain Basil Fraser Beatson, Indian Medical Service, only son of the late John Fullarton Beatson, of 60, Cleveland Square, Hyde Park, W., and Mrs. Beatson, and Emily Margaret, eldest daughter of the late Thomas Frame Thomson, of Caen Wood Towers, Highgate, and Mrs. Frame Thomson, and niece and adopted daughter of Mrs. J. Murray Tulloch, of Purley Hall, Pangbourne.

An engagement is announced between Captain John Brownlow, 7th Light Cavalry, I.A., youngest son of Colonel C. C. Brownlow, C.B., and Mrs. Brownlow, of Stoatley Copse, Haslemere, and Mildred, daughter of Brigadier-General A. W. Taylor, the Queen's Regiment, and the late Mrs. Taylor, and granddaughter of the late General Sir Alex. Taylor, G.C.B., R.E., President, R.I.E.C., Coopers Hill, and of the late John G. Pilcher, J.P., D.L., and Mrs. Pilcher, Bellefields, Englefield Green.

APPOINTMENTS, Etc.

Captain G. Panas has been appointed Naval Attaché to the Greek Legation in London.

M. M. G. Y. Yanopoulos has been appointed Greek Consul at Cardiff. He was formerly Acting Secretary to the Legation in London.

Mr. U. Grant Smith, the recently appointed American Minister to Albania, has arrived in London from Washington on his way to Durazzo.

Jaafer Pasha al Askeri, Minister of Defence at Baghdad, has been appointed representative of the Iraq Government in London and at Lausanne. He is due in London this week.

The King has approved the appointment of Mr. John Charles Tudor Vaughan, his Majesty's Envoy Extraordinary and Minister Plenipotentiary to the Republic of Chile, to be his Majesty's Envoy Extraordinary and Minister Plenipotentiary to the Republics of Esthonia and Latvia and his Majesty's Commissioner and Consul-General to the Republic of Lithuania. Among other places where Mr. Vaughan has served diplomatically are Athens, Cairo, and Constantinople.

As the result of Air Vice-Marshal Salmond's visit to India, the Air Command in India has been raised to the dignity of an Air Vice-Marshal's command. Air Vice-Marshal P. W. Game has been appointed to the post in the place of the present commander, Air Commodore Tom I. Webb-Bowen, Air Officer Commanding R.A.F. in India. Air Commodore Webb-Bowen will return to England. The headquarters of the Indian Air establishment will be transferred from Ambala to Delhi, and in the hot weather to Simla.

OBITUARY.

The death is reported from Mussoorie, India, of the Rev. William Hooper, D.D., who was known as a translator of Indian languages. Ordained in 1861, he entered on his long career as a missionary in India in the service of the C.M.S., being stationed first at Benares. In 1867 he moved to Calcutta. Afterwards at Lahore, he became Principal of St. John's Divinity School, occupying that position for about five years. He was appointed in 1881 Principal of St. Paul's Divinity School at Allahabad, where he remained until 1887. After two years' ministry at Auckland, New Zealand, he once again returned to India, joining the C.M.S. Mission at Mussoorie. Dr. Hooper was a voluminous writer, some of his works being translations into Hindi and Urdu.

The death occurred recently of Colonel William Nevill Tufnell, who was one of the last surviving officers who served in the Crimean War. He was at the Battle of Alma, took part in the bombardment of Sebastopol, and subsequently saw all the grim work with the Naval Brigade in the trenches of Balaclava, as well as the Battle of Inkerman.

The death is announced of the Rev. Brook Deedes, formerly Archdeacon of Hampstead. He went out to India in 1877 as domestic chaplain to the Bishop of Calcutta (Dr. E. R. Johnson). Then, in 1885, he became chaplain at Allahabad, and in 1892 Archdeacon of Lucknow at the beginning of Dr. Clifford's episcopate; he was also at various times chaplain at Naini Tal and at Moradabad. He returned to England in 1897.

Where to stay in the East

CAIRO

THE
CONTINENTAL - SAVOY
THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO.

Entirely Renewed. Overlooking Ezbekieh Gardens. Opera Square. Famous Terraces. 400 Rooms. 200 Bathrooms. Cairo's Fashionable Grill-Room Restaurant. Daily Concerts. Weekly Dances. Open all the year round

THURSDAY, NOVEMBER 16, 1922.

THE STATES OF INDIA.

The early stages in the development of the new Constitution granted by Parliament to British India have presented a spectacle so absorbing that observers at a distance may have been tempted to forget that it does not cover the whole field. Side by side with the nascent provincial democracies, or, rather, interspersed among them, are populations aggregating about seventy millions, who have as yet been given no effective portion, or even promise, of self-government, but are ruled, as their ancestors have been ruled for an indefinite number of centuries, by the unfettered wills of Princes as absolute within their dominions as Solomon or Akbar. The recent clash between the Viceroy and the Legislative Assembly over a measure affecting the position of these States may serve to remind such observers that India is now divided between two theories of government which are fundamentally opposed, but which are brought into such intimate contact that some kind of interaction is inevitable. All over the country nascent democracy is separated from hoary autocracy merely by lines on the map, lines crossed by roads and railways and telegraphs, lines on each side of which live people alike in race, language, and religion, and linked together by innumerable ties. In such circumstances as these the conflict of ideals can scarcely fail to become acute, and it may be well to attempt a forecast of the course which it is likely to take. At the outset we shall doubtless be told that there is no real conflict, that all India is substantially of one mind, and that many of the Princes have already taken important steps in the direction of democracy. Such ideas are widely expressed in India, but they do not accord with the facts. It is true that some of the Princes have done much to liberalise their methods of administration, that they have taken some classes of their subjects into council, and have permitted, or even invited, criticism within narrow limits of their official acts: but in all such measures the royal prerogative has been expressly safeguarded, and as yet there has been nothing which can justly be described as a transfer of sovereign power. The Princes stand for the old Indian tradition of autocracy, with which Parliament has decided to break, and their position is thus clearly contrasted with that occupied by the majority of educated Indians, who, under British inspiration, have accepted the ideal of democratic self-government, while they have surrendered themselves to the attractions of the vision of a homogeneous and united Indian nation. To such men every autocratic State must appear as a dangerous stronghold of reaction, while they themselves must appear to the rulers as not less dangerous firebrands of revolt. The parties are too closely in contact to let each other alone, and the ideals by which they are influenced admit of no permanent compromise.

The immediate prospect, then, is not of harmony, but rather of increasing friction. Convinced adherents of democracy are almost bound to work for its adoption within the States, and the conditions which prevail make it practically certain that their agitation will be conducted from British territory. It was probably a vague realisation of these conditions which prompted the ill-considered opposition to the measure recently certified by the Viceroy, but that measure is of very restricted application, and leaves a wide scope for honest political discussion. We must anticipate that such discussion will proceed in increasing volume, and we must recognise the probability that the Legislative Assembly will be drawn into an attitude of definite hostility to the Princes, an attitude which will find expression in the course of its ordinary business. The Princes, on their side, are not likely to keep silence. They may not appeal openly to public opinion, but through the recognised channels they will press their views on the Government of India, which will thus be placed in a very delicate situation. It will be the duty of the Viceroy, in particular, to hold the scales evenly, and it is scarcely to be expected that he will be able to do this to the satisfaction of both parties, because in the actual circumstances the light of reason will be obscured by passion. During this period of transition, then, it is of the utmost importance that the voice of unprejudiced opinion shall make itself heard above the clamour of partisans. It must be equally ready to recognise the claim of the Princes to govern their peoples in their own way, and the claim of honest democrats to propagate their opinions by all legitimate channels, but at the same time it must press steadily for a reasonable accommodation where these claims appear to conflict, and must condemn unsparingly every attempt to mobilise the forces of passion and prejudice on either side. Difficulties are practically certain to arise from time to time; the conflict of ideals cannot be decided in a moment, and the true interests of both parties lie in such temporary accommodations as may give scope for the gradual operation of the ultimately decisive forces.

What the decision will be must depend largely on the fate of the present Indian Constitution. As we have recently pointed out, Parliament stands committed to the ideal of responsible self-government for British India, but retains freedom of choice regarding the methods by which that ideal shall be realised. It has decided in the first place to work on Western models, which are now on their trial, and are being attacked openly and in secret by an important section of opinion, commanding ample supplies of money and some of the best brains in the country, and at the same time destitute of any restraining sense of responsibility. Should this attack succeed, Parliament will have to try again, possibly abandoning Western models, and building, more slowly, but perhaps more surely, on the foundation of institutions already existing in the country. In that event it will be possible to claim that the present attitude of the Princes has been justified, and, in any case, it will be so strengthened as to ensure its maintenance for an indefinite period. If, on the other hand, the new political institutions should weather the storm which has gathered—as all Englishmen must hope they will—then it can scarcely be questioned that the principle of autocracy will have received its death-wound, though it may linger for a time, its slow decay serving to remind Indians in general of the past from which they have escaped. Speaking for ourselves, we should view its ultimate disappearance without regret, for, looking back through the centuries, and making every allowance for the records and the myths of beneficent despots in the past, the hard fact remains that the institution, more than any other single cause, is responsible for the low standards of life, whether physical, economic, or

Digitized by Google

moral, which characterise India at the present day, and which constitute the real obstacles to the progress that we all desire. But the retrospect shows also that anarchy is worse than autocracy, and it is not yet certain that Parliament will be successful in avoiding the greater danger. Until that question has been settled, it would be premature to urge that the Princes should hastily abandon the old traditions of their country.

MAGIC IN MESOPOTAMIA.

By E. S. STEVENS.

(*Continued from page 377, September 21.*)

There are many charms supposed to make the wearer invulnerable. A political officer of my acquaintance was given such a charm by a Rabbi in Basrah. It was a small leathern packet containing, among other things, five needles, five silken threads of different colours, the name of his mother, the date of her birth and of his. Before he prepared it, the Rabbi fasted for forty-eight hours. He assured my informant that this amulet would secure its wearer invulnerability to spear-thrust or bullet. Another amulet to make the wearer invulnerable is procured thus. Catch a lark sound and perfect and take him at full moon to a graveyard. Select a tomb, and upon it kindle a fire. Set a pot of water upon it, but keep your back turned upon the tomb all the time. Next, kill the lark behind your back, and—still behind your back—put him into the pot. There let him boil and boil until he is all boiled away—that is, until all is fluid except one little bone, which will not boil away. The light of the moon will fall upon this and make it gleam white. Take this bone, put it in a leathern case, and wear it. It will prevent bullets from harming you. A hoopoe may also be used in the same manner, but the bone is selected by putting all the bones into running water. The bone that floats *up-stream* against the current is the magic bone, and must be secured. It is fatal to speak during the operation. A person I know was shown a dumb man in a coffee-house one day. This man had been performing the hoopoe charm, and while he was in the cemetery and the bird a-boiling, a jinn called his name "Ahmed, where are you?" Forgetting, he called out: "I am here!" and was smitten with dumbness from that moment. A man breaking the spell thus is liable to be soundly drubbed by evil spirits.

Jinns may be kindly or mischievous. They like to use the underground chambers or sirdabs, to which people retreat during the great heat of summer days, and sometimes make a great noise by night, singing and dancing and shrieking. But they do no harm unless disturbed. In the house next to my own, a jinn is said to inhabit a tree, and he knocks sometimes at the window. A man told me his grandmother had her clothes borrowed one night by the jinns for a jinn wedding. "How did she know?" I asked, for all the clothes were there the next morning and the box locked as before. "There was henna on the clothes, so she knew the jinns had used them." A knife, a pin, a needle, or a bean called "habbet soda" placed among one's possessions will prevent the jinns from borrowing them. Some jinns are very mischievous and will burn or destroy things in the house, covering food with dust and dirt, and otherwise misbehaving themselves. Others are industrious, and, like brownies, will do the work of the house before the good wife is astir, even to doing her marketing for her. Jinns are susceptible to human beauty, and fall in love with human maidens. A pretty girl on waking in the morning will sometimes find a piece of gold on her pillow, and knows that a jinn lover has been visiting her. Sometimes they are not content with this. A girl, roused one night by a voice calling her by name, went down to the sirdab or cellar-room. The mother woke and followed her, but found the sirdab door locked. She called her daughter by name, and a faint and distant voice answered: "I am here," but when a way was forced into the sirdab nothing was found but a hole in the ground. A man told me that his grandfather once saw a sheep walking in the Christian quarter in Baghdad, and brought him home. His wife bade him put it out, as it was a jinn. He would not believe her, but tied the sheep up for the night in the courtyard. Next morning the corpse of a stranger lay below. Horrified, they dragged it out into the street—when it turned into a sheep and trotted off.

A ruder and clumsier person is the hobgoblin known as the Tantal. He leaps upon the backs of passers-by at night, and puts his foot in front of a man so that he is unable to stir without seeing what it is that hinders him. He is said by those who have seen him, to be as high as a minaret, and delights in fantastic and coarse tricks.

Violent love is looked upon as a madness or a possession to be cured by exorcism. Recently a young Jewish woman fell in love with a young man, she being married to another. She was subjected to ablutions, fastings, beatings, prayers, and magic potations. Finally, to complete the cure she went into the rabbi's house for a time, and came out directly free from her infatuation. With the Bedouin, love-philtres are concocted by the old women of the tribe. A political officer tells me that he has had complaints from parents that some young man had managed to get medicine, food, or even a piece of cloth, smeared with a love potion, smuggled in to their daughter, on eating, drinking, or wearing which the girl had become madly in love with the sender. The only cure is to send for the Alim to read portions of the Koran to the damsel, to wash her several times a day, and to give her specially prepared food. Or, as a last resort supposing the match is not too unsuitable, and the young people obstinate—they might even marry!

(Concluded.)

THE NEW EGYPTIAN CONSTITUTION.

(*From Our Own Correspondent.*)

CAIRO, November 1.

After deliberations which have lasted seven months the Constitution Commission, of which His Excellency Hussein Pasha Rushdi is chairman, has delivered to the Prime Minister its report and recommendations on the new Constitution and new Electoral Law.

The proposed Constitution lays down that Egypt is an independent sovereign State and a hereditary constitutional monarchy in the line of Mohamed Aly. The title of the sovereign will be King of Egypt and the Sudan, and he will govern through his Ministers.

The parliamentary régime will be a two-chamber one, viz., a Senate and a House of Representatives. The Senate will have one hundred members, of whom thirty will be nominated, while the House of Representatives will have about two hundred and twenty members, all of whom will be elected. The proportion is fixed at one Representative for every 60,000 voters, and one Senator for 180,000 voters. The Senate will be renewed every five years, and the House of Representatives must be elected at least once every five years. The King will select the President of the Senate from a list of three members submitted by the Senators, while the House of Representatives will appoint its own Speaker.

The King will have the power to dissolve the House of Representatives at any time. He will also have the right of veto over laws passed by Parliament. This he can exercise in two ways, either by dissolving the House of Representatives, or by putting forward his objections for the con-

Digitized by Google

sideration of Parliament. In the event of his adopting the first course, he can no longer veto the measure if it is passed by the new House in the ordinary way. If, however, the King puts forward any objections, Parliament will discuss those objections, and if it rejects them and repasses the law by a two-thirds majority in each House, the King cannot withhold his signature. If, on the other hand, the majority in either House is less than two-thirds, the measure will be re-examined at the following session, and will become law if it is passed by an ordinary majority. If a measure remains in the hands of the King for a month without his recording his observations, that measure must become law.

Ministers will be directly responsible to Parliament for everything the Cabinet does, instead of to the Sovereign, as heretofore. No measure can become law unless it has been passed by both Houses. Special provision is made for the Budget, and it is laid down that until the new Budget has been passed the old one will remain in force. During the first five years, however, in view of the special circumstances which will govern Egypt's budgetary requirements, it is laid down that if the Budget is rejected by either House, both Houses will sit together, and the majority will prevail.

Whenever a new Sovereign comes to the throne Parliament will fix, before he takes the oath, his civil list and that of his family, but the Commission recommends that in the case of King Fuad the existing allowances should be maintained—viz., £E150,000 to the King and £E112,000 to his family. Members of the reigning family can sit in either House, but cannot become ministers.

The official language will be Arabic and the State religion Moslem. No censorship or restrictive control shall be exercised over the Press, except under Egyptian martial law. All inhabitants will enjoy religious freedom and equal rights without distinction of religion, race, or language. Europeans will benefit by all the liberties enjoyed by the Egyptians. The privileges conferred on them by the Capitulations will be respected as well as the Public Debt and existing international treaties.

The Commission lays down that the proposed Constitution shall not apply to the Sudan, although it is an integral part of the Egyptian Kingdom, but that a special administration shall be provided for it. The recommendations provide for the operation of provincial councils, for which a special law is to be drafted.

In the event of both Houses deciding that a revision of the Constitution is necessary on certain points, a joint meeting will be held and the decision of the majority will prevail, provided such majority be at least half the possible total members plus one. No decision of Parliament can, however, alter the provision that Egypt is a hereditary constitutional monarchy in the line of Mohamed Aly, or the principle of ministerial responsibility to Parliament; neither can any such decision vary the provisions referring to the rights of citizenship or the privileges of the Europeans.

Under the proposed new electoral law there will be universal suffrage. The Senate will be elected in three degrees and the House of Representatives in two degrees. Any Egyptian subject who can read and write satisfactorily, who is at least twenty years of age, and who has not lost his civic rights or been condemned for certain specified offences, will have a vote. Only voters can be candidates for either House.

For the Senate candidates can be members of the reigning family, past and present ministers, members of the Court of Appeal, the Chief Ulema, distinguished public servants, leading business men having an income of £E1,500 a year, deputies who have been elected for two terms, etc. No senator may be under forty years of age.

Any voter may stand as candidate for the House of Representatives provided he is thirty years of age. Where anyone is elected to both Houses he will be considered a member of the House to which he was last elected unless he relinquishes his claim within eight days. No administrative officer can be elected in the district in which he has jurisdiction. Active members of the fighting forces will have no vote. Those on half-pay will have a vote, but will be ineligible for election to the House of Representatives.

In the case of election appeals the House concerned will decide on the validity of the election. No member of either House may accept a Government appointment so long as he retains his seat. No member may accept a grade or decoration until a year after he has ceased to be a member of either House. No member may rent or purchase Government land. The report recommends that the same exemption from prosecution as is enjoyed by members of the British Parliament shall apply to members of the Egyptian Parliament.

The Standing Committee of the Indian Chamber of Princes is meeting for a short sitting at Delhi. The Chamber itself is expected to assemble in the first week of February.

THE TURKISH EMPIRE AND MINORITIES.

We have received from the Standing Committee of the Conference of Missionary Societies a document, drawn up by Mr. Basil Matthews and a small committee, which outlines a Christian attitude to the Near East problem. Extracts from this statement run as follow:—

The crux of the Near East problem essentially lies in the presence of minorities of alien race and religion within the territories of Greece and of Turkey. There are, for instance, the Christian minorities—Greek, Armenian, Nestorian, and Chaldean—in Turkey, and the Turkish-Moslem minorities in Greece, Yugoslavia, Bulgaria, and Roumania.

Considered broadly, the causes of the outrages against these minorities on both sides in the past lie, on the one hand, in the fear felt by the Governments of the power of those minorities, and, on the other hand, in the absence of good will or understanding. Any settlement of the problem on Christian lines must remove those fears, create that good will, and secure that the obligation of protecting the life, property, and religious liberty of these minorities is accepted and enforced by all Governments in the Near East, whether Christian or Moslem. It may be contended that, in the face of the facts of the situation, it is hopeless to attempt so to grapple with the problem. We refuse to accept that attitude.

As Christians, we know that the ultimate determining forces in the Near East—as everywhere—are not the physical factors of race and of geography, powerful as these are, but are the forces of the spirit. A fatalistic determinist attitude of despair rooted in materialistic convictions is, we hold, fundamentally false. Lord Acton was right when he said: "Ideas are the cause and not the result of public events." We are, therefore, convinced that a policy based on right principles may hopefully be pursued consistently and patiently over a period of years in the firm conviction that it will solve the problem.

The first step in that direction we believe to be the recognition of, and repentance by, Christendom for its own faults in the past in relation to the Near East, as, for instance, in the wholesale slaughter of the inhabitants of Jerusalem by the Crusaders. The second step is to assert and maintain consistently the principle that our primary obligation in the Near East is not to assert the power of the forces of Christendom in face of the forces of Islam, but to exercise the Christian spirit in our relations with the races of the Near East. To bring pressure to bear consistently alike in Christian and Moslem territories with absolute impartiality for the just delimitation of frontiers and for the provision of just laws and administration as between alien minorities and Governments is a primary duty. An immediately practicable step, for instance, would be that the League of Nations (with, we should hope, Turkey included) should have impartial representatives in all these places, watching the interests alike of the Moslem and Christian minorities there, and periodically reporting conditions to the League.

In these ways we should work toward the two ideals that have been envisaged here—the uprooting of fear and the planting of good will. But the third and most fundamental and powerful of the available forces is that of education. Already educational institutions in the Near East have—on the testimony of the highest historical witnesses like Lord Bryce—demonstrated in their class-rooms and sports grounds that differences of race and religion need not create hostility, and that a real comradeship can be developed cutting right across these divisive lines. We believe, then, that a real expansion of these fine experiments in education, based on international principles, would go far to create a new leadership for a harmonious Near East.

Distressed and ashamed as we are in fact of this age-long problem of the Near East, which is at once a blot upon, and a menace to, ordered civilisation, we desire to invite our fellow-Christians to join in working by all means in their power towards its solution on such lines of co-operation and good will as we have here foreshadowed.

The ratification of the Afghan Treaty with Turkey is reported in the *Pioneer*. This treaty was drafted some time ago, but its ratification was delayed from various causes.

As a result of an agreement between Dr. Nansen and the Soviet Government, a Russian Red Cross Mission has gone to Sofia to arrange for the repatriation of Russian emigrants in Bulgaria who desire to return home.

The Primate of Roumania has informed the Polish Government that the Orthodox Synod of Roumania has taken note of the proclamation of the independence of the Orthodox Church of Poland, and the Primate has given his blessing to that Church.

ARABIA AND THE HEJAZ.

Under the auspices of the Central Asian Society, Lieut.-Col. C. E. Vickery, C.M.G., D.S.O., R.F.A., on November 8, at the Royal United Service Institution, delivered a lecture upon "Arabia and the Hejaz." The lecturer began with a few remarks on Arabia and Islamism. After pointing out that Arabia was, contrary to popular fancy, in the main an utterly unproductive country, he sketched the rise of Mohammedanism out of this country of idolatry. He referred to the proclamation by Abu Bekr of a "fundamental fact of Islamic history," that the Khalifate for ever by the decree of the voice of God was to remain in the Koreish—his tribe. Having briefly reviewed the subsequent history of Islam, he touched upon the state of Arabia a few years before the War, "when," he said, "nascent hopes of an Arab kingdom had been kindled in the minds of the Shereefian Arab who inhabited the Hejaz," to which region he then passed.

"The Hejaz," said the lecturer, "derives its name from the mountain range which forms the watershed between Nejd and the sea. The name means the divided. The country grows nothing; its exports are insignificant, and it lives on the pilgrims. It was ruled, like the Yemen, as a mediatised province by the Turks through the Shereef of Mecca. It was not independent, as were the central emirates of Hail and Riadh. The Shereef had, however, very great power." He proceeded to show how the ambitions of the Shereef had been fanned, and commented tersely on the possibilities of an Arab kingdom. From this he went on with a most amusing episode, in illustration of his experiences of the Arab as a fighter. After the battle of the Somme he was sent to the Hejaz, in the winter of 1916, as a member of the Military Mission. On arrival he learned that the capture of the small coastal town of Wejh, garrisoned by about 300 Turks, had been ordered by the Shereef. A plan had been drawn up by which the Navy should bombard the town, the Emir Faisal attack it from south and east, and the lecturer, with (originally) 800 Arabs, from the north. Things miscarried, however, so badly, owing to the indifference or something worse of Colonel Vickery's troops, that it was by him in charge of a detachment of sailors that the capture of Wejh was finally effected. (On this matter of fact readjustment had since been made by various journalists.) Colonel Vickery returned to France after this adventure, but two years later was once more in the Hejaz as British agent at Jeddah to the Shereef, now King Hussein. He did not find the internal state of the Hejaz good. "The Bedouin had broken out, and were raiding all caravans. The Hejaz was unwilling or powerless to control them. The withdrawal of gold supplies and the reduction of the subsidy were advanced by the King as reasons for the behaviour of the Bedouin, since he was unable to pay them to behave as in Turkish days. In history it would be difficult to find an example of a more autocratic or tyrannical administration." He concluded this sketch of the Hejaz with a description of its moral depravity and with the following illuminating commentary on the pilgrimage to Mecca. "After seeing two pilgrimages, I must observe that the numbers of the annual pilgrimage are, in my opinion, very grossly exaggerated. The preponderance of the lower classes amongst the pilgrims was overwhelming, nor was one greatly impressed by the appearance of any except the Javanese. The organisation of their pilgrimage was excellent. The pilgrims were all inoculated against cholera, typhus, and enteric, and looked a most respectable class. In them I see the greatest hope of a Moslem renaissance."

The lecturer then proceeded to give a short account of his journey beyond Mecca to Taif as the guest of King Hussein. It had not, he said, fallen to the lot of many Europeans to visit this Damascus of Arabia. He started out with a large escort from Jeddah, fifteen miles from which he was met by a Shereef of the Harb, who was to be his escort until he was handed over to the Shereef of Taif. The party travelled by the pilgrim route to Mecca. This route lay over a large open space intersected by the Wadi Fatma, near to which were traces of a very old irrigation of considerable extent. Stone aqueducts three feet in breadth by two in depth, and more than 600 years old, existed here in a state of perfect preservation. These sights, incidentally, led Colonel Vickery to ponder on the real reason for the unproductivity of Arabia, and he thought he found it in a remark made by the Emir Abdullah to the effect that the Hejaz wanted only one thing for its development, and that was a few Bedouin who would work as the fellaheen of Egypt did. They then branched off from the main Mecca road in order to skirt the holy city, until they were met by the Shereef of Taif, "an agreeable man and a wonderful horseman." This Shereef entertained them at his country villa, wherein the lecturer enjoyed the privilege of witnessing scenes that have remained unchanged for centuries. About a mile from Taif the party were met by the Emir Abdullah, and were conducted by him to the walled city of Taif, and subsequently to the audience hall of the King's stately palace where the Emir Ali was awaiting them. The scenes at Taif amazed the lecturer, for "here, in the midst of a great desert plain of Arabia, stood two wonder palaces, furnished with great luxury"; but in addition to the wonderful appointments and size of these desert palaces was a garden of exquisite beauty, containing not only fruits of all kinds, but a stone pool in which gold fish swam. "I sat and talked with these Shereefs of Arabia, and wondered if the world had gone back a thousand years, for we spoke of the Arabian heroes of old in surroundings that evoked memories of the tales of those hanging gardens in Babylon which challenged the envy and admiration of the world." Fourteen days were spent at Taif, and the return journey was made by another route. This route was the identical path as that by which "the prophet of Arabia had fled from Taif after his unsuccessful mission of proselytism, pursued by an angry mob to the outskirts of the holy city." The Emir Abdullah accompanied the party on the first stage, and goodbye was said to him at the head of the pass of Kura, from which a panorama could be viewed that excelled in beauty any which the lecturer had seen in the rest of Asia, Africa, and Europe. Continuing his journey, Colonel Vickery ascended Mount el Nur, "where the prophet of the wilderness sat and dreamed and communed with the Angel Gabriel." He passed round the holy city to the north, and subsequently went by the pilgrim road from the coast to Jeddah.

Hereupon the lecturer provided some extremely interesting lantern slides (lent by Mr. St. John Philby and reproduced in his book, "The Heart of Arabia"), dealing chiefly with Taif.

Colonel Vickery concluded a stimulating lecture with a statement of his opinion, and his reasons for it, that "Arabia is destined to play in the near future a far-reaching and important part in the maintenance, or even in the existence of our Empire."

In the subsequent discussion the speakers included Mr. D. G. Hogarth, Sir Michael O'Dwyer, and Captain Bennett.

FOR SMYRNA REFUGEES.

Readers of The Near East will, no doubt, be interested to know that the All-British Appeal (which combines the relief efforts of the Imperial War Relief Fund, the Save the Children Fund, and the Society of Friends) has been enabled, through the generosity of the British public, to despatch to Greece for the relief of refugees from Smyrna a trainload of some 250 tons of supplies. Expressing his relief when he learnt of the despatch of these supplies, M. de Reding (the delegate of the Save the Children Fund International Union, who is administering the British relief work at Athens) wrote: "I am very glad to hear of all the good things that the train is bringing to us. I shall go at once to the British Minister to tell him, and ask his advice about distribution. The 9,000 blankets will be extremely useful, as the children are sleeping on nothing but the floor. . . . From all parts of Greece, particularly from the islands, I receive urgent appeals for help. The conditions on the islands are growing worse and worse. Milk and flour are needed more than anything else." The latest despatches from M. de Reding convey the news that he has now been able to establish kitchens for the feeding of 6,200 children and 4,000 adults. Funds are urgently needed to ensure the continuance and extension of this work, and donations, which may be earmarked for either of the other organisations combining in the All-British Appeal, will be gratefully received by the Imperial War Relief Fund at General Buildings, Aldwych, W.C.2.

THE ARAB HORSE SOCIETY.

A Council meeting was held on October 31 at the Grosvenor Hotel, London, Lieut.-Col. P. D. Stewart, D.S.O. (Vice-President), being in the chair. There were also present:—Messrs. T. C. Armitage, H. V. M. Clark, Capt. T. A. Clarke, Messrs. R. B. Colton Fox, S. G. Hough, E. Hurtley, Major G. B. Ollivant, Mr. G. H. Ruxton, Brig.-Gen. C. Templer, C.M.G., C.I.E., and the Secretary, the Rev. D. B. Montefiore.

Arrangements were made with regard to the Arab and Arab-bred classes at the London Show, 1923.

The following new members were elected:—Major G. H. Barker, The Gables, Lvminge, Kent; A. Bostock, R.A. Mess, Aldershot; Geo. E. Collins, Aigburth, Lewes; Mrs. F. E. Forman, The Beeches, Cloughton, Scarborough, Yorks; Sir Thomas H. Fleming, Oak Lodge, Harrogate, Yorks; W. D. Garbutt, the Agricultural Department, Baghdad, Iraq; Mrs. E. Hatfield, Bottisham House, near Cambridge; R. L. Hutchins, R.A. Mess, Aldershot; Mrs. H. Patteson Lakin, Piper's Hill, near Leamington; Mrs. Walter McDougall, 1, West 89th Street, New York, U.S.A.; Mrs Hayes Sadler, Norsbury, Sutton Scotney, Hants; Major H. N. Fife Scott, 11, Chepstow Place, London, W.; Robert Wale, jun., Pitminster, near Taunton, Somersetshire; W. F. Watson, Couva, Trinidad, British West Indies.

PRESS ON THE NEAR EAST.

The New Turkey.

Upon the reported deposition of the Sultan of Turkey, the *Manchester Guardian* of November 3 says that the news, if true, is not unexpected :—

> It is the logical outcome not only of the accidents of war, which made of the present Sultan-Khalif a pawn in the hands of the Allies, but of the nationalist and democratic tendencies of Mustapha Kemal and his associates. With the growing strength of Angora the breach with Constantinople has steadily widened. When he first became an effective force in Turkey, Kemal preserved a nominal allegiance to the Sultan; and the odd situation persisted of a Nationalist leader expressing formal fealty to a ruler who had declared him and his followers to be outlaws. Latterly, as Kemal has developed his programme for securing in Turkey a democratic régime on a Western model, it has been clear that he would have to face the problem, which all Western States had surmounted long before, of separating temporal and spiritual power in government. The way for this step was paved not long ago in a widely quoted speech by the new Kemalist Governor of Thrace, in which the likelihood that the Khalif might cease to be Sultan was frankly examined. If the terms of Angora's decision are correctly reported, the forward move has now been boldly and decisively made. Not only is the Sultan deposed, but the Assembly asserts its intention to choose his successor "without regard to dynastic rights." It may well be a landmark in world history. Throughout thirty-six generations of the descendants of Othman, a son of his family has been despotic ruler of Turkey and head of the Moslem faith. The consequences of disturbing the succession and, what is more important, of divesting the Khalif of his earthly rule, may be as important to the world as was the ending of the Papacy's temporal power. It gives to the Turkish people a chance to fall into line with the free democracies of the West, and it destroys at the same blow the vague but incalculably strong hold that the ruler in Constantinople has for centuries had upon the sympathies of Moslems the world over. The decision the Kemalists have made is one whose courage Western civilisation must needs approve. How far it may redound throughout the East to the embarrassment of the new Turkish Government has yet to be seen.

Articles to Note.

"Industrial Conditions and Trade Unions in India," by Michael Prothero, and "Georgia," by W. E. D. Allen, in the *Edinburgh Review* (October).

"From the Outposts: Egypt—March-April, 1919," by Hasta; and "A Consul in the Making," by A. C. Wratislaw, C.B., C.M.G., C.B.E., in *Blackwood's* (November).

"India's Criminal Tribes," in *Chambers's Journal* (November).

"The Near East and the Late Government," by the Marquess of Crewe; "The Crisis as seen in Constantinople," by Major-General Sir Frederick Maurice; "Common Sense for India," by Lord Meston; "The Estrangement Between France and England"; and "Mustafa Kemal." by J. G. B., in the *Contemporary Review* (November).

On the report of Professor Calines, of Luxembourg, the League of Nations is, as announced in The Near East some weeks ago, sending a financial adviser to assist Albania. That State has a sound currency on a gold basis, but possesses no credit organisation or internal trade.

THE EMIR ABDULLAH.

The Emir Abdullah of Transjordania was the guest of the British Government at a luncheon given in his honour on November 13, at the Carlton Hotel. Lord Carnarvon presided. Professor E. G. Browne, of Cambridge, speaking in Arabic, said that all hoped the Emir's visit to England would strengthen the bonds of friendship between the Arabs and the English. The Emir Abdullah, in reply, said, among other things, that so long as King Hussein was friendly to Great Britain, Great Britain could rely on the friendship of all the Arabs. Among those present were:—Rikabi Pasha, Professor E. G. Browne, Sir E. Denison Ross, Sir John Cadman, General Sir John Maxwell, Sir John Risby, Sir John Shuckburgh, the Hon. C. C. Farrer, Sir Gilbert Clayton, Professor D. S. Margoliouth, Dr. Taisir, Major-General A. W. Money, Akram Bey, Sir J. Masterman-Smith, Sir Cecil Hurst, Sir Michael O'Dwyer, Mr. H. St J. Philby, Air-Marshal Sir H. Trenchard, Sir Thomas Haycraft, Colonel Gabriel, Mr. R. V. Vernon, Colonel Howes, Major A. L. Holt, Mr. E. G. Forbes Adam, Captain Bennett, Major T. E. Gullick, and Mr. E. E. Beare.

"COMING EVENTS."

We have received from Messrs. Raphael Tuck and Co. a parcel of specimens of their Christmas and New Year cards, calendars, and children's books, which prove that, far from resting on their laurels, the firm is bent on excelling their achievements of previous seasons. The extremely high level maintained year after year by Messrs. Tuck's productions is indeed surprising, and any article bearing their name is sure to be good of its kind. Great ingenuity is displayed in designing the calendars of various types, and among them will be found varieties to suit all tastes. As to the Christmas and New Year cards, the choice appears to be practically limitless, and prices are arranged to suit all purses; so that the only trouble the purchaser is likely to experience is which to choose among so many fascinating cards. We suspect that many people placed in this predicament will be guided by the choice of Royalty and select the same cards as the King, the Queen, Queen Alexandra, the Prince of Wales, or Princess Mary. These Royal cards are, as usual, very fine in all ways, and Messrs. Tuck are to be heartily congratulated upon the manner in which they are produced.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K., Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

The New Sudan Railway.

At the meeting of the Sudan Plantations Syndicate, reference was made to the construction of a railway line from Kassala to the Port Sudan-Atbara line. The registration is now announced of the Kassala Railway Company. The company, which has a nominal capital of £10,000, is to construct and operate a railway from Thamian to Kassala. Provision is made for the issue forthwith of £1,250,000 debentures, which will bear interest at the rate of not more than 6 per cent. per annum.

Need for Empire Cotton.

With the appearance of this company the project for opening up Kassala as a cotton-growing district may be said to be well under weigh, a fact which will give widespread cause for satisfaction, for while the progress made in cotton growing in the Sudan and elsewhere has been very considerable in the last few years, the production of the British Empire as yet amounts to only a very small fraction of what it must if we are to reach the ideal of self-sufficiency. And the need for rapid progress in this direction, it must be emphasised, is very urgent. We are no longer in a position of being able to rely on external sources of supply. At the moment it is true that they are adequate to meet our requirements, but there have long been indications that this would not always be the case. The American crop is now a very unsafe factor on which to count. While the crop is continually on the decrease, American consumption is rapidly increasing, and it requires no great prevision to foresee the time when America's capacity for exporting cotton will be very severely limited. What would be Lancashire's position then without alternative sources of supply?

The Present Position.

The crisis, it may be pointed out, would probably have arisen by now if the world was in a position to take its normal supplies of cotton goods. But as a result of the war, the world's purchasing power has been greatly restricted, and many markets are not able to buy to any great extent. They are one and all short of supplies now, and when the time comes, as it will come soon, for the resumption of buying on an extensive scale, the effect on the cotton position is likely to be very pronounced. Briefly, the world's production of cotton has not kept pace with the world's potential consumption, and as we are not able to control the bulk of the present production, it is very obvious that this country will be badly situated when there is a real demand for cotton. Not to mince words, it is clear that Lancashire will then have to go short unless in the meantime Empire production has been placed on a satisfactory basis. That is why in the interests of this country every effort must be made to advance schemes such as that for the Kassala district.

Suspense at Constantinople.

In our "Specal Market Reports," whch will be found elsewhere, is given a survey of the Constantinople market in October, which throws a vivid light on the effect on the business community there of the present uncertainty. Orders have been cancelled, goods in the warehouses re-exported, and many merchants have left the city. Developments since the end of October have naturally made the position much worse, and it should by now be clear to the Nationalists that self-interest alone dictates the prudence of a policy which will lead to the restoration of confidence. The trade of Constantinople as much as that of Smyrna was due to the energy of the foreign elements. Without their co-operation it would be impossible for Constantinople to remain a commercial centre of the first importance, for the Turks, left to themselves, are unequal to putting forth the necessary energy and enterprise. Turkey must, in short, depend on foreign assistance, and the only effect of unwise measures on the part of the Nationalists will be to render more arduous the task of reconstruction.

Phœnix and Roumanian Consolidated.

A very interesting development in regard to two of the leading Roumanian oil companies is now apparently on the tapis. According to the *Petroleum Times*, "it may be taken for granted that the negotiations which have for some time been on foot by the board of the Phœnix Oil and Transport Company, Ltd., to acquire the Roumanian Consolidated Oilfields, Ltd., have so far advanced that it is practically a certainty that the proposal will go through." The development is one which could scarcely fail to have satisfactory results for both companies. The Phœnix Company in the course of its brief career has an excellent record of progress to its credit, and it is generally believed that the coming report will contain a recommendation for the payment of an initial dividend. The present price of the company's shares sufficiently indicates the prospects of the concern. The Roumanian Consolidated Oilfields did well up to the war, and by now would doubtless be a highly prosperous concern. Unfortunately it suffered severely during the war; and its activities have been restricted by the need for further capital with which to develop its extremely valuable properties. Apart from the mutual benefit that might be expected to accrue to the companies, the amalgamation could not be other than beneficial for British interests, which could not fail to gain by the union of these important concerns.

COMMENTATOR.

BANK OF ROUMANIA LIMITED
(FOUNDED 1866).

Head Office: **64, CORNHILL, LONDON. E.C.3.**

GREECE.

Athens, November 4.

Exchange Operations.

Now that the Syndicate of Banks has been abolished, all exchange operations are free. Certain restrictions, however, concerning the export of various products appear in the new law which has been published in the official *Gazette*, and which briefly reads as follows :—

1. The State reserves, at a rate of exchange which will be fixed from time to time, all foreign exchange accruing in respect of the export of currants, tobacco, figs, and olive oil.

2. The State also reserves 15 per cent. of all exchange bought daily by banks and bankers. This percentage shall be paid into the National Bank of Greece for the account of the State, at the average rate of exchange at which it has been obtained.

3. The National Bank of Greece is authorised to buy foreign exchange for account of the State against the issue of bank-notes over and above the amount authorised by the laws and conventions actually in force, but only in case of actual necessity.

4. Forward operations in foreign exchange and Greek bonds issued in foreign currencies are forbidden.

5. Advances against foreign exchanges or securities are also prohibited.

6. Deposits in foreign currencies held by banks or bankers are payable in drachmæ at the rate of exchange in the free market on the day of payment.

7. Banks and bankers are obliged to sell foreign exchanges bought by them to merchants and others for the needs of commerce and industry, as shall be determined by proofs which must be handed to the bank or banker.

8. The State acquires, at the official rate of exchange, all foreign exchange which is the proceeds of goods of whatever nature exported prior to the date of the present law.

The following clauses of the new law refer to the export of the four commodities mentioned in Article I. :—

(1) The export of currants, tobacco, figs, and olive oil shall only be effected through the banks authorised at this end. Such banks shall be responsible to the State for the entry of the equivalent amount of foreign exchange. The value of this exchange will be determined by a special commission, and the estimate shall be made in foreign currency.

(2) If the sale of the commodity is effected against a simple or confirmed credit opened in Greece from abroad, the banks or bankers through whom the credit is opened will be obliged, immediately upon receipt of the shipping documents, to convert into drachmæ, to the credit of the party interested and at the official rate of exchange, the equivalent of the foreign currency of the value of the goods.

(3) If the sale is effected against a draft drawn, the banks or bankers who negotiate the draft are obliged to convert immediately into drachmæ, at the official rate, 80 per cent. of the value of the goods in foreign money, the conversion of the balance to take place on completion of the transaction.

(4) Export on consignment of the commodities in question may only be effected through the authorised banks or bankers, who are obliged, immediately upon receipt of the relative shipping documents, to convert into drachmæ, at the official rate of exchange, 65 per cent. of the value of the goods in foreign currency, the conversion of the balance to take place as and when advices of the partial or total sales shall be received.

(5) As far as tobacco is concerned, the export may be effected not necessarily through the intermediary of a bank, but a bank's declaration certifying that during the ten previous months foreign exchange to the required amount has been introduced by the interested parties, and ceded to the late Syndicate of Banks, must be produced to the Customs authorities.

(6) It is forbidden to effect advances in drachmæ against shipping documents of the four commodities in question.

It will be seen from the above that there are now two rates of exchange in force in Greece that of the free market, and that which will be fixed from time to time for the export of currants, tobacco, figs, and olive oil.

ROUMANIA.

Bucharest, November 4.

Rolling-Stock for the Railways.

The local Press reports that correspondence has passed between the British and Roumanian Governments regarding the provision of rolling stock for the Roumanian railways.

The British Government has drawn the attention of the Roumanian Government to the large output of locomotives and railway rolling stock in Great Britain, and has invited it to cover its requirements from British industry. It has further pointed out that the English financial market has shown its readiness to carry out the funding of the Roumanian Treasury Bonds floating abroad, intimating at the same time that Roumania should in turn cover its needs in rolling-stock from Great Britain.

The Roumanian Government has replied that the Roumanian State is not at present in a financial position to make fresh investments in rolling stock, but that as soon as the necessary funds are available it will not fail to give preference to British industry, although the agreement with the British bankers' group for the conversion did not involve the obligation on Roumania to order her requirements from Great Britain.

A Wet Autumn.

This autumn the weather has gone to the other extreme as compared with last autumn, when this country experienced one of the worst droughts known. It has been raining for rather more than a month, with very rare and short intervals, and during the last week it has simply poured without cessation. According to reports from the provinces, the rain is general throughout the country, and is causing great anxiety, particularly to farmers, for it is delaying the autumn sowings and causing considerable damage to the maize crop and vintage. Moreover, this constant rain is not doing much good to the foundations of railway tracks and bridges, which even before were not too sound.

The oil output of the Anglo-Egyptian Oilfields for the week ended November 10 amounted to: Gemsah, 45 tons (last week, 41 tons); Hurghada, 3,382 tons (last week, 3,465 tons).

THE MOTOR SHOW.

(*From Our Own Correspondent.*)

Humber.

The stand of Messrs. Humber, Ltd., came in for considerable attention, as was only to be expected, for the cars of this well-known firm have built up a solid and enduring reputation. The exhibits included the 15.9 saloon landaulette and touring car, the 11.4 saloon and touring car, and the 8 h.p. light car. The 15.9 cars are very fine productions, particularly the saloon. They are fitted with four speeds, there is forced water circulation, and they have a C.A.V. dynamo lighting and electric starting set. The well-known 11.4 car, like the 15.9, contains various improvements which are calculated to bring it still further into general favour. A feature of special interest is that certain parts are now interchangeable between the two types of cars. The new light car, needless to say, came in for particular attention. It is in every way a sound production. Its upholstery, etc., are on the general lines of the Humber cars, and it is very pleasing in appearance as well as being distinctly workmanlike. It seats two passengers, and there is accommodation behind for two children, this space being available for luggage instead if required, and is completed with an all-weather hood and side screens. The price is £275, at which one can well imagine it will meet with a good demand.

Crossley.

The stand of this famous firm was one of the features of the show. The exhibits consisted of the 19.6 type car built for the Prince of Wales, a 19.6 h.p. five-seater, a 12.14 h.p. four-seater and two-seater. The Royal car has a special interior divan body by Messrs. Barker and Co., Ltd., and is fitted with Triplex glass. The 12.14 h.p. Crossley car was also the subject of general interest. Well appointed throughout, it makes a very good showing, and will appeal to all those who like a really smart car. The four-seater has two doors on each side of the car, and is fitted with a hood, which folds neatly into its envelope when not in use, and all-weather side curtains, which open with the doors, and for which a cupboard is provided in the back of the front seat. It has, I should say, very sound claims to be regarded as the best four-seater of its class in the show. Certainly it meets to the full the requirements of the motorist who requires an inexpensive car for all purposes. The two-seater, like the large type, is a very fine and serviceable car. In addition to the seat in front, there is room for two more passengers on a folding dickey seat. The car is equipped with a "one-man" hood with envelope and all-weather curtains, as in the case of the four-seater.

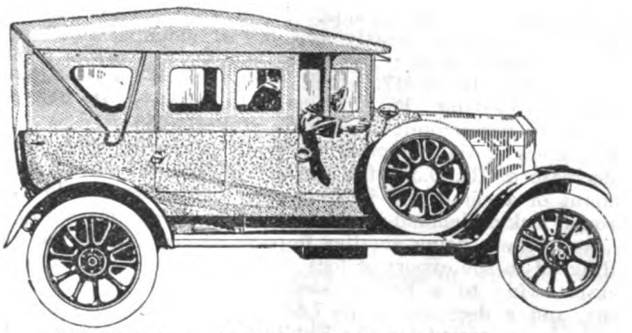
Overland.

At the stand of Messrs. Willys Overland Crossley, Ltd., the famous Overland all-weather touring and landaulette cars were exhibited. The construction of their all-weather car is the embodiment of the finest qualities of modern motor-car engineering. This car, as the name indicates, has been specially designed and built for all vagaries of the weather, and can be quickly converted from an open tourer to a comfortable saloon car. The hood can be opened or closed at a moment's notice, while a special feature is the felt-line channels, which prevent the window from jars and dispense with the annoying rattle which is so frequent with many cars. All interior and exterior fittings are heavily nickel-plated, while the upholstery is everything that could be desired; and can be had in grey Bedford cord or real leather.

The Overland three-quarter landaulette is also an admirable production, which proves that British workmanship still surpasses any other. This car is similar in design to the all-weather pattern, except that the whole chassis is built on a more elaborate style. Anti-squeak material is placed between the sill and frame, which eliminates all noises, while the framework is built of dry-stored and seasoned stout ash with non-drumming metal panels. This car is especially suitable for long distances and should be invaluable to the traveller.

Service Motor.

Another stand of interest was that of the Service Motor Company, Ltd., who were showing their latest productions, including the "Gwynne" eight. This is a high quality economical two to three-seater runabout, capable of very high speed, with marked hill-climbing capabilities, yet remarkably low in first cost, and proportionately cheap to run. The chassis is laid out on accepted lines, with the notable exception that the gear box is behind the main universal joint, and forms the forward end of the propeller shaft casing. The chassis is of the plain channel section type, and is slung fore and aft on half-elliptic springs. The engine is three-point suspended from the frame. The front axle is also of channel section, and is furnished with forged fork ends. The equipment of this car consists of a standard three-seater clover-leaf body,



AN 11.9 h.p. ALBERT ALL-WEATHER CAR.

fitted with a hood which protects all three passengers and a single wind screen. The electric lighting set consists of a dynamo driven by the engine, and three lamps. Two of the latter are mounted on the front wings, and are controlled by a dimming switch. The 11.9 h.p. Albert model de luxe was also being exhibited. This car is beautifully finished in every detail, complete with five lamps, clock, speed meter, electric horn, etc., and fitted with the famous Service all-weather equipment, making it when required a completely enclosed car. An illustration of this car appears on this page. For those who want a higher power car there was the 14 h.p. Gwynne Albert, which is built on similar lines to the standard Albert chassis, with the principal exceptions that the track is widened, the engine dimensions are different, and a rear petrol tank is installed in conjunction with an Autovac system of fuel supply. The chassis has been specially designed to carry the Gwynne patent four-door all-weather body, the combination forming an *en tout cas* vehicle of extraordinary completeness and covering the widest possible scope of application. It is claimed that there is no car of similar type which is at once so complete, luxurious, moderate in price, and at the same time economical to run.

Belsize.

The Belsize stand well repaid a visit, containing as it did a variety of excellent cars. The exhibits included the 15.20 h.p. Belsize four to five-seater and two-three seater with dickey, and the 9 h.p. Belsize two-seater and four-seater. Of these, one of the most interesting was the 9 h.p. four-seater, a thoroughly attractive car of its type, and one for which there should be a good demand.

COMPANY MEETINGS.

BENGAL DOOARS RAILWAY.

Prospects for Current Year.

The thirty-second ordinary general meeting of the Bengal Dooars Railway Company, Ltd., was held at the offices of the company, Gresham House, Old Broad Street, London, E.C.2, on November 14, Mr. Robert Miller, the Chairman, presiding.

The Secretary (Mr. F. J. Horne) having read the notice convening the meeting and the auditor's report,

The Chairman, in moving the adoption of the report and accounts, said that the working for the year ended on March 31 showed no relief from a general decline in the earnings as compared with those of the previous year. That decline was a reflection of the general financial and commercial depression which had been experienced everywhere. If they would turn to the revenue account they would see that their coaching traffic showed a decrease of Rs.32,565. Of this passenger traffic was responsible for nearly Rs.25,000, and the passengers' luggage and parcels for the balance. This decrease was mainly due to the depression in the tea and jute industries, in consequence of which they carried 41,740 fewer passengers than during the year ended March 31.

So far as the fall in goods traffic was concerned, practically the same reasons applied, and from the comparisons between the years ended March 31, 1921, and March 31, 1922, they would see there was a net decrease of Rs.74,035. The reduced receipts under the head of "general merchandise" amounted to an aggregate of Rs.1,40,544, which, with small reductions under other heads of Rs.3,522, made a total of Rs.1,44,066 on the wrong side. Fortunately the carriage of coal for the public greatly assisted in reducing this discrepancy, resulting as it did in an increase in receipts from that source of Rs.68,417, which, with increases under other heads aggregating Rs.1,614, made a total of Rs.70,031, leaving the net amount of decrease at Rs.74,035.

In others of the principal commodities carried there was a decrease of Rs.40,389 for carriage of jute, a considerable amount of a small and inferior crop having been held up through lack of demand; a decrease of Rs.15,983 for carriage of wood, there being smaller imports of tea shooks and a falling off in the export of logs; a decrease of Rs.12,670 for metals owing to a partial suspension of building operations, and a decrease of Rs.7,624 for minerals, less stone having been carried for the Public Works Department and less building material. Variations in other articles of merchandise showed an aggregate decrease of Rs.21,801. On the other hand, the receipts from grain and pulse improved by Rs.17,381, due to large crops and heavy demands, and from tobacco Rs.11,440 because of a good crop.

As heretofore, the strictest economy, consistent with safety and efficiency, had been exercised, and savings had been effected which aggregated Rs.67,870, as compared with the company's previous accounting year. In thus reducing their expenditure great care had been exercised that the condition of efficiency, in which the permanent way and rolling stock had always been maintained, should not suffer, and this had been borne out by the report of the Government Inspector of Railways upon his inspection of the lines in February, 1922, which was entirely satisfactory. Capital expenditure during the year under review for the whole of the system aggregated £2,474, of which £1,626 was for bridge work on that section of the line known as the "extensions."

The net earnings from the railways, after deduction of Indian taxation, amounted to £35,232 14s. 8d. To this must be added £1,230 16s. 1d. interest earned, £240 2s. 6d. profit derived from the sale of 5 per Cent. War Loan, and £3,000 reserve for depreciation on their investments written back. Those items, with a balance of £45,974 11s. 6d. brought in from the last accounts, made a total of £85,678 4s. 9d. From this sum provision had been made for one year's dividend on the Preference Stock, amounting to £14,400; for reserve for income and corporation profits tax £2,500; for loss on exchange £754 4s. 10d., and an interim dividend of 2 per cent. was paid on the ordinary stock in April, absorbing £8,000 and leaving £60,023 19s. 11d. to be dealt with.

He was glad to say that since March 31 last conditions had materially improved in all directions, and their approximate traffic returns up to October 14 showed an increase aggregating Rs.1,73,277. The coaching traffic had not noticeably increased, as recruiting for tea garden coolies had not been resumed, but the outturn in tea had been greater, notwithstanding a continuance of fine plucking, the jute crop had been a good one, and coal showed a very considerable increase. Their manager in India reported he anticipated a good deal more coal would come in, and a good deal more tea would be sent away, that the season's tea prices had been good, and there should now be money available for manures and building purposes, which would increase their earnings; also that the prospects for the remaining period of the current financial year to March 31, 1923, were good.

One eminently satisfactory factor, recently reported by the manager, was that this season they were in the happy position of having sustained no damage from floods, owing to the almost unprecedented fact that none of the rivers contiguous to this company's railway had risen more than a foot or so above cold-weather level.

Under those favourable circumstances, and as the very considerable amount of nearly £46,000, accumulated from previous earnings (as a provision for distribution in dividends during lean years, and against damage by flood), was brought into the year's net revenue account, the directors, after careful consideration, felt fully justified in recommending that a final dividend of 5 per cent. should be paid on the ordinary stock. That made a total distribution of 7 per cent. for the year, and left a substantial sum of £40,023 19s. 11d. to be carried forward.

The motion was carried unanimously.

PERSIAN RAILWAYS.

A continuation of the Tiflis line from Djulfa, on the Russian frontier, to Tabriz, in the Persian Province of Azerbaijan, is the only road of commercial importance in Persia (says the American Consul at Teheran in a recent report). The oldest railroad in Persia connects Teheran with the shrine of Shah Abdul Azim. It is about 5 miles long and has no commercial importance. A line about 15 miles in length, between the Ponnel quarries and the Mordab River, was constructed by the port authorities of Enzeli for the purpose of transporting the material necessary for the construction of the port. Persia also has a short line connecting Pire Bazar with Resht, in the Caspian district, and a military railroad, about 33 miles long, built by the British from Bushire to Barasdjan. A short line, connecting Mahmoud Abad, on the Caspian Sea, with the iron mines of Amol, has been abandoned.

In 1913 the Persian Railways Syndicate, Limited, was authorised to make the necessary surveys for the construction of a system of south Persian railways to be of metre gauge, and a continuation of the metre-gauge line from Baghdad to the Persian frontier, intended to connect Hamadan, Kazvin, and Teheran. This line would connect Teheran, the most important trade centre in Persia, with the Persian Gulf, while the proposed extension of a line from Tabriz to Teheran would connect Teheran with the Russian frontier.

The Persian Railway Syndicate, Limited, also has under consideration a proposed line from Khoramabad or Burujird (Central Persia), which would be extended to connect with the Baghdad-Teheran route, and would tap a very fertile grain area. This line would connect Teheran with Mesopotamia, and eventually the Mediterranean. The line from Baghdad to Aleppo, near the Mediterranean, is open to passenger traffic as far as Mossul.

The railroads touching the frontier of Persia are of significance as regards future development. The Baghdad-Keraitu line terminates a few miles from the Persian town of Ksar Chirine. The Indian Quetta-Nuski line is 30 miles from the Eastern frontier, and when this line is developed will bring great possibilities of trade with India. There are also two short lines from Ispahan to Shiraz, and from Bundar Abbas to Kerman. A line of about 100 miles in length links the Persian system with the Trans-Caspian Railroad from Krasnovodsk to Merv and Samarkand.

In order to develop on a large scale Persia must have railroads. The labour question would prove the biggest difficulty, as all skilled labour would have to be imported, and the unskilled labour is of an uncertain quality. Fuel is a minor consideration, as Persia has a supply of cheap oil which would be sufficient to supply all its transportation requirements.

YUGOSLAVIA'S CURRENCY REGULATIONS

The currency regulations affecting travellers passing through Yugoslavia or departing therefrom for foreign countries have been revised, and become more stringent. Transit travellers may take out of the country the amount of foreign currency which they reported on entering, but they have not the right to purchase in the country and take out therefrom foreign currencies or dinars. It is understood that the onus of seeing that the amount of currency brought into the kingdom is properly noted by the Customs authorities on the passports rests with the travellers themselves. Travellers starting from the country may obtain the amount of currency authorised by the present regulations only on production of their travelling documents furnished with the visé of the State to which they are proceeding.

Near East Markets.

LONDON PRODUCE REPORT.

Dried Fruit in Good Demand.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in good request at unchanged prices. Tate's cubes are 56s. 6d., and mineral water sugar has been done at 51s. London and Lyle's granulated show no change at 51s. 7½d. and 50s. 10½d. respectively. Foreign descriptions remain unchanged. West Indian crystallised is quoted at 43s. 6d., and white Mauritius has come to business at 47s. 9d. Quotations are:—November, 21s. 6d., December, 21s. 3d.; January, 21s. 3d., February, 21s. 3d.; March, 21s. 3d.; and May, 21s. 7½d.

Coffee.—Prices remain as last week. East Indian at 110s. is unchanged, as also Nairobi at 94s. Costa Rica is firm at 100s. Quotations are:—December, 62s.; March and May, 60s. 6d.; and July, 60s.

Desiccated Coconut.—The demand during the week has fallen off, while at most London wharves there are no stocks to place on the market. Prices have further advanced.

Rice.—"Two Star" rices are almost unobtainable, but a small shipment will arrive during the next fortnight, which will ease the position, but the quality of the rice afloat is doubtful. A further advance is to be noted for American Java rise, which has gained 6d. cwt. on the week.

Green Fruit.—Some small shipments of Denia and Valencia oranges have just arrived, and have been sold at excessive prices. Semi-green fruit has met with little attention. Malaga lemons have still been in good demand, while prices remain firm. Messina fruit is of a better quality, and has attracted more than usual attention. Prices are:—Denia and Valencia oranges, boxes 300's to 504's, 25s. to 30s.; Messina lemons (new crop), 17s. 6d. to 32s. 6d. box (300's); 25s. to 52s. 6d. case (300's); Malaga lemons, 27s. 6d. to 30s. case (420's). The position with regard to Valencia onions shows a further improvement on last week's report.

Dried Fruit.—An exceptionally heavy demand has been experienced for Valencia raisins, while it is expected that prices will be harder in the next day or two. Sultanas are still showing an excellent market, as also are the cheaper grades of currants. Supplies are almost exhausted of layer and lacoum figs, while the inquiry for Algerian, Greek Naturals, and Malagas is very weak. Tunis dates are finding a ready market. Prices have risen for Jordan almonds, while the better quality Valencias are very limited.

Oilseeds.—An unsteady tone rules throughout. Indian linseed has shed 1s. 4½d. at 19s. 4½d., while La Plata has advanced 2s. 9d. at 18s. 3d. Rapeseed is variable with Toria 4½d. down at 17s. 10½d., and bold Ferozepore steady at 16s. 7½d. Cottonseed is higher with the exception of Sakellarides, which has shed 1½d. at 10s. Egyptian black has advanced 1½d. at 10s. 4½d., while Indian is 7d. up at 9s.

Oils.—Most quotations have advanced. Linseed at 37s. is 6d. up. Crude rape oil at 41s. 6d. and refined at 44s. 6d. have both advanced 3d. Cotton oil is unsteady. Egyptian and refined show no change at 35s. and 44s. respectively, but deodorised is 1s. down at 47s., while technical is 6d. lower at 36s. 6d.

Oilcakes.—All quotations are 10s. higher. Prices are now 280s. for linseed cake, 150s. for cottonseed cake, 250s. for cottonmeal cake, and 180s. for coconut cake.

SUDAN PRODUCE.

The following extracts are taken from the C.E.B. report for September:—

Gum.

The exports of gum via Port Sudan were as follows:—332,173 kilos of Hashab, of the value of £E17,856; 37,128 kilos of bleached, of the value of £E2,349; 75,461 kilos of Talh, of the value of £E1,694; and 16,919 kilos of gum dust, of the value of £E341.

Kordofan Province.—The amount of gum sold in El-Obeid market during September was 399 kantars, as against 4,119 kantars during the same month last year, at an average price of £E1.362 m/ms. per kantar (45 kilos). The arrivals at El-Obeid from Nahud were 2,617 kantars, as against 5,368 kantars last year. 395 kantars were sold in Nahud market during the month, as against 647 kantars last year, the average price being £E1.230 m/ms. No gum was sold either in Um Ruaba or Rabad markets during the month of September.

Cotton.

Bahr-el-Ghazal Province.—The experimental cotton at Yambio is reported to be doing exceedingly well. There are about two acres under cultivation. It is hoped that natives will be encouraged to start their own cultivation, and dispose of the crop to the merchants.

Berber Province.—Pumping stations reports:—Bouga.—Most of the cotton is doing well, and the earliest sown is in flower. Some of the cotton sown on the very salt land is very poor. It never seemed to go ahead, in spite of the frequent hoeings. Gendettu.—Cotton, where cleaning has been thoroughly carried out, is good, but quite half the area is late and hoeing has been neglected, with the result that the first picking will most likely coincide with the cold weather, and the yield will be adversely affected. Kitiab.—It is early yet to give definite opinions, but the bulk of the cotton is promising. Mikeilab.—The cotton is very uneven and poor in places, especially on the Karu, but may improve later on. Timerab.—The native land was sown later, and suffered from floods during the rains. Picking has not started yet on this section.

Red Sea Province.—The cotton at Tokar is beginning to show, but will require rain soon to produce a satisfactory crop, which, in any case, will be small in quantity.

Dongola Province.—Nuri pumping station:—Cotton here is all looking well. Some of the first sown is 60 centimetres high, and commencing to flower.

Blue Nile Province.—American cottonseed has been issued to cultivators of riverain lands and in low-lying rain districts. This has been eagerly taken up in Medani District, and fairly well in other districts.

Dura and Dukhn.

Berber Province.—Gendettu pumping station.—In spite of the excellent dura crops last year, several cultivators have put in maize in preference to the former. The crop is not promising, and will yield indifferently.

Fung Province.—268 tons of dura were exported from Sennar river siding during the month.

Red Sea Province.—It is reported that dura requires more rain and cold weather to produce a satisfactory crop.

Upper Nile Province.—A report states the dura crop will be good, though rain is still needed.

White Nile Province.—The dukhn crop is better than last year's, but probably below the average.

Sesame.

Kordofan Province.—Thirty ardebs of sesame were sold in El-Obeid market at an average price of £E1.500 per ardeb of 330 rottles (148 kilos).

White Nile Province.—The Tendelti sesame crop is reported good. Crops in other districts are better than last year, but probably below the average.

Fung Province.—120 tons of sesame were exported from Sennar river siding during the month.

Upper Nile Province.—The ful Sudani sown in the Renk Gozes shows a further decline on last year's figures, due mainly to the drop in prices.

Dates.

Dongola Province.—The crop is reported to be good. The price rose to £T120 the ardeb of 230 rottles (103 kilos), but has since dropped to £T108.

Livestock, Hides, and Skins.

Berber Province.—Signs of revival in Damer market are now apparent. 2,603 sheep and goats and 79 cattle were sold during the month, of which 1,001 and 3 respectively were exported. Average price, sheep £E1.089 and cattle £E3.466.

Darfur Province.—1,012 head of cattle were imported from Wadai during August. In Abu Gabra market the price of a bull has now risen to £E6, and the cattle trade is flourishing.

Red Sea Province.—Thirty-five head of cattle and 105 sheep passed through the Quarantine.

Rainfall and Cultivation.

Bahr-el-Ghazal Province.—In Wau, 9.541 inches of rain fell, which is 2½ inches above the average, but nearly 3 inches less than in August, 1921. The rains are reported good throughout the Province. Crop prospects are now reported good throughout the Province. In the north, the Dinkas are already commencing to harvest.

Berber Province.—There was little rain during the month, but rain cultivation reports continue to be encouraging, except from the Wadi-el-Muheit area, where insufficient rains are reported. The areas of Basin lands flooded are:—Wad Hamid, 6,000 feddans; Salwa, 4,000 feddans; Kameir, 1,500 feddans; Gaweir, 1,000 feddans; and Kelli, 2,500 feddans.

Blue Nile Province.—The rains in August were again good, the total rainfall in Medani for that month being 240.5 millimetres. There was a fair amount of rain at the beginning of September, but at the end of the month crops were wanting another rainfall. Fortunately, this rain

Digitized by Google

came on the night of September 30. It is difficult at present to foresee how good the crops will be. Undoubtedly considerable areas have not been planted, and other areas have suffered because continuous rainfall at the end of July and early in August delayed the sowing of the crops. There is, however, little doubt that the total crop will be well above the average.

Darfur Province.—The rainfall of 271.1 millimetres in El Fasher for this month has exceeded the total rainfall for the year of three out of the five preceding years. That for July was within 1-5th inch of that for the whole of 1917. There have never been more than two consecutive days during the last two months without recordable rainfall. An abnormally heavy rainfall is reported from every markaz. 219 millimetres of rain fell at Nyala, where 106 mills. were recorded on August 24. Crops are reported to be doing well in all districts. Rains ceased very suddenly in the middle of September in the northern districts of the Province.

Kordofan Province.—Cultivation is most satisfactory everywhere and crops assured, but bugs (called by the natives Santa) attacked cultivation near Taiara. The necessary steps for their destruction have been taken.

Mongalla Province.—On August 25 the river rose from 10.86 to 12.12 metres in a few hours. The discharge was found to have increased 10 per cent. From August 25 to the end of the month the general level at Mongalla was as high as in 1921.

Red Sea Province.—A flush from Khor Baraka reached Tokar on September 2. This followed Khor Shereit and Kamayai, watering hods Gallateb and Tankil only. These are mainly salty, and nearly useless for growing crops. A further small flush reached Tokar area on September 21, but kept to the bed of the above Khors. Sowing was delayed by "Haboobs," and re-sowing was necessary in some places due to late "Haboobs."

Upper Nile Province.—The Nile is below the average for the past four years. The raintall is the average of the past three years, chiefly owing to unusually heavy rains in July. Crops are generally satisfactory.

White Nile Province.—The rains have been good on the whole; in some places cultivators have failed to keep their crops free of weeds, and in others the rains were only sufficient for the crops grown on sandy soils.

Nuba Mountains Province.—Rains have been very heavy over most of the Province; Talodi, 216.6 millimetres, as against 89.8 in August, 1921; Dilling, 125.7; and Kadugli, 184.5. Crops are mostly doing well, especially on sandy ground. Most crops that died owing to scarcity of early rain have been re-sown. Crops in heavy soil are not doing so well owing to excess of rain and heavy growth of weeds.

Dongola Province.—All the basins are well flooded, and are fuller than they have been since 1917—the last big flood. This year's flood, like that of 1917, was ideal, as not only did the river reach a high level, but this level was maintained for a long period with a result that the water has been simply pouring into the basin, including the high-level basins which had not been flooded since 1917. The large quantity of silt deposited in the basins and on the islands will be most beneficial.

Halfa Province.—The river reached its maximum level on September 13. This is the highest reading since 1917. About 100 feddans of the Debeira Basin were flooded through the old canal.

Roads and Communications.

Bahr-el-Ghazal Province.—A capital grant has been given for putting the water supply on the Wau-Meshra road into a sound condition. Brick wells with concrete courses at the top and bottom and with raised and covered tops will be constructed so as to ensure a good supply at least at every rest house. It is proposed to arrange for permanent ghaffirs at these rest houses, and generally improve the accommodation. The embankments on the Yambio-Tembura road have all consolidated well.

Mongalla Province.—Rain has destroyed all the bridges in the Moru during a very heavy fall on July 14. The road from Torit to Ikoto has been altered to run along the foot of the Imatong Hills as far as Lomu. This enables a double change of carriers, as the road runs close to villages. All bridges at Yei and Opari have been destroyed by the heavy rains. Bandama bridge, 160 feet long, was carried away.

Red Sea Province.—Movements of ships, Port Sudan. Forty-two merchant ships of net registered tonnage of 111,192 entered the port during September.

Nuba Mountains Province.—Owing to the exceptionally bad state of the Talodi-Kedugli road, mails are now being sent temporarily from Talodi to Dilling via Heiban and Delami. The Hagis (Dilling) well is finished, and is expected to provide water all the year round. The Dilling Chaine Helice pump has now been erected, and is working satisfactorily.

CURRENT PRICES.

General Produce.—Bacon (Continental), 133s. per cwt.; (Canadian), 116s. cwt.; (American), 99s. cwt.; butter (Danish), 221s. 6d. cwt.; (Australian), 185s. cwt.; (New Zealand), 205s. cwt.; cheese (Canadian), 115s. cwt.; (New Zealand), 116s. cwt.; lard, 78s. cwt.; eggs (Danish), 27s. per 120; (Styrian), 15s. per 120; chillies, 135s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 85s. cwt.; coffee (Costa Rica), 118s. 3d. cwt.; (East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 97s. 6d. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d.; (Muntok white), 6¼d. lb.; pimento, 2⅛d. lb.; raisins (Valencias), 100s. cwt.; currants (Vostizza), 90s. cwt.; currants (Amalias), 75s. cwt.; sultanas (Smyrna), 145s. cwt.; sugar (Tate's cubes), 57s. cwt.; (Lyle's granulated), 51s. 6d. cwt.; (Mauritius crystals), 47s. 3d. cwt.; (West Indian crystallised), 44s. 3d. cwt.; (centrifugal), 17s. 10½d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 13s. 9d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. lb.; wheat (English white), 45s. 3d. qr.; wheat (Australian), 40s. 6d. qr.; oats (English), 28s. 9d. qr.; oats (La Plata, ex ship), 28s. qr.; maize (La Plata), 38s. 3d. qr.; flour, 44s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 1s. 9½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £50 ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 103s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £36 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £19 17s. 6d. per ton; hyposulphite, £14 ton; prussiate, 11d. lb.; nitrate, £13 6s. 9d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £37 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 ton; sulphate of copper, £26 12s. 6d. ton; sulphate of iron, 55s. ton.

Metals.—Aluminium, £90 ton; antimony (English Regulus), £32 2s. 6d. ton; bismuth, 10s. lb.; copper (standard), £62 13s. 9d. ton; copper (electro), £70 5s. ton; gold bars, 92s. 3d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G). £16 15s. ton; lead (soft foreign), £26 12s. 6d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 43s. 9d. unit; nickel, £137 10s. ton; platinum, 440s. oz.; graphite (80-90). £13 10s. ton; quicksilver, £12 1s. 3d. bottle; spelter (G.O.B.), £37 12s. 6d. ton; tin (standard), £183 6s. 9d. ton; wolfram, 14s. 7½d. unit; zinc sheets, £40 5s. ton; tin plates (20 x 14), 19s. 7½d. box; silver bars, 33 13-16d. oz.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 10d. lb.; 80 to 89 lb., 10d. lb.; 70 to 79 lb., 10d. lb.; 60 to 69 lb., 9¾d. lb.; 59 lb. and under, 8¼d. lb.; (second), 90 lb. and up, 9d. lb.; 80 to 89 lb., 9d. lb.; 70 to 79 lb., 9d. lb.; 60 to 69 lb., 7⅞d. lb.; 59 lb. and under, 6½d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6d. lb.; (second), 5d lb.; (third), 3d. lb. Calcutta Market (prices in rupees per 20 lb.).—Arsenic hides (cows): Agras, 7 to 12.8; Durbhangas, 5 to 8.8; Patnas, 5 to 8.8; salted cows, 6.8 to 9; arsenic hides (buffalo), 4.8 to 6. Skins: Calf, 8 to 10 per 20 lb.; goat, 265 to 305 per 100 pieces.

Miscellaneous.—Cotton (American), 14.65d. lb.; Egyptian (Sakel), 17.20d. lb.; jute (first grade), c.i.f., £31 15s. ton; jute (lightnings), £30 12s. 6d. ton. Oilseeds: Linseed (La Plata), £18 17s. 6d. ton; palm kernels, £17 4s. 6d. ton; castor seed (Bombay), £16 12s. 6d. ton; sesame seed (China), £21 15s. ton; olive (Spanish), £74 ton; rape (crude), £41 5s. ton; soya, £34 17s. 6d. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex tank), 65s. ton; coconut (Ceylon), £37 13s. ton; cotton (crude), £34 5s. ton.

The transfer books of the capital stock of the Madras and Southern Mahratta Railway Co., Ltd., will be closed from Friday, December 1, to 15, both days inclusive, for the preparation of warrants due to stockholders who are registered on the company's books on December 15. No transfer deeds of the capital stock will be received during the time the books are closed. The warrants will be posted on December 30.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Steady Tone Prevails.

The Commercial Company of Egypt, in their report for the week ended November 3, state :—

Since our last report the futures market has kept its steady tone, prices closing slightly higher than those of a week ago. The position has been more or less the same during the last four weeks—a fairly active demand from abroad and very firm markets in America the beneficial effects of which have been counterbalanced by the abnormally heavy hedges put out by banks and merchants against their purchases up-country and on the Alexandria spot market. Ashmouni contracts have been slightly easier, and the difference with Sakellarides has somewhat widened. This may be explained by the lessened demand which Ashmouni has enjoyed recently on the part of America, which is the largest buyer of this variety. International politics remain somewhat uncertain; the recent changes of Ministries in England and Italy, the impending General Elections in these two countries, and, finally, the difficult task of the coming Near East Peace Conference, contribute to this state of things. Local politics are of a similar uncertain nature; it is very doubtful if the coming elections for the first Egyptian Parliament will strengthen the position of the present Ministry, and if the extremists get a majority the situation will become dangerous for European residents, unless the English Government takes strong measures to protect them. The local financial position is fairly sound, although the small growers appear to be pressed for money. We maintain our opinion of steady markets during the immediate future, but expect a higher level of prices when the actual pressure of selling is lightened.

Spot.—A good business has been done this week at Minet el Bassal, and sales for the five days amount to about 34,900 bales, of which we estimate 24,600 bales Sakellarides, 9,900 bales upper, 250 bales brown and 150 bales white. Arrivals continue heavy; exports are rather less than last week, and the stock shows a considerable increase.

Sakellarides.—Business has been done in all styles, with a good and persistent demand for medium qualities. The prices of spot against contracts are generally a little dearer than last week, except that of good, which is without change.

Uppers.—All styles have been dealt in. The prices of spot against contracts are generally a little easier except fair and fully good, which are without change.

Brown.—A moderate business has been done at slightly easier rates.

White.—A small business has been done; prices are without much change.

Crop 1922.—Picking is almost entirely completed. The movement of the crop is exceptionally rapid and early, and the cultivators continue to offer their cotton freely.

MANCHESTER COTTON TRADE.

Advance in Raw Cotton.

(From Our Own Correspondent.)

Manchester, Saturday.

The feature of the market during the past week has been the rise in raw cotton quotations. Both American and Egyptian values have been raised, and spinners and manufacturers in sympathy have increased their quotations. It cannot be said, however, that there has been any improvement in the actual amount of business done. Buyers are quite unable to follow any advance, and when transactions have taken place they have usually been at wretched rates. There has been talk of more machinery being stopped in the weaving centres of Blackburn and Burnley, and there is no doubt that many manufacturers are getting desperate for orders. The higher raw cotton rates go, the less probability there appears to be of any real revival of business. The breach between buyers and sellers widens. With regard to the cloth section, no sales of any importance have taken place for Egypt, the Levant, or Constantinople. Inquiry has been dealt with, but the majority of the offers have proved unworkable. Egyptian spinning quotations have been dearer, but home users have not taken up any lines of importance. The piece goods demand for India has been easily satisfied. Business has been very patchy. China has only operated within narrow limits. Small transactions have taken place in suitable makes for certain of the minor outlets. Demand in fancies for the United States has kept up fairly well. Spinners of American yarns have raised their quotations, but no sales of any weight have taken place for home account.

LIVERPOOL REPORT.

Improvement Continues.

Messrs. Reynolds and Gibson report as follows under date November 8 :—

The improved inquiry which has lately been evident in this department is well maintained, and once again we are able to report a satisfactory increase in the estimated sales. The demand has run on the usual well-defined lines, and no new features have appeared. Low cotton has again attracted a considerable amount of attention; in fact, during the last day or two what has amounted almost to a scramble has occurred for this style of cotton, and it appears that there is very little available in Liverpool now that is at all attractive at 8½d. to 9d. per lb. Uppers, which last week seemed to have lost ground to a certain extent, have again achieved popularity owing to the continued advance in the American markets. There is practically no Upper Egyptian cotton offered here under 14.50d. per lb., and it is only on approaching the 15.00d. mark that any quantity comes into sight. Now that the basis has hardened materially, it is extraordinary the number of spinners who are searching the market hoping to buy Upper Egyptian cotton round about "pass" price American futures! The same steady inquiry has continued for Sakellaridis Good Fair to Fully Good Fair, and Sudan cotton provides a generous share of the total weekly sales. There have been one or two eager inquiries for low-grade Tokar cotton, but this is practically non-existent here now. White cotton and Pilion have been neglected, and but little has been done in the better grades of Sakellaridis. The difference between Extra Fine and Fine Sakellaridis has again narrowed by 50 points.

A good business has taken place in cotton for forward delivery, and Alexandria continues to make reasonable offers, especially for the better qualities of Sakellaridis. Uppers show a distinct tendency to harden as compared with Sakel, which is not surprising when one considers the rapid rise which has taken place in the price of American cotton and the fact that it is chiefly the spinners of American cotton who favour this growth at the moment. The receipts into Alexandria continue to be very heavy, and much hedge-selling, both there and in Liverpool, has continued to keep prices more or less in check on our market, but a steady advance has been registered each day, and it is generally anticipated that the present state of affairs cannot last much longer, and that sooner or later Egyptian prices will advance much more rapidly, and that the difference between Egyptian and American contracts in Liverpool will widen considerably. We would advise spinners to take advantage of the present level of prices, and to cover their requirements as far as possible. Manchester reports speak of dearer markets and a firm tone, but buyers have been rather staggered by the level to which prices have attained, and most of the business put through seems to have been out of stock; on one day an improved business was reported in the finer Egyptian counts. The Alexandria General Produce Association now estimate the current crop at 4,800,000 cantars, to which has to be added the "carry-over" up country, somewhere in the neighbourhood of 300,000 cantars, and the various stocks that were lying in all parts of the world at the end of last season. Total sales, 4,700 bales (includes 1,350 Sudan). Quotations are raised 50 points, with the exception of Extra Fine Sakellaridis, which is unchanged on the week. Fully Good Fair Sakellaridis 18.25d.

COTTON TRADE REVIEW.

A Discouraging Position.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank states:—

General.—There is practically no change to report from the state of affairs prevailing during recent weeks. New York has continued to raise raw cotton values, and this market and those abroad which it supplies have continued to regard the movement practically with indifference. This state of affairs is rather remarkable, and is certainly calculated to give rise to uneasiness as to the future of the industry here. If raw cotton can be maintained at a cost which renders the price of the finished article out of the reach of the consumer of Lancashire products, the outlook is indeed bad. On the other hand, it is not forgotten that a similar movement took place last year, but collapsed very badly; as intimated in previous reports, there is a feeling very prevalent here that history will repeat itself.

Yarn.—The only bright feature in this section has been the possibility of selling stocks manufactured some time ago, when raw cotton was much cheaper, at a small profit. For goods to be produced to-day offers are said to be a long way out. Nominally, of course, quotations have had to be increased by approximately 1d. per lb., but actually the small amount of business offering makes it impossible for spinners to obtain anything like a compensating advance.

Cloth.—Discouraging reports are only too common in this section; the higher prices necessarily quoted have caused a check to many negotiations which had been commenced, and, generally speaking, the week has been an exceedingly poor one. Business for India has been on only a small scale, and China remains exceedingly quiet, but a little has been done for Egypt, and the home trade is possibly slightly better.

Raw Cotton.—Further advances have taken place almost daily in New York, which, of course, have been followed in Liverpool. Spot sales in the latter port have been fairly good, but outside growths are attracting more attention. The report published on Wednesday last showed 8,140,000 bales ginned, as against 6,646,000 at the same time last year. The crop is therefore being gathered early and under good conditions, but the view is apparently strongly held in New York that it will not be equal to consumption and that the carry-over at the end of the season will be very small. Closing prices are as follows:—American Fully Good Fair, 15.65; Egyptian Fully Good Fair, 19.15.

THE CRISIS IN THE COTTON TRADE.

A very interesting speech on the present cotton position by Sir Charles W. Macara, Bart., was given at the meeting of the Federation of Master Cotton Spinners' Associations at Manchester on November 10. Sir Charles was unable to be present at the meeting owing to a slight accident, and the speech was read by his son, Mr. William C. Macara. After reviewing the work of the Federation, Sir Charles said:—

Think of the position in which we find ourselves to-day! While the whole world is bare of cotton goods, we find it impossible to get trade on a paying basis. We have disorganisation and confusion everywhere, and such business as is going through is at figures which not only do not pay dividends, but are a long way short of paying expenses in the great majority of cases. Many mills have not paid dividends for over two years, and we have the spectacle of seeing the shares of splendidly-equipped and excellently-managed spinning concerns standing at a discount in the sharebrokers' lists.

Why is this? And why is it that, while losses are being made all round, people go on making goods to stock, only to find later that they cannot hold them and must liquidate them at a sacrifice? We are told by people who seem disinclined to lift a hand to help themselves that it is because of the general poverty of the world that we are in the present unenviable position. Gentlemen, this is only partly true. We all know the havoc the war has brought in its train, and particularly are we aware of how it has affected our near neighbours on the Continent of Europe; but our trade, as you know, is chiefly with those countries in the Far East which have felt the effects of the great European War least. Both India and China, to whom we look chiefly, have had excellent seasons. They have not only had bountiful crops, but they have garnered them cheaply, and ought by this time to be placing orders freely for the goods that Lancashire makes and which they cannot procure elsewhere. Statistics show that for a population of 800,000,000, India, China, and Japan have, combined, only something like 12,000,000 spindles, and these are engaged on goods which, generally speaking, do not compete with Lancashire. What, then, is hindering this trade from coming forward?

It is owing largely, I believe, to our own lack of business organisation. There are, no doubt, a number of contributory reasons, political and economic reasons, which are helping to keep trade back; but I contend that altogether they are not sufficient to account for a state of things such as we have at present, when we are allowing a large section of the trade to make to stock, thus playing into the hands of merchants who will buy only from the weakest sellers, and who are slowly draining the life-blood from the industry.

My own conviction is that the revival will continue to be delayed until we act together; until, in fact, we all agree not to make these stocks, and so oblige the merchants abroad to pay a price which will at least put us on the right side. The trade is now coming to see that this will have to be done, and done quickly. It is not only the Provisional Emergency Committee that sees this: that body, I believe, is merely voicing the feelings and opinions of the great bulk of the trade.

The remedy, I consider, is to be found in a more effective control of the trade. In war time, you will remember, we had a Cotton Control Board, equally representative of Capital and Labour, whose regulations, formulated by the trade itself, embraced every mill, federated and non-federated, and were backed up by the State. The Control Board so arranged things that those mills which were working were levied upon for the good of those that were not, the compensation being extended to both employers and employed. Now, something of this sort will have to be brought into being again. I do not say it will have to be a board on such comprehensive lines as we had then, nor do I ask that the body to be set up should be called a Control Board at all; but the Cotton Control Board we had during the war showed, if it showed anything, how necessary it is to have an advisory organisation of some kind, and to have it in being continually. We have had nothing but trouble and confusion since it was disbanded, and I have heard both employers and operatives' leaders say over and over again that it is a huge mistake to have allowed the board to go out of existence.

Some of my fellow-members of this Federation may ask me, and very rightly ask me, what a Control Board could do that the present Master Spinners' Federation cannot do. My reply is that the Federation, in carrying out its excellent accident insurance scheme, and attending to the innumerable technical details which are constantly arising, has evidently no opportunity of doing the work which is now so obviously needed to keep the trade properly advised and organised. What we find we want more and more is a body—call it an Advisory Committee if you like—that will keep a keen watch on world-wide conditions, gather statistics, and be ready with means to cope with the vicissitudes through which a trade like ours, dependent so largely on conditions prevailing in foreign countries, must necessarily pass. Such an Advisory Committee, for instance, ought to be able to tell us at a time of famine in India or a revolution in China what we ought to do; obviously, it is a senseless thing to go on piling up stock for a particular market if there is no prospect of that market absorbing what we produce.

CZECHO-SLOVAK DEPOSITS.

Since the establishment of the Czecho-Slovak Republic there has been a constant increase in the deposits of the Czech joint stock banks. According to the statistical reports of the banks, the saving-books deposits and cash assignments at twenty-five Czech joint stock banks have increased in the first six months of 1922 by 383 million crowns. Thus, on June 30 they exceeded 3 milliard crowns. The total savings deposited at the end of June, 1922, amounted to 3,078 million crowns. The largest amounts are deposited with the following banks:—Zivnostenska Bank, Prague, 1,168 million crowns; Czech Industrial Bank, 347 million crowns; Moravia-Agrarian and Industrial Bank, Brno, 314 million crowns; Czech Bank, 229 million crowns; Prague Credit Bank, 212 million crowns; Czecho-Slovak Agrarian Bank, 143 million crowns.

CASINGS FROM PERSIA.

Complaints have reached H.M. Consul at Shiraz regarding the quality of casings supplied from Bushire and the inland towns of Persia. H.M. Consul suggests the advisability of United Kingdom firms safeguarding their interests when importing intestines from the district mentioned, by insisting on a certificate from Lloyd's agent at Bushire as to the nature and condition of the goods before shipment is made and advances paid.

The traffic receipts of the Egyptian Delta Light Railway for the week ended October 20 amounted to £E12,917; total for the year, £E169,775. For the corresponding period of last year receipts amounted to £E14,446; total for the year, £E201,886.

Stock and Share Markets.

RATHER DULL TONE.

Oils Exceptionally Weak.

(*From Our Own Correspondent.*)

London, Tuesday Morning.

Developments abroad and the pending election have combined to produce a dull tone in most of the markets, and, generally speaking, it has been rather a featureless week. As usual with conditions as they are at present business has been on a very restricted scale. After Thursday, however, if the election goes as anticipated, and it is impossible to doubt that it will, and provided that there are no adverse developments in the Near East, I think we shall begin to see the markets go ahead. Confidence in the outlook is all that is required, and that will be forthcoming with the return of the present Government. Gilt-edged stocks in particular ought to go ahead, and Industrials also ought to benefit.

There have been a few new issues since I last wrote, but none of any consequence; but, judging by the registrations of new companies, there will be quite a number to come along presently. There is no further news with regard to the prospective Bulgarian loan, to which I referred recently. It will probably not be long before it makes its appearance. Soon, too, we may be having the debenture issue of the Kassala Railway Company, while there are other Near Eastern issues in the offing, including, I believe, a Roumanian oil issue. There is plenty of money available for investment, and this is certainly the time for new issues, which should be taken up well, provided the conditions are sufficiently attractive.

The Rubber market has fluctuated somewhat during the week, but after being inclined to dullness the raw commodity has firmed up, and now seems to be fairly steady round about 1s. I should not be surprised if it remained at about that level for some considerable time, for there is a good deal of rubber still to be taken up, and until it is off the market there can be no decided improvement. As soon as it is out of the way, however, we ought to see a distinct difference in the position, and it would not be in the least remarkable if in a comparatively short time it reached 1s. 6d. Even at the present level the companies can make fair profits, and that fact brings dividends in the coming year well within the region of possibilities. Certainly rubber shareholders have little cause to regard the present outlook with any great degree of misgiving.

Gilt-Edged Steady.

A rather variable tone has ruled in gilt-edged descriptions, but on the whole, considering present conditions, stocks have made a fairly good showing, and in some cases there has been a slight improvement on the week.

Consols at 57 have shed ⅛, while War Loans Fives are 1-16 up at 99. The Conversion Loan has risen sharply to 75½, a gain of 7-16 on the week, while Fundings are unchanged at 87. Indian stocks have been rather unsteady. The 7 per cent. stock is unchanged at 110½, the 3½ per cent. stock at 64½ is ¾ down, while the 3 per cent. stock is ½ lower at 54⅜.

It has again been an indifferent week in the Foreign group, the erratic movements of the exchanges and the uncertainty of the Near Eastern outlook depressing the market. French stocks are again lower, War Loan Fives at 27 being 1¾ down, while the 4 per cents. at 22 have shed ¾. German 3 per cents. have been exceptionally weak, closing at 11-16, a drop of ¼. Even so, this stock stands relatively higher than other German securities. Italian Rentes have been depressed, and are 3 lower at 19. Near Eastern securities, as was to be expected, have been dull. Turkish Unified at 24½ are ¾ down, while Greek Monopolies at 21½ are 7 points lower. Czecho-Slovak 8 per cents. have been relatively firm, and at 90½ are only 1½ down. Russians have been dull. The 4 per cents. at 7 are a point down, the 4½ per cents. are unchanged at 8, but the 5 per cents. are a point down at 9. The dull tendency in Brazilians has continued, while in Far Eastern securities some of the Chinese stocks have eased off.

Industrials Quiet.

It need scarcely be said that there has not been any great activity in this market during the week. Business has been on an exceptionally restricted scale, and will remain so until the general situation is clearer. It is noteworthy, however, that, despite the paucity of buying orders, the tone has been very firm, and it would take very little buying to make an enormous difference to this market.

Textiles have been rather variable. Coats at 65s. 3d. are 1s. 6d. lower, but Courtaulds at 56s. are 9d. up. Listers are again lower at 27s. 6d., a decline of 6d. Tobaccos have been fairly steady. Imperial Tobaccos at 69s. are 3d. down, while Bats at 86s. 3d. are 6d. lower. In Iron and Steel securities, Vickers are unchanged at 13s. 6d., Armstrongs are 9d. down at 18s. 9d., while Guest Keens remain at 35s. In the Indian Railway group, Assam Bengal are 53½, Bengal and North-Western are 134, at which they are a point down, Bombay Baroda are 1⅛ up at 94½, Burma are 102, and Madras and Southern Mahratta are ½ up at 105½.

In Shipping securities, P. and O. Deferred are unchanged at 305 x.d., Cunards are the same at 20s., Furness Withys remain at 31s. 3d., while Khedivial Mails are unchanged at 3¼.

Oils Dull.

The market has been decidedly on the dull side during the week as a result of the home and foreign political situation, and some Continental selling has contributed to the prevailing weakness in certain descriptions.

Anglo-Persians have been fairly firm, and at 5 9-16 are 1-16 down, while Burmahs at 5 1-16 x.d. are 3-16 lower. Mexican Eagles have been exceptionally weak, and at 2½ are 5-32 lower, while Shell Transport at 4 1-16 are 3-32 down. In the Trinidad group, Apex are ⅛ lower at 2 1-16, Centrals at 1 9-16 are also ⅛ down, while Leaseholds at 1⅛ have shed 1-16.

Russians have been rather dull. Spies are 3d. down at 5s. 3d., Anglo-Maikop are 3d. lower at 2s. 9d., North Caucasians at 11-16 are 1-32 up, Ural Caspians are unchanged at ⅜, while Uroz are 6d. down at 7s. 6d.

Among Egyptians, Anglo-Egyptian B at 1⅜ are unchanged, while Oilfields of Egypt remain at 1s. In the Roumanian group, Phœnix are 2s. down at 25s. 3d., Roumanian Consolidated are 1s. 3d. lower at 12s. 3d., Dacia Romanos are unchanged at ¾, while Hamilton's Oil Concessions remain at 1s. 9d.

CZECHO-SLOVAK TRADE AND FINANCE.

A New Gold Coin.

In the Financial Committee of the Czecho-Slovak Parliament, Dr. Rasin, the Minister of Finance, announced the intention of the Government to introduce a new gold coin, which would be used for commercial purposes and sold on the financial market in accordance with the price of gold. It is, however, impossible to introduce the gold currency for general use, because under present conditions such a currency would inevitably be conveyed over the frontiers to the detriment of the Czecho-Slovak finances. No date could at present be given upon which a gold currency could be adopted for all purposes. The introduction of gold coins for commercial transactions will, of course, greatly facilitate trade between Czecho-Slovakia and other countries, as export and import dealings will no longer depend upon fluctuations in the exchange value of the crown.

FOREIGN EXCHANGES.

Throughout the week the exchanges have fluctuated. On Monday, with some exceptions, an improving tendency was in evidence. The Greek exchange rallied sharply. Sofia also improved, but there was a marked decline in the Italian rate.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Busreh, October 14.

Following the considerable fall that took place recently in the price of dates, exports are becoming very important, chiefly for America. Current prices are: Hallour, Rs.180; Khedrour, Rs.220; Sayr, Rs.150.

Constantinople, November 3.

Anxiety has been the prevailing feature in the market during the past month as a result of the stagnation, accentuated and almost universal, due to political events. The predominant note has been the fear of entering into any new transactions—a fear which has caused a paralysis of commerce, and, in consequence, complete stagnation. The relief arising from the happy issue of the negotiations at Mudania has been short-lived, and the anxiety due to the uncertainty of the outlook has quickly developed again.

The Greek and Armenian merchants here, who represent the principal element of the market, instead of launching out into new business, have endeavoured to dispose rapidly of their stocks for fear of new developments. Many of them have realised at unfavourable prices, and a good number have already left the city.

In the market for manufactured goods particularly the stagnation is complete. Under the depressing influence of the events at Smyrna and in a state of mental confusion as the result of the uncertainty of the future, merchants have countermanded the despatch of goods ordered previously, and have re-exported those in the warehouses to England or Roumania or several other places where they possess branches. A slight increase in prices has resulted from the marked diminution of stocks and some small orders for Anatolia.

The imports into Russia, which had notably developed of late, are greatly reduced. It is known that the Soviet Government has issued stringent measures against the importation of two chief commodities—flour and sugar—and has strictly prohibited the export of valuable material.

Here the financial stringency tends to increase more and more; the banks show themselves very reserved as regards the grant of advances, the opening of credits, and the discounting of goods—some even abstain from them totally, which places the small merchants in particular in an embarrassing situation. The consequences show themselves in the non-withdrawal of documents in the banks, by the numerous protests, and the accumulation of merchandise in the Customs.

The market in flour alone has displayed some activity, and prices have risen as a result of the notable decrease of stocks here and of the consignments for America.

In conclusion, the situation of the market is at present stationary. An extreme reserve and an almost general depression has succeeded the excessive nervousness of the early days. A change in the situation is not to be hoped for unless the definite conditions of the peace contain all the guarantees necessary for the re-establishment of confidence, security, and the general development of the country.

PORT SAID NOTES.

(From Our Own Correspondent.)

Port Said, October 30.

Notwithstanding the slump in shipbuilding, several large ships have passed through here recently on their maiden voyage. The P. and O. s.s. Moldavia is the first of a new type of P. and O. ship of large tonnage but comparatively small passenger accommodation, and having only one funnel she hardly looks the immense size she is. Some alterations have been made in the usual P. and O. custom in that there are all small tables in the saloon, and dinners are served *à la carte*. She is an experimental ship for the company, as her twin screws are worked by triple expansion geared turbines, which give her a speed of about 14½ knots. The engines have worked fairly satisfactorily.

Another ship on her maiden voyage is the City of Nagpur, whose owners have resisted the temptation to put turbines into her. She has a single screw driven by quadruple expansion reciprocating engines; so far, the voyage is considered eminently successful. She is commanded by Captain Sir James Rae. Another large steamer is the Mathura, which has a single screw driven by geared turbines. Her voyage has been quite satisfactory, and it seems as if the geared turbine was having a hard fight with the Diesel engine, though the former is handicapped by the low power available when the engines are reversed.

Another new arrival is the Begum, which brought a full cargo of coal to Port Said, and then loaded a full cargo of salt for Calcutta. She is destined for the Calcutta-Java trade, and should make a useful addition to the company's fleet.

A Japanese captain has given me a remarkable piece of information, which he assured me was correct. He said that he had bunkered in Hamburg, and paid there 26s. a ton for English North-country coal, and when he was in Hull a few days previously the price for the same coal was 35s. a ton. If this is really so, it is time some inquiry was made, for that is the kind of thing that transfers trade from England to foreign countries. It is not likely the Hamburg merchant was making a loss on the 26s., and the labour employed and the provisions bought by the ship are all a loss to Hull. It makes one think that things are not all they ought to be.

NEW ELLERMAN LINER.

The "City of Nagpur."

The Ellerman liner City of Nagpur sailed from Birkenhead on her maiden voyage to Colombo and Calcutta on October 7. She called at Marseilles and Port Said en route, and arrived at Calcutta on November 3 after a good passage, having completed the voyage in twenty-six days.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Castalia for Bombay (Liverpool, November 18); s.s. Scindia for Bombay (Liverpool, December 4).

Anchor Brocklebank Line.—S.s. Malakuta for Calcutta (Birkenhead, November 18); s.s. Manaar for Port Said, Colombo, Madras, and Calcutta (London, November 25); s.s. Mahronda for Calcutta (Birkenhead, November 29); s.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9); s.s. Mangalore for Calcutta (Birkenhead, December 13); s.s. Matheran for Port Said, Colombo, Madras, and Calcutta (London, December 23).

Bibby Line.—S.s. Lancashire for Rangoon (London, November 16); s.s. Stanley Hall for Rangoon (London, November 16); s.s. Oxfordshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, November 22); s.s. Lancashire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, December 6).

British India Line.—S.s. Mashobra for Bombay and Karachi (London, November 17); s.s. Merkara for Colombo, Madras, and Calcutta (London, November 24); s.s. Warfield for Bombay and Karachi (London, December 2); s.s. Nagina for Colombo, Madras, and Calcutta (London, December 9); s.s. Gamaria for Bombay and Karachi (London, December 16).

Clan Line.—S.s. Clan Macfarlane for Colombo, Madras, and Calcutta (Birkenhead, November 16); s.s. Clan Mackinnon for Bombay, Persian Gulf, Malabar Coast, and Tuticorin (Birkenhead, November 27); s.s. Clan Macmillan for Colombo, Madras, and Calcutta (Birkenhead, November 30).

Cunard Line.—S.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Corfu, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, November 30).

Ellerman, Bucknall, and Strick Line.—S.s. Braunfels for the Persian Gulf (London, November 18); s.s. Kormark for Persian Gulf (London, December 18).

Ellerman's "City" Line.—S.s. City of Calcutta for Calcutta (Birkenhead, November 27); s.s. City of Manchester for Bombay and Karachi (Birkenhead, November 22); s.s. City of Agra for Bombay and Karachi (Birkenhead, November 22); s.s. City of Manchester for Bombay and Karachi (Birkenhead, November 22).

Ellerman's Westcott and Laurance Line.—S.s. Venetian for Gibraltar, Malta, and Alexandria (London, November 22); s.s. Castilian for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, November 25).

Glen and Shire Line.—S.s. Glensanda for Port Said, Port Swettenham, Singapore, etc. (London, November 16); s.s. Radnorshire for Port Said, Port Swettenham, Singapore, etc. (London, November 30); s.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, December 14).

Henderson Line.—S.s. Pegu for Port Said and Rangoon (Birkenhead, November 29).

Holt Line.—S.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Glasgow, November 16); s.s. Theseus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, November 16); s.s. Diomed for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, November 18); s.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, November 23); s.s. Ningchow for Port Said, Port Swettenham, Singapore, etc. (Swansea, November 23).

Johnston Line.—S.s. Dromore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, November 18); s.s. Vedamore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, and Constantza (Liverpool, December 9); s.s. Willowmore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, December 16).

Papayanni Line.—S.s. Malatian for Malta and Alexandria (Liverpool, November 18); s.s. Grodno for Oran, Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, November 25).

P. and O. Line.—S.s. Khiva for Bombay (London, November 17); s.s. China for Bombay (London, December 1); s.s. Novara for Colombo, Madras, and Calcutta (London, December 1); s.s. Mantua for Bombay (London, December 15).

OIL NOTES AND NEWS.

Phœnix Oil and Transport.

The progress report of the Phœnix Oil and Transport Company, Ltd., and allied companies for October shows that the crude oil production for the month was 3,300 tons. The throughput of the refinery was 3,650 tons. Well No. 1 in the Runcu district, which recommenced flowing on October 7, still continues.

The position of the wells in drilling at the end of October was as follows:—

Moreni Stavropoleos.—Well No. 6 commenced drilling; depth 708 ft. Well No. 8, depth 2,927 ft.; 10-in. casing set, preparing to drill in. Well No. 10, erecting derrick and motor pump sheds. Well No. 16, making roads.

Tuicani.—Well No. 2, depth 1,026 ft. Reaming hole with special bit preparatory to lowering casing.

Chiciura.—Well No. 1, depth 1,618 ft.; cut 16-in. casing, and now extracting. Well No. 2, depth 1,804 ft. Well No. 3, depth 2,157 ft.; water test satisfactorily completed.

Runcu.—Well No. 2, depth 1,718 ft.; making water test. Well No. 3, depth 729 ft.; awaiting rotary rig. Well No. 4, depth 538 ft. Well No. 5, commenced drilling; depth 188 ft.

Bordeni.—Well No. 27, depth 1,153 ft.; cut 10-in casing, and now extracting.

Baicoi.—Well No. 5, depth 1,797 ft.; trial baling and cleaning out plug of oil sand.

Work generally has been seriously retarded by heavy rains during the greater part of the month, which have made the roads, especially in the Runcu district, almost impassable.

British Orion Oil.

The progress report of the "Orion" Societate Anonima de Petrol for October shows that the total crude oil production for the month was 4,000 tons. The position of the wells in drilling at the end of October was as follows:—

Tintea Wells.—No. 45, depth 1,332 ft. No. 71, depth 1,633 ft. No. 79, depth 852 ft.; struck the oil sand; preparing to bail. No. 94, depth 1,294 ft. No. 95, depth 3,184 ft.; new rig completed. No. 101, depth 933 ft. No. 103, depth 861 ft.; by cutting casing an oil sand was opened, which made several sand eruptions; cleaning out preparatory to production. Nos. 105 and 106, rigging up. No. 108, levelling site.

Runcu Wells.—No. 602, depth 1,183 ft. No. 605, depth 1,846 ft. (On October 20 this well came into production by heavy eruptions at an initial rate of 300 tons per day. After some days the hole became plugged with sand, and is now being cleaned.) No. 607, depth 1,194 ft. No. 608, depth 1,095 ft. No. 612, rigging up. No. 621, depth 1,292 ft.; making water test.

Moreni Wells.—No. 550, depth 2,748 ft.; making water test previous to drilling deeper. No. 555, rigging completed; drilling commenced.

Gropi.—Well No. 302, work temporarily suspended.

Satuc.—Well No. 701, depth 1,879 ft.; cementing.

BALKAN WAR CLAIMS AGAINST BULGARIA.

A number of claims against the Bulgarian Government have been registered with the Foreign Office by British Nationals in respect of damage resulting from the Balkan wars of 1912-13 (says the *Board of Trade Journal*). Many of these claims, though duly presented to the Bulgarian Government by H.M. Minister at Sofia, have been rejected wholly or in part by the Bulgarian authorities. The attention of claimants is being drawn to their right under Article 179 of the Treaty of Peace with Bulgaria to submit their claims to the Anglo-Bulgarian Mixed Arbitral Tribunal, 21, St. James's Square, London, S.W., but it is pointed out that under the rules of the Tribunal any such submission should be made before the end of the current year. Awards made by the Tribunal will not be entitled to rank for participation in the distribution of Bulgarian property in this country by the Administrator of Bulgarian Property.

Roumania's coal output in 1921 was as follows:—Old Roumania, 283,000 tons; Transylvania and adjoining districts, 1,303,000 tons; the Banat, 204,000 tons; the total for the country being 1,791,000 tons.

It is understood that the Mediterranean Asbestos Quarries, Ltd., have received offers for over 6,000 tons of spinning asbestos and for larger quantities of the lower grades. The net profits to the company over all grades has been estimated by the company's technical experts at over £45 per ton.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Rations.—The headquarters of the Ministry of Education, Sharia El Turka el Gharbi, El Insha, Cairo, invites tenders for the supply of rations required for certain Government schools, for a period beginning from January 1, 1923, and ending December 31, 1923. November 21.

Paving Stones.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 130,000 paving stones and 8,000 head stones (boutisses) required for the maintenance of the Port of Alexandria. December 15.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer, Egypt and the Sudan Governments' Office, London. January 2.

Wood Naphtha and Tierol.—The Egyptian Customs Administration invites tenders for the supply of 130,000 kilogs. of wood naphtha (wood spirit) and 5,000 kilogs. of tierol, for denaturing ethyl alcohol. January 6 (D.O.T.).

Electric Cranes and Lifts.—The Administration of Ports and Lighthouses, Alexandria, invites tenders for the following fixed and movable lifting apparatus for service at the Port of Alexandria:—

Eight travelling electric portico quay cranes, six of which are to be of 2,500 kilogs., the other two being double-power cranes of 2,500-5,000 kilogs.

Eight travelling balcony cranes of 500 kilogs.

Eight electric lifts; maximum carrying power, 1,500 kilogs.; speed per second, 0.50 metre.

Supply and laying 320 metres of rails for the running of the quay cranes.

Supply and laying of 280 metres of rails for the running of the balcony cranes.

Sealed tenders are to be addressed to the Directeur-Général, Administration des Ports et Phares, Alexandria, Egypt. December 20. (D.O.T.)

India.

Bunting, etc.—The directors of the Bombay, Baroda, and Central India Railway Company invite tenders for the supply of canvas, bunting, etc.; indiarubber hose, sheeting, etc.; red lead, dog spikes. November 22.

Gas Lights, etc.—The High Commissioner for India invites tenders for the supply of flexible steel wire rope, galvanised and ungalvanised; copper tubing, mantles for Kitson's lights, mantles for Pintsch's oil gas lights, etc.; buffers, wrought iron, and washers for buffer springs; axle-boxes, malleable cast iron or cast steel, for carriages and wagons. November 23.

Paper, etc.—The High Commissioner for India invites tenders for the supply of paper, Lancashire ledger or similar; sheets, mild steel, plain; plates, mild steel, plain. Form of tender may be obtained from the Director-General, India Store Department, Branch No. 10, Belvedere Road, Lambeth, S.E.1. December 1.

Iraq.

Limber Wagons.—The Ministry of Defence, Government of Iraq, Baghdad, invites tenders for the supply and delivery of:—(a) (Section No. 21a)—24 fore and 24 hind general service limber wagons, complete with accessories and fitted with the No. 45 wheel. (b) (Section No. 5a)—24 double lead sets of harness and 24 double wheel sets of harness, each complete with whip and legging. November 30 (D.O.T.).

Stirrup Irons.—The Ministry of Defence, Baghdad, invites tenders (covering delivery c.i.f. Basrah) for the supply of—980 extra large stirrup irons (5-in. tread), and 420 large stirrup irons (4¾-in. tread), of British Army regulation pattern, standard, and quality. November 30.

Malta.

Malta Mail Service.—The Government of Malta invites tenders for the conveyance of mails between Malta and Syracuse. Tenders must be sent sealed to the Director of Contracts, Malta. December 21.

Yugoslavia.

Medical Stores.—The Ministry of War and Marine (Sanitary Store), Zemun, invites tenders for the supply of various medical stores (drugs, graduated measures, medicine bottles, pill machines, forceps, dental rubber, surgical and veterinary instruments, etc.). December 9 (D.O.T.).

NOTES OF THE WEEK.

The Khalif and the Conference.

For the general public interested in Near Eastern affairs it is possible that the flight of the Sultan from Constantinople to Malta has somewhat dwarfed the importance of the opening of the Lausanne Conference; but, though the former event will doubtless exercise great influence on the future of Turkey and of the Near East, it may have very little effect on the course of the Conference. The departure of the Sultan from Constantinople, with its bearing upon the future of Islam, is a question primarily for the Turks, and, secondly, for the Moslems; and Europe, though interested, cannot—and has no wish to—intervene in the matter. That the Sultan was wise to leave when he did is very clear, and that Great Britain acted correctly in affording him the means of finding safety is also clear; but what the consequences will be remains to be seen. As to the Conference, there is, happily, a feeling of greater certainty. Preliminary meetings between M. Poincaré and Lord Curzon in Paris, and subsequently between those two statesmen and Signor Mussolini at Territet and Lausanne, are reported to have cleared the air of many misunderstandings and to have produced a working agreement which will make co-operation between France, Italy, and Great Britain comparatively easy. There may be hitches on minor points, but there will be no repetition of Genoa; and if the Turks have been reckoning on finding enough difference of opinion between the Allies to enable them to play the game of Old Turkey they will almost certainly be disappointed.

The Athens Court Martial.

The court martial on the first group of ex-Ministers and military leaders accused of responsibility for the Greek *débâcle* in Asia Minor was opened on November 13, and some progress with the trial was made during the week. The most important, though not, perhaps, the most interesting evidence, was that of General Papoulas. He declared that his proposals for the supersession of incapable officers by men of experience were ignored; that the three offensives were ordered on the initiative of the Government; and that the advance on Angora was practically due to King Constantine, in direct opposition to the advice offered by the command and the Headquarters Staff of the army in Asia Minor. The General added that had he known of the Powers' warning to Greece regarding the danger of a return of the ex-King he would not have accepted the command of the army. Another witness described how, prior to the elections of November, 1920, an Allied Power "actively supported, particularly with its fleet," the operations of the Greek army, thus greatly raising its *moral*, and how the hopes thus roused were falsified after the elections.

A Miscalculation.

To people in this country, however, it is possible that the evidence of a third witness, M. Georges Rhallis, son of a former Prime Minister, will afford the greatest interest. He is described, in a semi-official telegram from Athens, as having referred to an assurance given to the British Government in January, 1921, by the Greek Government as a grave error; the assurance in question being that the Greek Government was in a position to deal finally with the situation in Asia Minor in three weeks. This counting of chickens before they were hatched proved to have been too optimistic; and, according to M. Rhallis, Mr. Lloyd George complained that it had placed him in an awkward position in regard to British public opinion. To that complaint we should have thought there was an obvious retort: that it would have been only elementary prudence to secure a second, independent, opinion on the subject from British experts. Mr. Lloyd George, however, appears to have relied on the fact that "previously he had always had reason to have faith in the assurances given to him by the Greek Headquarters Staff." A pleasing tribute to the authority referred to, but hardly a sufficient explanation of an unwise step!

A "Balkan" Understanding.

The recent visits of M. Stambolisky to Bucharest and Belgrade and of M. Politis to the latter capital appear to have had the very excellent result of drawing the four countries concerned more closely together, and it looks as if they will present a united front at Lausanne on most ques-

Digitized by Google

tions affecting the Balkan region. On one point, the settlement of terms between Greece and Turkey, it is probable that Greece will be left to act entirely independently of the others, the Anatolian adventure being regarded as purely her affair. But in most other directions an understanding is said to have been reached, and on one point at least Roumania and Yugoslavia are quite agreed—the possible passing on to their shoulders by the Powers of some of Turkey's debts. That is not to say, of course, that the Powers will not, after all, be able to put such plan into practice—if they are, in fact, thinking of it. But the chief virtue of any agreement between the four countries mentioned lies in the fact that it must to a certain extent open up the way to a more general understanding, which would be an inestimable blessing if it tended to secure peace in the Balkans.

The Egyptian Constitution.

The Constitution for Egypt drafted by the Constitution Commission has not at the time of writing been presented to King Fuad for ratification, and it looks as if the Cabinet is finding the clause relating to the Sudan rather a hard nut to crack. Indeed, while the Commission may have found little difficulty in inserting the clause, since its responsibility was but limited, it would be strange if Sarwat Pasha's Cabinet, with greater responsibility and apparently a much better grasp on realities, should pass such a clause. For the Cabinet knows perfectly well—if the Commission chose to forget!—that this topic is "reserved": and its inclusion in the Constitution at this stage could only be regarded as provocative. It is, therefore, highly probable that the objectionable clause will be deleted, though the Cabinet may make it clear that it is in sympathy with the idea. To act in such a way, however, will require some little moral courage, and will inevitably provide the extremists with a new whip for use across the Government's shoulders. But Sarwat Pasha has shown that he is no coward, and he may be trusted to act correctly again in this case.

Another Cairo Outrage.

Another shooting outrage is reported from Cairo, and that it must be ranked as a political crime seems certain. The two victims are prominent members of the new party formed by Adly Yeghen Pasha, and they were shot at by a dozen or so young *effendis* as they were leaving the party's headquarters. Both the victims have since died of their wounds. Unfortunately, their assailants made good their escape. Some reports hint that the would-be assassins plucked up courage for the deed owing to a reported breakdown in the endeavours to trace the criminals responsible for the attack on Colonel Piggott, and that the postponement of the trial of Badr ed-Din Bey's assailants also played a part in heartening them. Having regard to the Egyptian temperament, there may be some truth in these suggestions. It is also worth noting that only a couple of days before the outrage the members of the third Zaghloulist delegation were liberated by the authorities after having been kept under arrest some time—during which period Egypt as a whole had been calmer than before. It is difficult to avoid connecting the commission of the crime with the other events mentioned, and even more closely, with incitements by the Zaghloulist Press. If the connection could once be clearly established, the path before the authorities would be clear. In any case, it looks as if Egypt as a whole would be no sufferer by a course of severe treatment.

Anti-Iraq Propaganda.

A further instalment of a correspondent's despatches on the subject of Iraq appears in the *Daily Mail*, with a few words of introduction claiming for the articles that they give "for the first time a clear view of what is happening in Mesopotamia." As an illustration of the degree of accuracy that the correspondent affects, the following quotation will suffice: "State visits by air are becoming a familiar feature of the new Administration. Recently Sir Percy Cox went by aeroplane. . . ." This, the only instance given of "a familiar feature," which the correspondent, writing in the middle of November and purporting to have been in Iraq until the middle of October, describes as "recent," happened on April 2, and was duly reported in THE NEAR EAST seven months ago. An honest attempt to convey a "clear view" of conditions in Iraq would have emphasised the importance of the Air Force in enabling the authorities to keep in touch by means of a few hours' journey with the outlying portions of the country. In the light of the correspondent's attitude on this particular subject, it is easy to infer the amount of reliance that may be placed on his main thesis in this second instalment of these propagandist articles that "tax-collecting by bomb has become almost a matter of routine for the Royal Air Force." The R.A.F. represents the military arm in Iraq, and recalcitrancy towards the authority of the State takes the form among some sections of the Arabs of a refusal to pay taxes. The correspondent of the *Daily Mail* offers no evidence to show that the representatives of Great Britain in Iraq, whether military or civil, have necessarily undergone a peculiar process of brutalisation which makes them revel in inflicting unnecessary and excessive punishment on unoffending people; but for the purposes of his paper's propaganda he is content to have it supposed that this is the case. Other visitors to Iraq who set greater store on accuracy and fairplay where British honour and prestige are involved, would tell us that this particular form of punishment is used only under compulsion, and after all the circumstances have been carefully considered by the responsible authorities.

The Iraq Problem.

There is a strong case for the reduction of British expenditure in Iraq, but that case does not need to call to its aid either the suppression of the truth or the suggestion of what is false. The ratification of the Iraq Treaty is the first step towards the introduction of economies in the cost of civil administration; peace with Turkey and the gradual growth of the Arab Army will liberate a portion of the British military force now kept in the country. It cannot be too strongly emphasised that Great Britain has very definite moral obligations towards the Arabs, and it would be a grave breach of honour to leave the people of Iraq, before they are strong enough to look after themselves, to the mercy of the Turks. We believe that after a certain lapse of time Nationalist Turkey will acquiesce unreservedly in the scheme of a separate Arab State or States; but to leave the latter at this stage exposed to easy reconquest must needs gravely jeopardise their existence. Hence the necessity for proceeding cautiously in Iraq. The Arab Government is anxious to assume more responsibility over its own affairs, and with its relationship to Great Britain now regulated by treaty, we may feel confident that no undue time will be lost in meeting their wishes, to the advantage of the British Exchequer.

India and the Elections.

The affairs of India were happily not in issue at the elections which occupied most of last week, and, so far as we can hear, the topic was very generally avoided. The results have nevertheless a good deal of interest from the Indian standpoint, because it is now more important than ever that the House of Commons should contain a nucleus of members who are in a position to understand what is going on, and to explain it to the rest of the House. From this point of view, Mr. Montagu's disappearance is to be regretted, for he would have been a keen critic of his successor at the India Office, while his name means much to the large class of Indians who have not yet made up their minds to adhere to the Constitution. Apart from him, however, we have noted no serious losses, and with Sir Charles Yate, Sir Thomas Bennett, Mr. C. H. Roberts, Colonel Wedgwood, and Mr. Ben Spoor all in the House, the different schools of thought will be adequately represented, while among the newly elected members there are some with whom the House will have to reckon seriously.

The New Members for India.

Of these reinforcements the outstanding personality is, of course, Sir John Hewett, now Conservative member for Luton, who contributes to the common stock an unrivalled experience of Indian administration, and who has a reputation for ability to call a spade a spade. Less generally known is Mr. Hope Simpson, who, standing as a Liberal farmer, defeated the late Minister of Agriculture at Taunton. While he was in the Civil Service in the United Provinces, Mr. Hope Simpson was perhaps best known as an authority on local taxation, but he left his mark in many branches of activity, and while he is now expected to specialise on agricultural questions, we may hope that his Indian experience will be fully utilised. India probably knows even less of Mr. Saklatvala, the Labour member for North Battersea, who has long been resident in this country. At first sight there is something incongruous in a Parsee Labour member, for the community, in proportion to its size, is the most highly capitalised in India, or perhaps in the world; but it is also characterised by versatility, and we hope to see Mr. Saklatvala take a prominent part in what has now definitely become His Majesty's Opposition.

The High Commissioner for India.

The choice of a successor to the late Sir William Meyer is naturally exciting much interest in India, and we notice that prominent advocates of "Indianisation" are insisting that no one but an Indian will be acceptable. Such an attitude is natural enough, for High Commissioners enjoy a share of the limelight, and an Indian in the post would certainly look well; but, after all, they are business men all the time, and, if we had to undertake the selection, we should make practical familiarity with English business methods an indispensable qualification for the post. There are not many Indians in possession of this qualification who would care to take it, and much harm might be done while a newcomer was unlearning most of what he has acquired in Calcutta or Bombay. Continuity is another important consideration, and the recurring experience of Whitehall shows how exceedingly difficult it is to get competent Indians to stay for any time in this country. While, therefore, we should be glad to see an Indian appointed, we feel some doubt whether, at the present time, Lord Reading will be able to put his hand on a suitable Indian candidate.

THE WEEK AT HOME.

London, Monday Evening.

The Government's Strong Position.

The result of the elections has been to give the Government an ample majority over all the other parties in the House of Commons. A working majority of 70 odd is sufficient to keep a Cabinet in power, but not too large to breed rebellion from within—or, what is sometimes more fatal than rebellion, slackness. The late Government's majority was so huge, and it must be added that the Opposition was so ineffective, that it suffered from both these causes.

There is no reason whatever in the nature of things why the Government should not remain in office its full term of five years. The Opposition will, of course, attack it from the beginning, but without any real desire to put it out for the next two or three years, for neither Liberals nor Labour have the least chance of getting a working majority for some time, and elections without victories are expensive luxuries.

There is, I think, general relief at the result. However strong party feelings may be—and they are not very bitter at the moment—reasonable men all agree that a weak Government is a bad Government, because it is never sure if it is on its feet or its back. It is something to have a stable and strong Government that is sure of support, whatever its party complexion.

Personal Defeats.

There is the inevitable tale of casualties after the battle. The Minister of Health, Sir A. Griffith-Boscawen, was defeated in what was thought one of the safest seats in the country; he is an unfortunate politician, for this disaster happened to him a year ago in another safe seat. Two or three minor Ministers have gone under, but nobody of any importance, except the Chief Whip. Mr. Bonar Law himself, however, had a hard run in Central Glasgow against Labour, and his seat does not look too safe.

The Independent Liberals lost Sir Donald Maclean at Peebles on a split vote. He is popular and plucky, and will probably be found a seat elsewhere. Mr. Asquith came near to defeat at Paisley; he was supported by the Conservatives as well as Liberals against Labour, but got in only by three hundred odd. Mr. Runciman, in spite of the support of Lord Grey, failed at Berwick.

The Labour Party lost a leader, Mr. Arthur Henderson. He is a good organiser, but a feeble politician, and no great loss to his colleagues. Mr. Clynes had a narrow shave at Manchester, and one is glad to see him back. He is an asset to the House, as well as his party. But Mr. H. G. Wells, who stood as Labour candidate for London University, failed to get elected. His failure is a good thing for literature, and not a very bad thing for politics.

The National Democratic Party, a mysterious body that called itself Labour and voted with the Coalition, and counted for nothing at all, has utterly disappeared. Not one of its nonentities has survived. Its destruction is no loss.

The heaviest personal losses are among the National Liberals. Sir Hamar Greenwood is out at Sunderland; Mr. Kellaway, who was quite excellent as Postmaster-General, was defeated at Bedford. But their heaviest blow was the defeat of Mr. Churchill (who was handicapped by an operation for appendicitis) at Dundee, where he was beaten by Mr. E. D. "Morel," the pacifist, and, of all extraordinary opponents in all extraordinary places, a Prohibitionist candidate who has been regarded as a joke at previous elections.

Personal Victories.

The National Liberals have no conspicuous gains to set off against their losses; the Wee Frees have got back Sir John Simon, an effective debater. Labour is very heavily weighted with pacifists and cranks. Some of these are good speakers, but, after all, you cannot make a silk purse out of a sow's ear. More interesting is the return of Mr. Sidney Webb, the brains of the Labour movement, who has fathered the Fabian Society.

Several women put up for election, and some of these were highly qualified, and, by common consent, excellent candidates. But only the two who were in the late Parliament (Lady Astor and Mrs. Wintringham) have been victorious. Apparently there is something in the theory that women will not vote for women.

The Future of Parties.

The election has definitely cleared the air of most of the political fog. It makes Labour clearly the leading Opposition party; Labour successes in Scotland and the North of England were emphatic, and the party has more men of ability than in the last Parliament, and should, therefore, make a better show. Between 1918 and 1922 its record was feeble in the extreme.

The real crux of the position is the Liberal feud. The Asquithians have gained, but nothing like as much as they expected; they are now a compact group of 60. The National Liberals have lost heavily, falling from 120 to 54; and Mr. Lloyd George will, therefore, be unable to realise his ambition to be the power behind the throne of Mr. Bonar Law. The calculation was that the Conservatives would not have a clear majority, and would, therefore, be compelled sooner or later to come to terms with the National Liberals.

But Mr. Bonar Law has no need to seek allies: Mr. Lloyd George will not be the Sword of Damocles over his head, and will have to wait his opportunity. Instead of disguised power, he will have a period of real opposition. His personal future still remains a matter of speculation—at 60 a statesman is beginning to be conscious of Anno Domini—and it is the most interesting personal question in politics to-day.

Nobody disputes the value of his services, or his extraordinary genius, which is unique. But no party seems to want him, except his own little group. The Conservatives hate him politically because he is a Radical, and will always be a Radical. The Independent Liberals hate him because he broke the party in 1916; not even for the purpose of winning the war could they condone that deed. Labour hates, envies, and admires him—they only wish they had got him, or anybody like him, but they would hardly be happy with him, and, in any event, they are not likely to get the chance. Mr. Lloyd George has made it clear that he has no belief in Labour remedies. Therefore, he will have to play a lone hand for the present.

The Liberal Crux.

But in one sense the future of politics very largely depends on the Liberals. The two groups, which now hate each other rather more than they hate anything else in politics, number altogether 114—thirty less than Labour. But if they had not indulged in a civil war against each other they would have obtained many seats which, as things were, they threw away either to Conservatives or Labour, both of which parties have picked up not a few of these unconsidered trifles.

Now, any idea of an accommodation of Liberalism with Labour is absurd; Labour has asserted its independence, and I doubt whether it would gain anything by a working alliance with Liberalism, particularly so long as Liberals are divided.

But the moment Liberals drop their internal feud—which is merely an Asquith-Lloyd George vendetta—they will not only improve their own morale, but will stand to win back at the first opportunity many seats which have now been handed over to Conservative or Labour men. And not only that. At the present moment there is no inducement to vote Liberal; for you know that in no circumstances can your vote count as anything but that of an ineffective minority. The result is that young Radicals vote Labour and old Whigs vote Conservative. As soon as the Liberals agree to bury the hatchet they will dry up this leakage, which is having very serious results for their party; and they would stand a good chance of beating Labour at the next election, and perhaps the Conservatives, too. But unless they heal the breach they will simply reduce the party to ruin; we shall be back again at the two-party system, but one will be Conservative and the other Labour. And that, for many reasons, is a conflict which, in the national interest, it would be well to avoid. Almost inevitably it would develop along the lines, not of principle, but of class and property, and whichever side won the results would be harmful.

Ocellus.

According to a statement of the American Near East Relief the refugees now in Greece include 98,000 men, 293,000 women, 385,000 children with at least one parent each, and 70,000 orphans. In addition, there are many refugees who have sufficient resources to support themselves for the time being.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, November 9.

The Question of the Khalifate.

The topic of the hour is unquestionably the sensational decision of the General Assembly at Angora with regard to the Khalifate. This decision has caused unmistakable consternation, and the Egyptians are torn between the admiration and approval which they have hitherto openly expressed of the Kemalist activities and their feelings at this radical interference with what has become a traditional part of their religion. It is difficult in such matters to arrive at the true view held by followers of the Prophet, but, if one may judge by the articles published in every Moslem paper without exception and by what one has been able to gather in conversations with instructed Egyptian Moslems, there can be no doubt that Moslems in this country as a whole consider that the Khalif must have temporal power, and that it is essential that the Khalifate should remain vested in a strong Sultanate. In any event, there seems to be a general feeling that this was a matter that might quite well have been left over until after the Peace Conference; but for reasons which are too obvious to require explanation those counting for anything in matters religious are displaying much reserve in the expression of their views on the subject.

The Peace Conference.

So far no definite decision has been taken with regard to Egypt's participation at the Conference. It is understood that a sympathetic reply has been received, and that certain details are under discussion. A definite announcement is expected during the coming week, and it is currently stated that Sarwat Pasha, who will be accompanied by Seifullah Yusri Pasha, Under-Secretary of State for Foreign Affairs, will represent Egypt, and that Ismail Sidky Pasha, Minister of Finance, will act as Prime Minister during his absence.

In the meantime the elements which, even at the expense of their country, do not wish to see the present Ministry succeed in anything it undertakes have been active, and two delegations have left for Lausanne, one sent by the Zaghloulist Wafd and one by the Hisb El Watani (the late Mustapha Pasha Kemal's old party). The Wafd delegation has for its object the admission of Zaghloul as representative of Egypt and the discrediting of the Government delegation. The Hisb El Watani, while ostensibly going to assure that there will be no infringement of the country's independence, is really going to play the game of the ex-Khedive, who is known to be behind that party. Lausanne will, therefore, become a hot centre for Egyptian intrigue, and we may possibly witness a development in the direction of Kemalist support for the claims of Abbas Hilmi.

The Constitution.

A Contentieux Committee is now studying the draft Constitution with a view to putting it into proper legal form, and it is hoped that it will be possible to present the final draft to the King in a few days' time. It is understood that some very minor alterations have been made in the original proposals, and that the recommendation with regard to the Sudan has undergone an amendment, more of form than of principle.

The Foreign Officials.

A decree was published this week authorising the Cabinet to pay special pensions and special indemnities to retiring civil servants and army officers in cases which were not already provided for by the existing Financial Code. This measure directly affects the foreign officials who have established their claims to be allowed to retire, and it is understood that it has been introduced because the Cabinet did not consider that it had otherwise sufficient power to deal with these cases. It is not known exactly how many officials have already secured permission to retire, but from what one can gather, every administration is being affected.

The Racing Season.

The racing season opened last week-end with two excellent meetings at Gezira and Heliopolis. The attendance was, however, not quite as good as usual, probably owing to the fact that until the last moment there was some doubt whether the meetings would be held. Indeed, at the time of writing, it is not altogether certain that the clubs may not decide to close down racing altogether as a protest at the action of the Government in regard to the *pari mutuel*.

It appears that the Ministry of Finance, on the look-out for new sources of revenue, decided that it was time that the *pari mutuel* at the race meetings and *pelote basque* paid its quota to the Treasury. In regard to the racing *pari mutuel*, the Ministry proposed that the percentage deduction which the clubs make should be raised from 10 per cent. to 15 per cent., and that the Government should take 5 per cent. and the club 10 per cent. The latter strongly objected to this. They pointed out, first, that the raising of the percentage reduction on the *pari mutuel* would drive the betting public into the hands of the bookmakers, who, although unauthorised, still carry on a thriving trade, and that, apart from the bad moral effect, the takings on the *pari mutuel* would decrease; and, secondly, that the 10 per cent. which the clubs deduct at present may not always cover expenses, and that if the Ministry's proposal is enforced it will mean that, while the Government will be assured of a weekly return, the clubs may make a loss, particularly if, as is anticipated, the *pari mutuel* turnover decreases. The clubs proposed that, instead of raising the *pari mutuel* percentage so as to procure a return on gross profits for the Government, the latter should either impose a moderate tax of so much a meeting or content itself with a percentage of the net profits; and they added that if the Government persisted in its proposal they would have seriously to consider the advisability of shutting down, as they would not be justified in incurring the losses which they were convinced would result. As no agreement could be come to, it was agreed that last week's meetings should be held under the old conditions, and that the question should be discussed afresh this week.

The Government's attitude in this matter is as incomprehensible as that of the clubs is reasonable. The club's objection that an increase in the *pari mutuel* deduction would conduce to a reduction as to turnover is generally endorsed. Even if such

Digitized by Google

an increase were feasible, it would be in the highest degree inequitable that the Government should take one-third of the gross profit whether the clubs make a net profit or not. Obviously, if the present proposal is persisted in, the only alternative before the clubs would be to shut down. They already have an example before them of the *pelote basque* syndicates, which could not stand the Government percentage, and have had to cease operations; and the racing clubs would be fully justified in not running the risk to which the Government's proposal would expose them. It is much to be hoped that wiser counsels will prevail, and that the Government will see the matter in the reasonable light put forward by the clubs; for, apart from the unemployment which it would create, the cessation of racing would react very seriously on horse-breeding in Egypt, which the activities of the racing clubs have admittedly done so much to encourage and improve.

GREECE.

Athens, November 11.

The Trial of Ex-Ministers.

The inquiry with a view to fixing the responsibility for the Greek *débâcle* in Asia Minor is now concluded, and the trial of the first group of the accused will commence at the beginning of next week in the Parliament House. Entrance to the public will be allowed on presentation of a written permit issued by the Revolutionary Committee; representatives of the Press and foreign correspondents will be allotted special entrance tickets endorsed by the Press Bureau. The prisoners forming the first group are: M. D. Gounaris, ex-Premier; M. N. Stratos, ex-Minister of the Interior; M. P. Protopapadakis, ex-Prime Minister and Minister of Finance; M. N. Theotokis, ex-Minister of War; M. G. Baltazzi, ex-Minister for Foreign Affairs; Admiral Goudas, ex-Minister of the Interior; Brigadier-General Stratigos, ex-sub-Chief of Staff in Asia Minor and Minister of the Interior; and General Hadjianestis, who was in command of the Hellenic forces in Asia Minor at the time of the *débâcle*.

NELSON'S STAIRWAY, the "George," Portsmouth: — Very little remaining of its antiquity excepting Nelson's bedroom and the staircase which he descended before the Battle of Trafalgar.

Johnnie Walker: "Ah! England expects . . . . . "

Shade of Nelson (interrupting): " . . . that you, JOHNNIE WALKER, will go on paying duty."

JOHN WALKER & SONS, LTD., SCOTCH WHISKY DISTILLERS, KILMARNOCK, SCOTLAND.

The Roumanian Minister.

Yesterday morning the Roumanian Minister, Monsieur Djuvara, presented his letters of credence to King George. The ceremony was held in the Throne Room, the Minister for Foreign Affairs, M. Politis, being present.

Addressing the King, the Roumanian diplomatist expressed his pleasure at being the first foreign Minister to present his credentials to the new King of Greece, and added that, acting on instructions received from his Government, he would do his utmost to strengthen the bonds of real friendship existing to-day between the Roumanian and Greek peoples.

Replying to M. Djuvara, His Majesty thanked him for his kind words, and assured him that both he and his Government would afford him every assistance and support for the accomplishment of the mission with which he was entrusted, and with a view to improving still more the happy relations between the two nations.

The Political Situation.

The Prime Minister, M. Alexander Zaimis, who has now recovered completely after his recent operation in Vienna, arrived in Athens last Tuesday morning. In the afternoon he called on the Revolutionary Committee, but was unable to see the Acting Premier, M. Crokidas, who was indisposed.

Although four days have elapsed since M. Zaimis' return to Greece, the Premier has not yet taken the usual oath of allegiance, nor has he entered upon his Ministerial duties. This is due to the fact that M. Zaimis, being determined to reconstruct the Cabinet on a national coalition basis and with the co-operation of one or two of his own political friends, has not so far succeeded in arriving at an understanding either with the Liberals or with the chief factors of the other parties. The irreconcilable elements of the former do not approve of a Coalition, and favour nothing but a purely Venizelist Cabinet under M. Zaimis. On the other hand, the moderate Liberals, though not objecting to a Coalition, maintain that the majority of the members of the proposed new Cabinet should be chosen from the ranks of the Venizelists. This view is apparently shared by the Revolutionary Committee. M. Zaimis, however, continues to insist upon the formation of a Coalition Cabinet in which neither party would be predominant, his only condition being that its members recognise King George II., and that they favour the pursuit of an open pro-Entente policy.

It is difficult to say how this political crisis will develop. At all events, the reconstruction of the Cabinet is considered very improbable for at least another week. It is also quite possible that M. Zaimis will "hang on" until the trial of those responsible for the Asia Minor catastrophe is concluded. The Premier is not the sort of man who would take upon himself big responsibilities.

Squandering of Public Funds.

A statement published in the Athens Press by the Revolutionary Committee gives one an idea as to the manner in which the public moneys were squandered under the old régime, particularly at a time when, in view of the desperate financial con-

Digitized by Google

dition of the country, strictest economy was necessary.

Large sums of money were placed to the credit of the Legations in Allied capitals for special purposes. Thus two sums, one of Drs.500,000 and another of Drs.1,500,000 were placed at the disposal of the Legation in Paris. Instead of his annual allowance of £ Stg. 1,800, the Greek Minister in London was actually in receipt of £5,000 (this amount being paid at the rate of Drs.150 per £ Stg., *i.e.*, Drs.750,000). Instead of the official allowance of £ Stg. 900 for upkeep expenses, light, heating, and motor-car service, actually £1,700 was spent. During the period 1918-1920 sundry expenses at the Greek Legation in London amounted to £ Stg. 12,000, as against £30,000 disbursed from November 1, 1920.

Miscellaneous News.

The Greek High Commissioner at Constantinople has arrived in Athens, and was received by M. Politis.

Dr. Nansen left for Geneva by the Orient Express on Thursday night (9th inst.).

A notice signed by the Military Governor of Old Greece has appeared in the Athens and provincial Press forbidding the hanging up of the portraits of ex-King Constantine and ex-Queen Sophie in cafés, shops, hotels, and other public places. The playing or singing of the ex-King's tune, "The Son of the Eagle," is equally prohibited in public places.

Seven Turkish political prisoners who succeeded in escaping from the prisoners' concentration camp at Liossia, near Athens, were recaptured in the island of Chios, whence they intended to cross over to the Asia Minor coast.

The Italian colony of Athens have offered a first instalment of Drs.27,682.50 for the Asia Minor refugees.

YUGOSLAVIA.

Liubliana, November 11.

The Italo-Yugoslav Outlook.

A very great interest is naturally taken in Yugoslavia in the results of the Fascist coup in Italy, and speculation is rife as to what the ultimate upshot will be. But no one who pretends to be well-informed or level-headed is seriously alarmed, in spite of many serious symptoms. Of course, the situation in Venezia Giulia, always deplorable as far as the Slovene population was concerned, is now worse than ever. The threats of the Fascist leader, Signor Mussolini, that the Treaties so far entered into with Yugoslavia would be repudiated, have made a bad impression. It cannot be denied that Fascist tactics towards Yugoslavia and the Yugoslavs have been provocative throughout, from the days of the Paris Conference till this very moment; yet there is no genuine uneasiness observable. A war would, in some ways, not come amiss to the Fascists. They owe their power to a militant policy, and war would be only the logical conclusion of their behaviour towards the Yugoslavs. But it takes two to make a quarrel—in most cases, at least—and Yugoslavia is most emphatically for peace. For the sake of peace she has shown herself anxious to conciliate her larger neighbour on every occasion. The Treaty of Rapallo itself, which the Fascists denounce, represents cruel sacrifices to the Yugoslav nation. Moreover, its concessions went far beyond the Wilson line of the Peace Conference days, even beyond what the Nitti Government was prepared to accept. And these sacrifices sprang from a genuine wish to secure a much-needed peace on Yugoslavia's western frontier.

The country is still busy with the work of internal consolidation, complicated by the many problems arising out of the political union of territories that have never been so united before, in spite of the close kinship of the entire population. Serbia suffered terribly in the War, in which she lost 270,000 of her fighting men and 800,000 civilians, out of a total population of four and a-half million. Her dinar has been dragged down by the Austrian crown in the former Austro-Hungarian provinces. Moreover, these provinces, though rich in natural resources, were systematically exploited by Austria-Hungary, and their industry was left undeveloped. Now, by the Treaty of Rapallo, the whole region has been cut off from the two seaports that served it heretofore, namely, Trieste and Fiume—the only outlets with which it has a ready-made railway connection. Since the constitution of the new State of the Kingdom of Serbs, Croats, and Slovenes, more usually called Yugoslavia, great efforts have been made to start industrial development in the country. The Liubliana and Zagreb fairs bear witness to the fact that these efforts are having good results; but a very great deal remains to be done. The main concern of the State is, and ought to be for many years to come, to develop its resources, establish its markets, and prove its stability by continuing to exist in increasing prosperity. Yugoslavia, therefore, needs peace, and will go on being prepared to do everything within reason to preserve peace. All the same, the situation bears an unfortunate resemblance to that of 1912-14, with Italy in the old part of Austria-Hungary, and Yugoslavia in that of Serbia of those days. But the world is under no delusion now as to what an outbreak of war means. Hence a policy of peace may well count upon the moral backing of Great Britain, America, and France.

ROUMANIA.

Bucharest, November 11.

Dedication of the Anglican Church.

The Lord Bishop of Gibraltar arrived in Bucharest last week on a diocesan visit, and on Sunday, November 5, he dedicated the Church of the Resurrection of Bucharest. A large number of members of the British and American colonies were present, including Sir Herbert and Lady Dering and the American Minister and his wife, Mr. and Mrs. Peter Jay. As a token of the friendly relations between the Roumanian Orthodox Church and the Anglican Church, the Primate was represented at this solemnity by three priests of the Roumanian Orthodox Church, one of whom delivered an appropriate address in French. On Wednesday a reception was held by the British colony to meet the Bishop.

His Lordship, together with the Chaplain, the Rev. Claude Hinscliff, is now visiting various centres in the country where there are British residents, and will subsequently return to Bucharest to complete his diocesan work here and also to consecrate the local British cemetery. He has already called on the Primate of the Roumanian Orthodox Church, and during the course of next week will be received in audience by the King and Queen of Roumania.

In Case Greece Turns Republic.

The local Press reproduces the news, published by a semi-official Belgrade newspaper, that the Yugoslav and Roumanian Ministers at Athens were authorised to draw the Greek Government's attention to the danger to which Greece would expose

Digitized by Google

herself should her people proclaim a republic. In such a case the existing conventions between Greece and the other two countries would be considered as void.

M. Venizelos.

It is rumoured that M. Venizelos is about to visit Bucharest, and afterwards Belgrade, with the view to securing for the Greek cause the support of the Roumanian and Yugoslav Governments at the Lausanne Conference. M. Venizelos' action is apparently prompted by the fact that, despite the bonds of relationship between the Roumanian-Yugoslav and Greek dynasties, the Bucharest and Belgrade Governments have not deemed it opportune so far to assist Greece in its present critical situation.

Hungary's Apology.

Count Rubido Zicky, the Hungarian Minister at Bucharest, who recently returned from Budapest, called the other day at the Ministry of Foreign Affairs, and tendered the Hungarian Government's apology for the regrettable incident which took place in the Hungarian Parliament about a month ago, when the Opposition deputy, M. Szylagy, made offensive remarks about Roumania.

The "Iron Gates."

The Inter-Allied Danube Commission, established at Bratislava, has now decided to hand over during the next few days the Iron Gates region of the Danube to the Roumanian and Yugoslav authorities. These two States propose to complete the works left unfinished by the administration of the late Austro-Hungarian monarchy. The passage-channel will be widened, thus ensuring an unhampered river traffic during the three seasons of the Danube navigation. The Roumanian State intends utilising the energy produced by the waterfall on this portion of the Danube also for industrial purposes.

BULGARIA.

Sofia, November 14.

Balkan Politics.

The latest Kemalist demands have not occasioned great surprise in Bulgaria, as it was always felt that the Kemalists would over-reach themselves sooner or later. The only claim that directly concerns Bulgaria is the demand for the holding of a plebiscite in Western Thrace. In normal times Bulgaria would not object if a plebiscite were held, but as the great majority of Bulgarian nationals from Thrace are now refugees in Bulgaria, it is opined that a plebiscite would not justly determine the status of the province. Besides, as she sees there is no chance of Western Thrace coming into her possession, Bulgaria stands solid for autonomy. M. Stambolisky has enunciated these views again and again, and the nation is behind the Prime Minister. The question of an economic outlet can also not be put on a satisfactory basis if Turkey or Greece obtain Western Thrace. Ever since the Kemalists defeated the Greeks in Asia Minor Bulgaria's policy towards Turkey became reserved. During the last two months relations have even become strained. The Bulgarian Government are not in any way tied to the Kemalists; they have an entirely free hand, and if Kemal endeavours to increase his Thracian territory, active opposition may well be shown by Bulgaria.

There is, however, a third party who is watching every move in the game. This third party is Moscow. The Soviet are somewhat dismayed at the threatened rupture between Turkey and Bulgaria. It is wholly in their interests that Turkey and Bulgaria remain friends. For months past the Bolshevists have been striving to increase their influence in Bulgaria as well as in Turkey. They would not like to see two countries whom they have sedulously cultivated turn against one another. If Turkey and Bulgaria are to remain friends, the Soviet will have, however, to induce the Kemalists to adopt a more friendly attitude towards Sofia. If some attractive bait is prepared it is possible that Sofia may nibble. But it will require to be very attractive, and it is somewhat difficult to see what it can be. It has been suggested in *The Times* that, with the help of the Soviet, Bulgaria might win territory from Serbia. In view of the extremely strong military situation of the Serbs, this is an unlikely contingency. The offer of a Bulgarian return to the Southern Dobruja at Roumania's expense is also improbable. For territorial aggrandisement there thus remains only Thrace.

It is in this direction that the Soviet are turning their eyes. Their policy will be to endeavour to arrange a deal between Bulgars and Turks. The latter will agree to lend military support to Bulgaria in order that the latter obtain a complete outlet to the Ægean, accompanied by a moderate slice of territory. In return, Bulgaria must support Turkey against all attacks delivered by Greeks or other Balkan States. Such is the present Soviet plan. With the Turks in their present Chauvinistic mood, it will not be easy for the Soviet to pull off this deal.

A Referendum.

Next Sunday a Referendum will be held throughout Bulgaria to decide the guilt or otherwise of the three Bourgeois Cabinets. These Cabinets were presided over by MM. Gueshoff, Daneff, and Malinoff respectively. The latter two Ministers are both in prison in company with a number of their colleagues. M. Guechoff and two or three others were abroad when the Government decided on their arrest, and so have managed to escape. In well-informed circles the result of the Referendum is regarded as a foregone conclusion. One and all will be found guilty. Of their punishment it is as yet too early to speak, but it is thought that they will be judged much more quickly than the members of Dr. Radoslavoff's Liberal Cabinet. The latter were accused of having involved Bulgaria in the

World War, and their trial has already lasted fifteen months.

Reparations.

The year is now drawing to a close, and nothing has yet been decided upon concerning the much-vexed question of Reparations. The Inter-Allied Commission are still awaiting the decision of their respective Governments, and no one knows when these Governments are going to make a decision. Meanwhile Bulgaria has decided that she can pay nothing at all for at least two years, and is preparing a Note to this effect. It is high time that the Allies put an end to an absurd *impasse* which has already lasted for over six months. Everyone knows that Bulgaria cannot pay the sums demanded of her by the Treaty of Neuilly, but she can pay something. This something should be fixed and fixed quickly.

ALBANIA.

Tirana, October 30.

The Government.

Tirana, a small town and one that does not take kindly to modern ideas of progress—for innovations are slow to penetrate and all changes very difficult—is a happy ground for small political intrigues. Everyone here, Ministers and Deputies, is in easy and constant contact with everyone else, and in the cafés and restaurants of the capital all the world congregates; nothing remains hidden or unknown; a report launched at 8 a.m. is known to every "citizen" at five minutes past.

At Tirana, then, the slightest and falsest rumour is spread and amplified, and this fact creates a bad atmosphere, upsetting the spirit of tranquillity which is so necessary to work. Hence the hesitation and holding-back, and the deplorable waste of time. The report of an imminent crisis in the Government has been persistently circulated here, with the result that the Government became nervous. Jafer Ypi, deeming it very difficult for the Cabinet to do its work in these conditions, demanded, on October 25, a vote of confidence from the Chamber, "in order," he said, "to set their minds at rest, and to see whether or not the Government enjoys the confidence of the elected of the people."

The Opposition party attacked the Government. One of their speakers gave it praise for having pacified the country and for having established security, but he charged it with want of administrative and organising ability. The speeches against the Government were frequent and very lively, but in the end forty-five votes were given for the Cabinet and fourteen against.

The Opposition party, though lacking homogeneity and cohesion, is taking up a fighting attitude. It includes four ex-Ministers (Konstantin Tassi, Demetre Kacimbro, Suliman Delvina, and Fan Noli) and several young deputies, among whom are Ali Klisura, Stavre Vinjohn, and Louis Gurakugi. This party alleges that the present Government tends towards a dictatorship.

Beyond the Frontier.

The news arriving from Serbia is important and even disturbing: it is stated that Azem Galitza, chief of a political Albanian band, who had sought refuge in the neutral zone (between Albania and Serbia), has taken the road from Prishtina at the head of a hundred men. Azem Galitza has become the terror of the Serbian authorities, owing to his audacity and the speed with which he carries on his activities; he is, moreover, always ready to defend the Albanian peasants of Kossovo against Serbian injustice and to avenge his compatriots when they are the victims of summary punishment.

On the other hand, Ras Popovici, chief of a Montenegrin band, has recommenced his activities against the Serbs, and he is always willing to catch unawares a Yugoslav detachment or official.

Now nothing that occurred in Serbian territory would have affected the Albanians if the troubles had not happened near the frontiers, and especially if Albanian people and the Albanian region of Kossovo had not been involved. It is, moreover, worthy of remark that peace is complete in the mountainous regions of Albania, and that no trouble is to be apprehended from the side of Albania on the frontier, so that a mere spark from outside (that is, Serbia) will not be able to set the heath on fire.

Declaration of November, 1921.

The League of Nations at Geneva has resolved to make a record of a document concerning a declaration made on November 9, 1921, by Great Britain, France, Italy, and Japan, on the same day on which these four Great Powers decided, at Paris, to recognise the independence and sovereignty of Albania, as well as its frontiers. According to this document, "the violation of the frontiers or of the independence of Albania might constitute a menace for the strategical security of Italy." Articles I. and II. of this declaration lay down that in case of danger Albania shall address herself to the League of Nations, and the four Great Powers above mentioned engage to instruct their delegates to the League of Nations to recommend that the restoration of the frontiers of Albania should be entrusted to Italy. By Article III., even if Albania does not apply to the League of Nations, the four Great Powers mentioned will bring the situation to the notice of the Council of the League of Nations, and will take steps to confide to Italy the restoring of the frontiers of Albania and the safeguarding of her territorial and *economic* independence.

In Albania it is held that this declaration amounts to an arrangement made by States which —with the exception of Italy—are not directly interested; and it is thought that its practical effect will be nil, as Albania has not subscribed to any arrangement of the kind.

The Frontiers Again.

The Conference of Ambassadors has just ratified the report of the Frontier Commission regarding sector A2 and sector B, that is to say, of the line running from the Lake of Scutari as far as Mount Maya Dyarovica, in the direction of Jakova. This frontier involves sacrifices on the part of Albania of territory held in 1913. As for the portion extending from Jakova to Lin (Lake of Ochrida), the definition of the frontier is involved in serious difficulties by reason of rectifications in favour of Yugoslavia recommended by the Conference of Ambassadors (November, 1921), rectifications which detach large stretches of prosperous regions from Albania. In the Jakova sector, for instance, the mountaineers will be deprived of all their pasturage and their cultivable lands. Numerous petitions and protests have been forwarded by these mountaineers to the International Frontier Commission.

PERSIA.

Teheran, September 18.

Political.

The Commission which was recently formed by the President of the Majless at the Prime Minister's request, to examine the respective offers of the two rivals for the Northern Oil Concession, the Standard and Sinclair Oil companies, has at

Digitized by Google

last submitted its report, which is, however, not published. Nevertheless, the Prime Minister, who would appear to shirk the responsibility of giving a decision in favour of either party, has referred the matter back to the Parliament, who have passed it on to a Committee to deal with. Further delay is therefore inevitable, and this highly important question will still remain undecided—if, indeed, it is ever settled, of which people are beginning to become sceptical, in view of the unjustifiably protracted negotiations and the apparent inability, or unwillingness, of the present Government to make up its mind on the subject.

A few days ago the Parliament approved the Bill providing for the engagement of eight more American advisers, in addition to the recently appointed Director-General of Finance, Dr. Milspaul. Four of these will receive 10,000 dollars each per annum, and the other four 7,500 dollars. One is engaged for one year only to take charge of the old Banque d'Escompte de Perse (ceded to the Persian Government under the Russo-Persian Agreement of 1921), which is now to be run as a national bank, under the title of the "Bank of Persia." At present its activities are confined to endeavouring to recover old outstandings from its debtors when it was the Russian bank, but so far not much success has attended its efforts. Three other advisers are for the Accounts Department of the Ministry of Finance and for the Direct and Indirect Revenues Departments, while the remaining four are intended for the financial agencies in the provinces. Amongst these advisers is Mr. McCaskey, who was Mr. Morgan Shuster's right-hand man during the latter's Treasurer-Generalship in 1911, and who proved himself a most capable official. Dr. Milspaul is expected to leave America during the present month, and the other advisers will probably travel with him.

Suspension of Newspapers.

In consequence of the strong protests of the British Legation against the libellous articles which appeared almost daily in the gutter Press assailing British policy in Persia, the Prime Minister suspended the greater number of newspapers appearing in the capital. Then came the mourning days of Moharram, and, naturally, no papers appeared for several days. On the resumption of business in the town all printers and compositors went on strike, and the only paper that appeared for two or three days was the semi-official organ *Iran*, which consisted of a single sheet, and was set up and published by officials of the printing office. Then the bakers in the town threatened to strike in sympathy with the printers if the suspension was not removed, and this forced the Prime Minister's hand, and he was forced to give in and release the suspended papers. A few days ago all the newspapers reappeared as before, and, with a unanimity hardly to be wondered at, they have been attacking the Prime Minister for their suspension, which has therefore served no useful purpose, but has rather shown up the Khavam es-Sultaneh's weakness, in view of which, and of the universal attacks on him and his policy in the Press, the Cabinet's position would appear to be none too safe.

Another strike which took place a few days ago was not very serious and was soon settled. It appears that a short time ago a shopkeeper in the Nasserieh street was in arrears with his rent, and the landlord, who wished to increase the rent of the shop, tried to turn him out forcibly. In consequence of this, the shopkeepers in the principal streets closed their shops and proceeded to the Parliament, where a crowd of them soon collected and demanded redress from the Prime Minister. The latter, after an hour or two, appeared, and promised to appoint a commission to inquire into their grievances, which included the threatened increase in rents, whereupon the shopkeepers returned to their shops, which they opened again in the afternoon, though whether they will derive much satisfaction from the commission remains to be seen.

The Turkish Victories.

The recent Kemalist victories over the Greeks in Asia Minor have, naturally, been jubilantly received here by the Mussulman population, and a number of Turkish residents in the town, as well as Persians of all classes, have called at the Ottoman Embassy the last few days to congratulate the Turkish Government on the successes.

Market Fair at Baku.

The semi-official paper *Iran* published in its issue of 15th instant a notice from the Russian Legation inviting Persian merchants to participate in the fair which opened at Baku last week. As in the case of the Nijni Novgorod Fair, the Russians are attempting to secure Persian patronage of the fair by offering special facilities and advantages, which include free passages for merchants proceeding from Persia, free export of goods without any interference from the Veneshtorg, the Russian Commercial Agency, who usually control all exchange of goods between the two countries, and the same immunity will apply to goods purchased at the fair and imported into Persia, which will be allowed into the country free of duty.

The Shah.

His Majesty the Shah has telegraphed the Prime Minister that he intends to leave Spain, where he has gone on a visit to King Alfonso, for Persia about the middle of October, and he should therefore be back in Teheran towards the beginning of December.

PRESS ON THE NEAR EAST.

The Allies and Turkey.

The *New Statesman* of November 11 contains an article entitled "Kemal Drunk to Kemal Sober." It begins by reiterating its contention that the Turkey of to-day is of Mr. Lloyd George's making, and then proceeds to the crisis at Constantinople. It examines the demands and conduct of Kemal, and finds that, although "for many, if not all, of these acts and demands the Turks can, it is true, make out a case," the Angora programme is "a naked display of force, a gesture of contempt for international conventions." It continues :—

> But, it may be objected, though we may disapprove of Rafet Pasha and the principles and the methods of Angora, can we afford to offer a serious resistance? Lord Curzon declares that we cannot purchase peace at the cost of humiliation; but are we prepared to face the cost of war? To that we answer that Europe cannot afford not to offer resistance; for to give way now will mean not merely humiliation, but a vast increase of anxiety and danger throughout the Near and Middle East, irreparable ruin to legitimate European interests, and a probability, amounting almost to a certainty, of a widespread conflict before many months are out. That Turkey should be an independent sovereign State we are all agreed. Turkey must, if she chooses, be permitted, like other States, to suffer from the measles of nationalism. But there is no reason why we should finish the work, which our late Government blindly pursued, of re-creating her as a dominant military power. To do that,

Digitized by Google

in the name of "self-determination" or on pacifist principles, would be the crudest sentimentalism; to do it on grounds of "economy" would be to stamp ourselves "penny wise, pound foolish." For let us face the facts honestly. We are all heartily sick of the Near Eastern problem, but we cannot solve it by running away from it. We may not intend to stay in Mesopotamia; but we do not want to be attacked while we are there. We do not want a three-cornered struggle in Syria and Palestine, with new threats to Egypt and the Mohammedan lands in North Africa. We do not want to see European trade and European culture permanently crippled or driven out of Asia Minor. We do not want to see the last chances of peace in the Balkans vanishing into thin air. All these things will become more than possibilities if the madness (or bluff, if anyone prefers to think it that) of Angora is allowed to triumph over the common sense of Europe. It is necessary in the interests of all the world as well as our own that we should restrain the Turks till their heads have had time to cool.

Further, it says, there is no question of repeating our single-handed provocation at Chanak. "In this crisis the Entente will be, what it has not been for the past three years, a reality." And it concludes with a note upon this hardly-won unity of the Allies:—

This solidarity may not last, but it is, for the moment, the most important—and, indeed, the only effective—guarantee that we can get against the waste of blood and money. In the face of it we can hardly believe that the Turks will maintain their preposterous attitude. They have everything to gain, and nothing to lose, by exercising patience for a few days. They have not the slightest reason to fear any trick being played them by the Allies; they can still hope to profit by divergences of interest and differences of opinion round the table of a Peace Conference. But they can expect nothing but disaster by provoking a conflict with the united arms of the three Great Powers. Let Kemal drunk appeal to Kemal sober!

CORRESPONDENCE.

THE PLIGHT OF GREECE.

To the Editor of The Near East.

Sir,—In reviewing the present unfortunate situation in which Greece finds herself placed, it is somewhat difficult to discover the underlying cause of the undoubted unfriendly attitude displayed towards her by all other countries. As Greece stands to-day, she is apparently utterly alone and friendless, and though we are all aware of many actions committed by her late Government that were, to put it mildly, open to great condemnation, I have yet to learn in which respect these actions outweigh those committed by many Governments of other countries.

Completely isolated commercially, financially, and industrially, and blockaded on all sides by all nations, Greece finds herself in a position from which it is almost a practical impossibility to extricate the State from her numerous internal difficulties. It is beyond cavil that the treatment which she has been receiving from the Allies, and, perhaps, especially from France and England, has not been just or equitable. Relying on promises and statements made in speeches by eminent men upon whose honour and integrity she thought she could with safety act, Greece undertook new obligations in war and in finance, and now finds herself burdened with results which she rightly expected would be shouldered, in part, at any rate, by those upon whom she depended. Is it any wonder that the Greek people are inclined to scoff at the principles boasted of by the civilised nations of the West, and are beginning to regard promises emanating from that direction with a certain amount of suspicion—which, in short, means that British prestige has suffered very considerably in the Levant, generally owing to the vacillating policy which the Home Government adopted in its handling of the Near Eastern situation.

Greece, finding herself discarded even by those who she was entitled to believe were her Allies, is now to the utmost extent of her resources preparing to protect her own interests, and those efforts are the most praiseworthy, crippled as the little country has become in finance, drained as she has been by twelve years' continuous warfare, three years of which was at the request of the Allies, and handicapped as she was by the totally unjustifiable embargo placed by the Powers on the use of her fleet against the Kemalists.

As the position now stands, Greece finds it necessary to keep her army fully mobilised, ready for instant action, and is busily occupied in shipping war material and soldiers northwards in the fear that still further unjust treatment will be meted out to her as the result of the coming Conference at Lausanne. The country will be blamed abroad by journals and journalists who have but the smallest appreciation of the indignities the nation has suffered and is still suffering from, for making these warlike preparations. But the Greeks themselves fully realise the dangers that they are exposed to by the Turkish occupation of Eastern Thrace, and are preparing to meet them. They realise the ambitions of the Bulgarians regarding an outlet in the Ægean Sea, and the unsatisfied desire of the Serbians to have a "right-of-way" through the port of Salonika, a combination of circumstances that compels the present Greek Government to take all possible precautionary measures for safeguarding the little that has been left to them.

The fresh demands of Kemal, if conceded by the Lausanne Conference, will only lead to enlarged desires, and in the end the Turk, who has ever had his eye looking towards the south, will by some means or another find an excuse for an attempt to intrude himself further on Grecian soil.

Definite and irrevocable decisions, just and equitable to both Greece and Turkey, should be made at Lausanne, and penalties of the heaviest nature should be included in these decisions; otherwise, within a very short period the Balkans will once again be the scene of a slaughter of soldiers and civilians before which the slaughter in Asia Minor that has just been enacted will pale into insignificance. Surely somewhere in the Western world a feeling of equity still exists, and surely some expression of it will be given when it is appreciated that Greece is faced not only with the horrors of another war, but with the further unspeakable horrors of epidemics of disease among the hundreds of thousands of refugees of all nationalities whom she is now harbouring to the best of her ability and to the fullest extent of her means. Already the hand of death is pointing towards the wretched people who came here for safety. Smallpox and typhoid fever are both raging in certain quarters; scores are already dead, and hundreds dying from these two causes alone.

Can nothing be done while there is yet time?—I am, etc.,

J. B. Harris.

EARLY RECORDS.

"A HEBREW DELUGE STORY IN CUNEIFORM." By Albert T. Clay. (London: Humphrey Milford. 7s. 6d. net.)

Professor Clay makes no claim to originality in the publication of this text. The cuneiform tablet in question was discovered by Dr. Scheil twenty-five years ago, and a version of it published. But on account of the dirty and mutilated condition of the fragment it was not clearly deciphered, nor was its importance understood. It is a copy of a much earlier text, and was made by a scribe named Azag-Aya 1966 B.C. The original text was probably 2,000 years older. A comparison of the first five lines as translated in 1898 by Prof. A. H. Sayce with Prof. Clay's version will indicate the progress that has been made:—

Sayce:

1. He went not . . . many years.
2. (The deeds) of mankind thou knowest (?).
3. . . . like cattle they multiply.
4. . . . the god will rain (destruction) (?)
5. . . . their cry.

Clay:

1. I will bring (?) their clamor (?)
2. The land had become great; the people had multiplied.
3. The land, like a bull, had become satiated.
4. (In) their assemblage God was absent.
5. . . . heard their clamor—

The ordinary layman will rub his eyes to discover any sort of identity between these versions. It should be pointed out, however, that Professor Sayce was dependent upon Scheil's redaction, while the author of the present work has had access to the actual tablet in the Pierpont Morgan collection.

Professor Clay's main point is that this is part of a very ancient Hebrew-Amorite deluge story. He advances proofs from the nomenclature to show that it is of Amorite origin. Its heroes and deities are Amorites. The words are chiefly from the same source. These things being so, it is conclusive that the deluge story is indigenous to the lands occupied by the Amorites, and later by the Hebrews. If this can be established, it means that the theory that the Hebrew traditions are borrowed solely from Babylonian sources has to be abandoned. Incidentally, the deluge tablet, and others referred to by Mr. Clay, furnish us with a background for the civilisation to which they belonged. The extreme antiquity of the Amoritish civilisation is clearly demonstrated. Professor Clay has already familiarised us with this point of view in his earlier works. He has done good service in claiming for the Amorites a leading place in the history of the Ancient East. His arguments provide a salutary check to the extravagances of the pan-Babylonian school. But he is inclined to stress his own theory overmuch. The truth of things seems to be that the culture and literature of the Babylonians passed to the Israelites through an Amorite medium. Certainly, until the key to the Hittite inscriptions is discovered, we prefer to keep an open mind on the question.

Our author, however, is one of the ablest of the American Assyriologists, and his views are backed by sound scholarship. He claims that two things are firmly established by recent research:—

1. The patriarchs of the Old Testament are Hebrew in origin, and not borrowed from Babylonian sources.

2. Underlying the Old Testament stories there is real history. Two quotations will indicate his viewpoint.

"The claim that the Biblical patriarchs are the creation of a fiction writer, or belong to mythology, has no support from the discoveries made in the past decade. In every instance in which archæology has thrown light upon the subject we find we have historical characters to deal with" (p. 54).

"The discoveries of the past decades have played such an important rôle in this connection that it is now possible to assert that it is impossible for those scholars who relegate to the region of myth certain Biblical or Babylonian characters to substantiate their position."

The book is illustrated with photographs and transcripts. It is a valuable contribution to the study of ancient Oriental history.

SOME SHORT STORIES.

"AS OTHERS SEE US." By Marmaduke Pickthall. (London: W. Collins, Sons and Co. 7s. 6d net.)

Nine of the sixteen short stories included in this book are Eastern, and we have enjoyed them all; the remaining seven are Western—with one exception the scene is laid in England—and, though they contain good work, we do not like them nearly as well. The fact seems to be that while Mr. Pickthall has a rarely developed gift of understanding of, and sympathy with, the Orient and its peoples, he has to a certain extent lost touch with his own people; and the result is an unpleasant note running through his Western stories. We even find the same note obtruding itself into those of the "Eastern" stories in which European characters figure. Thus for us the first story, "The Kefr Ammeh Incident," amusing though it be, is less enjoyable than the second, "Cross-Purposes," because the burlesque of George Sandeman in the former strikes us as much overdone. The best bit of work in the book is "Knights Errant," a tale of two Bedouin robbers, who show themselves veritable lions when dealing with the Syrian peasants who will accept them at their own valuation, and veritable sheep in face of the Turkish soldiers sent out to capture them. The end of this tale is delightful in its irony. The "heroes" have made good their escape solely by the superiority of their Arabian horses, and:—

"Another victory!" exclaimed Rihân. "Thanks be to Allah!"

"The crown of all—a deed whose fame will live for ever!" blubbered Rihân.

And heart in mouth, with frequent tears, they galloped southward towards the desert, afraid of every speck on the horizon.

The misprint in the matter of the names—the "heroes" were actually named Rih and Rihân—cannot spoil that termination. Another story that we like immensely is "Melek," which is full of subtle understanding. And, finally, we would recommend a perusal of "Unofficial" to all those good folk who are convinced that all Moslems are evil and all Christians virtuous. This tale, too, contains English characters, but though they are presented in no flattering light, we feel that we have here portraits, not caricatures; and we share Mr. Pickthall's obvious dislike and contempt for such self-righteous meddlers.

MUSICAL NOTES.

The Bach Mass.

The number of choral societies in London whose work is vital is not great. Far too many are content to lie in the old ruts of Sullivan, Coleridge-Taylor, Mendelssohn, and the rest; and, indeed, it is almost to Mr. Kennedy Scott's Philharmonic Choir alone that we may look in London for the performance of the larger works. This conductor, a musician of enterprise and insight, has trained a choir of much enthusiasm and unusual intelligence; so that when this body gave Bach's Mass in B minor recently at the Queen's Hall, the rendering was never less than satisfactory, and at times extremely good. The purely choral sections especially were taken with dignity and splendour; balance and finish alike were excellently secured. In his conducting of the orchestra, too (in which, incidentally, some of the wind playing was magnificent), Mr. Kennedy Scott showed a distinct advance on anything that I have heard him in before; he had his own ideas, and he steadfastly realised them.

There is in this great Mass scarcely one part that is more important than another, and it is saying much for this particular performance that few parts did outshine the rest. The soloists were almost all wisely chosen; one may mention particularly Miss Dorothy Silk (soprano), Mr. Clive Carey (bass), and Mr. Aubrey Brain (horn), as attaining memorable worthiness. It is true that there were a few points, such as the abundant employment of the pianoforte, the adoption of some unduly slow *tempi*, and the intonation of an occasional fiddle, to which one might take exception; but, on the whole, the rendering was a very fine one indeed. One will not soon forget the moving darkness of the four-part chorus, "Qui tollis peccata mundi," or the awful profundity of "Et incarnatus est" and the "Crucifixus," or the irresistible sweep of the mighty "Sanctus." I give these three things as examples: there were others equally well done and as splendid. We in London may very well be proud of and grateful to the Philharmonic Choir.

Miss Ursula Greville.

Miss Ursula Greville, who, since I last heard her, has been making a reputation in Austria and Germany, and who is about to visit America, recently gave a song recital at the Steinway Hall. She was suffering from a cold—a fact which, though it checks possible reproach, unfortunately limits praise. But, curiously, this ill-luck was audible only in certain of her songs. She began with Ford's "There is a lady sweet and kind," and more beautiful singing from her and a better rendering by anybody I have not heard. Her *legato* was perfect, her tone marvellously pure. This she followed with an attractive little Swedish ballad, "Ingerid's Song," pleasantly enough done, but in which her art was not sufficiently concealed. Afterwards came an inaptly chosen sea-shanty, "Billy Boy," the sixteenth-century "Willow Song," an exquisite lament which her cold inhibited her from realising effortlessly, and a setting by her accompanist, Mr. Maurice Jacobson, of "Charlie is My Darling." This last was done with admirable point and rhythm, but was withal too nice. A modern Austrian group came next, in which Grosz's Serbian "Liebeslieder" and Schreker's "Unendliche Liebe" were best; and of the remaining songs that I heard (all were English), Felix White's "Vespers" and Vaughan Williams' "Your eyen two will slay me suddenly" were incomparably the finest sung. Miss Greville's voice is developing both in richness and in breadth, but her artistry at this recital was yet a little conscious. Her intelligence is extremely alert, but that is a factor in singing that should be felt and not perceived.

Gramophone Records.

The majority of the more important records recently issued by "His Master's Voice" Company have been vocal, and it cannot be said that the choice of songs has been uniformly good. There appears to have been a perfect orgy of "ballad" singing, which is in effect a too prominent stressing of the commercial side of the business. The crime has, moreover, been committed by artists who should know better. Why, for instance, should Miss Edna Thornton spoil a record of Somervell's "Shepherd's Cradle Song" (well enough sung) by putting on the reverse side of the disc a wholly worthless song by Adelaide Needham called "The Exile's Return"? Or, even worse in comparison, why should Mr. Peter Dawson pair off with Vaughan Williams' "The Roadside Fire" (though this he sings with poor rhythm and execrable vowel enunciation) a song by Sir Landon Ronald that is verily the tritest rubbish, "O, Falmouth is a Fine Town"? And, again, one must deplore the prostitution of Mr. Sydney Coltham's good voice in the slop and slosh of the Tostis and Coates. The adverse count can be extended when we come even to Galli-Curci, who has chosen, of all vapid things written for a prima donna, Sir Henry Bishop's "Echo Song." It is true that her voice in this is as wonderful as ever, but the music is patently manufactured stuff, and serves only to display the skill of her voice and of M. Berenguer in his flute obligato. In such a song as this it is perhaps no misfortune that many words are indistinguishable.

But all the records are not thus. There has been made a magnificent record of "Pronta io son," from Donizetti's "Don Pasquale." It is sung by Lucrezia Bori, who possesses a voice that is beautifully flexible and of blending quality, and Giuseppe de Luca, a splendid baritone. De Luca's singing in this very entertaining duet is both fine and strong; and the whole thing is done with admirable spirit. Another record that has distinct merits is the one by Michele Fleta containing "Il fiore che avevi a me tu dato," from Bizet's "Carmen." Fleta has a rich voice, capable of infinite variety, but he indulges in "gallery" singing in this passionate interpretation, exaggerating his *rallentandi* and *pianissimi*.

There is, further, a batch of Scotch songs, sung by Joseph Hislop and Alexander MacGregor. Hislop undoubtedly has a fine voice, but one, I should say, that is far better suited to opera than to the purer form of song. Into a lovely thing like the "Eriskay Love Lilt" (a Hebridean song) you cannot, without ruining the whole conception, admit the slightest exaggeration anywhere, and Hislop must, temperamentally it seems, exaggerate. The same is true of the exquisite "Herding Song" (arranged by M. Lawson in the "Songs of the North"), of "Afton Water," and of "O My Love's Bonnie"—the voice itself is beautiful, but the singing not sufficiently controlled by musical intelligence. With Alexander MacGregor the matter is different. He, too, has naturally a fine voice, but inexperience (or something worse) is obvious in all his songs. His two best songs are the Hebridean "The Road to the Isles" and "Maiden of Morven," an Ossianic love lament. A certain direct method of approach and a native fervour serve him well, but, apart from these, his qualities are not distinctive. Enunciation is not his strong point, and there is an awful lapse in one of his songs where an "r" (and he is a Scotsman!) is insisted on in the word "dawn."

Of the other records, the one that really is important is the Flonzaley Quartet's playing of Borodine's "Nocturne." One cannot find words to describe this matchless body of artists, but in this record, which is beautifully made, one notices especially the superbness of their calculation and the exquisiteness of their detail. This is the kind of record which makes short shrift of the foolish people who deny the value of the gramophone.

There are, of course, plenty of other records, which some will buy and some will avoid. I am not closely in touch with the public which will approve of Sir Harry Lauder's "Saturday Night" and "Bella, the Belle o' Dunoon," but here the two songs are, for those who like this sort of thing. Then, again, we can see popularity looming up before the Coldstream Guards' playing of Rossini's "Moses in Egypt," and of Eille Norwood's "Danse des Follettes." To me there is nearly always a touch of the mechanical in such records, but in the first, at any rate, a very admirable balance of tone has been secured. A record which I am happy to be with the majority in applauding is that made by De Groot and his Piccadilly Orchestra of Bizet's "Carmen." It is all great fun, played with any amount of skill. "Carmen" has periods of genius, and its intriguing tunes give De Groot plenty of opportunities to exploit his individual touch.

PERSONAL AND GENERAL.

TO-DAY.

November 23 (New Style).
November 10 (Old Style).
Rabia II., 4, 1341 A.H. of the Moslem Calendar.
Kislev 3, 5683 of the Jewish Calendar.

The Greek Minister has left London for Lausanne.

Sir Howard and Lady Frank have returned to 5, Cheyne Walk from Palestine.

Mr. Rudyard Kipling, who recently underwent a serious operation, is progressing very satisfactorily.

Colonel Georges Ostoitch, Military Attaché at the Yugoslav Legation, has returned to town from Brussels.

Sir Herbert Samuel, the British High Commissioner in Palestine, and Lady Samuel on November 18 celebrated the twenty-fifth anniversary of their wedding-day.

Group-Captain A. E. Borton, C.B., C.M.G., D.S.O., has arrived in England from Baghdad. He accompanied Jaafer Pasha in his flight from Baghdad to Cairo.

The exhibition of the League of Nations Union, held at St. Albans, will be transferred to London, where the exhibits of the participatory nations will be shown at the Hyde Park Hotel on November 27 and 28, during the afternoon.

Dr. Theodore Stephani, the well-known specialist in tuberculosis, who is Director of the Sanatorium of Montana (Valais), is returning from India, where he went, at the request of the Maharaja of Patiala, in order to look after some members of his family.

The King has been pleased to confer membership of the Second Class of the Order of the British Empire (K.B.E.) on Mgr. Damianos, Orthodox Patriarch of Jerusalem, on the occasion of His Beatitude's silver jubilee in that office.

The engagement is announced between Dr. E. A. Walker, M.C., son of the late Major-General J. Grant Duff Walker, I.A., and Gladys Isabel, widow of Captain H. E. Elliott, M.C., R.G.A., and youngest daughter of the late Unwin Sowter, J.P., Derby.

The Bulgarian Minister in London left London on November 17 for Lausanne to meet M. Stambolisky in connection with the Near East Conference. Mlle. Stancioff, Secretary of the Legation, is on the staff of the Bulgarian Delegation at Lausanne.

The engagement is announced between Captain J. F. M. Whiteley, M.C., R.E., only surviving son of Mr. John Whiteley, formerly of Madras and Mysore, and of the late Mrs. Whiteley, and Janet Ottilie Avery, daughter of the late Mr. F. W. Avery and of Mrs. Avery, of Ottawa, Canada.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.
ORIENTAL LANGUAGES AND RELIGIONS.
Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.
For particulars, apply to Sir E. DENISON ROSS, Director.

Under the auspices of the Persia Society, Major-General Sir Edmund Ironside, K.C.B., C.M.G., D.S.O., will lecture, on Tuesday, November 28, at 5.15 p.m., in the Royal Astronomical Society's Lecture Room, Burlington House, Piccadilly. His subject, which will be illustrated with lantern slides, will be "The North Persian Force in 1920-1."

The engagement is announced, and the marriage will take place shortly in Calcutta, between Captain Edmund Darell Evelegh, M.C., Royal Field Artillery, A.D.C. to H.E. the Governor of Bengal, only son of the late Lieut.-Colonel E. G. Evelegh, R.M.L.I., and Mrs. Evelegh, of Walmer, Kent, and Ethel Aimée (Babs), only child of Mr. Justice Coutts, C.I.E., I.C.S., of the Patna High Court, and Mrs. W. Strachan Coutts.

The Afghan Minister, Abdul Hadi Khan, attended a luncheon given last week in the White Room at the Savoy Hotel in honour of Mr. Nazimuttujjar Mirza Hashim Ispahani. Others present included Prince Nadir Mirza Arasteh, Counsellor of the Persian Legation, the Right Hon. Syed Ameer Ali, Sir D. Bomanji, Mr. B. N. Basu, Mirza Abdul Husain, Mr. Abdul Quayum Malik, Mr. J. M. Parikh, Dr. S. Muhaurnadi, and Mr. N. C. Sen.

Jaafer Pasha, Iraq Minister of War, arrived in London on Wednesday of last week via Trieste, having flown from Baghdad to Cairo. During his stay in England he hopes to discuss with the British Government the details of the relationship between Iraq and Great Britain under the new Treaty now awaiting ratification. It is not yet known whether the resignation of the Naqib and the appointment of Abdul Muhsin Beg es Saadun as Prime Minister will affect Jaafer Pasha's position in the Iraq Cabinet.

Our Port Said Correspondent writes:—

Professor and Mrs. Garstang, with their daughter, have just left Port Said for England by the s.s. "Yorkshire," and hope to return early next year to continue their work in Palestine.

Mr. Phythian Adams, well known in connection with the British School of Archæology in Jerusalem, is also in Port Said for a few days' rest and change.

Mr. Smallwood, who has recently been prospecting (it is rumoured with success) for oil in the Dead Sea Valley, has also left for England by the s.s. "Yorkshire."

APPOINTMENTS, Etc.

Mr. George Schuster, D.S.O., the new Financial Secretary to the Sudan Government, has left England to take up his appointment at Khartoum.

Prince Habib Lotfallah, who was appointed recently as Minister to America by the King of the Hejaz, has arrived in London from the Continent. Prince Habib previously represented his country here, but was recalled two years ago and made Chancellor of the Arab Nations, his place in London being taken by the Emir Faisal, now King

THE PERSIA SOCIETY.
President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

of Iraq. During the recent assembly of the League of Nations at Geneva he acted as official observer for the King of the Hejaz.

The Secretary of State for India in Council has made the following appointments to the India Educational Service: Mr. David Henry Peacock, B.A. (Cantab), M.Sc. (London), F.I.C., and Mr. Frederick Joseph Meggett, Ph.D. (Birmingham), as Professor of Chemistry and Professor of Biological Science respectively at Rangoon University. The Secretary for India has also appointed the following to be Assistant Executive Engineers in the Public Works and State Railway Department of the Government of India: Robert Stuart Andrews, Reginald Rainsbury Bolton, Thomas William Robertson Easton, Robert John Earle, Man. Mondal Gopi Ballav Singh, Morley Theodore Gibling, William Stirling Hall, James Dunbar Michael, James Lawson Peacock, Reginald Terence Wynne Goodman.

OBITUARY.

It is stated from Warsaw that Mr. Grzegorzevski, the Polish Orientalist, has died at Lemberg.

The death occurred recently of Mr. Edward Wilkin, formerly in the Bombay Judicial Department. From May, 1904, till his retirement in 1911 he was Judge of the Small Causes Court at Karachi.

The death has occurred of Brigade Surgeon-Lieutenant-Colonel George Gilbert MacLaren, formerly of the Indian Medical Service. He was founder of the MacLaren Leprosy Hospital at Dehra Dun.

The death is announced of Surgeon-General Sir Francis Wollaston Trevor, K.C.S.I., C.B. He had seen much active service, having partaken, among other campaigns, in the Afghan War of 1878-80 and the Sudan Expedition of 1884-5.

THE IDRISI.

We are officially informed that the report of the Idrisi's death is untrue, and that he is not in receipt of a subsidy, as stated in the *Al Ahram* and quoted in THE NEAR EAST.

THE RISE OF BULGARIA.

The Bulgarian Minister, M. Stancioff, took the chair on November 16 at a lecture by Lady Grogan at the University of London, King's College (School of Slavonic Studies). The lecture was on "The Rise of Modern Bulgaria," and is to be followed to-day by a second. Lady Grogan dealt with the past history of the Bulgarian nation, and with the glorious and subsequently tragic fate of the Bulgarian Tsars, from the year 800 A.D. till the Turkish conquest, which lasted 500 years, and yet was unable to suppress national ideals.

At the close of the lecture Dr. Seton-Watson spoke on the advisability of union among all Slav peoples, and mentioned that Bulgaria had made her welcome re-entry into King's College.

UNIVERSITY OF LONDON.

A Public Lecture entitled "CUSTOMARY LAW IN THE PUNJAB" will be given by Mr. S. WILBERFORCE (late Puisne Judge of the Lahore High Court) at UNIVERSITY COLLEGE, LONDON (Gower Street, W.C.1), on TUESDAY, DECEMBER 12th, 1922, at 5.15 p.m. The Chair will be taken by Sir Charles Bayley, G.C.I.E., K.C.S.I., Member of the Council of India. Syllabus obtainable on application to the undersigned. ADMISSION FREE, WITHOUT TICKET.

EDWIN DELLER, Academic Registrar.

AN ARMENIAN CHURCH IN LONDON.

We extract the following from the "London Letter" of the *Manchester Guardian* of November 16:—London, the compendium of almost every style of architecture, is having some of the few existing gaps carefully filled up. A remarkable addition of the kind just completed is the Armenian chapel designed by Mr. Davis for a site in Kensington, behind Harrod's Stores. It is in the tradition of Armenian Byzantine of the thirteenth century, with a slight Saracenic influence. Mr. Davis has introduced into the art of London a building characteristic of Asia Minor, recalling the building and the cloisters of Haghbat, Armenia. There is no external carving, the effect being obtained by masses, reposeful surfaces, accurate mouldings and inscriptions. In the angles of this cruciform structure will be noted some curious niches, which are compressed at the top like the corbelling of Moorish art. These are typical features of Armenian work. The building is crowned by a hexagonal turret, supported on seven columns. The doors are of oak, with intricate Arabesque carving. The building is of diminutive size, designed to hold a congregation of 75 people, yet its scale is impressive both externally and internally. The architect has contrived to work in an exotic manner, but he has produced a building expressive of its purpose in Portland stone that does not look the least out of place in London. Now that the Turk is having his will again of Armenia and the Armenians of Asia Minor, the existence of an Armenian church in London is significant.

Bishop Gwynne's present plan for the winter is to be in Egypt to the middle of December, when he will return to Khartoum for Christmas and stay till the end of February. He hopes to spend part of Lent and Easter in Egypt.

Where to stay in the East

CAIRO

THURSDAY, NOVEMBER 23, 1922.

TURKEY AND LAUSANNE.

History is being made rapidly these days on the Bosphorus. Nationalist Turkey, just as other States and ordinary individuals, has to buy her experience, and the more headstrong the policy that she adopts, the greater in all probability the price that she will ultimately pay. Onlookers in the meantime will be well advised to refrain from attributing finality to any single phase in the laboured process of State-building. As things stand to-day, the Turkish Nationalists, who a few weeks ago could count on the unconditional support of France and Italy and had the whole of Islam solidly behind them, have estranged Italy, caused the sympathy of France to weaken, and aroused the gravest misgivings in the Moslem world. The attitude of Islam to the person of its Khalif of the day has been too full of contradictions to justify any opinion as to the reception that is likely to be accorded to the latest developments in Constantinople. Before the Kemalists had announced their intentions in regard to the Sultan and Khalif Great Britain was considered by Indian Moslems as the arch-enemy of the Khalifate. For the purposes of a factitious agitation it may be necessary to hold that whatever Turkey does is right, and the agitators, having no further use for the Khalifate handle, will drop the subject and seek another argument more suitable to their aims. It is possible, however, that the action of the Sultan Khalif in refusing to abdicate and in removing himself out of the immediate reach of the Kemalists will introduce a complication in Nationalist Turkey of which the last has not yet been heard. This is a matter for the Moslem world alone. No exception can be taken to Great Britain's action in according sanctuary in Malta to Sultan Vahid ed-Din, for it is certain that, if the Turks as a whole endorse his deposition, he will not be allowed to abuse his right of asylum for purposes of political intrigue against the new order. The question of the Khalifate, however, stands on a different plane. If any considerable section of Moslem opinion refuses to endorse the appointment of a second Khalif in the lifetime of his predecessor, the Turkish Nationalists may have gratuitously provoked a controversy in Islam that must inevitably weaken Turkey.

Although the fact may not be believed by the Turks themselves, it is not in the real interest of any country that the new Turkey should ride for a fall. In many quarters it will be argued that, as an entirely independent Turkey can never have any stability in it, the sooner the Nationalist bubble is broken the better. That way, however, there lies no peace for the Near East for a long time to come. After the defeat of the Greeks the Angora authorities had it in their power to make Turkey a factor in the world's politics: so far they have only succeeded in making it a nuisance. Owing to the mistaken policy of France and Italy, they were led to believe themselves the equal not only of any European Power, but also of all the Powers. The restoration of the Entente as an effective instrument in the hands of the three Powers will inculcate a sense of proportion in the Turks. We are confident, however, that it will be to the interests of all concerned if the Allies deal gently, albeit firmly, with the Nationalist mistakes of the last few weeks. A whole series of bridges will have to be built to enable the Angora officials to retrace their false steps, and as, in view of the bankruptcy of the Turkish State, there must be a golden foundation to many of those bridges, it should not be difficult to point the way to the Turkish representatives at Lausanne. To regard the intransigence of Rafet Pasha too seriously is to encourage Turkey in her own mistake of regarding herself as on a level with the Western Powers. Both France and Italy were misled into supposing that Angora had become Westernised; but whatever standard of enlightenment Mustapha Kemal Pasha himself may have reached, it is painfully evident that those who dictate the Angora policy are still hopelessly steeped in Orientalism. It will be to the interests of the Allies to help the Turks as much as in them lies in enabling any Western leaven there may be to leaven the whole lump. This can be done only by the three Powers acting strictly in unison, for if France is to return to the Franklin-Bouillon method of lowering herself to the Oriental level, there will be no progress for Turkey, and neither peace nor practical advantages for the Powers.

As a result of the preliminary conversations between the British, French, and Italian Governments, France, it is to be hoped, will be relieved of her bogey that Great Britain is set upon obtaining all the commercial and industrial plums of the Near East. The decision attributed to the British Government not to allow any discussion of the Arab-Turkish boundary line should be upheld; for only in this way will it be possible to avoid the danger of the Arab question becoming a pawn in a larger game. With good-will re-established between France and Great Britain, it should be possible to arrive at a fresh understanding with regard to the Middle East. There would seem to be no doubt that the possibility of coming to terms with the Turks in regard to Syria has been entertained in French circles, and the mere suggestion has in all probability caused the Angora authorities to turn their attention to the Mosul district. We are not here concerned to prejudge the future of Iraq, but it is evident that the question ought to be settled on its own merits, and ought not to enter into any scheme of compromise affecting other parts of the world. The narrower the limits within which the discussions at Lausanne are kept the better. The Arabs do not enter into the picture. Emancipation from the Turks has been secured for them, and has been solemnly guaranteed to them by the Allies; there can be no justification for reopening their fate now and exposing them to Turkish reprisals. If France has grown tired of her Syrian mandate, she must make terms with the Arabs, not with the Turks, for relief from her burden. Great Britain, too, cannot prove false to the Arabs of Iraq merely for the sake of a satisfactory settlement elsewhere. The Lausanne Conference has to take up the Turkish question where the Mudros Armistice left it. In other words, it must remove from the settlement all the Greek excrescences that the Treaty of Sèvres attempted to impose upon it, as well as terms tinged with vindictiveness which may have appeared fitting when Turkey had been brought to her knees, but cannot be enforced on a Turkey victorious over the Allies' military substitute, and treated for two years or more as an equal and independent State by two of the three Allies.

NEJD.

"THE HEART OF ARABIA." By H. St. J. B. Philby, C.I.E., I.C.S. 2 vols., illustrated. (London: Constable and Co. 63s. net.)

Since the entry of Turkey into the Great War in November 1914 the Middle Eastern policy of the British Government has been compounded of an idealism which took little heed of hard facts, and a desire to call the tune without the inconvenience of paying the piper. The conception of a united Arab nation fighting for religious and political freedom from a Turkish Khalif may have been a fine one, though it certainly was not disinterested; it was never one which seemed to those who knew the Arab or his history to be possible of realisation.

The Arab is perhaps the oldest democrat, but his whole organisation is, and always has been, centrifugal in its tendencies. The Prophet, by the force of a great personal inspiration and of arms, bound the nation into one for the period of his life; but the union could not last, and Arabistan is now—as it was in the Days of the Ignorance and as it always will be till the Second Coming—a house divided against itself, wherein even the tribal unit is split into an infinity of sections and sub-sections, each of whose hand may at any time be against his fellow.

How fundamental are the differences and how implacable the animosities which divide Arabia to-day are abundantly clear from Mr. Philby's volumes. He himself was accredited in 1917 and 1918 to 'Abdul'Aziz ibn 'Abdulrahman ibn Faisal ibn Sa'ud, now Sultan of Nejd, the leader and reviver of Wahabiism, the great Puritan movement in Islam which regards Sunni Orthodoxy as heresy and the Shia heresy as idolatry. Mr. Philby alludes to, but does not recount, the culmination (for the time being) of the clash of interests between King Hussain of the Hejaz—the *soi-disant* "King of the Arab Countries"—and the Wahhabi Ikhwan in the defeat in May, 1919, at Turabah of the Sherifian forces under the Emir Abdullah, whose principal adviser in Transjordania Mr. Philby now is. Thus did our friends fly at each others' throats, and it was not until Ibn Saud had delivered a first blow at King Hussain that he turned his attention in 1920, more than a year after the conclusion of the Armistice, to attack Ibn Rashid, Emir of Hail, who had been the friend of the Turk and a menace on our flank in Iraq throughout the War.

Although the conquest of Jebel Shammar came too late to affect the course of the War, Ibn Saud was able to do something to straighten the circumstances of the Turk and his coadjutor, Ajaimi al Saadun, by blockading the trade routes running north-west from the Persian Gulf, and some attempt was made to use the divisions among the Shammar themselves, though Mr. Philby relates how Dhari ibn Tawala of that tribe proved a double traitor, first to his own people, and then to Ibn Saud and the British, from whom he drew a subsidy. Further north good work was done by the Anaiza under the veteran Fahad ibn Hadhdhal, who found in the late Col. Leachman an adviser and friend after his stout heart.

The Middle Eastern policy of the British Government has been attacked on two main counts—that it failed to attain any co-operation commensurate with its cost, and that it has left us defaulters in a crop of commitments which we are unable to meet. Consideration of the former charge is now a matter for the historian, while the latter is a question of practical politics which is likely to call for decision in the immediate future. It is true that a good official defence of that policy can be, and has been, made on the basis of official documents, though even on that basis our occupation of Palestine and our pledges to the Jews are a little difficult to explain: but it is, or should be, impossible to ignore that the Arab leaders based their hopes and fears more on their intercourse with the British officers accredited to them than on the bare framework of the written word. If the impressions left on the minds of those leaders were not always consistent mutually, or with the intentions of the British Government, the reason must be sought in the extreme rapidity with which the wish breeds the thought in the mind of the Arab, and the obstinacy with which he refuses to take No for an answer; of the blame the greater measure must be laid on the uncertain councils and divided control at Whitehall, rather than on the British representatives in Arabia.

Of Mr. Philby's journeys the first, across Arabia from the Persian Gulf to the Red Sea, was mainly political in object, while the second, a tour south from Riyadh through the Aflej Province to the Wadi Dawasir, was more exclusively in the nature of exploration. His two volumes are crammed with information—political, geographical, and social. In Arabia so much turns on the personal element that political prophecy is more than ordinarily dangerous; but, if Ibn Saud lives, there can be no question that he is the great force with which we must now reckon. Mr. Philby is by no means alone in the high opinion which he has evidently formed of his statecraft, as compared with that of other chiefs of Arabia, and, in addition, he is backed by dour, fanatical, and united tribes whose creed is that Islam must be purged by the sword.

The core of the Wahhabi movement is the organisation of "Ikhwan" (brothers), devised by Ibn Saud to be at once his striking force and a common bond to transcend and bridge the jealousies and feuds of tribal politics. To the east of the Wahhabi country lies the Iraq with the holy cities of the Shiahs on its desert flank, still as tempting a prey to the zealous reformer as it was in the first year of the nineteenth century; on the west the Hejaz, where the iniquities of Mecca and Medina stink before God and man, and where a *casus belli* can always be found in the vexed question of the frontier and the Khurma oasis; northward lie Transjordania, with a still undefined desert frontier, and Palestine, with Jerusalem, which is holy to all the "People of the Book"—Christendom, Islam, and Jewry. Northward again the cloud of the Turkish menace grows daily darker. These are forces not easy to control, and between the two most powerful of them—the Turk on the north and the Wahhabi on the south—we have supported, or set up, a chain of three kingdoms under rulers of the Hashimite house, to whom both Turk and Wahhabi are antagonistic, and for whose protection from internal discord and external aggression we have an obliga-

tion in honour. What the northern menace amounts to any man who reads his newspaper may judge; into that from the south Mr. Philby has given us an insight not hitherto available.

That he was able to sojourn and travel in a country where the killing of an infidel is a sure passport to Paradise, speaks much for the rule of Ibn Saud, and more for Mr. Philby's endurance, courage, and resource. He has broken much fresh ground and throws new light on many matters; incidentally he casts much suspicion on the veracity of the Jesuit traveller, Palgrave, and makes a good case to prove that he never visited many of the places he pretends to describe.

Mr. Philby alludes to the anti-slavery undertakings in the Covenant of the League of Nations, and adds that, "it will be interesting to see what the practical effect of this injunction is in view of the fact that, while Great Britain effectually controls the Sudan and its ports, the route by which the slaves come down from Africa to Arabia, the King of the Hejaz has his capital at Mecca, probably the greatest slave mart in the world." Two African slaves were attached to Mr. Philby during a part of his stay at Riyadh. Of these one came from "Abbisha"—probably Abeshr, now the capital of the Circonscription of Wadai in French Equatorial Africa, though he is almost certainly inaccurate in describing himself as a "Nubian." The other was a "Takarini" (or Takruri), an Arab term used for almost any native of West Africa, and said that he had been taken from the Upper Nile from a place called Sindar, which it is impossible to identify. It should be noted that both these slaves were, according to their own account, run not less than fifteen years ago, at a time when the administrations of the Sudan and Nigeria were both in their infancy; it may be claimed with some confidence that the routes through British territory have long been effectually closed to slave traders. This is not the place to consider the difficulties which beset the entire suppression of the traffic; great advances have been made in the past twenty-five years, and since 1916, when Darfur came under administration, the Pilgrim routes from West Africa have been entirely under British and French control. There remain, however, Abyssinia, where slave-raiding and trading are rampant, and the Hejaz, where the Hashimite Government countenances the receiving of slaves and even takes Customs dues on their entry. An additional difficulty is encountered in the habit of the pilgrim who is in need of cash of selling his relatives, his children, or even himself into slavery in Arabia.

PICTURES OF MESOPOTAMIA.

It is not unfair to say that the interest attaching to Miss Edith Cheesman's pictures, "Five Months in Iraq," now and until November 28 on view at Walker's Galleries, New Bond Street, is in the main regional. This is by no means to deny the existence of her artistic impulse, but it would seem, from the selection of her subjects and the inclusion in this exhibition of several photographs (which, by the way, are excellent), that the dominant interest of Miss Cheesman was either personal or local. It is rather the concrete side of Iraq life than the spirit of the place that is discovered to us; in other words, observation in most cases has prevailed over imagination. Things are set down as they appear to the naked eye, and their accurate representation alone is, generally, relied upon to attract. There are, it is true, attempts made primarily to present the atmosphere of parts of Iraq—"The Aqqar Quf Under the Influence of Mirage," for instance, contains feelings less tangible than do the majority of these pictures; so do "Amara by Moonlight," "A Bedouin Shepherd," and, very notably, "Silence," this last, a finely coloured picture of plain and hill, and belonging to a high order.

However, even within the limits which Miss Cheesman has imposed upon herself there is honest and good work done. It may be a curious fact or not, but for the most part we prefer those portraits and types on which it appears she had to work hastily to those over which she worked and reworked. We like very much, for example, "Zarun: A Sabean and Head of the Amara Silver-smiths," in the reproduction of whose face (as opposed, for instance, to those of Saiyid Ja' Far Ataifah, or of H.M. King Faisal of Iraq), are shown profundity and the lines of much experience. Similarly we find character of rare sort in "Fahud Beg Ibn Hadhdhal," and in "Sheikh Qadir," equally well done, but whose character is, we imagine, not so rare! Among the landscapes, also, there are interesting things, though it is perhaps in the interiors of buildings that we find Miss Cheesman happier than anywhere else. "The Copper Bazaar, Baghdad," and "The Slipper Bazaar, Baghdad," are extremely pleasant examples; but we must, too, record particularly our admiration of "Ras Ul Qariyeh, a Typical Baghdad Street," of "Mosque and Mahailas from the Maude Hotel," and of "Hillah: View of the Town."

The biggest and possibly most popular picture in this exhibition, which, as is pointed out in the catalogue, is both timely and instructive, is "The Standard Bearer of the Camel Corps." In this picture there is in the contrast of bright colours rich material for a vivid effect, and Miss Cheesman has not failed to exploit it, for it is precisely in this definite kind of subject, where outlines and colours are clear, that her conscientiousness and faithfulness enable her to excel. No one who has been to Iraq should miss the opportunity of visiting this exhibition.

PALESTINE CAMPAIGN ANNIVERSARY.

The anniversary of the capture of Jerusalem will be celebrated on December 9 by a large number of officers and men who took part in the Palestine campaign. In addition to many unofficial celebrations, a reunion dinner, organised by the 2nd Batt. the Queen's Westminsters, will be held at the Imperial Hotel, Russell Square. The Westminsters took a prominent part in the capture of Jerusalem, taking seven guns and a large number of prisoners. Colonel C. A. Gordon Clark will preside at the dinner.

Lord Plumer recently unveiled at the Grand Masters' Palace at Malta the tablet commemorating the opening of Parliament by the Prince of Wales.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

The Election and After.

The election over, with the result in accordance with expectations, it is not too much to say that the entire business community has experienced a feeling of relief. A Coalition may be satisfactory in times of crises, but in peace time compromise, which is the essence of coalescing, does not conduce to that continuity of policy or the steadfast pursuance of definite aims which is essential for reconstruction. The failings of the Coalition from the economic point of view are too well known for it to be necessary to labour them here. It is sufficient to say that the return of a homogeneous Government pledged to economy and the promotion of a trade revival has already made its influence felt in the commercial world, and signs are not wanting of the resumption of business activities for which we have been so eagerly waiting. Briefly there has been a restoration of confidence which has been sadly lacking as a result of the dismal experiences of traders during the last few years.

The Trade Position.

But while the immediate effect of the election is bound to be pronounced, it would be well not to over-estimate the trade prospects in the near future. A strong Government in this country can do much to revive commerce, but it cannot do everything. Its influence in many respects can be only of an indirect nature. Trade is stagnant here mainly because of the adverse exchanges, which are due solely to the fact that our customers have expended their wealth in unremunerative directions. Until these countries have built up again to a considerable extent the resources dissipated during the war, the exchanges will continue to present an impassable barrier to commerce. This process cannot be effected quickly, but the Government can further it indirectly to no small degree by the pursuance of a policy which aims at the speedy restoration of settled conditions. The first step is the establishment of peace with Turkey, which, there is every reason now for hoping, will soon be a *fait accompli*. The second is the definite settlement of the Reparations question on a reasonable basis. These things done, a great advance will have been made towards reconstruction, and the time of a real trade revival will have been brought considerably nearer.

The Smyrna-Aidin Railway.

The actions of the Turkish Nationalists since their defeat of the Greeks have justifiably given cause for apprehension as to the prospects for foreign enterprises in Turkey. It will, for instance, be remembered that after the occupation of Smyrna they requisitioned the Ottoman Railway line, together with large supplies of stores, and sent the British manager of the line to Constantinople. This action, it need not be pointed out, was quite indefensible, and evidently the Turks have realised this, for news is now forthcoming that the whole of the line was handed back to the manager on November 6. Thus what might have proved a serious obstacle to an understanding between Turkey and the Allies has been removed, and one can only hope that subsequent events will show that this episode is not an isolated incident, but part of a settled policy on the part of the Nationalists to show that they will do nothing to discourage foreign enterprises. As I have emphasised before, Turkey is not in a position to stand alone for many reasons, and actions which tend to prevent external co-operation can only result in delaying the country's reconstruction. In this process the Ottoman Railway, when fully restored, will, needless to say, play an important part, serving as it does one of the richest regions of Asia Minor, and it is profoundly to be hoped that at long last the company will have a real opportunity of putting their line in order and of working it. They have had a trying experience since the Armistice.

Sudan Export Trade.

In the current issue of the *Journal* of the Sudan Chamber of Commerce there is an interesting article from a correspondent advocating the increased encouragement of the export trade of the country. As to the soundness of this contention there can be no doubt, though in saying this I must not be assumed to be in accordance with all the views of the writer. It has to be remembered that in the case of a country as yet on the threshold of its development the export trade is bound to lag considerably behind the import trade, though much can, of course, be accomplished by judicious measures. The chief point of the writer is that there should be a reduction in the railway freight charges on Sudan produce, and *prima facie* there would seem sound grounds for this step, since if it entailed a slight loss in one direction this should be more than counterbalanced by the increased impetus it would give to agricultural development. But the question is one that is being continually considered by the railways; it would obviously be unwise to encourage branches of agriculture in the Sudan which could only be maintained by artificial expedients. It is for the Sudan to concentrate in those branches of agriculture in which it can hold its own in the world's markets.

Commerce and Industry.

(Reports from Our Own Correspondents).

BULGARIA.

Sofia, November 9.

The Lev.

The lev is slowly continuing its upward rise, and the latest quotation on London is 625 to the £. This rise is accounted for in two ways, firstly the large exports of grain and tobacco, and, secondly, the strict control that the Inter-Allied Commission has maintained over the circulation of notes.

The new banknotes ordered in America last spring have now begun to arrive, and will very shortly be put into circulation. Fears have been expressed that the issue of these notes may cause a fall in the value of the lev. The Inter-Allied Commission are, however, determined to exercise a thorough supervision over the issue of these notes, and it thus need not be anticipated that the lev will fall in value on account of their issue.

GREECE.

Athens, November 11.

Telegraphic Restrictions.

By order of the Ministry of Posts and Telegraphs, communication in code between private companies and individuals is forbidden. In future, only banks will be allowed to despatch telegraphic messages in code, and even then these are restricted to the use of the A.B.C., Bentley's, or Scott's, and are obliged to hand in with the telegram, on demand, a translation of the message. Telegrams despatched by private individuals and companies must bear the signature of the sender in full, and the message should be written in plain language, in Greek, French, English, or Italian. Telegrams for Roumania, however, may be despatched in Roumanian, those for Serbia in Serbian, and those for Bulgaria in Bulgarian.

Miscellaneous.

An agreement was signed last week between the Government and the National Bank of Greece for a loan of ten million drachmæ. The proceeds resulting from the sale of the Thracian wheat will be utilised to liquidate this loan.

A Decree has been published in the *Gazette* prohibiting forward purchases or sales of foreign exchange by the banks and on the Stock Exchange.

ROUMANIA.

Bucharest, November 11.

Stamping of Roumanian State Securities.

The Roumanian official delegation which was sent to Switzerland and Belgium for the purpose of stamping Roumanian State securities (rentes) held by Swiss and Belgian citizens respectively have admitted for stamping the following amounts :—In Switzerland out of securities presented for stamping to the value of 32 million lei, 8 millions owned by Swiss and 12 millions owned by holders of other nationalities, the remaining 12 millions being rejected as forming part of stocks bought from the Germans after August 15, the date of Roumania's entry into the war; in Belgium, out of 250 million lei presented for stamping, only 73 millions, the remainder being rejected for the reason mentioned above.

Sir Basil Zaharoff.

It is said that the Roumanian Government handed to Sir Basil Zaharoff, during his stay here, a memorandum relating to the urgent requirements of the Roumanian railways. Sir Basil will study it in conjunction with British financiers and manufacturers in order to determine the conditions on which these requirements can be supplied.

Hoarding of Notes.

In view of the fact that the peasantry still continues to hoard bank-notes, thus withholding them from circulation—a factor which is largely responsible for the present money stringency—the National Bank has informed the peasants through the "Bancile Populare" that in future it will no longer receive banknotes which have deteriorated through neglect by being kept either in damp places or in places exposed to fire, and at the same time advises them to deposit their notes with the "Bancile Populare."

Hotel Tariff.

The Superior Housing Committee held a meeting this week for the purpose of considering the demand made by hotel-keepers for an increase in the hotel tariff. The Committee was at first averse to any concessions, arguing that the present rent law does not allow any increase of tariff beyond that fixed on April 1, 1921. In the end it was decided that hotel-keepers should be invited to submit a memorandum on the following terms :—Passengers from high-currency countries to pay a super tax of 200 to 250 lei, of which 40 per cent. would go to the Commune, 40 per cent. to the State officials' housebuilding fund, and 20 per cent. to the hotel-keepers.

Rolling Stock from Germany.

A Roumanian delegation composed of four engineers proceeded this week to Berlin to take delivery of railway rolling stock to the value of 25 million gold marks, representing this year's allotment of the war indemnity due to Roumania.

It is anticipated that this year's harvest in Yugoslavia will provide 110,000 truck loads for export.

For the first eight months of this year Roumania's exports amounted in value to 4,277,000,000 lei.

The Roumanian Ministry of Finance warns British investors of the existence in Belgian hands of a number of Roumanian bonds which were issued to Germany before the war, and are therefore not recognised by Roumania under the Peace Treaties.

BULGARIA TO-DAY.

Agricultural and Industrial Outlook.

Bulgaria's industrial and commercial situation was dealt with in detail in the course of a lecture given by M. S. Petroff Tchomakoff, of the Bulgarian Legation, at the City of London College on November 13.

The conditions of the Treaty of Peace, the lecturer pointed out, had been fulfilled as regards the evacuation of territories which had to be ceded, the destruction of arms, the periodical delivery of coal, and the handing over of live stock. The financial reparations due to the Allies were fixed at about £90,000,000, and about £40,000,000 would further be due under the various clauses of the Treaty—making a total of £130,000,000, whereas the whole national wealth of Bulgaria, fixed and movable, was estimated at £400,000,000. The Budget estimates for 1921-22 showed a deficit of over £11,000,000 in April, and the Finance Minister had stated that he considered taxation had reached its highest limit. As the first Reparations instalment represented rather more than half of the estimated revenue for the past year, it was not surprising that some delay had to be sought. The ability of the country to pay depended on a revival of trade, the re-establishment of credit, and on the settlement of certain outstanding political questions.

Bulgaria was an agricultural country, and derived from the soil her principal if not her only resources. On good or bad crops depended the fortune of the year, not only for the rural population, but for everybody. Whatever might be the importance of the agricultural exports, Bulgaria could not be called a rich country. Industries were only beginning; agriculture itself was carried on on the expansive system, whereas it was the intensive system which was generally a characteristic of rich agricultural countries and advanced cultivation. Large estates were non-existent in Bulgaria. The cultivated land, which represented 30 per cent. of the whole area, was parcelled out in about seven million holdings belonging to 600,000 proprietors. Three-quarters of the productive land was devoted to cereals, and only one-quarter to seven other principal categories—forage, vines, tobacco, beetroot, roses, vegetables, and oleaginous plants.

Use of Agricultural Machinery.

The primitive form of plough was still in use. For some time past, however, modern agricultural implements, which greatly facilitated field labour, had been introduced, and were favourably looked upon by the peasants. In 1892 251 tons of agricultural implements were imported; in 1912 5,210 tons were imported. The Bulgarian Government encouraged the wider use of motocultural apparatus, and many motor tractor shows had been held under their auspices, but, unfortunately, owing to the adverse rate of exchange, only a few tractors were now in use in Bulgaria. The Ministry of Agriculture actively encouraged the introduction of perfected machines. Its efforts in this direction were seconded by the Agricultural Bank and the co-operative societies. The Bulgarian farmer had not yet quite learnt the use of artificial manures, though a great deal of these were imported.

Tobacco cultivation was chiefly carried on in the south. The area of the plantations was estimated at 30,000 hectares, which yielded in 1921 20,300,000 kilogrammes of tobacco. In point of view of quality Bulgarian tobacco might be compared with the Turkish tobacco. Rose cultivation was an industry which was special to Bulgaria. The roses were exclusively used for the distilling of the famous Bulgarian attar of roses, which was used in the composition of nearly all scents. The quantity and quality of the attar depended very much on the weather at the time of bloom and gathering. The total annual output was about 2,000 kilogrammes. The rearing of livestock constituted an important branch of the rural economy of the country.

Vast Timber Resources.

The forests of Bulgaria had been preserved and increased to a great extent. They covered nearly 35,000,000 hectares—27 per cent. of the total area of Bulgaria—and contained a great variety of trees. There were some very rich forests, especially in the Rila district and the Rhodope Mountains. Bulgaria exported all kinds of wood, soft and hard, both as raw material and manufactured, and among its customers Turkey and Greece figured for 85 per cent. There was, strictly speaking, no manufacture of wooden articles in Bulgaria. The forests, like agriculture, still awaited systematic exploitation, and represented an exceedingly rich and undeveloped source of wealth.

The mines of Bulgaria, which seemed to have played an important part in ancient times, were until lately completely abandoned. In 1879 the State and private enterprise started working the mines, and from 1892 to 1907 1,138 permits for prospecting were granted and 60 concessions were given—forty for coal, seven for copper, and the rest for iron, magnesite, lead, zinc, and bituminous schist. There were several copper beds, of which at present only one was properly worked in the Eleseina district. Zinc and lead were also to be found, but on a small scale. Bulgaria possessed some coalfields. The coal was young, and, therefore, could not be said to be first-class. At present the largest mines working were those of Pernik and the "Prince Boris." The output was quite insufficient. The import of foreign coal was steadily decreasing, especially since the war, owing to the reduced needs of industry. The mountainous districts of the country contained a great number of quarries for clay, stone, marble, etc.

Bulgaria possessed a great number of hot and mineral springs. They were chiefly radio-active, acid, sulphurous, arsenical, alkaline, etc. There were numbers of hot mineral springs which possessed great medicinal value, which would undoubtedly attract numbers of foreign visitors.

Agriculture v. Industries.

A question of great importance for the future of Bulgaria was whether she would remain a purely agricultural country or turn to industries. Many Bulgarian economists were of the opinion that the country did not possess the necessary conditions for the development of industries, and that she would remain chiefly an agricultural country. But even they must recognise that the force of universal progress would compel Bulgaria to develop her industries, as she modernised her methods of farming just as other countries had done.

The oldest Bulgarian manufacture was weaving, which from ancient times had been widely spread throughout the country as a home industry. The wool was worked up in cloths, carpets, braids, and serges, which were in request in the Ottoman Empire. Under Turkish rule Bulgarian industry supplied cloth to the Army, and there was a constant demand for it in Greece, Asia Minor, Bosnia, etc. Owing to this success, it was decided to start modern workshops. The example was given by the towns of Gabrovo and Sliven, where there were now large factories organised on the most modern principles—fifteen at Gabrovo and nineteen at Sliven. There were as many as 59 factories in other towns. The capital was almost exclusively Bulgarian, and should foreign capital be invested in the industry, it might have a far greater development, and it was hoped that foreign capitalists would interest themselves in it.

As regards flour mills, the largest milling concern—La Société des Grands Moulins de Bulgarie—together with several other modern companies, represented a very important branch of the country's industry. Bulgarian flour was exported in large quantities to Greece and Turkey, and in the good harvest years even to Belgium.

In 1921 there were 964 industrial establishments as follows:—33 mining, 61 metallurgical, 88 ceramics, 95 chemicals, 454 foodstuffs and breweries, 95 textile, 47 leather, 52 wood. The foreign capital invested in Bulgarian industry between 1912 and 1921 amounted to 57 million francs. The metallurgical, chemical, textile, and leather industries chiefly used imported raw materials, while the foodstuffs industry utilised native materials.

Hydraulic Power.

A factor which might contribute greatly to the future development of Bulgarian industry was the hydraulic power, which was very abundant in the mountainous districts. The present Government were strongly interested in its utilisation, and were contemplating the construction of huge dams and reservoirs, with hydro-electric central stations and canals. Many electric plants already existed in Bulgaria, and were operated mostly by hydraulic power.

Bulgaria's exports for 1921 amounted in value to 2,213,827,269 levas, while the imports stood at 2,921,092,269 levas, from which it was evident that the balance of trade was an adverse one. The imports in 1921 were as follows in tons (the figures in parentheses representing the corresponding totals for 1915):—Metals, 33,075 (42,800); mineral oils, 32,100 (28,300); wooden articles, 12,600 (78,100); paper goods, 11,200 (6,720); textiles, 11,700 (14,200); machinery, 9,100 (15,300); glassware, 88,878 (34,100); colonial goods, 5,630 (17,500).

The exports consisted chiefly of cereals, eggs, flour, tobacco, attar of roses, hides, and cocoons. The principal imports were colonial goods, cotton goods, iron, metals, chemicals (especially sulphate of copper), machinery, and so on. Before the war Austro-Hungary and Germany supplied 90 per cent. of the imports, Great Britain coming third, both as regards imports and exports. The Bulgarian market was flooded with German goods, owing to the fact that Germans not only offered most favourable terms as regards prices, but employed to a vast extent business on short credit terms, and also it deserved to be pointed out that that German manufacturers took every care to meet the tastes and customs of the Eastern markets. Now that Germany was out of it, there was a brilliant opportunity for British commerce to secure the first place in exchange for the third now occupied. Bulgaria represented in every respect very sound ground for future commercial development. The Bulgarian merchant, it was well known, possessed the qualities of a straightforward business man.

Digitized by Google

The economic life of Bulgaria had been seriously compromised by the war and the last peace treaties. As regards agriculture, one of the effects of the war had been an important reduction of the cultivated areas in general. Bulgarian industry had suffered still more. The war had left Bulgaria with the most insufficient industrial resources. At the end of the war the Bulgarians discovered that their machinery was more or less out of order; that was not the greatest misfortune—the present deplorable state of Bulgaria was due to the financial crises and the lack of equilibrium of the Bulgarian exchange. Ever since the Armistice the Bulgarian currency had continued to depreciate. This was due principally to the conditions imposed by the Treaty of Neuilly. Information to the effect that Bulgaria would not be granted a moratorium in respect of reparations led to a fresh fall in the exchange, and the position was still very obscure.

Trade Routes.

Before the war Bulgarian trade flowed along three natural channels—the railways, the Danube, and the sea. That division no longer existed; certain of those channels had been more or less closed. Since the war the Danube had been practically shut to Bulgarian trade. The greater part of the agricultural products of the Danubian region of Bulgaria could not be exported owing to the lack of ships and to restricted commercial navigation on that river which used to link Bulgaria with Central Europe and the Black Sea. The reduced efficiency of the means of communication prevented them from foretelling what would be the future markets for Bulgarian trade.

It was evident that customers would always be found for agricultural products and cattle, but, to enable Bulgaria to recover her markets and assure her economic development after the loss of her richest and most fertile provinces, it was essential to create favourable conditions for the free expansion of her trade. It was necessary that Bulgaria should obtain free routes to Western ports and to the Mediterranean lands that were her nearest and most natural markets—the way to those countries was through the Ægean Sea. That was why Bulgaria requested that an outlet should be granted to her on those shores. It was unnecessary to labour the advantages to Bulgaria of free access to the Ægean, which, among other considerations, would bring the tobacco-growing districts within easy reach of the sea. It was enough to point out that whereas now she was forced by circumstances to trade mainly with Central Europe, the possession of an Ægean port would shorten her sea communications with the Entente Powers by about a thousand miles and increase her facilities for trade with Great Britain.

As regarded the economic outlet provided for in Art. 48 of the Treaty of Neuilly, it was obvious that the offer of facilities at a port the only access to which lay through a rival country was ineffective. Dedeagatch was at best an indifferent shallow water roadstead, and large sums would in any case have to be spent in improvements. It was as unlikely that Bulgaria would spend money on a harbour, access to which could at any time be prevented, as it was that Greece or Turkey would spend money to provide a suitable outlet for an economic competitor.

Another important outstanding problem concerned the problem of Reparations. In view of the present serious disorganisation of her financial and economic situation, Bulgaria was applying for a three years' moratorium and for a reduction of the debt. Such a measure would help the Bulgarian people in their desire to re-establish the credit and prosperity of the country.

World textile traders are finding it advantageous to have resident representatives in Roumania.

The oil output of the British Burmah Petroleum Company for October amounted to 65,023 barrels.

The estimated hop harvest in Czecho-Slovakia for the year 1922 amounts to 323,000 lb., which is roughly double that of 1921.

The Egyptian Markets, Ltd., announce an interim dividend of 5 per cent. (less income tax at 5s. 3d. in the £) in respect of the year ending December 31 on the ordinary shares, payable on or after November 22 at the Anglo-Egyptian Bank, 37-39, King William Street, London, E.C.4.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Paving Stones.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 130,000 paving stones and 8,000 head stones (boutisses) required for the maintenance of the Port of Alexandria. December 15.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer, Egypt and the Sudan Governments' Office, London. January 2.

Wood Naphtha and Tierol.—The Egyptian Customs Administration invites tenders for the supply of 130,000 kilogs. of wood naphtha (wood spirit) and 5,000 kilogs. of tierol, for denaturing ethyl alcohol. January 6 (D.O.T.).

Electric Cranes and Lifts.—The Administration of Ports and Lighthouses, Alexandria, invites tenders for the following fixed and movable lifting apparatus for service at the Port of Alexandria:—

Eight travelling electric portico quay cranes, six of which are to be of 2,500 kilogs., the other two being double-power cranes of 2,500-5,000 kilogs.

Eight travelling balcony cranes of 500 kilogs.

Eight electric lifts; maximum carrying power, 1,500 kilogs.; speed per second, 0.50 metre.

Supply and laying 320 metres of rails for the running of the quay cranes.

Supply and laying of 280 metres of rails for the running of the balcony cranes.

Sealed tenders are to be addressed to the Directeur-Général, Administration des Ports et Phares, Alexandria, Egypt. December 20. (D.O.T.)

Photocopic Papers.—The Superintendent of Stores, Egyptian State Railways, Telegraphs and Telephones, Saptieh, Cairo, invites tenders for the supply of photocopic papers during 1923. December 28.

India.

Paper, etc.—The High Commissioner for India invites tenders for the supply of paper, Lancashire ledger or similar; sheets, mild steel, plain; plates, mild steel, plain. Form of tender may be obtained from the Director-General, India Store Department, Branch No. 10, Belvedere Road, Lambeth, S.E.1. December 1.

Iraq.

Limber Wagons.—The Ministry of Defence, Government of Iraq, Baghdad, invites tenders for the supply and delivery of:—(a) (Section No. 21a)—24 fore and 24 hind general service limber wagons, complete with accessories and fitted with the No. 45 wheel. (b) (Section No. 5a)—24 double lead sets of harness and 24 double wheel sets of harness, each complete with whip and legging. November 30 (D.O.T.).

Stirrup Irons.—The Ministry of Defence, Baghdad, invites tenders (covering delivery c.i.f. Basrah) for the supply of—980 extra large stirrup irons (5-in. tread), and 420 large stirrup irons (4¾-in. tread), of British Army regulation pattern, standard, and quality. November 30.

Malta.

Malta Mail Service.—The Government of Malta invites tenders for the conveyance of mails between Malta and Syracuse. Tenders must be sent sealed to the Director of Contracts, Malta. December 21.

Yugoslavia.

Medical Stores.—The Ministry of War and Marine (Sanitary Store), Zemun, invites tenders for the supply of various medical stores (drugs, graduated measures, medicine bottles, pill machines, forceps, dental rubber, surgical and veterinary instruments, etc.). December 9 (D.O.T.).

Rock Salt and Sea Salt.—The Direction of State Monopolies, Belgrade, invites tenders for the supply of 30,000 tons of rock salt and 32,000 tons of sea salt. November 29 (for rock salt) and November 30 (for sea salt).

OAKEY'S WELLINGTON KNIFE POLISH

SILVERSMITH'S SOAP, for Cleaning and Polishing Silver, Electro Plate, etc. Tablets, 6d.

"WELLINGTON BLACK LEAD" in Solid Blocks, 1d., 2d. and 4d. 1s. Boxes.

The Original Preparation for polishing Cutlery. Canisters, 1d., 2d., 3d., 6d., 1s., 2s. 6d. and 4s. each.

Polishing Paste, Furniture Polish, Plate Powder.

Glass Paper, Emery Cloth, Black Lead Packers,

WELLINGTON MILLS, WESTMINSTER BRIDGE ROAD, LONDON, S.E.1.

Cotton and Cotton Goods.

MANCHESTER COTTON TRADE.

Business and the General Election.

(From Our Own Correspondent.)

Manchester, Saturday.

It is not possible to record any change in the conditions prevailing in the market, and business has continued at a very low ebb. Buyers at the moment are not prepared to operate on a freer scale, and most traders are looking forward to lower prices. The inactivity during the past week has been caused to some extent by the interest taken in the General Election. Both spinners and manufacturers have lost ground, and there has been talk of more looms being stopped. The immediate outlook is causing traders some anxiety. With regard to the prospective raw cotton supplies, the Government estimate of the Egyptian crop of 4,002,000 kantars caused some surprise in view of the fact that ten days ago the Alexandria Produce Association issued a forecast of 4,800,000 kantars. In the cloth section the best of the outlets has certainly been Egypt, and in one way and another some very fair contracts have been put through in bleached shirtings. The tendency is for bids from that outlet to improve, and many traders are anticipating a larger business within a very short time. The cloth demand for India has been easily satisfied. Most of the offers have been unworkable. The same remark can be applied to China. With regard to the yarn section, quotations for Egyptian spinnings have been firm, and rather a better demand has been registered. American counts have been irregular in quotation in sympathy with the fluctuations in raw cotton rates. Users have only purchased from hand to mouth.

LIVERPOOL REPORT.

Trade Improving Generally.

Messrs. Reynolds and Gibson report as follows for the week ended November 15:—

The enquiry in the Egyptian spot department has broadened out still further during the past week, and once again we are able to report a substantial increase in the volume of business transacted. In this connection, we might as well warn our readers now that the daily estimate of sales effected are often misleading owing to the amount of speculation, and consequent re-selling, which invariably accompanies a swiftly rising market such as we have witnessed recently. Even allowing for this, however, there is no doubt that the improvement in trade buying has been well maintained, and prices have hardened considerably all round, particularly in the Upper section. A feature worthy of comment appeared to-day, when extra fine Sakellaridis was exceptionally raised 25 points, whilst the other grades of the same growth remain unchanged. This fact directly confirms our statement in our last two circulars, to the effect that there had been more doing recently in the finer qualities, and comes as a most welcome sign of the times. The principal feature of the week has been the eager demand for Uppers, which came from all quarters. Some good trade buying resulted, and a scramble occurred amongst the smaller speculators, all of whom were bent on "picking up something cheap" in a manner very reminiscent of the boom year. A good deal of "chasing the market" occurred, many would-be purchasers being quite unable to keep pace with the rapidly hardening basis. A series of strong futures markets, both here and in Alexandria, kept prices well up, and a "bullish" crop estimate (final) of 4,002,000 kantars, by the Egyptian Government, strengthened the sellers' position still further. On one day all offers from Alexandria of Upper Egyptian cotton were cancelled. With regard to the crop estimate mentioned above, we learn from an authoritative private source that this figure is likely to prove an under-estimation, and that the actual figure will approximate more nearly to one of 5,000,000 kantars, including the carry-over up-country. However, even if we accept the latter figure, in face of a short American crop, the statistical position is undoubtedly a strong one. Very few Lancashire spinners have purchased their requirements beyond the end of this year, and the bulk of them (we speak of the Egyptian section), appear to be actually working still on hand-to-mouth lines. The majority still regard the present rise with suspicion, and keep on hoping against hope that the markets will collapse as speedily as they shot up. We can offer but small comfort to such as these. The season is young as yet, and as we know from experience much may happen to cotton in a short time, but, taking an all-round view and bearing in mind the points we have touched on above, we can only conclude that for Egyptian cotton still higher prices are probable.

Comparatively little has been done in Sakellaridis, but business has run on the usual lines, i.e., good fair to fully good fair 18½d.-19½d., with a spasmodic enquiry for the best. Attention has been distracted for the time being from low cottons—another sign of the times. A good business has been done in Sudan Sakellaridis, and a small enquiry for white and brown cottons has been in evidence, but little business has resulted. C.i.f. business has been rather patchy, but some good lines have been put through, particularly at the beginning of the week, when prices were more attractive. Manchester reports are all on the one note, i.e., inability of buyer and seller to come to terms owing to the rapid advance. Nevertheless, a certain amount of business appears to be transacted—probably a good deal more than is generally suspected. Total sales, 7,800 (includes 2,250 Sudan). Quotations of brown and Sakellaridis are all raised 100 points. Extra fine Sakellaridis exceptionally 125 points. All Uppers are raised 125 points. Fully good fair Sakellaridis 19.25d.

THE YUGOSLAV BUDGET.

The Government decided to introduce the Budget for 1922-1923 in the National Assembly on November 20 (says Reuter's Belgrade correspondent in a message dated November 19). The total revenue is estimated at 9,000,000,000 dinars, showing a surplus of 800,000 dinars over expenditure. The estimated revenue includes an increase of 343,000,000 dinars from food taxes, 415,000,000 from monopolies, and 650,000,000 dinars from fresh taxation. The estimated expenditure shows an increase, as compared with the last Budget, of 500,000,000 dinars for administrative purposes, 310,000,000 dinars for communications, 220,000,000 dinars for public works, 100,000,000 dinars for mines and forests, and 380,000,000 dinars for the Army and Navy. The new Budget shows an excess of about 2,000,000,000 dinars over the last one.

YUGOSLAVIA'S RAILWAYS AND TRADE.

The operation of Yugoslavia's State Railways for 1921-22 produced a surplus of 230,000,000 dinars, as compared with deficits of 75,000,000 dinars for 1920-21 and 98,000,000 dinars for 1919-20. Deliveries of railway and telegraph material have recently been made by Germany on account of reparations. Trade returns show exports in 1921 of 2,460,000,000 dinars, as against 1,320,606,000 dinars in 1920, while the exports for the first seven months of 1922 amounted to 1,919,040,000 dinars. During 1921 the imports amounted to 4,122,097,000 dinars, against 2,487,697,000 dinars. The imports for the first seven months of 1922 amounted to 2,507,939,000 dinars.

The administrator of Bulgarian property under the Treaty of Peace (Bulgaria) Orders, 1920-1922, has given notice of his intention to declare a first dividend of 10s. in the pound in the administration.

Holders of scrip certificates of the City of Greater Prague 7½ per cent. mortgage loan of 1922 are informed that fully paid scrip may now be exchanged for definitive bonds at the National Provincial and Union Bank of England, 15, Bishopsgate, E.C.2.

The directors of the South Behar Railway Co., Ltd., announce that the transfer books of the debenture stock will be closed from Dec. 13 to 20 (both days inclusive), and the capital stock from January 1 to 8 (both days inclusive), for the preparation of interest and dividend warrants due to stockholders who are registered on the company's books on December 12 and 30 respectively. The warrants for the debenture stock interest will be posted on December 30, and for the dividend on the capital stock on January 13.

Engineering Topics.

(By Our Engineering Representative.)

Running of Diesel Engines.

Everyone who has had practical experience with the running of Diesel engines will agree with the general conclusions arrived at by Mr. G. E. Windeler, who recently read a paper on the care and maintenance of engines of this type before the Diesel Engine Users' Association. He emphasised the importance of frank and sympathetic co-operation between the supervisory and running staffs, and pointed out that were this not practised and any lack of harmony were allowed to become manifest, a good deal of valuable data and some most interesting observations might be lost. Were co-operation the practice, troubles and defects would be reported and examined into and their peculiarities or characteristics scrutinised, so that reasons for them could be found. If, on the other hand, there were warring interests, nothing would be reported, nothing examined, and nothing found out.

He emphasised the importance of the adoption of some simple routine for ensuring that parts which might require inspection, renewal, changing, or overhauling should be seen to in regular sequence. I think Mr. Windeler will find that on the more important vessels where Diesels and semi-Diesels are used, and in quite a number of land installations, this is done. The engine has been rather well designed from an inspection point of view, and it is an easy matter to attend to any parts and to fit new components as and when required, and as this renewal work can be done so readily it would appear that there is no practical limit to the life of a Diesel which is well-designed in the first place. To my certain knowledge, Diesel engines which were designed, built, and put into service in 1900 are still running well.

Some Features of Design.

With regard to cooling water spaces, a long series of investigations has indicated that deposits are not necessarily formed on the surfaces whilst the engine is running, but more generally after it has been shut down, and the practice of allowing the cooling water to continue to flow through the engine for about a quarter of an hour after shutting down has been recommended. This can easily be done if a small overhead auxiliary water tank is provided, and the advantages of this are that the jacket temperatures are kept so low that precipitation cannot form, and any particles of solid matter are washed away before they have a chance to adhere properly. A further advantage is that the engine parts are allowed in this way to cool down gradually.

Within recent years such advances have been made in design that crankshaft troubles, which, in the early days, frequently became manifest, have now been practically eliminated. If for any reason a new crankshaft or new bearings have to be fitted, care has to be taken that sufficient clearance is allowed at each line of the cylinders on the crank web nearest the flywheel. The skew gearwheel is generally fitted between two bearings, so as to prevent longitudinal movement of the shaft, and, by reason of this, the shaft is prevented from expanding at that point. Due allowance for the shaft wholly expanding at the other, therefore, has to be made. This is a point which might not strike the average engineer, and is one which might well be noted for future reference and guidance.

Valves and Valve Care.

The gland packed type of fuel valve is now almost universally adopted, and very little trouble is ever experienced with valves of this type which have been properly designed and constructed in the first place. In connection with valves of this and, indeed, of any other type, one of the most important points is to keep them in proper condition. The union between valve and seating should be as perfect as possible, and, contrary to the practice commonly in vogue amongst a rough-and-ready school of engineers, it is bad practice to grind in any valve with a hard abrasive, as emery powder or carborundum. A soft abrasive should be used such as is contained in many of the patent valve-grinding pastes sold, and in this respect a little supervision over what is being done will usually be well repaid.

Recent investigations have shown that under ordinary working conditions a piston can remain in a Diesel cylinder in good condition for a remarkably long time before cleaning, provided care is taken over the ordinary conditions of running. At the same time there is no good purpose that could possibly be served by allowing pistons to remain in service too long without examination, and it should be a rule that every piston should be withdrawn and examined at least once a year. The opportunity should then be taken to remove and to examine carefully the connecting-rod bolts over their entire length. It is a great advantage to have these bolts marked in such a manner as will enable any twisting or stretching to be seen as soon as they are withdrawn, as otherwise some little trouble may be brewing that will not be detected until it assumes more serious aspects.

A Piston-Rodless Engine.

A new type of oil engine has recently been designed which is entirely without piston rods, thus being unique in the oil-engine world. The engine is of the double-acting type, and essentially the arrangement is that a gudgeon pin passes through the centre of the piston, which is much thicker than in the ordinary type of engine. This gudgeon pin is unusually long, and passes through slots cut along the centre of the cylinder, and it reciprocates along these as the engine works. Side rods, which are carried down to a cross head, are attached to either end of this projecting gudgeon pin, and a connecting rod links up from these to the crankshaft in the usual way. It may be pointed out here that although in the ordinary type of engine the slots mentioned, cut in the side of the cylinder, never communicate with the interior, but are always masked at every portion of the stroke by the piston, in larger engines this is more advantageous than it would be in engines of much smaller size, and in connection with these latter the scavenging pumps are attached to an extension of the gudgeon pin on the outer side of the side rods. In this arrangement it becomes necessary to use spring packings on the side rods to keep them gas-tight.

Of course, the scavenging pumps form a separate unit in engines of this design in larger horsepowers, but, taking it broadly, it can be said that with this new type of engine—which may be described as a double-acting two-stroke—the only opening into the combustion chamber is that which is provided for oil injection. There is no possibility, therefore, of loss of compression or leakage of any kind. As there are no piston rods, it equally follows that there are no piston-rod glands required, and a further point is that as there is no piston-rod the area exposed to gas pressure on the explosion stroke is the same on either side of the piston, thus giving a practically perfect balance.

Stock and Share Markets.

BUSINESS RESTRICTED: TONE FIRM.

(From Our Own Correspondent.)

London, Tuesday Morning.

Now that the General Election is over satisfactorily, it is possible to look forward to much brighter times on the Stock Exchange. The markets have already improved somewhat, as a foretaste of what we may expect. Following the Borough results on Wednesday night, which were regarded as somewhat discouraging, the markets opened on Thursday in a rather depressed mood; but this quickly changed when the County results began to come in, and it became obvious that a Conservative Government was to hold office. What this country wants now, above all things, are peace, the reduction of taxation, and the minimum of interference with business activities. With Mr. Bonar Law in power, these essentials are no longer in the region of aspirations, and consequently the business world in general and the Stock Exchange in particular is more than a little optimistic. We may still be some way removed from a real trade revival, but we have at any rate cause for confidence that we are moving towards it.

One point deserves emphasis at this juncture, and that is the position of gilt-edged securities. They one and all stand at reasonably high levels; some people think, indeed, that the advance has gone too far, and among them I number myself. However that may be, it is certain that with the development of business enterprise that is to be expected in the near future, these securities will rather tend to move in the downward direction to some extent. The reason is, of course, that as more capital is needed for commercial activities, gilt-edged securities will have to be sold. Concurrently with this decline, Industrials, to name only one among the markets, should go well ahead, and the securities included in this group afford some of the soundest opportunities for investment at the present time. The turn of Oils is coming, too, and it may not be very long delayed. This market has been in the doldrums for a long time, but activity when it comes is likely to be sharp and pronounced. I have already indicated what I consider to be the best purchase in this group.

Rubbers, too, are not far distant now from coming into their own. The shareholders in this group have been as long-suffering as any in the market, and much more tenacious than those in any other group, for they have held on to their shares when the position seemed hopeless. For that reason I am confident that the rise which is inevitably coming will take the shares back to the levels at which they stood before the "slump." There are any number of good bargains to be picked up in this market, and on a subsequent occasion I hope to indicate some of the most promising shares.

Gilt-Edged Quiet.

The gilt-edged market has naturally benefited from the prevailing conditions, and prices make a good showing compared to those of last week. Yesterday, however, the tone was not particularly bright, as the result chiefly of anxiety with regard to the outlook for the Lausanne Conference, and there was no sign of the great expansion of business that we are expecting.

Consols at 57¼ are ¼ up, while War Loan Fives at 99 5-16 have gained 5-16. The Conversion Loan has again risen sharply, and at 76¼ is ¾ up, while Fundings are ¼ up at 87¼. Indian stocks are slightly harder. The 7 per cent. stock is ½ up at 111, the 3½ per cent. stock has gained ¼ at 64¾, while the 3 per cent. stock is ½ up at 55¼.

On the whole, the tone in the Foreign group has been rather better. As usual, movements have been governed by the exchanges. French stocks have quickly responded to the better political outlook, and both War Loan Fives and the 4 per cents. are harder at 30¼ xd. and 24¼, respectively. German 3 per cents. are unchanged at 11-16. Italian Rentes have rallied, and at 21½ are 2½ up on the week. Near Eastern securities have firmed up. Turkish Unified at 26½ are 2 up, but Greek Monopolies are unchanged at 21½. Czecho-Slovak 8 per cents. have been a firm spot, and at 92½ show a gain of 2 on the week. Russians have been rather variable. The 4 per cents. are ½ up at 7½, the 4½ per cents. are ½ down at 7½, but the 5 per cents. have gained ½ at 9½. In South American securities the outstanding feature has been the advance in Brazilians. Argentines have also hardened. Far Eastern securities are about the same.

Industrials Quiet but Firm.

The result of the election notwithstanding, this market continues to mark time. There have been indications of a revival of business, but the signs have been very faint so far, and it is evident that buyers are still proposing to hold aloof pending positive developments. It would not be surprising if there was not any great movement until the New Year.

Textiles have shown a hardening tendency. Coats at 66s. 9d. are 1s. 6d. up, while Courtaulds at 57s. 3d. are 1s. 3d. up. Listers have gained 1s. at 28s. 6d. Tobaccos have firmed up. Bats at 88s. 3d. have gained 2s., while Imperial Tobaccos are 1s. up at 70s. In Iron and Steel securities Vickers have gained 3d. at 13s. 9d., Armstrongs are 9d. lower at 18s., while Guest Keens at 35s. 9d. have gained 9d. In the Indian Railway group Bengal and North Western are ½ down at 133½, Bengal Nagpur are 94½, Bombay Baroda are ½ down at 94, Burma are 101½, at which they are ½ down, and Madras and Southern Mahrattas have shed ¼ at 105¼. In Shipping securities P. and O. Deferred have gained 2 at 307, Cunards are 6d. up at 20s. 6d., Furness Withys are unchanged at 31s. 3d., while Khedivial Mails are the same at 3¼.

Oils Irregular.

A rather irregular tendency has been in evidence in this group during the past week, but there has not been any pronounced change in quotations.

Anglo-Persians have been fairly firm, and at 5⅝ have gained 1-16, while Burmahs at 5 5-16 are ¼ up. Mexican Eagles have failed to respond to any great extent to the improvement in the French exchange, and at 2⅝ are only ⅛ up, while Shell Transport at 4 7-32 have gained 5-32. In the Trinidad group Apex at 2⅜ have gained 5-16, Centrals are unchanged at 1 9-16, while Leaseholds are ⅛ up at 1¼.

Russians have been steady. Spies are 3d. up at 5s. 6d., Anglo-Maikop have gained 3d. at 3s., North Caucasians are unchanged at 11-16, Ural Caspians remain at ⅝, while Uroz are 10½d. up at 8s. 4½d.

Among Egyptians Anglo-Egyptian B at 1 13-32 have gained 1-32, while Oilfields of Egypt remain at 1s. In the Roumanian group Phœnix are 1s. up at 26s. 3d., Roumanian Consolidated have gained 9d. at 13s., Dacia Romanos are unchanged at ¾, while Hamilton's Oil Concessions remain at 1s. 9d.

The directors of the Khedivial Mail Steamship and Graving Dock Co. announce a dividend of 5 per cent. on ordinary shares for the year, carrying £660 forward.

Advice has been received from the Société Algerienne des Petroles de Tliouanet (in which the Algerian Oilfields, Ltd., is interested) that the oil output for October was 127 tons.

The directors of the Egyptian Markets, Ltd., announce that the first 5 per cent. debenture coupons No. 48, falling due December 1, are payable at the Anglo-Egyptian Bank, Ltd., 37 to 39, King William Street, London Bridge, E.C.4, at the face value, and at the branch offices of the Anglo-Egyptian Bank, Ltd., at Cairo and Alexandria, at the current rate of exchange.

FOREIGN EXCHANGES.

There has been a general all-round improvement during the week, especially as regards francs, which have dropped from 69f. 20c. to 61f. 35c. in the last two or three days. Berlin has shown a steadier tendency, as also Sofia, which closes at 575-625 leva, as against 625-675 last week. The Greek exchange has again rallied, as also Italy.

Country.	Method of Quoting.	Parity of Exchange	Latest Quotations.

Near East Markets.

LONDON PRODUCE REPORT.

Disappointing Orange Arrivals.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in fair demand at unchanged rates. Tate's cubes are 56s. 6d., and mineral water sugar has been done at 51s. London, and Lyle's granulated have come to business at 51s. 7½d. and 50s. 10½d. respectively. Foreign descriptions are unsteady. West Indian crystallised has advanced 6d. at 44s., while white Mauritius has shed a similar amount at 47s. 3d. White Java is steady at 47s. 9d. Quotations are:—November, 21s. 6d.; December, 21s. 4½d.; January, 21s. 6d.; February, 21s. 7½d.; March, 21s. 9d.; and May, 22s.

Coffee.—All quotations remain fairly steady. East Indian has come to business at 110s. and Nairobi stands at 94s. Costa Rica has advanced 6s. at 106s. The futures market is firm. Quotations are:—December, 62s. 6d.; March, 60s. 3d.; May, 60s. 6d.; and July, 60s.

Desiccated Coconut.—The unsettled state of the market with regard to this commodity is still in evidence, while prices have again hardened.

Rice.—Supplies of both American and "two star" rices are very limited, although the demand has been maintained. Quotations remain on a fairly firm basis.

Green Fruit.—The arrivals of Denia and Valencia oranges have been insignificant, but fortunately heavy supplies are afloat which, on arrival, will ease the market considerably, and lower prices may be looked for in the near future. According to the experts, the fruit is of better quality and condition than last year's.

Quotations for Denia and Valencia oranges are 20s. to 27s. 6d. box (300's to 504's). Lemons are arriving in large quantities, but the fruit, unfortunately, is in a semi-green condition. Fine fruit is attracting buyers' attention mostly at the moment.

Prices for Messina lemons are:—13s. 6d. to 27s. 6d. box (300's); 24s. to 52s. 6d. case (300's to 360's). Valencia onions have had a setback since last week, with an all-round weakening in the demand. Supplies are consequently accumulating.

Dried Fruit.—Valencia raisins are finding an open market, while currants are meeting with an excellent request. Muscatels are in good demand, but stocks on hand are low. Tunis dates are in favour, and quotations have been steady. There is still a shortage of layer and locoum figs, which have been in exceptionally good request during the past weeks, but all grades of naturals are being neglected. Although Jordan almonds are finding a ready market, supplies are very scanty, and there is barely sufficient stock to meet buyers' demands.

Oilseeds.—A harder tendency prevails throughout. Indian linseed has advanced 2½d. at 19s. 7d., while La Plata is 6d. up at 18s. 9d. Rapeseed shows no change with Toria at 17s. 10½d. and bold Ferozepore at 16s. 7½d. Cottonseed has advanced with the exception of Indian, which is unchanged at 9s. Sakellarides at 10s. 1½d. is 1½d. up, and Egyptian black has gained 2½d. at 10s. 6d.

Oils.—There has been no change throughout, with the exception of linseed oil, which has risen 6d. to 10s. 6d. Other quotations are as last week. Crude rape oil is 41s. 6d.; refined has been done at 44s. 6d. Cotton oil is firm with Egyptian at 35s. and refined at 44s., while deodorised at 47s. and technical at 36s. 6d. are unaltered.

Oilcakes.—Prices show a decline of 10s. all along the line, and are now 270s. for linseed cake, 140s. for cottonseed cake, 240s. for cottonmeal cake, and 170s. for coconut cake.

EXPORT OF TRANSYLVANIAN WALNUTS.

Prohibitive Effect of Export Duty.

(From Our Own Correspondent.)

Bucharest, November 11.

The export of Transylvanian walnuts, which in former years was so flourishing that it promised to gain the chief place in the Central European markets, is this year experiencing a severe set-back owing to the present high export tax. Thus the extraordinary fact is occurring that countries with high currencies are offering their produce for export at a lower figure than this country, although this year's crop of walnuts was abundant, ample quantities being available for export. Transylvanian exporters, for fear of remaining with this year's crop unsold, are therefore making an appeal to the Government to reduce the present export tax for walnuts, which is 30,000 lei per waggon of 10,000 kilogrammes.

ROUMANIA'S WHEAT SOWINGS.

(From Our Own Correspondent.)

Bucharest, November 11.

The weather has at last cleared up. The rainy period, which lasted over a month with short intermissions, has undoubtedly supplied the soil with ample moisture and provided a reserve stock for the months of drought which may follow. It is now greatly to be wished that dry weather should prevail for at least a month, so as to enable farmers to complete autumn sowings. It is estimated that so far only about 600,000 hectares have been sown under wheat, whereas the yield of at least 800,000 hectares is needed to cover home requirements, whilst the area reserved for autumn sowings of wheat and rye is about 2,500,000 hectares. The deficiency may still be made good, if from now on favourable climatic conditions prevail. The authorities are doing everything possible to assist the farmers to proceed rapidly with the field work.

EGYPTIAN CROPS.

The bulletin of the Egyptian Ministry of Agriculture gives the following particulars of crop conditions in October:—

Cotton.—The weather, which was favourable during the period under report, has had a good effect as regards quantity but not on quality. Practically no second picking has been taken owing to the majority of cultivators having collected all the crop in a single picking, thus increasing medium grades at the expense of very high and very low grades. As regards quantity prospects, there has been no important change since the publication of the last report.

Sales have been brisk during the month, the smaller cultivators particularly are showing no tendency to hold their stocks from the market, due to urgent need for ready money, a condition which has called for the assistance of the Government in the way of facilitating loans to them.

Maize (Nili).—The weather was favourable and water supply sufficient. The exceptionally hot weather has had a very good effect on the late-sown crop by hastening the formation of cobs. Harvesting already started in early-sown fields. Slight attacks of mole cricket (haffar) were reported from Beheira, and stalk borer was noticed in Faiyûm, Beni Suêf, and Minya. The crop is expected to be normal.

Millet (Nili).—The condition of the crop is satisfactory and the crop is almost normal. Slight attacks of smut were reported from Beni Suêf and Faiyûm.

Rice (Sêfi).—The weather was suitable and favourable for ripening. Harvesting and threshing are in progress. The crop is expected to be below the average.

Rice (Nili).—The early-sown crop is now fully matured. The crop as a whole is a little late.

Sugar Cane.—The weather was on the whole favourable and water supply sufficient. The stalk borer has been reported from several provinces in Middle Egypt and Upper Egypt. The mealy-bug has been noticed in the provinces of Minya, Girga, and Qena. The crop is expected to be normal.

Earth Nuts.—The crop is being harvested. Owing to scarcity of water in summer, the crop is expected to be below the average.

Bersim.—Sowing and watering were the chief operations in progress. Cutting of very early plots has taken place in some places. The cotton worm severely attacked some early-sown crops in Gharbiya and slightly in Faiyûm. The general condition of the young plants is satisfactory.

PALESTINE DUTIES.

The director of customs in Palestine has issued the following regulations regarding the payment of duties in kind:—If an owner or consignee refuse to pay duties on the value as assessed by the customs department, the department may take the duties in kind, if the goods are such that it is practicable to do so; provided that the duties on any articles of which the value is not disputed shall not be taken in kind.

If it is not practicable to take the duty in kind the customs department may take over the goods on its own account provided that:—(a) Three days' notice in writing be given to the consignee or owner after the presentation of the declaration. (b) The value at which the customs department takes over the consignment be the same as that stated on the invoice with an addition of not more than 10 per cent. (c) Duties already paid on the consignment or portion of consignment concerned be refunded.

When the owner or consignee desires that the duties shall be paid in kind when he shall state on the declaration and

Digitized by Google

apply for the approval of the customs superintendent, but the latter shall not be bound to agree thereto, and may use his own discretion. In the event of duties being taken in kind, the following particulars should be forthwith forwarded to the director of customs:—(1) Name of owner or consignee; (2) kind of goods selected; (3) value of each item. The statement so rendered must be signed by both the customs valuer and the owner or consignee, and endorsed by the customs superintendent.

CURRENT PRICES.

General Produce.—Bacon (Continental), 144s. per cwt.; (Canadian), 118s. cwt.; (American), 100s. cwt.; butter (Danish), 221s. 6d. cwt.; (Australian), 194s. cwt.; (New Zealand), 210s. cwt.; cheese (Canadian), 128s. cwt.; (New Zealand), 129s. cwt.; lard, 76s. cwt.; eggs (Danish), 32s. 6d. per 120; (Styrian), 16s per 120; chillies, 135s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 121s. cwt.; (East Indian), 115s. cwt.; (Central American), 95s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 94s. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 101s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¼d. lb.; pimento, 2½d. lb.; raisins (Valencias), 95s. cwt.; currants (Vostizza), 85s. cwt.; currants (Amalias), 69s. 6d. cwt.; sultanas (Smyrna), 140s. cwt.; sugar (Tate's cubes), 57s. 6d. cwt.; (Lyle's granulated), 51s. 6d. cwt.; (Mauritius crystals), 47s. 3d. cwt.; (West Indian crystallised), 44s. 3d. cwt.; (centrifugal), 17s. 6d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 12s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. 3d. lb.; wheat (English white), 45s. 3d. qr.; wheat (Australian), 43s. 9d. qr.; oats (English), 30s. 9d. qr.; oats (La Plata, ex ship), 28s. 9d. qr.; maize (La Plata), 36s. 9d. qr.; flour, 37s. 6d. sack.

Chemicals.—Acids: Boric, 61s. cwt.; oxalic, 7½d. lb.; citric, 1s. 9½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £50 ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 ton; borax crystals, 29s. 6d. cwt.; cream of tartar, 103s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £36 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £8 1s. 3d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £19 17s. 6d. per ton; hyposulphite, £14 ton; prussiate, 11d. lb.; nitrate, £13 6s. 9d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £38 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 10s. ton; sulphate of copper, £26 12s. 6d. ton; sulphate of iron, 55s. ton.

Metals.—Aluminium, £100 ton; antimony (English regulus), £34 10s. ton; bismuth, 10s. lb.; copper (standard), £63 13s. 9d. ton; copper (electro), £70 15s. ton; gold bars, 92s. 3d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £17 5s. ton; lead (soft foreign), £26 12s. 6d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 43s. 9d. unit; nickel, £137 10s. ton; platinum, 440s. oz.; graphite (80-90), £13 ton; quicksilver, £12 2s. 6d. bottle; spelter (G.O.B.), £39 3s. 9d. ton; tin (standard), £184 7s. 6d. ton; wolfram, 14s. 10½d. unit; zinc sheets, £41 5s. ton; tin plates (20 x 14), 19s. 10½d. box; silver bars, 33d. oz.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 10d. lb.; 80 to 89 lb., 10d. lb.; 70 to 79 lb., 10d. lb.; 60 to 69 lb., 9⅞d. lb.; 59 lb. and under, 8¼d. lb.; (second), 90 lb. and up, 9d. lb.; 80 to 89 lb., 9d. lb.; 70 to 79 lb., 9d. lb.; 60 to 69 lb., 7⅝d. lb.; 59 lb. and under, 6½d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 6d. lb.; (second), 5d. lb.; (third), 3d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7 to 12.8; Durbhangas, 7 to 8; Patnas, 5 to 6. Salted cows, 5 to 8.8. Arsenic hides (buffalo), 4 to 6. Skins: Calf, 8 to 10 per 20 lb.; goat, 265 to 325 per 100 pieces.

Miscellaneous.—Cotton (American), 15.65d. lb.; Egyptian (Sakel), 18.55d. lb.; jute (first grade), c.i.f., £32 15s. ton; jute (lightnings), £31 7s. 6d. ton. Oilseeds: Linseed (La Plata), £18 10s. ton; palm kernels, £16 19s. 3d. ton; castor seed (Bombay), £17 ton; seasame seed (China), £21 15s. ton; soya beans, £10 12s. 6d. ton; olive (Spanish), £74 ton; rape (crude), £41 5s. ton; soya, £36 ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex tank), 65s. ton; coconut (Ceylon), £38 2s. 6d. ton; cotton (crude), £34 15s. ton.

MINERAL OIL IN CZECHO-SLOVAKIA.

The mineral oil market in Czecho-Slovakia shows a steady decrease in prices as a consequence of the general industrial and economic crisis (says an American Consular Report). Since the beginning of this year profits have decreased on an average of 60 per cent., whereas operating expenses have remained unchanged. Taxes, railroad and postal rates, customs duties, wages, and salaries burden the industry, which must sell its products at falling prices.

The competition of a number of recently established enterprises in the trade has tended to lower market prices. At the end of September prices per 100 kilos for American engine oils in barrels were quoted at 380 crowns for spindle oil, 420 crowns for light, 470 crowns for medium-weight, and 520 crowns for heavy engine oil, 580 crowns for automobile oil, 490 crowns for cylinder oil, 530 crowns for locomotive oil, 450 crowns for raw vaseline, including package for storehouse

INDIAN TREASURY BILLS.

Tenders for Rs.1,00,00,000 three months' bills and for Rs.50,00,000 six months' bills were opened on November 10. The total amount tendered for three months' bills was Rs.3,72.10,000. Tenders at Rs.99 1a received about 39 per cent., and above in full. The average accepted rate was Rs.99 1a 3p, equivalent to a discount rate of 3.7218 per cent. per annum, against 3.7642 the week before.

The total amount tendered for six months' bills was Rs.1,34,05,000. Tenders at Rs.97 12a, equivalent to a discount of 4.6036 per cent. per annum, the same as the previous week, were accepted and received about 60 per cent. Intermediate bills for six months only will be offered for sale in India during this week at Rs.97 13a per cent.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on November 3 were as follows: Agricultural Bank of Egypt, £5 9-32; Alexandria Water Company, Ltd., £8⅞; Anglo-American Nile Steam, £3⅜; Associated Cotton Ginners, £31-32; Banque d'Orient, 38 fr.; Behera Ord., £E7½; Brasseries d'Egypte, 50 fr.; Building Lands of Egypt, £⅛; Cassi di Sconto Priv., 98 fr.; Comptoir Fin et Com. d'Egypte, £1 13-32; Consolidated Lands, £T6½; Credit Foncier Fondateur, 1025 fr.; Credit Foncier Act. 710½ fr.; Credit Foncier 1886 Oblig., 317½ fr.; Eaux du Caire, Capital, 86½ fr.; Eaux du Caire Jouissance, 114½ fr.; Egypt and Levant, S.S. Ord., 29s. 6d.; Egyptian Delta Light Railways, £4⅝; Filature National d'Egypt, £10½; Immeubles d'Egypt Soc. an des., £6 13-16; Khedivial Mail S.S. Ord., 80s.; Khedivial Mail S.S. Company Pref., £3¾; Kom Ombo Ste an de Wadi, £4 1-64; Kom Ombo Ste An. Fondateur, £32; Land Bank of Egypt, Parts de Fond, £47; Lots Turc., 37¼ fr.; Menzaleh Canal Navigation, £T291; Grand Hotels d'Egypte, £8½; Ramleh Railways, £3½; Urbaines et Rurales, £3 15-16; Union Fonciere Fond., £½.

During September 2.1 million hgs. of plums and 233,000 hgs. of plum jam were exported from Serbia, says the *Zagreber Tageblatt*.

Towards the end of December the Bulgarian Minister of Agriculture and Domains will hold an adjudication for the supply of two excavators and a dredger at an approximate estimated cost of 12 million leva, says Reuter's Sofia correspondent in a message dated November 1.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

129.—Principal of old-established textile manufacturing and import firm in Aleppo (Syria), now in Switzerland, wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

130.—Import and export merchants in Beirut (Syria) in a position to export dried carobs in any desired quantity wish to be connected with interested British firms.

131.—A Yugoslav firm is in a position to deliver white asbestos up to any quantity, and invites enquiries.

Shipping Intelligence.

EGYPTIAN CARGO SERVICE.

The Affréteurs Réunis and the Société Navale de l'Ouest have ceased to run their steamers between Marseilles and the Western Mediterranean, says the *Journal of Commerce*. Their places have been taken by the Oriens and the Franco-Belgian Lloyd Lines. The Castore and the Polluce of the former company will call regularly at Barcelona, Marseilles, Genoa, Leghorn, and Alexandria in their order. The Glauco and the Galatea, on the other hand, will call, after Alexandria, at Cyprus and Syrian and Cilician ports.

The two steamers of the Lloyd Franco-Belge, the Hesbaye and the Berinage, will connect Alexandria with northern French and Belgian ports, eventually calling at London or Hull if the demand for freight permits. The Affréteurs Réunis have not completely ceased to sail between Alexandria and the northern French ports.

REVIVAL IN SHIPBUILDING.

The Ellerman Lines, Ltd., have during the last twelve months put into commission a large number of new steamers, totalling over 92,000 tons gross. These include steamers of all descriptions from cargo steamers to the first-class passenger steamer City of Nagpur, which vessel has just completed her maiden voyage outwards to Calcutta, making the fast time of twenty-six days. Among the other passenger steamers built during this period for the ever-growing concern are the City of Paris, Tasso, and the City of Simla. The building programme is being continued, and a further large new passenger steamer will be commissioned early next year. She will be named City of Canterbury, after the well-known "City" Liner, which was a favourite among the Indian travelling public in the "'eighties."

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Scindia for Bombay (Liverpool, December 4).

Anchor Brocklebank Line.—S.s. Manaar for Port Said, Colombo, Madras, and Calcutta (London, November 25); s.s. Mahronda for Calcutta (Birkenhead, November 29); s.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9); s.s. Mangalore for Calcutta (Birkenhead, December 13); s.s. Matheran for Port Said, Colombo, Madras, and Calcutta (London, December 23); s.s. Manipur for Calcutta (Birkenhead, December 28).

Bibby Line.—S.s. Oxfordshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, November 22); s.s. Lancashire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, December 6).

British India Line.—S.s. Merkara for Colombo, Madras, and Calcutta (London, November 24); s.s. Warfield for Bombay and Karachi (London, December 2); s.s. Nagina for Colombo, Madras, and Calcutta (London, December 9); s.s. Gamaria for Bombay and Karachi (London, December 16); s.s. Margha for Colombo, Madras, and Calcutta (London, December 22).

Clan Line.—S.s. Clan Mackinnon for Bombay, Persian Gulf, Malabar Coast, and Tuticorin (Birkenhead, November 27); s.s. Clan Macmillan for Colombo, Madras, and Calcutta (Birkenhead, November 30); s.s. Clan MacNab for Bombay and Persian Gulf (Birkenhead, December 7).

Cunard Line.—S.s. Phrygia for Genoa, Leghorn, Naples, Palermo, Messina, Catania, Brindisi, etc. (Swansea, November 26); s.s. Tyria for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Corfu, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, November 30).

Ellerman Line.—S.s. Grodno for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, December 7); s.s. Flaminian for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople (Liverpool, December 16).

Ellerman, Bucknall, and Strick Line.—S.s. Kormark for Persian Gulf (London, December 18).

Ellerman's "City" Line.—S.s. City of Manchester for Bombay and Karachi (Birkenhead, November 22); s.s. City of Agra for Bombay and Karachi (Birkenhead, November 22); s.s. City of Cambridge for Bombay and Karachi (Birkenhead, November 29).

Ellerman's "Hall" Line.—S.s. City of Durban for Bombay, Karachi, and the Punjab (Liverpool, November 30); s.s. City of Rangoon for Bombay (Liverpool, December 12); s.s. Sutton Hall for Karachi and the Punjab (Liverpool, December 12).

Ellerman's Westcott and Laurance Line.—S.s. Venetian for Gibraltar, Malta, and Alexandria (London, November 22); s.s. Manchurian for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, November 28).

Glen and Shire Line.—S.s. Radnorshire for Port Said, Port Swettenham, Singapore, etc. (London, November 30); s.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, December 14).

Harrison Line.—S.s. Collegian for Calcutta (Liverpool, November 24); s.s. Governor for Calcutta (Liverpool, December 5).

Henderson Line.—S.s. Pegu for Port Said and Rangoon (Birkenhead, November 29); s.s. Martaban for Port Said and Rangoon (Birkenhead, December 13).

Holt Line.—S.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, November 23); s.s. Ningchow for Port Said, Port Swettenham, Singapore, etc. (Swansea, November 30); s.s. Teiresias for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, December 7); s.s. Peleus for Port Said, Port Swettenham, Singapore, etc. (Swansea, December 7).

Johnston Line.—S.s. Vedamore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, and Constantza (Liverpool, December 9); s.s. Willowmore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, December 16).

Papayanni Line.—S.s. Maronian for Melilla, Oran, Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, November 25).

P. and O. Line.—S.s. China for Bombay (London, December 1); s.s. Novara for Colombo, Madras, and Calcutta (London, December 1); s.s. Mantua for Bombay (London, December 15); s.s. Malwa for Bombay (London, December 29).

Prince Line.—S.s. Soldier Prince for Tunis, Malta, and Alexandria (Manchester, November 24).

The output of coal in India during 1922 is estimated at not less than 18,500,000 tons.

The P. and O. Banking Corporation are extending their offices in Leadenhall Street, E.C., to a handsome new building adjoining the existing premises in St. Mary Axe, where, until further notice, the public entrance to the bank will be situated.

The traffic receipts of the South Indian Railway Co., Ltd., for the week ended October 21 amounted to Rs.8,01,008; total for the year, Rs.2,75,99,932. For the corresponding period of last year receipts amounted to Rs.8,06,489; total for the year, Rs.2,45,77,919.

COTTON TRADE REVIEW.

Discouraging Conditions.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended November 18 states:—

General.—The cotton trade has again been under the influence of considerable fluctuations in raw cotton, and the continued instability of Continental exchanges. The unsteadiness of quotations for the raw staple makes many traders reluctant to quote prices at all. In addition, the General Election has militated to some extent against active operations, politics being frequently discussed in place of business.

Yarn.—Operations have been of the most modest dimensions. Spinners and buyers can seldom agree on the question of price, and where transactions are concluded it is almost invariably with a loss to the spinner, even on cotton bought some weeks ago at a more favourable price than that now ruling. The Cotton Spinners' Federation decided yesterday to continue during the month of December the short working week, which has been in force since the beginning of October. They further propose that a ballot of the members should be taken on the question of reducing the hours to twenty-four per week during December, i.e., half-time. Exports during the month of October amounted to 16,031,700 lb., against 16,794,000 lb. in the previous month and 18,644,800 lb. in October last year.

Cloth.—In this section also there is nothing encouraging to report. Trade for India is of very modest dimensions, and the way in which China, reported to be short of goods, refrains from placing orders is evidence of lack of confidence in the permanence of present quotations. A recovery in business with these two most important markets would go a long way to relieve the situation, but it is not yet within sight. Small orders have been placed here and there for Egypt and one or two less important markets, but these have mostly been for stock lots. The Levant naturally continues at a standstill. Shipments of cloth last month were 353,654,000 sq. yards, against 395,823,000 sq. yards in the previous month and 342,411,500 sq. yards in October last year.

Raw cotton.—A certain amount of weakness has developed, and the tone is decidedly less bullish than previously. The lack on this side of any support whatever for the movement is beginning to have some effect. A bureau report appearing in the American Press on the 3rd instant estimates an American crop of over 10,000,000 bales, and a carry-over, at the present rate of consumption, of cotton of all growths on July 31 exceeding 6,000,000 bales. Closing prices are as follows: American Fully Middling, 14.97; Egyptian Fully Good Fair, 18.75.

The following extracts are taken from a report from Jaffa dated October 28 received by the Imperial Ottoman Bank:—

Jaffa, October 28.

The price of cereals continues to be on the upward trend. There has been a big arrival of gasolene and kerosene from America which should bring about a further drop in price of these two articles.

Company Meetings.

SOUTH INDIAN RAILWAY.

Increased Revenue and Expenditure.

The ordinary general meeting of the South Indian Railway Company, Ltd., was held at the offices of the company, 91, Petty France, Westminster, S.W.1, on November 8, the chairman, Sir Henry Kimber, presiding.

The managing director (Mr. Alex. Muirhead, C.I.E.) having read the notice convening the meeting and the report of the auditors,

The Chairman said: Gentlemen, before proceeding to the actual business of the meeting, I desire to refer to the great loss the company, since last we met you, has sustained by the deaths of two of the members of your board, namely. Sir Douglas Fox, who had been on the board of this company for 31 years and who died on November 13, and Sir John Rees, whose membership of the board exceeded 19 years. and who was killed by falling from a train on June 2 of this year.

I now proceed to the business of the meeting, and move: "That the directors' report and statement of accounts, as circulated and now presented, for the twelve months ended March 31, 1922, be received and adopted." Before putting that to the vote I will, as usual, make a few observations upon the chief points in the report and the general position of the company. There has been no change in the mileage worked by the company, no new surveys were undertaken, nor was there any new mileage under construction excepting one small branch for the Tinnevelly District Board. The capital outlay on the open line was heavy, amounting to more than 142 lakhs of rupees, but it was all badly needed, and even higher expenditure is being incurred in the current year, for additions to the structure and to the equipment of the railway in order that adequate facilities may be provided for supplying the needs of our customers in the transportation of passengers and merchandise. One of the most important of these facilities will be the new locomotive and carriage and wagon workshops which are now well under way, and on which heavy outlay will be incurred during the next few years.

The revenue account shows the considerable increase of 32¾ lakhs of rupees in earnings, with, however, a much heavier increase of 67¼ lakhs in the working expenses. Of the increase in earnings more than one-half arose from a normal development in goods traffic. An increase of rather more than 7 lakhs of rupees, equal to 3½ per cent. in the passenger earnings, resulted from some increase in fares that took place during the year, which, however, was accompanied by a small decrease of about 2¾ per cent. in numbers carried. Since the close of the year under review there have been further general increases both of passenger fares and of goods rates which, while up to the present date they have caused a temporary diminution in the volume of traffic, are bringing in moderate increases in the earnings, which will go some way to compensate for the great rise that has occurred in all working costs. There was a satisfactory increase of more than 2 lakhs in the receipts from parcels traffic.

The large increase of 67¼ lakhs of rupees in working expenses arises from three main causes: firstly, from heavy outlay on repairs to and renewals of the railway and its rolling stock to make good the deficiencies in this respect during the period of the war; secondly, from increases of salaries and wages of the staff; and lastly, and, most unsatisfactory of all, from the higher cost of fuel, which for an inferior article has risen largely in price. The causes of this are further explained in the report, and they are receiving the close attention of the board and of the officers of the company.

The Indo-Ceylon Ferry Service was, for the first time in its history, practically self-supporting, the earnings and expenses of working just about balancing each other. The credit of that is due very largely to our worthy managing director and two gentlemen from Ceylon, who came over here from their traffic department to meet us, and who between them arrived at a method, satisfactory to both sides, of clearing away the outstanding differences that had for so long existed between us. The plan worked out was very well received. Directly it was reported to Ceylon by these two gentlemen it was adopted forthwith, and when it was reported to the Crown Colonies' Agents it was also approved of by them. Nothing could be more satisfactory. It saved the necessity and expense of arbitration which both parties had agreed upon.

By reason of the heavy increase in working expenses, the net earnings fell below those of the previous year by about 34½ lakhs of rupees, and as a result the share of the profits falling to the company fell from Rs.7,11,217 in the previous year to Rs.2,16,799. Some falling off was, of course, expected to occur as soon as progress began in making good the deficiencies in expenditure of the war period; and, fortunately, your board, with the concurrence of stockholders, had made provision for it by reserving a proportion of the company's share of surplus profits of that period and restricting the distributions to a modest return on the company's capital. With a continuance of that policy it is hoped that, notwithstanding the period of abnormal expenditure still lying ahead, dividends of reasonable proportions may still be assured.

The published report of the Committee on Indian Railways, to which I referred last year, has not been communicated officially to the company, but the Government of India are moving in the direction of giving effect to some of its recommendations. They have constituted a Central Advisory Council, to whom they propose to refer important questions of railway policy; they have also defined the constitution and the duties of Local Advisory Councils which, subject to any revision that may be suggested by the Central Advisory Council, it is the intention of Government to adopt as soon as possible in inaugurating councils on the three State-worked lines. The board have the matter of Local Advisory Councils under earnest consideration with the desire to give the fullest effect to the proposals in this regard of the Committee, commensurate with securing that the actual management and administration of the railway shall not be subject to the control of what from their nature must necessarily be irresponsible bodies.

In regard to financial procedure, Government have instituted a five-year programme of capital outlay on open lines, for which it is their intention to provide funds and to arrange that any portion of the yearly allotment remaining unspent at the end of each year shall not, as hitherto, lapse, but shall be carried forward as an addition to the grant for the ensuing year. Under this programme an allotment of 220 lakhs of rupees, say a million and a half sterling, has been made for capital expenditure on the State lines worked by the company in the current year 1922-23, and 175 lakhs of rupees, say £1,167,000, has been provisionally promised for each of the ensuing four years. If this intention is given full effect to, the total capital outlay (including the outlay of the past two years) for the seven years ending March, 1927, calculated at current rate of exchange, will have amounted to about 7¾ million pounds sterling, and will have been expended wholly on the existing railway, in addition to its works and its rolling stock, and will be irrespective of outlay on construction of any additional mileage to the company's undertaking.

One such important addition that forms a most urgent requirement is the construction of the chord line from Panruti to Trichinopoly, as an alternative to the otherwise necessary doubling of the existing roundabout section of the main line between those two points. This chord line of 95 miles is estimated to cost approximately 200 lakhs of rupees.

There are other lines that are urgently needed to meet the most moderate requirements of railway facilities within the territory served by the company's system. There are projects aggregating to nearly 1,000 miles in length, the necessity for which is admitted and for many of which the preliminary surveys were carried out years ago, but for none of which have the necessary funds been forthcoming. In the past twelve years less than sixty miles of railway, and that only a famine protection line of 2 ft. 6 in. gauge, has been added to the company's undertaking, and the total addition to the mileage of the whole system, including branch lines, in that period has been only 158 miles. No one could suggest that Southern India is adequately supplied with railway facilities, with a total mileage of 1,852½ miles—as is the case at present—but the company are entirely in the hands of Government in this matter and can only continue to hope that the necessity for taking adequate measures to provide the additional mileage will not be much longer delayed.

The necessity for a settled programme of uninterrupted capital outlay resting on secured finance has now been recognised for open line improvements, but the equally important requirement of a regular settled plan by which each year's revenue shall be charged with its appropriate share of the cost of renewals and replacements has not yet been met by the institution of a depreciation fund; the outlay on revenue renewals and replacements continues to be dependent, firstly, upon the sum which Government can see their way to allot to it out of the estimated earnings of each year, and, secondly, upon the possibility of obtaining the materials, and paying for them before the close of each year, failing which the unexpended balance of the grant lapses and the arrears of work thus created go forward to burden the revenue of subsequent years.

Coincident with the enlargement of the Indian political horizon the desire has naturally arisen for an acceleration of the pace at which the process of Indianisation of superior appointments in the services is being carried out. The

Digitized by Google

board are not unmindful of this legitimate ambition; there are already a considerable number of superior posts on the South Indian Railway filled by Indians, but the difficulty in the past in giving effect to it on railways has been the deficiency, in Indian candidates for employment, of the technical training and qualifications required in railway officers appointed to superior executive or administrative posts. I now beg to move the resolution for the adoption of the report and accounts, and will ask my colleague, Mr. Yorke, to second it.

Mr. Algernon J. Yorke: I have much pleasure in seconding the resolution.

The Chairman (after a pause): If no stockholder wishes to make any observations I will put the resolution in the following terms:—"That the directors' report and statement of accounts for the twelve months ended March 31, 1922, be received and adopted." The resolution was carried unanimously.

The Chairman: I have next to move:—"That a final dividend made up of guaranteed interest at 1¾ per cent. and dividend from surplus profits at 2½ per cent., making in all 4¼ per cent., be paid on January 1, 1923, for the half-year ending December 31, 1922." You will understand that the "surplus profits" there mentioned are the company's share of the surplus profits of the undertaking.

Mr. Alfred Brereton, C.S.I.: I have much pleasure, gentlemen, in seconding that resolution.

The resolution was unanimously adopted.

The Chairman: The next resolution is:—"That Mr. Henry Dixon Kimber be and is hereby re-elected a director of the company," which will be proposed by Mr. Brereton.

Mr. Brereton: I beg to propose that resolution.

Mr. Yorke: I have much pleasure in seconding it.

The motion was unanimously agreed to.

Mr. A. W. Rake: Is it not proposed to fill the other vacancy, sir?

The Chairman: Not at present.

Mr. Rake: Thank you.

The Chairman: We now come to the reappointment of the auditors. I will ask some stockholder on the other side of the table to be kind enough to move it.

Mr. Crighton: I have much pleasure in proposing:—"That Mr. G. A. FitzAdam-Ormiston and Sir J. S. Harmood Banner be and are hereby re-elected auditors of the company for the coming year, and that their remuneration for the year be £25 each."

Mr. Rake: I have pleasure in seconding that.

The motion was passed unanimously.

The Chairman: The next resolution I have the pleasure of moving, as I usually do, is:—"That the special thanks of the shareholders be accorded to the agent and staff of the company in India, and to the London office staff for their services to the company."

Mr. Yorke: I have much pleasure in seconding that.

The vote was unanimously accorded.

The Chairman: That is all the business, gentlemen.

Mr. Davies: It gives me very much pleasure to propose that a vote of thanks be accorded to the chairman and directors of the company for so ably looking after the interests of the stockholders. We have just had the pleasure of listening to a very interesting and lucid account of the working of the company during the past year, and I feel sure that we can go home and rest contented that the board of directors have the best interests of the shareholders at heart.

Mr. Rake: I have very much pleasure in seconding that resolution.

The motion was passed unanimously.

The Chairman: My colleagues, I am sure, unanimously desire that I should express our appreciation of this resolution, and they beg me on their behalf to thank you for it. That concludes the business of the meeting, gentlemen. I thank you for your attendance.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated November 12:—

Season.—During the week ending November 12, monsoon was active in Peninsula, and rainfall was widespread in Bombay Deccan, Konkan, Mysore, Madras Deccan and South-East Madras. There were local falls in Burma, Central Provinces and Hyderabad.

Condition of Crops.—November 10 (Bombay): Heavy and widespread rains during the week in Bombay Deccan and Karnatak, have considerably improved outlook in those areas where formerly condition was serious. Elsewhere, crops satisfactory and particularly good in Konkan and Sind. Bengal: Reaping of early winter paddy progressing favourably and prospects excellent, except in flooded areas in North. Central Provinces: Germination of wheat and linseed good. United Provinces: Prospects of grams and sugarcane good.

Markets.—November 9: Bombay cotton market steady. Fine M.G. Oomras Rs.439 December-January; Rs.444 March. Bombay cotton arrivals from September 1 to November 3, 1922, were 51,000 bales, as compared with 288,000 bales during the same period of the last year. Bombay imported piece-goods market unchanged. Retail inquiries encouraging, but at low prices. Local goods moving slowly. November 11: Calcutta jute market very firm. No sellers of Firsts under Rs.77 ready. Hessians steady, but little business passing. Ready 9 Porters Rs.17, 14; 11 Porters Rs.21, 12. Heavies steady. At tea sale on November 7, good selections were offered. Strong orders in market but with less competition. Particularly for tea over 1 rupee prices sharply declined. Good liquoring broken Pekoes and Souchongs in strong demand and realised full prices. This sale's average price was 15 annas 9 pies against last week's average price of 14 annas 6 pies per lb. 47,391 packages sold to date at an average price of 12 annas 1 pie per lb. October crop figures are expected to show total increase of 5,000,000 lb. on last year. In Rangoon rice market, prices improving. Quotations on November 11: Large mills Rs.475 immediate; Rs.470 November. Small mills Rs.500 buyers; Rs. 502. 8 sellers. January quoted at Rs.419 and three months Rs.405. Paddy Rs.192 to Rs.195 rail; Rs.195 to Rs.200 boat. Shellac: November 7: Market firm in earlier part of week with sales in T.N. at Rs.165. Later, market eased off and closed dull with business done and sellers for spot T.N. at Rs.158. Sellers quoting Rs. 150 for December, but no buyers.

No change in bank rate.

COMPANY NOTES AND REPORTS.

Anglo-Baltic and Mediterranean Bank.

The report for the year to April 29 last states that the directors at the general meeting will inform shareholders of steps they propose to take with a view to the reduction of the capital of the company. In addition to 8,000 forfeited shares shown in the balance-sheet, 56,975 further shares have been forfeited since April 29, 1922, making a total of 64,975 shares forfeited. The directors propose to reduce the capital by taking the necessary steps for the cancellation of these shares, which will result in £145,457, amount paid up on such shares, being in effect available against losses suffered by the company. The directors also propose to apply to the court for cancellation of outstanding liability of £2 9s. per share. The directors have approached Sir Joseph Davies, who is associated with a group of successful investment trust companies, with a proposal that he should become managing director of the company. Sir Joseph Davies is prepared to do this, should shareholders desire it, on condition that he receives no remuneration other than a percentage of profits actually realised during his tenure of office.

The accounts show a gross profit of £7,987. Salaries, directors' fees, and general expenses absorb £10,259, taxes £293, legal expenses £534, depreciation of lease, furniture, etc., £3,077, and provision for bad and doubtful debts £314.526, making an adverse balance of £320,704, less £24,232 brought in, as a provision for past due bills, etc., leaving a deficit of £296,471.

Anglo-Egyptian Bank.

The net profit of the Anglo-Egyptian Bank for the year to August 31 amounted to £119,700 (against £118,883). To this is added £52,304 brought forward, the available balance being £172,003. A sum of £7,270 is contributed to staff provident fund (against £6,579), and £22,000 is written off premises account (against £5,000). A dividend is to be paid on December 1 of 10s. per share, free of tax, making 15 per cent. for the year, while £52,732 is carried forward. For the previous year the dividend was at the same rate, but a bonus of 2½ per cent. was also paid.

Assam-Bengal Railway.

The gross receipts of the Assam-Bengal Railway Company for the year ended March 31 amounted to Rs.95,44,149, against Rs.1,14,30,004; while working expenses were Rs.89,48,001, against Rs.88,26,482, the ratio of expenses to receipts being 93.75 against 77.22. The receipts were seriously affected by the strike, which lasted about fifteen weeks. After deducting the share of expenditure of worked lines, Rs.4,62,973, the net earnings amount to Rs.1,33,175. The usual half-yearly dividends at the guaranteed rate of 3 per cent. per annum have been paid.

NEW COMPANIES.

The Irak Company has been registered as a private company, with a capital of £1,500 in £1 shares. Objects: Public works and general contractors, etc.

NOTES OF THE WEEK.

The Influence of Angora.

The difference in the political atmosphere at Lausanne and at Constantinople last week affords no bad indication of the difficulties that confront Mustapha Kemal Pasha and the more moderate of the Angora leaders. The special correspondents at Lausanne reported that a spirit of conciliation was in the air, and that, contrary to all expectations, Ismet Pasha and his colleagues were showing a real desire to get on with the business that had brought them to Switzerland. In Constantinople, on the other hand, the attitude of Rafet Pasha and the other Angora representatives, so far from showing any symptoms of improving, became so intolerable as to call forth a very sharp reminder from the extremely patient Sir Charles Harington. After this it was almost amusing to be told that Rafet had been superseded because he was considered by Angora to be "too conciliatory" to the Allies. From these things it would appear that the Nationalists' power of seeing things in true perspective, and forming a sane judgment upon them, varies in direct proportion to the distance from Angora.

Moderates v. Backwoodsmen.

At Constantinople Rafet Pasha has occasionally contrived to get a correct view of the situation, and, although we should hardly accuse him of being *too* conciliatory, we may admit that now and then he has shown himself ready to meet the Allies' views, if Angora would let him do so. We suspect, too, that his playing to the gallery—or the Turkish section of it—has been due to his acquaintance with the Angora spirit. In short, we may regard his moderation, when he has shown any, as his own, and his intransigence as inspired by Angora. At Lausanne Ismet Pasha, who at Mudania was not always of an accommodating disposition, has shown an entirely new and much more statesmanlike spirit, so that the chance of an understanding has greatly improved. But in the long run it will be Angora that will have the last word on any terms that Ismet may accept. Can Mustapha Kemal and the other moderates control the backwoodsmen and induce them to accept fair terms? An early move to Constantinople by the whole Angora Government might be no bad thing, but that is, of course, most improbable just yet.

The Balkan Rapprochement.

It may be true that Balkan soil is less favourable to the growth of good understandings between States than to the spread of misunderstandings, intrigues, and open quarrels; and, indeed, history, remote and recent, certainly points in that direction. It is, therefore, all the more gratifying to find the *rapprochement* to which we alluded last week still showing signs of growth, if not of rapid growth. Evidence of this was forthcoming at Lausanne last week when the question of a Bulgarian outlet came up for discussion. As indicated in our leading article, we do not regard the solution derived at as ideal, but the spirit in which the problem was discussed was at least encouraging. The Sub-Commission appointed to formulate a scheme found its work surprisingly facilitated by the unexpected spirit of friendliness manifested by all the representatives of the South-Eastern European States. Even the Turks displayed a readiness to remove obstacles rather than to raise them, and the fact that Lord Curzon was able to congratulate Turks, Greeks, and Bulgars on the conciliatory temper they had shown is one of the best bits of news we have had for some time. We cannot, of course, expect all the negotiations to run so smoothly, but we may well be thankful for the auspicious start made last Friday.

The Athens Court-Martial.

Considerable comment has been caused by the British Government's action in making representations to the Greek Government on behalf of the ex-Ministers and Generals on trial by court-martial in Athens. These representations amounted to a request that, if found guilty and sentenced to death, the prisoners should be spared, even if they were exiled; and apparently the request was accompanied by a threat to break off relations in the event of refusal. In point of fact, the procedure was not quite so strange, or so much in the nature of gratuitous interference, as it appeared at first sight. Great Britain, as one of the Protecting Powers, was technically within her rights in putting forward her suggestion. Moreover, she is at the present time giving the Greeks proofs of her good will towards them: the Greek refugees in Constan-

Digitized by Google

tinople have been, we learn, looked after almost entirely by the British, by whom they were brought from Smyrna, fed and housed, and are now being repatriated. British policy in this matter of the court-martial prisoners is sound and wise. The trial of the ex-Ministers is but the latest manifestation of that political vindictiveness which has had such disastrous results in the past in Greece, and any step that will tend to temper this vindictiveness, and thereby weaken the vicious circles created by it, is to be welcomed.

End of a Quarrel.

The dispute between King Alexander of Yugoslavia and his brother, Prince George, regarding the allowance to be made to the latter has happily been ended. Prince George wrote to his brother a letter expressing regret for his past conduct, and promising to fulfil his obligations as a member of the Royal Family and to respect its statutes. This letter was read to a Crown Council which had assembled on November 12 in Belgrade to deal with the dispute, and, naturally, the reading caused the greatest satisfaction. Throughout Serbia, too, the closing of the dispute is hailed with real relief, for Prince George still retains much of his popularity, and the fact that he and his younger brother should be on bad terms was a source of regret to most Serbians. It is felt that, having first got himself into an impossible position by his own impulsiveness, he has now got himself out of it by his own effort, and in a manner entirely creditable to him.

Guests of the Egyptians.

The Egyptians plume themselves on their politeness, but unless they mend their manners towards visitors, their claim to the quality will not be long sustained. We do not refer now to the recent outrages on Europeans or Christians, but to the treatment by the Cairo mob of distinguished Turkish and Arab refugees from Constantinople—good Moslems, who sought asylum in Egypt with the intention of staying there indefinitely. Among these refugees was Mustapha Sabri, formerly Sheikh ul-Islam, who, we should have thought, would certainly be free from insult, by reason of the position he formerly held; Tewfik Pasha, the venerable ex-Grand Vizier, was another member of the party, and others included well-known generals and statesmen. The party is now reported to have been so depressed by the attitude towards them of the hooligan element in Cairo that they have decided to leave the country and to accept an invitation sent to them by King Hussein of the Hejaz to live at Mecca. Such a state of affairs is discreditable in the extreme to the Egyptians, and shows how far the spirit of downright ruffianism has spread among the lower classes in the cities.

An Egyptian Judgment.

Egyptian papers received by a recent mail contain references to a judgment delivered by the Crown Council which makes extraordinary reading for Western eyes, though Egyptians probably see nothing strange about it. The case was one in which an Egyptian Princess brought an action against the famous statesman Mohammed Said Pasha, whom she alleged had failed in his trusteeship of the estate of Prince Seif ed-Din, and had badly mismanaged it. Cases of capable statesmen showing themselves poor business men in private life are not hard to find in most countries; but the Egyptian Crown Council would have none of it—a man who had so well managed Egypt was incapable of mismanaging a simple estate, and the charges against him must be inspired by hatred! And then the judgment went on to declare that Said Pasha was "incontestably a very clever Minister," and to praise to the skies his political activities, particularly those of recent years—which are not, perhaps, those which would be regarded as his best work by disinterested critics. Into the rights or wrongs of the case we do not purpose to enter, but the fact that any Court should make such an incursion into politics illustrates very well the difficulty that most Egyptians seem to feel of avoiding hero-worship of sorts, and of setting facts and policies before personalities. Further interest is lent to the incident by the fact that in the event of the Sarwat Cabinet going out of office, Said Pasha would be a very strong candidate for the Premiership.

Moscow, Angora, and the Caucasus.

The Moscow authorities are reported to be feeling some uneasiness about the independent spirit lately shown by Angora, and to be disappointed by the failure of their agents to spread the doctrines of pure Bolshevism among the Turks. The situation is not too easy for them; for any attempt to bring Angora to heel by force would probably lead to serious trouble among the Moslem subjects of Moscow, and that is a possibility not to be faced if it can be avoided. Nevertheless something has to be done, and it seems that an intensive propaganda has been begun in Caucasia, whence, presumably, it is hoped that some of the good seed may blow across into Anatolia. At the same time Moscow does not propose to rely only on argument and sweet reasoning; its army in the Caucasus is being kept up to full strength—to very full strength indeed, for it is said to number 100,000 men—and, as already mentioned in these notes, the Caucasians are once more receiving proof of the ruthlessness of Soviet rule. It is not surprising that the long-suffering folk have at last borrowed a leaf from the Bolshevists' own book, and that several highly placed Soviet officials have been assassinated within the past three weeks.

The Sikh Shrines.

The Punjab Legislative Council has now passed, though only by narrow majorities, the measure introduced to facilitate the decision of the religious disputes pending among members of the Sikh community, and there is therefore a hope—we wish we could say a certainty—that the trouble may be drawing to a close. The text of the Act is not yet available in this country, but we have not heard of any radical alterations in the original proposals, the essence of which was that a body of Sikh Commissioners should be chosen, largely by the community, to effect a satisfactory settlement of the disputes. Such a measure would assuredly be sufficient in the realm of pure reason, but unfortunately the Sikhs pay no allegiance to that sovereign, and as their representatives voted against the Bill when it was before the Legislature, it is quite possible that they may refuse to recognise it, or may take steps to render it unworkable. In that event, we suppose the next stage will be to appoint Commissioners from other communities and then call in the sorely tried police to enforce their decisions, in which case the recent situation will be created afresh; but we can still hope that the Sikhs, as a whole, will accept the very great privilege of regulating their religious disputes without interference from outside.

The Advance of Burma.

Burma has been endowed during the past week with a High Court and an elected Legislative Council, two of the institutions which the province requires in order to realise its high ambitions.

Digitized by Google

The High Court comes in the normal course of evolution to replace the existing Chief Court at Rangoon and the Judicial Commissioner at Mandalay. At present only one of the judges is a Burman, but it is safe to forecast an alteration in the proportion as the young men now at the Bar come to maturity, and the Court will eventually serve to express the mentality of the race within the sphere of its operations. The Legislature, on the other hand, marks a definitely new departure. It has escaped the initial danger of the boycott which was threatened by a noisy band of wreckers, and both the number of contested elections and the proportion of voters polled are sufficient for a start. Of the quality of the Council no opinion can yet be formed, but in the interests of the people we hope their representatives will prove to be adequate to the task before them, and that they will turn recent Indian experience to advantage by avoiding some, at least, of the mistakes of the other provincial legislatures.

The Governor-General's Council.

Last week's announcement completes the expected changes in the constitution of the Governor-General's Council, and, while it may create disappointment in some parts of India, its contents strike us as distinctly satisfactory. Sir Muhammad Shafi, who passes from the educational to the legal department, has not been an outstanding success in the former sphere, which requires exceptional qualifications at the present juncture, but as legal member he will be in his proper place. The promotion of Mr. Atul Chatterjee from the secretariat to the Council is a recognition of exceptional capacity, and we know no one in India to whom we would entrust the portfolio of Education with greater confidence. Mr. Chatterjee is the first Indian to reach the Council by the arduous road of the Civil Service, and his selection should prove an encouragement to the numerous young Indians who have recently entered on that career. The opinion has been gaining ground of late that their chances of such promotion were small, and that the Indian seats on the Council were the preserve of politicians, but with this new precedent they will be able to hope that merit will not be deprived of its due.

THE WEEK AT HOME.

London, Monday Evening.

The New Parliament.

The new House of Commons is a strong, and it may be a turbulent, House. Its membership is considerably younger than the last; it is obviously less wealthy, and distinctly more critical. The opening session will be short, but when it reassembles in February we shall not get through without some strong language and violent collisions.

The Treasury Bench is being condemned in some papers as weak. I rather doubt it. The men are new; some of them are young, as politics go—yet, after all, one is not a mere babe at forty—but several of them have already shown their ability as private members. Admittedly they are not a flashy lot, and they are sound rather than brilliant. But, with one or two exceptions, they strike me as a capable team.

It is difficult to size up the Liberals at the moment. Sir John Simon will add to the Wee Free strength in debate, and Captain Reginald Berkeley, who won Nottingham by the skin of his teeth, strikes one as a likely recruit, in spite of his being a dramatist and literary man, which seldom agrees with politics. The National Liberals are Lloyd George *et praeterea nihil*. But the wizard from Wales has so far been silent.

Labour is obviously out for business. Its increase of numerical strength is likely to be of less importance than its evident increase of determination. In the last Parliament its record disappointed everybody, friend and foe alike; its members were largely absentees, and when they spoke, they spoke ineffectively. Now all that is changed. Mr. Clynes, an excellent but not very forcible little man, has been deposed for Mr. Ramsay Macdonald. He has taken the defeat, at least outwardly, in good part, and Mr. Macdonald's first speech showed that four years' absence has not lost him his skill in debate. But I do not envy him his job; he has a far more difficult task than Mr. Bonar Law. He is essentially a constitutionalist, a middle-class Liberal of the old style, and some of his followers are anything but that. One has already cited the precedent of Oliver Cromwell for direct action—somehow I doubt whether Cromwell's Ironsides would have recognised their alleged descendants; another has described the State ceremonial at the opening of Parliament as a waste of money and "a tomfool show"; and a third has threatened to "break all that down." These things need not be taken seriously—except by Mr. Macdonald. They show that discipline in the ranks will be a difficult matter, and there is a note of intolerance in some of the recruits from Glasgow and the Lowlands that forebodes trouble in this particular camp.

Some of the Labour members clearly distrust democracy and representative government and majority rule as much as any backwoodsman or Die-hard. There is a touch of fanaticism in them; they want their own way, and they want it at once.

The Liberal Reunion Problem.

Beyond these voices there is peace; or, at any rate, a desire for it, which is very much the same thing in politics. There have been several tentative and unofficial movements towards Liberal reunion, and the indications are that the Asquith-Lloyd George vendetta is no longer quite the engrossing feud that it was. After all, Liberals can do simple arithmetic as well as most people, and a very easy calculation shows that they got more votes, even in their divided state, than Labour as a united party. It is true that they are thirty seats down as against Labour, but that is the result of their own civil war. Several seats were simply thrown away; in other cases, Liberals voted Conservative or Labour, or would not vote at all, simply because they hated the split. There is another and more visible side to the question. The Liberals are physically divided in the new Parliament; the Asquithian sheep and the Lloyd George goats occupy different benches, with the result that Labour is now the official Opposition, and rather intolerant of any Liberal claims to place, and absolutely hostile to any idea of Liberal precedence.

This is a heavy price for an historic party to pay for the luxury of civil war, more particularly as the official Opposition ranks as the alternative Government. It is clear that this situation will not last. If the Liberals bury the hatchet, and apply themselves to united Parliamentary tactics and a campaign in the country, I fancy that they will wear down their real opponents, who are in the Labour, not the Conservative camp.

By-elections will help them, and with any luck they will soon be not very far behind the Labour total. They have four years to make good—for the Conservative Government looks as if it had come to stay; and the alternative to Liberal reunion

Digitized by Google

is extinction by Labour. It is hardly doubtful which course will be chosen.

The Unemployed.

There was some excitement in London last week over an unemployed demonstration. The leaders insisted on seeing the Prime Minister, but Mr. Bonar Law, who has reverted to the old doctrine of Cabinet responsibility, referred them to the heads of the departments responsible for these matters. On the general principle he is quite right, but it was unfortunate that its first application should be in this direction.

Some tall talk was indulged in by the leaders, which gave a chance to the sensational Press to suggest a Communist plot, and people were advised in scare headlines to keep away from the Embankment and Whitehall. Unimpressed by these prophecies, I walked through the dangerous area at the critical time. I saw plenty of good-tempered police, and plenty of unemployed—both the kind that can dawdle an hour on somebody's else business and the pathetic down-and-out variety. I was not conscious of taking my life in my hand, and I never met a more orderly or less revolutionary lot of men in my life. The actual leaders were rather wild, but impressed me as talkers rather than doers; and Mr. Lansbury, now back in Parliament, exerted himself on the side of constitutional action with success.

The whole question of unemployment is to be debated in the Commons. It is high time it was. The position is serious, the dole is a hopeless solution, or rather it is no solution at all. And I hear several business men saying that, since ordinary trade cannot provide employment, public works are essential. They may not be economic, but neither are starvation and deterioration of physique.

Erskine Childers.

The Irish Government has shot Erskine Childers, that extraordinary man who wrote "The Riddle of the Sands," served in the Navy during the War, and then became a Sinn Feiner and an ardent Irish Republican. It is said that he was the brains behind de Valera, and one can well believe it. He opposed the Treaty, and organised the guerilla war; and his end appears to be looked on as in some sort a *revanche* for the death of Michael Collins.

This act of firmness is an indication that the present Irish Government, unlike the last, means business; but there are political cynics who remark that Childers was so nearly an Englishman that the Irish authorities had the less reluctance in putting him out of the way; and it is the fact that in the past few months his support of the Republicans had made him regarded as a traitor by both sides. His execution will probably lead to some further outrages by the Republicans, but there has been so little reliable news from Ireland during the past three months that it is difficult to form a judgment on the real position.

Outer South London.

Another extension of the London tube railways is being proposed—the South London line from Clapham to Tooting and Morden, and the Underground from Wimbledon to Sutton. Existing vacant spaces on these routes will soon be covered with houses, and the new facilities are badly needed.

It is extraordinary how rapidly London is still spreading. Only fifty years ago the nightingale was still heard in Nightingale Lane on Clapham Common; now one hears the motor-bus instead. Thirty years back Tooting was still a rustic village, Sutton was a little country town, and Carshalton a lovely hamlet. Now all are thoroughly suburban. Morden and parts of Mitcham nearer London are still recognisably like the country, but Merton, once the rural home of Nelson, is mostly slum. Wimbledon is solidly prosperous, but it hardly ranks as one of the outer suburbs any longer.

The same thing is happening in the Bromley district in Kent, where the builder is busy, and again on the other side of the Thames. The effective population of Greater London will soon be in the neighbourhood of ten millions.

The Week's Books.

The second volume of "The Autobiography of Margot Asquith" (Thornton Butterworth) is more interesting because nearer to contemporary history than the first. It is full of thumb-nail sketches: "Dr. Jim had personal magnetism and could do what he liked with my sex"; Cecil Rhodes was "like a great bronze gong"—surely a little harsh and inadequate? She reveals that Mr. Asquith wished to take part in the Versailles Conference and offered his services to Mr. Lloyd George on the ground that neither President Wilson nor M. Clemenceau was strong enough in international law or finance. Mr. Lloyd George promised to consider the proposal, but nothing came of it.

"Fifty-One Years of Victorian Life" (Murray), by the Dowager Countess of Jersey, is a very interesting book of recollections without indiscretions or malice. She describes her visit to R. L. Stevenson in Samoa—"a slim, dark-haired, bright-eyed figure in a loose, black velvet jacket over white vest and trousers, and a scarlet silk sash round his waist. Every word, every gesture revealed the man, and he gave one the impression that for him life was a game to be shared with his friends and played nobly to the end."

Then there is also a letter of 1891 from the Lord Derby of the day: "The German Emperor has been making a fool of himself, which is nothing new; he delivered a speech the other day, in which he praised the beer-swilling and duelling of German students as being the most effective influence to keep up the true German character. He is an energetic young savage, and that is the best one can say."

"Western Mysticism" (Constable), by Dom Cuthbert Butler, is mainly a study of the spiritual experiences of St. Augustine, Gregory the Great, and St. Bernard. The author shows himself a little sceptical (if I may suggest such a thing of an eminent Benedictine) of the visions and auditions of some of the mystics; but as to the validity of the mystical experience he has no ultimate doubt. It is a perfectly fair and well-documented book, but it might with advantage have been considerably larger.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, November 16.

Armistice Day.

Armistice Day was observed in Cairo and Alexandria on a very extensive scale. In the capital a Memorial Service was held at All Saints' Church, where there was a large congregation, including the High Commissioner and Lady Allenby and the Sirdar. An address was given by Bishop Gwynne, and after the two minutes' silence had been kept, the Last Post was sounded outside the Church. A similar service was held at the Scotch Church of Saint Andrews, and the veterans of the French Army organised a ceremony at the Latin Cemetery, at which representatives of the British Italian, and Belgian communities were present. In the afternoon the High Commissioner unveiled the Cross of Sacrifice at the British Cemetery in Old Cairo. The ceremony took place in the presence of detachments from all the units of the British Force in Egypt and of the Royal Air Force and of the Ministers or Acting Ministers of the various Allied Powers. The Prime Minister and the Minister of War represented the Egyptian Government, and a deputation of the French veterans was also present. The service was conducted by Archdeacon Horan, who was assisted by the various military chaplains. The Rev. J. A. Finlay, pastor of the Scotch Church of Saint Andrews, delivered a stirring address based on the text, "What mean these stones," after which Lord Allenby performed the unveiling ceremony and Bishop Gwynne dedicated the Cross. The ceremony, which was deeply impressive, ended with the Last Post, Reveille, and the National Anthem.

At Alexandria an impressive service was held at the Military Cemetery at Hadra, where the programme was very similar to the one held in Cairo, and the service was conducted by the Rev. A. D. L. Enniss, Principal Chaplain to the Forces. Similar services were held at the Chatby Military Cemetery, where the Memorial Cross was unveiled by Col. Commandant W. G. Bracewhite, and dedicated by Rev. A. D. L. Enniss, and at Aboukir, where Air Commodore B. C. H. Drew, C.M.G., C.B.E., unveiled the Royal Air Force post-War memorial, which is in the shape of a Cenotaph.

The High Commissioner in Sinai.

Viscount Allenby left on Sunday morning on a short tour of inspection in Southern Sinai. He travelled by the coastguard cruiser Sollum from Suez to Tor, whence he started by camel for the interior. The High Commissioner, who is accompanied by Lieut.-Col. M. B. Delancey Forth, Commanding the Frontier District Camel Corps, will visit Mount Sinai and the celebrated Convent of Saint Katharine. His trip will last about a fortnight, and he is expected back in Cairo at the end of the month.

The "Peace" Delegations.

It seems fairly clear that the two delegations sent to Europe at the end of last month by the "Hisb El Watani" and the "Wafd El Masri" have now joined forces and will henceforward follow the same lines. It is expected that a similar fusion will shortly take place between the Executive Committees of the two parties in Egypt, but it remains to be seen whether the Zaghloulists will adopt the extreme demands of the Watanists, who refuse either to recognise any of the Anglo-Egyptian Agreements or to enter into any negotiation with Great Britain; or whether the united parties' future policy will be that of the Wafd El Masri, which is prepared to enter into negotiations provided that Zaghloul Pasha is the officially recognised representative. What makes this fusion interesting is the fact that the ex-Khedive is known to have been responsible for the recent activities of the Hisb El Watani, which is expected to support his claims; while it may be remembered that only recently a reconciliation took place between the Wafd El Masri and the Palace. What everyone is asking is: Does this fusion mean that the Zaghloulists will henceforward champion the ex-Khedive, or is the fusion merely opportunist, for the purpose of combating the common enemy, the present Cabinet?

The Khalifate.

With reference to the Khalifate question and what I wrote last week, it is very instructive to note that the vernacular Press has, during the past few days, completely ceased to comment on or publish articles in connection with the subject. This, coupled with the fact that a meeting which the Ulema proposed to hold in order to protest at the Angora decision was prevented by leading Egyptian Moslems, may be regarded as an indication that Egypt will take no action calculated to offend the Kemalists, to whom the country looks for the support of its claims at the Lausanne Conference.

Ophthalmia in Egypt.

The ophthalmological report published by Dr. A. F. MacCallan, Director of Ophthalmic Hospitals, contains many indications of the progress that has been made in the study and treatment of the eye disease which is so prevalent in this country. There are now no less than twenty special ophthalmic hospitals in Egypt, where ten years ago there were but eight. Each of the fourteen provinces has its own special hospital (one province has three, one of them a travelling one), while of the remaining four, which are travelling hospitals, three are large and completely equipped hospitals in which every ophthalmic operation can be performed. The whole staff is Egyptian under a British director, and during the past year no less than 113,000 new patients were treated, 65,000 operations were performed, and over 1,000,000 attendances of out-patients were recorded. How serious eye disease is in Egypt can be seen from the fact that over 12 per cent. of the patients examined during the year were found to be blind in one or both eyes. This figure, it is true, is an improvement on previous years, but it is still far too high, and the ophthalmic hospitals, which have done and are doing such good work in this respect, should receive every encouragement from the authorities in their efforts to combat, by educational and prophylactic means, the distressing scourge under which Egypt is suffering.

PALESTINE.

Jerusalem, November 12.

The Census.

In the end the taking of the Palestinian census passed off quietly; and it should not be long before the general totals are made public. The opposi-

Digitized by Google

tion of the Moslem-Christian Association was withdrawn at the last moment when the Government gave permission for heads of families to include in the returns the names of members of the family resident abroad. This is surely an innovation in census methods; but since it smoothed away an opposition which might have lessened the value of the census results, and the privilege of including absent friends had, of course, to be extended to Jew as well as Arab, and since the census officials may be expected to relegate absentees to a separate register—no harm need be done, and the Government may be said to have acted wisely; and the results should be fairly trustworthy as a working basis.

The Arabs and the Mandate.

With the General Election in England and the faint hope that the Palestinian policy may yet come up for reconsideration by Great Britain, together with the forthcoming Conference at Lausanne on the Near East situation, the Palestine delegation has come to life again, and is renewing its activities. This time it has joined forces with the delegation which sets out to voice the discontents of French Syria. The president of the Palestinian delegation is the same as before, Musa Kazim Pasha. It still holds to its maximum programme unchanged—the rescinding alike of the Balfour Declaration and the British Mandate. This is a pity for its own sake. The Arab cause does not lack a large body of sympathisers among the non-Arab Palestinians; but the solid results of Great Britain's administration here are becoming altogether too marked to be lightly cast aside. And to the onlooker it is actually the Arab rather than the Jew who seems to flourish most under British treatment. Such advantage as accrues to the Jew accrues purely by reason of the foreign Jewish capital that is being poured into the country. The Arab, on the other hand, is deriving, and will always stand to derive, advantage from both this Jewish money (since, after all, it is he mainly who is in command of the Palestinian raw commodity, in the shape of land, produce, and labour, which Jewish money seeks in exchange) and from the merits—and when all is said and done there *are* some—of British as contrasted with Turkish methods of administration. Take one example: Baedeker's Handbook, as regards routes, times, and means of travel, is now entirely antiquated. The Government has, out of the country's own revenue, produced a network—though not yet a particularly close network—of tolerable roads, and the Arabs have found themselves prosperous enough to find the cars to run on them. The result is that the tourist need no longer follow his Baedeker and trust in carriages and donkeys. What used to be a two-days' expedition is now accomplished in leisure between breakfast and lunch. (It is a most illuminating fact that one firm alone within a few months imported 142 "Fords," while more dignified-looking cars are rapidly increasing in numbers.) Also rents—and the landlords are almost without exception Arabs—remain high, and building activity among Arabs was surely never so feverish as at present. Seriously to talk now of a return to Turkish government is only a bad joke.

The "New Jerusalem."

Jerusalem last week found itself once again in possession of a daily paper in English, the *New Jerusalem*. Many months ago mention was made in these columns of a newcomer who wished to add "Christian Science" to the innumerable faiths represented in the Holy City. And this paper is the first result. Its "Christian Science" complexion has not so far been specially emphasised; a poem by Mrs. Mary Baker G. Eddy, which was considered appropriate enough to mark "Armistice Day," was included in yesterday's issue, and it is said that someone who wished to insert an advertisement relating to some hygienic article was turned away. Otherwise the editorial policy has been confined solely to what is, I believe, technically known in American journalistic circles as "uplift." In place of leaders on the political situation or things of current interest, we have been regaled, day by day, with a sermon of a mildly Christian character. Early in 1920 we had a daily paper in English, or, more accurately, American; but that did not survive many issues. We hope this may have a longer life. Its news service seems to be fairly good, and hitherto we have been solely dependent for our daily news on the Egyptian papers and a small handsheet giving a few cables from England, which the local English weekly paper, the *Palestine Weekly*, has been distributing gratis to its subscribers. The *New Jerusalem* is ambitiously setting out to publish itself daily not only in English, but also in Arabic and Hebrew. There has been mild trouble with the Hebrew section of the staff of translators and printers, who jibbed at taking any part in a paper with an obvious missionary tendency.

The End of a Hebrew Journal.

One of the two Hebrew daily papers, *Ha-Aretz*, quietly succumbed last week owing to lack of funds. This daily had never been a financial success, and could never have hoped to cope successfully with its rival daily Hebrew paper, the *Doar ha-Yom*. *Ha-Aretz* had always a foreign colour, while its contemporary centred its efforts on the interests of Palestinian Jews as Palestinians, and was managed by a group of young Palestine-born Jews, and always preserved a strong pro-English and pro-Administration policy, cultivating at the

same time the exuberant and "stunt" side of journalism. *Ha-Aretz* never got far away, whether in spirit or in its news supply, from Russia and East Europe, the place of origin of its editors and its narrowing circle of supporters. It could never break itself of the habit of feeling oppressed, and tended to look upon the British Administration and British officials with the same suspicious and hunted-looking eyes with which it once looked upon the Tsarist Government and Tsarist officials —with the exception that in Palestine it had a greater liberty of expression. It could never raise a sympathetic understanding for the difficulties of the Government, while at one time it even saw fit to dub the Palestine-born Jews who ran and supported the rival daily "Levantines"!

IRAQ.

Baghdad, November 11.

Iraq and Angora.

Turkey, Mosul, the Khalifate, these are the sole topics of conversation in Iraq at the moment, except in Basrah, where the heavy fall in the price of dates is causing great disappointment. The Mudania agreement, which had shown the Angora Government in a reasonable mood, had been well received in this country, and hopes were entertained that a more liberal outlook on the part of Great Britain and an attitude of moderation on the part of Angora would speedily produce a genuine and lasting settlement in the Near and Middle East, which would enable both Turkey and the young States which, like Iraq, have been carved out of the Ottoman Empire to settle down to progress and a stable administration within definitely demarcated boundaries.

Recently, however, the intransigence of the Angora Government has made the politicians in this country anxious, and the demand for the alteration of the boundaries of Iraq has been taken to mean that the Turks are asking for the return to them of the Mosul vilayet down to the present railhead at Shergat. This has seriously disturbed them, and the local Press is full of fulminations against the haughtiness of the Turkish demands, together with long explanations of the vital necessity both to Mosul and to Iraq that the one should be included within the boundaries of the other. In particular, stress is laid on the economic importance to Iraq of the oil deposits which are known to exist in the Mosul vilayet, and it is pointed out that the Iraq Government depends very largely on the royalties it hopes to obtain from the working of these deposits in order to provide it with funds to enable it to put in hand schemes of development in the future.

Turkish Propaganda.

Turkish propagandists are active here, and the Arabs have been slow in taking steps to counteract their work, but the Hizb ul Hurr has now commenced the publication of its official party paper, the *Asimah*, and is now showing greater activity both in the matter of the elections—of which nothing is ever heard now—and, especially, in the matter of engaging in counter-propaganda. A new party is in the course of formation, whose main object is the organisation of a counter-offensive. The Kemalists have, however, seriously compromised their chance of obtaining any considerable amount of support in this country by the action they have taken in deposing the Sultan, and declaring that the Khalifate shall be elective instead of hereditary. That action has met with serious opposition from the Sunnis, and the *Asimah*, in the course of a leading article on the subject, traces in it the hand of the Bolshevist, and declares that while the Turks are free to take any form of government they like, whether Bolshevist or any other, yet if they claim to be upholding the interests of Islam they cannot knock down the main support of the Faith. If they do so, they must break off all intercourse with the other Moslem people, for they will never stand by and see the Khalifate used as a tool to further the ends of Lenin and Trotsky.

General News.

A good deal of interest is now being taken in the elections at home, as it is felt that the future of Iraq depends almost entirely on the policy which the new Government adopts towards it. The speeches of the party leaders are eagerly scanned to see if they give any hint of their intentions in this respect.

Jaafar Pasha el Askari Minister of Defence, has been appointed representative of the Iraq Government in London and at the Lausanne Conference, and left Baghdad by air a day or two ago. He is accompanied by Taufiq Bey es Suwaidi as Secretary.

Haji Muhsin ash Shallash, Minister of Education, has resigned for business reasons, and no successor has yet been appointed.

Saiyid Taha, who has for some time been Simko's right-hand man, has been permitted to come to Baghdad to see the High Commissioner. There is also in Baghdad at the moment a delegation from Sulaimaniyah, which has come to discuss with the High Commissioner the future of Kurdistan. It is looked upon very unfavourably by the Arabs, who do not realise that self-determination has both a subjective and an objective signification.

TURKEY.

Constantinople, November 16.

Accomplished Facts.

Outwardly there has been little change in the situation during the past week, but it would be a mistake to assume that the absence of any further demands on the part of the Angora Government is an indication of a change of policy. Rafet Pasha, it is true, recently informed the correspondent of *Le Petit Parisien* that the Angora Government's Note of November 5 merely requested the evacuation of the city, but that this was not imposed, and it should have been understood that the Allies were only asked to withdraw their forces if convenient to them. Rafet Pasha also stated that the conditions of the Mudania Convention would be respected. Already, however, a number of those conditions have been broken by a series of "accomplished facts," the achievement of which appears to be the essential factor of the Angora Government's foreign policy. Not only have military posts been established within the so-called neutral zone of the Ismidt Peninsula, but the installation of Rafet Pasha as Acting-Governor of Constantinople has been followed by the arrival of considerable numbers of officers in the capital, and it is common knowledge that a force has been assembled within the city strong enough to take over complete control the moment an advance is commenced from Ismidt. The official statements published in the British Press concerning agreement between the three Powers whose forces are in occupation deceived no one acquainted with the facts, for when the question of proclaiming a state of siege arose it became once again obvious that Great Britain was isolated, and no action was possible. Hence Rafet Pasha's statements and the apparent inactivity of the Angora Government indicate no change of policy, but merely a temporary change of tactics. Ismet Pasha

Digitized by Google

himself indicated as much in the opening words of a speech made just before the departure of the Turkish delegation on November 9. "Let us learn," he exclaimed, "to attach more importance to acts than to words. We have much more to do yet in the accomplishment of our salutary task in the interests of the country." Ismet Pasha has not the rhetorical gifts of Mustapha Kemal Pasha, but he has amply demonstrated the superior value of acts over words by driving the Greeks out of Anatolia almost immediately after Mr. Lloyd George had declared that they should remain. Ismet Pasha, in the course of the same speech, expressed a firm hope that no difficulties would be encountered in securing the acceptance of Turkish claims which included nothing beyond the natural and legitimate rights of a people. If, nevertheless, difficulties should arise, there is every indication of acts being substituted for words by the Angora Government, and in the circumstances it is difficult to conceive any possible obstacle which might render those acts inefficacious. The British Forces of Occupation alone certainly could not prevent the Turkish army from occupying Constantinople within a very short period, and since the French and Italians are resolved not to take action, Ismet Pasha's hope concerning the absence of difficulties appears to be well grounded.

The Christians of Constantinople.

In view of the probability that the Kemalist army will be substituted very shortly for the Allied Forces of Occupation in Constantinople, the European Powers should at all events discover one point of genuine agreement in connection with the urgent necessity of securing for the Christian population of the capital some hope of a reprieve from the immediate extermination with which they will be threatened. A hasty evacuation will inevitably be accompanied by an uncontrollable panic on the part of the non-Moslem population, and the arrival of the Kemalist army will certainly be succeeded by the "regrettable disorders" only too characteristic of Balkan history. Surely there have been enough bloodshed and outrage in Turkey during the last four years since the end of the War which was itself to end war. If the Powers could achieve just this one object, they may be able to defend themselves of the charge of being indifferent to all considerations of humanity.

The Khalifate.

Last week it was freely reported that the Sultan had taken refuge in a British battleship, but the presence of the Sultan at the ceremony of the Selamlik on Friday conclusively disproved these rumours. The Sovereign, if one may still use the term, was saluted by his guards, but for the first time in the history of the Osmanlis as Sultans there was no cry of "Padishahim chok yasha!" At the midday prayer, also, the "Kutbeh" was read in the name of the Khalif alone, and the name of the Sultan was not mentioned.

The election of a new Khalif by the Great National Assembly has apparently been postponed, but the reasons for this postponement are not yet known. Zulfi Bey, Deputy for Diarbekir, informed a representative of the *Vakit* last week that he thought it was because "in the opinion of the Great National Assembly the Khalifate is not in possession of the liberty requisite for its functions on account of the maintenance of the occupation of Constantinople," and that the election would take place when the Khalifate obtained complete independence, which was one of the clauses of the National Pact.

In the same connection the following statements made by Riza Nur Bey to a representative of the *Aksham* on November 7 are of considerable interest:—

> "The Khalifate is attributed to the authority which is capable of holding and preserving it. The influence of the Khalif is exercised over the entire Moslem world. The mission of the Khalif is to protect the Moslem world, and lead it to prosperity. The Khalifs have always held themselves apart from the civil administration. Consider the periods when the Khalifate and Sultanate were identified with the same individual and when this was not the case, and tell me during which of these two periods was the welfare of the Moslem world better ensured. Anatolia has had enough of personal sovereignty. This is the general sentiment of the population of Anatolia. It is certain that the temporal and spiritual affairs of a people cannot be amalgamated, and the welfare of the Moslem world lies in the separation of these two factors. The Great National Assembly only desires to enhance the prestige of the Khalifate. For twelve centuries the Turks have been in the forefront of the Moslem world, and they have freely shed their blood in its defence. No other nation in the whole world can with as much right pretend to the guardianship of the Khalifate."

GREECE.

Athens, November 18.

The British Minister's Note.

A Note was handed in to the Greek Government last Wednesday by the British Minister in Athens, the Hon. F. O. Lindley, urging it to exercise all possible leniency in the trial of the ex-Ministers who are accused of high treason. The Note goes on to say that Great Britain would view with much displeasure the application of extreme measures against the prisoners, and points out that, if these be deported from Greece after their trial, sufficient guarantees might be secured that they would never return to this country.

Up to the time of writing the Government has not replied to the British Note. This is probably due to differences of opinion between the Cabinet and the Revolutionary Committee. It is believed that the majority of the members of the former, among whom are M. Politis and M. Zaimis, is favourably disposed towards the British suggestion; the latter, however, pressed hard by the extremist officers of the National Defence and the irreconcilable Venizelists, do not favour its acceptance, and demand that the verdict of the Court-Martial, whatever its nature, be carried out in full.

It is generally thought that the Revolutionary

Committee will ultimately yield to the more moderate views of the Government.

Shortage of Bread.

There has been a serious shortage of bread in the whole of Greece during the last ten days. In Athens long queues are waiting outside the bakeries from the early hours of the morning trying—very often in vain—to secure a small brown loaf. Bread has hitherto been plentiful in this country, and the Government is now getting all the blame for the shortage, which is, naturally, causing a great deal of dissatisfaction, and strengthens considerably the propaganda carried out by those who are unfavourably disposed towards the revolutionary movement. The Government, however, maintains that the shortage is due to gross negligence on the part of its predecessor in failing to order sufficient wheat from abroad, and points out that a few more weeks will elapse before the public will be able to realise what the present Government has done to meet the needs of the country, as far as foodstuffs are concerned. The acting Premier, M. Krokidas, and the Ministers of Supplies and Finance, have conferred with the Governor of the National Bank with a view to arranging for the placing of a sum of foreign exchange at the disposal of the Government for the purchase of foodstuffs.

The Trial.

The trial of the first group of politicians, as well as of the ex-Commander-in-Chief of the Greek Army in Asia Minor, General George Hadjianestis, who are considered responsible for the recent national disasters, and are accused of high treason, commenced last Monday morning in the Parliament House. Contrary to expectations, and despite the fact that all admittance tickets for the trial had been disposed of during the previous week, there were comparatively few people present when the President of the Court-Martial, Brigadier-General Othonaios, and the eleven members took their seats. This was probably due to the early hour at which the trial commenced and the bitterly cold weather prevailing at the time.

The prisoners, with the exception of M. Stratos and General Hadjianestis, who was apparently in the best of spirits, looked pale and haggard. M. Gounaris looked positively ill. This did not prevent him, however, from making a brilliant, but futile, speech in favour of the postponement of the trial on the grounds that he and his comrades had the right, according to the Greek law, to be tried by ordinary Courts and not by Court-Martial. This view was very eloquently supported by M. Stratos, but the Court, after withdrawing for three-quarters of an hour to consider the matter, dismissed that and certain other objections raised by the defence. Whilst M. Gounaris was speaking—he was at the time saying something about the liberties of the people—a young artillery Major sitting in the box reserved for the officers suddenly sprang up and shouted at the top of his voice that he (M. Gounaris) had no right to talk on such a subject, as it was he who had abolished the liberties of the people. But the unfortunate Major was destined to pay dearly for this indignant outburst. General Othonaios, asking M. Gounaris to sit down, ordered the disturber to appear before the Court, which very calmly informed him that he would have to go to prison for a fortnight.

The trial continued throughout the week, and practically all the witnesses have already given evidence. The defence and the Revolutionary Prosecutors are in for a busy time next week, and the accused will probably know their fate within the next few days.

Miscellaneous News.

Colonel Alexandrou, ex-Gounarist Deputy for Salonika, has been arrested by order of the Revolutionary Committee.

A case of cholera, also a case of plague, are reported among the Asia Minor refugees now in Athens.

About ten thousand refugees from Mersina and Adalia will arrive at the Piræus early next week. The orphan children from the Pontus whose parents were exterminated by the Kemalists are not expected here until the end of the month (O.S.).

The Minister of Supplies has received a telegram from New York to the effect that the American Red Cross are sending 5,000 tons of flour for the refugees.

BULGARIA.

Sofia, November 23.

Balkan Events.

The entire Press and, indeed, the majority of Bulgarians are following with intense interest the trend of events in Turkey. Bulgaria has always been interested in what occurs in Constantinople, but just at present she is especially concerned in the relations between Allies and Kemalists. Well-informed circles consider that the foreign policy of Bulgaria towards Turkey may shortly be forced into becoming either definitely "pro" or "anti." If things come to the worst, and Great Britain finds herself at war with the Kemalists, there is a strong possibility that several of, if not all, the Balkan countries will become involved. Bulgaria would not wish to participate in another war unless she felt absolutely certain that she was on the winning side. Her previous adventures have cost her so dearly that she will be distinctly wary of risking yet another defeat. Still, if one looks a little way ahead, one does see a possibility of Bulgaria's being obliged to take a hand either for or against the Turks. Russian influence is being used, and will be used, in order to encourage Bulgaria towards a better understanding with Turkey. The influence of the Great Powers has, naturally enough, not been used at all for the present. But, if matters become more serious, it is believed that the Allies, and more especially Britain, will be anxious to know what Bulgaria's attitude would be if war once more broke out in the Near East.

Certainly Bulgaria's neighbours are even now keeping an attentive eye on the doings of M. Stambolisky's Cabinet. Roumania is inclined to friendliness with Bulgaria, Yugoslavia is holding herself aloof, whilst the new Greek Cabinet has not adopted a definite policy towards Bulgaria. The Greeks as a whole have done nothing but revile Bulgaria for the last two years, and it will be thus somewhat difficult for them entirely to change their front. Nevertheless events move quickly in the Balkans, and there are indications, very faint for the moment, that Greece is beginning to realise that Bulgaria is not an altogether hostile neighbour.

As far as can be gathered, M. Stambolisky and his Cabinet are quite free from any foreign obligations. They are perhaps influenced by certain material considerations which European Powers hold out to them, but in general it may be said that Bulgaria is "unattached." The situation is thus full of interesting possibilities. If the trouble between the Kemalists and the Allies is satisfactorily settled, Bulgaria, paradoxical though it may seem, is likely to find herself in a weaker external position than she otherwise would be. For this

Digitized by Google

reason, Bulgaria, whilst not in the least desiring to go to war, is a vitally interested spectator of the Constantinople crisis.

The Referendum.

The Referendum is over, but, if the truth were told, it is doubtful whether 5 per cent. of the population know the real result. This letter is written more than three days after the actual Referendum day, but it has been practically impossible to obtain definite figures regarding the total number of votes polled.

One thing is, however, certain, and that is that the majority of the former bourgeois Ministers have been condemned. Estimates greatly vary as to the proportion of votes in favour of condemnation. For instance, the Government state that between 75 and 85 per cent. of the total population voted in favour of condemnation. On the other hand, the bourgeois claim that at the very most 60 per cent. of the votes were cast against their Ministers. As far as can be judged, the proportion in favour of condemnation was approximately two-thirds.

The question which is now on everybody's lips is what the Government proposes to do with the former Ministers. The latter have been convicted by the people, and will presumably be tried. There are various surmises regarding the punishment they are likely to receive, and a view which is held by a large number of people is that they are all to be expelled from Bulgaria for a certain number of years. Few people think that the Government will be magnanimous and pardon their political opponents. Some people think that they will all receive long sentences of imprisonment. It is expected that the Ministers will be arraigned before a special Court of Justice at the end of the year. It is understood that this Court will be empowered to deal much more quickly and summarily than has been the case with the High Court that is trying Dr. Radoslavoff's Liberal Cabinet.

Reparations.

Although there is absolutely no confirmation from official circles, it has been freely stated in Sofia this week that a joint Note is about to be transmitted by the Allied Powers to Bulgaria. This Note is believed to refer solely to Reparations. It is couched in strong language, and invites Bulgaria without delay to formulate effective reasons for her non-payment to date of Reparations. The Note goes on to say that, unless Bulgaria renders satisfactory explanations and shows a better spirit towards the demands of the Inter-Allied Commission, the Allies may be forced to take certain repressive measures.

In view of the seriousness of the matter, it is necessary to state once more that there is no official confirmation of such a Note having been either sent or received. Sources usually well informed are inclined, however, to give credence to the statement. In a few days one will be able to ascertain whether such a Note exists or whether the imagination of certain interested parties has let itself run loose.

YUGOSLAVIA.

Liubliana, November 16.

The Croatian Deputies and Belgrade.

As everybody knows, the only Croatian deputies who have so far attended Parliament are those belonging to the Democratic, Clerical, and Social Democrat Parties. To these must be added Dr. Trumbitch. But the bulk of the Croatian deputies prefer to shine by their absence. Officially, this non-appearance of the Croatian deputies was meant to serve as a protest against the "centralistic" Constitution; in fact, however, they were swayed largely by other considerations. The Croatian *bloc* did attend the sittings until the passing of the Vidovdan Constitution, as it is called (from Vidovdan, *i.e.*, Kossovo Day, the Serbian national holiday, now a general holiday throughout Yugoslavia), and, as regards this event, it may safely be assumed that their absence does really represent a protest. The Frank Party, however, stayed at home mainly out of hostility towards the Serbs, having not yet shaken off the old Austro-Hungarian mentality. But the Raditch group remained in Zagreb largely because of Raditch's fear that the astute Belgrade politicians would entice away some of his followers. Besides this, the Croatian deputies acted on the assumption that the effect of their policy of abstention would be so serious that the Belgrade Government would be compelled to climb down and come to terms with them. In this belief they were strengthened by the attitude of several Serbian politicians, notably Stoyan Protitch, who repeatedly declared that there could be no improvement in the general situation without an agreement with the Croats. They also took for granted that the present Coalition between Radicals and Democrats was doomed, and a rupture imminent. Raditch himself counted strongly upon support from the Western Powers in the hope that they would take a hand in the internal settlement of the young kingdom.

Effects of the Abstention Policy.

All these calculations proved fallacious. The Coalition is still in being. Europe cannot be troubled with Raditch and his republic "without police and without clergy"; and the consolidation of the State makes progress in spite of the passive policy of the Croatian *bloc*. Like every policy of negation, that of the Croats, too, has ended by coming to grief. The Croatian people got tired of fine words and called for deeds. Moreover, the policy of abstention had produced a very adverse effect upon economic conditions in Croatia. The American Loan was concluded, and Croatia was left out in the cold, while eight Slovene Peasant deputies secured three railway lines for Slovenia out of the loan. And Croatia is very heavily taxed. According to the Budget of 1922-23, Croatia's State revenue has increased by more than 260 million dinars, while State expenditure upon Croatia has been cut down by an almost equal amount. The Opposition is in any case apt to come off badly, and as Croatia was not represented at the Government table she was always overlooked. The Croatian people gradually woke up to this fact, and the policy of passivity was criticised. The upshot of it was that open dissension broke out in Raditch's Party—by far the strongest in Croatia—and soon afterwards the first swallow—Deputy Häusler—winged his way to Belgrade. The ice was broken. Häusler's action was generally approved, and did not remain ineffective. Then the Zagreb Congress of Public Workers proved that among the Serbian deputies themselves there exists a strong trend in favour of conciliation. But it is only in Belgrade that an agreement can be concluded, and hence it was becoming a matter of urgency for the Croatian deputies to put in an appearance there. This step also would seem to open up a possibility of defeating the present Government, because, although the latter would command a big majority in Parliament even were the Croats to come in, yet this majority is dependent upon the continuance of the Coalition. So far the Coalition has successfully weathered all storms—mainly because there was no workable alternative. The arrival of the Croats

Digitized by Google

in Belgrade, however, means new possibilities, and herein lies the great significance of this move.

Political Currents.

In the Radical Party, as well as in the Democratic, there are two currents. In the Democratic Party there is the struggle between Pribitchevitch and Davidovitch; in the Radical Party between Pashitch and Protitch. If it should prove possible to split up either of these parties, then a Government by-election would be a foregone conclusion. But if this idea does not appeal to the *bloc*, then Pashitch and Pribitchevitch will continue masters of the situation. In the matter of strong personalities the present Government is certainly better off than the Opposition, which is strong only in ideals. Apart from this, the Opposition has in the past repeatedly made grave tactical mistakes. But now it would seem that the Opposition has learned by experience, since the latest declaration of the Croatian *bloc* is such that the entry of the Croatian deputies may easily lead to a great success. The declaration says that for the moment the Croatian question shall be left in abeyance. The deputies merely stipulate that in the meantime nothing shall be enacted whereby Croatia will be affected. They will even consent that the Government should remain—only several individuals must go. In short, they want a Concentration Government, and after that a General Election. At the same time it cannot be denied that it is just the strongest members of the present Government who would be excluded from a Concentration Government. Naturally, they are not in the least inclined to go, and, in view of the general position abroad, that master of tactics, the astute Pashitch, may very well gain one more victory. In any case, it is too early to prophesy.

PRESS ON THE NEAR EAST.

Economy in Iraq.

As the *Manchester Guardian* of November 27 remarks, the official Liberal amendment to the Address on the subject of Iraq will give little satisfaction to those who would retire to Basrah. It continues, in reference to this amendment:—

> It declares for a policy involving "the curtailment of existing and the avoidance of all further expenditure." And so say all of us, including, of course, the Government. But the amendment does not say that the desired economies are to be effected by throwing up the mandate and evacuating Iraq. It only insists on the economies, and leaves the Government to explain how they are to be achieved. The Government will probably explain, and quite accurately, that the reduction of present expenditure and the avoidance of expenditure in the future are questions which have a different basis. Present expenditure is about eight millions a year, which is to come down to four. It may be possible, with luck, to reduce it further. Future expenditure depends on the course of events, and will be governed by our responsibilities under the recent treaty. Put briefly, we have set up a native Government in Iraq and have undertaken to keep it going with reasonable financial assistance, and to keep it alive, if necessary, with military assistance against its enemies. If there is another revolt, if the Turks stir up trouble, we shall be called on to restore order, and that means money. If anyone objects that we cannot afford a responsibility of this kind—a very reasonable view—he must answer the question whether or not he would withdraw entirely and leave Iraq to its own devices north of Basrah. You may say, "Can we afford to stay in Iraq?" and answer with "Can we afford not to stay there?" If we evacuated, the first result would be that the Turks would come back, the Arabs would go under, and our attempt to establish a self-governing State, with its centre at Baghdad, would be wiped out. At the same time would disappear whatever prospect there may be of eventually reviving in Iraq the marvellous prosperity which was destroyed by the invasion of the Mongols. This is a part of our "civilising mission" which private enterprise will never take a hand in unless the British Government is on the spot to guarantee stability. The return of the Turks, however, would be felt far away from Iraq itself. It would have its reactions in Syria, and if in Syria then in Palestine, and what touches Palestine affects our position on the Suez Canal and communications with the East.

Turkey and Great Britain.

The *Morning Post* of November 27, in an article called "Turkey at the Cross Roads," says that the friendship of Turkey must be one of the main aims of British foreign policy. The situation at home now being favourable to Turkey, it continues:—

> It is now up to the Kemalists to reciprocate. There have been anxious moments since the Mudania convention, particularly at Constantinople, but the latest despatches from Lausanne go to show that the Turkish delegation is behaving with circumspection and moderation. It is too early yet to say that the way to a complete understanding is clear, and . . . . we venture to draw the attention of the Turkish Government to the two following considerations. In the first place, Turkey cannot live by herself alone. She has been sorely tried by a series of wars, and sooner or later she must face the hard task of reconstruction. Russia, under her new masters, has tried to live alone. And what have been the results?—a relapse into barbarism, a savage struggle for mere existence, and the growth of a discontent against the new Government on the part of the governed, which only starvation and brutality have held in check. With the example of Russia before her, the new Turkish Government must look for assistance abroad. And that brings us to our second point. We are told by Viscount Grey and Signor Mussolini that the new Turkey is turning to Germany and Russia. What did those two countries do for the old Turkey? Germany bullied and betrayed her unfortunate ally, and if Kemal has had a hard struggle, he must remember that that fight would never have been necessary if the King of Prussia had not made Enver and Talaat his servants. Turkey has had one bitter experience of Germany. Does she seek another? And as for Russia, the lessons of history and geography alike cry out against so unnatural an alliance. The future of Turkey depends upon co-operation with the West, not upon what is tantamount to a servitude to two countries which live only on hopes of a *revanche*. France, Italy, and Great Britain are gradually drawing together again. Under their inspiration, the Balkan States and the smaller countries of Central Europe are joining hands. Can Turkey afford to remain outside so powerful a co-partnership movement?

THE LEAGUE OF NATIONS.

"THE SECOND YEAR OF THE LEAGUE." A Study of the Second Assembly of the League of Nations. By Harold W. V. Temperley. (London: Hutchinson and Co.)

The third Assembly of the League recently completed its labours. The story of the League during the past year has been one of steady, though not dramatic, progress. A great deal of work, which could not have been performed at all, or could not have been performed so efficiently by any other body, has been accomplished. No unprejudiced person could peruse the table of contents of the report on the League's activities without becoming, as Mr. Balfour has said, a convinced and lifelong supporter of the League's work.

The bigger problems which have confronted this year's Assembly have, however, been only two, namely, the Austrian question and disarmament—and the test of the League's capacity to handle these questions will come next year. The League is proceeding very cautiously—quite rightly so—in regard to disarmament, and it will take some time before there is any chance of its scheme materialising. The caution and tact displayed, however, give the unprejudiced person considerable hope of ultimate success. Then, regarding Austria, the League has been able to put forward a scheme which is both practicable and acceptable to Austria and the Great Powers. If the only permanent solution of the Austrian problem depends on permission being accorded Austria to join with Germany, it looks as if the scheme put forward by the League will, at any rate, bridge over the transition period between now and the time when the claim of Austria to join Germany will have become irresistible.

Soon, therefore, we shall witness an important test of the League's power, particularly as there are indications that the question of reparations and Inter-Allied debts may be referred to it. The idea has been favourably received in wide circles in France, which is remarkable evidence of the growth of confidence in the League during the past year. This growth of confidence may be attributed directly to the great success with which the League dealt with a number of problems of first-class international gravity during its second year. This year, in fact, furnished the first convincing proofs of the League's vitality, and for this reason, no doubt, Mr. Temperley thought well to make a special study of it.

The five chief problems dealt with during this important year were the establishment of the Court of Permanent International Justice (a great advance on the old Hague Court of Permanent Arbitration, as it holds out the prospect of building up a universally accepted code of international law), the dispute between Lithuania and Poland, the Upper Silesian award, the settlement of the Aaland Islands dispute, and the settlement of the Albanian question.

Although the dispute between Lithuania and Poland cannot be said to have been settled by the League, its action has, at any rate, put an end to fighting, and, by bringing public opinion to bear on the subject, has made resort to further fighting less probable. The Upper Silesian award, on the other hand, has brought peace to a troubled region, and has solved a problem which was found incapable of solution by the ordinary channels of diplomacy, thereby removing a dangerous cause of friction between the Allies. Lastly, the settlement of the Aaland Islands and Albanian questions may quite definitely be said to have prevented two wars.

The League was not asked to adjudicate on the question of Albania's frontiers, and unfortunately it was quite out of the question to give Albania her natural geographical frontier, the granting of which would have brought a condition of stable equilibrium into being between Albania and Yugoslavia. It is to be hoped that one day Yugoslavia will have the good sense, in exchange for security and commercial advantages, to grant Albania this frontier. Meantime the frontiers determined on by the Council of Ambassadors will, we hope, be loyally accepted. They are the 1913 frontiers (to which Yugoslavia and Greece alone had an undisputed juridical title), with a few modifications introduced mostly at the expense of Albania. The result is a less ridiculous frontier than that of 1913, though the two main objections to the 1913 frontier have not been remedied, namely, the Maltsori group of Albanian tribes north of Lake Scutari remains divided between Yugoslavia and their parent country—a matter which is bound to lead to sporadic local fighting from time to time—and the countryside of Eastern Albania remains deprived of any market town. This in spite of the fact that the four large towns over the border have an overwhelming population of Albanians.

It is difficult to follow Mr. Temperley's reasoning when he argues that it was impossible to do better for Albania. The mere fact that the Lim area was indeed accorded to Albania, although beyond the 1913 frontiers, shows that it was possible to bring about an adjustment to the 1913 frontiers both ways. No doubt Yugoslavia in her present temper would have enforced her right to object to any considerable modifications in favour of Albania, but, on the other hand, she would probably have been ready to give away a little more than Lim for the sake of obtaining the concessions in front of Prizrend and the road between Dibra and Struga, which she considered matters of vital importance. Though she might not have been prepared to give up Jakova, the Albanian town over the frontier of least importance to her and of the greatest importance as a market centre for Eastern Albania, she might have been pressed to remedy the cruel division of the Maltsori tribal group. Mr. Temperley justifies the frontier here on the ground that it makes it difficult for either side to attack Podgoritza or Scutari respectively, and quotes the Albanian tribal attack in 1920 on Podgoritza as justification for a stronger frontier in favour of Yugoslavia. He forgets, however, that the only reason for this attack was the attempt of the divided tribesmen to join up and enforce their union. There is no desire on the part of Albania to possess Podgoritza, and in the event of war between Albania and Yugoslavia aggression in this direction by Albanian troops would bring no military results.

At the third Assembly of the League recently M. Frasheri declared that the remarkable progress of his country was due in large measure to the benevolent assistance and good counsels of the League of Nations. Nothing could be nearer the truth. It was the admission of Albania to the League of Nations which forced the Supreme Council in 1922 to tackle the Albanian question seriously. It was taken up by the Council of Ambassadors, and after this body had announced their decision regarding the frontiers, it was again the League which prevented Yugoslavia from attempting by force of arms to hinder the decision being carried out. Indirectly this was due to the action of Great Britain, who, when news arrived of the Yugoslav aggression, summoned the Council of the League to deal with the matter in accordance with provi-

Digitized by Google

sions of the Covenant. Yugoslavia was unable to oppose the League's authority, and a peaceful accommodation was brought about under the supervision of a Commission appointed by the League.

Mr. Temperley tells the story with admirable clearness and impartiality. The retention of Argyrocastro by Albania appears to worry him a little, as he appears unconvinced regarding the real weakness of the Albanian Grecophil section of the population of this district (the racial Greek element is, of course, known to be insignificant). Perhaps one day he will have time to make a journey through that delightful countryside. Meanwhile I hope this book will find many readers. It is the very best propaganda for the League, for it contains no special pleading. It is all sober fact—a well-materialised statement of the League's achievements which no enemy can have the face to write down. J. S. BARNES.

KIPLING'S PROSE.

"A KIPLING ANTHOLOGY: Prose." (London: Macmillan and Co. 6s. net.)

It has been said that it would be difficult to make an uninteresting Kipling anthology, and probably the saying is a true one. But it is quite certain that to make a Kipling anthology at all can have been no easy matter: amid such a wealth of material, the task of selection must have been a hard one indeed. However, the editor of this attractive little volume has accomplished it satisfactorily; and though ardent Kiplingites may be disappointed to find one or two of their own pet passages omitted, they will, upon the whole, accord the newcomer an honourable place on their bookshelves. The titles of the sections into which the book is divided are: East of Suez, Further East, Adventure, Humanities, Service, Reflections, Fellow Creations, and England. If we had to do without any one of these, it would be the second, but in fact we prefer not to part with any of them; and we feel that the small book is going to become a very good companion and friend, helping us to enjoy Mr. Kipling even more than we did before, and tempting us to read him all over again.

TRAVELS IN TOWN.

"THE LONDON SPY." By Thomas Burke. (London: Thornton Butterworth. 7s. 6d. net.)

This latest book of Mr. Thomas Burke, whose reputation as a Cockney writer is now firmly established, is in effect at once an illustration and a glorification of the "Let's all go down the Strand! ('Ave a banana!)" spirit. He loves his London with the intense Cockney love, is jealous of its privileges, is proud of its monopolies. There are few of its secrets which he has not probed. He will take you to the Marlborough and the Athenæum, to the "House" and to Claridge's, or to the London Docks and to Canning Town, to the Highgate taverns and to Barnet Fair. His book is the queerest medley of impression, indignation, information, and imagination. Look, for instance, with what unease he describes the pleasures of the rich, with what passion he expands on the iniquities of our present reformatory system, with what delight he tells where meals both cheap and in convenient company may still be had, and with what sincerity he "pitches his tent under the walls of Teheran or Kabul" by visiting Poplar and the Asiatics' home. These sketches contain excellent things, and are extremely readable. But we are not sure whether Mr. Burke's pen has not become too facile. That he has a genuine gift for description is undeniable, but he does not too carefully sift his "copy." Some of the things he describes are fit though quite improper parts of experience, but they are more aptly the subject of rich, full talk. So much that in the thick and jolly atmosphere of tobacco and men is listened to eagerly enough comes out rather coldly and thin in print. And we also feel that the sentimentality of the Cockney, realistically as it is portrayed, can be overdone in a book. In journalism—and Mr. Burke is a very able journalist—it plays an important, and possibly an indispensable, part; but we still hope that the author will eschew it, and give us something of bigger scope. The step that will move him on from being good company to a good companion is not too far.

INGENUI VULTUS PUER.

"A TRIP TO OOTACAMUND." By A. K. Sett. (Bangalore Press. Rs. 2)

In sending us this booklet for review, the author lays stress on the fact that he wrote it at the age of sixteen. It is, in fact, a somewhat juvenile production, naive and occasionally obvious, but it gives promise of some descriptive ability, and is marked by the great virtue of sincerity. Nothing in it will be new to readers familiar with Bangalore and Ooty; strangers may obtain from it an idea of the general appearance of those resorts.

THE DESERT AGAIN.

"A DAUGHTER OF ALLAH." By Cecil H. Bullivant. (London: Jarrolds 2s. net.)

Diana Holford married Hubert Malin, and subsequently went through some bloodcurdling experiences when he was led to his death in a haunted ruin in the desert by his former Arab love. David Ross married Esmé Codrington because her father had died in saving David's life and she seemed lonely and helpless. Presently she went off to South America with another man, and then David married Diana. There was no very apparent reason why he should not have done so in the second chapter and have saved us an addition to the great number of indifferent novels which deal with such an astonishing sameness with the colourfulness of Cairo and the "atmosphere" of the desert.

BOOKS RECEIVED.

"Montenegro: The Crime of the Peace Conference." By Whitney Warren. (New York: Brentano's, 16, East 47th Street.)

PERSONAL AND GENERAL.

TO-DAY.

November 30 (New Style).
November 17 (Old Style).
Rabia II., 11, 1341 A.H. of the Moslem Calendar.
Kislev 10, 5683 of the Jewish Calendar.

Sir Robert and Lady Drummond-Hay have left for Port Said.

Sir Harry and Lady Lamb have come to England for a few weeks from Smyrna.

Mrs. L. S. Cobham has returned to 14, Hans Crescent, S.W., from Constantinople.

The latest reports of Mr. Rudyard Kipling's convalescence are extremely satisfactory.

Commander George Panas, C.M.G., has been appointed Naval Attaché to the Greek Legation.

The retirement is announced of General Sir James Willcocks, G.C.B., G.C.M.G., K.C.S.I., D.S.O.

The Right Hon. E. S. Montagu, ex-Secretary of State for India, has returned to town from Paris.

Prince and Princess Antoine Bibesco left Southampton last week in the s.s. Aquitania for New York.

Mr. and Mrs. Gerald Beddington have sailed for India. They expect to be back in England at Easter.

Sir Charles and Lady Armstrong left London last week in the P. and O. steamer Macedonia for Bombay.

Major-General Sir Theodore Fraser, lately commanding the British Forces in Iraq, has arrived in London.

M. George V. Melas, C.V.O., is acting as Greek Chargé d'Affaires during the absence of the Minister at Lausanne.

Lady Macready has left town for Egypt, and her address until the spring will be Dower Cottage, Bulkeley, Ramleh, Alexandria.

M. Stancioff, Bulgarian Minister in London, and at present in Lausanne, is among the Bulgarian delegates at the Near East Conference.

M. J. Duca, Roumanian Minister for Foreign Affairs, accompanied by M. C. Constantinesco, his Chef du Cabinet, is coming to London shortly.

A marriage has been arranged, and will shortly take place, between Mr. A. Croad, P.W.D., India, and Sylvia, only daughter of Mr. and Mrs. Montagu Smyth.

At Buckingham Palace on November 24 Sir William Harris (upon his appointment as Governor of the United Provinces of Agra and Oudh) had the honour of being received by His Majesty.

Sir Roper Parkington, Chairman of the Montenegrin Red Cross and Relief Fund, has transmitted a further sum of £500 to be distributed among the destitute Montenegrins and their families in Rome.

Under the patronage of the Queen a concert in aid of the Feodora Gleichen Memorial Studios will be held at 195, Queen's Gate (by permission of the Minister of the Kingdom of the Serbs, Croats, and Slovenes) this evening.

The marriage arranged between Mr. John Henry Thorpe, M.P., and Ursula, elder daughter of Sir John Norton-Griffiths, Bart., M.P., will take place from 90, Eaton Square, at St. Margaret's Church, Westminster, on December 19.

Count de Salis, who has sufficiently recovered from his recent illness, left London last week for Rome, to wind up his affairs in that city in connection with the handing over of British representation at the Vatican to his successor.

A marriage has been arranged between Rudolph Consterdine, M.B.E., younger son of the Rev. J. Consterdine, M.A., Edgware Rectory, and the late Mrs. Consterdine, and Gladys Mary, elder daughter of Bimbashi T. W. Weller, Ministry of the Interior, Cairo, and the late Mrs. Weller.

The betrothal is announced of Major Alec Wise, Ministry of the Interior, Cairo, formerly of the Connaught Rangers, son of Mr. and Mrs. Wise, of Belleville Park, Cappoquin, and Hope, daughter of the late Sir Thomas Wrightson, Bart., and Lady Wrightson, of Neasham Hall, Darlington.

The engagement is announced between Francis W. Rice, third son of Mr. and Mrs. Bernard Rice, South Square, Boston, and Victoria May, eldest daughter of Captain W. H. Cottrell, C.M.G., O.B.E., R.N.V.R., and Mrs. Cottrell (late of Athens), Ladder Stile, Kingston Hill, Surrey.

On December 4, at 3.30 p.m., a paper, given under the auspices of the East India Association, will be read by Mr. Stanley Rice, I.C.S. (ret.), on "The Hindu Outlook on Life." This lecture, which is to be presided over by the Right Hon. Viscount Peel, G.B.E., will take place at the Caxton Hall, Westminster.

The engagement is announced of Ivan O'Grady Maunsell, Captain 91st Punjabis (retired), younger son of Colonel C. A. Maunsell (late R.A.M.C.), and Rachel Mary Jeanette, third daughter of the late H. B. Herrick and Mrs. Herrick, till recently of 3, Cresswell Gardens (present address, Kensington Gate Hotel, 106, Queen's Gate, S.W.).

Under the auspices of the University of London (Faculty of Laws), a public lecture will be delivered by Mr. S. Wilberforce (late Puisne Judge of the Lahore High Court) on "Customary Law in the Punjab," at University College, London (Gower Street, W.C.), on December 12, at 5.15 p.m. The chair will be taken by Sir Charles Bayley, G.C.I.E., K.C.S.I. (Member of the Council of India).

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

Under the auspices of the Central Asian Society, Lieut.-Commander F. Cadogan, R.N. (ret.), will to-day, at 5 p.m., lecture on "Experiences in Russia, Transcaucasia, and the Near East." This lecture, which will be illustrated with lantern slides, will take place at 74, Grosvenor Street, W.1. Under the same auspices a lecture on "Afghanistan" will be given on December 14, at 5 p.m., at the Royal United Service Institution, Whitehall, by Colonel S. F. Muspratt, C.S.I., D.S.O., I.A.

APPOINTMENTS, Etc.

The King has approved the appointment of Mr. Edward Brooks Henderson Panton, I.C.S., to be a Puisne Judge of the High Court of Judicature at Fort William, in Bengal, in succession to Sir William Teunon, I.C.S., who has retired from the Bench.

The Secretary of State for India, in the exercise of powers conferred upon him by the Government of India Act, has reappointed Sir Charles Stuart Bayley, G.C.I.E., K.C.S.I., I.S.O., whose term of office as a Member of the Council of India will expire on December 9, to be a Member of the Council for a further period, with effect from the date of the expiry of the present term.

The following changes are announced in the Executive Council of the Governor-General of India: On Sir William Vincent's departure on December 2 next, Sir Malcolm Hailey will assume charge of the Home Department; and from that date the Governor-General in Council has appointed Mr. E. M. Cook to be a temporary Member of Council in charge of the Finance portfolio until the arrival of Sir Basil Blackett at the beginning of January next. The resignation of Dr. Tej Bahadur Sapru on account of ill-health has been accepted by His Majesty the King, and will take effect at the beginning of 1923. Sir Muhamed Shafi will take over the charge of the portfolio of Law Member from the date of Dr. Sapru's resignation; and from the same date the Governor-General in Council has approved of the appointment of Mr. Alul Chandra Chatterjee, C.I.E., I.C.S., to be a temporary Member of Council. He will hold charge of the Department of Education and Health.

Letters patent have been issued establishing a High Court of Judicature for the Province of Burma at Rangoon. The Court is ordinarily to consist of a Chief Justice and seven other judges. Sir Sydney Maddock Robinson is to be the first Chief Justice. The other judges appointed to the Court are:—Leslie Harry Saunders, C.S.I., Maung Kin, Charles Philip Radford Young, Henry Sheldon Pratt, Benjamin Robert Heald, John Guy Rutledge, and Hugh Ernest MacColl. Provision has been made that one or more of these judges shall sit at Mandalay for the trial of cases in Upper Burma. The new High Court takes the place of the Chief Court of Lower Burma and the Judicial Commissioner's Court of Upper Burma. The new Court is expected to be inaugurated about the middle of next month, but the date has not been finally fixed.

APPOINTMENT WANTED.

EX-OFFICER, Ex-Political Officer Mesopotamia, requires situation Near East. Age 30. Business experience. Speaks, reads, writes—Arabic, Turkish, Persian, French, Spanish, German. Diploma Turkish. Excellent references. Write, Box 183, THE NEAR EAST, 1, Devonshire Square, London, E.C.2

SMYRNA REFUGEES.

The Lord Mayor of London, in a letter addressed to all Mayors and Chairmen of District Councils in the United Kingdom, calling attention to the effort which the Imperial War Relief Fund, in co-operation with the Save the Children Fund and the Friends' Relief Committee, is making to give relief to the Smyrna refugees, points out that when the scheme was launched on October 10, the refugees numbered 500,000, but this number has since doubled. "Destitute and homeless, without food, warm clothing or covering, these unhappy people are easy victims of the dread diseases of the East. Uprooted from towns and villages which they knew as home their women and children are exposed to horrors unknown to us. Malaria is rife and typhus is likely to follow. Among them is the British colony from Smyrna, amounting to some 3,000 British subjects. They have lost all and have a special claim on the generosity of their fellow-countrymen. I much hope, therefore," adds the Lord Mayor, "that you will see your way to open a fund for this purpose. The British people are all the world over known for their charity, and I am anxious that every town and village shall have an opportunity of being represented in this All-British Appeal."

Where to stay in the East

CAIRO

THE
CONTINENTAL-SAVOY
THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO.

Entirely Renewed. Overlooking Ezbekieh Gardens. Opera Square. Famous Terraces. 400 Rooms. 200 Bathrooms. Cairo's Fashionable Grill-Room Restaurant. Daily Concerts. Weekly Dances. Open all the year round

MENA HOUSE HOTEL,
At the Foot of the Pyramids. The Ideal Hotel out of Town.

HELOUAN. HEALTH RESORT near CAIRO. Sulphur Baths & Thermal Establishment.

GRAND HOTEL, HELOUAN. Strictly First Class.

SUMMER PALACE HOTEL
RAMLEH (GLYMENOPOULO) ALEXANDRIA.
First-class family hotel. Grill, American Bar, Restaurant, Billiards. Open all the year round, and to non-residents.
SUMMER SEASON.

THURSDAY, NOVEMBER 30, 1922.

THE BALKANS AND TURKEY.

Considerable progress has been made during the first week of the Lausanne Conference. It has been decided that the River Maritza shall form the western boundary of Turkey in Europe, with a slight modification in the neighbourhood of Karagatch, that Western Thrace shall remain in the possession of Greece, and that the Maritza Valley shall be neutralised and demilitarised, with a view to guaranteeing to Bulgaria free access to the Ægean Sea and to providing Turkey with some measure of protection against sudden attack. The proposal is made that the neutral corridor, with its railway line, should be under the supervision of an International Commission, on which Great Britain, France, Italy, Roumania, Yugoslavia, Bulgaria, Greece, and Turkey would be represented, to ensure that adequate facilities are provided for the transit of Bulgarian commerce to and from the Ægean port, whether this be at Dedeagatch or nearer Enos. Turkey's request that the future of Western Thrace should be the subject of a plebiscite has been rejected, as has also the Bulgarian plea that the province should be made autonomous. The former suggestion could hardly be taken seriously; the latter raises a really important question. The Conference, in particular the Entente, may be congratulating itself that it has been fair to all parties, and has achieved a workable solution. Greece has been very hardly hit; it might have been regarded as a policy of vindictiveness to rob her of more territory than that to which the Turks had established their claim. On the other hand, provision for practical access to the Ægean, under a system that would be proof against Greek ill-will, had already been arranged for Bulgaria's benefit, and Greece could take no exception to this principle of a neutral corridor being definitively adopted.

For the purposes of Bulgarian commerce by way of an Ægean port the decision of the Lausanne Conference offers a working arrangement; but it cannot be said to have introduced finality into the Balkan settlement. Nothing has been more striking in the events of the last few weeks than the way in which the return of the Turks to Eastern Thrace rallied the Balkan States to a sense of their community of interests. For a moment it seemed as if the Balkan Confederation of 1912 would be revived at Lausanne. Roumania and Yugoslavia had definitely renounced the boycotting of Bulgaria; Greece and Yugoslavia had arrived at a working agreement with regard to a Yugoslav zone at the port of Salonika. All that was required was that Greece should make a *beau geste* in favour of Bulgaria. In the circumstances it would have been an heroic act on Greece's part to support the autonomy of Western Thrace; and, no doubt, it could only have been done with a united country behind the Government. Bulgaria will accept, under protest, the policy of a neutral corridor, and for a time there will be peace in the Balkans. At best, however, it will be a settlement by force, and as such it will not be based on a permanent foundation, but will remain conditional upon the play of circumstances. Autonomy for Western Thrace was not an end in itself. The Yugoslav representative was quite right in insisting that absolute sovereignty, not autonomy, was as necessary in Western as in Eastern Thrace. That is the case, but the proposal of autonomy was intended to overcome the difficulty of deciding to-day the question of sovereignty with any likelihood of general acceptance. Greece would not accept Bulgarian sovereignty over Western Thrace any more readily than Bulgaria accepts Greek sovereignty; neither country desires to see the province Turkish; a period of autonomy, under a régime that would not tolerate outside propaganda, would give the territory time to settle down to normal conditions and to determine of its own free will, and not at the behest of its master of the day, towards which country the sympathies of the majority of the population really incline. As things are, and as they will probably be left by the Conference, the arguments of the Bulgarian representatives have been successfully countered in debate; but Greece, it is to be feared, is deliberately hanging a millstone on her own neck.

For all their disappointment, we hope that the Bulgarians will accept loyally and philosophically the decision of the Allies in regard to Western Thrace and the neutral corridor to the Ægean Sea. Any attempt to kick against the pricks will bring its own punishment, whereas, if there is any justice or cogency in the Bulgarian arguments, these will continue to be a factor in the situation. Bulgaria would be ill-advised to attempt to force a different decision in the near future, or to do violence to her political and economic future by seeking in Turkey a make-weight against what some of her own people may regard as the settled hostility of her Balkan neighbours. Reason and sentiment link her fortunes with the latter. She has only to throw her memory back two or three years, when she had to put up with diplomatic rebuffs in Bucharest and Belgrade, to appreciate how nearly what has happened in the last two weeks approaches a miracle. She has disarmed prejudice and hostility by a frank bearing and honesty of purpose. If she continues this policy, she may yet be able to achieve by mutual consent what has been denied her at Lausanne. Political co-operation in the Balkans, we would fain hope, will prove in the future less important than an economic federation. If towards this end Bulgaria uses her great capacity for production to its fullest extent, she may forge a far more useful weapon for a final Balkan settlement than any political or military arguments that failed to carry weight at the Lausanne Conference. Her future policy, however, must be single-minded. There must be no coquetting with Turkey in order to intimidate her other neighbours to her way of thinking. On the other hand, there is no reason why she should not wholeheartedly support the Great Powers in their attempt to bring home to the Turks that they are now regarded once more as belonging to the European comity of nations, unless they choose to forfeit the position. Turkey is favourably placed as an important customer for Bulgarian trade; the most should be made of this factor on both sides of the frontier, without political bias. If, however, the Turks are allowed to think that they can easily drive a wedge into any Balkan understanding, they will be encouraged to intrigue in Europe as a whole. The first and the last sufferers in such a state of affairs will still be the Balkan States themselves.

THE PROBLEM OF IRAQ.

The problem presented by Iraq to-day is in some respects similar to the question of unemployment in Great Britain. Both have to be grappled with, and the new Parliament will have to decide whether it will give the Government time to evolve level-headed comprehensive schemes of amelioration, or whether it will endorse Communist methods of dealing with both matters. On a par with the "Red" tactics of the leaders of the unemployed marchers on London, we have a series of articles in a newspaper dealing with Iraq. There is the same exaggeration and denunciation, without any attempt, so far, to understand the problem and to propound a practical solution. We can only hope that Parliament and the British public will be equally firm in discountenancing these "Red" methods of solving a difficult problem.

It is an axiom that far too much money has been spent in Iraq since the Armistice. The British taxpayer is still suffering from the failure of Mr. Lloyd George's Government to cope with the work that it had on its hands immediately after the War. Just as no attempt was made to bring about a settlement in Turkey, so Mesopotamia was left to its own devices, and those devices happened to be of an extravagant, though well-meaning, type. All this is old history. It has been repeated again and again, acknowledged and explained. There was no need for any newspaper to send out a special correspondent to establish the fact. With the installation of an Arab Government under King Faisal, the ground was prepared for a new order of things. It was intended to reduce British expenditure in the country, and definite steps in that direction have been undertaken. There will inevitably be a difference of opinion as to whether the new movement for the reduction of expenditure is proceeding rapidly enough; but mere denunciation of the expenditure without appreciation of the problem as a whole is of little practical use to those who have to form a reasoned judgment on the subject. Day after day readers of the *Daily Mail* are being reminded that it has cost £160,000 to build the British Residency in Baghdad, and that several millions have been spent on the Hinaidi cantonments. If this is so, the first consideration of the British taxpayer should be to examine carefully the situation in Iraq with a view to seeing how he can obtain the best return on his money. The only advice that he is likely to derive from columns and columns of denunciation in the Press is that Great Britain must scuttle at once from Iraq and write off as a dead loss all these costly enterprises. A less prejudiced outlook and a more dispassionate inquiry might suggest a wiser and more practical course of action.

No fair-minded inquiry into the situation in Iraq can ignore the difficulties that have had to be contended with during the last two years. First and foremost, the shadow of Angora has brooded over the country; for as long as the Turks considered themselves at war with Great Britain the danger of an attack from that quarter was always present. The internal situation has also been full of complications. Having set up an Arab Government, Great Britain was prepared for a gradual transfer of authority from the British to the Arabs; but almost immediately a difference of opinion arose between the two as to the degree of rapidity at which the transfer was to be effected. Perhaps neither side is to be blamed overmuch; the British authorities had good reason to be cautious, and even over-cautious; the Arabs are merely imitating all other countries in a similar position. One result of this situation is that the British authorities have been more occupied with theories of government and dialectical arguments than with the problem of reducing administrative expenditure. They could argue, indeed, that, while all these questions remained unsolved, common prudence suggested no reductions at all.

To-day the fears and misunderstandings of the last two years are being dissipated. With the prospect of peace with Turkey Iraq experiences a sense of relief. The Arabs can make out a good case; at all events, the urgent need for curtailing expenditure prompts Great Britain to lend a more impressionable ear to their arguments. What is wanted at this moment, therefore, is a dispassionate examination of the question from all angles with a view to enabling the British Government to reduce its commitments in Iraq, while not jeopardising the stability of the Arab administration or the prospects of the country. The articles in the *Daily Mail*, it need hardly be said, are of no use for this purpose. It is no doubt a very wrong thing that the Residency should have a billiard-room; but it does not really matter so much if, when the time comes to dispense with the Residency, there is a reasonable prospect of the King of Iraq being in a position to purchase it as his palace, billiard-table and all. It will be much better to help the Iraqis to take over the offending buildings than to leave them to become a total loss, simply because the late owner of a newspaper had a personal quarrel with the late head of the Government. The fate of a country must not be settled on such inadequate grounds.

The new feature in the situation is the Iraq Treaty. When the building of the Residency was begun, and the Hinaidi cantonments decided upon, the general impression was that Great Britain would retain in her own hands the direct administration of Iraq. That idea has been abandoned, and this fact at once rules out of court expenditure on the old lines. But time must be given for the change to the new system to be carried out decently and in order.

First of all, it is necessary to know what the Arab case is. The sweeping generalisation that the Arabs do not want the British is altogether misleading. If we eliminate the two holy cities of Kerbela and Nejef, where there is a rooted hostility to any form of enlightened government, whether British or Arab, as being calculated ultimately to prejudice the interests of those who batten on the position of the two cities in the Moslem world, it will be found that Arab opinion is divided into two main schools of thought—the moderate and educated section of the towns on the one hand, and, on the other, the tribesmen. The former are well aware of the shortcomings of the country and its inhabitants; they know that its present condition is incompatible with real full-grown independence; but they are convinced Nationalists, and they hold that only personal, not vicarious, practice in the art of government can make them perfect. The tribesmen are torn by conflicting opinions: their instinct is against foreign control, but they are equally opposed to the unfettered government of their compatriots of the towns; they recognise that the presence of the British in the country makes for a welcome uniformity in the matter of justice, but they find British thoroughness alien to their ideas, and therefore objectionable; they are prepared to admit that the British exercise a moderating influence on their *bête-noire*, the effendi class, but they reflect that the withdrawal of the British would leave them free to settle their own score with the towns. Of the two sections, the tribesmen, as was to be expected, have the narrower outlook. The moderate educated Arab knows that he cannot stand entirely alone; but he does want to be master of his own destiny as much as possible.

Briefly put, the articulate demand of Iraq to Great Britain to-day would be :—

(1) Let us run our own show, but stand by to tell us what to do and where we are going wrong.

(2) As we admit Great Britain's special interests in Iraq, let there be a clear understanding at the outset as to what these entail, but let us try to give satisfactory effect to them of our own accord, and until we have failed, do not take the matter into your own hands, so as to detract overtly from our sovereign rights.

(3) As we cannot stand up against foreign aggression without British assistance, let us adopt a common-sense plan of action for all eventualities which will safeguard Iraq and will enable Great Britain to reduce her military expenditure in the country.

It is quite easy to represent these demands as a policy of all for Iraq and nothing for Great Britain except responsibility when things go wrong. They deserve, however, to be examined in the light of the somewhat persistent demand that we should abandon Iraq altogether and of the necessity, in any case, of a drastic reduction of expenditure.

The Arab contention is that we have put up an Arab Government, but only side by side with the pre-existing Administration, so that the country is saddled with the cost of two Governments, and of these the Arab, naturally in the circumstances, counts for nothing in the eyes of the people. The former administrators, it is urged, have remained on as advisers. with the result that they have changed their names but not their functions. There is readiness to admit the necessity for Advisers attached to the various Ministries, who should advise and supervise, but should be chary of assuming executive authority; for the provinces, Inspectors, it is suggested, will suffice, who will pay periodical visits and will not, as the Advisers at present, be always at the side of, and thus duplicate, the local officials.

With regard to the military question, it may be said in passing that the existing arrangements governing the Arab army make the Ministry of Defence the only really satisfactory Department from the Arab point of view. Thanks to the tact and ability of the British Adviser, nothing is done to detract from the authority of the Arab officials and officers; suggestions are made and mistakes pointed out, so to speak *in camera*, and all runs smoothly. The Arab contention would seem to be that, with an Arab army of from 13,000 to 15,000 strong, the Government would accept full responsibility for law and order in the country and for its defence against potential enemies from the desert. It could not deal with Turkey, Persia, or the Bolshevists; it suggests, therefore, that Great Britain should help in making provision in regard to these, preferably by means of an understanding with Turkey and the admission of Iraq into the League of Nations. As to the Arab army, which is now only 4,000 strong, it is contended that the country will never be able to raise an adequate force on the voluntary system, and would not be able to afford the cost, even if the necessary numbers could be secured. The Government asks, therefore, for a form of conscription which will enable a force of 15,000 men to be kept under arms.

The question for the British Government and Parliament to decide is whether there is anything in these demands incompatible with British interests, in which must be included the necessity of a considerable reduction of our Iraq expenditure. No doubt, a purely British Administration would have done better for Iraq than an Arab Government, but such an Administration is out of the question, and from the Arab point of view would not work. If the necessity of reducing expenditure is admitted, the next step is to agree upon the new policy. In this connection it is certainly to be preferred that we should have the full support of the Arabs than that we should still further antagonise them. (As for the clash of views between tribesmen and town-dwellers, British prestige will still be potent enough to exercise a moderating influence on both, and friction should be eliminated in the universal satisfaction felt at the attainment of the outward and visible signs of independence.) There need be no diminution of British moral force in Iraq, although there will necessarily be a substantial reduction in the numbers of officials and in the military strength kept in the country.

We do not believe that these measures, if carried out on a reasoned scheme, and not as a result of panic or slapdash policy, will militate seriously against British interests in Iraq, or will prevent the country from finding ultimate salvation on its own halting and uneven lines. Of course, there must be a loan. Great Britain cannot set up a régime, which for no fault of its own has no chance of paying its way, without making provision for financial equilibrium. When expenditure has been reduced to the lowest limits, the Administration ought to be able to balance revenue and expenditure. There need be no fear that private capital will come to its help as soon as the country's political status has been satisfactorily settled.

PERSIAN TROUBLES.

Our Teheran Correspondent, writing on October 15, says :—

A letter from the two Bakhtiari chiefs, Sardar Zaffar and Amir Mofakham, to the Ilkhani of the tribe in Teheran, Samsam es-Saltaneh, which has been published in the Press, has evoked much comment. In it the two chiefs, referring to the imputation that the recent attack on the detachment of Government troops in the Bakhtiari country was committed by their tribesmen, and to the fact that the Minister of War is collecting a force in Ispahan, presumably with the intention of sending a punitive expedition against the tribe, deny any participation in the attack, and state, in no uncertain terms, that, should the Government ever invade their territory with an armed force, every Bakhtiari will rally to the aid of his tribesmen, and even the women will arm themselves in the struggle for their existence and the protection of their prestige. This letter is, of course, put down in the local gutter Press to British intrigue, with a view to creating internal strife so as to weaken the Central Government.

Seyed Jalal, the leader of the recent Jungalee rising in Ghilan, and a number of his followers, have been captured by the Government authorities and executed. Bolshevist propaganda, however, continues rife throughout Ghilan, mainly directed against the British. The situation there, in view of the known Russian sympathies of the Governor-General of the Province, cannot be considered very satisfactory, and the Russian commercial and political agents are naturally taking the fullest advantage of it.

The Mejliss recently voted an annual grant of Tomans 20,000 (some £3,500) for a German industrial school in Teheran, which will presumably be opened shortly. One of the principal subjects to be taught will be chemistry.

BULGARIA FROM A MOTOR-CAR—JUNE, 1922.

By MAJOR SHELLEY (Royal Warwickshire Regiment).

Crops, cattle, contented villagers—Christian and Turk—living side by side in their red-tiled cottages, amidst orchards of plum trees: these are the first impressions that catch the eye as one passes through Bulgaria. The Great War does not appear, outwardly at any rate, to have laid its grasping paw on this fair land—and why? Because the Bulgarian is doing what the Allies should now be doing: working, and working hard, instead of squabbling over the tainted and distinctly unremunerative bone of the Near East.

Bulgaria is divided into two parts, Northern and Southern, separated by the Balkan range. Thanks to European jealousy, Bulgaria's only outlet to the Mediterranean is via the Black Sea, Varna being the port for the Northern and Bourgas for the Southern portion.

The writer happened to land for a few hours at Varna, where he luckily met Mr. A——d, one of America's ambassadors of commerce, who offered him a lift to Sofia by car. It was entirely due to Mr. A——d's kindness that the brief but interesting journey passed off so smoothly.

Varna is built on the cliffs overlooking the Black Sea. It is mainly a commercial town, and does not call for much comment, although the harbour specially attracts one's attention on arrival owing to a large medallion of Tsar Ferdinand placed at the end of a fine breakwater. The late monarch was never a sailor, nor does an admiral's uniform become him! Why emphasise the fact by placing his cameo in the one spot where the average foreigner must be affected by its incongruity? A well-laid-out park to the north of the town provides such amusement and refreshment as the populace require. "Early to bed and early to rise" is the Bulgarian motto.

In Varna, as elsewhere in the Balkans, we meet the Russian refugee. One would have expected the love of the Bulgarian for the Russian to be comparable with that of David for Jonathan. Unfortunately this is not so, Jonathan being far too fond of referring to David's "pastoral ancestry," David retorting by expressing doubts as to the parentage of many of Jonathan's female relatives.

Hotel accommodation in Varna is difficult to obtain, as Bulgarian law to-day does not permit one individual to retain the sole right to a room that can provide accommodation for two. To ensure compatibility of bedroom temperament, one must be accompanied by one's wife.

From Varna to Sofia by road is approximately 570 kilometres; the trip can be done comfortably in two stages, the first being to Tirnovo, the ancient capital (285 kilometres). Provided one has a good car, a good driver, and ample "juice," the journey presents no particular difficulties, the road being good and well maintained. In the first stage there is little of interest except the outstanding fertility of the soil—hence the well-being of the inhabitants. Few hills are observed, except close to Tirnovo. Our route was via Shumen, Razgrad, and Popovo, the first two being important military centres. Shumen, however, is probably the best known town in Bulgaria, but for quite another reason. Like the Englishman, the Bulgarian loves his beer, and, though all Bulgarian beer is good, none can equal the Shumen brew. Tirnovo, the ancient capital, is well worth a visit. The town itself forms part of a natural amphitheatre of hills, in the centre of which rises a massive rock. This was the site of the palace of the ancient kings of Bulgaria, formerly connected to the town by a stone viaduct, traces of which still remain. A river runs around the base of this rock. It requires but little imagination to picture the sanguinary conflict that must have taken place ere the citadel was finally subdued.

Hotel accommodation at Tirnovo is of a primitive nature. Mr. A. and myself viewed with much distrust the beds allotted to us at the local Ritz. However, by keeping the electric light burning throughout the night our rest was not disturbed. Here we were fortunate enough to see the annual gathering of the "Unack"—an association of those athletic societies which are the main feature in the Bulgarian world of sport. These societies embrace all ages and sexes from tiny tots to grown men and women. The exhibition of physical drill which they gave was well worth seeing. Our companion, a patriotic Bulgar, informed us with much pride that here we would find no Greeks, Jews, Levantines, or Turks, only true Bulgars.

On leaving Tirnovo the road becomes gradually more and more hilly as one approaches the Balkan range, and within six and a-half hours we had reached the Araba Konak Pass—one of only three passes through which an invading army can cross the Balkans. The scenery is beautiful; the country one huge farm. At Lovitch, 89 kilometres from Tirnovo, one enters the town by a covered stone bridge, on either side of which are shops, recalling vividly pictures of "Old London Bridge." From the summit of the Araba Konak Pass one views the gilded domes of the Sofia cathedral. Seventy minutes' travelling on an excellent but very dusty road brought us to the end of our journey—Sofia.

Sofia is a very clean and well-constructed town, though there is in it little of great interest. The best hotel, the Union Palace, is thoroughly up to date, and compares very favourably with good London and Paris hotels. Prices are extremely moderate from an Englishman's point of view, owing to the low price of the leva.

And here the writer feels he may join for a few brief moments the ranks of "the men on the spot" whose advice is often listened to but seldom taken. Many Englishmen consider that any race that sided with Germany in the late War is forever damned. Bulgaria possesses no aristocracy of its own; its monarchs are of German origin; its Government peasant. Why, then, should Bulgaria be pro-British? What has Britain ever done for that country to earn undying gratitude? Very little. On the other hand, the late monarch did a great deal for Bulgaria—probably for his own pocket as well. Who are we to blame him? His throne was a risky investment at the best of times. Can one be surprised if his dividends were high?

The Bulgarian is a hard worker and likes work Bolshevism should find Bulgaria poor soil for a Soviet harvest; but the country would make herself safe against "Red" propaganda by adopting the Roumanian principle of "small holdings," thus doing away with the large landowner and consequent "agrarian combine," which the artisan class accuses of being responsible for the high price of food. Do not, however, let us forget that the Bulgarian is a real worker, and therefore not to be classed with some Balkan tribes who, though they daily emphasise the Westernism of their civilisation, can never forget the Oriental heresy that the wealth of a nation is but a metallic symbol. Th Bulgarian people have learnt their lesson and are working hard to better their financial condition. They have not yet been able to pay reparations; but can one altogether blame them? The pound sterling to-day costs 740 leva (nominally £27), and Bulgaria's main source of wealth is cereals. Compare her state with that of Germany, whose resources are many times

Digitized by Google

greater. Germany refuses to pay her debts and is therefore granted a respite. Surely we Allies, who pride ourselves on our justice, should deal in the same way, if not more leniently, with Bulgaria.

May I suggest that we forgive Bulgaria her debts, as we hope, one day, to be forgiven our debts by the "New World"?

The Thracian problem is the next for solution. Bulgaria has proved that she can rule Moslems justly. Let us give her an opportunity to rule a considerable portion of Thrace, at the same time assuring ourselves, by the presence of Allied inspectors, that our trust is not abused. By so doing we shall then have divided the Balkans into four new and large States: Serbia including Yugoslavia, Roumania including Bessarabia and Transylvania, Bulgaria including Thrace, and Greece as she was after the last Balkan war, each with ample territory for its own needs, and—what is more important—each Government faced with new problems, racial and economic, to keep it occupied and prevent it drifting back into the old Balkan rut—"war."

MUSICAL NOTES.

The Mozart Festival.

One supposes that there are few operas on which admiration is more heartily bestowed, alike by "highbrow" and popular audiences, than those of Mozart. Certainly both these types were present in abundance at the opening last week of the Mozart Festival at the Old Vic., when "The Marriage of Figaro" in Mr. E. J. Dent's excellent translation was played. Three performances of "Don Giovanni," the first beginning to-night (Thursday), are to be given; and on December 7, 9, and 30 we are to have "The Magic Flute." These dates are important, for the Old Vic. is the only place in London where Mozart can now be heard.

That the production of "The Marriage of Figaro" was perfect it would be absurd to pretend, but that it was something more than honest it would be equally ridiculous to deny. There is always about the Old Vic. staging a team-work that compels attention, and in the end wins respect—a sunny element that is worth all the stars that so often cluster elsewhere in mechanically-produced operas. Old Vic. singers and players go about their work as if it were worth doing, and their humanity is thus never obscured. Particularly in this opera high aim and breadth of conception were assured by the fact that Mr. Clive Carey was producer; whatever might be said of details, the spirit of pure Mozart was bound to envelop the whole. And so it proved. There was no great singing and no great orchestral playing. There were inequalities, lapses, awkwardnesses. There was, especially, an occasional but bad overbalancing of singer by the band. But with all these faults we loved the opera still. The sparkling tunes, the irrepressible spirits, the unflagging humour of "Figaro" are in themselves, provided they be spoiled by no artificiality, sufficient to keep up enjoyment. Thus it was that we didn't really mind that Mr. John Ridding as Figaro would persist in forgetting his words, or that Mr. Harrison played Antonio (Susanna's uncle) far too broadly, or that Mr. Sumner Austin's exposition of Count Almaviva was, to put it mildly, limited. If we wanted to think of details, we could rather think of the alertness of Miss Muriel Gough as Susanna, or of the chasteness of Miss Dorothy Robson's singing, or of the just adequacy of the long-lacking English translation. The one thing that we could have wished omitted was the illustration by a dance of the beautiful Overture to Act iv. This dance was meaningless, and in any case the Overture is so pure, its trills come so stealingly upon the ear, that it is much better to listen to alone. But, when all was over, one could walk up the gloomy Waterloo Road with light heart, humming contentedly "Non piu andrai," "Se vuol ballare," and the rest of the melodies the freshness of which comes as easingly to us now as it must have come to our eighteenth-century forbears. My advice is, in short, if you want to get into the proper spirit for Christmas, go to the Mozart Festival at the Old Vic.

Andante.

Akhmet Mukhtar Bey is stated to have been appointed Kemalist Ambassador at Moscow.

The removal of the headquarters of the Air Force to Delhi is expected to be complete by December 4.

The crocodiles are reported to have become so aggressive in Dongola Province that natives are afraid to swim from island to island.

A draft of over 200 officers, non-commissioned officers, and men of the 1st Essex Regiment left last week in the s.s. Derbyshire for Constantinople.

Special Friday prayers were offered last week at the famous Jama Masjid Mosque at Delhi for the new Khalif Abdul Medjid, and for the success of Mustapha Kemal Pasha. Similar services were held at other mosques.

An international roller-skating team race, contested by teams of three men from England, France, Belgium, and Roumania over a distance of 25 kilometres (15½ miles) at the Velodrome d'Hiver, Paris, resulted in a victory for the Roumanian team, consisting of three brothers, C., R., and J. Samuel. A fine race was marred by a spill at the twenty-first kilometre, when a Belgian, in attempting to pass, brought down a French skater, who in turn upset Wilson, one of the English competitors, with the result that when the race was taken up again the Roumanian team had gained a lead of over half a lap, and they eventually won by sixty yards.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K., Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

The Phœnix Deal.

Details of the agreement (which was signed last week), for the merging of the Roumanian Consolidated Oilfields in the Phœnix Oil and Transport Company are now available. Briefly, the proposal is that shareholders in the Roumanian Consolidated will receive one Phœnix share for every two Roumanian Consolidated, while the debenture-holders are to receive 300 Phœnix shares for every £400 of debentures. The capital of the Phœnix Company is to be increased, so that the company will be in possession of additional working capital of over £400,000 for use in the development of the properties of the two companies.

Roumanian Consolidated's Position.

Elsewhere in this issue will be found the text of a circular issued by the Roumanian Consolidated setting forth the reasons for the amalgamation. Developments prior to the war suggested a highly prosperous future for the company, but since the war it has been labouring under financial difficulties arising, of course, out of the destruction of its properties in 1916 to prevent their falling into the hands of the enemy. So far the company has received no compensation for the damage, and an issue of debentures only met the situation temporarily. It was clear that in the circumstances it would be impossible to carry out the work of development necessary to enable the company to recover its position. Last year the output of oil was only 21,000 tons, as compared with 100,000 tons before the war. For the company the proposed merger has very obvious advantages. It will render possible by the provision of capital the development now out of the question, and the alliance of its fortunes with those of a highly successful concern holds out prospects to the shareholders that they certainly could not hope for under present conditions.

The Phœnix Company.

For the Phœnix Company the advantages of the scheme are equally clear. This concern in its brief career has made remarkable progress, and now, as will be seen from the circular on another page, stands in a very strong position. The acquisition of the rich lands of the Roumanian Consolidated will be a further great source of strength. At the present time the production of the Phœnix Company is about 4,000 tons per month, and if one takes into account the possibilities of the Roumanian Consolidated also, it will be evident that at no distant date the Phœnix Company will be in control of a very important oil output. As I have had occasion to point out previously, it has for some time been anticipated that the company would be in a position to declare an initial dividend in its coming report, and it is satisfactory to note that this is borne out in the terms of the amalgamation.

Anglo-Persian Capital.

Quite needless concern was caused last week by the announcement that the Anglo-Persian Oil Company had applied to the Stock Exchange Committee for the quotation of the whole of the ordinary shares of the company, which total £8,100,000. Of this amount only £600,000 has been offered to the public, and it was hastily assumed in some quarters that the move foreshadowed the disposal of some of the other shares which are almost entirely in the hands either of the British Government or the Burmah Oil Company, the great bulk of them being, of course, held by the former. It should be almost superfluous to say that there is no foundation for any such assumption. When an application for an official quotation is made particulars are required regarding the authorised and the issued capital of a concern. In the present case the object was to obtain a quotation for the publicly-issued shares, but it was necessary to state the total capital. It is possible, incidentally, to draw a further conclusion from the step, and that is that it may be an indication that the company proposes before long to make a further issue of capital. It is some time since there has been an issue, and in several directions the company's interests have shown signs of expansion that would probably necessitate further capital expenditure.

The Coming Fair.

The latest news I have received of the coming British Industries Fair is of the most encouraging nature. At one time there were grounds for apprehension that the Fair would not meet with quite the same measure of support in this country as in previous years on account of the general stagnation of trade, but the improvement in the general conditions that has been in evidence of late has altered this, and it is now evident that the Fair will be a very complete reflex of the country's industrial activities. It is too early to attempt to forecast the extent to which foreign buyers will be attracted. Every effort has been made to bring the Fair to their notice, and it seems probable that there will be a better response on this occasion

BANK OF ROUMANIA LIMITED
(FOUNDED 1866).

Head Office: **64, CORNHILL, LONDON. E.C.3.**

Branch: 11, CALEA VICTORIEI, BUCAREST.

Bank of England. **Messrs. Glyn, Mills, Currie & Co.**

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

Digitized by Google

than at any previous Fair; but, of course, much will depend on what happens between now and February.

Oriental Gas.

But for a considerable increase in working expenses, the report of the Oriental Gas Co. for the year ended June 30 would make an exceptionally good showing. The sales of gas showed a great increase, and the receipts were higher by £13,400. Further, the receipts from the sale of residual products increased by £7,800. On the other hand, there was this time no profit on exchange, which amounted to a considerable item the previous year, while working expenses increased by £21,000, thus counterbalancing the excellent receipts; and the net profit of £31,200 is about the same as last year, and the dividend is again 8 per cent.

Madras and Southern Mahratta Railway.

As in the case of the other Indian railways, the Madras and Southern Mahratta Railway is suffering at the present time from the great increase in working expenses. For the year ended March 31 the gross earnings of the line, excluding the figures for worked lines, amounted to Rs. 609.94 lakhs, as compared with Rs. 581.55 lakhs, while the working expenses rose from Rs. 382.79 lakhs to Rs. 427.06 lakhs, there being a decline of Rs. 15.88 lakhs in the net earnings. For the whole system the gross earnings amounted to Rs. 671.25 lakhs, as against Rs. 639.93 lakhs, while the expenditure rose from Rs. 420.48 lakhs to Rs. 469.06 lakhs, with the result that there is a decrease in the net earnings of Rs. 17.26 lakhs. It is interesting to note that the gross earnings of the line have constantly risen for the past six years, and as there is every reason to anticipate the continued expansion of traffic, it is obvious that the shareholders will benefit considerably as soon as the cost of working the line begins to decrease.

COMMENTATOR.

YUGOSLAVIA'S IMPROVED FINANCIAL POSITION.

The Minister of Finance of Yugoslavia states that the country's expenditure during the two months of August and September amounted to 1,023,000,000 dinars, as against receipts of 1,112,000,000 dinars, leaving a surplus of receipts over expenditure of 89,000,000 dinars. Although the increased commercial activity of the country has caused a stringency of currency, the National Bank of Yugoslavia has declined proposals involving an increase in the note circulation.

COMMERCIAL BANK OF GREECE

(Limited Liability Registered in Athens.)

CAPITAL PAID UP - Drs. 24,504,000
RESERVE FUNDS - Drs. 16,188,095

Head Office: ATHENS.

Branches: **Piraeus, Argos, Pyrgos, Patras, Corfu, Cephalonia, Nauplia Vostizza (Aegion), Calamata, Syra, Chio, Candia, Volo, Salonica, Larrissa, Triccala, Mitylene, Canea.**

London & Constantinople Agents: The Commercial Bank of the Near East, Ltd.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking and Stock Exchange business, and extends special facilities to merchants and traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange transactions, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts and Bills.

MERCHANDISE DEPARTMENT.

The Bank undertakes the warehousing and sale of goods consigned.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Cleaning Articles.—The Director-General, Mechanical Department, P.W.M., Cairo, invites tenders for the general supply of cleaning articles such as aprons, brooms, cloths, dusters, polish, soap, etc., for the Ministry of Public Works during the year 1923-1924. December 4.

Paving Stones.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 130,000 paving stones and 8,000 head stones (boutisses) required for the maintenance of the Port of Alexandria. December 15.

Map Printing Paper.—The Surveyor-General of Egypt, Giza (Mudiriya), invites tenders for the supply of 1,140 reams of various classes of map printing paper. December 23.

Photocopic Papers.—The Superintendent of Stores, Egyptian State Railways, Telegraphs and Telephones, Saptieh, Cairo, invites tenders for the supply of photocopic papers during 1923. December 28.

Bristol Board, etc.—The Superintendent, Government Press, Bulâq, Cairo, invites tenders for the supply of paper, bristol board and grey board. December 28.

Drugs.—The Director of Stores, Public Health Department, Cairo, invites tenders for the supply of drugs required for the period of one year from April 1, 1923. December 28.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer, Egypt and the Sudan Governments' Office, London. January 2.

Wood Naphtha and Tierol.—The Egyptian Customs Administration invites tenders for the supply of 130,000 kilogs. of wood naphtha (wood spirit) and 5,000 kilogs. of tierol, for denaturing ethyl alcohol. January 6 (D.O.T.).

India.

Third-class Bogie Carriages, etc.—The Assam-Bengal Railway Co. invite tenders for the supply of three first and second composite and 25 third-class bogie carriages, and 132 pairs of wheels and axles. December 8.

Buffers, etc.—The Bengal and North Western Railway Co. invite tenders for the supply of 397 four-wheeled wagons, complete, and ten bogie timber trucks complete except wheels and axles; 1,454 pairs of wheels and axles; material for 250 four-wheeled wagons; buffers and parts for construction of 250 wagons; 1,000 laminated springs; 1,000 volute springs; and 1,000 axle boxes. December 19.

Engine Parts.—A firm of engineers in India, having acquired a foundry and engineering works, have under consideration the manufacture of steam engines of 5 to 60 h.p. They have facilities for casting iron and brass, but propose to import machined parts, such as crankshafts and connecting rods, for assembly at their works. Further particulars are available at the Department of Overseas Trade.

Malta.

Malta Mail Service.—The Government of Malta invites tenders for the conveyance of mails between Malta and Syracuse. Tenders must be sent sealed to the Director of Contracts, Malta. December 21.

Yugoslavia.

Medical Stores.—The Ministry of War and Marine (Sanitary Store), Zemun, invites tenders for the supply of various medical stores (drugs, graduated measures, medicine bottles, pill machines, forceps, dental rubber, surgical and veterinary instruments, etc.). December 9 (D.O.T.).

Roumania.

Bits and Augers.—The Roumanian Railroad Administration invites tenders for the supply of 1,442 bits, assorted centre and gimlet, and 23 screw augers. Tenders should be addressed to La Direction Générale des Chemins de fer l'Etat Roumains, Service P. (rue Victoire 124), Bucharest. December 9. (D.O.T.)

Shovels.—The Roumanian Railroad Administration invites tenders for the supply of 22,500 steel-pointed mouth shovels without handles, and 1,500 steel coal shovels with handles. Tenders should be addressed to La Direction Générale des Chemins de fer l'Etat Roumains, Service P. (rue Victoire 124), Bucharest. December 12. (D.O.T.)

Commerce and Industry.

(Reports from Our Own Correspondents).

GREECE.

Athens, November 18.

The Drachma.

The drachma, continuing its downward run, was quoted at 320 to the pound on Wednesday night. It, however, improved later, and closed at 302 yesterday. It is generally believed that the slump in the drachma is to a great extent due to the speculation of buyers of sterling. The newspapers and the leading business people in Athens and Piræus are urging the Government and the Revolutionary Committee to take drastic measures against speculation in the exchange.

PALESTINE.

Jerusalem, November 12.

Encouragement of Tourists.

The "Society for the Promotion of Travel in the Holy Land" was organised some time ago by the Department of Commerce and Industry. It has recently burst into fresh life, and is seeking new outlets for its activity. It announces that its chief aim is "to encourage tourists to visit Palestine and promote their comforts as far as possible, serving at the same time as an advisory bureau which collects and passes on information regarding hotel accommodation, railway services, etc., in order to prevent congestion and discomfort. The society is desirous of demonstrating to tourists the advantages that would accrue from their visiting Palestine later in the season than has hitherto been the custom. Palestine in the autumn is as well worth a visit as Palestine in the spring, and even the summer months are not uncomfortable in the Holy Land, as they are in Egypt, so that the Egyptian tour could with equal ease be preceded or followed by a tour in Palestine. Here the spring, the summer, and the autumn are alike attractive, and the fallacy that Palestine has only one season is manifest to those who have any knowledge of the country."

ALBANIA.

Tirana, November 7.

Concessions Not Utilised.

It will be recalled that at the end of last year the Albanian Government granted a concession to an English company for the manufacture of cigarettes in Albania. The said company was to have an exclusive monopoly of the manufacture for twenty years, and was, further, to devote itself to the cultivation of tobacco and its export. The capital of the company was to be raised in London. It is now learnt that the negotiations have fallen through. The concession was cancelled over a month ago, its period having expired, after one extension, so that the enterprise is again open to be acquired.

An Englishman, Mr. Herrick, obtained at Tirana a concession for gypsum in the neighbourhood of Valona, where there are two rich beds situated at a distance of less than two kilometres to the south and north of the town. Mr. Herrick was to construct kilns for converting the gypsum into plaster at the place. This enterprise being in the same category as the stone quarries, the concessionaire would only have had to pay the prescribed tax of 5 per cent. to the State. This concession has also been cancelled, the term fixed having expired.

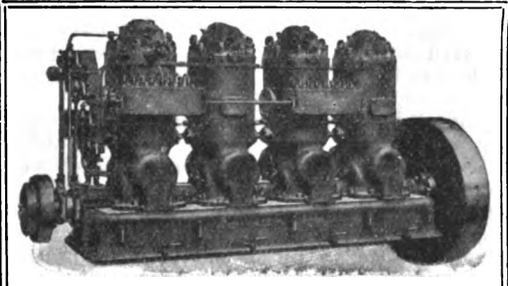
Further, two concessions for the forests have had the same fate. Shevket Mitrovitza obtained a concession to cut two million railway sleepers at a royalty to the State of 55 centimes per sleeper. M. Mitrovitza was to form a company with a capital of 500,000 francs. The second concession was given to M. Dania de Torino for 100,000 cubic metres of wood at a royalty of 12 francs per cubic metre.

PALESTINE MUNICIPALITY LOAN.

Floated by American Firm.

The Zionist Organisation Central Office is informed that the loan of £75,000 which the township of Tel-Aviv, near Jaffa, has been trying to raise, has now been floated by a prominent New York banking house, Messrs. Harvey Fisk and Sons. The loan will consist of 6½ per cent. sterling bonds, redeemable in twenty years by semi-annual drawings, and will be secured as a first charge on the revenue of Tel-Aviv. The money will be applied to public improvements.

Tel-Aviv was founded in 1905 on the outskirts of Jaffa by a number of Russian Jews, and now has a population of over 12,000. It is laid out on European lines, and has had a remarkable development. It has communal property valued at over £36,000, consisting of houses and lands, water supply, electricity installations, etc., whilst the taxable property within its boundaries has a value exceeding £1,500,000. The Tel-Aviv loan is the first loan of a Palestine municipality that has been floated under British administration.



Power at Minimum Cost.
The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.
It is easy to start and runs unattended for long periods.

THE 'ALLEN' HEAVY FUEL OIL ENGINE

From 15 BHP to 200 BHP.

Oil Notes and News.

NORTHERN PERSIA OIL CONCESSION.

(*From Our Own Correspondent.*)

Teheran, September 21.

The proposals of the Standard Oil and the Sinclair Companies are published in the Press, to enable the general public to form an opinion regarding the company that it would be most advantageous for the Government to grant the concession to. The principal points of difference in the two proposals seem to lie in the percentage offered to the Persian Government on account of royalties, and the term within which the oil wells will be made ready for the actual output of oil. The Sinclair Company undertake to have the oil-fields in working order within five years, whereas the Standard's proposals mention eight years, though I believe they also have since agreed to five years. As regards royalties, the Standard offer 10 per cent. on the gross output of oil and other minerals, whereas the Sinclair offer 16 per cent. on the net profits, increasing this to 25 per cent. in proportion to the profits. The matter, therefore, appears to remain *in statu quo*, and a final decision seems to be as far off as ever, in view of conflicting opinions and of the unwillingness of the Government to commit itself to a decision which it might regret after granting the concession.

PHŒNIX & ROUMANIAN CONSOLIDATED.

Terms of Amalgamation.

The directors of the Roumanian Consolidated Oilfields, Ltd., in a circular with reference to the proposed amalgamation with the Phœnix Oil and Transport Company, Ltd., state:—

At the time when the destruction of the wells took place, just six years ago, the company, after a remarkably satisfactory beginning, had every prospect of becoming one of the most successful of British oil undertakings. During its first four years profits had been earned to the amount of £500,535, which (after writing off £9,707 for preliminary expenses) had been applied as follows: Depreciation, £161,590; reserve funds, £109,060; credit of profit and loss account at June 30, 1916, £220,178. When the destruction took place the company had installations with producing wells at Bana Moreni, Baicoi, Chiciura, Bordeni, Telega, Bustenari, and Campina, all of which were in operation in November, 1916, and a summary of its assets comprised: Acreage of oil rights, etc., over 5,000 acres; refineries, two; workshops, five; oil pipelines, 175 kilometres; steam, water, and other pipelines, 120 kilometres; tankage on fields, etc., 60,500 tons; tankage at Constanza (for shipping purposes), 5,000 tons.

The valuations for the purpose of making up the claim for the destruction were upon the basis of the prices current at that time, viz., 1917, but everything which has since required to be purchased has actually cost a great deal more, and in some cases more than twice the figures of the valuation, and the cost of labour has enormously increased. While, therefore, the sum of about £1,250,000 would have been a fair statement of the cost of replacement shortly after the destruction, at no time since the armistice when reinstatement has been practicable could any full reinstatement have been carried out at a less cost than £2,000,000 sterling. All efforts to obtain payment of any sum whatever on account of the company's claim have, up to the present time, been unsuccessful; the consequent enormous loss which the company has sustained is, therefore, to be ascribed to the callous indifference of the British Government.

The directors, with great reluctance, took proceedings by Petition of Right, and in the first instance were successful when the case was tried by Mr. Justice Darling. Against this decision the Government appealed, and in the Court of Appeal were successful on technical grounds. The Government maintained that Roumania was primarily liable, and that France and Great Britain were responsible merely as guarantors for part of the loss sustained, and your directors believe that it was upon the assurance given in court by the late Attorney-General (who is now Lord Chief Justice) that the British Government would put your company's claim forward to and through the Roumanian Government, and would see that a reasonable settlement was effected, that the Court of Appeal took that view and decided adversely to your company's claim.

In the meantime, the Roumanian Government had appointed a Judicial Tribunal, which fixed the amount for complete reinstatement at lei 296,591,675. Further, the French and British Governments appointed an expert Anglo-French Commission. Your directors were not able to ascertain the particulars of that report, but received information which enabled them to state in April, 1921, that the amount for which the British and French Governments would ultimately admit liability as guarantors would, in any case, not be less than £300,000. At the same time, your directors were informed through the Treasury that the Government had authorised the statement that, in their view, the final adjustment of the figures would be made by a Plenipotentiary Committee, representing the three Governments, and that the British Government would urge that Committee to deal with this company's claim first.

As soon as possession of the properties could be recovered, the directors proceeded with the work of reinstatement; but during the whole time they have relied from month to month and from year to year upon obtaining some substantial amount in respect of the destruction. The shareholders have been loyal to the board, and have never failed to give the necessary financial and other support, and a further issue of shares which was made in 1920 was subscribed to the extent of £200,000, and since then a debenture issue has been created and issued (most of which, however, from time to time had to be used in order to discharge obligations already existing), and in respect thereof £600,000 or thereabouts has been subscribed. It will, however, be understood that with the great advance in prices and rise in wages it was always impossible to reinstate what was destroyed when only about one-quarter of the cost was, at the outside, available for the purpose.

The position at the present time is as follows: The leases of the more valuable lands have been renewed and important territories added. A considerable number of wells are now producing, and there is little doubt that the rate of production can be greatly increased when adequate power becomes available. There are fifteen producing wells and twelve wells in course of being drilled, of which three have been for some months past almost daily expected to come into big production. A number of other wells are only delayed for the necessary machinery and equipment and the funds to meet the outlay for wages. Buildings are practically all rebuilt. Tanks for over 30,000 tons are newly constructed and 130 kilometres of pipelines relaid and joined up. The machine shop is rebuilt, refitted, and in full working order.

A valuation made in 1921 on the basis of that year's values and prices, and including all the wells, buildings, pipelines, tanks, inventories, etc., then in existence, and, in fact, all the assets, amounted in March last year to a sum in Roumanian currency which, at the rate of exchange current at that date, viz., 285 lei to the £, showed a value exceeding £2,000,000 sterling. The company has now just completed the new refinery designed with all the latest improvements and with a capacity of over 400 tons per day, which can be readily increased to 600 tons and more.

From the foregoing it will be seen that, while this company was initiated with excellent prospects, and down to the date of destruction proved itself to be a valuable and increasingly successful undertaking, its patriotism has been ruinous, and it has, unfortunately, been subjected to the most unfair and unreasonable treatment at the hands of the British Government. The company's resources have been carefully husbanded, and the half-year's interest on the debentures due on October 31, 1922, has been paid.

At the date when this circular goes out the company has no debts whatever in England beyond the debenture debt, except the half-year's interest paid October 31, which was borrowed from the bank, and certain money payable for income-tax to the Inland Revenue. It has, however, become obvious to the board that the company's available means of securing additional working capital are approaching exhaustion, and that in default of receiving some substantial sum (and practically at once) on account of the company's claim, it will be impossible to continue the necessary work of development and reinstatement. Under these circumstances, negotiations have been opened with the Phœnix Oil and Transport Co., Ltd., and a provisional agreement has been arrived at.

Captain Thomas S. Masterson, who was the technical manager of your company's undertaking in Roumania during the most successful period of its early history, is now the general manager in Roumania of the Phœnix Co., and therefore, upon the proposed merger being carried through, the concern will once more have the advantage of his services and technical skill.

Digitized by Google

The scheme enables each debenture-holder and each shareholder to exchange his holding for fully-paid shares in the Phœnix Co. The Phœnix Co.'s shares have for some time stood at a substantial premium, and the directors of your company are, without exception, convinced that the best arrangement that can now be made by the debenture-holders and shareholders of Roumanian Consolidated is to exchange for Phœnix shares, and that the proportions indicated in the provisional agreement are fair. These proportions are 300 full-paid £1 Phœnix shares in exchange for every £400 of the R.C.O. debentures, and one £1 Phœnix share for every two ordinary R.C.O. shares.

A special feature of the proposal which is of extreme importance is the clause in the agreement with respect to net cash available for working capital. The directors of your company stipulated that they should be satisfied that arrangements were definitely made and assured whereby the Phœnix Co. will have either in actual cash or in guaranteed proceeds of an agreed issue satisfactorily underwritten at least £400,000 cash over and above all liabilities, and over and above all costs and expenses, and such amount to be in the nature of net cash working capital, irrespective and outside of all the properties, machinery, tools, stocks, etc., belonging to the Phœnix Co. This has been done, and is guaranteed, as mentioned in the agreement.

Your directors and their friends hold a large portion of the debentures, and they are also among the largest shareholders. They are each of them, individually and collectively as a board, satisfied, not only that the arrangements indicated in the agreement are the best that could be made, but that they do, in fact, secure for the debenture-holders and for the shareholders respectively, not merely the full value of their debentures and shares, but the almost certain prospect of a considerable increase in value.

As most of the company's debenture-holders are also shareholders, it has been decided to hold the two meetings at one and the same time. It is extremely important that all debenture-holders should either before or at the meeting inform the board as to their views, whether each of them concurs or otherwise, because an effective resolution of debenture-holders cannot be passed unless the holders of at least one-half of the debentures are present personally or by proxy and pass the required resolution by a majority of at least three-fourths.

With regard to the shareholders, while there is no such high quorum required, the Phœnix Co. have the power to refuse to carry out the agreement unless a very large proportion of the shareholders signify their consent.

Both debenture-holders and the shareholders who assent are not only to be entitled to receive Phœnix shares in exchange in the proportions indicated, but those whose assent is notified prior to the making of the issue of the new shares in the Phœnix, will become entitled to valuable rights capable of either being exercised or not at the option of each debenture-holder and shareholder, or possibly of being sold for cash.

PHŒNIX OIL POSITION.

The directors of the Phœnix Oil and Transport Co., Ltd., in a statement regarding the position of the company, state:—

The company has acquired the share capitals of the following companies in the proportions stated:—Beciu (Roumania) Oilfields, Ltd., 99 per cent. (No mortgages or debentures issued by this company.) Traian Roumanian Oil Co., Ltd., 98 per cent. (No mortgage or debentures issued by this company.) Anglo-Roumanian Petroleum Co., 94 per cent. (and the whole of issued debentures). Stavropoleo Moreni (Roumania) Oil Properties, Ltd., 78 per cent. (and the whole of the prior lien mortgages and first mortgage debentures). The Phœnix Co. has also taken over the assets and undertaking of the Anglo-Continental Oil Co., Ltd., and the Masterson Roumanian Oil Syndicate, Ltd.

The Phœnix Co. therefore owns an up-to-date refinery at Ploesti, the refining centre of Roumania, with a capacity of 300 tons per day, which has been rebuilt to its condition as in 1916 (prior to its destruction on the German occupation of Roumania), with extensive additional storage and other improvements, and is in active operation. The companies enumerated above, of which the Phœnix Co. hold practically the entire share capitals, own more than 10,000 acres of oil-lands, including some 1,200 acres in the already proven prolific fields of Moreni, Bustenari, Bordeni, Runcu, Baicoi, etc. The company acquired these valuable assets practically entirely for shares, as the consideration payable amounted to £589,839, which was satisfied as to £574,637 in shares and only £15,202 in cash.

The company owns through its subsidiary companies large inventories of derricks, boring materials, tanks, pipe-lines, etc., in addition to about 100,000 ft. of new oil-well casing, and eight new rotary drilling outfits which are actively engaged on the company's extensive drilling programme in the most prolific areas.

The published monthly progress reports show that in the past six months—May to October—the company's crude oil production was 24,935 tons—a monthly average of over 4,000 tons, and it is interesting to note that at the last general meeting held in December, 1921, when the production was only 1,000 tons a month, the chairman stated that the company was working at a profit. The company has no less than 15 new wells in drilling—three in the Moreni district in close proximity to the company's present gushers, four in the prolific Runcu district, one in Tuicani, two in Bordeni, one in Baicoi, three in Chiciura, and one in Arbanasi. Of these two have just struck the oil sands, and preparations are being made for handling their production, while several are approaching the oil horizons, and will closely follow each other into production.

The company's trading department is a very complete organisation, regular shipments being made to England and all parts of the Continent. To take advantage of the very remunerative markets for refined products existing on the Danube, and for rapid and economical distribution, a fleet of four tugs has already been secured by the company, and have arrived in Roumania, so that it is complete in every detail as producers, refiners, and distributors.

The Phœnix Co. has recently also acquired through its subsidiary—the British Orion Co., Ltd.—a substantial holding in the Société Anonyme Petrolifere "Orion," a well-established dividend-paying company operating in Roumania held by Dutch interests. This holding was secured at £18 per 2,000 lei share, although these shares have been as high as £90 each on the Amsterdam Bourse, and are at present considerably over £30. The company has an option at £24 per share to practically treble its present holding in this important company, and what is even more important and valuable, an agreement has been entered into by which the Phœnix Co. has the use of all the refining, storage, pipe-line, and other facilities of the "Orion" Co. surplus to their own requirements, and the value of this may be better appreciated when it is pointed out that the "Orion" Co.'s refinery is an up-to-date installation with a capacity of 600 tons per day complete with lubricating oil plant, and their equipment includes no less than 60,000 tons storage capacity, besides storage tanks at Constanza, and pipe-lines from the various producing fields to the refinery. Further, under the terms of the agreement the Phœnix Co. has the marketing of the whole of the "Orion" Co.'s products for many years to come. The Phœnix Co.'s general manager has been appointed joint manager of the "Orion" Co. in Roumania, and two of the directors of the Phœnix Co. have been appointed to that company's board.

On and after December 1 the address of the Commercial Secretary for Hungary, Mr. R. J. E. Humphreys, will be, British Legation, I. Verbiczy utcza 1, Budapest, and all communications should in future be sent to this address.

H.M. Commercial Secretary at Bucharest reports that the importation of opium and all its derivatives into Roumania is only permitted under a special authorisation for each parcel. These authorisations will be granted only to registered chemists, druggists, and factories for chemical products recognised as such by the sanitary service.

The Minister of Finance, Belgrade, has decided that, in accordance with article 20 of the regulations concerning traffic in money instruments and currency, no financial institution in the country may open a credit to any person or issue loans against foreign values in any way whatever, and all credits thus given must be liquidated at latest by October 31 of this year.

LONDON PRODUCE REPORT.

Lemon Arrivals Poor.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in steady demand at variable rates. Tate's cubes have advanced 3d. at 56s. 9d. London granulated has shed 1s. at 50s. 7½d., while Lyle's granulated shows no change at 50s. 10½d. Foreign descriptions show advances in all cases. West Indian crystallised and white Mauritius both show a gain of 3d. at 44s. 3d. and 47s. 6d. respectively. White Java at 48s. 4½d. has advanced 7½d. Quotations are:—November, 21s. 6d.; December, 21s. 4½d.; January, 21s. 6d.; February, 21s. 7½d.; March, 21s. 9d.; and May, 22s.

Coffee.—The market remains steady, with no change in prices. East Indian is 110s., Nairobi remains at 94s., and Costa Rica is unaltered at 116s. The futures market has been quiet. Quotations are:—December, 62s. 6d.; March, 60s. 3d.; May, 60s. 6d.; and July, 60s.

Desiccated Coconut.—A better inquiry has been in evidence during the past week, and prices have hardened accordingly.

Rice.—Supplies of Burma "two star" rices are now exhausted, and the market is very short of American Java rices. Spanish Japan rice, which can be obtained very cheaply, is the subject of excellent demand, and there is a probability of a large advance in prices during the next week or two.

Green Fruit.—The position with regard to oranges has slightly improved, but arrivals are very irregular. Supplies to hand this week have certainly been larger, but not nearly sufficient to cope with the demand. Quotations for Denia and Valencia fruit are 16s. 6d. to 35s. box (300's to 360's). Advances are to be noted in all grades of lemons. Box fruit is attracting most buyers at the present, but the market generally is almost at a standstill owing to the small shipments now arriving. Quotations for Messina lemons are 15s. to 27s. 6d. box (300's); 24s. to 52s. 6d. case (300's). Valencia onions are now lighter with an advance in prices.

Dried Fruit.—Sultanas are meeting with a steady request, while sales of Valencia raisins are on a fair level. Other qualities of raisins are being neglected. Good business is being transacted for Pyrgos currants, which have shed 2s. cwt. during the week. Supplies of figs are very limited, and if an exceptional demand takes place during the next week or so a sharp advance in prices may be looked for. There is an acute shortage of good quality muscatels, and it is not unlikely that supplies will be exhausted on the approach of Christmas. The demand for almonds has improved, but prices are showing steady advances daily.

Oilseeds.—A harder tone has prevailed. Indian linseed is 2d. up at 19s. 9d., but La Plata is steady at 18s. 9d. Rapeseed is harder, with Toria at 17s. 10½d. and bold Ferozepore 6d. up at 17s. 1½d. Cottonseed, with the exception of Indian, which is firm at 9s., has advanced. Sakellarides is 4½d. up at 10s. 6d. and Egyptian black has gained a like amount at 10s. 10½d.

Oils.—An unsteady tone has ruled throughout. Linseed oil has come to business at 38s. Crude rape oil and refined are both the same at 41s. 6d. and 44s. 6d. respectively. Cotton oil is unsteady. Egyptian and technical show no change at 35s. and 36s. 6d. respectively, but refined has shed 3s. at 41s. Deodorised is eighteenpence lower at 45s. 6d.

Oilcakes.—An advance of 10s. is to be noted in all cases. Quotations are now 280s. for linseed cake, 150s. for cottonseed cake, 250s. for cottonmeal cake, and 170s. for coconut cake.

The traffic receipts of the South Indian Railway Co., Ltd., for the week ended October 28 amounted to Rs. 8,10,309; total for the year, Rs. 2,84,70,519. For the corresponding period of last year receipts amounted to Rs. 9,80,044; total for the year, Rs. 2,55,57,963.

'BALKAN' NATIONAL INSURANCE COMPANY

FOUNDED 1895.

HEAD OFFICE: SOFIA, BULGARIA.

AGRICULTURE IN IRAQ.

The following extracts are taken from the Agricultural Bulletin of Iraq for the month ended October 15:—

Climatic conditions have been much more favourable to plant growth. Trees, shrubs, and field crops are everywhere looking fresher since the advent of cooler weather. Conditions have not been so favourable for ripening, however, and the harvesting of summer crops will accordingly be later.

The demand for water has been less, and in most areas the supply has been ample except on the Yusufiyah, where there is a shortage of water, said to be due to the low level of the Euphrates.

Grazing continues to be scarce. Fodder is plentiful and cheap. All classes of animals appear to be in good condition, especially for this time of the year. It is understood that the live-weight standard for Army requirements of cattle and sheep has been increased. This has been possible largely to the fact that the demand has considerably decreased, but it is nevertheless a good indication of the improvement that has gradually been taking place.

Experimental Farms.

Baqubah.—Lucerne, bersim, senn hemp, and ground nuts are progressing favourably. The imported varieties of mulberries are doing well, and should be ready for transplanting in the spring.

Rustam.—Ploughing in of wheat stubble and subsequent harrowing has been in progress. Plotting and channelling of land for the 1923 cotton crop has been commenced. This is being done in a manner which it is hoped will facilitate the use of tractor-drawn, ridging ploughs. Thrashing and winnowing of wheat has been completed. An attempt is being made to utilise a mechanical device for separating wheat into three grades. It is not yet known if the enhanced price of graded wheat will pay for the cost of grading, but in any case the device should prove useful departmentally in producing only large, well-matured grain for seed. Cotton picking has been continuous throughout the month. The crop looks healthy, and is reported to be only slightly attacked by bollworm. From October 1, the estate, as distinct from the research side of the farm, is being run on the share system as practised in Iraq. This is being done in the interests of economy.

Some interesting figures are anticipated from the comparative yields of cotton grown on ridges, and planted by one and two-rowed cotton planters. So far the yields indicate the superiority of the latter method. The difference is sufficiently marked to call for further investigation, and renewed trials in the future. Should it be proved subsequently that mechanical planters are superior, the result will have a most important bearing on the encouragement of large estate-cultivation of cotton in the future.

Cotton.

Cotton pickings appear to be late this year. In many of the crops there has been abundant boll production, but owing to the cooling down of the weather those have been late in opening. The crop raised by the Koyumdjian Bros. at Felluja was badly attacked by spotted bollworm. They estimate that two-thirds of their crop has been destroyed. Nowhere else has the attack been so severe. Its intensity has been attributed partly to the growth of "Jiljil," which was self-sown from a previous crop, and the absence of the ichneumon fly, "Rhogas Kitcheneri," which is a parasite on the bollworm, and is reputed to keep it in check. Provided the weather continues sufficiently warm there should be heavy pickings towards the end of the current month, in the areas commanded by the Yusufiyah and Saklawiyah canals.

Research.

The insect causing "Mann" disease of dates has not been found on trees which were systematically sprayed early in June, although trees which were not sprayed have been found infested with them.

A sample of dates from Basrah was found unfit for consumption due to the mite which causes "Ghubber" disease. These mites evidently continued to breed after the fruit had been collected, stored, and packed. From this it would appear that the disease is capable of causing much loss even after the dates have been harvested. Considering the ease with which Ghubber disease can be checked by simple spraying operations, the necessity for systematic control becomes increasingly obvious.

Miscellaneous.

The Halawi date harvest is reported to be the best for several years, but prices have dropped from Rs.213 to Rs.83 per ton.

About 20,000 tons of barley and two to three thousand tons of wheat have been exported to date.

Digitized by Google

CURRENT PRICES.

General Produce.—Bacon (Continental), 144s. per cwt.; (Canadian), 117s. cwt.; (American), 99s. cwt.; butter (Danish), 213s. cwt.; (Australian), 189s. cwt.; (New Zealand), 211s. cwt.; cheese (Canadian), 127s. cwt.; (New Zealand), 129s. cwt.; lard, 81s. cwt.; eggs (Danish), 34s. per 120; (Styrian), 16s. 3d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 121s. cwt.; (East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 94s. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 105s. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¼d. lb.; pimento, 2⅓d. lb.; raisins (Valencias), 77s. 6d. cwt.; currants (Vostizza), 84s. cwt.; currants (Amalias), 67s. cwt.; sultanas (Smyrna), 125s. cwt.; sugar (Tate's cubes), 56s. cwt.; (Lyle's granulated), 50s. 9d. cwt.; (Mauritius crystals), 47s. 3d. cwt.; (West Indian crystallised), 44s. 3d. cwt.; (centrifugal), 17s. 6d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 12s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. 3d. lb.; wheat (English white), 43s. 6d. qr.; wheat (Australian), 40s. 6d. qr.; oats (English), 30s. 9d. qr.; oats (La Plata, ex ship), 28s. 9d. qr.; maize (La Plata), 36s. 9d. qr.; flour, 37s. 6d. sack.

Chemicals.—Acids: Boric, 56s. cwt.; oxalic, 7½d. lb.; citric, 1s. 9½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £50 ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 5s. ton; borax crystals, 28s. 6d. cwt.; cream of tartar, 103s. 6d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £36 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5½d. lb.; alkali (58 per cent.), £7 18s. 9d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £19 17s. 6d. per ton; hyposulphite, £14 ton; prussiate, 11d. lb.; nitrate, £13 6s. 9d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £38 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 10s. ton; sulphate of copper, £26 12s. 6d. ton; sulphate of iron, 55s. ton.

Metals.—Aluminium, £100 ton; antimony (English regulus), £34 10s. ton; bismuth, 10s. lb.; copper (standard), £63 8s. 9d. ton; copper (electro), £71 ton; gold bars, 91s. 11d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £17 5s. ton; lead (soft foreign), £26 1s. 3d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 43s. 9d. unit; nickel, £137 10s. ton; platinum, 440s. oz.; graphite (80-90), £12 10s. ton; quicksilver, £12 2s. 6d. bottle; spelter (G.O.B.), £39 2s. 6d. ton; tin (standard), £177 11s. 3d. ton; wolfram, 14s. 9d. unit; zinc sheets, £41 15s. ton; tin plates (20 x 14), 19s. 4½d. box; silver bars, 32d. oz.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9¼d. lb.; 80 to 89 lb., 9½d. lb.; 70 to 79 lb., 9d. lb.; 60 to 69 lb., 8½d. lb.; 59 lb. and under, 7½d. lb.; (second), 90 lb. and up, 8⅜d. lb.; 80 to 89 lb., 8⅜d. lb.; 70 to 79 lb., 8¼d. lb.; 60 to 69 lb., 7⅝d. lb.; 59 lb. and under, 6d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6d. lb.; (second), 60 lb. and up, 6d. lb.; 59 lb. and under, 5¼d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 5⅜d. lb.; (second), 4⅜d. lb.; (third), 2½d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7 to 12; Durbhangas, 7 to 8; Patnas, 5 to 6. Salted cows, 6 to 8.8. Arsenic hides (buffalo), 4 to 6. Skins: Calf, 8 to 10 per 20 lb.; goat, 265 to 325 per 100 pieces.

Miscellaneous.—Cotton (American), 15.00d. lb.; Egyptian (Sakel), 18.25d. lb.; jute (first grade), c.i.f., £35 ton; jute (lightnings), £32 15s. ton. Oilseeds: Linseed (La Plata), £18 13s. 9d. ton; palm kernels, £17 3s. ton; castor seed (Bombay), £17 ton; sesame seed (China), £21 12s. 6d. ton; soya beans, £10 12s. 6d. ton; olive (Spanish), £74 ton; rape (crude), £41 15s. ton; soya, £35 5s. ton; petroleum, 1s. 2½d. gallon petrol, 1s. 8d. gallon; fuel oil (ex tank), 65s. ton; coconut (Ceylon), £38 2s. 6d. ton; cotton (crude), £34 15s. ton.

The directors of the Burma Railway Co., Ltd., announce that the transfer books of the ordinary stock will be closed from December 11 to 30 next, both days inclusive, for the preparation of the half-year's interest and dividend warrants.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated November 20:—

Season.—November 13 and 14, rainfall nearly general in Chota Nagpur, Central Provinces, Madras, and Malabar, and local in Burma, Bombay, Deccan, and Hyderabad. November 15 to 19, rainfall local in South Madras and Tenasserim. Condition of Crops.—November 17: In Bengal prospects of winter paddy are very favourable generally, and sowing of spring crops approaching completion. In Punjab standing crops are average to good. Cotton and sugarcane yield normal. In Central Provinces wheat, linseed, and other spring crops are very promising. In United Provinces prospects of wheat, grams, sugarcane, and cotton are normal to good. Assam.—November 20: Outturn of winter rice, cotton, tea, sugarcane, and prospects of rape and mustard seed normal.

Markets.—November 16: Bombay cotton market steady. Fine M.G. Oomras Rs. 436 December-January; Rs. 434 March. Bombay cotton arrivals from September 1 to November 10 were 68,000 bales, as compared with 321,000 bales during the same period of the last year. During the week November 4 to 10 the arrivals were 17,000 bales, and during the previous week, October 29 to November 3, the arrivals were 4,000 bales only. Bombay imported piecegoods market unchanged. Local goods now attracting more demand and prices steadier. Karachi, Baghdad, and Basrah buyers most in evidence. November 18: Calcutta jute market firm and sellers reserved. Good inquiry for shipments continues. Hessians have risen considerably during the week. 9 porters Rs.20.7 on November 18. Heavies steady. B twills Rs. 44.8; Liverpool twills Rs. 52. At tea sale on November 14 selections useful but qualities barely up to last week. Market dull and competition being absent, practically all tea was taken out at about 1½ annas below last week's rates. Sellers firm, and reduced rates only half to one anna generally, at which rate majority of tea was sold. Dusts strong and about 3 pies dearer. This sale's average price was 14 annas 3 pies, against last week's price of 15 annas 9 pies per lb. 496,631 packages sold to date at an average price of 12 annas 2 pies per lb. October crop figures show increase of 6,000,000 lbs. on last year. Shellac.—November 14: Market quiet. T.N., Rs. 158 to Rs. 160; closed at Rs. 153. No change in bank rate.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on November 17 were as follows:—Agricultural Bank of Egypt, £5 9-32; Alexandria Water Company, Ltd., £8 25-32; Anglo-American Nile Steam, £3 9-32; Associated Cotton Ginners, £31-32; Banque d'Orient, 33¼ fr.; Behera Ord., £E7½; Brasseries d'Egypte, 50 fr.; Building Lands of Egypt, £31-32; Cassi di Sconto Priv., 96 fr.; Comptoir Fin et Com. d'Egypte, £1 7-16; Consolidated Lands, £T5; Credit Foncier Fondateur, 1045 fr.; Credit Foncier Act, 710 fr.; Credit Foncier 1886 Oblig., 315½ fr.; Eaux du Caire, Capital, 87 fr.; Eaux du Caire Jouissance, 116 fr.; Egypt and Levant, S.S. Ord., 26s. 9d.; Egyptian Delta Light Railways, £4⅜; Filature National d'Egypt, £10⅜; Immeubles d'Egypt Soc. an des., £6⅜; Khedivial Mail S.S. Ord., 80s.; Khedivial Mail S.S. Company Pref., £3¾; Kom Ombo Ste an de Wadi, £4 3-16; Kom Ombo Ste An. Fondateur, £32; Land Bank of Egypt, Parts de Fond, £51; Lots Turc., 33 fr.; Menzaleh Canal Navigation, £T291; Grand Hotels d'Egypte, £8 9-16; Ramleh Railways, £3⅜; Urbaines et Rurales, £3 15-16; Union Fonciere Fond., £½.

ROUMANIAN TREASURY BILLS.

The Roumanian Government announces that a large majority of the holders of Treasury bills have already availed themselves of the right to convert. The adjustment of certain legal details in France, Italy, and Belgium caused an unavoidable delay in the publication of the terms of the conversion in those countries. As a consequence, the offer of conversion to holders of Treasury bills abroad will remain open for acceptance until January 15, 1923.

In order to place holders of Treasury bills in all countries upon the same footing, the Roumanian Government accordingly hereby gives notice that all holders of bills who have not at present converted may do so, upon the terms of the offer already published, on or before the said January 15, 1923.

With reference to the extension of time for the deposit for conversion of Roumanian Treasury bills, the British Overseas Bank and Helbert, Wagg and Co., Ltd., state that the holders of bills representing approximately £21,000,000 have already deposited or arranged to deposit their bills.

Shipping Intelligence.

THE S.S. ADMIRAL COUNTOURIOTIS.

(*From Our Own Correspondent.*)

Athens, November 18.

It was announced last week that the British insurance companies had agreed to pay to the Chios Steamship Co. the sum of £275,000 as indemnity for the loss of the s.s. Admiral Countouriotis, which was destroyed by fire in Salonika harbour about two years ago.

NORTH SEA TO THE CASPIAN.

It has just been announced from Teheran that a small German steamship has reached Enzeli, the Persian port on the Caspian, direct from Hamburg, with a cargo of sugar, footwear, and sewing-machines (says *The Times*). This vessel is the Pionier, which was dispatched experimentally by the August Bolten shipping firm of Hamburg to test the condition of the Russian internal waterways, after the great breakdown of communications in the Russian Empire. The Pionier left Hamburg in the middle of July, and, passing through the Baltic, reached Petrograd, and by the Neva entered Lake Ladoga. Thence she made a long journey through the canals, which ultimately brought her to Rybinsk, on the Volga. The Pionier reached Nijni Novgorod on October 8, descended the river to Astrakan, and proceeded to Baku and Enzeli. The object was to demonstrate that these internal waterways are still navigable.

NEW ELLERMAN-HALL LINER.

The City of Singapore.

The launch took place, on November 17 at West Hartlepool, of the steel single-screw steamer City of Singapore, which Messrs. William Gray and Co., Ltd., are building for the Hall Line, of the Ellerman Lines, Ltd., Liverpool. The vessel is handsomely modelled, having a cruiser stern, and her dimensions are: Length overall, 451 ft.; extreme breadth, 57 ft. 3 in.; and depth moulded, 32 ft. 10 in.; classed at Lloyds 100 A 1. She has two decks, laid with long poop and combined bridge and forecastle decks.

The ship is fitted out to meet the owners' special requirements for the Indian trade, and the double bottom is arranged for the carriage of oil fuel and fresh water. The equipment embodies all the latest improvements, which include fresh water distiller, steam windlass, steam steering gear, electric lighting, and wireless installation. The cargo-handling appliances are very complete, including fourteen steam winches and sixteen steel derricks, as well as a heel socket for a heavy derrick, and the foremast is specially strengthened to take a lift of forty tons if required.

The propelling machinery, made by the Central Marine Engine Works of the builders, consists of a set of triple-expansion engines with cylinders 24½ in., 42½ in., 74 in. diameter by 51 in. stroke, and three large boilers adapted for a working pressure of 225 lbs. per square inch. A large number of steamship auxiliaries, also made by this firm, are included in the machinery installation.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s Scindia for Bombay (Liverpool, December 4); s.s Massilia for Bombay (Liverpool, December 16).

Anchor Brocklebank Line.—S.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9); s.s. Mangalore for Calcutta (Birkenhead, December 13); s.s. Matheran for Port Said, Colombo, Madras, and Calcutta (London, December 23); s.s. Manipur for Calcutta (Birkenhead, December 28).

Bibby Line.—S.s. Lancashire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, December 6); s.s. Yorkshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, December 20).

British India Line.—S.s. Warfield for Bombay and Karachi (London, December 9); s.s. Nagina for Colombo, Madras, and Calcutta (London, December 9); s.s. Gamaria for Bombay and Karachi (London, December 16); s.s. Margha for Colombo, Madras, and Calcutta (London, December 22); s.s. Masula for Bombay and Karachi (London, December 30).

Clan Line.—S.s. Clan MacNab for Bombay and Persian Gulf (Birkenhead, December 7).

Cunard Line.—S.s. Tyria for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Sulina, Poti, and Batoum (Liverpool, December 2).

Ellerman Line.—S.s. Grodno for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, December 7); s.s. Flaminian for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople (Liverpool, December 16).

Ellerman, Bucknall, and Strick Line.—S.s. Kormark for Persian Gulf (London, December 18)

Ellerman's "City" Line.—S.s. City of Valencia for Calcutta (Birkenhead, December 15).

Ellerman's "Hall" Line.—S.s. City of Rangoon for Bombay (Liverpool December 12); s.s. Sutton Hall for Karachi and the Punjab (Liverpool, December 12); s.s. Crewe Hall for Malabar Coast ports (Liverpool, December 20).

Ellerman's Westcott and Laurance Line.—S.s. Tasso for Gibraltar, Malta, and Alexandria (London, December 13); s.s. Polo for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, December 20).

Glen and Shire Line.—S.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, December 14); s.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, December 28).

Harrison Line.—S.s. Governor for Calcutta (Liverpool, December 6).

Henderson Line.—S.s. Martaban for Port Said and Rangoon (Birkenhead, December 13).

Holt Line.—S.s. Teiresias for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, December 7); s.s. Peleus for Port Said, Port Swettenham, Singapore, etc. (Swansea, December 7); s.s. Laomedon for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, December 7)

Johnston Line.—S.s. Vedamore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, and Constantza (Liverpool, December 9); s.s. Willowmore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza

Moss Line.—S.s. Sitra for Gibraltar, Oran, Algiers, Malta, and Alexandria (accepting through transhipments to Moroccan, Algerian, Cyprus, and Syrian Coast Ports (Liverpool, December 2).
(Liverpool, December 16).

Papayanni Line.—S.s. City of Oxford for Malta and Alexandria (Liverpool, December 9).

P. and O. Line.—S.s. China for Bombay (London, December 1); s.s. Novara for Colombo, Madras, and Calcutta (London, December 1); s.s. Mantua for Bombay (London, December 15); s.s. Malwa for Bombay (London, December 29).

Stock and Share Markets.

QUIET AND DULL TONE.

Business Very Restricted.

(From Our Own Correspondent,)

London, Tuesday Morning.

There has been surprisingly little business on the Stock Exchange during the week. For this the general outlook is presumably responsible. Evidently investors are waiting to see what happens at Lausanne and in regard to the Reparations question before entering the market. Despite the lack of business, however, the tone has, on the whole, been fairly firm, bespeaking no uncertain confidence as to developments in general. The solution of outstanding political difficulties would obviously mean that matters would go ahead rapidly, for it is only conditions in Europe that are impeding the long-awaited trade revival.

Writing some time ago I prophesied a host of new issues as soon as the General Election was over, and in the last few days we have begun to have them. The issues have been of a varied description, and investors have certainly no reason to complain of the sameness of the opportunities that are put before them. It will be interesting to see how they are taken up. It would not be surprising if in some cases there were not a substantial margin for the underwriters. That apart, the appearance of these issues is an excellent sign of improving conditions. They are the outward emblem of what we all feel, that the tide is at last turning, and that at long last we are within a reasonable distance of more prosperous times.

The Rubber market continues to improve, and with the raw commodity up to 1s. 1⅛d. at the time of writing, it goes without saying that the market is quite buoyant. I look for a much higher price than that in the near future, while if statistics recently published, which point to a shortage of rubber at the end of a year, are borne out, we may be in for something approaching a "boom." Among the "floriners" I like Bekohs as well as anything at the present, while among the higher priced shares Linggis are as good as anything.

Gilt-Edged Dull.

The improvement in this group recorded last week has not been maintained, and prices generally have eased off a little.

Consols at 56⅜ have shed ½, while War Loan Fives are unchanged at 99 5-16. The Conversion Loan is ¼ down at 76, while Fundings have lost a similar amount at 87. Indian stocks are about the same. The 3 per cent. stock is unchanged at 55¼, the 3½ per cent. stock is ½ down at 64¼, while the 7 per cent. stock is unchanged at 111.

There has been a minimum of activity in the Foreign group. In some cases a rather variable tone has developed as a result of the political situation and the movements of the exchanges. French stocks are closing on a dull note. War Loan Fives are a point lower at 29¼ xd, while the 4 per cents. at 23½ are ¾ down. German 3 per cents. close unchanged at 11-16, after being fractionally higher. Italian Rentes have further improved, and at 22 are ½ up. In Near Eastern securities Turkish Unified are unchanged at 26½, but Greek Monopolies have gained two points at 23½. Czecho-Slovak 8 per cents. are ¼ down at 92. Russians have been steady. The 4 per cents. are unchanged at 7½, the 4½ per cents. are also the same at 7½, while the 5 per cents. remain at 9½. In South American securities Peruvian Corporation issues have been a good spot, while Argentines have been rather neglected. Brazilians have been quite strong, with the 7½ per cents. up to 104, while the 1914 Funding is 66½.

Industrials Irregular.

Inactivity has been the outstanding feature of this group, business being, if anything, more restricted than ever. Until developments are more certain, nothing else can be looked for, and the probability is, as I suggested last week, that it will not be until the festive season is over that there will be any real revival. Here and there firm spots have been in evidence, but in many quarters a very irregular tendency has been in evidence.

Textiles have been on the dull side. Coats are 6d. down at 66s. 3d., while Courtaulds are unchanged at 57s. 3d. Listers have weakened, and are 6d. down at 28s. Tobaccos have again been in fair request. Bats at 88s. 6d. are 3d. up, while Imperial Tobaccos are 2s. 6d. up at 72s. 6d. Iron and Steel shares have been irregular. Vickers are 3d. down at 13s. 6d., Armstrongs are 9d. lower at 17s. 3d., Dorman Longs are 17s., while Guest Keens are 6d. up at 36s. 3d. Dunlop Rubbers have been a firm spot at 10s.

In the Indian Railway group Bengal and North-Western are ½ up at 134, Bombay Baroda are unchanged at 94, Burma have gained 1½ at 103, and Madras and Southern Mahratta are a point down at 104¼.

A better tendency has been in evidence in the Shipping group. P. and O. Deferred at 325 are 18 up, Cunards are 1s. 6d. up at 22s., Furness Withys have gained 1s. at 32s. 3d., while Khedivial Mails are unchanged at 3¼.

Oils Dull.

A rather dull tendency has prevailed in the market this week as a result mainly of the uncertainty of the general situation.

A feature of the market has been the weakness of Anglo-Persians, which at 4⅞ are ¾ down. The cause of this is apparently the belief that a further issue of Ordinary shares is in the offing. Burmahs have weakened in sympathy, and at 5 are 5-16 lower. Mexican Eagles have been rather weak, closing 5-32 down at 2 15-32, while Shell Transport have been dull, and are 3-16 down at 4 1-32. Lobitos have reacted sharply, closing at 5⅝. In the Trinidad group, Apex have eased off ⅛ at 2¼, Centrals are 1-16 down at 1½, while Leaseholds are ⅛ lower at 1⅛.

The Russian group has been fairly steady. Spies are unchanged at 5s. 6d., Anglo-Maikop remain at 3s., North Caucasians are 1-16 down at ⅝, Ural Caspians are 1-32 lower at 19-32, while Uroz are 4½d. down at 8s.

Among Egyptians, Anglo-Egyptian B at 1 5-16 are 3-32 down, while Oilfields of Egypt are unchanged at 1s. In the Roumanian group, Phœnix at 25s. 3d. are 1s. lower, while Roumanian Consolidated are 6d. down at 12s. 6d. So far, Phœnix have not been affected by the announcement of the amalgamation of interests. Dacia Romanos are unchanged at ¾, Steaua Romanos are 9s. 3d., while Hamilton's Oil Concessions are unchanged at 1s. 9d.

The arrival at Belfast is announced of the battleship Hindustan, where she will be broken up.

It is announced that British subjects travelling to Egypt via Italy, or vice versa, do not require the Italian visa, but they have to produce their passports at the frontier as proof of identity.

The traffic receipts of the Egyptian Delta Light Railways for the week ended October 31 amounted to £E15,667—total for the year £E185,442. For the corresponding period of last year receipts amounted to £E15,248—total for the year, £E217,134.

The directors of the Aboukir Co., Ltd., announce payment of interest on 6 per cent. first debentures on December 1, less tax, at 5s. in the £, on presentation of coupon No. 8 at the company's offices, 132-3, Palmerston House, Bishopsgate, London, E.C. The coupons must be left three clear days for examination.

FOREIGN EXCHANGES.

The foreign exchange market has been unsteady throughout the week. The feature has been the strength of sterling in New York, which rose to 4.52⅛, the highest point this year, and finally closed at 4.51 9-16. Paris has weakened to 64.22½, as against 61.35 for the previous week; while Berlin has again been unsteady, having touched 37,000 during the past few days, closing at 35,250. Brussels, Belgrade, and Rome have also been very irregular, while Constantinople has improved.

JAFFA MARKET REPORT.

A report received by the Imperial Ottoman Bank from Jaffa for October states :—

During the month there has been a rise in the prices of cereals generally. This has been caused by the reduction of stocks and the demand for local consumption. Prices now ruling are as follows :—Wheat, Ps.325; barley, Ps.245; beans, Ps.325 per kantar; sesame, Ps.3¼ per oke. Firmness prevails, and there is a rising tendency.

There have been some small shipments of *dhari* for Algeria and Malta. The export of oranges will commence in November. The fruit is a little late in maturing this year.

ARABIAN INTEREST IN MODERN IMPLEMENTS.

Crop conditions in the Abdali territory of the Yemen, Arabia, have shown a marked improvement since the territory has again come under the jurisdiction of the Sultan of Lahej, says an American Consular report. Greater attention is being given to cultivation, and the Sultan hopes soon to be in a position to arrange for the importation of agricultural implements. The farmers themselves are satisfied with the old and primitive methods, but are gradually being taught the value of time and labour-saving methods. They have been given all assistance possible, and to a large extent have been freed from the series of burdensome taxes which have for so long been imposed upon them. These taxes were based on acreage and quality and size of the crops, and were exceedingly discouraging to the farmers.

BENGAL IRON DEBENTURES.

Holders of provisional scrip certificates in connection with the issue of seven per cent. first debentures of the Bengal Iron Company are reminded that they should forthwith complete the form of registration at the back of the certificates and send them to the company at Clutha House, 10, Princes Street, S.W.1, for the preparation of the definitive registered debentures. The half-year's interest due January 1 next on the debentures represented by outstanding scrip certificates cannot be paid until the certificates, which are to bearer, have been lodged with the company for registration.

The court of directors of the Royal Mail Steam Packet Company have appointed Sir Leslie Scott, K.C., M.P., to be a director of the company.

The oil output of the Anglo-Egyptian Oilfields for the week ended November 24 amounted to : Gemsah, 47 tons (last week, 41 tons) ; Hurghada, 3,597 tons (last week, 3,153 tons).

The Cunard Steam Ship Co., Ltd., regret to announce the death, which took place in London on November 23, at the age of sixty-two, of Mr. Charles T. Milburn, one of the company's directors. Mr. Milburn, who was also a vice-chairman of the Commonwealth and Dominion Line, Ltd., joined the Cunard directorate in September, 1916.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

All-round Activity.

The Commercial Co. of Egypt, in their report for the week ended November 10, state:—

Since our last report the futures market has been very active, substantial advances being registered in the prices of both Sakellaridis and Ashmouni contracts. The persistent firmness and the high level of prices reached in New York market have had the effect of attracting a considerable demand for our own cotton, which has lifted the market from the dull and heavy state in which it was thrown by the unusually quick and early crop movement and the cultivators' pressure to sell. The demand from abroad has been rather good, the principal buyers being England and America, the latter now buying Sakellaridis as well as Ashmouni. Despite the heavy arrivals from the interior, there has been this week less hedging by banks and merchants, and speculators have become rather more bullish, all of which has naturally had its effect on the market. The general feeling has undoubtedly much improved, and provided no political event, either local or international, interferes to upset present activity, we think the lowest prices have been seen and that the statistical position will be strong enough to make any set-back be of a temporary character.

Spot.—A good business has been done this week at Minet el Bassal, and sales amount to about 46,200 bales of which we estimate 32,100 bales Sakellaridis, 13,600 bales uppers, 350 bales brown, and 150 bales white. Arrivals continue large, but prices in the interior have stiffened considerably, and cotton is not so eagerly offered for sale as during the past few weeks.

Sakellaridis.—All qualities have been dealt in, but there has been a very large and eager demand for the medium qualities from fair to g.f. strict. Low grades have also been in request at good prices. The prices of spot against contracts are rather dearer than last week

Uppers.—A good business has been done in all styles but mainly in medium qualities, which qualities have again been persistently sought after. Prices of spot against contracts are a little dearer than last week.

Brown.—A fair business has been done. Except for good, which is a little cheaper, prices are rather dearer than last week.

White.—A small business has been done. Prices do not show much change, except good fair, which is considerably dearer.

Crop 1922.—We give here below the Government's report for the month of October. The Government estimates the crop at about 4,160,000 kantars. We consider the Government's figure well below the mark. Our estimate, including the carry-over in the interior, is about five million kantars.

Report of the Government.—The weather, which was favourable during the period under report, has had a good effect as regards quantity, but not on quality. Practically no second picking has been taken owing to the majority of cultivators having collected all the crop in a single picking, thus increasing medium grades at the expense of very high and very low grades. As regards quantity prospects there has been no important change since the publication of the last report. Sales have been brisk during the month; the smaller cultivators particularly are showing no tendency to hold their stocks from the market, due to urgent need for ready money, a condition which has called for the assistance of the Government in the way of facilitating loans to them.

Futures Market Erratic.

A further report for the week ended November 17 states that the futures market has been very active, but at the same time very erratic, wide fluctuations being registered for both Sakellaridis and Ashmouni contracts.

The week commenced with a good outlook for a higher level of prices, but the heavy reaction in the American markets and the sudden falling off in the demand from abroad have had a very demoralising effect on our market, and during the last sessions of the week not only has the advance been lost but prices close lower than a week ago. We do not think this set-back justified, and we attribute it, to a great extent, to the liquidations of small speculators who, early in the week, had bought considerable quantities of contracts quite beyond their financial means, and who, at the first set-back in prices, found themselves unable to meet their differences. The narrowing between Sakellarides and Ashmouni early in the week was due to the hurried covering by export houses of new sales of Ashmouni to America, due to the difficulty of buying at reasonable prices on the spot market. As soon as these hedges were completed the differences again widened, and now stand at about the same level as last week. An appreciable improvement in the Continental exchanges is to be recorded, and should this continue an improved demand from these countries may be expected.

Spot.—Minet el Bassal has this week been fairly active and a good business has been done, but a marked falling away from last week's activity has been seen, and the demand from abroad has been on a considerably smaller scale, being checked, no doubt, by the recent advance in prices, and in England by the political happenings. Arrivals have been very heavy, and in spite of good exports the stock is over two and a half million kantars. We estimate sales at about 33,000 bales, of which 23,250 bales Sakellaridis, 9,400 bales uppers, 250 bales brown, and 100 bales white.

Sakellaridis.—All styles have been dealt in, the medium and lower grades preponderating. Prices of spot against contracts are generally dearer than last week. Very high prices have been paid for extra class cotton.

Uppers.—All styles have been dealt in. Prices of spot against contracts are rather dearer than last week. The situation in medium quantities is still the same, and between F.F. and F.G.F. there is very little difference in price.

Brown.—A moderate business has been done. Prices for the better grades are considerably dearer; those of medium and lower grades are at about last week's rates.

White.—A small business has been done at rather dearer rates than last week.

Crop 1922.—The Government has published its final estimate of the crop: the figure given is 4,002,000 kantars; we consider this figure ridiculous. Arrivals already amount to nearly 2¾ million kantars, and the ginning factories in the interior are full of cotton. We maintain our estimate for a crop of fully 5,000,000 kantars, including the carry-over in the interior on August 31 last.

LIVERPOOL REPORT.

Business on Small Scale.

Messrs. Reynolds and Gibson report as follows for the week ended November 22:—

The past week has been distinctly reactionary, and as compared with last week's total a comparatively small amount of business has been put through. Early in the week the market declined in sympathy with the setback which the American market suffered, but during the last two days prices have steadied again, and at the moment, although all "bullish" enthusiasm seems to have evaporated, there is no sagging disposition evident. Once again we find ourselves marking time and watching the course of events. The trade, which for some time past has been expressing its horror at the growing rise in the cost of the raw material, naturally welcomed the break in prices and, as is frequently the case, at once withdrew, to a large degree, its support. Whether the spinners' hope of lower prices is justified remains to be seen. The Egyptian spinners are commonly supposed to be doing better than their brothers in the American section, and considering the small Egyptian crop indicated, from which already large purchases have been made for America, one might naturally conclude that the price of Egyptian cotton would rise or fall on its own merits, and could, more or less, afford to ignore the fluctuations of its American neighbour. Such, unfortunately, is not yet the case, and once again we have seen how entirely the course of the latter is still dependent upon the fluctuations of the American crop. The American spinning section in Lancashire is evidently going through a bad period, and even now a ballot is being taken on the subject of a 24-hour week. The question remains, however, as to how far Lancashire can now influence the ultimate course of prices. The present statistical position is a strong one, and a reaction, which, incidentally, was rather overdue after the spurt of buying recently witnessed, is no excuse for shutting our eyes to the "bull" points in the situation, and accepting only "bearish" propaganda, which seems difficult to justify under existing circumstances.

The actual spot inquiry here has been noticeable chiefly for uppers and low cotton. When sentiment is good uppers are in request; when sentiment is "bearish" low cotton, 7.00d. to 9.00d. is eagerly sought for. There does not appear to be a great deal of upper cotton offering here under 16.50d., and the lower qualities—i.e., round about good fair—are very hard to find at all, and stiff prices are asked. The

Digitized by Google

inquiry for Sakellaridis, such as it is, appears to be slowly changing in character, and the tendency is working slowly towards the better qualities. There has been little doing, however, this week. Brown, pilion, and white have been neglected. C.i.f. business has been very much quieter, although a fair amount of business seems to be pending for uppers. Until prices are steadier, however, it is unlikely that much will transpire. Manchester reports have been dull and lifeless. A general mistrust of current rates is indicated, and a waiting attitude has been generally adopted. Estimated sales, 2,800 (including 1,100 bales Sudan). Quotations are reduced ¾d. per lb. all round. Fully good fair sakel 18.50d.

MANCHESTER COTTON TRADE.

Market Depressed.

(From Our Own Correspondent.)

Manchester, Saturday.

The general tone of the market during the past week has continued slow, and it can safely be said that the present position of affairs is one of depression. Most of the offers in piece goods from abroad have proved impracticable, and when transactions have been recorded they have invariably been at wretched rates. There is no doubt that our customers abroad, that is speaking generally, are not prepared to pay current Manchester rates. The only redeeming feature of the market has been the tendency for the cloth inquiry for China to broaden, and many leading traders are of the opinion that it should not be very long before buyers for that outlet operate on a much freer scale. It is now many months since China provided any decent business, but latest mail advices read very cheerfully, and report a scarcity of Lancashire cloths in the interior. One well-known maker has received what is considered in these days a substantial order for shirtings and sheetings, but instances like that are quite isolated. Perhaps the best of the outlets with regard to piece goods has been Egypt, and the demand has been well maintained. Here and there some fairly good orders have again been secured. Miscellaneous transactions in a small way have been recorded for the United States and South America. Home trade buying has been patchy. With regard to the yarn section, quotations for American yarns have been irregular in sympathy with the rise and fall in raw cotton values. The output has been in excess of the demand, and there is a probability of the ballot for extending the present short time working being carried. Egyptian yarn quotations have been fairly firm, and the mills are better situated than those in the American section. There has been talk in the market of more financial trouble.

COTTON TRADE REVIEW.

Exchanges and the Market.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended November 25 states:—

General.—The position in this market remains virtually unchanged from that reported during recent weeks. Either from a lack of confidence or of financial ability (or a combination of both), merchants in the principal consuming centres abroad continue to hold aloof, whilst in many of the minor outlets, such as Turkey and the Balkan States, political and exchange difficulties offer an almost insuperable obstacle to business of any moment. Spinners and weavers are losing ground, in spite of the short time in the former section.

Yarn.—It is said that even the much-reduced production consequent upon the shorter working week is not being cleared; there are therefore many weak sellers, and quotations are very irregular. Such buying as takes place, whether for abroad or for the Home trade, is practically all hand to mouth. Spinners of Egyptian cotton continue to be much more favourably placed than spinners of the coarser American counts.

Cloth.—This section remains in the unsatisfactory condition reported for many weeks past. As in the case of yarn purchases are mostly to satisfy immediate requirements, and there is not, as yet, any sign of improvement. Although manufacturers are quoting unremunerative prices for the sake of keeping their looms working, merchants are not disposed to operate. Reports from China have been a little better, but actual business for that market, and for India also, remains of very small dimensions. Egypt has sent a few orders, but, at present, Constantinople may be regarded as out of the market.

Raw Cotton.—The tone in Liverpool has been fairly steady, and prices show a small decline on the week. Demand from the trade has been on a small scale and interest is very subdued. The American ginning report published on Tuesday last gave a total of 8,870,000 bales to November 13, against 8,140,000 bales in the previous report published fourteen days earlier. It is generally considered here that these figures eliminate any prospect of shortage this season in view of the present reduced rate of consumption.

Closing prices are as follows:—American fully middling, 14.85; Egyptian fully good fair, 18.50.

COMPANY NOTES AND REPORTS.

Madras and Southern Mahratta Railway.

The report of the Madras and Southern Mahratta Railway Company for the year ended March 31 states that the capital raised by the company up to March 31, including debenture stock and debenture bonds, was £10,000,000, and capital outlay totalled £16,250,000, of which the Secretary of State's capital amounted to £11,250,000. Capital expenditure during the year was Rs. 95.97 lakhs. The gross earnings of the entire system amounted to Rs. 671.25 lakhs, compared with Rs. 639.93 lakhs, while working expenses amounted to Rs. 469.06 lakhs, or 69.88 per cent., as compared with Rs. 420.48 lakhs, or 65.71 per cent. for the previous year. There was a decrease of the net earnings of Rs. 17.26 lakhs. The surplus profits for the year realised £97,977. Interest on investments amounted to £28,246, making £126,223, compared with £221,957 for 1920-21. The directors recommend a final dividend of 25s. per cent. and a bonus of £1 10s. per cent. from stockholders' revenue account, in addition to the guaranteed interest of £1 15s. per cent. from the Government, making a total distribution of £7½ per cent. for the year. The reserve fund on March 31 remained at £500,000. equal to 10 per cent. on a capital of £5,000,000. The company has taken up jointly with the Bombay, Baroda, and Central India Railway Company the coal area in East Bokaro field in Bihar, where there is every prospect of obtaining a very large supply of coal of excellent quality. The acquisition of other joint coal areas in the neighbourhood is under investigation. Meeting, 25, Buckingham Palace Road, S.W., December 6. noon.

Oriental Gas.

The report to June 30 last of the Oriental Gas states that the sales of gas reached a total wholly unprecedented in the company's history, and gas rental exceeded the corresponding receipts for the previous year by £13,411. The exchange value of the rupee averaged slightly below par value of 1s. 4d., and produced an adverse result of £212. The directors recommend a further dividend at the rate of 4½ per cent., less tax, making 8 per cent., less tax, for the year.

CONTRACTS SECURED.

The result of the adjudication of October 5 for the supply of 100 metrical tons coloured cotton waste for the Egyptian State Railways, Telegraphs and Telephones, is that out of nineteen offers the contract has finally been placed with Messrs. Porter Bros., of Liverpool, at the value of £E27.400 mills. per metrical ton.

The Egyptian State Railways received 28 tenders for the supply of locomotives for the goods service and shunting, and an order has been placed with the Societa Italiana Ernesto Breda per Costruzioni Meccaniche, Milan, for 20 locomotives at the price of £4,750 each, delivered and erected free at Alexandria, customs excluded.

ENQUIRY BUREAU.

Merchants, etc., may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2." It must be understood that "The Near East" accepts no responsibility in connection with such replies.

129.—Principal of old-established textile manufacturing and import firm in Aleppo (Syria), now in Switzerland, wishes to get in touch with cotton and woollen yarn manufacturers or exporters in Lancashire and Yorkshire.

130.—Import and export merchants in Beirut (Syria) in a position to export dried carobs in any desired quantity wish to be connected with interested British firms.

131.—A Yugoslav firm is in a position to deliver white asbestos up to any quantity, and invites inquiries.

NOTES OF THE WEEK.

The Greek Executions.

For reasons that are stated elsewhere in this issue it is to be feared that the execution of the five Greek ex-Ministers will be regarded as due in large measure to political vindictiveness, and, unless a new spirit comes over Greece, the inevitable reckoning may be expected. The verdict of the Court-Martial in the case of Prince Andrew suggests that the Revolutionary Committee, owing no doubt to the salutary effect of Great Britain's action, has realised that the execution of the Ministers was a mistake. If the Committee has the true interests of Greece at heart, and has not merely been acting as a tool in a political vendetta, it will disband itself and hand over the reins of power to a Government strong enough, by setting its face against a further swing of the pendulum, to put an end to the campaign of impeachment, imprisonment, and murder associated since 1917 with the return to power of a political party. By such means Greek interests, both domestic and foreign, can best be served. The worst feature of Venizelism will be exorcised, and the Allied Powers, in particular Great Britain, will be free to offer Greece the help to which she is entitled and which is long overdue.

Progress at Lausanne.

Towards the end of last week it was reported that the Turkish delegation at Lausanne was showing a certain tendency to irritability, and, according to one correspondent, Ismet Pasha telegraphed to Angora that "the Turks must hold themselves in readiness to defend their rights." Such a telegram may have been sent, but probably no particular importance need be attached to it. What is certain is that throughout the greater part of the week a workmanlike spirit prevailed at Lausanne, and substantial progress was made in some directions. The question of the Ægean Islands, which had first come up for discussion at the end of the previous week, was considered by a Sub-Committee, which presented its report on November 29 to the First Commission. The Turks did not consider that the Sub-Committee's recommendations in the direction of demilitarisation of certain islands went far enough; and they urged that the four northern islands should be dealt with at the same time as the question of the Straits. Lord Curzon lent some support to the latter contention, and it is probable that the two questions will be threshed out together.

Ottoman Debt Questions.

On the Tuesday (November 28) the Third Commission discussed the proportional division of the Ottoman Debt and questions of expenses of occupation and damages. Here the Turkish chief delegate showed a disposition to raise difficulties, though not in an unreasonable spirit. He made it evident that Angora did not feel disposed to take over the obligations of Constantinople—or, at any rate, those contracted recently—and tried to secure recognition of the principle that Greece must pay for the regions she had devastated. M. Venizelos talked, somewhat airily, about the counter-claims that Greece might advance; but suggested that, as neither Turkey nor Greece was in a position to pay anything at all, their claims might be regarded as "cancelling out." M. Barrêre, President of the Commission, reminded the Turks of the circumstances that brought about the formation of the Ottoman Public Debt, and warned them to avoid destroying the credit which the country must shortly urgently need for raising money. As to the expenses of occupation, to which the Turks had agreed in the Armistice of Mudros, he announced that, as the occupation had lasted longer than was expected, the Allies would be ready to consider some reduction of the amount.

Compulsory Emigration?

The questions of deported populations and of prisoners of war led on Friday to an interesting discussion, in the course of which Lord Curzon gave some astonishing figures in connection with the numbers of Greeks in Turkey and of Turks and Moslems in Greece. A report by Dr. Nansen played an important part in leading to a decision to appoint a sub-commission to prepare a convention on the subject as quickly as possible. The populations, Dr. Nansen urged, should be settled in their new homes by the end of February, to allow of the crops being sown. In principle the

Digitized by Google

Conference stands committed to an exchange of populations, but whether that exchange shall be voluntary or compulsory is apparently left to the sub-commission to determine. It was suggested that possibly the Greeks in Constantinople might be allowed to remain there, and that the Turks in Western Thrace, who have no particular desire to emigrate, should be left where they were. The Turks would not commit themselves on these points, though Ismet Pasha evidently felt little enthusiasm for the suggestions. What he was most anxious to have made sure was that civilian prisoners taken by the Greeks in Anatolia and deported to Europe should be promptly returned. If the suggested exchange of populations does actually take place, and on the scale proposed, it will for the time being profoundly affect the character of the new Turkey. But to believe that the prolific Greeks are likely to be permanently excluded from Turkish territory is difficult indeed.

The Capitulations.

The preliminary discussion on the subject of the Capitulations gave rise to prolonged argument, as was, no doubt, inevitable in view of the strong Turkish feeling on the matter. Ismet Pasha's main point was that the existence of the Capitulations was inconsistent with Turkish dignity, and he declared that there was now no longer any reason for their survival, as foreigners and foreign interests are to-day safe in Turkey. The obvious replies were forthcoming from the Allied representatives, and Baron Hayashi made an interesting contribution to the debate when he reminded the Turks that Japan had lived a long time under a capitulatory régime, and that it had taken her twenty years to complete the legal system which at last set her free. Here was a hint which Turkey may well consider carefully; and it is very generally thought that a solution of the problem may be reached along the lines of gradual abolition of the Capitulations as Turkey puts her house more in order. Meanwhile the question has been referred to a sub-commission for detailed consideration, and further comment at this stage would be profitless.

New Egyptian Cabinet.

It is not very long since Zaghloul Pasha announced emphatically his "warm allegiance to the reigning Royal family of Egypt, especially to the persons of the present King and the Crown Prince Farouk." Since then King Fuad's popularity in Cairo appears to have increased greatly, and on December 1, when he attended Al Azhar Mosque for the first time since his accession, he received an enthusiastic welcome from great crowds, which coupled his name with that of Zaghloul. How far these things may be connected with the fall of the Sarwat Cabinet, what they contributed to bring about that event, it is not easy to say. The fact remains that Sarwat Pasha and his Government have resigned, and that a new Cabinet has been formed by Nessim Pasha. That there was friction of some kind between King Fuad and his Premier is fairly clear; but whether Sarwat's action must be attributed to that fact, or whether the question of the Sudan in the draft Constitution influenced him at all, is not apparent. Nor is it possible yet to feel that the change is for the good of Egypt as a whole. The Zaghloulists approve it warmly; but that is not a reassuring fact; and it is admitted that Sarwat's relations with the Residency were very good. Nessim Pasha is reported to be pressing for the release of political prisoners and the abolition of martial law; but he has issued no statement of policy, explaining that in his view the present situation cannot last, and that he believes in deeds not words.

A Wonderful Discovery.

From Egypt comes news of a discovery which has stirred the Egyptological and archæological worlds to their depths, and has been described, after careful examination, by M. Pierre Lacau, Director-General of the Egyptian Service of Antiquities, as "the greatest discovery in the domain of the history of Egyptian art, perhaps in the history of art generally, ever made." That is a sweeping statement, but the details of the discovery that have already been given to the world certainly seem to bear it out. Credit for the find is shared by Lord Carnarvon and his lieutenant, Mr. Howard Carter. For many years these two have spent much time and labour on excavations in Egypt. For six or seven years they have worked in the Valley of the Kings at Thebes, usually regarded by Egyptologists as "worked out," and at last their patience and perseverance have been magnificently rewarded. In the absence of Lord Carnarvon, Mr. Carter hit upon signs which led him to suspect a find of importance. He telegraphed to his chief, who hastened out from England at once; and in a very short time there were discovered two burial chambers of a King of the Eighteenth Dynasty, literally filled with artistic treasures, described by Egyptologists as "beyond the dreams of avarice," and valued at "millions of pounds sterling." One of these rooms is so crowded that it has not been possible to examine it properly; and a third chamber, possibly the actual tomb of the King, has not yet been opened at all by the excavators.

Its Scientific Value.

The real value of such a find lies, of course, in what it is likely to add to the world's knowledge of a particularly interesting period of Egyptian history; and in this respect there is reason to hope that Lord Carnarvon and Mr. Carter's discovery will yield rich results. Apart from the light shed on the artistic development of the period by various articles now found intact for the first time, there are rolls of *papyri* which it is expected will prove to be historical in character. If those expectations are fulfilled, we may hope to be put in possession ere long of the life history of the King for whose well-being in the next world all the treasures now discovered were originally provided. In his early days his name was Tutankhaten, and, like the famous "heretic King," he was at first a worshipper of the Aten, but later he reverted to the old polytheistic religion of Thebes, and then changed his name to Tutankhamen. Such a character was, obviously, interesting, and if the *papyri* among his funerary furnishings tell us anything of his own life and those of Akenhaten and the great Queen Tiy we shall be fortunate. But, indeed, we may most confidently expect that the discovery will throw fresh light on many Egyptological problems. Meanwhile we unreservedly congratulate Lord Carnarvon and Mr. Carter on the success that has, at last, crowned their patient labours; and hope that British archæology will be able to make the most of the great find.

Indian Politics.

The lull continues on the surface of Indian politics, and if the great campaign for educating the constituencies has actually started, its promoters have certainly been successful in keeping it out of the papers, but we fear it is more probable that the liberal or moderate party is again letting matters slide. The Extremists on their side are clearly paralysed by the divergence of opinion among their leaders, and not much can be expected from them until the meeting of their Con-

Digitized by Google

gress at Gaya, which may result either in the restoration of harmony or in something like a definite split. The fact seems to be that the luck of the revolutionaries has turned. They can hope to live only by exploiting grievances, and for three years or so they enjoyed, and profited by, an extraordinary succession of windfalls, but at present one searches the Indian papers in vain for anything on which a live agitation could be founded. Trade is looking up, the cost of living is falling slowly, the Khilafat idea has been torpedoed, and the interest in Sikh differences has been localised. Doubtless a new crop of grievances will mature by-and-by, but for the moment there seems to be very little for an ardent spirit to do.

Lord Inchcape in India.

Even wielders of axes are human, and we are glad to see that Lord Inchcape found he could spare the time to visit Calcutta for the St. Andrew's dinner, which in that city has achieved the dignity of a supra-national gathering. Regarding his task in India, he spoke with perhaps even greater caution than when he was leaving London, and he is undoubtedly wise in saying nothing to encourage the exaggerated hopes of a section of the Press; but it is pleasant to read his acknowledgment that his work is being greatly lightened by the cordial co-operation of the various Government departments, and we hope his mission will terminate in something like an agreed scheme. It was doubtless a coincidence that the papers which recorded his speech contained also the long-awaited announcement of the reductions in Eastern passage-rates. Indian passengers get only modest advantages, ranging from nothing for the best accommodation to £12 in the second class, and many of them will cast envious eyes on the larger reductions granted for the longer voyages, but in these matters business is business, and from all we hear there are not so many vacant berths on the Bombay line as to justify the expectation of more important concessions.

Recruitment for the Indian Services.

The short conversation in the House of Lords last week enabled Lord Peel to give expression to his anxiety regarding a group of Service questions which call for early handling. Separate treatment of these is impossible, for dissatisfaction and uncertainty in India react immediately on recruitment in this country, and the most elaborate schemes for the future are bound to fail if they do not take adequate account of the attitude of the men now employed. We fancy that there is a great deal of truth in the observation of a correspondent that "at the back of the mind" is the doubt whether future pensions are safe from a purely Indian administration with an axe in its hand. In the old days the certainty of an Indian career was one of the attractions which appealed most strongly to parents and guardians. The civilian was said to be worth so much "alive or dead," because it was impossible that he or his family should ever be unprovided for, and the idea was generally recognised in this country. It is now seriously shaken, and, while we believe that the slur on India's credit is entirely undeserved, we can sympathise with those cautious persons who ask that the British Government should formally endorse the Bill.

Colonel Ballard, Colonel Maxwell, and six other British officers of the Allied police force left Constantinople for England on Monday.

The Council of the League of Nations has agreed to make a fresh start with the problem of the Holy Places, and to try to secure agreement first among the Catholic Powers and then between Catholic and Orthodox.

THE WEEK AT HOME.

London, Monday Evening.

Unemployment.

The main burden of the political debates last week was unemployment, and the two days' debate in the House of Commons was impressive. Mr. Clynes opened well for Labour, but the best speech from that side was undoubtedly Mr. Snowden's. He always had the makings of an orator, but when I last heard him—it must be quite six years ago—one usually felt that there was rather too much bitters in the gin. Now he seems to have realised that it is not enough to bite the tongue; you must warm the blood as well if you are to be a success on your legs. I feel it in my bones that he has more force in him than Mr. Ramsay Macdonald, who is a good Parliamentary tactician, but little more.

None of the Labour members, however, had anything constructive to suggest beyond nationalisation—which was not seriously discussed—and letting Germany off reparations. As to the latter, Mr. Bonar Law said (what many are thinking) that he does not quite see why we should be the only country to pay an indemnity. The Labour Party, which is rather heavily weighted with pro-Germans, is bound to make the most of the anti-reparations cry, but I have not noticed that it makes much impression on the country.

The policy of the German post-war State is to enrich the individual at the expense of the State and then to declare that the State can do nothing further; but this questionably honest manœuvre does not impose on those who do not wish to be imposed on. Nor, in any event, does the Labour Party make clear the connection between forgiving your enemy and improving your foreign trade. The settlement of Europe does not rest in our hands alone.

But on this occasion we heard rather less about Russia than one expected. I fancy that the Labour leaders, unlike the Glasgow followers, are rather shy of talking about Moscow. It was still more curious that nobody mentioned the possibility that Britain is over-populated, which is, after all, the real question at issue, and to one listener at least the omission gave an air of some unreality to the first full-dress debate in the new Parliament.

The Prime Minister.

Mr. Bonar Law shapes distinctly well as Premier. He has reverted to the old Gladstonian

principle that a Prime Minister should spend as much of his time as possible in the House. It is a wise maxim which Mr. Balfour first began to break, which Mr. Asquith increasingly neglected during his eight years, and which Mr. Lloyd George apparently never heard of. He appeals more to reason than did his predecessor, and he has that curious pawky humour of Scotland which always gets home in the House—a perfect example of it was the remark last week that civilised Governments did not make a practice of executing Cabinet Ministers whose policy had failed. One could wish at a pinch that Mr. Law looked less pessimistic, but, after all, no man can alter his temperament by taking thought and practising the methods of M. Coué.

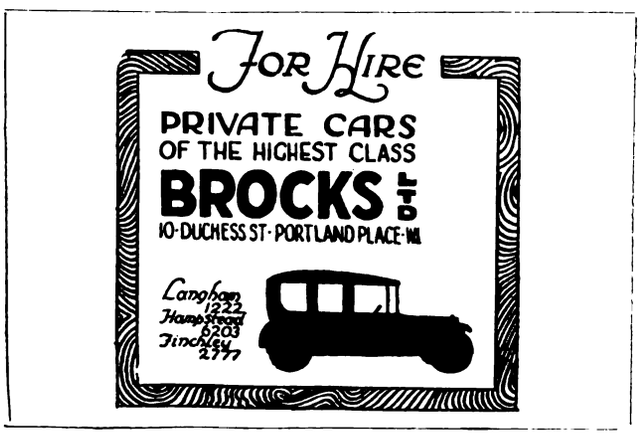
Liberal Reunion.

The general impression is that the Government has come to stay, probably for four years at least; but politicians—that restless breed of men—are already beginning to discuss the next Government. This is not quite so fatuous as it sounds. At the moment Labour is the official Opposition, and consequently the alternative Government, but it owes its position very largely to the split in the Liberal camp. The problem, then, is: If the Liberals heal the breach, will they be able in the next four or five years to dispossess the Labour Party from pride of place to the left of the Speaker? If so, they, and not Labour, become the alternative Government.

There is, of course, a rival theory—that Liberalism and Labour should unite. But this is unlikely to happen for two reasons. In the first place, Labour does not want to share the cake; in the second, the policies of the two parties are radically different—Labour believes in co-operation and State action, Liberalism in the individual and competition. All the attempts to bridge this gulf—the new Manchester programme, the theory of a Centre Party, and the rest—have steadily failed, and are likely to fail. Liberalism will have to fight for its own hand against Labour as well as Conservative or go under. There have been a few inconclusive attempts at reunion already, but these have been premature. The difficulty is mainly among the Asquithians, who are not quite prepared to forgive Mr. Lloyd George for being Mr. Lloyd George. ("Romeo, Romeo, wherefore are thou Romeo?") But the intentions on both sides are honourable, and it is not improbable that the flirtation will end in a marriage of convenience, if not of love.

St. Paul's Bridge.

The controversy over the new Thames bridge has broken out again. The arguments seem all in favour of the more ambitious project of a Charing Cross bridge, which is very badly needed, but the difficulty is that it would cost more, and that the plans are already made for St. Paul's Bridge. I have no special knowledge of the subject beyond the fact that a Charing Cross bridge would save me a shilling every time I take a taxi to Waterloo, which is perhaps not quite an adequate reason for the expenditure of several millions of London money, to which, by the accident of residence, I do not contribute a penny. But it seems on general grounds an occasion where the bolder policy would be the wiser one.



Alice Meynell.

Mrs. Meynell, the poetess, died last week. There was not a great deal of her work, but some of it had a rare charm and beauty. It was delicate rather than strong, like the writing of so many women poets, but the feeling and music she was able to compress into a few lines will always secure her a place in the anthologies.

Anthologies, by the way, increase and multiply. This is an age of singing birds, but, apart from Masefield, there is no great singer. For that reason every respectable publisher has his anthology, and every reputed poet has his place (or is furious if he has not) in these collections. Much, even of this selected work, will not live, but here and there one comes across some very beautiful writing. And I am assured that some of the best is still in manuscript.

The Week's Books.

"Sir Douglas Haig's Command, 1915-18" (Constable), by G. A. B. Dewar and Lieut.-Col. J. H. Boraston, is based on Lord Haig's own papers and memoranda. It contains many important documents, and certain revelations which are causing much comment. It states that the *moral* of the French Army was declining from 1917 onwards; that Passchendaele was fought as a British offensive in order to draw German pressure from the French lines; that the warning as to the German offensive of March, 1918, was given by the British Staff, and not by Versailles; that the real origin of the proposal for Foch as Generalissimo came from Haig himself; that the plans for the decisive British attack on the Germans in August, 1918, were those of Haig, and not of Foch, who at first objected to them, and was afterwards convinced of their soundness and endorsed them; that the British War Cabinet, which disliked Haig, in effect warned him that he advanced on his own responsibility, and that if he failed he would be cashiered; and that it refused publication of integral portions of his despatches on account of political, not military, reasons for more than a year after the War. These allegations seem to be supported by chapter and verse.

It is hardly necessary to do more than mention Dr. Gore's "Belief in Christ" (Murray). It is the second volume of the trilogy on the Trinity, of which the first appeared a year ago, and is already in a sixth edition.

"The Meaning of Relativity" (Methuen) is a new work by Professor Einstein, and an expansion of the well-known book in which he first expounded his famous theory. It is a pure joy to the mathematician, but I am afraid that to the ordinary man it will hardly be intelligible.

Much the same must be said of Professor Whitehead's "Principle of Relativity" (Cambridge University Press). Those who are not at home with tensors had better not attempt it, although the first fifty odd pages, which are mainly philosophical, should not present grave difficulties. But the average reader who wants to tackle these subjects should first read the same author's "Concept of Nature," published two years ago.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, November 24.

Return of the Court.

The King returned to Cairo on Sunday last from Alexandria, where the Court has been established since the middle of June, and the seat of Government has now finally been transferred back to the capital for the winter.

The High Commissioner also returned this week from his tour of inspection on Southern Sinai; and it is generally expected that between now and the end of the month something definite will be done with regard to the Constitution, the promulgation of which is said to be still obstructed by certain difficulties.

Another Political Crime.

Scarcely had I put my last letter in the post than the news came to hand of a dastardly double assassination. As two members of the new Adlyist Party, "The Liberal Constitutional Party," His Excellency Hassan Pasha Abdel Razek and Ismail Bey Zohdi, were leaving the offices of *Assyassa* they were fired at by a group of Egyptians, who at once made their escape. Both victims were hit by several shots, and grievously wounded in the abdomen. Zohdi Bey died next morning. Abdel Razek Pasha held out for two days, but his wounds were such that recovery was recognised as impossible from the outset. Each of the victims was given a most imposing funeral, which was attended by the most prominent Egyptians and representatives of every element of society.

This dastardly outrage, which indicates the resumption of tactics that had marked the first eight months of the year, but which, it was hoped, had at last been abandoned, has not only come as a shock to everyone, but has aroused the condemnation of every section and every party of the population. Both the victims were members of a new political organisation. Both of them had rendered yeoman service to their country during the recent political events. Both of them were relatively young, and both of them could claim to be actuated by no less patriotic motives than their political opponents. Yet no sooner did they publicly throw in their lot with a definite political party than they became the object of assassination.

It is, indeed, a dark future that lies before Egypt if these are the means by which political opponents are going to try to gain their points. At a time when Egypt is on the eve of being endowed with a constitutional régime elaborated with a view to its favourable comparison with those of Western countries, and when the Egyptians are aspiring to be recognised as one of the civilised nations of the world, the resort to such tactics is doing the country the most grievous ill-service possible. For the honour of Egypt it is sincerely to be hoped not only that what one *must* call the "extremist" Press will cease to adopt a tone and a language that can but act as an incitement to the ill-balanced clique that has been engineering these cowardly murders, but that the population will at long last give practical expression to its disapproval of these murders, whether the victims are British or Egyptians, by actively co-operating in the search for, and the censure of, the men who have committed these crimes. So long as these crimes continue, so long as not a single effort is made by the public to assist the authorities in running the clique to earth, so long must the stigma repose on the nation as a whole, and it become increasingly difficult for sincere friends, like your Correspondent, to champion the cause of an independent Egypt.

The Question of Taxation of Racing.

The dispute that had arisen between the Government and the racing clubs, to which I referred a few weeks ago, has now been settled. It may be remembered that the Government wanted the clubs to raise the *pari-mutuel* percentage deduction from 10 per cent. to 15 per cent., so as to enable 5 per cent. of the gross takings to go to the State Treasury, and that the clubs objected to such increase, as being calculated in the long run to decrease the *pari-mutuel* turnover, offering, instead, either a fixed sum per meeting, or preferably a percentage of the net profits. The settlement arrived at provides for an increase of 1 per cent. in the *pari-mutuel* deduction, i.e., from 10 per cent. to 11 per cent., and for the payment to the Government of £E100 per meeting.

It is certainly satisfactory that the dispute has been amicably settled, but the terms are far from fair to the clubs. The latter have already lost the Government subsidy, which had been granted them for years to encourage racing and horse-breeding, and now they are called upon to pay a fixed tax to the Government, whether they make a profit or not. The 1 per cent. addition to the *pari-mutuel* deduction will by no means cover the tax, particularly as we have now got back to pre-war conditions, and the betting is no longer

anywhere near as keen as it was during 1915-1921, and the lump sum payment will on occasion mean a dead loss to the clubs. As, however, the Government intimated that if it took a share in the net profit it would have to inspect the books and generally check the expenditure, which would mean a lot of unnecessary interference with the management, the clubs had no alternative but to agree to the tax.

Death of Former Head of Secret Police.

News has been received from Beyrout of the death of George Philippides Bey, who was for some time head of the Secret Police in Cairo. I have no intention of entering into the circumstances under which he lost his post some six years ago, but, in all justice to Philippides Bey, it must be admitted that he had an extraordinary grip of the political situation, and an unrivalled knowledge of all those engaged in criminal and political activities in the country.

It was undoubtedly thanks to his clever tactics that so many of the reactionary machinations proved abortive, and an indication of the fear and respect which he had inspired were afforded by the delirious joy with which the then reactionary leaders hailed his destitution and by the keenness with which they aided in supporting the charges brought against him. Without wishing in any way to reflect on the ability and efficiency of those who have since been called upon to carry out the very important duties which he fulfilled, it is certain that had he been left at his post a good deal of the subsequent troubles would never have taken place; for Philippides Bey had qualifications peculiarly adapted to deal with the situation, which no Englishman could possibly possess.

PALESTINE.

Jerusalem, November 19.

Government House Entertainment.

Yesterday the High Commissioner and Lady Samuel celebrated their "Silver Wedding," and they marked the occasion last night by a big reception. This reception was rescued from any danger of formality and dullness by somebody having had the happy idea of persuading the Jerusalem Dramatic Society to arrange a special performance of "A Midsummer Night's Dream" at Government House in honour of the event. The Society covered itself with glory. Jerusalem certainly owes an immense debt to Mr. and Mrs. Aylmer Harris, who are the life and soul and the master-minds of the Dramatic Society. The material in Jerusalem at their disposal is of such a quality that, after their performance of yesterday, none can venture to say that the age of miracles is past.

Election News Reception.

The General Election results have now reached us almost in their entirety. Local feeling has not been stirred as strongly as might have been expected. The views of the political leaders of the various parties were promptly made known to us, and the hyper-diplomatic statements of Mr. Bonar Law on the British policy in Palestine were of such a nature as to afford satisfaction both to Arab and Jew, but to send neither into transports of hope and delight. The local weekly paper, the *Palestine Weekly*, in its last issue, waxed fluent in its protests against the too facile way in which politicians and Press at home are habitually coupling together Mesopotamia and Palestine as part and parcel of the same problem, to be dropped or persisted in. Certainly, apart from their both being parts of Western Asia, they have not sufficient in common that they must stand or fall together as objects of British political interest.

Arabs and the Constitution.

In Arab circles there is still no sign of acquiescence in the recently bestowed Palestine Constitution; opposition to the elections to the Legislative Council is still urged in certain elements of the Press, and the Moslem-Christian Association is understood to be organising secret meetings and circularising the village sheikhs and mukhtars and generally indulging itself in restless propaganda. In the last issue of the *Bet ul-Makdes* (Christian-Arab), Jemal Effendi Husseini, the secretary of the Association, published a long article explaining why no Arab should take part in the elections. His arguments were along the familiar lines: "If we agree to the Legislative Council, based, as it is, on the Balfour Declaration, it will be equivalent to our telling the new English Cabinet—which has promised to reconsider our Palestinian problems—that we are quite happy with the terms given us by the late Ministry; while to the English people, which is urging its Government to quit Palestine, it will be equivalent to our saying: 'There is no harm in the present policy remaining as it is.'" The writer goes on to give vent to his indignation at the British Government's giving entire independence to Iraq, when the inhabitants of Iraq are considerably behind Palestine in intelligence and political maturity.

The same paper, commenting on the reports that both King Faisal and the Emir Abdullah had asked Great Britain not to withdraw from the East, says that the Palestinian Arabs, too, have no wish that Great Britain should leave Palestine or make any change in policy that might endanger its

Digitized by Google

prestige in the East. "We only ask that it make an end of its Zionistic practices. If only it will do this and carry out the Mandate in absolute fairness, all stumbling-blocks will be removed from its path, and it will gain the sympathy of Palestinians and the entire world." As for Faisal and Abdullah and their subservience to Great Britain, "this is nothing to be astonished at, for quite a number of nations are afflicted with rulers who are too weak to stand of themselves, and rely on the help of Europe to bolster up their influence. But the voice of nations is greater than that of individuals, even if those individuals chance to be rulers; and the prosperity of the nations rests on the stoutest defence of their own rights, and not on the favour of individuals who are only seeking their own gain and glory."

General News.

Three or four days ago the report spread that the Palestinian-Arab Delegation to Angora, Constantinople, and Lausanne was to lose the services of Mr. Shibly Jamal, its one Christian member, and the one who had been the most conspicuous and active of the Delegation during its year in England. The reason for his defection was guessed at as being his unwillingness to treat on behalf of his fellow-Christian Arabs with the Kemalists, who had shown themselves so unscrupulously cruel in their treatment of the Greeks and Armenians in the Symrna area, and who spoke even of evicting the remaining half-million Christians from Asia Minor. The report turns out, however, to be but one of that larger number of Palestinian rumours—untrue; and Mr. Jamal will still join the Delegation.

The report of the demise of *Ha-Aretz*, one of the two Palestine Hebrew daily papers, was given in these columns last week. The paper has now reappeared once more. The company which owned it sold the right of publication to the printers, and the paper is now coming out under a new editor and new management. Its former editors and contributors, left out in the new scheme of things, are themselves minded to issue another daily paper, the *Eretz Yisrael*. Negotiations are, none the less, going on with a view to re-uniting forces and preventing a split which would give neither paper much chance of prolonged life. Already the abundance of Hebrew newspapers, daily and weekly, in view of the comparatively few Jews in the country, is really a thing to marvel at.

The elections to the Legislative Council, which were to have been held at the close of the present month, have, it is understood, been postponed for an indefinite period, until the political horizon becomes a little less cloudy.

IRAQ.

Baghdad, November 23.

Turkish Propaganda.

There are signs that Baghdad and, to a lesser degree, the rest of this country are beginning to realise that the activities of Turkish agents are growing ever more widespread and making an increasingly powerful effect on the people of this country, with the result that unless some strong action is taken to stultify their efforts, the Turks are likely to obtain support here—which will make the position of the Iraq Government decidedly uncomfortable. It has for some time been a matter for amazement to those who follow public opinion in this country that the Iraqi seemed unable to realise the seriousness of the menace which these propagandists afforded to the new State and the consequent omission to take any steps towards counteracting it. Neither the Government nor the public showed any inclination to take action, while the vernacular Press took no notice of it until the news arrived that the Turks were expected to demand the realignment of the Iraq frontier and the holding of a plebiscite in this country to decide its future government. A series of articles then appeared trying to prove that Mosul was an integral part of Iraq, and could not be separated from her without doing grave injustice to both sides, while one recent article has even gone so far as to claim that Diarbekr, too, forms part of Iraq by ethnographic, linguistic, and economic ties. Of more influence than the fear of losing Mosul, however, was the news of the deposition and subsequent flight of the Sultan. This has produced a stream of articles in the vernacular Press, protesting in the strongest terms against this action, and calculated to bring those responsible into discredit. It is maintained that the corner-stone of the Islamic faith has been knocked away, and one paper declared that if such actions represent the views held by the responsible heads of Turkey to-day, the Turkish State should at once break off all connection with other Islamic States. Attention is drawn, too, to the obvious traces of Bolshevist handiwork in this, as in other actions of the Kemalists, and emphasis is laid on the dangers which would face the new State of Iraq if the Turks were to return here and attempt to put into force their Bolshevist policy.

The Resignation of the Cabinet.

In the midst of this intrigue and counter-intrigue the Cabinet formed only six weeks ago has resigned, and it is, perhaps, not unnatural that in some quarters a connection has been seen between this event and the increasing activity of the Turkish propagandists. There are many who maintain that the resignation of the Nakeeb's Cabinet was a result of pressure brought to bear upon it by persons who viewed with dismay the spread of this propaganda and were anxious to see a more active policy adopted towards it. Some colour is lent to this suggestion by the fact that Abdul Muhsin Beg as Saadun, Minister of the Interior, handed in his resignation some days before the rest of the Cabinet, and has now become the new Prime Minister. As Minister of the Interior it would have been his task to take action against the Turkish agents, and if he had found the rest of the Cabinet unwilling to support him he would have had no alternative but to resign. The reason officially given for the resignation of the Nakeeb is that, old man that he is, he felt that, having seen the Anglo-Iraq Treaty signed, he would do well to leave the direction of affairs in the hands of younger men.

The Work of the Nakeeb.

Whatever the reason for the resignation, there is little doubt that it means the passing of the Nakeeb from the stage of active politics for ever. He has done a great work for his country in holding things together during the two years since, on the arrival of Sir Percy Cox in this country in the autumn of 1920, he consented with a good deal of reluctance to become President of the Council. On the arrival of Emir Faisal in this country he warmly supported his candidature, though he well knew that there was not a small party which was willing to support his own claims, and was at once made Prime Minister—a position he has occupied ever since with two short lapses during which he and his Cabinet have resigned and the country has been left without Ministers. It is due very largely to his efforts that the negotiations leading up to the signature of the Anglo-Iraq Treaty reached so successful a conclusion, and history alone will reveal the difficulties with which he was faced and the kind of opposition

Digitized by Google

with which he had to deal. It is felt that when the Iraq State reaches maturity the Nakeeb will be looked back to with gratitude as one of the makers of the State.

The New Ministry.

The new Ministry has already been formed with Abdul Muhsin Beg as Saadun as Prime Minister, Naji Beg as Suwaidi comes to the Interior, Sassoon Effendi remains at Finance, though it is doubtful whether his health will allow him actually to take office; Abdul Latif Pasha al Mandil comes to Auqaf, and Yassin Pasha al Hashimi to Communications and Works, while a new comer, Hajj Abdul Hussein Challabi, becomes Minister of Education. No Minister of Justice has yet been appointed, the Premier retaining this portfolio himself until he can find a suitable occupant. In the absence of Jaafar Pasha at Lausanne, Nuri Pasha Said will officiate as Minister of Defence. The new Cabinet's most pressing duties will be the suppression of the Turkish propaganda—a duty which they may be relied on to tackle very seriously—and the holding of the elections.

Non-participation in the Elections.

Here, however, an unfortunate obstacle has arisen. At the instigation of a party of irreconcilables in Baghdad, the Shiah Ulema of Nejef have issued a *fetva* enjoining upon all Shiahs non-co-operation in the elections, and efforts are being made to persuade the Sunni Ulema to issue similar instructions. Hitherto the only result has been to bring to a standstill the preparations for the elections in Kerbela and Nejef, but there are signs that some notice is being taken of the *fetva* in other places, while some of the Sunnis in Baghdad, who at first affected to ignore it as the mere wavering of Shiahs, are apparently being influenced by it.

General News.

Railway passenger fares have been raised by 25 per cent. in an attempt to place the railways on a paying basis. The lines, it is stated, have just paid their way during the past two months, but there remain the losses incurred on the earlier months of the year, and the increase in fare is an attempt to wipe them out.

Sir Percy Cox has left Baghdad for Bahrein, to meet Ibn Saud, to try to clear up certain matters which are outstanding between Iraq and Nejd, notably the question of the frontier.

TURKEY.

Constantinople, November 25.

The New Khalif.

The ceremony of the investiture of the new Khalif, H.M. Abdul Mejid, which took place on Friday, November 24, was but a poor shadow of the famous "kilich alayi" of former days, for the new Khalif was not girded with the sword like his ancestors. It is true the streets were beflagged, and there was a numerous attendance. The Khalif's escort also was not unimposing, but in spite of every effort to attach to the proceedings some degree of impressiveness, the result was such that the term "ceremony" was almost a misnomer. Apart from the processions through the streets of Stambul, all that took place was the veneration of the Holy Relics by the new Khalif, followed by a hand-kissing ceremony, and special Friday prayers at the Mosque of Fatih, where for the first time in history the "kutbé," or sermon, was delivered in Turkish. This sermon consisted principally of a panegyric of the Nationalist Movement, and terminated with a very laudable appeal in favour of a new "Holy War" against ignorance and immorality. The new Khalif then returned to Dolma Bagché Palace, whence he issued a proclamation.

The Election of the Khalif.

The details of the election of the new Khalif have already been telegraphed to the European Press, but certain of these are worthy of more than passing notice. The news of the flight of Sultan Vahieddin was received in Angora on the 17th inst. and formed the subject of a secret discussion of the Ministerial Council, which took certain decisions and communicated these to the Great National Assembly. On the 18th the Assembly held three secret sittings, of which no details are available. On the 19th, however, the Assembly held a public sitting at which the *fetva* approving the deposition of Sultan Vahieddin was read and accepted, and the new Khalif was elected. The *fetva* was a document of historic interest, and a translation is given below:—

> If Zeid, the Chief of the Moslems, accepts without necessity enemy terms of a nature to bring destruction upon all Moslems, and manifests his impotence to defend Moslem rights, if he actively undertakes in agreement with the enemy operations against Moslems fighting a sacred war in defence of Moslem rights and independence, if he persists in such acts and, taking refuge in foreign protection, flees and deserts the seat of the Khalifate, is he not deserving of deposition in accordance with Koranic law? Answer in the affirmative.
>
> Hence does it not become necessary, in order that Moslem rights and interests may be protected, to administer the oath of fidelity to a capable individual worthy of the Khalifate? Answer in the affirmative.

This *fetva* was then approved by the Assembly by a mere show of hands, although a protest was expressed on the grounds that a decision by votes was inferior in authority to a *fetva*, and voting was therefore superfluous. The show of hands was declared to be unanimous, and the Assembly at once proceeded to elect Abdul Mejid Effendi Khalif in the place of Sultan Vahieddin. It has already been announced that the new Khalif was elected by 148 votes out of a total of 162 Deputies present. The significance of these figures will at once become apparent when it is realised that the total number of Deputies in the Assembly amounts to 320, and, according to the Angora Constitution, one more than half this number constitutes a quorum, without which no sittings can

be held. On the momentous occasion when the deposition of the former Khalif and the election of a successor was decided, therefore, there was only a bare quorum of Deputies present, and the new Khalif was elected by less than half the total membership of the Assembly. Thus upon the Islamic world has been foisted a Khalif in whose election only a fraction of a fraction of the Turkish nation had any voice.

One cannot help recalling the comment of a French historian who, in describing the subordination of the Abasside Khalifate to the Turkish "Emir-ul-Umera" in the tenth century, and the expulsion of the Turks from Baghdad with the help of the Persians, concludes: "The Khalifs witnessed this struggle without taking part in it, and without attempting to recover their authority; from the moment that they resigned themselves to the humiliation of submitting to a master, the identity of the master mattered little to them."

The Conference.

Now that the Lausanne Conference is fairly under way, public opinion is anxiously awaiting results. The Turkish Press has evinced a certain degree of irritation in connection with the endeavours of Lord Curzon to organise some semblance of unity among the Powers as regards questions of fundamental importance. The resistance made to Turkish claims in connection with Kara Agach and Western Thrace has been the subject of particularly angry comments. Thus the *Tevhid-i-Efkiar* of November 25 published a leading article in which the following passages occurred:—

> The first disagreeable news is arriving from the Lausanne Conference. According to agency telegrams, the Powers, headed by England, have refused to return to us the station of Kara Agach, which has a capital importance from our point of view. Whilst not expecting anything much in the way of happy results from the labours of the Conference, we did not believe in the probability of seeing essential divergencies arise at the very outset on the subject of such an important question between ourselves and the Great Powers. . . . These difficulties, with which we have been opposed from the very commencement of the Conference, will lead us to abstain from all political negotiations, for we have seen that hitherto politics *(sic)* have only been a means of infringing our rights. Every time we have tried to secure a result by having recourse to politics, we have lost. If the Lausanne Conference makes the same impression on us, the consequences may be very regrettable.

Ebuzia Zade Velid Bey, who wrote the above lines, is not a member of the Great National Assembly, or of the Angora Government, but he is sufficiently intimate with political opinion in Angora to be able to reproduce the ideas which predominate there. The last sentence of the above extract can only have one meaning, and it would be well, therefore, for the Powers to make sure that any agreement concluded with the Turkish Delegation at Lausanne will not suffer the same fate as the agreement negotiated by Bekir Sami Bey in London.

Even Ahmed Emin Bey, usually very careful in choosing his words, has not hesitated in the *Vakit* of the 29th inst. to make thinly veiled threats, warning Europe that the social fabric of the Occident is rotten and would not be able to resist a shock from without. The shock would presumably occur if Lord Curzon's efforts to establish some semblance of diplomatic unity amongst the Powers, which was the subject of the article, were to succeed, for Turkey is no longer a "soulless piece of material to be divided up," but a very "energetic factor in world affairs."

YUGOSLAVIA.

Liubliana, November 22.

The Internal Situation.

The dominant factor in the internal situation is the imminent entry of the Croat Deputies into the joint parliamentary life of Yugoslavia, and comment from all sides is rife regarding the possibilities involved in this departure. One thing is certain: the mere advent of the Croats reveals a strengthening of the "State thought," the consciousness of political entity. We are the more justified in this assertion, as the Croatian *bloc* already appears strongly inclined to draw up a programme which will favour the State. This would only be the logical outcome of circumstances. The abstention of the Croatian Deputies from the Skupshtina was, above all, a consequence of the misunderstanding between Serbs and Croats. If there is to be an agreement, it must be attained by dealing only with such questions as touch both branches of the nation as such, without confusing the issue with other political questions. In other words, the Croatian question must be kept separate from that of an overthrow of the Government.

Everything goes to show that the Croatian *bloc* possesses the necessary sagacity required by the situation. The Republican flag has been quietly dropped, and the Croatian *bloc* has descended from the clouds of a pacifist Republic to the *terra firma* of actual conditions. How far this is due to their own sound sense and how far to the firm attitude of the leading Government men is really beside the mark. Yet another move on the part of the Croatian *bloc* deserves notice. Within its ranks the Frank party used to play a small, but nevertheless important, part. This party was recruited from among former Austro-Hungarian officers and officials, and was notorious for its sympathy for the late Empire. The party has now been excluded from the Croatian *bloc*, which is tantamount to a declaration that the *bloc* has no sympathy whatsoever with the former régime, but adopts a wholly Yugoslav platform. Hereby the prospects of a Serbo-Croatian agreement and, generally speaking, of successful action by the *bloc*, are already greatly improved. We may, therefore, look forward to seeing the latter arrive in Belgrade ere long. It is unlikely that this would lead to an immediate fall of the Government, but it is certain that we shall see a gradual revolution in the methods of the Government, owing to the infusion of new blood. That will be of no less advantage to the State than to the various parties which have become almost sterilised by embittered party strife. This applies not only to the Government parties, but also to those of the Opposition. Unfortunately, the action of the *bloc* is not so strong as it might have been had it come earlier in the day. There is reason to believe that the *bloc* has lost ground with the electorate and is afraid of a general election.

Diplomatic Changes.

The Yugoslav Minister in Prague, Dr. Bogumil Voshniak, is on two months' leave. He will be definitely succeeded by the well-known diplomat M. Neshitch. It is said that M. Antonivevitch, the present Minister in Rome, will shortly leave his post there. M. Belugjitch, Minister in Athens, and Dr. Lepa Medovitch, Minister of

Digitized by Google

Justice, are mentioned as possible successors. Dr. Medovitch is one of the cleverest members of the Radical party, although his position is badly shaken at the present.

The Study of English.

The Yugoslav Society for the Study of English here gave the first At Home of the season at the Hotel Union on November 18, when the society had the pleasure of entertaining the British and American Consuls, Mr. Maclean and Mr. McGurk, and Mrs. Maclean as guests of the evening. The Society has made great progress since its foundation six months ago, and is working away steadily at the important task of founding a really good English library in this country.

ROUMANIA.

Bucharest, November 24.

The Political Situation.

The usual autumn ordinary session, which the Government qualifies as "Constituante," will open on the traditional date of November 28, but, although only a few days remain, the various Opposition parties have not yet decided whether they will this time participate in the Parliamentary sittings. Much depends on whether the Government intends to bring into Parliament for discussion the new Constitution Bill. Apparently it will do so, for the different Parliamentary Committees have worked very assiduously during the recess in order to have the new Bill ready for the coming session. In this case, most of the Opposition parties will in all probability protest, because, as they consider the present Parliament "illegal," they would still less acknowledge the new Constitution Bill passed by the present Parliament, and prepared by Parliamentary Committees which were composed only of the Government's partisans and friends, and from which the Opposition members rigidly abstained.

A New Party.

After many months of negotiation between the Transylvanian National Party and several of the Opposition parties of the Old Kingdom, a noteworthy issue has recently been reached, namely, the Democrat Party (the late M. Také Jonescu's Party) has amalgamated with the Transylvanian National Party, under the leadership of M. Maniu. The new party will call itself the "Roumanian National Party." This union between the two parties is considered by everybody as a very important political event. In the first place, it does away with the oft-repeated allegation that the Transylvanian National Party—which represents more than 80 per cent. of the Roumanian population of Transylvania and the Banat—is keeping aloof, and will have nothing to do with the parties of the Old Kingdom; occasionally, indeed, it has been accused even of having autonomous ambitions. The Transylvanians, in order to refute these false charges, have decided that the new party should have its headquarters in Bucharest, even though the Transylvanian element is predominant. The new party is now treating with some of the leaders of Bukovina and Bessarabia, in order to extend their organisation into these two new provinces, so that in due time the National Party bids fair to become a powerful political combination, the strongest Opposition party, with prospects of claiming office at the first change of Government.

The National Party will hold a meeting at Cluj on the 27th inst. for the purpose of deciding the attitude they will adopt for the coming session. For the same purpose the Tzaranists will meet at Jassy and the People's Party (under Gen. Averescu) at Bucharest.

The Government has already intimated in the semi-official Press that, whatever the Opposition may decide, the Government and the Parliamentary majority are determined to go on undauntedly with the work before them, despite the abstention of the Opposition from Parliament.

Roumanian-Hungarian Frontier Delimitation.

The Inter-Allied Commission for the demarcation on the spot of the Roumanian-Hungarian boundary has terminated its work. This delimitation was by no means an easy affair. The members of the Commission had to fight hard to remain impervious to interested arguments which were not grounded on the principle of equity. Great pressure was brought to bear on the Commission by the Magyars, in order to push the boundary more towards the east, their object being to save certain large domains belonging to some of the Hungarian nobility. The Commission, however, taking into account the local economic conditions, allotted to Roumania a few communes—hitherto on the Hungarian side—whose interests are closely linked with the neighbouring Roumanian towns. This decision is naturally not to the liking of the Magyars, and their Press was not long in deprecating the spirit of partiality of the members of the Inter-Allied Commission.

PERSIA.

Teheran, October 15.

Anti-Semitism.

In the middle of last month there was some anti-Jewish rioting, due to an attack by Jewish schoolboys on the servant of a Mullah. The police were called out, and in one instance had to fire over the heads of the demonstrators, and the Jewish shops were shut for some days, while the Jewish quarter of the bazaar was closed to Moslems to prevent the possibility of disorders.

In the Mejliss the leader of the Democrats, Suleiman Mirza, made a long speech, in which he deprecated the attacks on the Jews, and, pointing out that Persia had never, like Turkey, been the scene of religious persecutions, he advocated that full liberty of religion should continue to be extended to members of all creeds in the country, that adequate steps be taken for the protection of non-Moslem minorities, and that those persons responsible for the disturbances should be suitably punished. The Prime Minister concurred, and replied that the necessary steps had been taken, and, encouraged by this assurance, the Jews reopened their shops.

The Local Press.

The recent suspension of newspapers failed signally in its purpose of teaching them a lesson, for since their reappearance their efforts have been redoubled in denouncing British policy, and it is really ludicrous to read for what things British agents are blamed. The recent anti-Jewish disturbances were openly stated in the Press to have been engineered by the British, and even the robbing of a post-waggon near Shiraz a week or two ago was attributed to the instigation of British spies!

In an attempt to stop this the Prime Minister, in a statement to the Press, published yesterday, appeals to editors of papers to discontinue this violent, unjustified, anti-British campaign. He asks the Press not to publish unconfirmed reports of British political activities, or make baseless and unfounded charges against British officials, and points out that all such recent allegations in the

Digitized by Google

papers have been officially contradicted by the British Legation.

This anti-British feeling has unfortunately been greatly aggravated lately by the action of the High Commissioner in Iraq in deporting to Persia, for political reasons, the two sons, themselves priests, of a high dignitary at the sacred shrine at Nejef. This action is unanimously condemned by the Press as being a direct insult to Islam, and much abuse has been showered on British policy in Mesopotamia and Persia in consequence. One of the deported priests arrived in Teheran on Friday, and a great popular reception was arranged at the Mosque of Shah Abdul Azim, a few miles to the south of the town, to celebrate his arrival. The light railway which runs from the town gate to the mosque was chartered by the Ulema, and anyone wishing to participate in the reception was conveyed to and from Shah Abdul Azim free of charge. Full advantage was taken of the occasion for the expression of most pronounced anti-British sentiments, and for violent denunciations of British policy in the Near and Middle East. The rather unexpected completeness of the recent Turkish victories in Asia Minor has naturally largely contributed to the growing Pan-Islamic movement throughout the East, and it is not surprising that Great Britain's almost isolated stand against any further Turkish advance on the European side of the Straits has been interpreted as indicating that our policy is directed solely against the realisation of Turkish Nationalist aspirations.

The Sardar Sipah's Position.

A week ago in the Mejliss one of the Deputies for Azerbaijan made a violent attack on the Minister for War and his despotic methods of government, which, said the speaker, were altogether opposed to a constitutional *régime*. In a speech in reply, another Deputy, Modarres, declared that although the Mejliss had absolute power in the country, and could even go so far as to dethrone the Shah and dismiss the Prime Minister, the safety of the country at present rested solely with one man, and he had far too much power in his hands. Why should they be afraid of him? Sardar Sipah undoubtedly possessed many good qualities and also many bad ones: these should be carefully considered, and they should endeavour to make the best use of his good qualities, which, in his own opinion, outweighed his bad ones, for the common benefit of the country.

As the result of this criticism, the following day the Minister for War summoned all his officers to the Ministry, and in a speech in which he recalled all he had endeavoured to do for his country, asked them to judge whether he had succeeded in his purpose during the time he had held office, and announced that he had tendered his resignation as War Minister to the Crown Prince, who had refused to accept it, and had also telegraphed to the Shah to relieve him of his command of the Army. The officers assured Sardar Sipah of their loyalty and their appreciation of his services, and requested him to withdraw his resignation. After discussions between the Parliament, the Crown Prince, and the Prime Minister, the Minister for War consented to do this, and has undertaken to recall all military governors in the provinces, and not to appropriate any of the revenues of the country—which have recently all been paid into the Ministry for War for expenditure in connection with the Army—until the arrival here of the new Director-General of Finance, who with seven assistants left America at the end of September. By the way, the fact that the new Adviser is mentioned in a Reuter's message as a petroleum expert, lends belief to the statement that the Government is awaiting his arrival before reaching a final decision with regard to the granting of the Northern Oil Concession.

One of the reasons given for the Parliament's displeasure with Sardar Sipah's actions is that he despatched a jewelled sword and other presents to Mustapha Kemal, with a letter of congratulation on his recent victories; and the Deputies assert that such gifts should come only from the ruler of a country, and that by his action the Minister of War implied that he was in such a position. The latter retorts that the gifts were made by him personally and not in his official position.

CORRESPONDENCE.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

THE ATHENS EXECUTIONS.

To the Editor of The Near East.

Sir,—As a regular reader of your journal, and being fairly well acquainted with Near Eastern and, especially, Greek matters, I request the privilege of expressing my opinion concerning the attitude of the British Government and part of the London Press towards the execution of the Greek ex-Ministers and Commander-in-Chief.

The men who suffered the supreme penalty were given an absolutely fair trial and were condemned by a court regularly constituted on the basis of existing laws, and after every opportunity was given to them for their defence. The only reproach that might be made against the special court martial that tried the case is that it did not let itself be hampered unduly by considerations of procedure.

Six men paid the penalty in Greece for having betrayed their country and caused the death of thousands and the ruin of hundreds of thousands of their fellow citizens with the sole object of consolidating their political position and of retaining the benefits of power, which, in the East, are often of a very material nature. Is it not below the dignity of the British Government to stand up in their defence? And, before doing so, is the British Government sure that it has full and unbiassed information about the whole case from its representative in Athens?—I am, etc.,

Paris, November 30. J. H. W.

THE INDIAN MEDICAL SERVICE.

The Secretary of State for India announces that appointments of Europeans, to the number of not more than thirty, are to be made in the immediate future to commissions in the Indian Medical Service on special terms, which include the right to retire on a gratuity of £1,000, with free return passages, on the completion of five years' service, if the officer no longer desires to remain in the service. Candidates must be under 32 years of age. Service as an officer during the war counts for pay, promotion, and pension purposes under the ordinary conditions but not for gratuity. Officers will receive, on appointment, free passages to India for themselves and their families. They will be expected to sail for India in the course of next February, and previous to that may be required to undergo a course of military training in this country. Full particulars may be had on application to the Secretary, Military Department, India Office, Whitehall, S.W. Envelopes should be marked "Medical Recruitment."

PRESS ON THE NEAR EAST.

The Greek Executions.

The reception by the British Press of the news of the Greek executions has been varied, and it may be of interest to set out the views of representative papers. *The Times* deplores the event from the Greek point of view :—

> This act is strongly to be condemned in the interests of Greece herself. These are not the methods by which the disaster of defeat can be wiped out and the new *régime* established securely. The Revolutionary Committee have incurred the gravest risks in carrying out what must be regarded as an act of political vengeance at a moment when their country more than ever needs support and aid. By so doing they have gone far to destroy that sympathy which the bitter distress of Greece had aroused among the Western peoples. The effect of these executions upon her position, and upon that of her representatives, at the Lausanne Conference may be very serious. Greece during the last years has been the plaything of misfortune. . . We had hoped, however, that when the wretched tale was fully told the Greeks would find in themselves strength and courage to forget the internal dissensions that had so long enfeebled them, and would unite in an effort to maintain and consolidate their national existence. In such an effort transcending all the divisions between Venizelists and Constantinists they would have had the warm sympathy of the Allies and could certainly have counted on tangible aid. If the Revolutionary Committee feel that they can only maintain their influence by sacrificing to the clamour of the market-place men who happened to be at the head of affairs at one moment of the long period during which the tragedy was enacted, then their own position must indeed be insecure, and their action must awaken grave fears for the future of Greece.

The *Morning Post*, on the other hand, thinks the affair is a matter for Greece alone :—

> We entirely fail to understand why the British Government should interfere at all in a trial with which Greece, as an independent State, is alone concerned. The trial may have been unfair, the verdict unjust, the sentences excessive, but at the moment there is no proof that they have been. And even if there has been a miscarriage of justice, that is a matter which must be left to the discretion of the Greek, not the British people. All we know is that the men who have thus suffered the supreme penalty of the law were friends neither of Great Britain nor of Greece during the Great War, and that they were directly responsible for the greatest disaster which Hellenism has suffered for centuries. . . . Difficult as the task is, we consider it to be the duty of the present Government to dissociate itself as completely as possible from the wretched and criminal policy of its predecessor in regard to Greece and the Near East generally. But already it is being hinted abroad that the new Government has been trying to shield the Greek Ministers because certain persons in this country are also deeply involved in the proceedings which have ended so dramatically at Athens. It seems to us that this country, instead of seeking to interfere with the course of justice in a sovereign State like Greece, ought to carry out a searching investigation as to how far a British Government was involved in an enterprise which brought disaster to Greece and almost involved us in another European war. In the meantime, we trust that politicians, for their own sakes, will appreciate the significance of the events which have recently been taking place in Italy and Greece. Signor Mussolini has been mild compared with the Greek embodiment of Fascism, but in both countries there is the same iron determination to get rid of men of proved incapacity.

The *Manchester Guardian* takes the thing philosophically, ascribing it to the post-war mentality with its passion for short cuts :—

> This mentality, one of the most dreadful of the moral products of the war, has been seen in great things and in small since the war came to an end : in the Red and the White Terrors, in the raids of various European filibusterers, in innumerable crimes of personal violence in our own and other countries. The same bacillus of anarchic violence appears to infect the possibly well-meaning revolutionaries of Greece. The men whom they have killed have been no friends of this country or, it may be, of the best interests of their own. But that is no reason why, in a country which has for years been accustomed to the ways of faction, and governed or misgoverned by harsh and arbitrary means, they should be subjected to the extreme of violence. Unhappy indeed is Greece that one must believe either that some of her most distinguished sons deserved to be summarily put to death or that others without sufficient cause should have taken their lives.

The *Daily Herald* says :—

> The swift execution of the Greek ex-Ministers found guilty of high treason for their conduct of the war is an act of unreflecting brutality that will do Greece incalculable harm. Such acts serve no purpose. They do not even, in Voltaire's grim, ironic phrase, "encourage the others."

The *Pall Mall Gazette* describes it as "a doubtful step," but is content that "Greece knows her own business best" :—

> It must be remembered that these men were found guilty of treason—a crime most certainly deserving of death if anything in human conduct is to be subject to that punishment. When a soldier is executed for treason, no protest is raised against the justice of the punishment. Is it to be understood that a wider latitude in the matter of loyalty is one of the perquisites of political life? If the method of trial is objected to, it has still to be shown what title we have to censor the administration of justice by a foreign Power within its own dominions. The Greek people are entitled to deal with their traitors and their criminals of every species in their own way.

The *Daily Chronicle* seems rather to misinterpret :—

> We have realised vividly in recent years that civilisation is a comparative term; but the ascendant party in Greece have committed an act which takes their country far back on the road of barbarism. . . .
>
> The wickedness of these executions lies in this fact that they are the revenge of party politicians, made possible by the deep and intelligible disappointment of the people. We need hardly say that the man who will condemn them most bitterly will be M. Venizelos, who has stood throughout his life for orderly and constitutional government.

Near East Bookshelf.

MESOPOTAMIA IN 1920.

"THE INSURRECTION IN MESOPOTAMIA, 1920." By Lieut.-General Sir Aymer L. Haldane, G.C.M.G., K.C.B., D.S.O. (London: Blackwood. 21s net.)

Following on the Great War, the Arab insurrection in Mesopotamia excited very little interest at home, and only the comparatively few people who follow Eastern affairs kept in touch with the trend of events. A book from the pen of the Commander-in-Chief of the British forces at that time is therefore welcome. It was prepared while he had access to official information, and it is copiously illustrated with excellent photographs of notable personalities and places associated with the insurrection and with diagrams illustrating the more important military operations.

The chapters dealing with the military operations read like an army commander's dispatch, but in other parts of the work, where the author discusses the political aspect of the insurrection, and of the events which led up to it, the reader is given the impression that Sir Aylmer Haldane is answering attacks which have been directed against his strategy. Consequently, a thread of defensive criticism, mainly applying to the civil administration and earlier military administrations, appears all through the book. The author seems inspired by a desire to be fair to everybody, but his comments on the conduct of the civil administration do not appear to be as authoritative or as carefully weighed as the pages which deal with military affairs.

In the first chapter Sir Aylmer regrets that he was not fully cognisant of the system on which the civil administration was framed. Inasmuch as he was civil as well as military head of Mesopotamia, it is very surprising that he had not obtained this information in London before he left for the East. When he accepted command, the policy of the Imperial Government was being conducted through the India Office, which, with all its knowledge of countries contiguous to India, particularly of those on the Persian Gulf, was obviously the department to deal with Mesopotamia until permanent arrangements were made. He appears to have had interviews with various Secretaries of State, but to have neglected to discuss the civil administration with the Secretary for India, from whom since 1917 the Civil Commissioner had received his instructions.

The author suggests that if an indigenous government had been set up after the Armistice there would have been no disturbances, but he omits to mention that His Majesty's Government repeatedly insisted that no such administration could be established until peace with Turkey had been concluded. His sweeping criticisms of the temporary civil administration suggest that he gave it less sympathy than it deserved. It was facing a difficult task without much help or guidance from the Imperial Government, whose policy vacillated. An experienced administrative staff had to be created, and the author admits that the personnel did not lack pluck, honesty of purpose, sincerity, or ability. The administration is accused of being too closely modelled on that of India, but here, again, criticism is of the nature of a generalisation which disregards the absence of a practical alternative policy. The methods of collecting land revenue meet with Sir Aylmer Haldane's strongest censure, but he appears to have overlooked the fact that the Turkish, not the Indian, system was adopted. A great deal of this criticism is, moreover, refuted by the remark of a leading inhabitant, quoted on page 31, that the Turks collected 25 per cent. more revenue than "our own more righteous procedure." Of the officers, many had been in the Political Service from 1917 onwards, and a knowledge of Arabic and of the manners and customs of the Arabs, together with a genuine consideration for their racial susceptibilities, was far more general among them than the book leads one to believe.

The author's description of his visit to the cooler climate of Persia is an interesting sidelight on the ramifications of the British Army's activities in the Middle East. To his absence, however, and to that of the Staff of G.H.Q., must be attributed much of the delay and indecision which so encouraged our enemies, and the reader will wonder at such a journey being undertaken at a time when the state of affairs in Mesopotamia appeared to be most unstable. It is also difficult to appreciate the reasons for moving many of the British troops up a difficult line of communications to the Persian uplands at a time when the defences of strategical points, particularly in the troublesome Euphrates area, were in a deplorable condition.

The difficulties of defending the vast accumulation of stores are well described in Chapter XI., and the author makes some pointed comments on the absence of a fixed policy of defence when he took over command. The recommendations on this subject in later chapters should be valuable to military students. In describing the steps taken for the emergency that had arisen, General Haldane gives the impression that he had to create a new organisation.

The stories of the hardships and privations of isolated detachments of British and Indian soldiers and officials will be read with interest and feeling. The author has done great service in making a permanent record of these events.

E. H. K.

HOOKAS AND KITTYSOLS.

"BYGONE DAYS IN INDIA." By Douglas Dewar. Illustrated. (London: The Bodley Head. 18s. net).

The pleasure which we anticipated on seeing the goodly exterior of this beautifully presented book, filled with reproductions of old pictures of the Englishman's life in India generations ago, and bearing a title which exhales romance and human interest, necessarily turned into dull resentment when perusal too soon disclosed the fact that we had really before us nothing but a reprint of sundry more or less unconnected journalistic efforts by an amateur journalist who appears to have devoted but little study to his subject. Not that he is able utterly to shut out the fascination of the old Anglo-Indian story before the days of steamers, punkas, and solah topees; but the glimpses we get only serve to remind us of what we are denied, and the author's patronising way of treating the old writers is simply exasperating. There is room for a book on the subject indicated by the title to this one, and, written by the right man, it will be a book that will be a joy to every Englishman. But its writer must be master of his subject as well as master of a style suitable to it. We may be doing Mr. Dewar an injustice, but his book leaves no room to credit him with the former qualification. If he possesses the latter, he has certainly successfully concealed it.

PERSONAL AND GENERAL.

TO-DAY.

December 7 (New Style).
November 24 (Old Style).
Rabia II., 18, 1341 A.H. of the Moslem Calendar.
Kislev 17, 5683 of the Jewish Calendar.

The Roumanian Minister has left London for Lausanne.

M. Gregoire Michaesco, Commercial Attaché at the Roumanian Legation, is back in London from Paris.

Prince Habib Lotfallah, the Minister of the King of the Hejaz to Washington, left London last week for Paris.

Lord and Lady Sinha left London last week in the P. and O. steamer China for Bombay. Sir George Macaulay is also travelling by this vessel to Port Said.

Mirza Mohammad-Ali Khan, Counsellor at the Persian Legation, has been appointed Consul-General to Turkestan, and is leaving London shortly to take up his new post.

The marriage arranged between Captain H. Gordon Paton, 126th Baluchistan Infantry, and Miss E. Beryl Ripley will take place at Southwark Cathedral on December 12.

The marriage arranged between Mr. George Morris, Ministry of Agriculture, Cairo, and Miss Bertha Ransom, The Ropewalk, Nottingham, will take place in Cairo, in March, 1923.

The engagement is announced of Major M. A. B. Johnston. M.C., Royal Artillery, youngest son of the late Major and Mrs. Robert Johnston, and Olivia, fourth daughter of Mr. and Mrs. T. Bowen Rees, of Boudjah, Smyrna.

Under the auspices of the Persia Society, Professor E. G. Browne will lecture on "Persia in the Days of 'The Great Sophie.'" The address will be delivered at 74, Grosvenor Street, on Wednesday, December 13, at 5.15 p.m.

An engagement is announced between Major Oliver St. John, 94th (Russell's) Infantry, Indian Army, eldest son of the late Lieutenant-Colonel O. H. B. St. John, 95th (Derbyshire) Regiment, and Marjorie Irene Parker, only daughter of A. J. Warden.

At a meeting of the Royal Asiatic Society on Tuesday, at 74, Grosvenor Street, the President, the Rt. Hon. Lord Chalmers, G.C.B., presented to S. de Lotbinière (Eton College) the Royal Asiatic Society's Public School Medal, and to S. K. Noaks (Merchant Taylors' School), a Book Prize.

Captain William Ferguson Menzies, 7th Lancers, Indian Army (retired), third son of the late Sir Walter Menzies and of Lady Menzies, of Culcreuch, Stirlingshire, was married last week at Christ Church, Down Street, Mayfair, to Kathleen Augusta, only daughter of the late Mr. Frederick Capel-Cure and of Mrs. Capel-Cure.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Among the passengers who left London last week by the P. and O. Bombay express to join the Macedonia at Marseilles were Sir Henry Dobbs, for Port Said, and Mr. Justice Ayling and Sir Francis Oppenheimer, for Bombay. Viscount Encombe, the Aga Khan, and Sir J. B. Wood also embarked in the Macedonia at Marseilles for Bombay.

A marriage has been arranged, and will take place early in January at Bangalore, between Bryan de Quetville Penny, of Galle, Ceylon, third son of the late Major-General C. B. F. Penny, R.E., and of Mrs. Penny, of Highcliff, Weymouth, and Helen Maud, fourth daughter of the late John Bacchus, Oak Mount, Bradford, and of Mrs. Bacchus, Braeside, Grassington, Yorks.

The Minister of the Kingdom of Serbs, Croats, and Slovenes and Madame Gavrilovitch, the Consul-General and Madame Yovanovitch, M. and Madame Fotitch, and Colonel Georges Ostoitch, were among those present at the Russian Church of St. Philip, Buckingham Palace Road, last Sunday, when a Te Deum was sung in celebration of the fourth anniversary of the Union of Serbia, Croatia, and Slavonia.

A marriage has been arranged, and will shortly take place in India, between Wray Palliser Hickman Roe, B.A.I., A.M.Inst.C.E., Bengal-Nagpur Railway, third son of the late William J. Roe, of Dublin, and Mrs. Roe, Glenmore, Paignton, and Olive Violet Justina Kent, only child of the late Herbert A. Kent, M.R.C.S.Eng., L.R.C.P.Lond., of Ringwood, Hants, and Mrs. J. W. Orr, Barrackpore, Bengal.

APPOINTMENTS, Etc.

Dr. Naji el Assil has been appointed Minister Plenipotentiary of King Hussein in this country.

Sir Leonard Rogers has been appointed a member of the Medical Board of the India Office, in succession to Lieutenant-Colonel C. H. L. Meyer, who has resigned.

Lieutenant-Colonel P. H. Kisch, just retired from the Army, has entered the service of the Zionist Organisation in Palestine, where it is understood that he is to assume an important appointment.

RUSSIA AND THE NEAR EAST.

The Central Asian Society met last week at 74, Grosvenor Street, to hear Lieut.-Commander F. Cadogan, R.N. (ret.) lecture on "Experiences in Russia, Transcaucasia, and the Near East." This lecture, which was illustrated with some excellent lantern slides, consisted of a description of impressions gained in post-Armistice work. In part it was extremely interesting, but possibly an undue proportion was given up to an exposition of the nature of the Bolshevist régime in South Russia and the Caucasus. But certain light was thrown on the Dardanelles, Batoum, Tiflis, and Baku.

In a discussion subsequent to the lecture, Colonel A. C. Yate recounted some of his experiences on his journeyings across the Caspian to Tashkend.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

THE EVACUATION OF PERSIA.

Last week, at Burlington House, the members of the Persia Society listened to an extremely interesting lecture by Major-General Sir Edmond Ironside upon his experiences in North Persia, 1920-1. The General began his lecture with a description of affairs in Persia as he found them when he took over from General Champain. The evacuation by British troops of North Persia having, for reasons of money, been decided upon, General Ironside was requested to take charge of the withdrawal. But he discovered that in the matter of instructions, the all-important matter to the soldier, something that was more or less a state of chaos prevailed. There were the British Minister at Teheran under the Foreign Office, the Political Agent under the Colonial Office, the Persia Force itself under the C.I.C. in Mesopotamia, who was under the War Office, and, as General Champain explained in a discussion subsequent to the lecture there was also the India Government butting in! General Ironside at once seeing the impossibility of such a situation declared at Baghdad that he would assume control only on the condition that he was given an absolutely free hand; and this be obtained.

The troops over whom he was placed were, he said, an excellent body of men. Though for long they, and particularly the Indian troops, had been absent from home, and though they were cut off by the limited means of communication from news of home, and the little comforts that make more palatable the ordinary Army rations, their discipline was exemplary. This fact, an unexpected one in view of the inevitably impaired *moral*, the General emphasised, and explained it by a reference to the British habit of games, and the sense of obedience implicit therein. He proceeded to describe the difficulties under which the Force had to perform its duties—the snows and the consequent meltings, the malarial districts, and so on. These, however, were not the only difficulties. The Persian Cossacks were officered by Persians of Tsarist sympathies, a fact which acted like a goad to the Bolshevists in the Caspian. But when these officers were dispersed, being given a free pass to wherever they wished by the British, the situation was considerably eased.

However, the Force could not be withdrawn until the spring, when the snows would be sufficiently removed from the Manjil Pass, and during the winter several encounters were made with the Bolshevists near Enzeli, and many gallant little acts were performed by the British. Of the Bolshevists as soldiers General Ironside did not think much, because, he said, you cannot have democracy in an Army—in illustration of which fact he gave one or two amusing examples. One of these, an intercepted message, was to the effect that a Commissar, an ex-able seaman, was empowered by somebody or other to arrest a Senior Naval Officer! The actual evacuation of the Force the General was not able to supervise; for on the return flight to Kasvin from Cairo, whither he had been summoned to attend the Eastern Conference, he broke his thigh. But, he said in conclusion, his Force did achieve one thing, and that was, it prevented a Bolshevist invasion of Persia—there was no question about that.

He then showed some very instructive lantern slides, which enabled one to get an idea of the impassibility of the roads at the season of the snows. The melting of the snows, which formed into a seething brown torrent, was also shown as one of the difficulties with which this force had to contend. Among other things depicted were a typical Persia village, so compact as to be highly desirable from an R.A.F. point of view, natives at work in clearing away the snow, and camels stamping in the snow so as to make the ground possible as a taking-off place for aeroplanes.

In the subsequent discussion General Bateman Champain, Colonel Lakin, and Commodore Norris participated. General Champain explained the general position as it was when he had command, and vividly suggested the loose way in which things were done by describing the Brigade with which he was to enter Persia: one battalion of it was at Kut, one at Merv, and one at Kradsnovodsk! Colonel Lakin, to whose work on L.O.C. General Ironside had previously paid very high tribute, explained that after General Ironside had left Persia the evacuation took place exactly according to programme. Nothing of any importance was left by the British in Persia. He praised the work of the native labour in helping to keep the roads free, and, too, the assistance given to the military by the officials of the Imperial Bank of Persia. Commodore Norris, who was in charge of the ships operating in the Caspian Sea, stated his belief that the defence of Persia lay in the Caspian Sea, which could be held by commanding the mouth of the Volga.

UNIVERSITY OF LONDON.

A Public Lecture entitled "CUSTOMARY LAW IN THE PUNJAB" will be given by Mr. S. WILBERFORCE (late Puisne Judge of the Lahore High Court) at UNIVERSITY COLLEGE, LONDON (Gower Street, W.C.1), on TUESDAY, DECEMBER 12th, 1922, at 5.15 p.m. The Chair will be taken by Sir Charles Bayley, G.C.I.E., K.C.S.I., Member of the Council of India. Syllabus obtainable on application to the undersigned. ADMISSION FREE, WITHOUT TICKET.

EDWIN DELLER, Academic Registrar.

THE EGYPTIAN CABINET.

A Cairo message states that the Nessim Ministry has been constituted as follows:—

TEWFIK NESSIM PASHA	Prime Minister and Interior
ISMAIL SIRRY PASHA	Public Works
AHMED ZULFIKAR PASHA	Justice
YEHIA IBRAHIM PASHA	Education
MAHMUD FAKHRY PASHA	Foreign Affairs
MOHAMED RIFAAT PASHA	Communications
YUSUF SULEIMAN PASHA	Finance
AHMED ALY PASHA	Agriculture
MAHMUD AZMY PASHA	War

THE NEW MALTA HOSPITAL.

The Governor of Malta on November 30 opened the King George V. Merchant Seamen's Memorial Hospital, Malta, erected in memory of the services rendered to the Empire by merchant seamen in time of war. The hospital has thirty-two beds. To carry on the hospital an endowment fund of £50,000 is needed, and half this sum has been provided by Captain and Mrs. Wisely. It is hoped that contributions will be forthcoming to wipe off the balance. These should be sent to Field-Marshal Lord Methuen, Corsham Court, Wiltshire, President of the Seamen's Christian Friend Society Hospital Trust, or to the Secretary of the Trust at 31, Denison House, Vauxhall Bridge Road, S.W.1.

THE GREEK VENDETTA.

The execution of five ex-Ministers in Athens has rightly shocked the civilised world. While nothing can justify the unseemly haste with which the sentences were carried out within a few hours after the delivery of the verdict, some extenuation for the death penalty might be urged, if it were a fact that the drastic action taken by the Revolutionary Committee represented a new spirit in the Greek nation, which was concerned henceforth to require competence among its rulers and to withhold immunity from those who play fast and loose with the lives of the people. Both trial and verdict, however, are seen to be mainly, if not solely, the outcome of a political vendetta. The evidence before the Court-Martial, as well as the arguments used to justify the executions, proves this. The dead men belonged to a political party to which those who have been behind the Revolutionary Committee since it assumed the reins of power in Greece are opposed. The charges on which they were brought to trial turned on matters of policy; they were condemned by political bias, not for the vindication of national honour. If culpability attaches to the *débâcle* in Asia Minor, it must attach as well to those who committed Greece in the first instance to an enterprise that must sooner or later have ended in failure, and if the action of these men is not called in question, the world is left to infer that it was hoped to attract attention away from their responsibility by inflicting a sensational penalty upon those who inherited the initial mistake. A deed that gives offence to the whole civilised world cannot have been inspired by concern for the interests of Greece; on the other hand, it represents a shrewd blow on behalf of party interests. With the death of the five ex-Ministers Venizelism triumphs for the moment in Greece.

To understand the inwardness of what has happened it is necessary to pass in review the course of events in Greece during the last eight years, not as the incidents were seen at the time by the British public through the prejudiced spectacles of war-fever, but as they must inevitably appear in the cold light of established facts. Here, for the sake of brevity, we may ignore controversial subjects and examine the situation from a purely Greek point of view. Europe was at war, and both sets of belligerents wished to enlist the support of Greece. The King, on whom the Constitution confers absolute discretion in the matter, was opposed, with the approval of his military advisers, to taking part in the war. After a time, however, he was prepared, under pressure, to abandon neutrality in favour of the Allies on condition that he received, first, a formal guarantee from them that at the end of the war Greece should suffer no diminution of her existing territory. That guarantee the Allies could not, or would not, give, and King Constantine clung obstinately to neutrality. The Greek Prime Minister of the day did not share his Sovereign's caution; he entertained schemes of Greek aggrandisement in Asia Minor, and was eager to stake everything to accomplish this aim. Naturally, the policy of M. Venizelos secured him the enthusiastic support of the Allied Powers, and when he threw down the gauntlet to the King he was able to challenge the latter on practically equal terms. Greece became divided into two camps. In December, 1916, the two sections of the people, bitterly hostile to one another, exchanged rifle shots in the streets of Athens, the upper hand remaining with the Constantinists. In June, 1917, the King was expelled by the Allies, and M. Venizelos returned to power. The political vendetta now had full play. Members of the Opposition Cabinets were arraigned for high treason, political opponents were imprisoned or deported, some were murdered; nearly 2,000 officers of the army and navy, including generals and admirals, were put on the retired list or placed under arrest. The country, however, remained Constantinist at heart. In August, 1920, M. Venizelos was wounded by two Greek ex-officers in Paris; three months later his Government was defeated in a general election, and a practically unanimous plebiscite recalled King Constantine. No serious excesses marked the restoration, but Constantinist officers who had previously been displaced by Venizelists were substituted for the latter. In Asia Minor the Venizelist policy, to which the country was now fully committed, but to which the King had been opposed from the outset, was continued; war against the Turks was resumed, with this difference: that the army and the nation, both of which had previously shown war weariness, now responded eagerly to the King's appeal. Soon enough the hopelessness of the Greek position was realised, but there could be no withdrawal, because the Allies would not co-operate with the Greek Government to devise safeguards for the Christian minorities in Asia Minor. Then came the inevitable. Greece, with her army, broke down under an intolerable strain. The disaster has at once been made to serve its purpose in the political vendetta. The revolution, it is true, began as a military movement, and, as such, it was a bloodless one. Arrived in Athens, the officers at the head of it appear to have come immediately under political influences. There was a strong party colouring in the official appointments, and there can be little doubt that party prejudice prompted the impeachment of ex-Ministers. Before the end of the trial "irreconcilable Venizelists" were reported to be insisting on the infliction of the full penalty on the accused.

It is an axiom that the killing of Greeks by Greeks, whether after a trial or without one, is a Greek affair, and does not call for the intervention of other countries. The common cause of humanity, however, knows nothing of national boundaries in what passes as the civilised world, and we are glad that the British Government instinctively gave expression, in the only way open to it, to its feeling of repulsion on hearing of the execution of five Greek ex-Ministers. The gesture suffices. It matters not if, for one reason or another, the post of British Minister in Athens is immediately refilled. Greece knows the opinion that the world holds of the act committed in her name by a handful of men, and no individual country is required to stultify its own interests and those of Greece as a whole, or to clog the wheels of international machinery by remaining unrepresented in Athens. Neither the British Government's appeal for clemency before the trial was concluded nor the recall of the British

Digitized by Google

Minister after the executions amounts to interference with the domestic affairs of Greece. The appeal was a friendly act to remind the Greek Government betimes that its views on a certain matter were not likely to be shared by others; the recall of the Minister brought home to Greece the soundness of the previous contention. Now that the mischief has been done, Greece's course of action remains, as it has been all along, her own concern; she is free to allow those in power to sate to the full their political blood-lust, or she may elect to repudiate them. Owing to the exigencies of the Great War, and the no less trying preoccupations of the period since the Armistice, men's minds, in Britain and elsewhere, have become blunted to the promptings of Christian principles, and a blind eye has been turned to many happenings that have been an outrage on our civilisation. The action of the British Government has served to remind the nations that there is a higher code of morals than the gratification of political hatred, and it will not be lost on Greece that a country which has continually appealed to Christendom against the barbarities of non-Christians is expected itself to show at least some respect for Christian principles.

ARABS AND AEROPLANES.

By the Rev. W. A. WIGRAM.

The Air Force is the principal representative of the British Army in Mesopotamia to-day.

It is on it that the real responsibility for the land—in a military sense—is to fall, and it has now the opportunity not only of showing its own capacity, but of testing the truth of a dictum of that very able administrator, Sir Arnold Wilson. That officer was asked, in old days, when hopes were higher than they are now, what force he would require to hold Mesopotamia. He answered, that if he could have all the aeroplanes and armoured motors that he needed he would be prepared to do it without any army at all!

Of course, the question whether a force that is mainly composed of aeroplanes can control Arabia depends on the impression that the said aeroplanes make upon the native mind, and this is a little difficult to be sure of. The Arab is now well past the stage of being awed by their mere appearance—not that that ever did awe him much. When all men's minds are accustomed to the notion of *afrits* that can fly in the air and carry a gentleman from Baghdad to Cairo, dropping him, maybe, midway at Damascus by accident, then to see such a creature on his travels is interesting, of course, but does not paralyse you with fear. They have various explanations of the phenomenon. One sage declared in most proper Emersonian jargon that the sahib had "hitched his wagon to a star," and pointed to the gleam of the revolving propeller in proof thereof. Another saw nothing remarkable in the flight of the machine; it had merely taken up a few clods of earth from the ground and was reposing on them! In fact, the aeroplane is a phenomenon so much beyond the eminently practical mind of the average Arab that he cannot be astonished at it, even as a man of low "rate" of hearing cannot hear the squeak of a bat. He was much astonished at our cattle and mules—at a "higher power," that is, of things that he knew for himself. Aeroplanes and motors were outside his range. A nightmare may cause you much unpleasant feeling, but not the feeling of astonishment. They certainly are, for him, evidence of mysterious power of a sort, and that brings us to the question, "What can they actually effect?"

They have their limitations, and indiscriminate bombing of the disorderly, for instance, is much to be discouraged, because it manifests one of them! "Reprisals" and their propriety apart, the thing does not do much. You can throw quite a lot of bombs among Kurdish rocks or on scattered Arabs without hurting anyone, and if a lucky shot should disable the pilot and bring the machine down (and there has been an example or two of Marryat's rule that "chance shots always pick out the best men"), then there is nothing in the machinery of war that looks so very dead as a smashed aeroplane, and the thing is bad for prestige. Besides, you may bomb the wrong people by mistake. "It is amazingly difficult," wailed a poor observer, "to distinguish friendly Arabs from unfriendly when you are 5,000 feet up, and though I did take up the Assistant Political Officer, he was no help at all." The only plan that would be really effective—viz., that friendlies should be recommended to wear blackboards, say, four feet square, on their heads—was hardly a practicable one!

Villages can be bombed easily, and reduced to a heap of smoking fragments, but if the village is made—as in the case of the disorderly "swamp Arabs"—of nothing more substantial than reed huts, the moral effect is not all that can be desired. Even when they are of more solid material, regrettable mistakes have been known. Still is the tale one that the Air Force love not to recall, of how the Divisional Adviser of a certain district sent them out to chastise certain of the rebelliously disposed. They went, they dropped their bombs on the selected target, they saw it vanish in smoke and dust, and they returned triumphant, reporting to the D.A., "Rebellious village of X bombed according to your orders and utterly destroyed. Enemy casualties unknown, but must be heavy." All were satisfied, till two days later the D.A. passed on a note from the Assistant Political Officer of the district, which ran: "Please tell the Air Force to be more careful. When they tried to bomb the rebellious village of X., they dropped all their bombs on the orderly and exemplary village of Y. N.B.—Total casualties, one ox wounded."

As a rule, the rebellious Arab has a great dislike and fear of the aeroplane, which sometimes shows itself in ugly manifestations. In the rising of 1920, for instance, those who were in arms against us generally treated prisoners, if not well, at least as well as they knew how to. Dark tales are told, however, and we fear only with too much truth, as to the fate of airmen, and of Sikhs—for whom

ASK FOR WHITE HORSE WHISKY BY APPOINTMENT.

Digitized by Google

they seem to have had a special hatred—who fell into their hands. After all, the feeling was human enough. Some of us may remember the intense feeling of personal resentment that prevailed in many circles in England when the Zeppelins came over. It was the sense of helplessness that induced it.

This, however, does not prevent the sporting instinct from coming to the front, even in unlikely subjects. Pilots of a certain squadron of the Air Force, formerly stationed at Mosul, will still remember what befell when they went out to bomb a sheikh of the name of Nejris who had contumaciously refused to return certain camels that had "strayed" into his encampment. The officers came back without their machine, stating that they had been forced to land, owing to engine trouble, near the tent of a friendly sheikh, who had taken them in, set sentries over the disabled aeroplane, shown them all possible hospitality, and finally provided transport for their return to Mosul. As they had no language in common, they could not give the name of their host, but they produced a note from him in Arabic. This was duly translated, and it turned out to be a most courtly communication from the very Nejris whom they had set out to bomb, for they had lost their bearing a little in the desert, and came down in his camp. Nejris explained how delighted and honoured he had been by the visit of the officers, and requested instructions as to what he was to do with the aeroplane, which he was carefully guarding in the meantime! How authority settled it we know not.

Having thus explained with care what aeroplanes cannot do, and what they fail to do, let us now say what they can do in the way of keeping order, apart from their known and undoubted usefulness as survey instruments and mail-carriers.

What they can do is to prevent small troubles from becoming big, by virtue of the infernal mobility—to speak from the point of view of the disorderly—that they can give to a tiny force. They could not, of course, handle a large rebellion by themselves, but in the East no rebellion ever becomes large if authority can show itself at once when it begins, and it is just that power that the aeroplane conveys. The rising of 1920, for instance, was only made considerable by the misfortune that befell a party of the Manchester Regiment, who were attempting a piece of work that was impossible for infantry, but well within the power of a squadron of aeroplanes. That "regrettable incident" made it a big thing at once. Again, the remonstrances of a "Divisional Adviser" who is known to have no troops behind him save a handful of native levies who may not be trustworthy are apt to carry little weight; but the appearance of one or two flying machines, even if they do not have to land, makes them far more substantial. Raids do not take place with either Arab or Kurd if that ancient and fascinating form of sport is known to be at all dangerous; and it does not require more than a handful of troops to check raiders or to catch them on their return if only you can get them to the spot in time. Machines such as those with which they are now experimenting which may carry six to ten passengers give just the power that is required in the matter, and raiders who have been confronted by even half a company of soldiers on their way back with their spoil, "men who have dropped from the clouds on purpose to annoy decent Kurds," are not likely to try that game a second time.

Or take such a tribe as the Shammar confederacy of Arabs. There are always bills out against these gentry, either for raids committed or taxes unpaid, but to catch them in so big a place as the desert is very difficult, and apt to be more expensive than the thing is worth. The only weak point of their position lies in the necessity of a certain annual migration from South to North and the possibility of catching them *en route*. Aeroplanes capable of carrying small parties of police or troops should provide just the machinery needed. If an absolute outsider may venture a suggestion, however, we would say that the dropping of bombs (if any fighting becomes necessary) is useless with scattered Arabs. Would it not be practicable to put the weight carried in bombs into armour capable of turning a rifle bullet and of protecting the vital parts of the machine and its pilot? Then he would probably find low flying, and "spraying" the enemy with a machine gun, a more effective mode of action than the throwing of any amount of explosives.

What we have to guard against in Mesopotamia is not the general rising of an outraged people striving to be rid of the foreigner, for the mass of the population do not want to be rid of him. There is a chance of small local outbreaks from local causes, and if one of these should have temporary success, "the heather might catch fire" all over the land. The Air Force can prevent these small outbreaks. If, as seems to be the case, we must administer the land with a sergeant's party instead of an army, and trust to the personal influence of splendid young officers who enjoy the gamble with their own lives that is implied (and, truth to tell, we have found the system work well enough elsewhere), then the Air Force supplies that "cheap power" which is often a desideratum in these days, and may well enable us to "carry our bluff through" until the native power that we are fostering may attain strength enough to stand alone.

NOTES AND NEWS.

1, Devonshire Square,
London, E.C.2.

Trade and Politics.

There is no doubt at all that trade is continuing to improve. Indications of this, slight but nevertheless significant, are to be found in almost all directions. But, as was to be expected, the improvement has so far been a very slow process, and whether it is to quicken until we are in the enjoyment of something that really merits the term "trade activity," or whether we find ourselves back in the old stagnation, will depend entirely on political developments. It would be futile to pretend that at present the political outlook is promising, but vicissitudes are only to be anticipated when matters of such difficulty as those being debated at Lausanne are under discussion, and it is all to the good in regard to Lausanne and the Reparations question that there is a growing realisation on all sides that a final settlement is essential in the interests of all. That fact gives justifiable cause for hope that in the New Year commerce will be free to go ahead unhampered by the fear of what is going to happen.

Near East Oil Concessions.

Oil is looming ever larger on the Near East horizon, and it is very evident that if the hopes of would-be concessionnaires in that region are realised, it will play a great part in the economic development of the various countries, and ultimately make the Near East markets immensely more important than they were before the war. As an instance of the present activity, I would direct attention to our Tirana correspondent's report this week of the numerous companies that are seeking a concession for oil exploitation in Albania. There is no information as to the prospects in regard to oil in this particular country, but the names of the companies who are interesting themselves in the concession speak volumes. Other interesting oil news is forthcoming from our Bucharest correspondent, who reports an American proposal for a concession in respect of the State oilfields (which it is not anticipated will be granted), and an arrangement for British participation in one of the Roumanian oil companies.

The Anglo-Persian.

The wonderful record of progress of the Anglo-Persian Oil Company in recent years and the fact that the British Government holds an extensive interest in the concern invest the reports of the company with a very special degree of interest. This year's report, which will be found on another page, does not show quite as good results as those of the previous year, which were easily a record. This was foreshadowed by Sir Charles Greenway at the last general meeting. In dealing with the prospects of the current year he said that there would be a severe falling-off in profits because the heavy fall in the prices of products had not been fully compensated for by the increased throughput owing to the long time necessarily occupied in bringing the various extensions of the company into operation. But while the net profits are appreciably smaller, the balance available for distribution is considerably larger owing to there being no liability for excess profits duty and to the large amount brought forward. Considering the conditions, the results achieved can only be regarded as excellent, while in the coming year, when the company will be operating under much more favourable circumstances, it will not be unreasonable to expect a considerable expansion of profits.

The Year's Results.

Turning to the figures, the net profit amounted to £3,130,000, as compared with £4,028,022 for 1921 and £2,611,615 for 1920. The amount written off for depreciation is not stated, but it may be assumed to be considerable, and in this connection it is interesting to note that beside the allocation to reserves out of the net profits of £600,000 there is an allocation for extra depreciation of £400,000. That leaves a balance of £2,130,381, which, with the amount brought in, gives an available total of £3,779,173, as compared with £3,263,792 for the previous year. The preference dividend now requires £795,000, as against £400,000, owing to the issue last January of 2,000,000 8 per cent. cumulative preference shares, while the maintenance of the ordinary dividend at 20 per cent. calls for £1,245,000, as compared with £1,215,000. The carry-forward is again higher at £1,739,000, as against £1,648,792.

The Company's Progress.

As regards the oilfields, it is stated that the production of the older wells continues to be well maintained, while the bringing in of further new wells in hitherto untested territory has materially extended the proved oil area. An active programme of drilling is being carried out, and favourable results are anticipated. It is further pointed out that exploratory work is being actively conducted by the company's subsidiary, the D'Arcy Exploration Co., Limited, in various parts of the world, special reference being made to developments in South America. The development of existing and new distributing facilities in the United Kingdom, on the Continent, and elsewhere has gone on rapidly, and additional facilities are being provided. Apropos of the prospect of a further capital issue, to which I referred last week, it will be noted that a resolution is to be submitted at the meeting authorising the raising of further funds, so that it is reasonable to assume that a new issue may shortly be forthcoming.

Commerce and Industry.

(Reports from Our Own Correspondents.)

ROUMANIA.

Bucharest, November 24.

The "Reshitza" Steel Works.

The board of directors of the Reshitza Company, with the approval of the Government, has decided to increase the present capital of 125 million lei to 175 million lei by a fresh issue of 100,000 shares of 500 lei each. Thirty thousand shares will be allotted to Vickers, Ltd., whose co-operation was secured on the occasion of Sir Basil Zaharoff's visit here; the remaining 70,000 shares will be offered for public subscription in the country to Roumanians only, preference being given to existing shareholders. Thus the French and Austrian shareholders of the company will not benefit by this new issue. A general meeting has been convoked for December 15 to ratify this arrangement. The new capital will be used also for developing the mineral concessions which the Reshitza Company possesses.

The "Sospiro" Oil Company.

The "Sospiro" Oil Company, which was founded two years ago, has lately succeeded in securing the co-operation of a group of British financiers. This will help the company to consolidate its position and to increase its capital. A general meeting is to be held on December 16 to ratify the arrangement with the British group.

The State Oilfields.

It is reported here that the American Guaranty Trust Company has recently approached the Roumanian Government with a view to obtaining the concession of the State Oilfields. The American company undertakes to supply the entire internal oil requirements at cost price, and to share with the State the proceeds of the exploitation, the Roumanian State's share to be paid by means of supplies of railway rolling stock and other manufactured goods from America. It is doubtful whether the Government will agree to the proposal—for so far it has been entirely against giving concessions on the State oilfield to foreigners.

Exports.

According to official data, the aggregate figures for exports for the first eight months of the current year are as follows:—Cereals, 745,279 tons, of the value of 2,181,012,000 lei, of which the outstanding items are: Barley, 249,866 tons, value 718,882,000 lei; maize, 281,203 tons, value 812,540,000 lei; oats, 105,079 tons, value 300,360,000 lei; haricot beans, 45,938 tons, value 157,498,000 lei; oil products, 320,622 tons, value 1,478,443,000 lei; timber, 91,000 tons, value 673,215,000 lei; and cattle, eggs, wine, and salt of the value of 709,331,000 lei. The total exports for the first eight months amount in value to 4,277,000,000 lei.

Miscellaneous.

Mr. Gretle, of the Baldwin Locomotive Works, Philadelphia, has arrived here in order to arrange matters with the Minister of Finance in connection with the locomotives supplied by this company about three years ago. This company refused at first to fund the Treasury bonds in their possession, insisting on cash payment. Negotiations are now in progress with a view to reaching an arrangement suitable for both parties. The amount at issue at the present low rate of exchange represents a few milliard lei.

The Government has approved the placing of an order in Germany for 100 passenger coaches at a cost of eight million gold marks. The order comprises fifteen first-class coaches, twenty-five second-class, and sixty third-class coaches. Their delivery will be effected within eight months. The cost will be deducted from the amount of twenty-five million gold marks which Germany owes Roumania as war indemnity for 1922-23.

The German Government has concluded the delivery of horses to the Roumanian State in compliance with the Peace Treaty. Five thousand five hundred horses have been delivered in all.

YUGOSLAVIA.

Liubliana, November 22.

The Budget.

The financial estimates have now been submitted by the Minister of Finance. The Budget shows a balance, and exceeds 8 milliard dinars; 1,500 millions were demanded for the Army—a large sum, but not disproportionate if one takes the position of the country and the general state of Europe into account.

ALBANIA.

Tirana, November 14.

Albania and the League.

It will be recalled that Albania addressed a request to the League of Nations for an investigation into the country's economic position with a view to facilitating the co-operation of foreign capital. M. Calmes was sent to Albania in July, 1921, and remained there seven weeks and presented a report which was read at the eighth session of the Council of the League. It is a pamphlet of 30 foolscap pages, supported by documentary evidence, and very lucid. M. Calmes opens with a very optimistic introduction on the Albanian people and their future, describing the satisfactory position in the interior and the happy result of the measures taken for general disarmament with a view to making the Albanian mountaineers submit to various fiscal obligations and to military service. The report shows the economic and financial state of the country, and shows that foreign capital will find there a very favourable field for profit. I understand that the League is in negotiation with an American who will come to Albania as financial adviser, and who will have the task of interesting foreign capital in the establishment of a bank for business and the issue of notes in Albania.

Competition for Oil.

The competition for oil is becoming very severe. In the course of the last week representatives of the Anglo-Persian Oil Company arrived at Tirana. Already representatives of the Standard Oil and the Sinclair Companies are in our town. Besides these three companies, there are the A.B.C.D. and Nobili (both of them Italian) and the Sheridan (English), which are trying to obtain the concession, to say nothing of the offer of the Syndicat du Petrole of Paris. The proposals of these companies are being studied by the Minister of Public Works, and we will have to wait until the question is brought before Parliament.

Reuter's Marseilles correspondent, in a message dated November 28, states that a disastrous fire broke out here at one o'clock that afternoon in a shed on the Mole near Cape Pinede. The fire destroyed 4,000 bags of copra, and the total damage is estimated at more than 600,000 frs. (£10,000)

Engineering Topics.

(By Our Engineering Representative.)

Cold Expansion.

More than usual interest has been aroused in engineering circles by the definite statement, recently made by an engineer of great practical experience, that in Siberia and other parts of the East and Near East steel will expand, instead of contracting, during the intense winter cold. From this he would seem to argue that, within ordinary temperature limits, a point is reached when the contraction of steel due to absence of heat ceases, and that as more heat is abstracted the metal commences to swell. David Carnegie, in his exhaustive works on steel and steel-making processes, says nothing regarding this, nor, so far as I can ascertain, does any other authority.

It must be remembered in this connection that we are dealing with the practical side of the subject, and are not concerned with any theoretical considerations as to what might or might not happen at abnormal minus temperatures. The change mentioned is said to take place within the limits of an ordinary Siberian winter, and the claim should certainly be investigated under conditions which would ensure correct results being obtained.

The statement made by the engineer may be placed on record for the sake of reference. He says: "Frequently during the intense cold of the months of December, January, and February I observed the rails of the Trans-Siberian Railway so jammed up against each other by expansion that the ends were beginning to work up, but were prevented from doing so by the chairs on the sleepers. . . . For length after length, verst after verst, the expansion was such that a pin could not be thrust anywhere between the rail ends."

He adds, and this is perhaps the most interesting portion of his statement: "It is true that during the moderate—for Siberia—cold of, say, down to 25 to 40 degrees below zero Cent. the usual rail contractions were noticed here, as in any other country during winter, but, of course, being far more pronounced in this sub-Arctic region. But beyond 40 degrees below zero, under certain conditions, steel rails begin to behave differently. They expand. . . . The fact is incontrovertible, since various Russian engineers in Siberia, placed in possession of this singular feature by myself, have taken cognisance of it." And there, for the time being, the matter must rest, although I shall be glad to have the opinions of readers upon the subject.

Road Preservation.

It is difficult to understand why such inefficient methods of road upkeep as are in vogue should be persisted in. After the hard wear of the summer practically every highway in the country is left, with its scarred and broken surface, to withstand the frost and wet of the winter, with the result that by the time the spring is here substantial repairs are inevitably necessary. The remedy for this is tar-spraying; frequent sprayings during the late summer and one or more during the winter in dry, even the frosty, weather. Adequate tar-spraying will preserve any road and, curiously, careful gravelling after this treatment always results in a smoothing down of inequalities and a filling-up of hollows and worn places. It is strange that our road engineers and surveyors make so little use, comparatively speaking, of tar, which is so cheap and so readily obtainable.

Illuminating Engineers.

When the subject of illuminating engineering was first mooted, and Mr. Leon Gaster began his indefatigable efforts to force recognition for the profession, I remember that I frequently used to raise the point with him that the gas and the electrical engineers of the country, each with a specialist's knowledge, were adequate and capable of dealing with any problem or question that arose. His view was that each was likely to be unconsciously partial, and that an impartial judgment on questions of illumination could only be given by one who was independent of both professions. Time rather seems to have justified Mr. Gaster's contention, although professional illuminating engineers are still few and far between.

Interior Lighting.

This was strikingly brought home to me a few evenings ago, at the Royal Institute of British Architects, when I listened to Mr. Lawrence Tye dealing with illuminating engineering in relation to architecture. He pointed out that only three methods of lighting were actually available, these being of the direct, semi-direct, and indirect class. Personally I think this nomenclature might easily be bettered—semi-direct, for example, is really a barbaric term—but that is beside the point.

By direct lighting with prismatic reflectors, as he pointed out, it is possible to redirect 70 per cent. of the total light immediately to the working plant, whilst transmitting in addition 20 per cent. for the illumination of walls and ceilings. In Mr. Tye's opinion—an opinion, I do not share—the use of a ceiling as a reflector is unscientific and leads to unbalanced results. I am not interested in the jargon of the illuminating engineer, and could not hazard a guess even as to what Mr. Tye meant by ill-balanced results. If he means what I should be tempted to think he means, he is practically wrong, even though he may be theoretically right. So far from ceiling reflecting tending to throw the lighting result out of balance, it actually softens and balances it in a manner which I, with thirty-five years of practical experience behind me, have never been able to do with a glass or metal reflector or shade.

Mr. Tye said that, in his opinion, the solution of perfect lighting rested on a return to units of a direct character—another extraordinary utterance. Its fallacious character is readily apparent when one remembers the practically perfect lighting thrown over a countryside when white clouds cut off the direct sunshine. Does Mr. Tye realise that what he says is tantamount to saying that the world would be better lighted if we had a multiplicity of suns?

With Mr. J. H. Parsons, however, I was in cordial agreement when he suggested that it would be better if architects took some real interest in lighting and lighting fixtures. Some of the monstrosities that occur might then be avoided, and beautiful buildings and rooms saved from being spoiled by atrocious fittings.

BALKAN RAILWAY AGREEMENT.

The Commercial Secretary to H.M. Legation at Bucharest announces an agreement made between the Roumanian and Bulgarian Administrations regarding passenger and goods traffic between those two countries, which will be carried out *via* the frontier stations Oboriste and Bazargic. The text of this agreement, which has yet to receive the sanction of the Roumanian and Bulgarian Governments, may be consulted by British companies interested at the offices of the Department of Overseas Trade (Shipping and Transport Section), 73, Basinghall Street, London, E.C.2.

EGYPT'S MINERAL RESOURCES.

Oil Development Drawbacks.

For many people a reference to the mineral resources of Egypt would signify oil *et praeterea nihil*. But, in addition to considerable, and possibly very great, petroleum resources, Egypt possesses a variety of other minerals, of which some have been exploited intermittently from the earliest times, others have only attracted attention in comparatively recent times, while others again still await development. These are dealt with in detail in a very interesting report* recently issued by the Mines and Quarries Department of the Egyptian Ministry of Finance, in which, in addition to a survey of the economic geology of Egypt, and a review of the history of the mineral industry of the country, a succinct account is given of the position with regard to each of the various minerals.

It must be emphasised that hitherto mineral exploitation in Egypt has been carried out in the main in certain well-defined zones. The reasons why this should have been so are obvious. In a country with great stretches of desert, with communications and facilities lacking, it follows that mining enterprise must be subject to limitations, for an enterprise must hold out prospects of exceptional profits if it is to be considered worth while to undertake the immense expenditure that would be entailed in successful exploitation. So far, apart from oil, the minerals as a whole have not yielded results important enough to lead to consistent operations. The gold-bearing regions, for instance, have been exploited from time to time with varying success, while other minerals have been worked for short periods; for a different state of things to obtain there must be the assurance of more permanent results. What prospect there is of that must remain to be seen. Up to the present only a comparatively small part of the country has been prospected, and it may be that the future will show that the desert conceals mineral riches which will change the face of the country, and will give Egypt another factor on which to depend in addition to her agriculture. At any rate, the known mineral resources of the country would certainly seem to justify an attempt to determine whether they are only isolated examples or not.

Deservedly the longest section in the report is that dealing with petroleum. It is pointed out that up to the middle of 1914 the whole of the production came from Gemsa, and in April of that year a prolific gusher was struck, yielding at the rate of 3,000 tons daily. "After eleven days the flow changed to a reddish-brown emulsion of oil, water, and earthy matter. Thus all the wells at Gemsa have eventually been invaded by salt water. The source of this water has not yet been definitely settled; it comes in either at a separate horizon in very close proximity to the oil or possibly from the underlying Nubian sandstone formation. Attempts to exclude this water have failed up to the present, but should success be attained in a new producing well, there is little doubt that considerable quantities of high grade oil are yet available on the coast of Gemsa headland."

It is remarked that if the discovery and development of the Hughada field had taken place in normal times greater attention would doubtless have been attracted to the country's oil potentialities. Actually it was not until 1919 that new comers began the work of prospecting along the coast and on the peninsula of Sinai. At the end of 1921 eight bores were being put down in territory that had not hitherto been drilled. Stress is laid on the handicap to prospecting for oil imposed by the question of communications. Suez is the nearest port for prospectors, and it is pointed out that "for many years the nearest prospecting camp to Suez has been not less than 100 miles down the Gulf, so that, in most instances, communication has been accomplished by steamer as offering a surer and quicker method of supply and transport than the native *gatira*." As regards inland communications, "narrow gauge decauville railway is the most convenient form of local transport from the landing point to the site of operations." One-ton motor lorries have been used successfully for short journeys, when lightly loaded, while caterpillar tractors are stated to have proved useful for longer distances up to 25 miles. Another difficulty for the prospector is the lack of water. "No reliable supplies of fresh water are found in the oilfields region, and fresh water has only been struck once in any of the deep borings; there are, however, possible sources of supply in the main *wadis* or dry river beds, and prospectors might reasonably include a tube well equipment in their outfit. At present fresh water must either be brought from Suez or condensed from sea water; no other source can be relied upon for regular supplies."

Reference has already been made to the exploitation of the gold deposits, and little more need be said here. Most of the deposits that are known to have been worked by the ancients, it is stated, are small and patchy and are, generally speaking, more suitable for utilisation by local enterprise than by large concerns. The position of the gold mines in the desert is a great drawback. The industry has fluctuated considerably since 1902, and from 1916 the production rapidly fell from 6,287 fine oz. to nothing for 1921. As regards lead and zinc, mention is made of the successful exploitation of the old mine at Gebel Rossas by the Compagnie Française des Mines du Laurium for four years. Investigation has not disclosed an extension of the mine in the vicinity, but it is suggested that similar occurrences may exist in the same district.

Peridots, for which Egypt is well known, come from St. John's Island, in the Red Sea. The deposits were worked in early times, while prior to the war they were operated by the ex-Khedive. The mines are now leased from the Egyptian Government by the Red Sea Mining Company. Nickel is found by the peridot workings, and the area is leased to the same company. Sodium salts

are found in a variety of places, and their wide distribution, it is pointed out, is more often a disadvantage to the agriculturist than a benefit to the miner. "The principal salts found are the chloride, the sulphate, and the carbonate. The chloride is obtained for commerce principally from the marine lakes on the shores of the Mediterranean Sea. The sulphates and carbonates are usually in close association, and it is when large quantities are concentrated in one place that they become commercially interesting. Such areas of concentration are found at intervals throughout Egypt and the Sudan. The largest example in Egypt is the chain of soda lakes in the Wadi Natron and the second in importance are the natron lakes and *birkas* of Harrara in the Beheira province." In the oases of Kharga and Dakhla sulphate of alumina and sulphate of magnesia are found. The former deposits have been worked since Roman times. Other minerals worked are ochres.

Not the least interesting part of the report is the list of minerals not now exploited, which certainly suggests latent possibilities in the country. The report is a notable contribution to our knowledge of Egypt's economic position.

OPENINGS IN CANADA.

An illustrated handbook of information respecting farm land; and opportunities in Canada has been issued by the Canadian Pacific Railway, and may be obtained free on application to the Land Department, 62-65, Charing Cross, London, S.W.1.

The India Office announce that no tenders were received on December 1 for the Rs.50,00,000 six months' bills offered, and no further bills will be offered for sale by tender at present. "Intermediate" six months' bills will be available for sale in India until further notice at Rs.97 11a. per cent.

COMMERCIAL BREVITIES.

Application has been made for an official quotation for Anglo-Persian Oil Ordinary shares, India 4½ per Cent. (1950-1955) scrip, and Tata Iron 7 per Cent. Debenture stock.

The ordinary general meeting of the Alexandria and Ramleh Railway Company, Ltd., will be held at the company's offices at Alexandria on Friday, December 15, at four o'clock in the afternoon.

The registers of the 4 per Cent. and 3½ per Cent. registered mortgage debentures of the Nizam's Guaranteed State Railways Company, Limited, will be closed from December 18 to December 30, both days inclusive.

The traffic receipts of the South Indian Railway Company, Ltd., for the week ended November 4 amounted to Rs. 8,10.764; total for the year, Rs. 2,92.81,283. For the corresponding period of last year receipts amounted to Rs. 7,29.378; total for the year, Rs. 2,62,87.341.

Following the meeting of shareholders of the Anglo-Burma Oil Company held recently, efforts are being made to reorganise the affairs of the company. An issue of £60,000 10 per cent. five-year-notes—part of an authorised issue of £100,000—is being made to shareholders at 98, repayable at par on October 1, 1927.

According to an Angora message, says Reuter's Paris correspondent, in a message dated November 22, the Nationalist Government has decided to place all the various branches of the tobacco monopoly under the administration of the Constantinople Government. A new commissary will be appointed for this purpose.

Travellers by the Simplon Orient Express service to Roumania and Greece, or vice versa, should have their registered baggage cross-corded, to permit of such baggage being examined at the Serbian frontier, *i.e.*, at Rakak in the direction from Paris to Orient—Zombolya or Guevgueli in the direction Orient-Paris, says *The Times*. Travellers who change at Belgrade in order to continue their journey by the Simplon Orient Express or another train, must present their luggage to the Customs authorities for examination.

Stock and Share Markets.

TONE STILL QUIET.

The Rubber Position.

(From Our Own Correspondent.)

London, Tuesday Morning.

Once again it is impossible to report any considerable activity on the Stock Exchange. It is the old story of business waiting on politics, and until the Turkish question and the Reparations problem are both settled there is not likely to be much doing. Such business as there has been has largely been of an investment character, and the more speculative features have suffered to some extent.

The flow of new issues has slackened for the moment, though it will probably not be for long, as there are quite a number on the *tapis*. I understand that practically all the recent issues have been well taken up; some indeed have been largely oversubscribed. That shows plainly that there is nothing in the belief that there is a scarcity of money for new issues at the present time, and will doubtless encourage those who are thinking of putting propositions before the public.

This is the period when the reports of the oil companies begin to appear and during the past few days we have had those of the Anglo-Persian and the Dacia Romano. As was expected, the Anglo-Persian shows a falling-off in net profits, but considering the fall in old products the report makes a remarkably good showing. The report, it may be added, is very enccuraging as regards developments in the oilfields and in regard to the progress of the company's organisation.

The price of rubber has continued to rise, and now stands over 1s. 2d., but the market has so far not responded to this advance. The fact is that the public, which has been so badly bitten in this particular market, is still rather doubtful as to the position, and is, therefore, inclined to postpone operations. That the time has come for buying, I have no doubt, but I must emphasise the point that the greatest care should be exercised in this market, as there are likely to be considerable fluctuations, and it is the tragedy of so many speculators that they never know when to take a profit with a view to getting in again at a lower level.

Gilt-Edged Steady.

A very variable tone has prevailed in the gilt-edged group, but as a result of the investment demand, to which I have referred, prices have firmed up in some cases. Consols are 56⅜ x.d., while War Loan Fives at 99 11-16 have gained ⅜. The Conversion Loan is fractionally lower at 75⅞, a decline of ⅛, while Fundings at 86 11-16 are 5-16 down. India stocks are much as before. The 7 per Cent. stock is unchanged at 111, the 3½ per Cent. stock at 64¼ is the same, while the 3 per Cent. stock has gained ⅛ at 55⅜.

A rather dull tone has marked the Foreign group, which has again been affected to some extent by the political situation and the exchanges. French stocks have eased off a little. War Loan Fives are ¼ lower at 29, while the 4 per Cents: have lost ½ at 23. German 3 per Cents. close unchanged at 11-16, while Italian Rentes are steady at 22. In Near Eastern securities, Turkish Unified have been a dull spot, and at 25½ are a point down, while Greek Monopolies have shed ½ at 23. Czecho-Slovak 8 per Cents. are unchanged at 92. Russians have been very weak. The 4 per Cents. are 1½ down at 6, the 4½ per Cents. are a point down at 6½, while the 5 per Cents. are ½ lower at 9. In South American securities Peruvian Corporation issues have improved.

Industrials Quiet.

There has been practically no change in the conditions prevailing in the Industrial market during the week. A certain amount of activity has been in evidence in a few directions, but generaly speaking business has, as usual, been on a most restricted scale.

Textiles have been rather variable. Coats at 65s. are 1s. 3d. down, while Courtaulds at 58s. 3d. are 1s. up. Listers are again fractionally lower at 27s. 9d., a drop of 3d. Tobaccos have been a strong spot. Bats at 91s. have gained 1s. 6d., while Imperial Tobaccos are 1s. 6d. up at 74's. Iron and Steel shares have been fairly steady. Vickers are unchanged at 13s. 6d., Armstrongs remain at 17s. 3d., Dorman Longs are 1s. 3d. up at 18s. 3d., while Guest Keens at 36s. 6d. x.d. have improved. Dunlop Rubbers are unchanged at 10s.

In the Indian Railway group, Assam Bengal are 53⅞, Bengal and North-Western are a point up at 135, Bengal-Nagpur are 95½, Bombay Baroda are 93½, at which they are ½ down; Burmas are unchanged at 103. Delhi Umballa are 186½, while Madras and Southern Mahratta are 105, a gain of ¾.

A very steady tone has ruled in the Shipping group. P. and O. Deferred are unchanged at 325, Cunards are 1s. up at 23s., Furness Withys have gained 2s. 9d. at 25s., while Khedivial Mails are 1¾ x.d.

Oils Steady.

This market has been fairly firm during the week, and at one period was quite animated. Anglo-Persians are slightly lower on the report at 4½, a decline of ⅜. The movement is quite without reason, for the year was an exceptional one, and the prospects of the company are beyond question. Burmas have been fairly firm, and at 5 1-16 are 1-16 up. Mexican Eagles have been a very prominent feature during the week, but at 2¾ are just about the same as before. Shell Transport are 1-16 down at 3 31-32, while Lobitos at 5⅝ are unchanged. In the Trinidad group, Apex are 3-16 down at 2 1-16, Centrals are unchanged at 1½, while Leaseholds remain at 1⅛.

The Russian group has been rather variable. Spies are 6d. down at 5s., Anglo-Maikop are 3d. lower at 2s. 9d., North Caucasians at 19-32 are 1-32 down, Ural Caspians are unchanged at 19-32, while Uroz are 3d. lower at 7s. 9d.

Among Egyptians, Anglo-Egyptian B are unchanged at 1 5-16, while Oilfields of Egypt remain at 1s. In the Roumanian group, Phœnix are 1s. down at 24s. 3d., while Roumanian Consolidated are 1s. 3d. lower at 11s. 3d., both shares being affected by the amalgamation proposals. Dacia Romanos are unchanged at ¾. Steaua Romanas are 3d. lower at 9s., while Hamilton's Oil Concessions remain at 1s. 9d.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on November 24 were as follows:—Agricultural Bank of Egypt, £5⅜; Alexandria Water Company, Ltd., £8 15-16; Anglo-American Nile Steam, £3 9-32; Associated Cotton Ginners, £1 1-16; Banque d'Orient, 31½ fr.; Behera Ord., £E7 9-16; Brasseries d'Egypte, 50 fr.; Building Lands of Egypt, £1; Cassi di Sconto Priv., 98½ fr.; Comptoir Fin. et Com. d'Egypte, £1 15-32; Consolidated Lands, £T5; Credit Foncier Fondateur, 1045 fr.; Credit Foncier Act, 718 fr.; Credit Foncier 1886 Oblig., 316½ fr.; Eaux du Caire, Capital, 87 fr.; Eaux du Caire Jouissance, 117½ fr.; Egypt and Levant, S.S. Ord., 29s.; Egyptian Delta Light Railways, £4⅝; Filature National d'Egypt, £10 17-32; Immeubles d'Egypt Soc. an des., £6¾; Khedivial Mail S.S. Ord., 80s.; Khedivial Mail S.S. Company Pref., £3⅝; Kom Ombo Ste an de Wadi, £4 7-32; Kom Ombo Ste An. Fondateur, £32; Land Bank of Egypt, Parts de Fond, £53; Lots Turc., 35½ fr.; Menzaleh Canal Navigation, £T291; Grand Hotels d'Egypte, £8 9-16; Ramleh Railways, £3¼; Urbaines et Rurales, £3 15-16; Union Fonciere Fond., £½.

The Indian Government announce that the embargo on the export of coal will be provisionally removed as from January 1 next, says Reuter. Provided the distribution scheme introduced last July works well, the definitive removal of the embargo is possible. As some time should elapse before Indian coal re-establishes its hold on the foreign markets at Singapore and Colombo, the Calcutta Port Commissioners do not anticipate any difficulty in handling the export. The stocks held by the Indian railways are ample.

FOREIGN EXCHANGES.

A fairly steady tone has prevailed in the foreign exchange market during the past week. The leading feature has been the strengthening of sterling in New York, which reached 4.53⅞ and finally closed at 4.53⅝. Berlin has again fluctuated, and closes at 35,500 to 38,500. Berne and Rome have been unsteady, while Paris has weakened to 64.90.

Country.	Method of Quoting.	Parity of Exchange	Latest Quotations.
Alexandria ...	Piastres to £.....	97½	97 7/16

Oil Notes and News.

ANGLO-PERSIAN OIL.

Dividend of 20 Per Cent.

The report of the Anglo-Persian Oil Company for the year ended March 31 shows a profit, after allowing for depreciation, debenture interest, home charges, and royalty of £3,130,380, compared with £4,028,022 for the previous year. The total available, including £1,648,792 brought forward, amounts to £4.779.172, against £4,939,000 at March 31, 1921, when £910,978 was brought in. The amount available on the previous occasion, however, was reduced to £3,948,792 by the payment of £854,665 for excess profits duty and corporation tax for 1919-20, and £135,543 for expenses of issue of fresh capital.

After placing to debenture stock redemption reserve £100,000, against £80,000 last year, to preference share reserve £100,000, against £50,000, to general reserve £300,000, against £455,000, to amortisation reserve £100,000 and allowing for extra depreciation £400,000, the directors recommend a dividend on the ordinary shares at the rate of 20 per cent. per annum, less tax, the same as was paid last year, leaving to be carried forward £1,739,172, subject to excess profits duty (if any) for the previous year and corporation tax for the past two years. An issue was made in January last of 2,000,000 Eight per Cent. Cumulative Preference shares of £1 each at £1 1s. per share, and of 600,000 ordinary shares of £1 each at £3 5s. per share. Since the close of the financial year a call of 19s. per share has been made and paid on the 1,500,000 ordinary shares issued in December, 1919, and on which 1s. had been paid up.

Increased Throughput.

The refineries in Persia and at Llandarcy have continued to maintain a steady increase in throughput, but the work on extensions to these refineries has been somewhat delayed by strikes and other causes. It is, however, expected that the refineries will be ready to work to their fullest capacity by June next, when a large increase in the quantity of marketable products will be obtained. As recently intimated in the Press, a fire occurred last month at the refinery at Abadan. The value of the plant destroyed was small and was fully covered by insurance. The main part of the refinery was restarted after a few days, but there will be some interruption to the output of refined products until the damaged plant has been replaced. The refinery which is being erected by the Société Générale des Huiles de Pétrole in France is approaching completion, and good progress is being made with refineries which are being erected by the associated companies in Scotland and in Australia.

Extension of Oil Area.

Production from the older wells sunk by the Bakhtiari Oil Company and the First Exploitation Company in the Persian fields continues to be well maintained, while the bringing in by them of further new wells in hitherto untested territory has materially extended the proved oil area. An active programme of drilling is being carried out in the territory operated by these companies and in various other parts of the territory covered by the concession, and favourable results are anticipated. The construction and delivery into service of tank steamers has proceeded satisfactorily, and ample employment for the fleet has been secured in carrying the companies' products. Exploratory work is being actively conducted by the D'Arcy Exploration Company in various parts of the world. Wells of moderate production have been brought in on the South American properties, and further drilling is actively proceeding, with the object of ascertaining whether or not the production in any of the fields in these properties is sufficiently large and reliable to justify commercial exploitation.

Rapid progress has been made with the development of existing and new distributing facilities in the United Kingdom, on the Continent and elsewhere. The marketing of products has already been started by all of the Continental associated companies, and additional facilities to permit of a further expansion of all of these businesses are being provided. Owing to the growth of the company's business the staff has at present to be located in a number of buildings in various parts of the City. To overcome the disadvantages arising from this, a large site has been secured facing Finsbury Circus and Moorgate, on which a new building capable of accommodating the entire staff is in course of erection.

The following resolution will be submitted for passing as an ordinary resolution at the general meeting:—"That the Board be, and they are hereby authorised to borrow or raise for the purposes of the company any sum or sums of money so long as the amount borrowed or raised by the company and at any time outstanding shall not exceed one-half of the nominal amount of the issued share capital of the company for the time being, plus one-half of the amount received by the company by way of premium in respect of any share capital of the company which has been issued at a premium." Meeting, Winchester House, E.C., December 11, at noon.

DACIA ROMANO.

The report of the Dacia Romano Petroleum Syndicate for the year ended March 31 states that the Chiciura well No. 1 and Baicoi well No. 1 yielded 2,864 tons. Work was seriously handicapped by the constant breakdowns of the public power station supplying electric current. Baicoi well No. 2 was completed; to March 31 it yielded 58 tons, and is now giving a small but steady production. Owing to the severe winter in Roumania last year and to the unforeseen complications, including the necessity of changing the rig, well No. 1 on the Moreni field was not brought into production until after the closing of accounts. Chiciura well No. 2 was started in December last. The refinery has been completed, and after the plant had been thoroughly tested a trial run was made over a few weeks, when 3.500 tons of crude oil were put through, the refined products being of a very satisfactory quality, thus proving the plant to be fully up to its guarantee of efficiency. There is a debit balance of £1,061 on the profit and loss account, which, after deducting £369 brought forward, leaves £723, which it is proposed to write off from general reserve.

BURMA RAILWAYS.

The gross earnings of the Burma Railways Company for the year to March 31 were Rs.3,18,57,404, and the net earnings were Rs.97,95,915, against Rs. 95,23.264. The company's share of the surplus profits, after deduction of the sum reserved for Indian taxation, amounted to Rs.13.95,723 (against Rs.17,56,717), which, on account of the low rate of exchange still existing and the better rate of interest obtainable in India, the board has placed on deposit until December 31, 1922. The balance in London at March 31 amounted to £146,645; and net interest received to October 31, £4,607; portion of surplus profits, Rs.10.57.724, of 1921-22, brought home on July 1, at 1s. 3 31-32d., £69,000; balance of surplus profits account in Burma with accrued interest, estimated at December 31 at Rs.17.24,720 at 1s. 3½d. per rupee, £111.388; total £331,640, less payable for balance of E.P.D. and corporation profits tax for the years 1920-21 and 1921-22, estimated at £37,000, leaving £294,640. The board recommends a final dividend of 1¾ per cent., together with a bonus of £1 per cent., payable on January 1, 1923, less tax at 3s. 2d., making with an interim dividend and guaranteed interest, 7 per cent. for the year, the same as for 1920-21. This will involve a reduction in the carry over, which the directors feel justified in recommending in view of improved prospects for the current year.

INSURANCE BUSINESS IN TURKEY.

The Committee of the Angora National Assembly which is dealing with the questions of pensions has submitted a proposal for the creation of a Turkish bank, with a capital of £T2,000,000 supplied by the Government, which, besides enjoying a priority over the exploitation of mines and forests, shall also have a monopoly of all insurance business in Turkey, whether fire, life, or transport insurance, says Reuter's Constantinople correspondent in a message dated December 2.

If this measure is adopted by the Assembly it will effectually extinguish foreign insurance business in Turkey, which is already in a precarious condition owing to the restrictions contemplated by the Angora Government in the matter of the conduct of business, more especially with regard to the deposit of guarantee funds. Furthermore, a recent ruling by the Assembly with regard to the Smyrna fire establishes that the insurance companies are liable for ordinary risks, inasmuch as the fire broke out after the peaceful (*sic*) occupation of Smyrna. The Assembly decided not to allow companies who did not pay the Smyrna insurances to continue operations in Turkey.

The register and transfer books of the Assam-Bengal Railway Company, Limited, will be closed from Monday, December 18, to Saturday, December 30, both days inclusive.

Near East Markets.

LONDON PRODUCE REPORT.

Oilseeds Higher.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in good demand at unchanged rates. Tate's cubes have come to business at 56s. 9d., while London granulated has been done at 50s. 7½d. Lyle's granulated remains firm at 50s. 10½d. Foreign descriptions have been fairly steady. West Indian crystallised is unchanged at 44s. 3d., while white Mauritius has advanced 3d. at 47s. 9d. White Java has gained 1½d. at 48s. 6d. Quotations are:—December, 21s. 9d.; January, 22s.; February, 22s. 3d.; March, 22s. 6d.; and May, 22s. 7½d.

Coffee.—A steady tone has prevailed. East Indian and Nairobi remain at 110s. and 94s. respectively. Costa Rica is quoted at 116s. The futures market has been inactive. Quotations are:—December, 62s. 6d.; March, 60s.; May, 60s. 6d.; and July, 60s.

Desiccated Coconut.—Prices have again hardened, while supplies are getting rather low.

Rice.—A small shipment of Burma "two star" rice has reached the market during the week, but owing to the dirty condition on arrival it is necessary to reclean the stock before disposing to the grocery trade, therefore there is a likelihood of this arrival being entirely neglected. As I suggested last week, the long-expected advance in prices for Spanish Japan rice has now taken effect, and in some cases the rise has been 1s. cwt. The next few months will show further advances, which will make it almost impossible to obtain this rice at a moderate price.

Green Fruit.—Orange arrivals are still very infrequent, while business has been done mostly for cheap grades. The condition of recent shipments is decidedly better than when the season for Spanish fruit commenced, and it is hoped that the quality of the fruit will continue to improve. Quotations are:—Denia and Valencia oranges, 18s. to 37s. 6d. box (360 to 300's). Although several vessels have just arrived, the total amount of lemons is inconsiderable. Bold fruit is almost unobtainable, but medium-sized fruit is a good seller. Quotations are:—Messina lemons, 14s. to 22s. 6d. box (300's), and 26s. to 50s. case (300 to 350's). Valencia onions have been in steady request at unchanged rates.

Dried Fruit.—A dull tone has been noticeable throughout. The market appears to be overstocked, with the result that prices are generally easier. Plums have shown signs of increasing activity, and stocks are no sooner on the market than they disappear. Muscatels are very low, and there seems little hope of relief. Prices are fairly steady. A further advance has taken place for almonds, while stocks on hand are declining rapidly. Dates are in good request at steady rates.

Oilseeds.—All prices, with the exception of La Plata, which has shed 1½d. at 18s. 7½d., have advanced. Indian linseed has gained 9d. at 20s. 6d. Rapeseed is firmer, with Toria 3d. up at 18s. 1½d., and bold Ferozepore 4½d. up at 17s. 6d. Cottonseed has advanced. Indian and Egyptian black are both 3d. up at 9s. 3d. and 11s. 1½d. respectively, while Sakellaridis has gained 4d. at 10s. 10d.

Oils.—Unsteadiness prevails. Linseed oil, refined and crude rape oil have all advanced 6d. at 38s. 6d., 45s., and 42s. respectively. Cotton oil has been variable. Egyptian and refined show no change at 35s. and 41s. respectively, while technical is 6d. up at 37s. Deodorised has shed 6d. at 45s.

Oilcakes.—No change is to be noted, except for cottonmeal cake, which is 10s. higher at 290s. Other quotations are:—Linseed cake, 280s.; cottonseed cake, 150s.; and coconut cake, 170s.

INDIAN INTELLIGENCE.

A cable received from the Director-General of Commercial Intelligence, Calcutta, dated November 29, states: Condition of Crops.—Agricultural situation in Western India now very much improved owing to heavy rain in the middle of November almost all over Bombay, Deccan, and Karnatak. Wheat crop in these areas now assured, but rain came late for other winter crops and seriously damaged qualities of cotton in Khandesh. Conditions in other areas satisfactory. In Sind, exceptionally good year for cotton and wheat.

The traffic receipts of the Egyptian Delta Light Railways for the week ended November 10 amounted to £E14 097; total for the year, £E199.539. For the corresponding period of last year receipts amounted to £E14,766; total for the year, £E231,900.

YUGOSLAVIA'S HARVEST.

The Commission sent by the Minister of Agriculture and Waterways of Yugoslavia into the corn-growing districts, in its final report, estimates that the surplus of grain of all kinds will amount to over one million tons, or, with the corn remaining from last year's harvest, to one and a-half million tons. It is thought that the Government will not allow more than half (750,000 tons) of the available surplus of grain to be exported owing to the requirements of the non-producing areas.

Figures, in wagons of 10 metric tons, of the crop in various districts show that after allowing for home requirements for human and animal consumption and for sowing, there is a surplus this year of 66,626 wagons of maize, 14,323 wagons of wheat, 8,860 wagons of rye, 8,559 wagons of barley, and 7,609 wagons of oats. To this has to be added the surplus of wheat and maize from the last (1920-21) agricultural year, which is estimated at 38,185 wagons of maize, and 12,800 wagons of wheat. The quality of wheat in Serbia is known to be better than that of last year; therefore the quantity of flour will be proportionately greater for the amount of wheat than was the case last year.

DRIED FRUIT REPORT.

Market Generally Depressed.

Messrs J. C. Houghton and Co., Liverpool, report as follows, under date December 1:—

Currants.—Without further arrivals to influence prices, very little change was noticeable during the first half of the month. The feature has been the demand for Pyrgos at 70s., and supplies had to be supplemented by shipments from London. Cleaned fruit, on the other hand, was lower, and even at the reduced prices of 72s. to 75s. very small progress was possible. The arrival of the City of Oxford, Andalusian, and Addington towards the end of the month, bringing over 3,000 tons for distribution (although a large proportion was destined for out-ports) had a weakening influence on the position, and considerable anxiety was displayed to make progress, with the inevitable fall in values, Pyrgos changing hands at 60s. to 61s., cleaned 61s., cleaned Amalias and Patras 62s. to 66s., Gulf 62s. to 66s. Vostizza has been forced for sale, and fine qualities receded to 76s., showing a decline of 15s. per cwt. Zante 65s. to 67s. This drop in values should stimulate buying, as the following steamer, Pavia, is not due until the end of next week.

Valencia Raisins continued the downward course referred to in our last report, the lower prices gave a fillip to the demand, and good coloury fruit in ¼ boxes realised 60s. up to 65s., fine 70s.; ½ boxes 57s. 6d. Dull and dark fruit difficult to sell either in ½ boxes 54s. 55s., or ¼ boxes 58s.

Cape Raisins followed in the trail of Valencias, and values have dropped sharply. Unfaced selling 25s. to 35s., and faced varieties 40s. to 42s., without increasing the demand.

Sultanas being consistently pressed for sale, quotations show a substantial decline on the month. The large cargo, 48,926 boxes, arriving per s.s. Egyptian, had a very depressing effect on the market, the quantity altogether exceeding that anticipated. Upon samples being available a few transactions were reported at 130s. to 135s., being quickly followed by a drop to 120s. for same quality, and price has continued to sag, latest sales taking place at 105s. to 107s. 6d., showing a further drop of 10s. to 15s. per cwt. Large quantities of Californian soda bleached keep arriving, and sell slowly at 90s. to 95s. New crop Afghans are also appearing, the yellow variety being quoted at 80s. to 100s. Old crop 45s. Capes neglected quotations 50s. to 90s. The first Greeks came to hand per s.s. City of Oxford and Addington, and met with a very poor reception, the little business passing being at 115s. to 130s.

Figs.—Skeleton cases figs practically cleared. Latest sales:—Layers, 125s.; locoums, 150s.; bags Natural, 45s.; Greeks (on strings) 34s.; Spanish and Lepe, 25s. to 35s.

'BALKAN' NATIONAL INSURANCE COMPANY

FOUNDED 1895.

Capital paid up	5,000,000
Total reserves as per December 31st, 1920	53,200,000
Premium Income during 1920	28,300,000
Amounts insured of Life Branch exceed	150,000,000

Branches maintained: Fire, Life, Marine, Casualty and Re-insurance of all branches.

CURRENT PRICES.

General Produce.—Bacon (Continental), 139s. per cwt.; (Canadian), 116s. cwt.; (American), 98s. cwt.; butter (Danish), 213s. cwt.; (Australian), 191s. cwt.; (New Zealand), 203s. cwt.; cheese (Canadian), 124s. cwt.; (New Zealand), 126s. cwt.; lard, 81s. cwt.; eggs (Danish), 30s. per 120; (Styrian), 16s. 6d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 76s. cwt.; coffee (Costa Rica), 120s. cwt.; (East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 94s. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 107s. 6d. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¼d. lb.; pimento, 2 1-3d. lb.; raisins (Valencias), 77s. 6d. cwt.; currants (Vostizza), 79s. 6d. cwt.; currants (Amalias), 66s. 6d cwt.; sultanas (Smyrna), 125s. cwt.; sugar (Tate's cubes), 56s. cwt.; (Lyle's granulated), 50s. 9d. cwt.; (Mauritius crystals), 47s. 3d. cwt.; (West Indian crystallised), 44s. 3d. cwt.; (centrifugal), 17s. 6d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 4½d. cwt.; bran (Rangoon), £6 12s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; fine to finest), 2s. 10d. lb; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. 3d. lb.; wheat (English white), 44s. qr.; wheat (Australian), 40s. 6d. qr.; oats (English), 30s. 6d. qr.; oats (La Plata, ex ship), 28s. 9d. qr.; maize (La Plata), 36s. 7½d. qr.; flour, 37s. 6d. sack.

Chemicals.—Acids: Boric, 56s. cwt.; oxalic, 7½d. lb.; citric, 1s. 9½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £56 ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 5s. ton; borax crystals, 28s. 6d. cwt.; cream of tartar, 99s. 3d. cwt. Potassium: Bichromate, 6¼d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £36 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5¼d. lb.; alkali (58 per cent), £7 18s. 9d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £19 17s. 6d. per ton; hyposulphite, £14 ton; prussiate, 11d. lb.; nitrate, £13 6s. 9d. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £38 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 10s. ton; sulphate of copper, £26 12s. 6d. ton; sulphate of iron, 55s. ton.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 9d. lb.; 80 to 89 lb., 9d. lb.; 70 to 79 lb., 8¾d. lb.; 60 to 69 lb., 8d. lb.; 59 lb. and under, 7½d. lb.; (second), 90 lb. and up, 8⅜d. lb.; 80 to 89 lb., 8⅜d. lb.; 70 to 79 lb., 8¼d. lb.; 60 to 69 lb., 7⅝d. lb.; 59 lb. and under, 6d. lb.; cows (first), 60 lb. and up, 7½d. lb.; 59 lb. and under, 6d. lb.; (second), 60 lb. and up, 5½d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 5⅜d. lb.; (second), 4⅜d. lb.; (third), 2½d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7 to 12; Durbhangas, 6 to 8; Patnas, 5 to 6. Salted cows: 6 to 8.8. Arsenic hides (buffalo): 4 to 7. Skins: Calf, 8 to 10; goat, 265 to 325 per 100 pieces.

Metals.—Aluminium, £100 ton; antimony (English regulus), £34 10s. ton; bismuth, 10s. lb.; copper (standard), £61 13s. 9d. ton; copper (electro), £69 15s. ton; gold bars, 91s. 9d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £17 5s. ton; lead (soft foreign), £26 7s. 6d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 43s. 9d. unit; nickel, £137 10s. ton platinum, 440s. oz. graphite (80-90), £12 10s. ton; quicksilver, £12 2s. 6d. bottle; spelter (G.O.B.), £36 7s. 6d. ton; tin (standard), £174 11s. 3d. ton; wolfram, 14s. 9d. unit; zinc sheets, £41 15s. ton; tin plates (20 x 14), 19s. 4½d. box; silver bars, 32d. oz.

Miscellaneous.—Cotton (American), 14.80d. lb.; Egyptian (Sakel), 17.60d. lb.; jute (first grade), c.i.f., £35 17s. 6d. ton; jute (lightnings), £33 17s. 6d. ton. Oilseeds: Linseed (La Plata), £18 7s. 6d. ton; palm kernels, £17 3s. ton; castor seed (Bombay), £17 2s. 6d. ton; sesame seed (China), £21 12s. 6d. ton; soya beans, £10 12s. 6d. ton; olive (Spanish), £74 ton; rape (crude), £41 15s. ton; soya, £35 2s. 6d. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex tank), 65s. ton; coconut (Ceylon), £38 7s. 6d. ton; cotton (crude), £34 15s. ton.

The Customs duties on luxury articles have been reduced from fifteen times to five times the old duties, says Reuter's Constantinople correspondent in a message dated November 23. The importation of alcoholic liquors, which was prohibited, has now been authorised, subject to a duty of 20 per cent. *ad valorem*.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Map Printing Paper.—The Surveyor-General of Egypt, Giza (Mudiriya), invites tenders for the supply of 1,140 reams of various classes of map printing paper. December 23.

Photocopic Papers.—The Superintendent of Stores, Egyptian State Railways, Telegraphs and Telephones, Saptieh, Cairo, invites tenders for the supply of photocopic papers during 1923. December 28.

Bristol Board, etc.—The Superintendent, Government Press, Bulâq, Cairo, invites tenders for the supply of paper, bristol board and grey board. December 28.

Drugs.—The Director of Stores, Public Health Department, Cairo, invites tenders for the supply of drugs required for the period of one year from April 1, 1923. December 28.

Paper, etc.—The Superintendent of the Government Press, Cairo, invites tenders for the supply of strong writing paper for certificates; strong, smooth-surface writing paper for registers; tinted paper; bristol boards for folders, covers, etc.; paper for file covers; cream wove paper for forms; tinted paper for forms; grey boards, thickness 1.1 mm. and 2.2 mm.; wrapping paper for news bands; gum paper, white and tinted; for the year 1923-24. December 28 (D.O.T.).

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer, Egypt and the Sudan Governments' Office, London. January 2.

Paper and Stationery.—The Egyptian Minister of Finance invites tenders for the supply of paper, stationery, and general office material required by the Central Stores, Ministry of Finance, for the year 1923-24. Local representation is essential. January 25 (D.O.T.).

Clothing, etc.—The Ministry of the Interior, Stores Department, Egypt, invites tenders for the supply of stores required for the year 1923. The range of articles required is extensive, and includes greatcoats, jackets and tunics, trousers, breeches (in various materials—e.g., khaki drill and serge, white drill, blue cloth, etc.), uniform cloth, hosiery, hard haberdashery, blankets, gloves, boots, leggings, puttees, belts, soap, haversacks, chevrons (fabric and metal), tarbushes, police whistles and chains, ribbon, etc. (D.O.T.).

India.

Steel Material, Spring Steel, Metals.—The directors of the Madras and Southern Mahratta Railway Company, Ltd., invite tenders for 800¼ tons steel material (sections and plates), 238 tons spring steel (flat and round), 84 tons metals (aluminium, antimony, brass, copper, lead, zinc). December 12.

Steelwork.—The South Indian Railway Company, Ltd., invites tenders for the supply of steelwork for paint and electrical shop (Trichinopoly Workshops Scheme). December 15.

Buffers, etc.—The Bengal and North Western Railway Co. invite tenders for the supply of 397 four-wheeled wagons, complete, and ten bogie timber trucks complete except wheels and axles; 1,454 pairs of wheels and axles: material for 250 four-wheeled wagons; buffers and parts for construction of 250 wagons; 1,000 laminated springs; 1,000 volute springs; and 1,000 axle boxes. December 19.

Locomotive Goods Engines and Tenders.—The Directors of the East Indian Railway invite tenders for the supply of locomotive goods engines and tenders (0-6-0 superheated type). December 20.

Fittings for Goods, Wagons, etc.—The High Commissioner for India invites tenders for the supply of:—(1) Brake fittings, automatic vacuum and hand rigging complete, for goods wagons (272 sets); (2) underframes and body ironwork for railway carriages (18 sets); (3) cloth, drab mixture, great coat, waterproof (100,000 yards); (4) bottles, water, enamelled, Mark VI., with stopper and cord, but not covered with felt (No. 105,000). December 19 for No. 1 and December 29 for Nos. 2 to 4.

Engine Parts.—A firm of engineers in India, having acquired a foundry and engineering works, have under consideration the manufacture of steam engines of 5 to 60 h.p. They have facilities for casting iron and brass, but propose to import machined parts, such as crankshafts and connecting rods, for assembly at their works. Further particulars are available at the Department of Overseas Trade.

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Business on a Small Scale.

The Commercial Co. of Egypt, in their report for the week ended November 24, state:—

Since our last report the futures market has been rather quiet, and the turnover of business transacted has been much smaller than the preceding week. The principal cause of the recent setback is undoubtedly the appreciable falling-off in the demand from abroad; very few orders have been received of late from spinners, and the market has thus been deprived of its natural and most important support. Other factors which have contributed to this week's weakness are the uncertain attitude of the American markets, the continuation of very heavy arrivals from up-country, and, finally, the want of interest taken by speculators in the market. On the other hand, a comforting fact worth mentioning is this week's heavy export figures, which bring the total quantity of cotton exported since the beginning of this season to about 1¾ million kantars, almost equal to that of last year. The difference between Sakellaridis and Ashmouni has again somewhat narrowed, but this is not to be attributed to any special reasons. Although we have a favourable opinion of the market in the long run, we think that, for the time being, quiet markets with an undecided tone are likely; the stocks are very heavy, and prospects for an early reduction are remote, as all ginning factories in the interior are packed with cotton, and the majority are working day and night. It is, therefore, unlikely that we shall have any appreciable falling-off in the arrivals, at least for another month.

Spot.—Business at Minet-el Bassal has shown a marked decrease in volume from last week, and though the market has been fairly active; sales amount to about 24,400 bales, of which we estimate 17,700 bales Sakellaridis, 6,300 bales uppers, 350 bales brown, and 50 bales white. Demand from abroad, especially from Lancashire, is rather poor, presumably due to the confused political and economical situation generally. Arrivals are still on a large scale, and exports are good, but the stock is still over 2½ million kantars.

Sakellaridis.—All styles have been dealt in. Medium and lower grades are still in good request. Prices of spot against contracts are without quotable change, except for extra cotton, which is inclined to become dearer.

Uppers.—A fair business has been done in all styles. Prices are a little easier than last week, but medium qualities are still very dear.

Brown.—A small business has been done. Prices of spot against contracts are rather easier for good fair and below, but are dearer for f.g.f. and better.

White.—A retail business has been done at unchanged rates. This cotton is very scarce, and in comparison with Sakellaridis very dear.

LIVERPOOL REPORT.

Depressed Market.

Messrs. Reynolds and Gibson report as follows for the week ended November 29:—

A very quiet week has been experienced in the Egyptian spot department, the enquiry being of an irregular and disappointing character. The causes are not hard to seek. A series of comparatively quiet and steady American markets, and a pronounced falling off in the demand for our exports from abroad, the latter being due doubtless to adverse movements and general uncertainty of the foreign exchange. As regards American support, it is well known that that country purchased heavily at the commencement of the season and that, as past experience has shown, a wave of buying is generally followed by a period of comparative quiet wherein the trade has time to review the situation as a whole and digest its purchases.

Lancashire has not bought to any extent as yet, nor does she appear to be in any hurry to do so. The present level of prices does not suit her book, and the heavy costs of production are making it very difficult for her to compete in the world's markets. All through the week Manchester has been shrouded in gloomy pessimism, the moral effect of which has been plainly felt on our market here. The official reports are not quite so depressing as the private advices, and on several days mention was made of an increased enquiry from India and China, and more sales for the latter have been put through. Bids from India are constantly reported as being unworkable, and what remnant of hope still exists in the immediate situation appears to be based on China alone. Certainly, it is long now since she made the weight of her buying power felt in Lancashire.

Looking back on the week, it seems rather remarkable, considering the small amount of assistance which has been forthcoming from the trade, that prices have remained at practically last week's level, and this significant fact should not be overlooked by those who are still short of cotton. The enquiry in Liverpool has shown but little variation from that of previous weeks. Good fair Sakellaridis, 16.50d. to 17.50d., and good, 18.50d. to 19.50d., have been frequently asked for, and the usual low, and re-cleaned cottons, 9.00d. to 12.00d., still bulk comparatively largely in the sales. Uppers, 14d. to 16d., have been dealt in, but generally speaking, the enquiry for Uppers has been very flat. Rather more interest has been displayed in white cotton, but the prices asked seem generally too high to meet enquiries, which are mostly in the neighbourhood of 16.50d. to 17.00d. Brown cotton has been neglected. Sudan has been much quieter. C.i.f. business has been very quiet all week. Total sales, 1,800 bales (includes 400 bales Sudan). Quotations of good, fine and extra fine in Sakellaridis and brown are reduced ¼d. per lb. Other quotations unchanged. Fully good fair Sakellaridis 18.50d.

COTTON TRADE REVIEW.

Dull Market Generally.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended December 2 states that:

General.—No improvement has taken place in the general condition of affairs during the past week. The lack of confidence in the present level of prices continues, and, although there is perhaps a slight increase in inquiry, it leads to little or nothing. The feeling continues that until the foreign political and financial situation is straightened out there are small grounds for anticipating any lasting improvement in the volume of business.

Yarn.—Spinners of American yarn continue to work on an unremunerative basis and, even with the long week-end stoppage, consumption does not keep pace with the reduced output. The proposed half-time working has not been accepted by the Federation of the Master Cotton Spinners, and the mills will therefore continue during the current month to work four days a week as during October and November. Egyptian spinners are better off, but even in this section transactions are said to have been below the average of the past few weeks.

Cloth.—There is no improvement to be reported, and trade continues to be on a small scale. The news from China is of a more hopeful character, though it is said that such buying as takes place is very largely of stock lots purchased below the current cost of production. India remains disappointing; only small lines have gone through for Egypt, and, of course, for the Levant markets orders are very trifling. The smaller overseas markets are reported to have done little more than pick up cheap lots here and there, and the home trade is not expected to be brisk until after the usual stocktaking at the end of the year.

Raw Cotton.—There is nothing of special interest to report in this section. Whilst there has been rather more fluctuation than during last week, prices remain virtually unchanged, and closed as follows:—American fully middling, 14.79; Egyptian fully good fair, 18.25.

MANCHESTER COTTON TRADE.

Levant Business Poor.

(From Our Own Correspondent.)

MANCHESTER, Saturday.

No feature of importance has presented itself in the market during the past week, and generally speaking a very depressing state of affairs has prevailed. Spinners and manufacturers have continued to lose further ground, and more machinery is being brought to a standstill. Naturally many producers of piece goods, especially staple makes, are getting very desperate for orders, and, unfortunately, no immediate relief is in sight. With regard to the cloth section, buyers for Egypt have again been the most prominent, and some fair orders in suitable styles have been secured. The dealers in Egypt generally face a rise in the market better than anybody else. Many orders for Constantinople and the Levant are being cancelled owing to remittances coming to hand very unsatisfactorily. Quotations for Egyptian spinnings have been fairly regular, but no sales of weight have been recorded for home use. The piece goods demand for China has been very disappointing, and only isolated sales have taken place, principally in fancies. No cloth sales worth mentioning have occurred for India. Mail advices from Calcutta read dolefully.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Jaffa, November 11.

There was a fall of rain towards the end of the week. A small consignment of oranges has been shipped to Constantinople.

Jerusalem, November 11.

There has been a small rise in the price of sesame, but there is little movement in cereals, owing to the fall in the French exchange.

Nicosia, October 31.

The stagnation of trade has increased during the past month. Imports show a marked diminution Exports consisted chiefly of 10,000 kgs. of coccons sent to Marseilles for sale, and of some consignments of barley to Egypt.

Prices of carobs remain unaltered, varying only between £4 15s. and £4 17s. per ton c.i.f. These prices are not remunerative to the exporters. There has been a fair demand for dry raisins from America to replace the corresponding brand that was to be sent from Smyrna, the shipment of which will not be effected. The wheat market is firmer The tithes have been disposed of at good prices.

On the whole, the situation of the Island is difficult. Importers hold large stocks, which are only with difficulty absorbed, owing to the economic position of the peasant due to the suspension of exports of the Island's principal products. Exporters have still a balance of last year's carob crop on hand. In spite of the advanced season no sale of carobs has been effected, whilst by this time in 1921 more than 20,000 tons of this commodity had been exported. The only business secured this year consists of some trifling sales of carobs for Spain.

Basrah, November 4.

In view of the demand for London and New York, the exporters of dates continue to make purchases here, carrying them out now at very low prices and meeting with relatively favourable offers.

Baghdad, November 18.

Railway fares have been increased by 25 per cent., except on Baghdad-Basrah tickets, on which the increase is only 12½ per cent.

Mosul, November 4.

The prices of cereals continue low. The cultivators, though feeling discouraged are proceeding with the work of sowing.

The market in sheep destined for Syria, which was very active during the past month, is to-day relatively quiet. The following products of the country are now quoted as under (per batman of 13 1-3 kilos):—Wool (unwashed), Rs.10; blue gall-nuts, Rs.6.4. white gall-nuts, Rs.5.8; wheat, Rs.1.6; barley, Rs.0.12.

Hamah, October 31.

The prices of wheat and barley are notably higher this month. The kantar of wheat has reached P.370-450, as against P.350-400 on September 30, while the kantar of barley is P.250-300, as against P.215-240 The reasons for this increase are as follows :—In the first place, the peasant, who is generally very poor, was compelled to sell his products at the end of the harvest at whatever price ruled in the market to settle debts contracted during the year. He has sold everything, and there only remain here now the stocks of cereals belonging to the rich landowners, who place their products in their warehouses, not caring to dispose of them at present prices, and awaiting a recovery. On the other hand, there is a demand for large quantities of cereals for the Littoral, and some merchants of Beyrout are said to have obtained during the month authorisations from the Haut-Commissariat for the export of barley to Alexandria. But, owing to the rise that has taken place, they have not had an opportunity, unfortunately, of doing so up to the present.

REDUCTION IN EASTERN PASSENGER FARES.

Substantial reductions in fares are announced by the City, Hall, Bucknall, and Anchor Lines from the United Kingdom to Eastern ports. The Ellerman Lines, which control the City, Hall, and Bucknall group, announce their new fares as follows:—From London to Bombay (1st class) £60 and £64, (2nd class) £46 and £48; Colombo (1st class) £58 and £62, (2nd class) £48 and £50; Madras (1st class) £60 and £65, (2nd class) £48 and £50; Calcutta (1st class) £64 and £68, (2nd class) £50 and £52; Singapore (1st class) £80 and £87, (2nd class) £55 and £60; Hong Kong (1st class) £94 and £100, (2nd class) £65 and £70; Shanghai (1st class) £98 and £105, (2nd class) £69 and £74; and to Kobe and Yokohama (1st class) £104 and £110, (2nd class) £71 and £76.

In conjunction with the above reductions, the Anchor Line announce that their new fares from Birkenhead to Bombay will be £60. Reductions in rates to intermediate ports are under discussion, and will be announced later.

NEW BRITISH INDIA VESSEL.

The S.S. Dumana

Messrs. Barclay, Curle, and Co., Ltd., Whiteinch, Glasgow, recently launched the twin-screw motor passenger and cargo vessel Dumana, built to the order of the British India Steam Navigation Co., Ltd. Of 8,500 tons gross, the vessel has accommodation on the upper and bridge decks for 100 first-class and 50 second-class passengers. The staterooms and public rooms for both classes are commodious, and most comfortably fitted out for the special requirements of the Eastern trade. The propelling machinery will consist of two sets of Diesel engines supplied by the North British Diesel Engine Works, Whiteinch. The vessel will have a service speed of 13½ knots.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line. S.s. Massilia for Bombay (Liverpool, December 16).

Anchor Brocklebank Line.—S.s. Maimyo for Port Said, Colombo, Madras, and Calcutta (London, December 9); s.s. Mangalore for Calcutta (Birkenhead, December 13); s.s. Matheran for Port Said, Colombo, Madras, and Calcutta (London, December 23); s.s. Manipur for Calcutta (Birkenhead, December 29); s.s. Malakand for Port Said, Colombo, Madras, and Calcutta (London, January 6); s.s. Malancha for Calcutta (Birkenhead, January 10); s.s. Mahanada for Calcutta (Birkenhead, January 20).

Bibby Line.—S.s. Warwickshire for Rangoon. (London, December 14); s.s. Yorkshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, December 20).

British India Line.—S.s. Warfield for Bombay and Karachi (London, December 9); s.s. Nagina for Colombo, Madras, and Calcutta (London, December 16); s.s. Gamaria for Bombay and Karachi (London, December 16); s.s. Margha for Colombo, Madras, and Calcutta (London, December 22); s.s. Masula for Bombay and Karachi (London, December 30); s.s. Manela for Colombo, Madras, and Calcutta (London, January 5).

Clan Line.—S.s. Clan Alpine for Colombo, Madras and Calcutta (Birkenhead, December 14).

Cunard Line.—S.s. Pavia for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, December 21).

Ellerman Line.—S.s. Grodno for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, December 7); s.s. Flaminian for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople (Liverpool, December 16).

Ellerman, Bucknall, and Strick Line.—S.s. Kormark for Persian Gulf (London, December 18).

Ellerman's "City" Line.—S.s. City of Valencia for Calcutta (Birkenhead, December 15); s.s. Trafford Hall for Bombay and Karachi (Birkenhead, December 20); s.s. Crewe Hall for Bombay and Karachi (Birkenhead, December 20).

Ellerman's "Hall" Line.—S.s. City of Rangoon for Bombay (Liverpool, December 12); s.s. Sutton Hall for Karachi and the Punjab (Liverpool, December 12); s.s. Crewe Hall for Malabar Coast ports (Liverpool, December 20).

Ellerman's Westcott and Laurance Line.—S.s. Tasso for Gibraltar, Malta, and Alexandria (London, December 13); s.s. Polo for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, December 20); s.s. Castilian for Gibraltar, Malta, and Alexandria (London, December 23).

Glen and Shire Line.—S.s. Glenshane for Port Said, Port Swettenham, Singapore, etc. (London, December 14); s.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, December 28).

Harrison Line.—S.s. Benefactor for Calcutta (Liverpool, December 21).

Henderson Line.—S.s. Martaban for Port Said and Rangoon (Birkenhead, December 13); s.s. Henzada for Port Said and Rangoon (Birkenhead, December 27).

Holt Line —S.s. Peleus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, December 14); s.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Swansea, December 21).

Johnston Line.—S.s. Vedamore for Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, and Constantza (Liverpool, December 9); s.s. Willowmore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, December 16).

P. and O. Line.—S.s. Mantua for Bombay (London, December 15); s.s. Malwa for Bombay (London, December 29); s.s. Kaisar-I-Hind for Bombay (London, January 5).

Prince Line.—S.s. Lancastrian Prince for Tunis, Malta, and Alexandria (Manchester, December 8).

TRAVEL BETWEEN IRAQ AND SYRIA.

H.M. High Commissioner for Iraq reports as follows on the conditions of travel between that country and Syria.

Co-operative measures have been taken by the Iraq and Syrian authorities for the protection of the Mosul-Aleppo road and of caravans travelling thereby. Caravans are accompanied by escorts provided by the Iraq Government from Mosul to a point previously agreed upon, where they are taken over by Syrian escorts.

With regard to the alternative route from Bagdad to Dair al Zor *viâ* Ramadi, it appears that the efforts made for the improvement of the security of this route have apparently resulted in its being increasingly used by the traffic between Bagdad and Dair al Zor. No tribal chief is authorised to collect tolls on traffic which keeps to the road.

It is announced that the Anchor liner Algeria was sold on November 30 to the Hamburg-America Line. The Algeria was originally a German vessel and was known as the Kigoma.

COMPANY MEETING.

Anglo-Egyptian Bank.

Position in Egypt and Palestine.

The thirty-sixth ordinary general meeting of the Anglo-Egyptian Bank, Ltd., was held on November 28, at the new premises, 37-39, King William Street, E.C., Mr. R. H. Foà presiding.

The Chairman, in moving the adoption of the report and accounts, said that, since the previous meeting, Sir Marshall Reid had spent three months in visiting the branches and clients of the bank in Egypt, the Sudan and Palestine. It had been the policy of the Board to keep as closely in touch with the countries with which they dealt as possible, and Sir Marshall's visit had been fraught with marked benefit to the bank. Early in January he (the chairman) proposed to go out and would take advantage of the opportunity of visiting all their branches in Egypt, the Sudan, Palestine and Trans-Jordania. They proposed to establish branches at Makwar—where the new dam on the Blue Nile was to be erected—and at Wad Medani, which was not very far off. There was no doubt that the money to be spent upon that dam would perform a very useful function in the Sudan, besides bringing an area of about 300,000 acres of land into cultivation by irrigation.

In Egypt there had been comparative quiet for some time, and he trusted that the political emancipation of that country would proceed along normal lines and without friction or riot of any kind. They had just received an interesting telegram from Egypt as follows: "Local politics untroubled in spite of unrest in adjoining countries and the unfortunate Cairo incident." This was eminently satisfactory as far as it went. The cotton crop in Egypt was announced as being 4,002,000 kantars, but, according to private advices, they thought this figure would be exceeded and thus be somewhat larger than last year's. There was also a better demand for the article, especially in America, and all this was to the advantage of Egypt.

The troublous times in the Near East had had their repercussion in Palestine, but, now that the mandate had been granted, the Government of that country was finding less opposition to its functioning than had previously been the case. It was to be hoped that Palestine would continue to progress satisfactorily. They were constantly being asked to advance money for building and development in that country, but, with very few exceptions, had not been able to comply. He was hopeful, however, that an agricultural and mortgage bank might in due course be established, as there was no doubt that it could be a most useful, and probably a paying, proposition.

In Malta and Gibraltar trade had been very lifeless, and it would seem as if both those places would play a less important rôle than they did during the war. Since the last meeting they had opened only one new branch—that at Amman in Trans-Jordania, at the request of the Colonial Office. That was intended to facilitate the payment of the subsidy to Emir Abdullah. Trans-Jordania would take a considerable time to develop, but they already found some of the natives of that country alive to the advantages of banking.

With regard to the accounts, the gross profits were rather less than those of the previous year, and so were the expenses; therefore the balance to be divided was much the same. The only difference they were making was that they were not proposing to pay a bonus this year, for they had before them a very considerable expenditure in the way of premises to provide for, and they thought it wise to do that rather than to swell the distribution of profits by paying a bonus. That, after all, had only been done three times in the history of the bank, and that during exceptional times. The total of the balance-sheet this year amounted to £12,760,000, as against £14,000,000 last year—no great difference. There was a slight shrinkage in the deposits and other accounts, which had gone down from £11,800,000 to £10,600,000. That, he thought, was the general experience of banks, and was owing to the very general deflation which had gone on throughout the world.

Sir Marshall F. Reid, C.I.E., seconded the resolution, which was carried unanimously, and a dividend of 10s. per share, free of income-tax, making 15 per cent. for the year, was declared.

The retiring directors and the auditors were reappointed, and the proceedings terminated with a vote of thanks to the chairman, directors, and staff.

THE ESSENCE OF INSURANCE IS SECURITY.

BULGARIA AND DEDEAGATCH.

The following are extracts from a statement issued by the Bulgarian Delegation at Lausanne:—

M. Venizelos has just made a statement before the representatives of the Press at Lausanne on the Greek point of view with regard to the outlet to the Ægean Sea promised to Bulgaria. In signing the Treaty of Neuilly, Bulgaria was forced to surrender to the three principal Allied and Associated Powers all rights over Western Thrace against the categoric assurance of receiving free outlets to the sea. In virtue of the Treaty of Sèvres, which gave the two Thraces to Greece—thus putting Greece in charge of the Straits—the Allied Powers relinquished their mandate over Thrace to Greece April, 1920. Recent events in Asia Minor and the great victory of the Turks have shattered the Treaty of Sèvres. As a result, the situation has also changed in Western Thrace, which once more becomes a condominium of the three Allied Powers, to whom this region was surrendered by Bulgaria. It is to these Powers that Bulgaria again appeals, so that the Statutes of Western Thrace should be established in conformity with the economic interests, not only of Bulgaria, but of all the maritime Powers, as, in view of technical and economic considerations, it would be unreasonable to hand over Western Thrace to a country already richly endowed with ports.

M. Venizelos suggests an international *régime* which would solve the question of the Bulgarian outlets by the port of Dedeagatch. The Bulgarian technical delegate to the Lausanne Conference has demonstrated by a series of carefully prepared data—against which no serious objection was raised—that such an outlet would be totally useless. (1) To begin with, the port has to be built; (2) the only nation directly interested in the matter is Bulgaria; (3) Bulgaria cannot be expected to spend millions for this purpose and to direct her trade towards this port if she is not in possession of the port itself and given the means of controlling the market. It would be against the most vital interests of Bulgaria and against all principles of political economy to allow this traffic and this port to be exposed to the many dangers and unexpected results of Balkan conflicts.

The Bulgarian delegate effectively quoted, in defence of his statement, the opinion on this question of the eminent French statesman M. Gabriel Hanotaux, which is entirely in conformity with the Bulgarian argument. The Bulgarian delegate also reminded M. Venizelos of his own words before the Greek Parliament, at the time when this great Greek statesman renounced for ever all claims "over a strip of territory without any backbone!" At that period M. Venizelos supported his own statement by irrefutable geographical arguments. Geography has not altered since, and yet these very arguments now invoked by the Bulgarians have called forth from M. Venizelos the very bitter answer, rather confusing and certainly unconvincing, to which publicity has been given by the Press. M. Venizelos explains his present intractability by the intolerance of pre-war Bulgaria. Taking great care not to assume the responsibility for King Constantine's policy himself, he has endeavoured to burden M. Stambolisky with that of King Ferdinand. The Bulgarian Prime Minister, in a spirited statement, has reduced the passionate arguments of M. Venizelos to ashes by saying: "The tone used by M. Venizelos is sufficient to show you, gentlemen, of what use an outlet would be to Bulgaria, should we have to pass across Greek territory!"

NOTES OF THE WEEK.

Great Britain and Greece.

The executions of ex-Ministers in Athens have been followed by the publication, in Paris and London, of several documents and personal statements purporting to throw light on the conduct of these Ministers and others, and on the relations between the Athens and London Cabinets. Of these documents those which have caused the greatest sensation are a Note that was addressed to Lord Curzon by M. Gounaris on February 15, 1922, and the reply sent by Lord Curzon. This incident has raised a pother in both Houses of Parliament, chiefly because certain ex-Ministers—Mr. Lloyd George, Mr. Austen Chamberlain, and Lord Birkenhead—denied that Lord Curzon's reply was duly circulated among members of the Cabinet. Mr. Bonar Law has, however, been able to convince them that it was actually sent to them in the usual way: and the explanation of the trouble seems to be that they failed to study it, owing to the existence of Cabinet troubles at the time. If that should be established as a fact, it will be fresh proof of the haphazard way in which our Near Eastern policy was conducted by the Cabinet of all the talents at the time referred to.

A Note from M. Gounaris.

With the effect of this incident on British party politics we need not concern ourselves. The letter sent by M. Gounaris definitely proves that that statesman was fully alive to the true facts of the situation in Asia Minor at the time, and that he was very properly exerting himself to secure for Greece the help she so greatly needed. The gist of his communication was that, without help in the form of money, guns, and munitions, the Greek Army could not hold on in Asia Minor: Greece could supply troops, but not money; and M. Gounaris urgently appealed for financial help. If such help were not forthcoming, he declared, the Greek Army must withdraw from Asia Minor, with disastrous results to the Christian population of that region; and if left to her own resources Greece would be compelled to divert her forces to the defence of the frontiers assigned to her in Europe by the Peace Conference. Lord Curzon, in his reply, thanked M. Gounaris for the "perfect candour" with which he had described the situation, but expressed the hope that the view of the Greek military position was perhaps overstated, and suggested that a satisfactory settlement would probably be reached at the Conference which was to meet in Paris very shortly.

A Hopeless Quest.

In the course of a long and important statement, published in the *Morning Post*, M. Chrussachi, who was principal private secretary to M. Gounaris, declares that the latter confessed to him at the time that "he had little hope of his supreme appeal being heard," and when the British reply was delayed, he left London without waiting for it. Indeed, a month earlier at Cannes, M. Gounaris had reached the conclusion that Mr. Lloyd George had made up his mind to "jettison" the Greeks (the expression is M. Chrussachi's), and the fact makes the sending of his Note in February all the more courageous. On the evidence so far before us—which it may be admitted comes chiefly from one side—it is in fact impossible to believe that M. Gounaris was inspired by any but the highest and most patriotic motives; and British readers who have followed the matter can hardly feel that the ex-Premier and those most closely associated with him in the business treated Greece and the Greeks with decency. It is to be hoped that the future will show that Mr. Lloyd George's light-hearted handling of this Greek business has not wrought irreparable damage to Great Britain's name throughout the Near East; but at present it is impossible to feel proud of the part played by Britain in the tragedy. And there is an uneasy feeling abroad that we may not yet have heard the worst.

The Bulgarian Impeachments.

Disquieting reports to the effect that three ex-Ministers of Bulgaria had been privately executed have been promptly denied by the Bulgarian representatives at Lausanne. It is also explained at Sofia that the removal of twenty-two of the principal prisoners from Sofia to Shumla was due partly

Digitized by Google

to the desire to give them more comfortable quarters, and partly to threats by the Macedonian raiders to release them. With the example of Greece before her, Bulgaria is hardly likely to take extreme measures just now. If she sets any store on foreign opinion, she need have no hesitation in making up her mind that nowhere will she meet with any approval of such measures on a wholesale scale against political opponents. Already there has been far too much prosecution, or persecution, and the recent attempt to take a plebiscite on the subject of the impeachment of all the Cabinets that have held office since 1914 has shaken confidence in the good sense of the present Government. Culpability may exist in individual cases, but action on a wholesale scale must inevitably arouse distrust. By reducing the number of those impeached to the minimum required to establish the principle the best interests of Bulgaria will be served.

The Yugoslav Cabinet.

After surviving very many rumours of its demise, and not a few intrigues to bring about that end, the Pashitch Cabinet has fallen at last. On December 4 M. Pashitch tendered his resignation and that of his Cabinet to the King, who accepted it. At the time of writing, no news is to hand as to who is to succeed the veteran statesman. It appears to be established, however, that the fall of the Government was brought about by an alliance between the Democrats, led by M. Davidovitch, and the Croatian *bloc*, which, under the leadership of M. Raditch, the peasant politician, has hitherto abstained from mixing in Belgrade politics, and seeks to secure either independence for Croatia, or decentralisation. It is almost impossible to believe that M. Davidovitch and his party will lend themselves to the Raditch programme, and it looks as if there will be some difficulty in forming a new Cabinet. Even if one be formed, it would seem that its expectation of life could not be particularly good; and it would not be surprising if the perennial M. Pashitch should be back in office again ere long.

Refugees in Greece.

In spite of all that has been said and written on the subject, it is probable that the world at large has not yet grasped the true character of the refugees problem with which Greece is now confronted. Impoverished in many ways by years of warfare, disappointed almost beyond realisation by foreigners by the terrible ill-fortune that has lately befallen her, the little nation finds herself suddenly called upon to provide for over a million refugees; and though help from outside has so far been forthcoming in generous measure, the call has taxed and is taxing Greek resources heavily. It should be remembered that the majority of the refugees are not actually Greek subjects, but Ottoman Greeks, and that several thousands of them at least are Armenians, and the Greek Government would therefore be within its rights in declining to accept responsibility for them. It must likewise be borne in mind that the problem of providing for them is complicated by the fact that the refugees' able-bodied menfolk have not been allowed by the Turkish Government to accompany them, and that it is thus a vast crowd of women, children, and old men who have to be provided for. With these facts before us, and having in mind the present state of Greece, it requires no great effort of the imagination to conjure up a picture—if an inadequate one—of the refugees' plight.

A Case for the Nations.

The British Government has done well to call attention anew to the lot of these million refugees, and to ask that "the fullest support may be given to the appeals which are being circulated by the authorised relief organisations." But the need is too great and too urgent to be dealt with adequately by such means: and if it is to be met fully, it will have to be by Governments rather than by individuals or relief organisations, however well-managed and supported. Work must be provided on a vast scale for the refugees, work within their possibly limited powers, and, if possible, work that shall give a lasting return for the outlay. We have already (in our issue of October 26) referred to this subject, and suggested that Great Britain, France, and Italy should co-operate with the Greek Government in grappling with the problem. The balance of the loan which was promised to Greece (and withheld on the return of King Constantine) might surely, under proper safeguards, be made available for relief works of the kind suggested. This is no time to recall petty annoyances or pinpricks: a million human beings look to Europe and America for help in their desperate need. Humanity demands that the help should be given promptly and fully. And such help can be given only by the Governments of countries less sorely tried than Greece.

Turkey and the Yemen.

An interesting rumour is reported by the Jeddah correspondent of *Al Ahram* to the effect that a pact has recently been made between the Imam Yehia of Yemen and the Turks. The agreement is described as being due to Mahmoud Nazim Bey, who succeeded Izzet Pasha as Turkish Governor of Yamen in 1912, and in 1913 proclaimed an entente with the Imam, as we read in Wyman Bury's "Arabia Infelix." It is rather startling to find that the Bey's influence should have survived all the shocks and changes of the War; but the explanation given is at least illuminating—"the pact is based on anti-European sentiments." If the rumour be true, it means, as the *Morning Post's* Cairo correspondent points out, in telegraphing it on to his paper—that the circle of Turkish influence around Syria, the Hejaz, and Palestine is complete. But whether Arab memories of past relations with the Turks have faded sufficiently to allow of any lasting agreement being reached just yet remains to be seen.

An Indian Danger.

As time goes on it becomes increasingly clear that one of the dominant factors in the Indian political situation is the absence of anything like enthusiasm in support of the new Constitution. The official world has given it a fair chance, and perhaps a little more, but the masses of the people are only just beginning to be interested; and the political classes, having recovered from their first surprise at the liberality of its provisions, are devoting themselves to criticism of its restrictions, just as a man who not long ago was naked might complain that his new clothes are too tight. Lord Reading, with the assistance of his staff of skilled gardeners, can protect the young plant against neglect or wilful damage, but the real threat to its existence comes from the amateurs, who are dissatisfied with its early appearance, and want to transform it into something else. We yield to none of these critics in our interest in the progress of the experiment; where we differ from them is that, instead of desiring to alter its conditions, we are content to watch the results as they come, and to judge them less by their immediate value than by the evidence they furnish of the capacity of the new machinery.

Digitized by Google

The New Regime and the Old.

One such result—an encouraging one—is the new District Boards Act as passed by the United Provinces Council. The elected local authorities are nearly forty years old, but from the outset they were sterilised by excessive caution. They were given no power to raise income, but lived on what was provided for them by the law, supplemented by a vicious system of doles, and consequently neither electors nor members took any real interest in their work. It was recognised many years ago that the grant of rating-power was necessary to make the dry bones live, but it was known that such a step would be opposed by the landed interest, concerned primarily with the possible reaction of rates on rents, and so long as the bureaucracy sought for tranquillity the project was kept carefully on the shelf. The Government created by the new Constitution lost little time in transferring it from the shelf to the table; a Bill to grant limited rating-power was introduced, the parties lined up on a clear issue, and then a compromise was arranged, which concedes the principle, and allows scope for subsequent extension of the practice. The matter is in itself one of secondary importance, but it is interesting because it shows that the new Constitution can on occasion function much more effectively than the old.

An Attempt at Prohibition.

Another result, not entirely encouraging, comes from the Excise policy adopted in the same province. High caste townsmen yearn for prohibition, and the new Government started by raising the cost of spirits to an almost prohibitive figure. The first year of the new *régime* has disclosed an embarrassing loss of revenue and a much more embarrassing development of illicit distillation; more spirits were drunk, but the duty realised was less. The cause of this disappointment was simply that the townsmen ignored the country, where, among some of the lower castes, the art of distilling spirits is traditional. So long as the duty was moderate the art was practised only as a home industry, but under prohibitive taxation it has developed with marked rapidity, and the Government must now either retrace its steps or employ a protective force for which it cannot pay, and which might easily lead to something like a revolt. The problem is, of course, not new, for the Moguls endeavoured to suppress distillation by capital punishment, but the practice survived, and is not likely to yield to the milder penalties in fashion at the present day. The new Government has thus been afforded an early opportunity of showing whether it possesses one of the highest gifts of statesmanship—the art of graceful retreat.

THE WEEK AT HOME.

London, Monday Evening.

Two Criminal Cases.

When the criminal courts get a really exciting mystery, or what the reporters know as "a human interest" case, politics take a back seat. Last week the public attention was focussed upon the Ilford murder, in which Mrs. Thompson, a young married woman, and a youth named Bywaters, are charged with the murder of the woman's husband. The case was a very ordinary one, but columns of the evidence were given in every newspaper; while, so far as I have noticed, the man on the Tube and the girl on the bus seemed to read and talk of nothing else. The trial ended late on Monday evening with a verdict of guilty, and both the prisoners were sentenced to death.

Another case—that of Bevan, the defaulting financier—which concluded earlier in the week was of more interest to City men than to what schoolboys call the "hoi polly." The evidence as to balance-sheets was intricate; and, being incapable of anything beyond simple addition, I frankly gave up all attempt to follow it. The excuse was made that the balance-sheets were issued for the purpose of window-dressing, but the jury came to the conclusion that they were misleading, and was obviously of the opinion—which many others share—that the remaining directors did not do their duty. Bevan bore his trial with great composure, and listened unmoved when sentenced to seven years' penal servitude.

Parliament.

The Government majority fell rather badly below normal on Monday night, and the Treasury Bench was visibly perturbed the next day. With the Chief Whip absent through having lost his seat at the General Election, party discipline is rather slack, and Labour on its side is refusing to grant pairs, while the Liberals are keen as mustard, and do not want pairs. The Tory attendance will have to improve next session, or the Government will find itself in an awkward fix. Probably this slackness is a relic of dead-and-gone Coalition days, but times have changed.

For the rest, the debates have been quiet, except for a breeze in the House of Lords between Lord Birkenhead and Lord Salisbury, which was exciting in pot-and-kettle fashion while it lasted. Just as anything comic always seems ten times more comic in church, so the mildest altercation in the Lords seems more astonishing than the most bellicose scene in the Commons. The actual occasion of this episode was the Greek policy of the late Government. I leave my more instructed colleagues to discuss the question whether it was right or wrong from the point of view of the Greeks; but most certainly the evidence recently published has produced a very unfortunate impression over here, and the fact that ex-Ministers are now contradicting themselves and each other as to whether they did or did not read, or even see, dispatches has visibly diminished any remaining regrets as to the fall of the late Coalition.

For the time being, indeed, Mr. Lloyd George's star is in eclipse, although he made his maiden speech in the new Parliament this week on agriculture—which is not quite his subject. His Greek policy has damaged him considerably, and the Haig revelations have added to the effect by casting doubt on another war legend. And I am not quite sure that Mr. Raymond's very candid biography of the ex-Prime Minister very much helps to put Humpty-Dumpty up again. No doubt Mr. Lloyd George's opportunity will come again, but it looks as though he would have to wait some little time for it.

Mr. T. M. Healy.

Ireland has not lost its capacity for surprises, but even in these tragic days of her destiny the surprise is occasionally a pleasant one. The choice of Mr. T. M. Healy to be the first Governor-General of the Free State was unexpected, at least on this side of the water, but it has been very popular. "Tiger Tim" has the bitterest tongue and the kindest heart of any man I know—some of his jests are immortal—but no man ever accused him of lack of pluck or patriotism. He has not been much heard of since the War, and at one time it looked as though he had been thrust aside by the younger generation of Sinn Feiners, like most of the old brigade—Mr. Dillon, I believe, has turned from politics to grocery, and is said to look more melancholy than ever, although one can hardly believe that possible. But Mr. Healy has been quietly

Digitized by Google

advising the Free State Government in some of its difficulties, and the Executive have done themselves honour rather than him by offering him the difficult (and possibly dangerous) post. The one thing to be regretted is that it will put an extinguisher on the epigrams; for whoever heard a Governor-General being witty in public?

A Missionary Concordat.

A few weeks ago I referred to the trouble that had broken out in the Church Missionary Society over the interpretation of Scripture. The result was a split between the more modern supporters of the society and those who still held firm to the theory of verbal inspiration. A rival organisation was formed, and it looked as though a disastrous feud would occur. I do not gather that the split is actually healed, but happily the bulk of the supporters of the C.M.S. have now agreed on a concordat. A statement has been issued designed to "unite men who differ on some questions but are at one in essentials"; and it proclaims "unwavering acceptance of the supreme authority of Holy Scriptures and our full belief in their trustworthiness in all matters of faith and doctrine." A hair-splitting logician would, I think, be entitled to claim that the first clause is not precisely in accord with the last, but it would be unfair to press the point on an organisation which has done very good work under considerable difficulties for years past, and which must have been considerably embarrassed by this latest controversy. After all, the historicity of Genesis—which I take to have been the source of all the trouble—is not a matter of supreme importance to most of the people among whom the C.M.S. does its work.

Christmas Shops.

The West-End shops are again gaily dressed for Christmas, and they are distributing their catalogues broadcast. (Perhaps even indiscriminately—for a few days ago my morning post included an invitation from a well-known firm to satisfy my requirements in ladies' underclothing, coupled with an assurance that they would refund the money if I did not find the garments satisfactory.) It is admitted that trade, on the whole, is a little better this year than last, and that should help the shopkeeper at the present time. The usual crowds seem to be congregating round the windows, but I take it that it will be another week before people begin buying in earnest.

Who is it, by the way, that buys "Christmas cigars"? I saw some boxes with these mysterious labels in my tobacconist's a few days ago, and with that curiosity which is said to be the peculiar prerogative of ladies and journalists I asked him a leading question on the subject. He smiled and declined to be drawn, but taking down another box he remarked: "Now here, sir, is a *really good* cigar." That at least solves the question of the quality, but not of the destination.

Recent Books.

"Mr. Lloyd George" (Collins), by E. T. Raymond, has come out just at the right time. It is a brilliant yet thorough piece of work, a solid record devoid of flattery—unlike some of the previous biographies of the ex-Prime Minister, and it conveys something of his dynamic energy. It insists on his essential Radicalism, his aloofness, and—what few of the commentators have noticed—the "adamantine hardness" beneath the fertile orator. Some of the gems of the "hen-roosting" days, by the way, are quoted.

"The Return of Christendom" (Allen and Unwin) is a collection of essays by various hands. "The Return of Dogma," "The Necessity of Catholic Dogma," "The Failure of Marxism," and "The Obstacle of Industrialism" gives an idea of its scope. There is an epilogue by Mr. G. K. Chesterton.

"The Letters of Walter H. Page" (Heinemann) have already been published in magazine and newspaper extracts, and have been widely read. They are extraordinarily interesting documents, of first-class historical importance, from the late American Ambassador. It is curious to notice how his faith in President Wilson declined steadily until he was forced to admit "He is not a leader."

"Queer People" (Hodder and Stoughton), by Sir Basil Thomson, is an account of spies and criminals by the late chief of Scotland Yard—a most amusing and curious collection of rogues and aliens.

"Mystery at Geneva" (Collins), by Rose Macaulay, is a light and amusing satire on the League of Nations, but it is hardly equal to "Potterisms" or "Dangerous Ages," her first two successes.

"England After War" (Hodder and Stoughton) is written in the spirit of "profound misery at the passing of the best life of England, and profound anxiety lest England should be destroyed." The middle-classes "starve in silence; they have been far more hardly hit than the working-man by the immense increase in prices. They have been very patient, but their patience is well-nigh exhausted. They spend their leisure in cursing the working-man and cursing the profiteer." Let us hope that things are not quite as bad as all that. The author is Mr. C. F. G. Masterman, and I am afraid that the fact that he has tried to get back into Parliament several times during the past eight years, and been regularly rejected on every occasion, has something to do with his inspissated gloom. Mrs. Gummidges exist, but there are Micawbers as well.

"The Life of Jameson" (Arnold), by Ian Colvin, has long been expected, and it more than fulfils expectations. It conveys exactly the impression of those tangled and exciting years in Cape politics when the duel between Cecil Rhodes and Kruger was coming to a head, and "Dr. Jim" was brought under the influence of Rhodes; and, indeed, the book somehow leaves one with the feeling that whereas Rhodes has never had anything like justice done him by his biographers, Dr. Jim, in every way the lesser man, has had something more than justice done him by Mr. Colvin. Would Dr. Jim ever have been anything but a local doctor had it not been for Rhodes? Somehow I still doubt it, in spite of a genuine streak of genius in the disciple. For all that, it was a great life, judged both by its incidents and its results; but he died in the middle of the war, a tired and worn-out man. During his last illness one of his brothers thought he saw a change for the better, and whispered that there was hope. "No, thank God," said Dr. Jim, "there is no hope."

OCELLUS.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, November 29.

The Political Situation.

Up to the time of writing no invitation has been received by the Egyptian Government to attend the Conference. This delay is causing no little surprise, as in well-informed quarters it was clearly understood that no difficulties presented themselves.

The presentation of the new Constitution to the King has also been delayed owing to the Legal Drafting Committee not having been able to complete its work yet. In consequence, the country is in a state of expectancy, and the general situation has not been improved by the active intrigues which have been going on in political and other circles. Indeed, in many quarters not usually alarmist considerable anxiety is expressed with regard to the future.

The enquiry into the latest political crime is in full swing. Numerous arrests have been made, but so far the authorities have not been able to lay their hands on the culprits or anyone connected with the crime. The fact that this political outrage took place so soon after the liberation of some of the extremists who had been detained since the last outrage pending investigation has aroused no little comment. In the absence of direct evidence, one has no right to connect these men with this latest outrage; but it certainly is a strange coincidence that during the whole time they were detained at Kasr El Nil no political outrages took place, but that no sooner were they liberated than the series started again. In the circumstances, there would appear to be a good deal to be said in favour of the policy of preventive detention which the authorities adopted until recently.

Other factors in the situation which have been calculated to encourage the partisans of active measures are, in the first place, the delay in bringing to trial the men implicated in previous outrages, and, secondly, the delay in carrying out the sentences already inflicted on those found guilty. Somewhat of a mystery surrounds the operations of the special Commission which was set up in the summer for dealing with these political crimes. It was stated some little while ago that the men implicated in the attacks on Bedr Eddin Bey and Mr. T. Brown were about to be brought before a military court. In fact, the court for the trial of the men accused in the first case was convened for last week. Suddenly the case was postponed; one of the principal Egyptian members of the Commission was removed, and the Commission was reformed.

All this is not calculated to strike terror to the hearts of the men responsible for the outrages, nor is the fact that the two men who were sentenced to death in the Farghal case some six weeks ago are still waiting the execution of their sentences.

Condemnation of these outrages continues to be the theme of articles and statements published in the local Press. The most noteworthy has been a manifesto issued by the "Constitutional Liberal Party," in which it roundly condemns such acts as these, and declares that, unless this terrible social disease, of which the latest outrage is a symptom, is radically cured, it will constitute a menace to the future of the country. It goes on to point out that, unless the nation co-operates in discovering those responsible for this outrage, Egypt will not be able to realise her national aspirations, and it calls upon the Egyptian public to respect the political opinions of others. This manifesto constitutes a very timely appeal, and has been welcomed by all right-minded Egyptians. It is, however, noteworthy that the campaign against the new party, which has been going on for some time, and is generally considered to have been responsible for the recent outrage, is continuing with even greater violence. It is stated that those conducting the campaign are receiving active encouragement from quarters which are directly interested in defeating the objects of this party in the same manner as they desire to see the present Cabinet discredited.

The Season.

The season, which started early in November, is expected to surpass all its immediate predecessors. Advance bookings are already very heavy. Thus early quite a large number of tourists have arrived at the various hotels, and the first Nile sailings have had most satisfactory passenger lists. All the hotels have carried out improvements in order to relieve the congestion that has marked the past few seasons. Shepheard's, the Continental-Savoy, and the National have already started their winter programmes. The Semiramis will open early next month, as also will the splendid Heliopolis Palace Hotel, which has been closed for the past eight years; while Mena House and the Grand Hotel at Helwan have already quite a good number of guests.

The season is likely to be a late one, owing to the large American parties which are booked to arrive in the early spring, but it will nevertheless be an exceedingly gay one if one may judge from the preparations made by the various committees and organisations that are responsible for the entertainments. In this connection a meed of praise is due to the Egyptian Promotion Association, which has been working hard during the past two years to improve the arrangements made for visitors, and has certainly succeeded in awakening amongst the interests catering for the tourists a proper sense of their duty towards the latter.

Egypt and Lausanne.

All eyes are turned towards Lausanne, whence every detail is telegraphed either direct by special correspondents or via London. Every movement in the game is being noted and commented on, and next to the statements made by Ismet Pasha the subject of absorbing interest is the part which the ex-Khedive is playing. All the delegations—Syrian, Palestinian, and Egyptian—have been most active in their protestations against any inference that Abbas Hilmy Pasha is having anything to do with their actions; but everyone here has a very shrewd suspicion that the ex-Khedive is closely in touch with these delegations.

It is well known that his interest lies in the

SCHOOL OF ORIENTAL STUDIES.

direction of placating the Kemalists and creating trouble for Great Britain and the Allies, and it is noteworthy that the Kemalist agent at Rome, the leader of the Nationalist Party delegation, which has gained control of the Zaghloulist delegation, and the head of the Syrian delegation, are all men known for their close relations with the ex-Khedive. One has therefore every right to put credence in the statements freely circulated that he is taking an active part in the negotiations that are going on between these delegations and the Kemalists.

PALESTINE.

Jerusalem, November 29.

The Arabs and the Government.

Despite the official notification by the Government some two months ago of the pains and penalties incurred by any who should attempt in any way to frustrate Government orders, and, particularly, the forthcoming elections to the Legislative Council, Arab malcontents are conducting an open and vigorous campaign in favour of boycotting the elections. There has been an exchange of views between the Chief Secretary, Sir Wyndham Deedes, and the Secretary of the Moslem-Christian Association, Jemal Effendi el-Husseini, in which the former utters a mild remonstrance at the unreasonableness of the Arabs, and the latter replies at prodigious length and with a fierce mercilessness in reiterating what are already the most well-aired sentiments.

Sir Wyndham, on his side, caused a brief memorandum to be published in the Arab Press, in which he argued that the two primary grievances of the Arabs—(a) that participation in the elections argued their agreement with the Palestinian Constitution, Balfour Declaration, etc., and (b) the composition of the Legislative Council left the supporters of a Zionist policy in a permanent majority—were best satisfied by furthering the setting up of the Legislative Council, since (a) the opposition of the Arabs need not come to an end with the elections, and (b) as members of the Council they could assist directly and materially in legislation which should protect Arab rights. The Chief Secretary then goes on to point out that the Government is as determined to carry out the second part of the Balfour Declaration—fostering and protecting the Arabs' interests—as it is determined to carry out the first part—encouraging the creation of a Jewish National Home; therefore, the Government is to a great degree dependent on the co-operation of the Arabs in protecting their own (the Arabs') interests where these may be affected, as, e.g., by the Rutenberg Concession. As to the Palestine Constitution and the composition of the Legislative Council, Sir Wyndham explains that the Government is quite cognisant of the country's needs, and that, compared with constitutions given to other communities in similar conditions of political immaturity, the Palestine Constitution is generous in the rights it bestows; and that the Government would have given an even more acceptable constitution had not the Arab political leaders shown themselves so recalcitrant in demanding the abolition of the Balfour Declaration, and even allying themselves with the movement in favour of abolishing the British Mandate as well. The Chief Secretary concludes by advising the Arabs to co-operate whole-heartedly in the government of the country, and not to fight uselessly against accomplished facts.

The reply of the Secretary of the Moslem-Christian Association is a spacious repetition of Arab grievances; the allusion to the political immaturity of Palestinians is what most rouses his ire: he retorts by detailing at length the electoral rights and experiences enjoyed by Palestinians under the generous Ottoman constitutional methods; while as to the present Government being aware of the needs of the country, the Secretary puts the idea aside as absurd, seeing that public security in the country was never before in such parlous condition, that the income of the country does not meet a fifth of its expenses, that the Government is showering concessions on foreigners, that public education was sunk to the lowest abyss. . . . He winds up by disputing the existence of "the accomplished fact," in face of which the Chief Secretary recommends the Arabs to stop their agitation, when, according to the writer, "our ears hear the cries of the English people requiring the Government to leave Palestine, and the new Ministry asserting the need for re-examining the question, namely 'the accomplished fact,' and when we see the Treaty of Sèvres, the single and sole foundation of this 'accomplished fact,' entirely quashed and relegated to the museum of history."

Threatened Teachers' Strike.

There is some local stir about a threatened strike of Jewish school teachers. The Hebrew schools soon after the British Occupation passed into the control of the Zionist Commission, and since then they have been entirely, or almost entirely, dependent on Zionist funds. At the last Zionist Congress the educational budget was reduced 30 per cent. This necessitated local economies and an effort to raise more money from Jewish parents in Palestine. Apparently the economies have not been made, the local parents have not risen to the invitation to pay more (or even something) towards their children's education—it will be a long time before Palestinians, Jews, or Arabs shake them-

selves free of the evils of generations of pauperisation and dependence on charity from abroad—and the Zionist financial support, even with the 30 per cent. reduction, is failing to materialise. The result is that the Jewish teachers have received no pay for the last five months. The only question is, against whom are they to strike, so that the strike shall serve any purpose? Their present paymasters are world-Jewry, or the million enrolled Zionists, and it is rather futile striking against them. The tendency seems to be to make the Government the target of their grievances, since the Government Education Department caters primarily for Arab elementary education, Jewish education getting nothing beyond a negligible grant-in-aid.

Zionists' Differences.

Dr. Weizmann, the chief of the Zionist Organisation, has arrived in Palestine for a fortnight's stay. He has brought with him a Colonel Kish, an English Jew of some political and diplomatic experience, who is to work in Jerusalem as the political intermediary between the Zionist Executive and the Palestine Government. As a consequence, there is an intense soreness, both felt and openly expressed, among one section of the local Jews. Mention has once or twice been made in these columns of the two quite distinct elements in the Zionist movement—the "Russian" and the "Western" (this includes everything west of Poland). In pre-war days Zionism drew both its human and financial support primarily from Russia, and Zionism was in effect a Russian Jewish movement. This situation is now much changed, and the responsible leaders of the movement find it necessary to court Western Judaism, where reside both financial support and political influence. Therefore, though Russian Zionism still represents the majority of Zionists, it is no longer the influential factor. When Dr. Weizmann landed in Egypt a week ago, the local newspapers were informed that he had invited Mr. Ben Avi to act as his "political secretary" during his stay in Egypt and Palestine. Mr. Ben Avi happens to be the editor of the Jerusalem daily, *Doar ha-Yom*, which has, for some time, wholly espoused the Brandeis-Mack faction in Zionism and opposed everything that savoured of Russian Zionism. This was the first cause for complaint on the part of the local Russian Zionists. The second was the advent of Colonel Kish. His appointment is being bitterly resented by the Russian faction in the columns of its daily paper, *Ha-Aretz*. The independent Jews wax merry over the fact that at one time the Son of Kish went forth to find his father's asses and found a kingdom; whereas Colonel Kish meets with the reverse experience. But the Russian Jews are attacking Dr. Weizmann somewhat bitterly for his high-handedness, his disregard of the democratic nature of Zionism, for consorting with the "poetasters of Fascismus" (Mr. Ben Avi wrote lyrical leaders in honour of Mussolini), for planting a "foreigner" in the midst of Palestinian Jewry to represent their views—which he could neither know nor understand—before the Government, and for cultivating the "wrong people" in Palestine. At present the two Hebrew dailies are busy contrasting, not over-politely, the merits of Russian versus Western Jewish nationalism.

TURKEY.

Constantinople, December 3.

The Conference.

While the telegrams from Europe regarding the Lausanne Conference have been generally of an optimistic nature, pessimism has been the characteristic of Turkish comments, although no further importance is attached to the legend of "Allied," or Balkan, unity of front. The entire Turkish Press loudly praises Ismet Pasha, who is described by the *Ileri* as playing the greatest part in world politics and as giving the greatest demonstration of patience, although faced in a hostile manner by "the whole of Europe and the entire Christian world at Lausanne." Nevertheless, almost alone amongst the Turkish Press, the *Ileri* expressed optimism regarding the final result of the negotiations, notwithstanding the fact that "British justice has two measures, one for Christians and one for Moslems," and, despite the clash of self-seeking intrigues illustrated by the question attributed to Mussolini, "What is Italy going to gain? I have come here to find out this." Other Turkish organs also voiced a widely held belief that in reality Lausanne is a kind of Tom Tiddler's ground, where each of the Powers represented is trying to snatch special advantages, and such optimism as to the result of the Conference as exists in Turkish circles is based to a great extent upon the advantages thus afforded to Turkish diplomacy.

Ahmed Emin Bey, writing in the *Vakit*, has been particularly severe upon Lord Curzon, whom he describes as having skilfully saved himself from the shipwreck of the Coalition Government, whilst being yet imbued with the same ideas as Mr. Lloyd George in regard to Turkey, although without sharing the late Premier's love for the Greeks. The following passage from the pen of this Turkish journalist, who is perhaps the most skilful and well-informed of Turkish political publicists, is worthy of reproduction :—

> Those who wish to come to an understanding with us must take the direct road, and those who desire to arrange matters with us on the basis of mutual interests will find us very conciliatory. The old policy of constraint and pressure and domination may provide for a few days more the pleasure of a triumph for Lord Curzon and a few others, but this pleasure will cost the whole world very dear. For if there is no renunciation at Lausanne of the methods employed by the old diplomacy, and if there is no peace inspired by good intentions concluded, the Near East may become the theatre of events injurious to the interests of the whole world.

Turkish Journalistic Methods.

The methods of the "old diplomacy" are a theme dear to the heart of Ahmed Emin Bey and many other Turkish journalists, and no one who knows the diplomatic history of the Near East, even superficially, can deny that the condemnation of those methods is just. It is unfortunate, however, that Ahmed Emin Bey should emulate the methods of those who cannot boast either of his training or experience, and that Mr. Philip Graves, of *The Times*, and others who have been the political opponents of Turkish revolutionary nationalism, should be openly accused of disseminating false information for self-interested motives. While deferring to the dictum of Western culture, *de gustibus non disputandum est*, one may be permitted to ask whether the same writer's journalistic labours during the War did not receive an occasional solatium in one form or another from other sources than the profits derived from the publication of his paper. Incidentally, Mr. Graves was reported to have been appointed a "councillor" to the Foreign Office—which may be flattering, but

Digitized by Google

is untrue, like several other personal statements made in the same unfortunate article.

Statement by Raouf Bey.

Important statements regarding the Lausanne Conference have been made during the past week in the Great National Assembly by Hussein Raouf Bey, now President of the Council of Commissioners in Angora. The following is a translation of the most interesting passages from a speech reproduced in the local Press :—

"Our delegates at Lausanne are defending our legitimate claims as defined by the National Pact, and the fact that Ismet Pasha has raised the questions of Adrianople and the Maritza does not in any way detract from the quality of our defence. The frontiers of Thrace must be those defined by the Pact, and Kara Agach must therefore indisputably be returned to us. As for Western Thrace, where there is an agglomeration of worthy men who have never abdicated their independence, these cannot be treated like a flock of sheep and made the subject of bargaining. A plebiscite must therefore be held. . . . Mosul is included in the frontiers defined by the National Pact, and cannot, therefore, be detached from Turkey.

"The conversations which are taking place at Lausanne concern the oilfields, and, under the pretext of pursuing economic objects, the Powers wish to dispossess us of our territory. . . . The exchange of minorities is necessary, and assurances have been forthcoming from an authoritative source. A rumour is being circulated to the effect that we may refuse Christians permission to travel, but measures have been taken against such propaganda. . . It is likewise untrue that severe measures have been taken against American subjects or their educational and charitable institutions. . . . On the other hand, efforts are being made to turn the French Press against us. We are accused of wishing to destroy all educational institutions which are not Turkish. . . We have need of French enlightenment and culture, and we desire to benefit our country in this direction, but to derive advantage from French education our children must be taught Turkish. They must be taught our history and our geography. . . . In any case, it must be said that French educational institutions do not propose to make our children little Frenchmen. . . No other reserve is imposed upon them. . . . You are aware that France, Great Britain, and Italy have not been able to ensure their unity of action. An agreement at the beginning of the general war brought them to act together, and not to sign a separate peace. And now, when it is a question of making peace with Turkey, they must naturally come together at the same table. That is what they are doing. In reality, the unity is only outward. The French have no longer been in a state of war with us since the signature of the Angora Convention, only we have not made peace with them. The peace towards which we are progressing to-day will be definite. . . ."

The speech terminated with warm praise of the French Premier and an expression of confidence in the French delegation.

Mosul.

It is believed to a great extent that the negotiations at Lausanne are soaked in oil, and in Turkish circles it is affirmed that the Mosul question constitutes one of the greatest difficulties in the way of an agreement. It is hard to understand why this should be the case when the Turks themselves openly advocate an understanding with the British on the subject of the Mosul oilfields, whatever they may be worth. The problem would perhaps be easier to understand if the whole truth were known regarding the engagements or promises made by the Angora Government, verbally or otherwise, with foreign Powers or institutions. Admiral Chester, for instance, is said to be in Angora at the present moment, and the journey has certainly not been undertaken merely for "reasons of health." Moreover, the recent repudiation of any interested motives in the matter by the Russians, who say they have more oil than they want already, was too spontaneous to be accepted at its face value.

A Plot.

The Anatolian Agency has been making our flesh creep with a story of desperate Armenian assassins plotting to cause the "intervention of foreigners." The simple process by which this result is to be brought about, we are told, is nothing less than the murder of personages belonging to the Government of the Great National Assembly. The names and, in some cases, the addresses of accomplices were stated, together with those of the would-be assassins, but no details have been given as to how the information was obtained in the first place. The plot was hatched at Ventimiglia, it is affirmed, and it would only be in keeping with the rest of the story if the papers published the photographs of the villains, with cloaks, daggers, and false noses complete—the last item of disguise being essential in this case. Naturally, the accomplices in the plot were in possession of British passports, and, despite official denials on all points, despite the absence of any corroboration of the detailed statements made, the story is declared to be true. If it were not such a clumsy fabrication, one would suspect a sinister motive in the publication of such a story at the present moment, and one can only conclude that the Turks themselves have fallen into a trap the nature of which is obvious. If the Turkish authorities refrain from the action which the propagation of the story was obviously calculated to provoke, little harm will be done, but the Turks should not have allowed themselves to be caught with such chaff.

GREECE.

Athens, December 2.

The Ex-Ministers' Execution.

Although four days have already elapsed since the five ex-Ministers (MM. Gounaris, Stratos, Protopapadakis, Baltajis, and Theotokis) and the

ex-Commander-in-Chief of the Anatolian Army, General Hajianestis, were shot, one can hardly yet realise that these men, with whom the history of Greece during the last ten years has been so closely associated, have irrevocably disappeared from the horizon of Greek politics.

The trial was expected to end last Friday, or at the latest on Saturday, but the Revolutionary Prosecutors and the Counsel for the defence had so much to say that the Court was obliged to sit both on Sunday and Monday. The Parliament hall was packed throughout Monday evening, and, although the hearing was not concluded until midnight and the President of the Court had announced that the verdict could not possibly be pronounced before four or five o'clock in the morning, the majority of the people remained in their seats, smoking cigarettes and reading the evening papers, while others ran up to the confectionery shops in Omonia Square (a number of these remain open all night) to have a glass of hot milk and a cake, and then returned hurriedly to the Court lest they should miss the most exciting part of the trial. In the meantime, the prisoners were taken in a motor van to Averoff prison, where, a few hours later, the Revolutionary Prosecutor, Colonel Gregoriadis, arrived with the death warrant signed by the leader of the Revolutionaries, Colonel Plastiras.

At 7.30 a party of soldiers entered the private clinic where M. Gounaris was lying with a temperature of 104°, and, despite the frantic appeals of the staff and the sick man's relations, dragged the unhappy ex-Premier out of bed, and, wrapping him up in an army blanket, carried him to an ambulance car which was waiting outside. Within ten minutes he was once again with his old colleagues. Shortly before the army chaplain administered holy communion, Generals Hajianestis and Stratigos and Admiral Goudas were cashiered. A non-commissioned officer who happened to be present at this sad ceremony told me that the ex-Commander-in-Chief's eyes were filled with tears when his major-general's stars and his numerous ribbons were roughly torn off his tunic --the same tunic he wore during the unfortunate Asia Minor campaign. At ten o'clock the condemned men were given an hour to say good-bye to their relatives, and at eleven an ambulance car, escorted by three motor-cars full of soldiers, conveyed them to an open space behind a sanatorium at Goudi, outside Athens. A strange coincidence: it was at Goudi that in 1910 the revolution which eventually brought M. Venizelos to Greece broke out.

At 11.25 it was all over. Everyone of them had faced death unflinchingly, M. Theotokis smoking a cigarette to the very end and refusing, as the others refused, to have his eyes covered. The bodies were then placed in a heavy army lorry and taken to the cemetery, where they were buried in the afternoon in the presence of their relatives.

On the following day the Royalists circulated rumours to the effect that disturbances had broken out in Corfu, Patras, and Agrinion, which are the homes of three of the executed ex-ministers. These rumours proved, however, to be without any foundation, as, in addition to official telegrams received, arrivals from these towns state that the people there have taken the whole affair in a very philosophical manner, and that perfect calm reigns everywhere.

M. Stratigos and M. Goudas, who were condemned to imprisonment for life, are still in Averoff prison.

The British Minister's Departure.

As a consequence of the execution of the five ex-Ministers and General Hajianestis, the British Minister in Athens, Mr. Lindley, has broken off diplomatic relations with the Greek Government, and left for Lausanne by the Orient Express last Tuesday night. His Secretary, Mr. Bentinck, has remained in Athens with the entire Legation staff, but it is understood that he will have no official intercourse with the Greek Government. Although Mr. Lindley's departure was known, the news of the breaking off of relations with Great Britain did not appear in the Athens Press until Thursday morning.

As far as is known, the British Naval Mission will remain in Greece at present.

The New Cabinet.

Following the resignation of the Krokidas Cabinet, and the refusal of M. Zaimis to accept the Premiership, a new Cabinet has been formed under the leader of the Revolutionary Committee, Colonel Gonatas, as follows :—

Colonel Gonatas, Prime Minister without portfolio.
General Pierrakos Mavromihalis, Minister of Interior.
M. Alexandris, Minister for Foreign Affairs.
General Pangalos, Minister of War.
Admiral Voulgaris, Minister of Marine.
Colonel Sakellaropoulos, Minister of Marine and (temporarily) Posts and Telegraphs.
M. Prekas, Minister of Finance.
M. Sideris, Minister of Agriculture.
M. G. Embiricos, Minister of Supplies.
M. Canellopoulos, Minister of National Economy.
M. C. Rentis, Minister of Justice.
M. Doxiadis, Minister of Relief.
M. Siotis, Minister of Public Education.

The new Minister for Foreign Affairs, M. Alexandris, has not taken the oath yet. He is temporarily replaced by M. Rentis. Colonel Plastiras has now become the Chief of the Revolutionary Committee, which is now called simply "Revolution."

Miscellaneous News.

The trial of Prince Andrew commenced in the Parliament House this morning. The Prince, who at the time of the battle of the Sakaria was commanding the II. Greek Army Corps, is accused of having refused to obey an order given him by the C.-in-C., General Papoulas.

The C.-in-C. of the Greek Army in Thrace, General Nieder, has arrived in Athens. It is not yet clear whether the General has been recalled or whether he is here on leave.

YUGOSLAVIA.

Belgrade, December 6.

Views of Lausanne.

Interest is still centred on the Conference at Lausanne, which will have far-reaching consequences for the Balkan peoples. The local Press expresses its satisfaction with the work done by the country's representatives, who have been taking an active part in the proceedings. The impression given is that the Balkan States are beginning to see where their interests lie, and that more is to be gained by co-operation with one's neighbours economically and politically than by petty rivalries and jealousies. One paper goes so far as to say that more is to be gained by solidarity of the Balkan *bloc* and the Little Entente than from the negotiations of M. Franklin-Bouillon.

Events in Italy are being watched with interest, especially in the West, and in view of the changes that have taken place in home politics, the situation is expected to develop to the benefit of all

Digitized by Google

concerned. M. Nintchitch is returning from Lausanne and is expected to meet M. Mussolini and M. Contarinis at Venice.

Before leaving Lausanne, M. Nintchitch had a meeting with Ismet Pasha. The latter is said to have expressed his satisfaction with the result of the meeting.

The Cabinet's Resignation.

Events have been moving rapidly in the last few days, and a most interesting situation has culminated in the resignation of the Government, which took place on the 4th inst.

The late Government was a coalition of Radicals, Democrats, the Mussulman party, and a few others. The prospect of the Croats' claiming their seats and siding with the Opposition and the disaffected members of the Government, appears to have made the position untenable, and M. Pashitch has resigned.

The net result of many political crises recently has been that M. Pashitch has made changes in his team and has carried on. The present crisis is expected to have consequences which will be much more important. The aim of the Croatians is to obtain a large measure of local government for each of the provinces which go to form the kingdom. Since the Constitution was signed eighteen months ago a policy of centralisation from Belgrade has been adopted. This is disliked in the provinces other than Serbia, and they have been agitating for a large measure of local government in internal affairs. If this be carried out the Constitution may have to be revised.

General News.

The Queen of Roumania has arrived in Belgrade on a visit to the King and Queen.

Arrangements are being made for Christmas. Dr. McPhail is giving a dance on Christmas Eve. The committee for assisting Russian students is giving a *thé dansant* on the evening of December 12.

There has been a blizzard at Ragusa with deep snow. With the exception of a slight fall last year, snow has been unknown there for at least twenty years.

ROUMANIA.

Bucharest, December 1.

Opening of Parliament.

Parliament was opened on October 28 with the usual ceremonial. The King, Queen, and the Crown Prince drove in state to the "Metropolie" (Primate's Cathedral), which is contiguous to the Chamber, where the customary religious service was held. The Royal party then entered Parliament amidst enthusiastic cheers.

The speech read by the King dealt, *inter alia*, with the necessity of modifying the Constitution to suit present conditions arising from the addition of the new provinces. It further announced that the Government will come forward during this session with a scheme for funding the internal debt with the National Bank, the salutary effect of which will not fail to make itself felt in an improvement of economic and monetary conditions throughout the country. Referring to the Lausanne Conference, His Majesty stated that Roumania is, as heretofore, joining her efforts with those of her Allies for the maintenance of peace and the safeguarding of her vital interests.

Political.

With the exception of M. Jorga and the members representing the minorities, the various parties of the Opposition deemed it opportune to shine by their absence. It is true that until then the various meetings announced by the Opposition with the object of determining their attitude towards Parliament had not taken place. There are, however, indications that they will decide to return to Parliamentary work until the Constitution Bill is brought in for discussion. It is presumed that this Bill will be introduced into Parliament towards the end of the session; the Government will thus be meeting the Opposition half-way. The Government is, however, determined to pass the modified Constitution, in order to endow the enlarged country with its fundamental pact, which will likewise serve to strengthen the national unity between all the component parts of Greater Roumania.

Later reports state that the Tzaranists held their Congress at Jassy and unanimously passed a motion to return to Parliament in order to oppose the Majority in voting the modification of the Constitution; and, should the Government persist therein, they will withdraw anew from Parliament and subsequently engage in a relentless extra-Parliamentary combat.

It is most likely that the other parties of the Opposition will adopt a similar plan of action to that of the Tzaranists.

Roumanian-Bulgarian Relations.

The papers report that M. Stambolisky's visit to Bucharest and Belgrade have had as result the conclusion of an accord between the three countries, whereby Bulgaria pledges herself: (1) To remain neutral in case of a Soviet attack on Roumania; (2) To relinquish her pretentions to Macedonia; and (3) To wipe out the *komitaji* gangs. In exchange, Roumania, Serbia, and Greece undertake to assist Bulgaria to obtain an outlet to the Ægean Sea, namely, at Dedeagatch, besides the creation of a neutral corridor on Turkish territory. Under these terms Bulgaria was also promised to be admitted eventually to the Little Entente.

General News.

M. Daeschner, the French Minister at Bucharest, has been recalled by his Government. It is said that a high post at the French Foreign Office will be entrusted to him. He will be succeeded here by M. Olivier Taigny, Minister Plenipotentiary, at present acting as the Delegate of the French Government on the Hellenic Debt.

A local paper professes to know that M. Daeschner's recall is due to a *faux pas* unwittingly committed on the occasion of Marshal Foch's visit to Roumania. At a reception held at the French Legation, M. Daeschner presented M. Marghiloman to Marshal Foch; as is known, M. Marghiloman was at the head of the Roumanian Government during the German occupation, and his political adversaries impute to him pro-German feelings during the War, which latter insinuation M. Marghiloman, however, emphatically refutes.

The Roumanian Government has entrusted Poland with the mandate to represent Roumania at the forthcoming disarmament conference, which will start on December 1.

The Queen of Roumania left two days ago for Belgrade to visit her daughter, Queen Marie of Serbia.

Crown Princess Helen, accompanied by her sister, Princess Irene of Greece, has left Bucharest for Italy, to spend a month at Palermo with their parents, the ex-King and Queen of Greece. Prince Carol will join his wife at Palermo towards the end of December, and may subsequently make a trip to London to visit the English Royal Family.

Near East Bookshelf.

A MODERN HERODOTUS.

"THE BIRTH OF YUGOSLAVIA." By Henry Baerlein. Two volumes. (London: Leonard Parsons. 42s. net.)

Although it would hardly be possible to write a history of Serbia which was not also in part a history of Yugoslavia—a model work of this nature exists in H. W. V. Temperley's "History of Serbia"—there is room for a comprehensive treatise on the Yugoslavs. It was, therefore, with considerable interest that one settled down to read the two substantial volumes entitled "The Birth of Yugoslavia." The author, it is true, has a reputation as a vigorous propagandist, and allowance could well be made for occasional prejudice in the handling of some of the debatable points of Balkan history. We must confess, however, to an inadequate appreciation, before the reading of these two volumes, of Mr. Baerlein's capacity as a controversialist. With his wide knowledge of and keen interest in his subject he might have produced a valuable work. In its place he has preferred to give his readers an ill-digested, ill-assorted, and uncritical story, much of which is interesting, but which as a whole has little historical value. Of the seven hundred pages contained in the two volumes, less than a third suffice to bring the history of the Yugoslavs down to the outbreak of the Great War. Although it affords good reading in parts—we like to have the exact words in which the Republic of Dubrovnik, four centuries before Wilberforce's anti-slavery campaign, forbade its citizens to traffic in slaves—this section, both in actual treatment and in its typographical appearance, is a series of short stories, taking the reader in disjointed fashion through the centuries. Mr. Baerlein's style differs from that of most historians. In one place, for instance, we are treated to the following:—"Then someone else may ask about the schools. One must confess that the Venetians built no schools. But, my dear sir, contemplate the curious carving round the windows of that palace. . . ." Or, take the headline: "Pretty Doings at Kyk," and such expressions as "shameless Prince" and "scoundrel King."

It is in his attempt to present the story of the Southern Slavs since 1914 that the author submerges the historian completely in the controversialist. To fill those five hundred pages, recourse is had to material that can hardly claim to have had ephemeral interest, and certainly has no historical value. A work that purports to be a serious history is not the place for indulging in sneers and tirades against contemporary authors, even if they are rival propagandists or happen to be wine-merchants or schoolmasters. We can even imagine the most attentive reader being completely indifferent to the profound thought to which the author gives expression on p. 257 of Volume II.: "It is unfortunate for itself that THE NEAR EAST (of London) does not employ so discerning a correspondent," especially as the same reader, if he can struggle through the sins attributed to Mr. H. Goad, Colonel Aubrey Herbert, and Miss Durham for the next fifty-two pages, is asked on page 309 to agree with the author that "one may be excused, I think, for not taking THE NEAR EAST very seriously."

Mr. Baerlein must be given the credit—that he denies to others—of meaning well. He does not share the attitude of most of those who have been identified with Serbian propaganda, that there must always be enmity between Serbia and Bulgaria: rather, he is for Serbo-Bulgarian co-operation. If he were able to take a more dispassionate view of Balkan affairs, and to weigh more critically what is important and what is worthless in the mass of material he has at his command, "The Birth of Yugoslavia" would have come nearer to substantiating the publisher's claim for it as "the only history of all the Yugoslavs." Those who are interested in the subject will still have to be referred to "Le Royaume des Serbes, Croates, et Slovenes," by A. Mousset.

MORBID PSYCHOLOGY IN CENTRAL EUROPE AND NEAR EAST.

"Balkanized Europe." By Paul Scott Mowrer. (New York: E. P. Dutton and Co. 5 dollars.)

This book is the work of the distinguished European Correspondent of the *Chicago Daily News*. The author anticipates the most obvious criticism on his book by stating in his preface that it is "frankly journalistic." A considerable portion of it "has already appeared in the form of articles in the *Chicago Daily News* and other affiliated newspapers." Well, these newspapers were privileged to be allowed to print articles full of inside knowledge and stimulating to thought. Whether the author did well to make such extensive use of them in the form of a book is another question, and one as to the answer to which we find considerable doubt. Our doubt is intensified when we realise what a really good book Mr. Mowrer could have given us if he had not decided "to sacrifice the satisfactions of slow composition and of conscientious revision and write over-hastily in the leisure moments in busy days." Under an appearance of careful planning we constantly find overlapping of an aggravating kind, and we are treated to a good deal more journalistic purple than we care for, while many of the apparently haphazard and sketchy ideas for the resuscitation of Europe, which clearly fail to make much appeal to the author, are far from being nourishing food to the serious reader.

But, after all, what are we doing but criticising the author for the very fault to which he frankly pleads guilty? And it is not profitable to dwell on the defects in what is really a most interesting, stimulating, and informing book, which we have read with much enjoyment, and which we hope many of our readers will buy for their own edification.

"Balkanization" the author defines as "the creation, in a region of hopelessly mixed races, of a medley of small States with more or less backward populations, economically weak, covetous, intriguing, afraid, a continual prey to the machinations of the Great Powers, and to the violent promptings of their own passions." A good deal of begging of questions is here, but still it is perfectly clear what he means. The particular States treated of are Austria, Hungary, Bulgaria, Czecho-Slovakia, Poland, Roumania, Yugoslavia, and Greece. Of each of these States he gives us a cleverly written summary of their present condition, ethnologically,

physically, politically, and in relation to their neighbours. He has much to say on the morbid psychology of these nations; their hypersensitive consciousness of independence, with the weary accompaniment of violent and one-sided propaganda; their dangerous and expensive militarism (where it is unchecked by treaty); their *naïf* efforts at economic self-sufficiency, with control exercised by ignorant and incompetent public servants, and leading to results which would be farcical if they were not so tragic; and the terrible obstacle to all trade and mutual understanding which has been set up by the new frontier *régime*. We cannot do better than give our readers a taste of our author's quality by quoting part of what he has to say of frontier difficulties in travelling between these States, where the neighbour is the enemy, and the neighbour's neighbour is the friend. After enlarging on the difficulties and waste of time involved in getting passports and visas and even securing a place in the train, he goes on :—

> "At the frontier the train will stop. It will even stop a long time. The traveller will be invited to get out with his baggage. He will stand in line. He will stand in line a long time. He will stand till his feet ache and his back is lame. During the War he would have been searched for secret military information. Now he will be searched for stocks and bonds, money and jewels. When his turn finally comes he will be thrust into a small cabin, and an impervious functionary will go through his pockets, run a finger in his hatband, and feel inside his shoes. He may even be asked to undress, though this is becoming rare. If he has money about him in excess of the amount permitted, but declares it, it will be taken from him and a receipt given, so that he can get it back if ever he returns the same way. If he fails to declare it, it will be taken from him just the same, and he will be fined. He will now be graduated into another cabin, where his visas will be verified. Finally, his baggage will be opened and thoroughly examined. If he is found to be taking out any new articles for which he cannot show an export licence the articles are confiscated, and if he has not declared them he is fined. From some countries it is forbidden to take out a cake of chocolate. Three or four hours will now have elapsed. The traveller may resume his place in the train, which in the course of time will steam over the frontier and stop at the first station on the other side, where the entire operation will be repeated by a new set of Customs officers—passport examination, personal search, inspection of baggage."

And what is to be the cure for all this? Nothing can be achieved till these peoples get an inkling of the economic solidarity of the world, and till they consent to face political realities. When this happens we may hope to see ententes, alliances, and federations springing up, and with them we may see the present lamentable attitude of mind, with its consequences, disappearing. But Germany and Russia are dark horses, and, to Mr. Mowrer, the great dangers of the future are Pan-Germanism and Pan-Slavism, specially the latter. England is, in his opinion, the bitter enemy of the Slavs, and France is bound to be more and more their friend, in order to combat Pan-Germanism. The friendship so necessary between England and France will, he appears to fear, be wrecked on this rock, while Italy will come more and more into the English orbit, as being inspired by the same Pan-Slav hatred. Even the United States, whose very close relations with England are essential to the well-being of the world, is apparently going to be driven by its hatred of Japan, which it shares with Russia, into hostility with England. This, we fear, is journalism not at its best, but fortunately these hastily constructed guesses at the future do not seriously damage the value of the record of acute and close observation and the deductions arrived at from such observation. The book appears to have been written towards the end of 1920, and it is refreshing to note that much of the evil dwelt on by Mr. Mowrer as existing then is now disappearing, and that the remedy he recommends is really beginning to be tried. In fact, we find Dr. Eduard Benesh, in the September number of the excellent American quarterly, *Foreign Affairs*, going so far as to say :—

> "To speak to-day of a 'Balkanized' Central Europe is mere distortion of facts. Central Europe has ceased to be a scene of disorder and confusion; organisation has taken the place of chaos, and a new system of States has arisen, whose mission it is to preserve the results of the revolution of 1918 for the peoples of the old Austro-Hungarian monarchy, to renew and to strengthen law and order on the basis of the peace treaties, and to contribute generally to the work of European pacification and consolidation."

It is true that Dr. Benesh is talking of some only of the States treated of in Mr. Mowrer's book, but we think that the latter would agree that there is some truth in these remarks, though possibly he might be inclined to refer us to his chapter on propaganda and prescribe its use instead of the proverbial pinch of salt. C. S.-W.

MORE ANGLO-INDIANS.

"THE MOUND." By Alice Perrin. (London: Methuen. 7s. 6d. net.)

The first half of Mrs. Perrin's story takes place in England and the second half in India. She is quite at home in both—although in this case the English scenes seem the more vivid. Her people are very real, and so is the background against which they move, but it is with the reality of a photograph and without the revealing touch of even the roughest sketch. We know that we have met people who acted and spoke just exactly as her characters, but she seldom gives more than very accurate impressions of what people look like going about in ordinary life. The heroine, who is drawn with much more insight than the others, does not re-appear after she has sent the hero off to his rather improbably acquired Indian estate to reform himself in the vicinity of some Buddhist remains—the "Mound" of the title. The fact that we regret this shows that our interest has been aroused.

Mrs. Perrin has a light touch and a good eye for a comic situation. "The Mound" is not written with that compassionate understanding of the human heart which she showed in "The Anglo-Indians," but there is some originality in the plot, and her snapshots of all sorts of people, from Colonel Livesay, walking in intense boredom on the pier at Littlepool-on-Sea, to poor, faded Mrs. Clarke, absorbed in her Indian garden, are distinctly worth looking at.

PRESS ON THE NEAR EAST.

The Situation in Mesopotamia.

In the course of an article contributed to the *Morning Post* of November 23, Field-Marshal Sir W. Robertson, while discussing "The Army's Strength: Foreign Policy and the Means to Enforce It," refers pointedly to Mesopotamia, the occupation of which he holds to have been "a blunder from the outset." He traces the course of events in Mesopotamia from the beginning of the war to 1918, a period in which commitments in that region were kept within reasonable ground. But, he concludes:—

> In 1918, however, and after I had ceased to be Chief of the Imperial General Staff troops were sent up to Mosul, and for some eighty miles beyond it, and accordingly we find ourselves to-day burdened with a responsibility which not only gives no adequate return to the British taxpayer, but constitutes a considerable military danger.
>
> In the years before the war we followed the wise policy of keeping the mountainous and barren country of Afghanistan—nowhere less than 400 miles across—and the deserts of Persia as a protection against an attack on our Indian frontier. By this means we could always rely upon being able to send out reinforcements and complete our other defensive arrangements before any serious military force coming from Russian Central Asia could arrive sufficiently near to be really dangerous. Following up the same idea, we consistently opposed railway developments south of Baghdad, so that no European Power might gain access to the Persian Gulf, but, as we ourselves have since provided the country with railways and other improved communications, the position has become entirely different. In referring to this subject a War Office publication states that: "Any great Military Power which is in a position to secure these railways could in a very short space of time secure access to the Persian Gulf. The work which we have performed would be of immense assistance to any such Power menacing our position in India, the safety of which consequently depends on our control of Mesopotamia and the Persian Gulf."
>
> This statement is perhaps open to argument, but in a sense it is true to say that our outpost line of Indian defence is no longer on the Indian frontier, and covered by a series of formidable natural obstacles, but is north of Mosul, and 800 miles from the sea. In the event of hostilities with Russia, especially if she were allied with Turkey, the safety of the troops located in those remote regions might cause us much anxiety, and we might be compelled to undertake military action there at a great disadvantage. For the time being the most likely cause of trouble lies with the local tribes inhabiting the districts alongside our long line of communications, and should it arise the reinforcement of the garrisons might be a difficult task. I mention these matters because most people condemn the Mesopotamian commitment on the ground of expense, but it is equally to be condemned on the ground of Imperial security. It should be remembered, too, that the pre-war Expeditionary Force of six divisions is not now available to meet emergencies either in Mesopotamia or elsewhere. It is nearly as dead as Queen Anne. Before the War we were able to send this force abroad, complete in every respect, in less than a fortnight. Nothing like this could be accomplished now. The "Army List" tries to make a brave show, but will hardly bear examination. The two Aldershot Divisions which used to have twenty battalions constantly under training now muster only ten; and out of a quota of twelve battalions each, the 3rd Division has but three and the 4th Division six. These observations are not intended to call into question the reductions recently made in the strength of the Army, great though they have been, but in order to emphasise the necessity for making corresponding reductions in the scope of our foreign policy. If the latter is allowed to exceed the military means available for enforcing it, sooner or later it will inevitably lead, as in the Near East a few weeks ago, to increased expenditure and distasteful humiliation, and it may entail the unnecessary sacrifice of valuable lives.

Morals from Lausanne.

The *New Statesman* of December 2 is scarcely optimistic about the progress of the Lausanne Conference. The Conference has gone wrong, it thinks, in its decision to allot Western Thrace to Greece; and it suggests that Bulgarian needs and aspirations should, for the sake of future peace, have been satisfied. It continues:—

> In Asia, where the problems take a rather different form, there is no less confusion of thought and aim. Apart from the question of the Straits, where, in fact, if not in name, it is ourselves and the Russians who are the protagonists, there are two direct issues between East and West. The Capitulations will have to go, or, at any rate, to be drastically revised. If the Angora fanatics who demand "Turkey for the Turks" determine presently to damage their country by making it too uncomfortable for foreigners, we shall have to put up with it—again in the interests of peace—until such time as they realise their error. On the other hand, Europe ought to be adamant on guarantees for the racial and religious minorities. We are not concerned to defend these minorities because they are Christians. Nor should we put it only on grounds of pity or of honour. There are still broader grounds. Peace and civilisation itself depend in no small degree on what happens to them, and if compulsory tolerance is an infraction of national sovereignty, it is unhappily a necessary infraction. It may, we hope, be also a salutary one; after tolerance has been practised compulsorily for a time, it may become an agreeable habit.

It concludes by examining the question of our withdrawal from Mesopotamia:—

> It is fairly certain that our withdrawal, even if the Turks could be prevented from coming in, would mean an end of peace in the country and an end to any prospect of its material development. On the other hand, it may well be that we cannot afford the price of staying, especially if the natives of Irak persevere in their objection to us and their indifference to material development. In that case, we shall go on grounds of pure expediency; only do not let us pretend that our going will be a triumph of morality over economic imperialism. There is nothing moral in a backward race clinging to its backwardness and preventing the production of wealth that the world needs. A good deal of rubbish is talked about the economic exploitation of Western Asia, and

Digitized by Google

oil especially is a text on which many sermons are preached. . . . But there is an odd delusion in the minds of some of our idealist critics that those doings constitute a reason for our leaving Mesopotamia. If we threw up our mandate, the oil would still be got—certainly we hope it would; for oil is wanted and there is nothing wicked in getting it; and it would probably, we may add, be got by the same people. And, finally, there is a still more odd delusion that a mandate in Irak or Palestine or anywhere else is only an ingenious device for protecting the oil-kings and other nefarious capitalists in their work of exploiting the mandated country. That is nonsense. It was not the idea of those who invented the mandate system; it is not the idea of those who administer it, or of ninety-nine out of a hundred of those who support it. The system is not perfect, but it is a good system, and, properly safeguarded, it may be the most effective antidote to economic imperialism.

Articles to Note.

"The Capitulations and Christian Privileges in Turkey," by H. Charles Woods: and "Wit and Wisdom from the Near East," by Zabelle C. Boyajian, in the *Contemporary Review* (December).

GRAVES IN EGYPT.

In connection with the unveiling of the Cross of Sacrifice in Cairo Cemetery on Armistice Day by Viscount Allenby, the following statement has been issued by the Imperial War Graves Commission:—There are nine war cemeteries in Egypt, namely: Cairo (1,928 graves), Chathy, Alexandria (2,220 graves), Hadra, Alexandria (1,703 graves), Ismailia (335 graves), Kantara (1,726 graves), Minia (81 graves), Port Said (582 graves), Suez (305 graves), and Tel-el-Kebir (71 graves). These cemeteries, of which the construction is now practically complete, were designed by Sir Robert Lorimer, who visited Egypt in 1920 and 1922 for the purpose. The general arrangement is the same as in France; each has its Cross of Sacrifice of the same type as that which has become familiar to the public since the King's visit to Terlincthun and other cemeteries in France, and the six largest have also the Great Stone of Remembrance. They also contain a Record House, and are enclosed by walls. The horticultural treatment is under the supervision of Mr. T. W. Brown, of the Ministry of Agriculture, Cairo. The individual headstones, of the same type as those in France, are now being erected at Ismailia and Tel-el-Kebir; those for the other cemeteries are all in the course of manufacture. Each grave will thus be separately marked, and the names of all those who lie in these cemeteries will be gathered together in the Cemetery Register, which will be published when full particulars have been received from the relatives.

BRITISH RELIEF EFFORT IN GREECE.

The British relief societies who are co-operating in the All-British Appeal for the relief of the refugees in Greece have so far been enabled by the public response to the Lord Mayor's appeal to feed only ten thousand children and ten thousand adults. The British relief work is administered by a unit of four British workers, and they represent a separate and entirely distinct action. Their work will be made known as widely as possible in Greece as British work; and arrangements have been made that the British kitchens shall fly the Union Jack. It is hoped that the British public, realising the extent of the tragedy of these refugees, will help the relief societies to extend their work by sending donations to the All-British Appeal, General Buildings, Aldwych, London, W.C.2.

PERSONAL AND GENERAL.

TO-DAY.

December 14 (New Style).
December 1 (Old Style).
Rabia II., 25, 1341 A.H. of the Moslem Calendar.
Kislev 24, 5683, of the Jewish Calendar.

Lady Waring will shortly leave Paris for Egypt.

The Earl of Lanesborough will spend part of the winter in Egypt.

Lady Ribblesdale and Lady Bateman are among the visitors expected shortly in Cairo.

The Crown Princess of Roumania, with Princess Irene of Greece, has arrived at Palermo for the winter.

Mrs. Henry Sturgis will shortly leave London to visit her daughter, Mrs. Malcolm Aird, in Egypt.

Sir Lee Stack, Governor-General of the Sudan, and Lady Lee Stack have returned to Khartoum from Cairo.

Mr. and Mrs. Arthur G. Soames have left Sheffield Park, Uckfield, for Ceylon. They will return next March. No letters are to be forwarded.

The marriage arranged between Major Hugh Poynton Radley, M.C., 72nd Punjabis, and Miss Ilma de Poellnitz Healey took place at the Brompton Oratory on December 6.

The Minister for the Kingdom of the Serbs, Croats, and Slovenes will hold a reception on December 17 at the Legation in honour of the birthday of King Alexander.

The promotion of Lieutenant-General Sir Walter Norris Congreve, V.C., who took charge of the Egyptian Expeditionary Force in October, 1919, to be General has been gazetted.

The marriage took place at All Saints', Cairo, on November 22, 1922, between Frederick J. Whittall, late of Ceylon, and Miss Alithea Leila Williamson, of Smyrna, and sister of Mr. J. W. Williamson, of Meadi.

A marriage has been arranged between Captain Rupert Ridley, M.B.E., Indian Army, younger son of Mr. and Mrs. W. E. Ridley, of Heathfield, Coulsdon, and Kathleen, younger daughter of Mrs. Bowen, of Gwynant, Purley.

The lecture on "Common Law and Usage in Roumania," by M. Titulesco, Roumanian Minister in London, which was to have been delivered on November 30 at King's College, has been postponed until after Christmas. A lecture by M. Mitrany last Thursday on "The Agrarian Position in Roumania" concluded the first series of public lectures on Roumanian affairs organised by M. Beza.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.
Founded in 1911 to study all questions of common interest to Great Britain and Persia.
Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1

Digitized by Google

A marriage is arranged, and will take place on January 15, between Mr. G. B. Geake, Temple House, Lyme Regis, and Mrs. J. P. Stockley, widow of Major J. P. Stockley, Indian Army, and elder daughter of Sir Reginald and Lady Acland.

An engagement is announced between Noel B. P. Shore, Indian Police, third son of Commander Lord Teignmouth, R.N., and Lady Teignmouth, of Mount Elton, Clevedon, Somerset, and Fairlie, daughter of Mr. Charles H. Wilkie, of Hazelbrae, Nairn.

The engagement is announced between W. P. R. Webster, of Ceylon, youngest son of John Webster, J.P., and Mrs. Webster, of Rosehill, Ballinacurra, Co. Cork, and Cecil Ann, eldest daughter of the late John Scott, of Rhodesia, and Mrs. Scott, of 17A, Stratford Road, W.8.

On Tuesday afternoon, at 20, Portman Square, Mr. Felix Valyi, as guest of the Near and Middle East Association, lectured on "Reform of Islam and Problem of Turkey." The meeting was held by kind permission of Lord Islington, and Lord Edward Gleichen presided over it.

The marriage was solemnised on December 6 at St. James's, Piccadilly, of Mr. William Edward David Allen, son of the late Mr. David Allen and of Mrs. David Allen, of Commonwood House, Chipperfield, Herts, with Lady Phyllis King, second daughter of the Earl and Countess of Lovelace.

In aid of the Near East refugees a cotillon dance will be given at Claridge's from 3 p.m. to 7 p.m., for children of all ages, on Friday, December 22. Tickets, including tea, 12s. 6d. each, may be obtained from the secretary at Claridge's Hotel, W.1, or from Miss Hypatia Rodocanachi (hon. secretary), 3, Park House, Cambridge Street, W.2.

A marriage has been arranged, and will shortly take place in Rangoon, between Kenneth Mackenzie MacDonald, agent Imperial Bank of India, Rangoon, son of Duncan MacDonald, Queen's Road, Jesmond, Newcastle-on-Tyne, and Enid Gladys, fourth daughter of the late W. J. Stacey (War Office) and the late Mrs. Stacey, of Worthing and Tonbridge.

Sir Henry Bax-Ironside, formerly British Minister to Switzerland, and Lady Bax-Ironside held a reception at the Ritz Hotel on December 7, when those present included the Roumanian Minister and Mme. Titulesco, the Minister of the Kingdom of Serbs, Croats, and Slovenes, the Esthonian Minister, Princess de Croy, Florence Lady Garvagh, Baroness Palmstierna, Sir Maurice de Bunsen, and Lady Hart.

There will be a meeting of the India Society at the French Institute, 3, Cromwell Gardens, at 8.30 p.m. on December 15, to hear M. Victor Golouleff lecture on "Indian Art in Indo-China." The chair will be taken by H.E. the French Ambassador. This lecture will be in continuation of the series commenced this year to show the extent of Indian influence in Asiatic art. Previous lecturers have been Prof. Strzygowski (Near East) and Prof. Vogel (Java). The concluding lecture will be delivered by Prof. Visser (Far East) early in the New Year. M. Victor Golouleff was closely associated with the Indo-Chinese Section at the Marseilles Exhibition, which, in the opinion of many, was the greatest attraction. He is coming over on special leave to deliver the lecture, and will then return direct to Hanoi.

APPOINTMENTS, Etc.

Mr. Arthur Ley has been appointed secretary to the Department of Industries, India, *vice* Mr. A. C. Chatterjee, who is acting as a temporary member of the Viceroy's Council.

The King has approved the appointment of Mr. William John Keith and Mr. Maung Kin to the Executive Council of the Governor of Burmah, to take effect on the inauguration of the new system of government in the Province early next year.

Ismet Pasha has furnished representatives of the American Board of Missions and Near East Relief Committee with assurances as to the future of the American educational and philanthropic institutions in Turkey, in the way of which, Ismet said, Turkey would place no hindrances.

Where to stay in the East

CAIRO

THE
CONTINENTAL - SAVOY
THE MOST UP-TO-DATE AND BEST SITUATED HOTEL IN CAIRO.

Entirely Renewed. Overlooking Ezbekieh Gardens. Opera Square. Famous Terraces. 400 Rooms. 200 Bathrooms. Cairo's Fashionable Grill-Room Restaurant. Daily Concerts. Weekly Dances. Open all the year round

MENA HOUSE HOTEL,
At the Foot of the Pyramids. The Ideal Hotel out of Town.

HELOUAN. HEALTH RESORT near CAIRO. Sulphur Baths & Thermal Establishment.

GRAND HOTEL, HELOUAN. Strictly First Class.

SUMMER PALACE HOTEL
RAMLEH (GLYMENOPOULO) ALEXANDRIA.
First-class family hotel. Grill, American Bar, Restaurant, Billiards. Open all the year round, and to non-residents.
SUMMER SEASON.
A First-Class Orchestra plays at tea and during dinner. Weekly Dances with Jazz Band, Special Motor Service. Bathing Huts on Glymenopoulo Beach. Best French Cuisine. Special Terms for Families.

NAJEM HOURY'S CYPRUS HOTELS COMPANY
OPEN ALL THE YEAR ROUND—
NIKOSIA—Cyprus Palace Hotel.
LIMASSOL—Olympus Hotel.
FAMAGUSTA—Savoy Hotel.
LARNACA—Majestic Hotel.
FOR SUMMER SEASON.
TROODOS—Olympus Hotel.
6,000 feet above sea level. Open from May till October. Perfect situation. French and English Cuisine. Moderate Terms. Excursions to Mount Troodos.
For Tickets and further Particulars, apply
NAJEM HOURY & SONS, Limassol, Cyprus.
Proprietors of "The Army and Navy Stores."
Branches—Polymedia, Troodos, Nikosia, Famagusta & Larnaca.
Head Offices and General Stores: LIMASSOL.
All arrangements for Transport, &c., are made by the above Firm.

THE IRAQ PALACE HOTEL
BASRAH CITY.
The most up-to-date and best situated hotel in Iraq. Overlooking the Strand. With every modern comfort, Bar, Restaurant.
Best Orchestra. Daily Concerts. Weekly Dance.

THE RULE OF THE STRAITS.

Subject to the all-important reservation that the extremists of Angora are not allowed to bring about the rejection of the decisions reached at Lausanne, there is every reason to be satisfied with the progress made at the Peace Conference. In some quarters it is contended that the progress is in reality of a retrogressive character, as it merely marks successive concessions made by the Allies to the Turks. A more dispassionate view might establish the fact that the concessions to the Turks had already been agreed upon at Mudania, and that the Conference has been successful not only in opposing a barrier to further Turkish demands, but also in convincing the Turkish delegation of the unreasonableness of any such demands. The spirit in which the Conference is carrying out its task has been well exemplified in the discussions on the future of the Straits; in regard to which virtual agreement would seem to have been reached, subject to the settlement of details. The underlying principle of the new proposals is that enunciated in THE NEAR EAST seven weeks ago—that "the so-called freedom of the Straits, however that phrase might be interpreted, could only be maintained in agreement with Turkey." The Treaty of Sèvres was concerned merely with the elimination of Turkey in connection with any regulations for the Straits, and in support of this aim it went so far as to commit the Allied Powers to the permanent maintenance of military and air forces on the spot, if it were considered advisable, "to prevent any action being taken or prepared which might directly or indirectly prejudice the freedom of the Straits." The Straits were to be open both in peace and war, regardless of whether Turkey was neutral or a belligerent. Under the Allied proposals laid before the Lausanne Conference the geographical position of Turkey in relation to the waterway is recognised, and in the place of the unworkable clauses in the Sèvres document an attempt is made, with the essential Turkish co-operation, to legislate for all possible eventualities. Thus it is stipulated that the Straits are to be open to all merchantmen by day and night in peace and in any war in which Turkey is neutral; when Turkey is a belligerent the Straits are to be open to all neutral merchantmen, subject to the Turkish right of search; in time of peace the Straits are to be open to all warships, subject to a variety of conditions, one of which is that at no time should any one Power send into the Black Sea a naval force superior in strength to that maintained there at the time by any riparian State; in time of war in which Turkey is neutral warships are still to have right of passage, but certain other restrictions will be applied to belligerent warships; in time of war in which Turkey is a belligerent the warships of neutral Powers shall still have free right of passage; and, finally, to ensure this freedom of passage, certain zones are to be demilitarised and an International Commission, under the permanent presidency of the Turkish delegate, is to be set up to control the Straits.

If these proposals become the future Rule of the Straits, it will be noticed that Great Britain merges her own interests in what may be regarded as the general interests of the world at large. The pre-war rule was based on the fact that Great Britain considered the advantage of having the Russian Black Sea fleet debarred from the Mediterranean as outweighing any disadvantages attaching to the Black Sea becoming a Russian lake. Both Roumania and Bulgaria are opposed to a course that plays in this way into Russia's hands, and the United States Government has identified itself with the same policy, on the ground that its naval forces, which should be "agents of preservation, as well as of destruction, and could do much to maintain peace," must be able to pursue their peaceful errand wherever American citizens and merchantmen may go. There can be no doubt that the Lausanne solution of the Straits problem is based on the greatest good of the greatest number of States. Under the old rule Great Britain could regard herself as a special beneficiary, while Tsarist Russia chose to discover in it only disabilities for herself. The Soviet *régime*, reverting to an earlier policy when Russia was engaged in consolidating her power, would prefer to have the Black Sea a Russian lake, with Turkey guarding the entrance in Russia's interest, in order that Bolshevism may be free to pursue its activities in the East with as little interference as possible. In the future, if war should break out between Great Britain and Russia, the latter, on the strength of the proximity of her naval bases, would find it easier to block the mouth of the Bosphorus than Britain would to block the exit from the Dardanelles. As for the other riparian States of the Black Sea, they are naturally relieved, Russia being to-day the world's *bête noire*, to think that they will not be cut off from naval assistance from allies.

In his handling of the problem of the Straits Ismet Pasha has enhanced the good opinion that he had previously created at the Conference. On this particular subject his task was simplified by the fact that at no time has the Turkish view of the question been fundamentally opposed to the real interests of Great Britain and her Allies. As soon as the problem was taken out of the hands of those who drew up the late British Government's manifesto of September 16, and entrusted to the Foreign Office, a saner view of British interests prevailed, and the right course of bringing British and Turkish policy on this matter of the Straits into line has been brilliantly carried out by Lord Curzon. Consequently, the Turkish comments on the Allies' proposals, in spite of the presence of the Russian delegates, have been moderate and by no means merely destructive. Ismet Pasha pointed out, it is true, that demilitarisation of the Straits zone offered a temptation to any belligerent to get his blow in first by the occupation of the waterway, and for this reason he would like to see introduced a guarantee which would secure the Straits and the Sea of Marmora against surprise by land or sea; but he accepted the principle of demilitarisation. Of the seven points that he raised in his reply, Lord Curzon was able to suggest that three should be referred to a friendly conversation between Turkish and Allied experts, and he seemed to hold out the prospect of the Turkish request in the case of two others being met by subsequent agreement. On one point only did he summarily reject Ismet Pasha's contention, and refuse to agree to his proposal regarding the islands outside the Dardanelles. Thus, unless Angora obstructs, the future of the Straits is not likely to prove a stumbling-block in the final settlement of the Near East.

THE PORTRAIT OF A TURK.

By JOHN H. BASHAN.

His photograph is before me as I write, the picture of a broad, stocky man in an old Norfolk shooting jacket. I remember that suit well: it is dark, not black, but dark enough to make any other colour inappropriate, and the trousers are creased horizontally round the legs, showing the outline of the high waterproof boots beneath. Across his knees, his hands grasping it in a position that would bring it to the shoulder in one motion, is a rifle, and, as the coat hangs open, I can see the double row of cartridges around his middle and the butt of a large automatic. Perched on the chair behind him, with one arm around his shoulders and her head against his, is a little girl with bobbed hair, pretty, English, about six years old. This photo was taken in 1919 during a summer holiday.

There is directness in those stern, level eyes, directness combined with strength and lack of fear, and this is typical of a man who had a sense of good government rare amongst any nation. "If the Padishah cannot spare men to keep order in my district," he had said during the troubled days of war, "I can do it for him." And so, over a considerable area he held absolute sway, and for mile after mile there was a peace and security that would not have disgraced England. In Asia Minor it was an incomparable miracle. If a horse or a sheep were stolen, he himself made good the loss on the spot, and he himself would hunt down the thief and mete out justice—the quick justice of a people very near to the rugged roughness of their own hills, and soon these crimes ceased.

As he governed so did he protect, with equity and authority. There were Christians who found safety and protection under his roof, as well as people of his own race and religion, and there is on record at least one instance of this protection being given under immediate and present danger from many rifles. All in all, however, he found little gratitude and many enemies.

One man whom he protected, whom he kept as a guest in his own house for some time, will serve as an example. Riding home one night with a friend, he was met by a sudden fusillade. Both men dropped from their horses, but one only began to return the fire. Presently his enemies retired, for he is an excellent shot and he had found good cover. His friend was dead. The only clue that the murderers left behind was a snuff-box—the snuff-box of the man who had been, until a little time before, a guest under his roof. A few days later he overtook the owner of the snuff-box, wounded, in the hills. The man admitted his participation in the ambush, and then heard judgment pronounced. "For attempting to kill me after you had eaten my salt I can forgive you; but for killing my friend there can be no forgiveness." He cut the man's throat.

He was a delightful, a supreme host. With him hospitality was a personal care. Waking in the early morning, one would discover him renewing the *mangal* in one's room. Always there were horses to ride. There were fish to be caught (one pool, just below a waterfall, might have been taken direct from Paradise). There was shooting, and, did you need them, there were beaters and dogs for pig—pig shot from the ground, and not from the protection of a boulder or a tree, as is generally the case in the Balkans. Now a wounded pig turns on its pursuers, and, if it is not stopped quickly, can rip open a man's leg from ankle to groin in one slashing blow (it happened one day); yet there was one old sportsman who always joined in, armed with the father of all shot-guns, and he used solemnly to endeavour to irritate every pig he saw with No. 5 shot. I admired him, but it put too long odds on the pig for imitation.

Then in the evenings there was the food. In those days one used to be really hungry, and, when once one is used to it, there are few better ways of staying one's hunger than a Turkish dinner. Incidentally, although it is forbidden to Moslems, the flesh of an Anatolian wild pig is the best meat I have ever tasted, and the hams are beyond all praise.

In the same way as one's comfort and entertainment were looked after, so was one's safety guarded, unobtrusively, but with no room for mishap. With a guest whose shooting ability was unproved there were always, unknown and unseen, a couple of men with guns ready in case of accidents; just as later, when the whole country became disturbed, one could be fairly certain that one was never out of the protection of two or three hidden rifles.

This Turk had an only son (a sure way of tempting Fate), who, if he held his father in respectful awe, was the centre of the elder man's life. It so happened, a year after the time of the photograph, that the father had arranged for two of his horses to take part in a race meeting some fifty or sixty miles away, and comparatively large sums of money had been staked by some of his acquaintances. When, however, the day came for him to leave with the animals, affairs connected with the peace of his district—for he was now recognised by the Government in Stamboul—rendered his presence elsewhere imperative. To him it was obvious that his duty to the Padishah came first, but he also considered that he owed a duty to those who had staked money on his horses. To complicate matters further, he knew that certain of his unfriends would certainly have arranged to ambush the party on the way to the races. The only solution to the difficulty that he could find was to send his son in charge of the horses, and this he did. His enemies were preparing for a cunning, experienced fighter; the son was a young man and comparatively inexpert.

Some hours after the party left there was rifle firing, silence, and, at the end of two days, still no news. Then the father had to come to Constantinople, and, on the first evening, we kept him for dinner.

It was not a meal that I shall forget, for, in our opinion, his son was most certainly dead. I never asked how the others felt, but it seemed to me that we were, one and all of us, suffering from that flatness of mind that can only be compared with a piece of waste ground littered with rubbish and old tins—a thousand objects to catch the attention, but every one of them worthless, unfit to be brought into the light of day.

Out of all that litter of false beginnings and self-consciousness that marked the early part of the evening I can remember only one incident. A few days before, three of us returning from the theatre had encountered a Turkish woman in an advanced state of drunkenness. It was not the first occasion that this had happened, although in 1914 it would have been unthinkable; and some question about the wine led to its being mentioned. Then someone mentioned American prohibition. "Ah," said our guest, "over there they are all believers now, but here—" He left the sentence unfinished.

We laughed, but, as we laughed, I could feel the hair rising on the back of my head. It was

Digitized by Google

one of those moments when one's chair seems poised on the brink of eternity, when there is neither past nor future, life nor death.

The Fates would punish us for that laugh—I was sure of it—and almost immediately the avoided subject arose.

Awkwardly, we said what we could, but, clear and sweeping away all clouds, came the reply: "I hope that they have killed him, so that they may make me angry."

A few days later we heard that his son was safe, but that reply will live in my mind always. I had sat at the same table with a man.

THE CARAVANSERAI.

An Englishman who formerly lived in Smyrna, but was fortunate enough to leave the city before the recent Greek evacuation, tells an illuminating story of the way in which the old-fashioned Turk regarded the Greeks. "Yes, *effendi*," said a Turkish landowner, in discussing the Greeks with this Englishman, "it is true that the Greeks are very tricky and cause our Government a lot of trouble. But"—with a slow smile—"they have their uses, too. If a Turk has an apple tree, it bears, maybe, three apples; but if he employs a Greek to look after it for him it will bear eight apples. True, the Greek will steal three of them, but the Turk gets five. I know of what I speak, *effendi*, and I tell you that the Greeks have their points." And the philosopher turned to his *narghileh* once more.

***

I observe that the students of twelve Cairo schools ceased work on Sunday, "as a protest against the detention of Zaghloul Pasha at Gibraltar." Youth to-day—and in Egypt—appears to be very much more enterprising than it was in my young days, and I am wondering what the masters of the twelve schools affected think of these "strikes." In my student days the "striking" would not have been done by the students. We had a painful ceremony known as "walking into" the Head's lobby, where the Head in turn "walked into" us—with the cane. I fancy a little of that treatment might cool the Egyptian students' ardour for Zaghloulism.

***

Lord Carnarvon's own account of his wonderful find in the Valley of the Kings stirred me as none of the earlier descriptions had done. Of course, he wrote with first-hand knowledge, and with an enthusiasm whetted by years of patient waiting and working; and without any straining after effect he gave an account that put to shame many of the professional Egypt-treasure-hunt-authors' efforts. What a moment that must have been when the excavators first looked into the store-chamber and saw what looked like bars of gold; and again when, the observation hole having been enlarged, Mr. Howard Carter scrambled through it, and, by candlelight, inspected the find! Such triumphs come to few "diggers": but if ever one was merited it is the one in question. For Lord Carnarvon and his assistant have not, like some other explorers, trusted to luck, but have steadily worked to justify the faith that was in them. And they have triumphed!

CORSAIR.

Two serious earthquakes are reported to have occurred at Tiflis on December 4.

Ghaffer Khan, Persian Minister to Sweden, has been recalled to the Foreign Office at Teheran.

A message from Peshawar states that the ex-Emir of Bokhara is on a State visit to Jellalabad.

The Governor of Bihar and Orissa, Sir Henry Wheeler, unveiled on Armistice Day, at Dinapur, India, a memorial to the men of the 1-9 Battalion the Middlesex Regiment, who fell in the war in Mesopotamia and India while the battalion was on the Indian Establishment, 1914-1919.

THE ARAB REVOLT IN IRAQ, 1920.

Recently, at the Royal United Service Institution, Lieutenant-General Sir Aylmer Haldane lectured on the subject of "The Post-War Arab Rising in Mesopotamia." Mr. Churchill was to have presided, but at the last moment Viscount Peel, Secretary of State for India, was called upon to take his place. The General described clearly the obstacles with which his force had to contend. When British troops were being reduced in Mesopotamia the Arabs, he said, got it into their heads that we were being forced out. Propaganda and gentle treatment assisted this. The Arabs themselves acknowledge that they can only be governed by force. They bear no ill-will when defeated. General Haldane drew a dreary picture of the country. When the rebellion broke out he had only 500 British and less than 3,000 Indian troops. He had a few aeroplanes, and if he had had more he thought he could have stifled the insurrection. In the course of his remarks the General ascribed to Mr. Churchill much of the credit for the success of his operations.

After the lecture, General Sir E. Barrow spoke of the public demand for reductions, which were sometimes too hastily made, and in this connection talked about the ill-informed Press and ignorant public opinion. He said this sort of clamour was perhaps one of the penalties we had to pay for democratic control. The present demand for the abandonment of Mesopotamia seemed to overlook the fact that compliance would involve a crime, and also the disregard of a debt of honour which was involved in our acceptance of a mandate for that country. A repetition of what had happened in Cilicia would be a poor return for all the lives and money we had expended in Mesopotamia.

THE C.M.S. AND THE NEAR EAST.

A strenuous time in the Near East to meet the new conditions of Government in Egypt and Palestine is expected by the Church Missionary Society. In Egypt Moslem propaganda is a growing force, and the problem of how Christians can take effective part in the national life is not without difficulty. For Palestine the policy is to make the Anglican Church a great spiritualising power, while gathering Moslem, Jew, and Christian into national unity. With Mesopotamia the Society, to the regret of many, has now nothing to do.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K., Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

NOTES AND NEWS.

London, Tuesday Morning.

The Anglo-Persian.

At the meeting of the Anglo-Persian Oil Company Sir Charles Greenway reviewed in detail the immense and ever-growing activities of this great concern, and was able to give a most encouraging picture of the position and prospects of the company. He pointed out that the production of oil, which for 1921-22 amounted to 2,327,221 tons, as compared with 1,743,557 tons, was estimated at 2,900,000 tons for the current year, and that the only limits to the ability of their producing companies to supply them with crude were, so far as they could judge, the capacity of their pipe lines and the extent of their refineries. The programme that the company has been working on has been to bring these facilities to a capacity of 5,000,000 tons. The pipe lines and pumping stations have been increased to the required extent, but the company's refinery capacity, owing to delays, due to strikes and other unavoidable causes, has not yet reached this figure. The refinery capacity is now about 3,100,000 tons; by next June it should be 4,100,000 tons; and by the end of next year it is expected that 4,500,000 tons will be reached, at which figure Sir Charles stated that they would probably rest for the time being until they were in a better position to judge where further refineries could be erected to the best advantage. Sir Charles did not hold out any hopes of an increase in the dividend for the current year, but he remarked that in the following year, when their programme of extensions would be nearer completion, and as they would then be in a position to deal with a much larger volume of oil, their profits should, provided present prices were maintained, show a substantial increase.

Position in Persia.

Sir Charles devoted considerable attention to the company's relations with the Persian Government. He pointed out that during the past year a very active anti-British propaganda, emanating, it was believed, largely from Bolshevist sources, had been carried on in Northern Persia, and while chiefly based upon the Agreement, had been directed against the company and other British institutions. Sir Charles declared that he did not believe that this propaganda had the support of any responsible or well-informed Persians, and he went on to emphasise the great part played by the company in the economic and financial situation of the country. As regards the representation that the Persian Government did not receive a proper proportion of the profits made by the company, Sir Charles showed very clearly by a comparison with the position in other countries that the Persian Government was doing at least as well as the Government of any other oil-producing country in the world. "Apart from this direct gain to her revenue which Persia is deriving from our enterprise," added Sir Charles, "she is, however, gaining numerous indirect advantages. For example, we are spending in Persia itself no less than about £1,500,000 per annum in payment for Persian labour, supplies of local material, foodstuffs, etc. Of this sum about £1,100,000 per annum is spent in payment for labour alone, this expenditure now giving hitherto unknown employment to as many as 20,000 Persians. No such colossal revenue producing or labour employing industry has ever before been known in the country, and I have no hesitation in saying that if the exploitation of the oilfields of Southern Persia had been placed in other hands, or had been distributed among a number of individuals or companies, the development of these fields would have been much slower and the income derived therefrom by Persia would have been nothing like so great."

The Roumanian Oil Agreement.

The agreement between the Phœnix Oil and Transport Company and the Roumanian Consolidated Oilfields was, after all, destined not to go through as it stood. It was, as I have pointed out, a perfectly satisfactory arrangement from the point of view of both companies in the existing circumstances, but the position was altered by an eleventh-hour development in regard to the compensation claimed by the Roumanian Consolidated in respect of the destruction of the companies' properties, and the meeting held on December 5 to consider the agreement was adjourned for a week, when the board, Sir Watson Rutherford stated, hoped to place before the debenture-holders an amended proposal which would ensure their getting par value for their debentures. It is believed that the compensation agreed to by the Roumanian, French, and British Governments is not under £500,000, but it is understood that the form it will take has not yet been arranged.

The New Offer.

Details of the new offer were forthcoming at the week-end. The original proposal was that Roumanian Consolidated debenture-holders should receive 300 Phœnix shares for every £400 of debentures. While this ratio of exchange is unaltered, it is provided that the debenture-holders shall receive in cash an amount equal to two months' interest at 10 per cent. and 2s. 8d. cash for each fully-paid Phœnix share. This offer is most favourable to the debenture-holders, and it is obvious that they and the ordinary shareholders have everything to gain by the acceptance of the Phœnix's offer. Of the importance of the amalgamation of the two companies there can be no question. Linked together, they will form one of the strongest concerns in the Roumanian oil industry, and one with infinite possibilities.

BANK OF ROUMANIA LIMITED

(FOUNDED 1866).

Smyrna Fruit Position.

The Smyrna fruit position at the present time is the subject of an exhaustive report by Messrs. C. J. Giraud and Co., which will be found elsewhere in these columns. It was inevitable that events in Asia Minor should leave their mark on the fruit industry, and, as the report shows, the damage done has been severe. Clearly, however, it might have been very much worse than is the case, and it is very satisfactory that the pessimistic views entertained in some quarters have not been borne out. But the injury done is quite serious enough, and for some time the industry will be bound to feel its effects. As regards sultanas, the situation is that up to the end of November the sales amounted to 84,955 bags, as compared with 144,915 bags in 1921, while the stock unsold—estimating that in the growers' hands at 40,000-45,000 bags—is 45,000-50,000 bags. The amount of fruit lost is put at 15,000 tons, a figure which confirms an earlier estimate of the firm. The damage to figs has also been pronounced, an anticipated production of about 22,000 tons being reduced to about 16,000 tons. More serious, however, than the actual loss of part of the season's crop, and the fact that a considerable portion of the fruit has been damaged, is the effect on production next season, which in the best circumstances cannot fail to show a marked decrease.

The New Regime at Smyrna.

Not the least interesting part of the report is the section devoted to the general situation in Smyrna, and the picture given is certainly much more favourable than many people would expect. More settled conditions, it is pointed out, are succeeding the chaos of the early period of Nationalist rule; there is a revival of trade, and communications with the interior are improving. Of special interest is the tribute paid to the administration of the Custom House. "Its Director has placed the greatest facilities at the disposal of the trade, and has spared no effort to stimulate commercial movement and to remove much of the red-tape and clogging formalities which were characteristic of the Customs in the past." It is sincerely to be hoped that developments at Smyrna may be taken as an indication of the policy that will be universally pursued by the Government after the settlement, for it is only by the most careful measures for the encouragement of trade and commerce (which, it must be emphasised, have been, and for the most part are, bound to remain in the hands of foreign citizens) that Turkey will regain prosperity. There are not wanting those who view the future with some disquiet as a result of some recent developments of Turkish policy, and one looks to the Nationalists to prove by their actions that there is no occasion for misgiving. They have only to proceed as they are now reported to be doing at Smyrna to remove all uncertainty.

COMMENTATOR.

The transfer books of the Dooars Tea Co., Ltd., will be closed until December 23.

The transfer books of the Empire of India and Ceylon Tea Co. will be closed until December 23.

The death has occurred of Mr. William Henry Jeffries, who for many years has been accountant on the staff of the London Chamber of Commerce.

The oil output of the Anglo-Egyptian Oilfields for the week ended December 8 amounted to:—Gemsah, 52 tons (previous week 44 tons); and Hurghada, 3,490 tons (against 3,631 tons).

Sir William Joynson-Hicks, Bart., M.P., will be entertained at a luncheon by the Royal Colonial Institute on his appointment as Parliamentary Secretary of the Overseas Trade Department at the Edward VII. Rooms, Hotel Victoria, on Wednesday, December 20. Sir Godfrey Lagden, K.C.M.G., Chairman of the Council, will preside.

AGRICULTURE IN ROUMANIA.

M. D. Mitrany, now on the editorial staff of the Carnegie Endowment (Division of Economics and History), spoke on December 7 at King's College on the "Agrarian Reform in Roumania," when those present included the Roumanian Minister, M. Beza, and M. Lupu, leader of the Peasant Party in Roumania.

M. Mitrany began by pointing out that, although agrarian in the nature of its people and products, Eastern Europe hitherto has never revealed that character in its organisation. But now the agrarian reforms had transferred in one day wealth and power to the peasants, and the effect was bound to show itself in the social organisation and political outlook of the various countries concerned.

In a way, the Roumanian reform was unique. In Russia and Bulgaria the change had come about through political revolutions; again, the Baltic States, Poland, Czecho-Slovakia have come into existence through national revolutions. But old Roumania suffered neither a political nor a national revolution, and yet the Roumanian moral reform has been one of the most drastic. It transformed overnight a country of immense *latifundia* into a country of small peasant owners. M. Mitrany gave various data to show the very unsatisfactory state of the Roumanian land system before the war, and then described the main provisions of the agrarian reform. What, however, he thought was of special interest to the distant onlooker was the effect of the reform.

It was not possible to make any definite statement on the consequences of so formidable a change, but certain conjectures were permissible. The one effect which almost all writers on the subject foretold was a fall in production. But in the opinion of the lecturer there were many factors that would counteract the inevitable drawback of the change from large-scale production to small farming. A larger area of the soil was likely to be cultivated, and that area would be better cultivated, both because of the greater interest of the peasant in his own piece of land, and of the obvious interest of the former owners to make good their loss by adopting more intensive methods of production on the land left to them. At the worst, and other things being equal, production would return to its pre-war level.

The other general assumption was that a fall in agricultural production would diminish the purchasing power of the country, and thus react unfavourably on the import of manufactures. But here again one had to take into account the rise in the standard of life of the peasants, providing an enormous new outlet for manufactured goods; and also the probable opposition of the peasants to the protectionist policy adopted hitherto by most of the Eastern countries.

M. Mitrany also pointed out that everywhere the peasant parties are standing on a Liberal platform. Their influence on general affairs was likely to produce in Eastern Europe a period of peaceful, active stability.

M. Beza proposed a vote of thanks to M. D. Mitrany for his lecture, and said: "Some people do not realise the importance of these lectures delivered by the Roumanian Department at King's College, but there will come a time when they will be looked upon as a source of enlightenment on Roumania and Roumanian culture."

Five lectures were arranged by M. Beza for this term at King's College on Roumania. The Roumanian Minister has postponed his lecture until after Christmas.

Mr. J. Jordanopulo, who for the past eight years has occupied the position of sub-manager, has been appointed manager of the London office of the Bank of Athens.

Commerce and Industry.

(Reports from Our Own Correspondents.)

GREECE.

Athens, December 2.

Production of Salt.

In spite of the many difficulties owing to the shortage of labour due to the long mobilisation the production of the salt pits in Greece has amounted this year to 75,000,000 kilogrammes. The five large salt pits at Anavissos, Kitro, St. Maura, Missolonghi, and Polichnitos have produced 52,000,000 kilogrammes, thus providing sufficient quantities of the commodity for the requirements of the Ministry of National Economy. Not only will Greece, therefore, not import salt from abroad, but it is hoped that she will very soon be in a position to export it to the other Balkan States.

ROUMANIA.

Bucharest, December 1.

Roumania's American Obligations.

The Roumanian Commission which went to Washington a few weeks ago for the purpose of reaching an arrangement with regard to the Roumanian State's debts in America, is now on its return journey. No definite settlement was arrived at, as the Commission was apparently not empowered to take a final decision either to fund the debt or to fix a date for the payment of interest thereon.

The State and the National Bank.

It is believed in knowledgeable circles that the State will next year be in a position to pay 6,000 million lei off its debt to the National Bank. This payment, however, will be made purposely by degrees, in order to avoid a sudden rise of the leu. The above sum will accrue from the further gold which will be received from the liquidation of the Austro-Hungarian Bank, from the amounts which will be collected from the peasants in payment of lands allotted to them, and from the State revenues, which will be considerably increased, thanks to the new taxation.

Export of Horses.

Over and over again the respective authorities have been pressed by Transylvanian dealers to allow the export of invalid horses to countries where horse-meat consumption has by necessity become a normal occurrence. Although such an export is of benefit to the country—as horseflesh has no market in this country, for even the poorest class are reluctant to partake of such food—the authorities at first hesitated to allow this export for fear that, besides invalid horses, sound horses fit for work might also be smuggled through. In order satisfactorily to solve this question it has now been decided that invalid horses and asses are to be slaughtered in the country under official supervision and then the meat can be exported under a tax of 20 per cent. *ad valorem*, plus a 2 per cent. commission. To judge by the increasing demand for export permits, a very great need for this commodity seems to exist over the boundary. Austria, Germany, and Czecho-Slovakia figure among the keenest bidders for it.

A German Delegation.

A German delegation, headed by Herr Dernburg, former Minister of the Colonies, is due to arrive here to-day. The object of the delegation's visit is to reach an agreement with the Roumanian Government regarding the various financial and economic questions which have arisen between the two countries since the war. The main questions are: (1) The gold deposit which Roumania had with the Reichsbank before the war. (2) The remainder of the grain deliveries which Roumania had to carry out before the war; and (3) the redemption of the banknotes issued by the Germans during the occupation.

YUGOSLAVIA.

Belgrade, December 6.

Miscellaneous.

Owing to Saints' days, holidays, and an intervening Sunday, the bourse has been closed for four days. The dinar was quoted on the bourse on December 6 at 328 for the £ sterling. This is the nominal quotation. The tone is weak.

The monetary stringency continues, and high rates of interest are being paid for loans. There is, however, a great deal of inherent stability in the country in the shape of assets, which, although not liquid, are of high potential value.

The Chamber of Commerce of Belgrade has made a very strong protest to the Ministry of Finance on the subject of the restrictions on trade, threatening the resignation of the members of the section which has been co-operating with the Ministry of Finance.

NEW COMPANIES.

Macedonian Oil Syndicate.

The Macedonian Oil Syndicate, Ltd., has been registered as a private company with a nominal capital of £57,500, in 50,000 "A" shares of £1 each and 50,000 "B" and 100,000 "C" shares of 1s. each.

Objects:—To acquire any petroleum or oil-bearing lands in any part of the world and to adopt an agreement with the D'Arcy Exploration Company. The subscribers (each with one "C" share of 1s.) are two clerks, who are to appoint the first directors. Registered office, Britannic House, 23, Great Winchester Street, E.C.

Kassala Cotton.

The Kassala Cotton Company, Ltd., was registered on November 30 with a nominal capital of £300,000, in 250,000 six per cent. non-cumulative £1 preference shares and 1,000,000 1s. ordinary. Objects: To acquire concessions over lands, water, and other rights in the Sudan, Egypt, or elsewhere in Africa, and to carry on the business of cultivators of cotton, etc. The subscribers (each with one share) are:—L. Beven, 1, London Wall Buildings, E.C., secretary to public company; C. Bush, 21, Ferncroft Avenue, Hampstead, N.W., private secretary; and five clerks. The company is to create forthwith £500,000 six per cent. debentures.

Stock and Share Markets.

WEAKNESS PREVAILS.

Oils Lower.

(From Our Own Correspondent.)

London, Tuesday Morning.

Taken all round it has been an unsatisfactory week, and yesterday the markets—or most of them—closed on a distinctly dull note. Gilt-edged have suffered a decided setback, which is attributable partly to the trade improvement which inevitably leads to realisations to provide funds, partly to the Swiss Referendum on the capital levy proposal, the result of which has been to restore confidence in the position in that country, and has thus induced those who had transferred capital out of the country to recall it, and partly to the general political situation, which has no doubt been the principal influence at work. Events at Lausanne have not caused any particular disquiet, but much uncertainty is felt as to the outcome of the London Conference, and until the Reparations question is out of the way for good there is not likely to be any very definite improvement. With that settled and a happy issue of the negotiations at Lausanne, things will speedily take on a different appearance, for trade needs only a little encouragement to develop very considerably, and that, of course, means active markets.

Rubbers Dull.

The price of rubber has been well maintained, but the same cannot be said for the share quotations, which have fluctuated considerably, and at the time of writing are well below last week's levels. The explanation of this is partly to be found in a certain amount of profit-taking, but the main cause has been the failure of the public to come in up to the present, with the result that quotations have perforce eased off somewhat. I dealt with the attitude of the public last week, and I will only now reiterate my advice that the time to buy is certainly now, for the shares have not responded adequately to the upward trend of the raw commodity, and they are certainly unlikely to stand much, if at all, lower than they are at present. To the shares that I have already recommended as a medium for investment I would add Bukit Selangor and Straits Bertram, but every good share in the list should ultimately be safe for a fair rise.

Gilt-Edged Lower.

As I have already pointed out, Gilt-edged have been a poor market during the week. Consols are 55⅝, at which they are ¾ down, while War Loan Fives at 99¼ have shed 7-16. The Conversion Loan is 74 13-16, a drop of 15-16, while Fundings at 85⅝ are also 15-16 down. Indian stocks have kept fairly steady. The 7 per cent. stock at 111 is unchanged, the 5½ per cent. stock is 100¼, the 3½ per cent. stock at 63½xd. is about the same, while the 3 per cent. stock is 54½xd.

The Foreign group has been notably dull, principally as a result of the fluctuations of the exchanges. French stocks have been fairly steady. War Loan Fives at 29 are unchanged, while the 4 per cents. remain at 23. German 3 per cents. are unchanged at 11-16, while the 3½ per cents. are 5s., and the 4 per cents. 6s. At ruling prices both the last two must be regarded as better purchases than the 3½ per cents. for those who like this class of speculation in the hope of a considerable return at some very distant date. Italian Rentes have firmed up ½ to 22½.

In Near Eastern securities Turkish Unified have gained a point at 26½, while Greek Monopolies are unchanged at 23. Czecho-Slovak 8 per cents. are ½ down at 91½. Russians have been steady. The 4 per Cents. are unchanged at 6, the 4½ per cents. remain at 6½, while the 5 per cents. are the same at 9. In South Americans Brazilian securities have been a feature, while there has been some demand for Argentine issues.

Industrials Stagnant.

There has been very little doing in the Industrial group. Business has been conspicuous by its absence, and for the most part price changes have been insignificant, though a few specialities have been in request.

Textiles have been quiet. Coats are unchanged at 65s., while Courtaulds are 3d. up at 58s. 6d. Listers have firmed up 3d. to 28s. Tobaccos have eased off somewhat after the recent rise. Bats at 88s. 9d. are 2s. 3d. down while Imperial Tobaccos at 72s. 9d. are 1s. 3d. lower. Iron and Steel shares are about the same. Vickers are 3d. up at 13s. 9d., Armstrongs have gained 1s. 3d. at 18s. 6d., Dorman Longs are unchanged at 18s. 3d., while Guest Keen's are 9d. up at 37s. 3d. Dunlop Rubbers are 6d. lower at 9s. 6d.

In the Indian railway group Assam Bengal at 54½ have gained ⅝. Bengal and North-Western are 2 up at 137. Bengal Nagpur are 1½ down at 94, Bombay Baroda have shed ½ at 93, Burma are a point up at 104, Delhi Umballa are ½ down at 186, while Madras and Southern Mahratta at 105⅜ have gained ⅜.

The shipping group has been very steady. P. and O. deferred are unchanged at 325, Cunards are 1s. down at 22s.. Furness Withys at 34s. 3d. are 9s. 3d. up, while Khedivial Mails are unchanged at 3¼xd.

Oils Weak.

The week has been a rather dull one in the Oil group, which developed weakness in sections. Anglo-Persians have again declined, and at 4⅛ are ⅜ down. I imagine it will not be long before they are moving up again, for the position of the company is so excellent that it is obvious that the present price is below their real value based on future prospects. Burmahs at 4 15-16 are ⅛ down. Mexican Eagles are 2 9-32, at which they are 3-32 lower. Shell Transport at 3 15-16 are 1-32 down, while Lobitos are unchanged at 5⅜. In the Trinidad group, Apex at 2 1-32 are 1-32 down, Centrals at 1 7-16 are 1-16 lower, while Leaseholds are 1-16 down at 1 1-16.

The Russian group has been variable. Spies are 3d. up at 5s. 3d., Anglo-Maikop are about the same at 2s. 8½d., North Caucasians are 1-32 up at ⅝, Ural Caspians are unchanged at 19-32, while Uroz are 9d. down at 7s.

Among Egyptians, Anglo-Egyptian B are 1 9-32, at which they are 1.32 down. In the Roumanian group Phœnix are 9d. down at 23s. 6d., while Roumanian Consolidated have firmed up on the improved position to 12s., a gain of 9d. Dacia Romanos are 2s. down at 13s. Steaua Romanos are 1½d. lower at 8s. 10½d., while Hamilton's Oil Concessions are 4½d. down at 1s. 4½d.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on December 1 were as follows:—Agricultural Bank of Egypt, £5⅜; Alexandria Water Company, Ltd., £9 7-16; Anglo-American Nile Steam, £3 9-32, Associated Cotton Ginners, £1 3-32; Banque d'Orient, 31 fr.; Behera Ord., £E7 9-16; Brasseries d'Egypte, 53 fr.; Building Lands of Egypt, £1 1-32; Cassi di Sconto Priv., 98½ fr.; Comptoir Fin. et Com. d'Egypte, £1 19-32; Consolidated Lands, £T5½; Credit Foncier Fondateur, 1045 fr.; Credit Foncier Act, 721½ fr.; Credit Foncier 1886 Oblig., 318½ fr; Eaux du Caire, Capital, 87 fr.; Eaux du Caire Jouissance, 118 fr.; Egypt and Levant, S.S. Ord., 29s.; Egyptian Delta Light Railways, £4 13-16; Filature National d'Egypt, £10½; Immeubles d'Egypt Soc. an des., £6¾; Khedivial Mail S.S. Ord., 80s.; Khedivial Mail S.S. Company Pref., £3¾; Kom Ombo Ste an de Wadi, £4¼; Kom Ombo Ste An. Fondateur, £32; Land Bank of Egypt, Parts de Fond, £53; Lots Turc., 34⅜ fr.; Menzaleh Canal Navigation, £T286; Grand Hotels d'Egypte, £8 19-32; Ramleh Railways, £3⅜; Urbaines et Rurales, £3 15-16; Union Fonciere Fond., £½.

A message from Constantinople states that the Government have decided to prohibit the importation of all kinds of silk goods, says Reuter's Paris Correspondent.

FOREIGN EXCHANGES.

The features of the foreign exchange market during the week have been the rallying of the franc and the strengthening of sterling in New York. Paris reached 65 fr. 60 c., and has finally closed at 64 fr. 27½ c. The New York rate has closed 2 c. higher at 4.59. The Greek exchange has improved, closing 25 dr. better at 365 dr. Berlin is again higher at 39.000. Brussels and Rome have been unsteady.

Country.	Method of Quoting.	Parity of Exchange	Latest Quotations.
Alexandria ...	Piastres to £.....	97½	97 7/16
Athens	Drachmae to £...	25.22½	360-380
Belgrade	Dinars to £	25.22½	320-350
Berlin	Marks to £	20.43	37,000-39,000
Berne	Francs to £	25.22½	24.25-24.35

Engineering Topics.

(By Our Engineering Representative.)

The Road Problem.

One of the questions which will certainly have to be tackled in earnest in the near future is that of road surfaces and the various methods of constructing and finishing highways in relation to their fitness for both mechanical and animal traffic. That is not to say that road engineers have not given this matter attention in the past; they have. Ever since the motor-car made its appearance it has been a bugbear to all concerned. At the same time, it has never been resolutely faced. Wherever possible some sort of palliative methods have been adopted, but these will no longer serve. The problem is one for the engineer, and though it is extremely probable that he will recommend us to use concrete roads, it may be that he will go further still, and there are some who go so far as to say that the traffic roads of the future will be steel-faced.

The Modern Demand.

What is wanted is a road surface which shall be unaffected by weather conditions. We have to-day roads which are perfect in dry weather, but which become veritable death-traps as soon as a drop of rain falls. On the other hand, we have road surfaces which are more dangerous in dry than in wet weather, and we have road surfaces that are dangerous at all times and under all conditions. A road surface, even closely to approximate to the ideal, must be able to withstand prolonged rolling action and the application of comparatively heavy weight on a relatively small area, must wear very little, must resist wet and changes of temperature, and must not crack or disintegrate with frost. A further point is that it must be able at the same time to afford a grip to the feet of shod animals, and yet must be able to withstand the hammer action incidental to animal traffic.

It will be remembered that a select committee was set up a few months ago by one of the numerous Government departments to investigate the subject. The point they were called upon to decide was whether there is any accepted method of road construction or treatment which does not, under any conditions of use or weather, leave the roads slippery for horses. It would seem that this could be dealt with and answered plainly one way or another. Actually they leave this to some extent open to doubt, and rather obscure the issue by saying that road surfaces which carry a considerable amount of motor traffic must be waterproof, and that this very fact makes them slippery. No reason is given for the statement that roads to carry motor traffic must be porous, or for the view that, because a road is waterproof, it must be slippery! There are ways of waterproofing a road surface and yet leaving it suitable for use by shod animals, and, whilst everyone is agreed that a waterproof surface is desirable, there is surely no ground for any suggestion that, were it not waterproof, it would be unsuitable for self-propelled vehicles! The committee decided, apparently, that all roads with a bituminous or asphaltic surface must be slippery, and suggested that real improvement lay in the direction of new methods of shoeing for animals.

Tarred Roads.

There will be some difference of opinion regarding this, but that may be left to those better acquainted with the farrier's art. That roads waterproofed with some asphaltic preparation must be slippery is decidedly open to question. The instance of tarred roads may be cited. There is no reason why a tarred road should be slippery; it all depends on the surface that is treated with hot tar and gravel. I know of many tarred roads that are not slippery; it is my opinion, for what it is worth, that provided the tarring is frequent and thorough, roads treated in that way are suitable for both horse and vehicular traffic of moderate weight, and it is my considered view that tarring, although it may be regarded as a palliative, should be much more largely adopted than is the case at present.

Electric Steel.

It appears that an interesting development of electric steel melting has been put in operation by Messrs. Edgar Allen and Co., of Sheffield. A correspondent of *The Times* states that the Strobie Steel Co. have installed for the firm two furnaces, one of ten and the other of three and a-half tons capacity, which are being worked together as a single unit under the firm's patent duplex electric process, regarding which something has already been said in these columns. Scrap is electrically melted and refined by oxidation in the large primary furnace, and one-third of the molten bath is transferred at short and regular intervals to the secondary furnace for finishing. It is said that the new system is electrically advantageous in that the load factor is improved by the continuous working, whilst the power factor is greatly increased by the maintenance of, mainly, molten baths.

Another Dunlop Success.

For 1923 the Dunlop range of motor-cycle tyres is supplemented by a new cord cover, which marks a new epoch in motor-cycle tyre construction. Briefly, the new cover offers to the motor cyclist all those substantial advantages of the Dunlop multiple ply method of cord construction which have proved such a boon to the motorist.

It is claimed for the cord construction that the tyre has a longer life and uniform wear. The Dunlop multiple ply method of cord construction ensures that the life of the casing shall correspond with that of the tough and durable tread. The cool running of these tyres means a marked decrease in petrol consumption, due to the absence of heat-producing friction in the casing. As the generation of heat in a canvas tyre wastes some of the power of the engine, it follows that the cool running of the cord tyre means the using of less engine power. This naturally reduces the petrol consumption. This cord tyre has an advantage over the canvas tyre in respect of greater cushioning capacity. Consequently, the maintenance costs of the machine are reduced, as it is preserved from damage through road shock. This same quality also ensures more comfortable riding, and appreciably reduces driving strain.

Motor cycling imposes very severe strains upon tyres, making it essential that they should be durable, speedy, and full of that quality called "life." It is claimed for the new Dunlop motor-cycle cord tyre that it possesses all these qualities in a marked degree, and that it will be found to stand up to the most harsh conditions of service in a way unknown with other types. The tread—which would appear to be a perfect non-skid—consists of a series of deep rectangular blocks, so arranged as to give firm fore and aft grip, whilst side-slip is well-nigh impossible. There is a generous amount of rubber on the tread, and the non-skid pattern should remain operative as long as the tyre is in use. Probably no better tyre has ever been offered in the history of motor cycling, and it is interesting to note that supplies will be obtainable very shortly from all motor-cycle traders.

Near East Markets.

LONDON PRODUCE REPORT.

Oranges Disappointing.

(From Our Own Correspondent.)

London, Monday Night.

Sugar.—Home refined has been in marked request, but is 6d. lower in all cases. Tate's cubes, London granulated, and Lyle's granulated are now 56s. 3d., 50s. 1½d., and 50s. 4½d., respectively. Foreign descriptions have been steady. West Indian crystallised shows a slight rise at 45s. 3d., while white Mauritius is firm at 47s. 9d., and white Java at 48s. 6d. is unchanged. Quotations are:—December, 21s. 9d.; January, 21s. 10½d.; February, 22s. 1½d.; March, 22s. 4½d.; and May, 22s. 7½d.

Coffee.—All quotations are unchanged. East Indian remains at 110s., as also Nairobi at 94s. Costa Rica at 116s. is unaltered. The futures market has been irregular. Quotations are:—December, 60s. 9d.; March, 60s. 9d.; May, 60s. 6d.; and July, 60s.

Desiccated Coconut.—There has been a very fair demand, but prices are expected to harden considerably during the first few months of the new year. Supplies are now 3,000 to 4,000 cases lower on last week.

Rice.—A further advance of 6d. cwt. is to be noted for Spanish Japan rice, making an advance of eighteenpence during the past two weeks. Other growths have been in good request.

Green Fruit.—The market has been heavier this week for oranges. Good conditioned fruit is in favour, and quotations are higher. The demand for oranges generally is very discouraging for this period of the year, owing mostly to the fact that the fruit, on the whole, is in poor condition. Quotations are:—Denia and Valencia oranges, 16s. to 35s. box (360's to 300's). Lemons have arrived in large quantities, while a steady demand has been maintained at slightly higher prices. The scarcity of bold fruit continues. Quotations are:—Messina lemons (new crop), 14s. to 25s. box (300's); and 26s. to 50s. case (300's). Box fruit apples have been in considerable request, but the inquiry for barrels has been neglected. The market for Valencia onions remains steady.

Dried Fruit.—On the approach of Christmas the demand generally has improved, but prices are still very high. A large quantity of Smyrna sultanas has just arrived by the s.s. Pavlia, and as a result quotations for this fruit have eased considerably. Plums are still in marked request, although supplies are low. A very depressed market has been in evidence for figs. Naturals are almost neglected, while layers and locoums can hardly be obtained. Persian and Tunis dates remain in good request at slightly easier rates. Almonds are improving in the demand, but the stocks on hand are small.

Oilseeds.—Unsteadiness prevails throughout. Indian linseed has advanced 1½d. at 20s. 7½d., while La Plata is 7½d. up at 19s. 3d. Rapeseed is higher with Toria at 18s. 3d., and bold Ferozepore at 17s. 7½d., both 1½d. up. Cottonseed has been fairly steady. Egyptian and Sakellarides are unchanged at 11s. 1½d. and 10s. 10d. respectively. Indian has shed 3d. at 9s.

Oils.—A higher tone has been in evidence. Linseed oil at 38s. 6d. is unchanged, as also are refined rape oil at 45s. and crude rape oil at 38s. 6d. Cottonseed oil has advanced. Egyptian shows a gain of eighteenpence at 36s. 6d., while refined is 2s. up at 43s. Technical has advanced 6d. at 37s. 6d., while deodorised is firm at 45s.

Oilcakes.—All quotations are 10s. higher. Cottonmeal cake is now 270s. Linseed cake comes to business at 290s.; cottonseed cake has been done at 160s.; and coconut cake is quoted at 180s.

The traffic receipts of the South Indian Railway, for the week ended November 11, amounted to Rs.8,39,032; total for the year, Rs.3,01,20,315. For the corresponding period of last year receipts amounted to Rs.8,13,740; total for the year, Rs.2,71,01,081.

'BALKAN' NATIONAL INSURANCE COMPANY

FOUNDED 1895.

Capital paid up - - - - - -	5,000,000
Total reserves as per December 31st, 1920	53,200,000

Branches maintained: Fire, Life, Marine, Casualty and Re-insurance of all branches.

HEAD OFFICE: SOFIA, BULGARIA.

SMYRNA FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows under date November 30:—

Sultanas.

The statistical position up to this date is as follows: Total arrivals to date, 89,955 bags against 154,915 bags in 1921; total sales, 84,955 bags against 144,915 bags in 1921; stock, 5,000 bags against 10,000 bags. The total sales, therefore, on the Smyrna market up to the present since the opening of the season amount to about 11,000 tons, and sales at Vourla for the same period are 2,000 tons—total, 13,000 tons. Shipments up to date have been as follows (in tons): To the United Kingdom, 7,150; to the Continent, 3,850; stock in Smyrna shippers' hands, 1,200; stocks afloat or in shippers' stores taken over by the Commission of Abandoned Goods estimated at 1,000—13,000 tons. This is the closest estimate that can be arrived at of the distribution of the fruit which has so far reached market and passed into shippers' hands. Comparative shipments to this time last year were as follows: To the United Kingdom, 12,500 tons; to the Continent, Australia, United States, Canada, etc., 14,000 tons—26,500 tons. Supplies from the interior of the country have been diminishing in volume during the past fortnight. Farmers have still some stock on hand, but as confidence is reviving, there is a tendency as usual to hold over some quantity of fruit for sale in the spring months. Dealers complain that purchases are becoming increasingly difficult up country, and that, in spite of fully 10s. advance on the Smyrna market, established during the past ten days, farmers' views go well beyond this limit. Exchanges also are declining. At a given moment sterling touched over P.900, and continued fairly steady for a time at between 840/870, but rates have now receded to 800/790, and should peace prospects materialise it is generally anticipated that there will be a sharp drop to near 700 level. It is a matter of considerable difficulty to ascertain the extent of stocks still left in farmers' possession. Basing ourselves on the most reliable views and on information we have received from the various centres of production, we conclude that about 40/45,000 bags, or say some 5,500/6,500 tons, represent the extent of existencies. We must admit, however, that the principal native dealers are more conservative in their estimates, and they reckon the stocks in farmers' hands at not over 30/35,000 bags.

The Government Commission of Abandoned Goods, which has taken control of all stocks which belonged to Greek farmers and shippers, is estimated to have gathered in all about 2,500 tons, spread all over the country. A large proportion of this fruit, however, has been lying exposed and is in a badly damaged condition. The portion so far sold by the Commission at public auction is included in the list of sales given above. This amounts to about 1,500 tons.

Carabournou sultanas are now entirely exhausted. The yield of red raisins (elemes), which between Vourla, Cesme, and Carabournou, had been originally estimated at about 6,000 tons, has been practically lost. This fruit is taken up and dried from the middle of September onwards, but the untoward events of that period resulted in the loss of all the grapes. Some very limited quantities of Carabournou elemes have reached our market, and have been bought at high prices for shipment to Constantinople.

The outlook generally points to prices for sultanas continuing their advance. With the absolute certainty of a very small yield next year farmers are now holding on to their remaining stocks, and there is also some speculative buying which locks up stock for the time being. If our estimates prove correct, the forecast that we made towards the end of September that some 15,000 tons had been lost or destroyed, will, unfortunately, be confirmed.

Figs.

The yield last year amounted to about 19,000 tons. Forecasts for the present season had assessed the likely production at about 22,000 tons. The statistical position up to this date is as follows: Total arrivals to date 102,000 bags against 156,000 in 1921. Estimated stock to-day: In Smyrna, 4,000 bags; in the country, 26,000 bags against 15,000 bags; estimated result, 132,000 bags against 171,000 bags. In other words, consequent on the events of September, the forecast of about 22,000 tons has been reduced to slightly under 15,000 tons. Allowance must be made, however, for about 1,500 tons which, through the opening of communications, have been absorbed by the interior of Asia Minor. Of the estimated stock up country of about 26,000 bags a portion is under the control of the Commission of Abandoned Goods.

Qualities so far reaching market show sound conditioned fruit, but more recent arrivals indicate a lowering of grade. Market is firming up consequent on continued demand and declining exchanges.

Digitized by Google

The Exchange.

During the past few weeks the exchanges have undergone violent fluctuations, sterling rates having played between 700 to 1,000. The market has been entirely swayed by political considerations. A calmer feeling now prevails and rates, after having steadied for some days at about 800/830, are now weakening, and have gone below the 800 level. As peace prospects materialise a further improvement will doubtless have to be reckoned with.

The Outlook.

Judged from a commercial aspect, the situation here is steadily improving. The chaos which prevailed during the early days of the Nationalist occupation is giving way day by day to more settled conditions. Trade is reviving, and communications with the interior are becoming more frequent and regular. As the various Government Departments are being organised a further improvement generally in the Government machine may be confidently anticipated. There are still numerous petty restrictions which will certainly be removed when a state of peace comes about.

From the merchant's point of view the fullest satisfaction must be recorded with the administration of the Custom House. Its Director has placed the greatest facilities at the disposal of the trade, and has spared no effort to stimulate commercial movement and to remove much of the red-tape and clogging formalities which were characteristic of the Customs in the past.

Although much of the tension hitherto existing has commenced diminishing, the period of suspense and anxiety is not yet over. No real relief can come until peace is definitely signed. Enterprise and commercial development can have no scope for expansion until the political horizon has completely cleared.

SUGAR PRODUCTION FROM TROPICAL PALMS.

Various palms occurring in the tropics yield a sugary sap which is employed by the natives for making sugar and "teddy," and a summary of information relating specially to the Nipa palm, from this point of view, is given in the current number of the "Bulletin" of the Imperial Institute. This palm grows commonly in the muddy estuaries of rivers throughout the Eastern tropics, and is exploited particularly in the Philippine Islands. The sugary juice, or "tuba," is obtained by removing the flowering shoot and collecting the juice, which escapes from the cut surface. By repeatedly cutting the end of the stalk, the flow of juice can be maintained for two or three months, each stalk yielding about nine or ten gallons of juice during this period. The juice contains about 15 per cent. of sugar, which can be extracted by means somewhat similar to those used in the manufacture of cane sugar, or if desired the juice can be fermented for the production of alcohol.

It has been estimated that 28 cwts. of sugar, or 200 gallons of 95 per cent. alcohol, could be obtained annually from an acre of swamp land planted with Nipa palms. The tree occurs over extensive areas in British North Borneo, and the authorities there are considering the question of utilising it as a source of sugar and alcohol, whilst it would appear that there are also possibilities of its being similarly utilised in Malaya.

FOOD PRICES IN CZECHO-SLOVAKIA.

For the first half of November prices of vegetable foodstuffs maintained more or less the same level as in October. Rice was 8 per cent. cheaper, potatoes 25 per cent., while peas were 22 per cent. and maize 18 per cent. dearer. The total fall of price in this category, from January to November 15, was 45 per cent. On the other hand, meat and animal products increased, as compared with October, by 5 per cent. Eggs were 30 per cent. dearer. The fall in this group of prices since January is 20 per cent. Coffee, tea, cocoa, and salt were about the same as in October. Malt fell by 7 per cent., beer by 14 per cent., wine by 5 per cent., and tobacco was 15 per cent. cheaper.

In October, Czecho-Slovakia's exports of sugar totalled 1,855 tons, the main purchasers being Austria (845 tons), Hamburg (612), Switzerland (133), England (128), and Italy (110). The Sugar Industry Association publishes the following estimate of this year's production compared with last:—Area under cultivation, 357,000 acres (1922-23); 384,000 acres (1921-22); yield of beet, 4,285,514 tons (1922-23); 3,461,514 tons (1921-22); yield of sugar, 695,023 tons (1922-23); 660,137 tons (1921-22). As the home consumption will account for about 350,000 tons, there will thus remain a similar quantity available for export.

CURRENT PRICES.

General Produce.—Bacon (Continental), 120s. per cwt.; (Canadian), 109s. cwt.; (American), 97s. cwt.; butter (Danish), 209s. cwt.; (Australian), 170s. cwt.; (New Zealand), 187s. cwt.; cheese (Canadian), 124s. cwt.; (New Zealand), 126s. cwt.; lard, 80s. 6d. cwt.; eggs (Danish), 28s. 6d. per 120; (Styrian), 15s. 6d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 1s. 3½d. lb.; cocoa (Ceylon good to fine), 76s. cwt.; coffee (Costa Rica), 120s. cwt.; East Indian), 115s. cwt.; (Central American), 96s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 94s. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 107s. 6d. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white). 6¼d. lb.; pimento, 2 1-3d. lb.; raisins (Valencias), 77s. 6d. cwt.; currants (Vostizza), 75s. cwt; currants (Amalias), 66s. 6d. cwt.; sultanas (Smyrna), 110s. cwt.; sugar (Tate's cubes), 56s. cwt.; (Lyle's granulated), 50s. 9d. cwt.; (Mauritius crystals), 47s. 4½d. cwt.; (West Indian crystallised), 44s. 3d. cwt.; (centrifugal), 17s. 6d. cwt.; tapioca (fair Singapore), 2½d. lb.; rice (Rangoon No. 2), 15s. 10½d. cwt.; bran (Rangoon), £6 12s. 6d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 11d. lb.; tea (Indian common to good common), 1s. 1½d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 1¾d. lb.; (medium to good), 1s. 8d. lb.; (fine to finest), 2s. 9½d. lb.; Java (common to good common), 1s. 3d. lb.; wheat (English white), 43s. 6d. qr.; wheat (Australian), 40s. 6d. qr.; oats (English), 30s. 6d. qr.; oats (La Plata, ex ship), 28s. 7½d. qr.; maize (La Plata), 36s. 1½d. qr.; flour, 37s. 6d. sack.

Chemicals.—Acids: Boric, 56s. cwt.; oxalic, 7½d. lb.; citric, 1s. 9½d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £56 ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 12s. 6d. ton; borax crystals, 28s. 6d. cwt.; cream of tartar, 96s. 3d. cwt Potassium: Bichromate, 6¼d. lb.; chlorate, 4½ lb.; caustic, £29 10s. ton; nitrate, £36 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 110s. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £7 18s. 9d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £14 ton; prussiate, 11d. lb.; nitrate, £13 5s. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £38 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 10s. ton; sulphate of copper, £26 7s. 6d. ton; sulphate of iron, 55s. ton.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 8¾d. lb.; 80 to 89 lb., 8¾d. lb.; 70 to 79 lb., 8¾d. lb.; 60 to 69 lb., 8d. lb.; 59 lb. and under, 7½ lb.; (second), 90 lb. and up, 8d. lb.; 80 to 89 lb., 8d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb. 7¼d. lb.; 59 lb. and under 6d. lb.; cows (first), 60 lb. and up, 7d. lb.; 59 lb. and under, 6¾d. lb.; (second), 60 lb. and up, 5¾d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 5¾d. lb.; (second), 4⅜d. lb.; (third), 2½d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7.8 to 12.8; Durbhangas, 6.8 to 8.8; Patnas, 5.8 to 6.8. Salted cows, 5 to 9. Arsenic hides (buffalo), 4 to 7. Skins: Calf, 8 to 10 per 20 lb.; goat, 255 to 315 per 100 pieces.

Metals.—Aluminium, £100 ton; antimony (English regulus), £29 ton; bismuth, 10s. lb.; copper (standard), £62 6s. 9d. ton; copper (electro), £70 ton; gold bars, 91s. 4d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £17 5s. ton; lead (soft foreign), £26 1s. 3d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 45s. unit; nickel, £137 10s. ton; platinum, 440s. oz.; graphite (80-90), £12 10s. ton; quicksilver, £12 7s. 6d. bottle; spelter (G.O.B.), £39 15s. ton; tin (standard), £175 1s. 3d. ton; wolfram, 14s. 6d. unit; zinc sheets, £41 15s. ton; tin plates (20 x 14), 19s. 4½d. box; silver bars, 32d. oz.

Miscellaneous.—Cotton (American), 14.78d. lb.; Egyptian (Sakel), 17.40d. lb.; jute (first grade), c.i.f., £37 ton; jute (lightnings), £35 ton. Oilseeds: Linseed (La Plata), £18 17s. 6d. ton; palm kernels, £17 3s. 9d. ton; castor seed (Bombay), £17 2s. 6d. ton; sesame seed (China), £21 12s. 6d. ton; soya beans, £10 17s. 6d. ton; olive (Spanish), £74 ton; rape (crude), £41 15s. ton; soya, £35s. 2s. 6d. ton; petroleum, 1s. 2½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex tank), 65s. ton; coconut (Ceylon), £38 7s. 6d. ton; cotton (crude), £34 15s. ton.

The Steaua Romana (British), Ltd., are advised that the approximate gross crude production of the Steaua Romana, Bucharest, during November was 19,360 tons.

The "train de luxe" service between the Hook of Holland and Berlin in connection with the Great Eastern Railway Harwich boat train, recently announced by the Trans-European Company, Ltd., leaves Hook of Holland on Tuesdays, Thursdays, and Saturdays, and Berlin on Mondays, Wednesdays, and Fridays.

Cotton and Cotton Goods.

MANCHESTER COTTON TRADE.

Business Very Restricted.

(From Our Own Correspondent.)

Manchester, Saturday.

The past week in the market has finished rather better than it commenced, but at the same time the state of affairs is still very unsatisfactory, and complaints are being met with from all sides. Buyers are quite content to hold aloof and await any developments. There is still a great distrust in current rates. More machinery is being brought to a standstill in both the spinning and weaving sections, and the outlook for the operatives is black. No immediate relief is in sight. With regard to the cloth section, isolated cloth sales have taken place in staple makes for Egypt. No mention has been made of anything for the Levant or Constantinople. The conditions out there are far too disturbed to encourage any buying. Egyptian yarn quotations have been irregular, and the demand has been easily satisfied. Towards the end of the week rather more cloth inquiry was met with for China and India, and although most of the offers were below Manchester rates isolated sales have been recorded. Buyers for certain of the smaller outlets have not been altogether idle. Home trade buying has been patchy. American yarns quotations have been easier. Users have taken up only small lines to meet immediate requirements.

LIVERPOOL REPORT.

Large Egyptian Deliveries.

Messrs. Reynolds and Gibson report as follows for the week ended December 6:—

Another very quiet week has been experienced in this department. There has been a further falling-off in the sales, and prices have displayed a distinctly downward tendency; indeed, it would appear likely that, except for the support given to our futures market by purchases on straddle account, we would have registered a still more drastic decline. So far as spot purchases are concerned, spinners generally seem to be united in the resolve to do nothing for the present, evidently in the belief that the bottom has not yet been reached. The result here is stagnation, whilst Manchester reporters have exhausted their vocabularies in trying to describe the state of affairs which exist in that city. Matters have not been helped during the week by reports from Egypt raising previous crop estimates. It seems likely now that the current crop, plus carry-over up country, will approximate nearly 5½ million kantars. This, however, only means an additional yield of about 70,000 bales, and this should not weigh very heavily in the scale if we view the cotton situation as a whole. Another depressing influence has been the receipts in Alexandria, which continue to be very heavy, and this, of course, brings in its train the inevitable hedge-selling. When, added to the above, one considers the paucity of orders from our oversea outlets, it is hardly surprising that, for the time being, the "bulls" are inclined to "take cover," and that the "bears" are making the most of a favourable opportunity. C.i.f. business, like the spot, has been very quiet. With the foregoing in mind, it is instructive to turn for a moment to the files, where we discover that the average weekly deliveries of Egyptian cotton to Lancashire spinners, from August 1 this year, has lately shown a steady increase, and has now reached the respectable figure of 6,530 bales, and that for the single week ended December 1 (which, so far as spot sales were concerned, was about the worst seven days we have experienced this season), the number of bales forwarded to spinners was 12,569! We cannot believe that all this cotton is going into stock, and are rather of the opinion that beneath the surface there is more business passing than appears to be the case. Alexandria has been making some very reasonable offers lately, and those who are in a strong financial position might do well to think about securing future requirements at round about to-day's level. Strong markets do not bring cheap offers as a rule, and it is quite possible that a quick turn round in sentiment may be witnessed before the end of this week. As we have had reason to know before, our market is extremely sensitive to the ups and downs of its American neighbour, and during the next few days two "bureau" reports are due—the ginners' census on December 8 and the Washington Agricultural final report on December 12.

The local spot inquiry has been practically featureless. Fully good fair, Sakellaridis, 17.00d.—17.50d., has been chiefly in request, with Uppers, 15.00d.—15.50d.

THE EGYPTIAN MARKET.

Quiet Tone Prevails.

The Commercial Co. of Egypt, in their report for the week ended December 1, state:—Since our last report, the Futures market has been very quiet, the fluctuations registered being negligible. The reasons for this slack state of the market may be found in the very moderate demand from abroad and the recent uncertain tendency of the American markets. Although arrivals from up-country have continued heavy, the quantity of hedges put out has been small, this being due to the fact that the greater proportion of the arrivals were not for sale, as they belonged to export houses. Speculation for the time being is marking time; its commitments in the market are small. The difference between Ashmouni and Sakel has again narrowed, and stands now at about 6 dollars. This narrowing is due to some speculative and commercial buying of February contracts in a narrow market, which had the effect of pushing up prices abnormally. A feature worth mentioning is the record export figures of the week—about 46,000 bales—bringing the total quantity of cotton exported since September 1 to 2,100,000 crs., against 1,850,000 crs. last year. We have already received 3,426,647 crs., and ginning factories up-country are packed with cotton, but the daily arrivals at the interior factories have decreased considerably recently. Although for the present the market looks somewhat heavy, and a decline in the near future is possible, we still have, however, a favourable opinion of the market, and we expect a higher level of prices as soon as stocks are lighter, probably about the second half of January.

Spot.—We have had a moderately active business at Minet el Bassal this week, but there is still no improvement in the demand from abroad. Sales amount to about 21,100 bales, of which we estimate 13,900 bales Sakel., 6,900 bales uppers, 300 bales brown, and a few bales of white. Arrivals continue large, but exports show a marked increase over last week, and the stock shows a slight decrease.

Sakellaridis.—All styles have been dealt in. Prices are without change except for fully fair and below which are a little easier.

Uppers.—Business has been done in all grades. Prices are without quotable change. Medium qualities are still scarce and dear.

Brown.—A fair business has been without change in prices.

White.—Is neglected, and only a few bales have been done. Prices are nominal, and a little easier.

COTTON TRADE REVIEW.

Market Lifeless.

The *Manchester Cotton Trade Review* of the Imperial Ottoman Bank for the week ended December 9 states:—

General.—The most accurate description of the general condition of the markets during the past week would be to say that they have been lifeless. It is not possible to record any amelioration of the unfavourable conditions which have been previously reported, and in view of the approach of the Christmas and New Year holidays it seems unlikely that there can be any material change for the better until after the close of the present year.

Yarn.—Conditions are practically unchanged since last week. In face of the continued absence of demand spinners are becoming more and more chary of making to stock. The recent failures of certain yarn agents and the uneasiness with regard to the finances of some of the mills, do not tend in any way to help matters. Speaking generally, the market is pessimistic.

Cloth.—Manufacturers are still unable to bring the majority of offers within reasonable distance of their production costs, and the stagnation resulting is very pronounced. Demand from abroad has been insignificant, and there has been a reduced volume of inquiry of any sort. The small orders that have been booked in light goods for India and China confirm the view that buyers maintain their expectations of lower prices in the near future. Egypt and the Levant remain very quiet, though perhaps with a reviving spark of hope based on the chances of a satisfactory outcome of the Lausanne Conference.

Raw Cotton.—In keeping with the general tendency of the markets demand has been flat, and prices have drooped. Operations in futures have been on a smaller scale. The report of the Washington Agricultural Bureau issued yesterday showed that 9,318,000 bales had been ginned to the end of November, against 7,640,000 at the same time last year; the report was without influence on the market. Closing prices are as follows:—American fully middling, 14.35; Egyptian fully good fair, 17.50.

Shipping Intelligence.

NEAR EASTERN FREIGHTS.

Apart from South and North America, French exporting circles are devoting much attention to the Near East, says the *Journal of Commerce*. It is not surprising, therefore, that freights from Marseilles for destinations in this area should be firm. Important orders are being received from public works authorities and dealers in foodstuffs in Syria, Egypt, and Greece, whereas the approach of Christmas is causing an increased homeward carrying trade in regard to currants and other seasonable articles. In this trade French shipping lines are suffering considerably from Greek, Italian, and Spanish competition, which the change in the French Eight-Hour Law fails to check.

BEYROUT TO BAGHDAD.

There is very little land transport across the great stretch of Arabia, from the Mediterranean coast in the west to the Persian Gulf in the east, says the *Manchester Guardian Commercial*. At present there are two caravan routes, and it is announced that the French authorities in Syria and the British authorities in Mesopotamia have taken concerted measures to ensure reasonable safety on these routes. It may be, of course, that with British soldiers lodged in Palestine and Mesopotamia, and French soldiers in Syria, we shall eventually see the centres of trade which lie between the Black Sea, the Mediterranean, and the Persian Gulf doing more effective business. This would give a powerful stimulus to the shipping trade between Manchester and that part of the world.

GREEK TONNAGE.

The demand for shipping tonnage has been more apparent lately, with good prospects in view, and the requirements of the Greek Government, which now has in its hands tenders for no fewer than 150,000 tons of steamer space for grain shipments from North American ports to Greece, will give a further fillip to the industry. Commenting on this subject, the Liverpool *Journal of Commerce* remarks:

"This is a big block of tonnage, and, in view of the recent developments in Greece, it will be interesting to watch how things shape. Of course, the credit of all countries in that part of the world is a little bit strained at the moment, to say no more; but apparently the money will be forthcoming for this big order. Shipping people are rather interested in the inquiry, and are awaiting the result of the tenders. On the Baltic Exchange well-informed operators say that foreign tonnage may offer to do the business at 22 cents per 100 lbs., but possibly another cent or two may have to be given. During the last week or so steamers have been fixed from the Northern Range to Greece at 24 cents per 100 lbs. on heavy grain basis for December landing, and a spot boat from Boston to the same destination got 22 cents."

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Massilia for Bombay (Liverpool, December 16); s.s. Elysia for Bombay (Liverpool, January 4).

Anchor Brocklebank Line.—S.s. Matheran for Port Said, Colombo, Madras, and Calcutta (London, December 21); s.s. Manipur for Calcutta (Birkenhead, December 29); s.s. Malakand for Port Said, Colombo, Madras, and Calcutta (London, January 6); s.s. Malancha for Calcutta (Birkenhead, January 10); s.s. Mahanada for Calcutta (Birkenhead, January 20).

Bibby Line.—S.s. Yorkshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, December 20); s.s. Warwickshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, January 3); s.s. Herefordshire for Rangoon (Middlesbrough, January 13).

British India Line.—S.s. Nagina for Colombo, Madras, and Calcutta (London, December 16); s.s. Gamaria for Bombay and Karachi (London, December 16); s.s. Margha for Colombo, Madras, and Calcutta (London, December 22); s.s. Masula for Bombay and Karachi (London, December 30); s.s. Manela for Colombo, Madras, and Calcutta (London, January 5); s.s. Mundra for Bombay and Karachi (London, January 30).

Clan Line.—S.s. Clan Murdoch for Bombay and Persian Gulf (Birkenhead, December 27); s.s. Clan Mackellar for Colombo, Madras, and Calcutta (Birkenhead, December 28).

Cunard Line.—S.s. Brescia for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, December 21); s.s. Pavia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, January 4).

Ellerman Line.—S.s. Flaminian for Gibraltar, Malta, Patras, Syra, Smyrna, and Constantinople (Liverpool, December 16); s.s. Fabian for Gibraltar, Malta, and Alexandria (Liverpool, December 16).

Ellerman, Bucknall, and Strick Line.—S.s. Kormark for Persian Gulf (London, December 18).

Ellerman's "City" Line.—S.s. City of Valencia for Calcutta (Birkenhead, December 15); s.s. Trafford Hall for Bombay and Karachi (Birkenhead, December 20); s.s. Crewe Hall for Bombay and Karachi (Birkenhead, December 20); s.s. City of Christiania for Calcutta (Birkenhead, December 28).

Ellerman's "Hall" Line.—S.s. Crewe Hall for Malabar Coast ports (Liverpool, December 20).

Ellerman's Westcott and Laurance Line.—S.s. Polo for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, December 20); s.s. Castilian for Gibraltar, Malta, and Alexandria (London, December 23); s.s. Bulgarian for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, January 10).

Glen and Shire Line.—S.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, December 28); s.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, January 11); s.s. Glenade for Port Said, Port Swettenham, Singapore, etc. (London, January 25).

Harrison Line.—S.s. Benefactor for Calcutta (Liverpool, December 21).

Henderson Line.—S.s. Henzada for Port Said and Rangoon (Birkenhead, December 27).

Holt Line.—S.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Swansea, December 21); s.s. Rhesus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, December 21); s.s. Hyson for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, December 21).

Johnston Line.—S.s. Willowmore for Piræus, Volo, Salonika, Bourgas, Varna, and Constantza (Liverpool, December 16).

Moss Line.—S.s. Siptah for Gibraltar, Malta, Syra, Piræus, Smyrna, Salonika, and Constantinople (Liverpool, December 23).

P. and O. Line.—S.s. Mantua for Bombay (London, December 15); s.s. Malwa for Bombay (London, December 29); s.s. Kaisar-I-Hind for Bombay (London, January 5); s.s. Khyber for Bombay (London, January 12); s.s. Padua for Colombo, Madras, and Calcutta (London, January 26).

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Homs, November 7.

The report for October states:—The continued export of large quantities of cereals for Tripoli has brought about a rise in prices. Wheat of good quality stands at Ps. 600 per kantar of 298 kg., as against Ps. 450 for the previous month. Barley is Ps. 335-355 per kantar of 298 kg. Maize is Ps. 350 per kantar, as against Ps. 320. Lentils have risen very sharply. The best quality white is Ps. 800 per kantar, as compared with Ps. 600.

Railway traffic has increased during the month, especially on the Homs-Tripoli line. This increase is due to the large consignments of cereals which have amounted to more than 30 wagons per week by railway or by camels. Exports have almost doubled those of September.

Up to the present the sowings have not commenced for the new crop.

Palestine.

The report for November states:—

An Italian navigation company called "Oriens" has started a regular bi-monthly service of their boats to Haifa.

Of forests in the strict sense of the term there are none in Palestine, and even groves of trees of any importance are rare. The trees best suited for burning are the adak, oak, acacia, laurel, cypress, eucalyptus, and olive. The burning of charcoal on a large scale goes on continually in Hebron and Phœnicia, while in other places it is a seasonable occupation for the farmers after the completion of the harvest. The approximate quantity produced in 1921 was about 45,600 kantars, or 12,000 tons.

The use of charcoal, on the other hand, is considerable (it being the most popular fuel in Palestine), together with fuel wood. It is estimated that the total consumption of charcoal in Phœnicia alone amounts to 37,000 kantars per annum. Judging by these figures, and from other information, the consumption of charcoal in Palestine is estimated to be not less than 100,000 kantars per annum.

The only countries supplying Palestine with charcoal are Transjordania and Syria. These countries, notwithstanding the great destruction during the war and the lack of organised afforestation, still possess large areas covered with rich timber which might be exploited. Other countries to which Palestine may look for charcoal are Arabia and Turkey. Supplies from the latter country, however, are difficult to obtain, owing to the unsettled political situation. Supplies are available in Yugoslavia, and offers from a number of firms in that country have been received.

Palestine prices are comparatively higher than at other Mediterranean ports, and this country thus offers an attractive market. The average wholesale prices of charcoal in Palestine were in 1920 £E19,470 m.m. per ton, and in 1921 £E15,830 m.m., as compared with the prices of Port Said of £E13 and of Alexandria of £E14.

The Jaffa Orange Growers' and Shippers' Executive Committee have now completed their arrangements for the coming season as a result of protracted negotiations with the Conference Shipping Lines. The Executive have contracted for the shipment of the fruit to England at the rate of 2s. 3d. per case, as compared with 2s. 6d., the rate for 1921-22. The first shipment of 15,000 cases left Jaffa about November 15, to be followed by regular shipments every ten days. The Committee have also been successful in securing a reduction in railway freights from Jaffa to Jerusalem. The prospects for the coming season are considered to be good, merchants at present are paying as much as PT. 25 to PT. 28 per case to the growers ex orchard.

Company Meetings.

THE ANGLO-PERSIAN OIL CO., LTD,

Satisfactory Year's Working.

Forthcoming New Issue.

The thirteenth ordinary general meeting of the Anglo-Persian Oil Company, Ltd., was held on December 11, at Winchester House, Old Broad Street, London, E.C., Sir Charles Greenway, Bart. (the Chairman of the Company), presiding.

The Secretary (Mr. John Clark) having read the notice convening the meeting and the report of the auditors, the Chairman said:— Gentlemen, it is with very great pleasure that for the last financial year we have been able to submit to you what I am sure you will all regard as another very satisfactory report and balance-sheet.

Profits.

When addressing you at the last annual meeting I indicated that there would be some falling off in profits for the year now under review owing to the lower prices of products, but that this would be partly compensated for by increased throughput, and that in any case the amount available for dividends would be larger than in the previous year, as we should no longer be liable for excess profits duty. If you will turn to the profit and loss account you will see that this forecast has been amply verified, since the reduction in net profits is very much less than the sum which was set aside in the previous year to meet E.P.D. and Corporation Profits Tax.

The figure of £3,130,380 16s. 2d. carried to the appropriation account is, I should explain, the net profit for the year arrived at after allocating in this company and in the various subsidiary companies constituting our group, including the net increase in the carry forwards of these companies, a total of about £2,500,000 to depreciation and reserves. In the appropriation account we have, as you will see, allocated a further £1,000,000 to depreciation and reserves, making a total of no less than about £3,500,000 which, in one form and another, has been reserved by our own and our subsidiary companies out of the year's profits. This may at first glance strike you as an unduly heavy writing off, but I am sure you will agree with me that we are acting wisely in following a conservative policy in the matter of our writings off for depreciation and in the appropriations to our reserve accounts and in not recommending any increase of dividend.

Future Prospects.

As regards prospects for the current year, I am not yet able to make any definite forecast. As you will have seen from the report the completion of the extensions to our refineries has been delayed by strikes, and other unavoidable causes, and it has not yet been practicable to estimate the extent to which our output at the Abadan Refinery will be affected by the recent fire. The actual amount of material damage done was small—not more than about £50,000—and it is covered by insurance, but as it destroyed some of the finishing plant our output of refined products from this refinery will be temporarily curtailed. Part of the damaged plant can, and is being, replaced immediately out of plant sent out for extensions, but this, in turn, will cause further delay in the completion of the extensions at this refinery, as fresh plant will require to be sent out to replace the material appropriated to remedy the fire damage. The recent further fall in the price of products will also unfavourably affect the present year's results. On the other hand, the bringing into operation of further units of our refinery at Llandarcy has enabled us to considerably increase our production of crude oil, and the fall in prices will to some extent be offset by the termination this month of our old contracts for benzine and kerosene. But, taking all these circumstances into consideration, I do not think we can, consistently with the carrying out of our policy of conserving our resources as much as possible, look for any increase in dividend on our ordinary shares for the current year. In the following year, however, our programme of extensions will be nearer completion, and as we shall then be in a position to deal with a much larger volume of oil, our profits should, provided present prices are maintained, show a substantial increase.

Whilst on the subject of dividends, I may mention that in view of the inevitable long delay in preparing our annual accounts, and in the consequent declaration of our dividend for the year, the board has decided henceforth to declare an interim dividend. The exact date of this declaration has not yet been fixed, but I think it will suit the convenience of shareholders best if it were made in May or June of each year—say six months before the declaration of each final dividend—by which time we shall be in a position to more or less correctly estimate the year's results.

As regards the future course of the markets for petroleum products it is, of course, impossible to prophesy with any accuracy, but there are indications that prices have now passed the low-water mark. The price of crude oil in Mexico has, owing to the falling off in production in that country, advanced appreciably, and this has been reflected in some of the other producing countries. The price of fuel oil, which had fallen to a point at which it could not in many cases be produced at a profit, shows signs of improvement—in fact, a very large contract has recently been placed in America at a price which shows an advance of about 10s. per ton on the price at which the same contract was placed a year previously. The prices of kerosene also have advanced materially in America during the past few months, partly owing to the large amount of that product which is now being converted by cracking into the more remunerative form of benzine. Benzine (or petrol) is the only main product which does not at the moment show any indications of improvement, there being large accumulations in the United States of stocks of this commodity, but I do not anticipate that this position will continue for long, since the consumption of benzine is increasing by leaps and bounds, and the price of kerosene has now about reached a point at which many refiners will not find it remunerative to convert it into benzine.

On the other hand, the falling off in production in Mexico is offset to some extent by increased production in other countries—but I am of opinion that the largely increasing demands of the world for petroleum products, which will become accentuated as economic conditions in Europe improve, will more than counter-balance any increased production, and that the tendency within the next few years must be in the direction of higher prices.

I will now call your attention to the balance-sheet—and to such items as need explanations. On the debit side of the account the amount of paid-up capital was, you will see, £17,112,838 5s. 7d., representing an increase of £4,408,354 8s. 9d. on the amount shown twelve months previously. This mainly consisted of the balance of the calls on the 9 per cent. preference shares and the proceeds of the further issue of £2,000,000 8 per cent. preference shares, but also included £549,458 5s. paid up in respect of the 600,000 ordinary shares issued in March last. The outstanding calls have since been paid, and the 19s. remaining unpaid on the 1,500,000 shares previously issued to the original shareholders has also since been called up and paid. The amount of debenture stock outstanding has been reduced by £125,000, this being the amount falling due for redemption during the year.

The employees' provident pension and insurance fund account amounts now to £559,666 3s., being an increase for the year of £240,456 14s 8d. The rapid growth of this fund is extremely pleasing to the board, and I am sure it will be equally so to the shareholders and members of the staff, as it carries out in a very substantial manner the profit-sharing principle which has now been accepted as an essential for the success of industrial and trading institutions.

The next item calling for comment is "reserves." In our previous accounts we have shown the amounts realised for share premiums under a separate heading, but as they are in effect reserves we have now included them under the general heading of "reserves," which now, including the further allocations from the year's profits, show a total of £4,591,756 14s. 5d. as against £2,500,000 in the previous year. As I have previously indicated, these reserves are quite distinct from the large amounts which we have written off for depreciation, and they are augmented by the net increase of the carry-forwards in the profits and loss accounts of our various companies.

Balance Sheet.

The balance at the credit of profit and loss account, after paying dividends on the preference shares for the half-year ended September 30, was £3,421,672 18s. 2d. Since the close of the year a further £437,500 has been paid out in respect of preference dividends for the half-year ended March 31, 1922, and out of the balance remaining we now recommend the payment of a dividend on the ordinary shares at the rate of 20 per cent. per annum, absorbing £1,245,000. This will leave a balance to carry forward, subject to E.P.D., if any, for the year 1920-21, and Corporation Tax for the years 1920-21 and 1921-22, of £1,739,172 18s. 2d. No settlement has yet been arrived at with the Inland Revenue authorities in respect of E.P.D., but the carry-forward is more than ample to cover any possible claims on this or any other taxation accounts.

Digitized by Google

Coming to the credit side of the account you will see that we have now included "advances to associated companies" in the first heading. The word "associated" so far as it refers to advances should, I may mention, be subsidiary, inasmuch as all the advances in question were made to companies in which we own all the shares. Our reason for making this change is that these advances have been made in lieu of issuing fresh capital for our subsidiary companies, and therefore that they, in effect, stand in the same category as our shareholdings in these companies. For example, in the case of the National Oil Refineries, Ltd., our issued share capital was only £200,000, whilst the capital outlay of this company was in the neighbourhood of £3,000,000. By not issuing capital to the full extent of our subsidiary companies' capital outlay, we not only save double stamp duty (i.e., on the subsidiary companies' as well as on the Anglo-Persian Company's issues), but we are in a better position for writing down rapidly, as we hope at an early date to do, a large portion of our capital outlay in these concerns. The amount of advances to these companies, included in the total of £22,022,759 3s. 11d. shown under this heading, is £7,399,938 14s. 5d., representing principally advances to the National Oil Refineries, Ltd., and the British Tanker Company. The next item on this side, viz., refineries, tank installations, pipe lines, etc., shows an increase for the year, after writing off amply for depreciation, of £1,523,334 5s. 2d. —this, of course, representing the expenditure for the year consequent upon the large developments in our operations. Perhaps I should also explain that the contingent liability for uncalled capital in other companies shown in parentheses under the first heading, is chiefly in respect of our participations in the various foreign producing and distributing companies in which we have taken an interest in pursuance of our policy of extending our sources of supply and of creating direct outlets without the intervention of "middlemen," for the whole of our products. But as these companies are entirely under our own control the liability cannot be increased without our consent.

New Issue.

As regards our future financial programme, it is, I think, needless for me to point out that we have not yet got to the end of the vast capital outlay which is required to carry out all the steps necessary to enable the company satisfactorily to meet all competition and to dispose of the whole of its products to the best advantage. As you will have gathered from the large sums which we have carried to depreciation and reserves in this and previous years, we are meeting this capital outlay to a large extent out of profits. But in addition to this further funds are required, and to provide these it is intended to make a further issue out of the ordinary shares which are still available for issue without disturbing the Government's majority interest. The proceeds of this issue, together with our withdrawals from profits for depreciation and reserves, will, we anticipate, suffice to meet all the capital requirements necessary for carrying out our present programme of extensions, including our expenditure in connection with the testing of new territories in other parts of the world.

The issue will be made at the earliest favourable opportunity, and it is intended, as on previous occasions, to give existing shareholders in this company and in the Burmah Oil Co. special consideration in allotment.

Whilst on this subject I would like to say that the board were extremely disappointed at the very small proportion of shares which they were able to allot to applicants for the last issue of ordinary shares. The issue was made at an attractive price in order to give existing shareholders and the public an opportunity of participating in the great prosperity of the company, but it was not anticipated that this would lead to such an enormous over-subscription.

In this connection there is another matter to which I ought to refer, and that is the absolutely unfounded "canard" to which currency was given recently to the effect that the Government and/or the Burmah Oil Co. were desirous of placing their shares on the market. This "canard" was apparently based upon the fact that the company had applied for an official quotation for the whole of the 8,100,000 ordinary shares which have been issued. This application, however, was not made on the initiative of the company or of either of the two shareholders in question. What happened was this. Acting solely in the interests of the public who took up the 600,000 ordinary shares issued early this year, we applied in the ordinary course to the Stock Exchange Committees both in London and Glasgow for an official quotation for these shares only. The application was granted by the Glasgow Committee without question, but was refused by the London Committee on the ground that they could not give a quotation for these shares unless the 7,500,000 shares previously issued were included in the application. We protested against this ruling, but without avail, and therefore had no alternative, short of allowing the 600,000 shares issued to the public to remain unquoted, but to put in an application for the whole number. It will be seen, therefore, that the application for an official quotation for the shares held by the Government and by the Burmah Oil Co. was due entirely to the ruling of the London Stock Exchange Committee.

Refineries.

Having dealt with our financial matters, I will now give you a few explanations in regard to the progress of our working operations. Beginning with refineries, you will have seen from the report that although our refineries at Abadan and Llandarcy have shown a steady increase of throughput the work on extensions has been impeded by strikes and other causes.

The most serious of these interruptions occurred a few months ago at Abadan, where, owing to a strike among the Indian skilled labourers engineered by seditionist agents from India, we had to make a wholesale deportation of over 2,000 of the Indian artisans employed by us. Before this strike occurred we had been gradually training Persians to take the place of the imported Indian labour, and though the process of training was slow, the results, on the whole, were satisfactory. On the occurrence of the strike we decided to substitute the deported Indians by local labour. This has meant a good deal of delay in the carrying out of our extension work owing to the time occupied in the training of absolutely unskilled labour, and will probably postpone the completion of our extensions at Abadan by fully six months, but, on the whole, we have no reason to regret the change, as the Persian, when trained, is at least as good an artisan as the Indian, and at the same time he is less costly to us, inasmuch as the expense of transport to and from India, recruiting and other outlays connected with the employment of Indian labour, are avoided. Moreover, a workman employed in his own country and accustomed to the local conditions of life is more contented, and therefore a more satisfactory employee than a foreigner.

The completion of our extension work both at Abadan and Llandarcy was further impeded by the strike which occurred in the engineering trade in this country last spring, which caused serious delay in the deliveries of plant. Both of these refineries will, however, it is hoped, be in operation to the full extent of the additions which have been budgeted for by the middle of next year, and we shall then be in a position to materially increase our takings of crude from our producing companies and to place on the market a correspondingly increased quantity of refined products.

The refinery which is being erected in France by one of the companies with which we are associated will, it is hoped, be completed within the next two or three months, and this also will admit of a further increase in our production of crude and sale of refined products. The new refinery which is being erected at Grangemouth by Scottish Oils, Ltd., for the purpose of dealing with Persian crude, and the similar one which is being erected by our associated Australian company—the Commonwealth Oil Refineries, Ltd.—will probably be completed by the end of next year, and these will afford a still further means of increasing our production of crude and of providing profitable outlets for the products to be derived therefrom.

The Shale Industry.

The shale mining operations of Scottish Oils, Ltd., have proceeded steadily since the interruption caused by the unfortunate coal mining strike, and the refinery works are now again in full operation. The wages at present being paid to our shale miners are higher than the current rates for coal miners, and we hope that this satisfactory state of affairs may continue, but should there be any further decline in the values of our products, the position will need to be recognised—much as we should regret this—because at present prices we are only working to a bare margin of profit.

Distributing Organisations.

As regards our distributing organisations, both at home and abroad, considerable progress has been made during the past year. In the United Kingdom, the British Petroleum Company and Scottish Oils, Ltd., have largely extended their facilities, with the result that a considerable increase is shown in their sales. Some of this increased demand for our products is no doubt also due to the fact that as time goes on the public are becoming more and more convinced of the superior quality of the B.P. petrol and other products which are being produced by us at our Llandarcy and Scottish refineries. I may mention that with these refineries immediately under the eyes, not only of our scientific staff, but also of the men who have to sell the products, absolute excellence and regularity of quality is ensured, since any batch of petrol, kerosene, or other products, which is not strictly in accordance with the high standards we have adopted is at once rejected and returned to the refinies for re-treatment—a course which is often not

Digitized by Google

practicable when the refining is carried on thousands of miles away.

As mentioned in the report, the distributing organisations which have been created by our associated companies in France, Belgium, Denmark, and Norway have all now begun operations, and are proving valuable auxiliaries to our distributing concerns in this country. Negotiations are still proceeding for creating similar organisations in other European countries, but we are delaying final arrangements until we are ready to supply the quantity of our own products necessary to maintain these additional outlets. During the year we and our associated companies have completed a number of additional fuel oil bunkering installations at important ports of call in the United Kingdom, the Mediterranean, India, Ceylon, Africa, and Australia, and these are now carrying on an active trade.

Production.

Although it is rather putting the horse behind the cart, I will now, to maintain the same sequence as I have followed before, give a few explanations regarding what is, after all, by far the most important part of our business, viz., production, since upon this is based the whole of our future prosperity. Well, on this point I am glad to be able to give you the most confident assurances. As mentioned in the report, the older wells of our producing companies in Persia continue to maintain their wonderful rate of production, the oft-quoted well No. F7 still continuing to produce strongly, whilst other wells brought in promise even to beat this famous well. I have not hitherto quoted the production figures of our producing companies, but now that the public are interested in the Anglo-Persian Company as ordinary shareholders, I think the time has come when this reticence should be abandoned, in order that you may be better able to judge for yourselves as to the future prospects of the company. These figures for the past few years have been as follows:—For 1918-19, 1,106,415 tons; for 1919-20, 1,385,301 tons; for 1920-21, 1,743,557 tons; for 1921-22 2,327,221 tons; and the production for the current year is estimated at 2,900,000 tons. As I have often pointed out, the only limits to the ability of our producing companies to supply us with crude are, so far as we can judge: (1) The capacity of our pipe lines, and (2) the extent of our refineries. The programme that we have been working to for several years has been to bring these two facilities up to a total capacity of 5,000,000 tons per annum. Our pipe lines and pumping stations have now been increased to permit of pumping this quantity of oil to the seaboard, but our refinery capacity has not yet, owing to the delays to which I have referred, reached this figure. Our refinery capacity to-day is approximately about 3,100,000 tons—by June next it should be 4,100,000 tons, and by the end of next year we expect it to reach 4,500,000 tons, at which figure we shall probably rest for the time being until we are in a better position to judge where further refineries can be erected to the best advantage. In other words, our output of refined products twelve to eighteen months hence should—unless some unforeseen event happens—be very nearly double as much as in the year now under review.

As to the ability of our Persian producing companies to produce this quantity of oil—and to maintain production at that rate—there can, I think, be very little doubt. During the year additional test wells which have been put out as "feelers" beyond the proved areas of the fields which we are now operating, have considerably extended the area of the proved territory, and all of these wells give evidence of being of the same high producing character as those from which we are now obtaining our production. We have been carrying on—and will continue to do so—an intensive drilling programme, so that they may be able to maintain production in the event of the wells which we are now operating showing any falling off. A large number of wells has now been drilled, the great majority of which have either been drilled into the oil sands or down to the cap rock, but at the present time we are taking oil from only 15 of these wells, the others being maintained as a stand-by in case of need. Such of the wells as have been carried down to the oil sands and are not required for production have been capped, so that they may be immediately ready for production whenever required. The others only require a few feet of drilling to bring them into production.

These remarks only refer to the operations of our subsidiary companies operating in the Bakhtiari country, viz., the Bakhtiari Oil Company and the First Exploitation Company. Apart from their operations, the Anglo-Persian Oil Company is carrying out extensive testing operations in a number of other parts of the territory covered by our Persian concession. Most of these give promise of favourable results.

Testing Operations in Other Parts of the World.

In order that we may not be dependent entirely upon Persia for our supplies, we have, as you are aware, acquired concessions in various other parts of the world, and are now, either directly or in conjunction with associated companies, conducting drilling operations in three different parts of the Argentine Republic, viz., at Commodoro Rivadavia, Neuquen and Bahia del Fondo, in New Brunswick, Hungary, Yugoslavia, and in Venezuela. No very definite results have yet been obtained in these countries. In the Argentine, we have struck some wells of moderate capacity in the Commodoro Rivadavia field, but we are not yet satisfied that the production is sufficiently large or reliable or the quality of the oil sufficiently good to justify commercial exploitation, particularly under the difficult conditions and unfavourable laws and regulations at present obtaining in that country. We also hold concessions or options on concessions in various other parts of the world on which our geological staff are carrying on investigations before we decide as to the advisability or otherwise of expending money in testing operations. In British New Guinea (Papua) we are carrying on geological investigations and drilling operations on behalf of the Commonwealth Government. These, so far, have given no conclusive result, but are hopeful.

Fleet.

During 1922 the British Tanker Company's fleet has been augmented by the delivery from the builders of eighteen new tankers, which brings the number of vessels—including river and coastal craft—now owned by our own and our subsidiary and associated companies up to a total of 177. Our fleet of tankers has been fully employed and has been working very satisfactorily. The tankers of which we have been receiving delivery for some time past were contracted for during the period of high costs, but as the contracts were arranged on a basis that gave us the full benefit of the fall in the costs of material and labour, the actual cost of these new boats is not unduly high. Moreover, their comparatively high cost is materially offset by the cheap boats which we built and purchased before the boom, by the sale of several of our older boats at boom prices, and by extra writings down for depreciation during the period of high freights, with the result that the average cost of our fleet as it now stands in our books will probably compare favourably with that of any other oil company. In any case these boats were a necessity of our business, for without them we should not have been in a position to ourselves market the whole of our products.

Relations with the Persian Government.

During the past year a very active anti-British propaganda, emanating, it is believed, largely from Bolshevik sources, has, unfortunately, been carried on in Northern Persia. This was chiefly based upon the Anglo-Persian Agreement which has been the subject of so much comment, but it has also been directed to a considerable extent against the Anglo-Persian Oil Company and other British institutions. I cannot believe that this propaganda has had the support of any responsible or well-informed Persians, because I am sure that they all fully recognise that the British support which they have received since the beginning of the war—and before the war—is the only thing that has preserved the independence of the country and has saved it from being over-run by the anarchy and ruin that now prevails in Russia. So far as concerns the part played by the Anglo-Persian Company in the economic and financial situation of the country, I think we can claim that the large sums we have been paying to the Persian Government during the past few years in respect of royalties, and the vast sums of money we have been spending in the country, have been the chief asset of the country during all these troublous times, and that the former has on more than one occasion saved it from a disastrous *coup d'état*. It has been represented that the Persian Government do not receive a proper proportion of the profits made by the Anglo-Persian Company, that the company by exploiting these oilfields is dissipating the wealth of the country, etc., etc. But what is the truth of these statements? The royalty paid by us to the Persian Government is a varying amount dependant upon our profits, but in the financial year under review the amount of royalty paid by the Anglo-Persian and its subsidiary companies, apart from large subsidies paid to the local chiefs, was £553,795 8s. 4d. In Trinidad, for example, a British dependency, the amount of royalty paid on the same quantity of oil would have been £177,000. In Mexico the amount payable would have been £417,000. Even in the United States where the fields are situated in the midst of vast consuming markets and where the oil is consequently much more valuable than in Persia, the amount receivable by the State would have been less than £500,000. In the countries where the royalties take the form of a percentage (usually 10 per cent.) of the crude oil produced, the amount payable would on the average not work out to more than from £200,000 to £400,000—according to the market price of the crude for the time being. So that in the matter of royalty the Persian Government would appear to be doing at least as well as the Government of any other oil-producing country in the world.

Apart from this direct gain to her revenue which Persia is deriving from our enterprise, she is gaining numerous

Digitized by Google

indirect advantages. For example, we are spending in Persia itself no less than about £1,500,000 per annum in payment for Persian labour, supplies of local material, foodstuffs, etc. Of this sum about £1,100,000 per annum is spent in payment for labour alone, this expenditure now giving hitherto unknown employment to as many as 20,000 Persians. No such colossal revenue-producing, or labour-employing, industry has ever before been known in the country, and I have no hesitation in saying that if the exploitation of the oilfields of Southern Persia had been placed in other hands, or had been distributed among a number of individuals or companies, the development of these fields would have been much slower and the income derived therefrom by Persia would have been nothing like so great. Abundant proof of the correctness of this statement can be found in comparing the progress which has been made in other countries—such as Trinidad, Venezuela, and Roumania—where the exploitation has been in a number of different hands.

What does not appear to be understood in Persia is that a large proportion of the profit earned by the Anglo-Persian Co. is not in any way inherent to Persia or to our concession, but is due to the profits made on the refining, transport, and distributing branches of our business which have been established outside of Persia, and on which fully three-fourths of our capital has been expended. Were the Persian fields to shut down to-morrow these branches of our business would still earn their profits, because they could be employed in dealing with crude and/or products from other countries. In nearly all other countries the company which owns a concession is only a producing company, its profits are limited to the profits on the crude oil, and the royalties paid by it—if any—are, as I have already explained, paid in the form of a percentage on the crude, or at a rate per ton calculated on the estimated value of the crude.

Another complaint raised against us is our inadequate employment of Persians. Needless to say, as it is manifestly to our advantage to employ Persians to the greatest extent possible, this is a problem that has always been engaging our attention. When we first went to the country no skilled labour at all was available other than a few carpenters, and to make any progress at all in our operations, we had to import a large amount of skilled labour. But from the very commencement of our operations in Persia we have been training local labour to the utmost possible extent, and, as you will have gathered from my previous remarks, we have now to a large extent substituted this locally-trained labour for the Indian artisans, which at first we had to import in large numbers, notwithstanding that this substitution has entailed considerable loss, owing to the delay in carrying out our operations consequent upon the lesser efficiency of the local labour whilst in process of training. It must be borne in mind that a nomad peasant cannot be converted into a skilled mechanic, blacksmith, tinman, motor driver, stillman, pipe-line layer, or tank riveter by the mere wave of a wand. Each of these craftsmen requires to undergo a long period of training under skilled direction before he can become an efficient workman, and these trained men can only be turned out gradually, and not at the rate of thousands per annum, such as has been necessary for our operations in Persia. But no effort has been spared on our part to train and utilise local labour as expeditiously and as fully as possible.

A desire has been expressed that Persians should be employed in the higher technical work of the company, such as geology, surveying, draughtsmanship, chemistry, engineering, etc., etc. This is a desire which, of course, has our fullest sympathy and support. Our management in Persia have in fact for some time past been engaged in trying to formulate a scheme for the establishment of a technical school or schools of a suitable character at one or more of the principal centres—such as Teheran or Ispahan—and have already practically concluded arrangements for establishing such a school at the latter place. But these schools cannot be a success without the whole-hearted goodwill and encouragement of the Persian Government and of Persians themselves, and I trust that these two important factors in the carrying out of our scheme for technical instruction in Persia will be forthcoming.

Another benefit which the country is deriving from our activities in Persia is that we are maintaining there a large and efficient medical and nursing staff, which, I may mention, not only gives free attendance to our own employees but also to other local Persians, and that we have built three commodious and thoroughly up-to-date hospitals, which are equipped with operating rooms, X-ray apparatus and the most modern surgical appliances, and are, moreover, contributing largely to a fourth hospital situated at Teheran. In Southern Persia, where the benefits we have brought to the country are, of course, more in evidence, and are therefore better appreciated, we are, I am pleased to say, receiving every possible assistance and encouragement from the local chiefs, our relations with whom continue to be of the most friendly character.

I must apologise for taking up so much of your time in dealing with this phase of the company's affairs, but my excuse is that an authorised pronouncement of our views on these questions is necessary in order to correct the many wrong impressions about the company which have been created in Persia by anti-British propagandists.

Mesopotamia.

As the question of the oil rights in Mesopotamia is now the subject of diplomatic discussions it would be out of place for me to make any remarks on this matter on the present occasion.

Staff.

I would again like to express our great appreciation of the services rendered by the staff of this company and of its subsidiary and associated companies. They all take intense pride in their connection with this great company, and never spare themselves in any direction in which they are able to contribute to its prosperity and success. We, in our turn, are doing all in our power to contribute to their welfare and comfort. Not only have we established a provident pension and insurance fund, to which we are contributing largely year by year, but where we have to provide housing accommodation we build houses of the most hygienic and comfortable type possible; at all our principal operating centres we have provided club houses, sports grounds, and other social amenities, and generally we are doing all we can to encourage that feeling of *esprit de corps* which is so necessary for the successful working of all industrial and commercial concerns.

In London we are still suffering considerable inconvenience owing to the lack of sufficient and suitable office accommodation, but our building in Finsbury Circus is now making rapid progress, and will, we hope, be ready for occupation by the end of next year.

I now beg to move: "That the report, balance-sheet, and profit and loss account for the year ended March 31, 1922, be received, approved and adopted."

Sir Edward H. Packe, K.B.E., seconded the resolution.

Reply to Questions.

The Chairman, in reply to questions, said that the board fully sympathised with the desire of existing shareholders in the Anglo-Persian Company and the Burmah Oil Company to get a maximum allotment of the new issue, and to such an extent as might be practicable shareholders might be sure such allotment would be made. The matter would have the very fullest consideration of the board. A question had been asked as to the company's position with regard to the concessions in Northern Persia. The position was that the company was still maintaining its claim, but nothing definite had been settled. As regarded pipe-lines, they had two 10-inch pipe-lines now completed to the Persian Gulf, and they were now capable by them of piping 5,000,000 tons of oil per annum. Another shareholder had asked whether the contract which would expire at the end of this year had been renewed. That contract had not been renewed. They were perfectly free to sell themselves the whole of their products up to the full extent of their ability to do so. So far as the payment of a half-yearly dividend was concerned, the directors were in full sympathy with the desire of the shareholder who had suggested that an interim dividend should in future be paid. That matter had already had the consideration of the board, and they would pay an interim dividend this year if they thought it practicable to do so.

The resolution was carried unanimously.

The Chairman then proposed: "That a dividend at the rate of 20 per cent. per annum, less income-tax, on the ordinary shares of the company, be declared in respect of the year ended March 31, 1922, and that such dividend be paid on January 31 next."

Sir John T. Cargill, Bart., seconded the motion, which was carried unanimously.

The Rt. Hon. Lord Southborough, P.C., G.C.B., G.C.M.G., G.C.V.O., moved that the retiring directors (Sir Charles Greenway, Bart., Admiral Sir Edmond J. W. Slade, K.C.I.E., K.C.V.O., and Mr. Robert I. Watson) be re-elected. Sir Hugh S. Barnes, K.C.S.I., K.C.V.O., seconded the motion, which was unanimously approved.

The auditors (Messrs. Brown Fleming and Murray) were reappointed.

Resolutions were passed altering the articles of association to provide inter alia for an increase in the directors' remuneration, and it was also resolved to extend the borrowing powers of the company.

The Chairman stated that these powers were only being taken as a necessary business precaution

A hearty vote of thanks was accorded to the chairman, and the meeting terminated.

NOTES OF THE WEEK.

The Lausanne Conference.

The Conference at Lausanne has survived a critical week, and the number of possible rocks ahead has now been considerably diminished. By common consent, most of the credit for this satisfactory state of affairs is due to Lord Curzon, whose handling of the discussions has been marked by consummate tact and has revealed a master mind. The question of protection for minorities found the Turks in their most unyielding mood, and Ismet Pasha adopted aggressive tactics in striking contrast to the conciliatory attitude which he had assumed in the debates on the freedom of the Straits. Lord Curzon took up the Turkish challenge and threatened to break up the Conference. At the next meeting, Ismet Pasha, having had time for reflection, accepted the Allies' proposals. Turkey consents to join the League of Nations and agrees to clauses providing for the protection of minorities and to the principle of an amnesty. The details of the guarantees considered necessary in this connection were to be discussed further on Monday; but it was evident that the Turkish Delegation had made up its mind to promise acquiescence in the Allies' demands. Outside those demands a debatable point has arisen in the future of the Œcumenical Patriarchate. The Turks propose that, inasmuch as they have deprived the Khalifate of its temporal power, the Patriarchate should also lose its political prerogatives, and they would prefer to have the whole institution removed from Turkish territory. The question is still under discussion.

Conviction or Expediency?

It is true that the Peace Conference will not have been the first occasion on which Turkey has promised not only to protect Christian minorities in her midst, but also to reform her ways in general. The cynical, therefore, can affect mirth or bitterness, according to their mood, over the proceedings at Lausanne; but no one, as far as we are aware, can point to any other feasible way of reaching a settlement in the Near East. There can be little doubt that financial stringency is for the moment the compelling motive in Turkish reasonableness. When it is recalled how perilously near Great Britain came to war over no tangible issue, there is abundant reason for feeling grateful that room has been given for the play even of this motive. Before it has exhausted its effect, we may hope that a far more solid foundation for Turkish reasonableness and reform will have been laid in the recognition that the new Turkey can dispense with neither the funds nor the friendship of Great Britain. The Nationalists, under Mustapha Kemal Pasha, may have been able to draw up an admirable programme for the rehabilitation and independence of Turkey; but they have not proceeded far on the road before realising that their goal is unattainable without the financial backing of a strong and trustworthy friend. They will have learned from the proceedings at Lausanne that the support that they need is to be had only on certain conditions. They have given sufficient evidence of the genuineness of their nationalism to lead one to suspect that (whether from conviction or for expediency need not be inquired) they will subscribe to those conditions.

The Position in Greece.

The fears expressed in these pages a fortnight ago, that events in Greece would prove to be merely the swing of the political pendulum, are unfortunately receiving confirmation. Thus a correspondent in the *Manchester Guardian* writes: "The Liberal (or Venizelist) Party have to-day full control, and have resorted to their old tactics of arresting their political opponents in order to safeguard themselves and be certain of their position as governors of the country. By these tactics the Liberal Party is doing its utmost to prolong and intensify the already bitter feeling of party hatred which is quickly ruining the kingdom of Greece." In other quarters—politically prejudiced, perhaps, but nevertheless Greek—it is averred that the Greek Government proposes to consolidate its power by enfranchising at once as many of the refugees from Asia Minor as it can, and, in furtherance of the same object, is contemplating the introduction of woman suffrage. The new voters, it is hoped, will show their gratitude by supporting those who enfranchised them. Practically any

Digitized by Google

measures calculated to bring peace and unity to distracted Greece are to be welcomed, but it is open to grave doubt whether the present tactics will achieve that end. It is, however, a matter in which non-Greeks cannot interfere. The true friends of the country must necessarily continue to feel uneasy in the presence of any policy that tends to drive the political cleavage deeper and deeper into the nation's soul.

M. Pashitch in Power Again.

The expectation that we expressed last week of seeing M. Pashitch back in office again very shortly has already been fulfilled. Either the Opposition groups could not find enough in common to unite them solidly, or else M. Pashitch was once more able to establish some sort of balance between the groups whose co-operation has lately kept him in power, and felt strong enough to face the Croatian peril. Probably, indeed, he brought about the situation in his own way and for his own purposes. At all events, a short telegram from Belgrade told us last Saturday that the ex-Premier had been asked by King Alexander to form a new Government, and no mention was made of any effort by any other Minister, or of any invitation to any other Minister, to try his luck. Whether it can be an entirely good thing for Yugoslavia that M. Pashitch should thus be made to feel that he is indispensable; whether an efficient substitute could not have been found and have carried on the business of Government successfully; and what will happen when M. Pashitch, for some reason or other, really cannot carry on any longer—these are interesting questions, but to be answered satisfactorily only by the Yugoslavs themselves. Meanwhile, M. Pashitch, like Tennyson's Brook, "goes on."

Italy's Graceful Act.

We are inclined to congratulate Italy no less than Albania on the pledge given by the former to suppress her post offices in Albania on January 1. Our Tirana Correspondent's letters have made clear how strongly the existence of these post offices is resented by the Albanians, who have regarded them not only as blots on Albania's independence, but as affording Italy an opportunity to tamper with documents that passed through them. In fairness to the Albanians, we must add that it was not only they who held the latter view or believed that the opportunities were not lost. In any case, even if the suspicions indicated were never justified, the post offices were a serious offence to the people amongst whom they were dumped, and Italy, by removing them, is sure to gain far more than she could possibly lose. It remains, of course, for Albania to prove that it can run an efficient postal service of its own, and we have no doubt that it will do so.

Angora and Islam.

The Angora Government appears to be bent on making a serious effort to propagate Islamism, and has appointed a committee of *Ulema* to consider the subject. At the same time a "Council for Examination of Litigious Questions" has been formed, for the purposes of: (a) defining the position of Islam in relation to modern developments; (b) developing Islamic doctrine, having regard to the necessities of the age; and (c) the promulgation of *Fetvas*, which, it is proposed, shall henceforth be drawn up by the Council in accordance with the doctrines of the four principal Sunni sects. The carrying through of this programme might very well have far-reaching results on the Moslem world, and though we need not expect to see any return of that great wave of fervour that bore the Arabs to Spain and threatened to engulf Europe, we may see a further tightening of the bonds that already bind Moslem lands together. That need not involve any threat to non-Moslem lands; and, indeed, if the Council succeeds with points (a) and (b) of its programme it might bring about better relations—through better understanding—between Moslem and non-Moslem peoples. At the same time we must admit that the appointment of Sheikh Abdul Aziz Shawish as president of the committee of *Ulema* does not inspire in us any hope that the committee will show either a progressive or a conciliatory spirit. The Sheikh's record rather suggests that the Committee is intended to be of a distinctly militant character.

Angora and Kabul.

Afghanistan has for some time made no secret of its admiration for Angora, but it is rather astonishing to find that admiration sufficiently powerful to induce a formal acknowledgment of the latter as "suzerain" of Afghanistan. That, however, is what is actually done in a treaty of defensive alliance recently signed, so the *Times of India* reports, by the two parties. It is true that the Afghans explain that the expression is used only in connection with the authority of the Islamic Khalifate, but even so it seems a big concession to make—and thus goes to show how deeply the struggle of Angora has impressed other Moslem countries with the sense of its championship of Islam. The Treaty itself is not very important, perhaps, its clauses being largely devoted to stating the friendship of one party for the other. It is interesting, however, to note that it recognises the independence of the Governments of Bokhara and Khiva. The two signatories agree not to negotiate with a third Government which is hostile to either of them; and by an earlier clause, a defensive alliance comes into operation in the event of a foreign Power committing any act of aggression against either Government. Geographical considerations, it would seem, might render effective co-operation in such case somewhat difficult.

A Sudan Rising.

A rising is reported from the Sudan, but does not appear to be causing any uneasiness to the authorities. At the end of September, encouraged by the machinations of a local "rainmaker," a body of Angessana tribesmen in the Tabi Hills district of the Fung country murdered two policemen and a clerk; and, later, the spirit of rebellion apparently making itself felt, four merchants were killed, and the Government Office at Soda was attacked by a thousand Angessana. The attack was unsuccessful; but it was evidently necessary to give the tribesmen a lesson, and a small punitive expedition was despatched, consisting of a company of Sudanese infantry and one of the Eastern Arab Corps Very unfortunately, the expedition came to grief. During night operations on December 4 one party missed direction, with the result that the two parties mistook one another for enemies; one fired on the other, and a British officer and one man of the Arab Corps were killed. That is not, of course, the end of the incident, though at the time of writing it is all the news available. The Angessana have still to be taught their lesson.

Persia and the Soviets.

There have been signs for some little time past that the Persians were becoming tired of repeated interference with their affairs by the Russians, and it is not at all surprising, therefore, to be told by the Riga correspondent of *The Times* that relations between the Soviet Government and Persia have become strained. It appears that M. Shumiatsky, who now represents Russia in Teheran, requested the Persian Government to

Digitized by Google

expel from its territories certain people who were reported to be hostile to the present régime in Russia. The Persian Government refused, and M. Shumiatsky and his principals have taken serious offence. If we may regard the incident as another manifestation of Persia's determination to be mistress in her own house, we can only applaud that resolve; and though it may seem a daring thing for Persia to oppose her big neighbour's wishes in any way, the risk run is probably a very slight one indeed. It would almost certainly not pay Moscow to have an open rupture with Teheran at the present time.

THE WEEK AT HOME.

London, Monday Evening.

The Christmas Recess.

Parliament is up, and will not reassemble till February, unless something extraordinary happens. The past three weeks have been a kind of rehearsal, and the curtain will not go up on the real play till the spring. But the rehearsal has been very interesting, and it will be curious to see whether one's first impressions of the House are justified.

Everybody admitted that the last Parliament was tame; its members were like the patient Griselda—the worse they were treated by the Prime Minister the better they liked it. The new House is just the reverse, a sort of Katharine the Shrew, and the more reasonable Mr. Law is the more he is stormed at and criticised. All that is good for a Government, but I am not sure that the Opposition tactics will be profitable for the Opposition in the long run.

The centre of the trouble is Glasgow, which is not only Mr. Law's own city, but the headquarters of the Bolshevists, Communists, and others of that kidney. These men are entitled to their own opinions, and they are equally entitled to be a nuisance to the Government; indeed, that is the function of an Opposition. But when you obstruct, you may as well do it properly. An old Irish member who watched the scene last week, and who remembered the great days of Parnellite obstruction, forty years ago, had almost a tear in his voice when he criticised the ineffectiveness of the young Bolshevists from Glasgow. "Those lads," he said, "have a lot to learn. They should have studied the game before playing it."

Parliamentary Obstruction.

Obstruction is a game, and a quite good and exciting game when you play it properly; but it is essential to know the rules of procedure before you begin. It is easy to waste time by speeches and points of order and amendments; there are ample precedents no more remote than the great Budget of 1909 and Home Rule in 1912. But always you keep up an appearance of sweet reasonableness, of wanting to know—like Rosa Dartle; and if you are very subtle, of wanting to help. The Labour men did none of these things. They just opened their mouths and howled.

Now mere noise never produced anything but headaches and bad temper, and the Labour men lost their tempers first. On Monday they threatened to keep the House sitting without a break till Friday, and the Government settled down peacefully to an all-night sitting. Such things have happened before, and no Government with a real majority minds them. Enough men are kept to hold the fort, the remainder go to sleep and are summoned when the garrison are tired.

In this case Labour got tired first, and collapsed early in the morning—an ignominious end. Hence the afternoon headache, and the pandemonium, when half a dozen members stood on their feet shouting incoherent things at Mr. Law because he has not solved the question of unemployment in three weeks.

The Speaker and the Leaders.

I see that the Speaker has been criticised because he did not suspend these noisy fellows, and he has been accused of weakness in some newspapers. Mr. Whitley is a Yorkshireman, and like most of the folk in that county, he has sufficient backbone for most situations; nobody who knows him could call him weak. But he took the view that the new boys at the school must be warned before they are punished; if they are incapable of learning their manners, there will be time enough to use the birch. That seems to me a quite sound attitude. I remember something of the same kind occurring early in 1906—only then it was the new Liberal majority that was intolerant of the small Conservative minority. Mr. Speaker Lowther was not too severe and things soon settled down.

There has also been some criticism of Mr. Ramsay Macdonald and Mr. Clynes because they did not control their own followers. But a greater than they—Mr. Balfour—found that an impossible task one afternoon in 1911, when the Conservatives howled down Mr. Asquith and refused him a hearing. A parliamentary party is not an army under rigid discipline, and if men are determined to make a scene, they will make it.

The Future of Labour.

For all that, I should not care to be Mr. Macdonald. He has the most difficult post in the new House. His sympathies are all with the Sidney Webbs, Morels, Ponsonbys, and Trevelyans, but these men are either quiet speakers or do not speak at all, whereas the Bolshevist contingent—on whose raucous Glaswegian voices I should like to hear his private views—roar like the bull of Bashan, and make his position very difficult. Mr. Macdonald is not without ambition, and he is studying for the part of Prime Minister one of these days. But every time Glasgow opens its mouth the prospect of Downing Street becomes more remote, and the Liberals chuckle at his discomfiture.

I did not sit through the all-night sitting. But I looked through the Hansard report of it afterwards, and I was amazed at the barrenness of the speeches. If Labour wants to oppose effec-

tively, it must at least make a pretence of putting forward constructive suggestions. Mere noisy rhetoric will not do at Westminster.

The Liberal Position.

As to the Liberal section of the Opposition, they are full of quiet confidence. They are the good boys of the school, and they take a great deal of pleasure in seeing Labour make itself conspicuous in the wrong way. Further, the Wee Free element has been enjoying the damaging revelations as to the late Cabinet's methods of conducting its Near East policy—several Ministers have had to avow that they did not read, and had no recollection of, Foreign Office despatches—and the upshot of this is that Coalition is dead. The Lloyd Georgites have their tails between their legs, which facilitates Liberal reunion; and Mr. Lloyd George seems to have forsworn foreign affairs for the time being, and taken himself to agriculture. (A dangerous subject for him, after the famous land campaign ten years ago, in which pheasants were "hunted" and lived on mangel-wurzels.) If things go on like this, the Liberals will be united in another twelvemonth.

The Thompson Case.

The newspapers have been full of the Thompson-Bywaters case. Both prisoners were sentenced to death, with no recommendation to mercy. Immediately, Mr. John Drinkwater, who is a good dramatist but an incurable sentimentalist in other respects, rushed into print with an argument that it was incredible that a woman should be hanged; the opponents of all capital punishment took up the discussion, and Dr. Bernard Hollander had something to say about psycho-analysis. All this was good for the newspapers, but I do not know that it has helped the perpetrators of a sordid crime. As a fact, it has led to a distinct revulsion of feeling. It has been pointed out that the sentimentalists have rather overlooked the real victim, the murdered man Thompson; and that there is no reason why a woman should not be hanged if she commits a murder as well as a man. It happens that no woman has been hanged for about twenty years, but in this respect the law recognises no difference between the sexes. And as to the psycho-analytic theory, which boils down to the assumption that nobody is responsible for his evil instincts, the public quite rightly will have none of it. Psycho-analysis is doing some very useful work, but not in this direction.

A petition is to be got up to reprieve the guilty couple, and no doubt it will be extensively signed. People are always ready to sign petitions, but they have little effect as a rule. And it is felt that if the prerogative of mercy is exercised in this case, there will be no grounds for future executions. The law of capital punishment would be tacitly abolished.

Recent Books.

The second volume of "Human Immortality" (Macmillan), by Sir J. G. Frazer, suggests that this still incomplete work may in time come to rival "The Golden Bough." It contains a vast amount of savage legend and belief as to the destiny of the soul. The conclusion so far reached is as follows: "The notions which the Polynesians entertained on this subject cannot but strike a civilised European as childish, while the customs which they based on them must appear to him in great part foolish, even where they were not barbarous and cruel. How far such childish notions and foolish customs tend to confirm or to refute the widespread, almost universal, belief in the survival of the human soul after death, is a question which I must leave my readers to answer for themselves."

The publishers are turning out Christmas books by the ton, but that particular variety of what I suppose must be called literature hardly requires comment. Almost buried under these tomes, I discovered a wonderful story last week in "The Worst Journey in the World" (Constable), by A. Cherry-Garrard. The author was the survivor of Scott's last expedition, and there is a grim narrative of how he found Scott's body, and a description of that last winter in the Antarctic, and how the water in the blisters on the fingers froze. It is a marvellous story of courage and endurance, and I must add that it is no less marvellously told. The narrative will become a classic.

"Medical Psychology and Psychical Research" (Methuen), by T. W. Mitchell, consists of a number of very interesting papers, mostly contributed to the Society for Psychical Research. Apart from the discussion of hypnotism and hysteria, the book deals largely with the difficult problems of multiple personality.

"Past Times and Pastimes" (Hodder and Stoughton) is the autobiography of Lord Dunraven. A book by a man who is so universally respected, and who has touched life at so many points, could hardly fail to be interesting; it contains much about Ireland, Mayfair, big game, and yachting.

"The Ordeal of Mark Twain" (Heinemann), by Van Wyck Brooks, makes one realise the unsuspected tragedy of Twain's life. He sold his great gifts to get money and applause; he was frightened of public opinion, and never strayed beyond what he thought it would approve—and in the case of America in the latter half of the nineteenth century its limitations were severe. "From the moment of his marriage his artistic integrity, already compromised, had been irreparably destroyed. Quite literally, as a man of letters, his honour rooted in dishonour stood. He had accepted his father-in-law's financial assistance; he had bought his post on the Buffalo *Express;* in return, he had solemnly pledged the freedom of his mind. Almost incredible, in fact, to one who is familiar with the normal processes of the literary mind was Mark Twain's fear of public opinion—that fear which was the complement of his prevailing desire for success and prestige."

Twain himself wrote that: "Only dead men can tell the truth; man is the meanest of all animals and life a tragic mistake." That is a very different Mark Twain from the writer of the books; but he had at least one consolation: "My life is a bitterness, but I am content, for she (a dearly-loved daughter) has been enriched with the most precious of all gifts—the gift that makes all other gifts mean and poor—death." That Mark Twain could write thus shows how terribly he had suffered and how bitter at the last was the success which he loved and came to hate. OCELLUS.

The Near and Middle East.

From Our Own Correspondents.

EGYPT.

Cairo, December 7.

A Week of Sensations.

During the past week we have had more than our share of sensations. First there came the resignation of the Sarwat Cabinet and the appointment of Tewfik Nessim Pasha, with all the dramatic circumstances in which the crisis came to a head. Then, close on the heels of that event came the news of the wonderful and unprecedented Egyptological discovery made by the Earl of Carnarvon and Mr. Howard Carter in the Valley of the Kings.

The Cabinet Crises.

My last letter will, in a measure, have prepared you for the development which the political situation has undergone. At the time it was written political intrigues were active and were fast reaching a point where it looked as if it would be impossible for the Sarwat Cabinet to remain in office with any regard for its dignity. We had, however, during the past summer been through so many crises, all provoked from the same quarter and with the same underlying motive, that there still seemed a possibility that the Cabinet that had weathered so many storms would contrive to overcome the latest difficulty that confronted it, particularly as it was known that neither the question of the Sudan nor the Constitution nor the representation of Egypt at the Lausanne Conference was actually the point at issue between the Palace and the Cabinet.

What brought matters to a head were the increasing violence of the attacks on the Cabinet made by the Wafd and its organs and the official encouragement given by the Palace to the Wafd in this connection. When it transpired that, in the midst of a series of violent diatribes against the Cabinet, the President of the local committee of the Zaghloulist Wafd had been received in audience by the King, and had been permitted to publish a *communiqué* to the effect that this audience had been long and cordial, Sarwat Pasha, very rightly considering that this represented a public indication that his Cabinet was no longer in the good graces of his Sovereign, tendered his resignation. This, it may be noted, was accepted at once in a letter, the stereotyped form of the expression of thanks contained in which misled no one as to the real view of the Palace.

Reception of the New Premier.

As was to be foreseen, the King forthwith entrusted the formation of a new Cabinet to Tewfik Nessim Pasha, who immediately accepted. Nessim Pasha, whose entry into the Palace's service some six months ago was expected to be followed by important political developments, has had a great share in bringing about the *rapprochement* between the Palace and the Zaghloulists, and it was, therefore, only natural that in the circumstances the King should turn to the man who had been his adviser and chief instrument.

Undoubtedly, the appointment is a popular one. His nomination has, indeed, been received by the Wafd organs and the rest of the Opposition with an enthusiasm only equalled by the storm of execration and abuse which has accompanied the exit of the Sarwat Cabinet.

Sarwat Pasha's Services to Egypt.

This reception is little deserved by Sarwat Pasha and his colleagues; for, no matter in what respect his mode of administration may have fallen short of the ideal, it is extremely doubtful whether, if his opponents had been in office, they would have avoided the errors of omission and commission of which they accuse him; and the fact remains that of all Prime Ministers he alone can definitely show that benefit has accrued to his country as a result of his tenure of office. Not only did his acceptance of the premiership in March last secure for the Egyptian nation the removal of the British Protectorate and the recognition by the world of Egypt as an independent sovereign State, but Sarwat Pasha has prepared a Constitution for the country of such a liberal nature that even the Opposition, ever on the alert for a peg on which to hang an attack on the Cabinet, has not been able to find any fault with it.

Sarwat Pasha and his colleagues can well afford to ignore the present storm of abuse which has descended upon their heads. The part they have played in the defence of the interests of their fellow countrymen is writ large on the pages of history, to which they can with confidence leave the appreciation of the true value of their services to their country, and they will no doubt console themselves with the thought that public opinion in Egypt is so fickle and unstable that, just as to-day they hold in the public eye the position which Nessim Pasha himself held in March, 1921, so, possibly, in the very near future, the tables may again be turned.

The New Cabinet.

The new Cabinet consists of seven former Ministers and three men new to Cabinet rank. Ismail Sirry Pasha, at the Ministry of Public Works, returns to the administration which he had previously controlled for so many years with such success. Mahmud Fakhry Pasha, who was Minister of Finance in the former Nessim Cabinet, is a son-in-law of the King, and is certainly well suited by his intellectual and cultural gifts to be at the Foreign Affairs. Yusef Suliman Pasha, the new Minister of Finance, was formerly Minister of Agriculture, while Yehia Ibrahim Pasha, Tewfik Rifaat Pasha, Ahmed Zulfikar Pasha all return to the portfolios they held under Nessim Pasha in 1920. The new recruits are Ahmed Ali Pasha

(Agriculture), from Under-Secretary of the Interior; Mohamed Ibrahim (Wakfs), from Under-Secretary for Justice; and Mahmud Azmi Pasha (War) was a Lewa in the Egyptian Army and a noted Zaghloulist.

The new Cabinet is undoubtedly, and as was to be expected in the circumstances, a Palace formation, and, except in so far as concerns the new Prime Minister, it is not regarded as a strong combination. On the political side, everything will be concentrated in the hands of Nessim Pasha, who has already shown himself to be an able and far-seeing politician and administrator, and whose strength of character and integrity command universal esteem. In regard to finance, however, a good deal of apprehension is expressed, for the new Minister has no experience; and, under the conditions which have been latterly introduced, where the Minister of Finance now actively directs financial policy, the absence of such an able financier and economist as Sidky Pasha proved himself to be is bound to be sorely felt.

The Future?

The next few months will be full of interest from every point of view. It remains to be seen whether, having come into power with the support of the Palace and the extremist elements, Nessim Pasha will be able to resist, without loss of popularity, the demands which both those elements are bound to make upon him. Also it will be interesting to see how the new Cabinet gets over the difficulty of the Constitution, which, for all practical purposes, now only awaits the signature of the King, and of the vexed problem of the Sudan.

Already a section of the Opposition Press is complaining that, as Nessim Pasha has declared that there is no need for a declaration of policy, as the country is already overloaded with unfulfilled promises. he is following the example of silence in regard to the activities and intentions of the Cabinet for which Sarwat and his colleagues were so bitterly criticised. It is, indeed, not difficult to foresee that, as time goes on, the new Cabinet will, by the very force of circumstances, gradually create for itself, where at present it finds support, an opposition which will make it just as difficult for it to carry on as has occurred in the case of the Sarwat Cabinet. And thus the further realisation of the country's aspirations and the general settlement with Great Britain may quite easily suffer an indefinite postponement.

The Egyptological Discoveries.

Coming now to the other sensation of the week, the Egyptological discovery of Lord Carnarvon and Mr. Howard Carter, there is little doubt not only that the contents of the chambers now opened constitute intrinsically and scientifically the most valuable find of modern times, but that, confronted by the combination of the seals of the inspectors of Rameses IX. on one of the inner walls, with the two statues of Tutankhamen found guarding that wall, we are on the eve of an even greater find.

The local Egyptological world is all agog and can scarcely possess itself in patience until the chambers can be sufficiently cleared to permit of breaking the seals on the inner wall, and, to judge by the cables, Egyptologists the world over are similarly excited. Never before has the funerary paraphernalia of an ancient Egyptian King been found intact like this, and never before have objects of this description been laid bare in such a perfect state of preservation. Earl Carnarvon and Mr. Howard Carter deserve the thanks of the scientific and intellectual world for the initiative, enterprise, and perseverance which they have displayed, and without which, judging by the experience of what other excavators have done in the past in the same area, these precious trophies, together with the knowledge they give us of a practically unknown period of ancient Egyptian history, would never have been revealed to the world.

GREECE.

Athens, December 10.

Prince Andrew's Trial.

The trial of Prince Andrew took place last Saturday morning in the Parliament House, and in the presence of a large crowd.

The Prince, who was commanding the II. Greek Army Corps during the unfortunate operations on the Sakaria River last year, was accused of having disregarded an order given him at the time by the Commander-in-Chief, General Papoulas, and of following out his own plans. In his preliminary evidence General Papoulas had said that it was partly due to this that the Greek Army had met with disaster.

The Court consisted of twelve officers under the presidency of Brigadier-General Vlahopoulos, and the Prince's defence was undertaken by M. Damaskinos, who was assisted by a military expert nominated by the Court. General Papoulas and the ex-sub-chief of staff during the operations on the Sakaria, Colonel Saryiannis, gave evidence against the accused, while one or two other witnesses, among whom was M. Carvounis, a journalist, who accompanied the II. Army Corps throughout the campaign as war correspondent of the *Politia*, gave evidence in the Prince's favour. The hearing was concluded at eight o'clock in the evening, and the verdict was pronounced two hours later. The Prince was found guilty and sentenced to banishment for life and loss of his rank.

On the following afternoon Prince Andrew and his wife, Princess Alice, left for Brindisi en route for England on board the British cruiser Calypso. His Highness was accompanied as far as the pier at New Phaleron by Commander Talbot and the Minister for War, General Pangalos.

Mr. Lindley's Departure.

Although nearly a fortnight has elapsed since Mr. Lindley left Athens, Great Britain's action in breaking off diplomatic relations with Greece continues to be the main topic of conversation here. Official circles are, naturally, treating the matter as lightly as possible and call it "a diplomatic rupture of a mild nature"; the man in the street, however, views the whole business in an entirely different light. He, especially the Venizelist, was at first under the impression that Mr. Lindley was merely bluffing, and that, despite his threatening "Notes," he had not the slightest intention of leaving Greece. When, on the morning after the execution of the ex-Ministers, he was informed (by kind permission of the Censor) that the British Minister had in reality gone, he remarked that he "was only going as far as Lausanne to tell Lord Curzon how it all happened," while the more optimistic explained—and quite believed it themselves—that Lord Curzon had recalled Mr. Lindley at the request of M. Venizelos! But when, two days later, the newspapers were given permission to publish the truth, their optimism evaporated completely. Only then did they begin to realise that they had lost their best friend and ally, and that they would derive but little benefit from the "French" policy which they had adopted. All hopes of financial assistance from the British markets were dashed to the ground, and the pound sterling jumped from 320 to 400 drachmae.

Greece, it is argued, may have gone somewhat far in punishing in so severe a manner those to whom the Court had attributed the disasters which had befallen her, but the country has, after all, a right and a duty to safeguard its interests and to give a warning lesson to the politicians of the future. As the Athens Press points out, British people should not forget that executions have been carried out quite recently in Ireland for offences of considerably less importance than those committed by M. Gounaris and his colleagues.

The Censorship.

Censorship was bad enough before the revolutionary movement broke out, but now, especially since the five ex-Ministers and the ex-Commander-in-Chief were executed, it has become unbearable, and the unhappy foreign correspondent never really knows whether his telegrams will ever reach their destination.

Censorships, as a rule, aim at preventing the leakage of news of a military nature which might be useful to the enemy. It is not so in Greece. The Censor in this country is merely used as the means to stop the transmission of any news which, in his (the Censor's) opinion, would create a bad impression abroad. When, a few weeks ago, the writer tried to telegraph to London that the Government and the Revolutionary Committee could not agree on the reply to the last British Note, Mr. Censor calmly remarked that such a telegram could not be allowed to leave the country, as it would convey the impression abroad that the Greeks were quarrelling among themselves!

But what annoys the foreign correspondents more than anything is the existence—and we only found out a few days ago—of a second Censor, hidden somewhere in the telegraph office. Telegrams that are passed by the Censor at the Foreign Office are ruthlessly suppressed by the invisible Censor No. 2 at the Post Office. Three of my telegrams announcing the breaking off of diplomatic relations between Great Britain and Greece, also a description of Mr. Lindley's departure from Athens, although stamped and initialed by the Censor at the Foreign Office, who assured me that they were quite in order, apparently never reached their destination. Mr. Censor will no doubt be surprised to hear that the British public knew of the British representative's departure from Athens and of the diplomatic rupture between the two countries many hours before it was generally known here.

More Refugees.

Seven Greek ships have sailed for Constantinople in order to transport the 40,000 refugees from the Pontus who are now concentrating in the Turkish capital. These refugees will be sent to Epirus.

A telegram from the Greek Patriarch states that 5,700 Constantinople Greeks, having sold their property, have left for the Piræus.

The new law for the obligatory sheltering of refugees has appeared in the *Gazette*. Special commissions are now making a list of all houses in Athens where accommodation is available.

Vice-Admiral Smith.

It is understood that the rumour to the effect that Vice-Admiral Smith, head of the British Naval Mission, would take his departure from Greece, accompanied by several of his staff officers, is without foundation. The Admiral does not intend, at least for the present, to leave Greece.

ROUMANIA.

Bucharest, December 12.

Students' Manifestations.

The chief event of the past week was a number of students' manifestations of a more or less anti-Jewish character, which took place at the Universities of Cluj, Bucharest, and Jassy. The manifestations first broke out at Cluj, and the principal cause of the conflict between the Christian and Jewish students appears to lie in the fact that, as there are not sufficient corpses available for dissection purposes at the Faculty of Medicine, the Jews were repeatedly asked to contribute Jewish unclaimed corpses. As they did not comply with this demand, the Roumanian students retaliated by forbidding them from attending the anatomy classes until they brought Jewish corpses unclaimed by relations. The Jewish students, who, numerically, are well represented at the Cluj University, resented this, and the affair degenerated into riots. Owing to the fact that the "corpse question" prevails at the other universities also, these manifestations soon found echo at Jassy and Bucharest, where the Christian students were partly incited by certain university professors, who have always propagated anti-Jewish feelings, and partly nettled by certain pro-Jewish papers, which made offensive remarks about the students in general. The Roumanian students further claim a restriction of the number of Jewish students, owing to the fact that the number of Jewish students—and especially of Jewish refugees from Russia—has lately increased to such an extent that the different universities are packed to overcrowding. The authorities will no doubt repudiate such a restriction on Roumanian Jews, who are now considered as full Roumanian citizens, but will be compelled to take some action in the case of all foreigners.

In Parliament several members of the Opposition have made interpellations, urging on the Govern-

ment to put a stop to such disturbances. To these demands Ministers, including the Prime Minister, replied that strong measures have been taken to put an end to these excesses, and that they are further making thorough investigations in order to discover the wire-pullers behind the scenes, for the Government is fully alive to the harm which is being caused to the prestige of this country by such disturbances. The Prime Minister, in further deprecating these riots, emphasised that no difference will be made between the citizens of this country, irrespective of creed and nationality.

On Sunday the police and military were called out at Bucharest, and in one instance they had to fire in the air in order to disperse the demonstrators. Thanks to the Government's drastic measures, things have calmed down somewhat, and probably to-day or to-morrow the universities will be reopened, after having been closed for more than a week.

Some papers profess that the Magyar Irredenta Association in Transylvania may have had a finger in the pie in stirring up the conflict at the Cluj University, in order to keep this province in a constant state of uneasiness and dissatisfaction, and thereby to throw a bad light on the Roumanian State in connection with its treatment of the minorities.

General News.

It is reported that, in view of the great needs of the Army and its necessity of always having to be ready for any emergency, the Government has initiated the discussion of opening a large credit for the War Office. It is rumoured that the credit in question will be of at least 4,000 million lei. A final decision in this connection will be taken shortly.

At the Disarmament Conference, which is now being held at Moscow, Prince Radziwill, Poland's delegate, is also representing Roumania, but solely as an observer, and without the power of making any commitments on Roumania's behalf.

ALBANIA.

Tirana, November 29.

The National Anniversary.

The national fête of November 28 has been celebrated this year with unexampled brilliance. It was the tenth anniversary of the proclamation of independence at Valona in 1912. In the ceremonies nothing was lacking—there were military parades, processions, speeches, fireworks, and banquets—and the news reaching Tirana is to the effect that the fête was observed with no less pomp in other centres, at Scutari as at Koritsa and Argyrokastro.

Cultural Beginnings.

Advantage was taken yesterday of the occasion to inaugurate the National Library and the Albanian Museum. The library has been in existence for over a year, but it was only quite recently that a special building, and one easily accessible to the public, has been obtained for it. The Albanian Museum originated from a circular letter sent, six months ago, by the Minister of Public Instruction to all the prefectures, requesting them to look carefully after national monuments, and to collect in each municipality small relics that might be of historical or artistic importance. In the museum there are already several stone monuments from different places; but, still, the beginning is modest.

The Pardon of Prisoners.

The Government, in accord with the High Council, has pardoned several condemned politicians who were implicated in the troubles of last March.

The Southern Frontier.

A week ago Colonel Botzaris, the Greek delegate for the fixation of the Greco-Albanian frontier, arrived at Koritsa, and has taken his place on the International Frontier Commission. Unfortunately, a very severe change of temperature has come over Albania; winter has come upon us without warning, and there have been heavy falls of snow. The Commission will, therefore, be obliged to suspend its labours.

The Parliamentary Inquiry.

My readers will doubtless remember that a Parliamentary Commission was formed to inquire into the *coup d'état* of December, 1921, when the Cabinet of Pandeli Evangheli was overthrown.

The Commission has just finished its work, and the announcement of its conclusions is being made in Parliament. The sittings took place behind closed doors, and the announcement will possibly take up a whole week. Nothing, therefore, is yet known of the decisions taken or of the conclusions of the Commission. It is known, however, that Qazim Kotsula, member for Valona, who seemed involved in the matter, will be brought up for trial.

PERSIA.

Teheran, November 11.

Church and State.

The past fortnight has been almost entirely devoid of interest, political or otherwise. The religious authorities and priests have again assembled at the principal Mosque in town, demanding that the Government insist on strict adherence to religious observances and customs, which have latterly been naturally somewhat neglected with the advance of Western enlightenment and progress. The Prime Minister, who has always been careful, in his own interests, to keep on the right side of the religious authorities, proceeded with the Cabinet on 5th instant to the Mosque and requested the Mullahs to disperse to their homes, as the Government had agreed to their demands and would submit them to the Mejliss. The Mullahs thereupon left the Mosque, but it is doubtful whether the Mejliss will satisfy their demands.

General News.

The attacks on Khavam-es-Saltaneh in the local Press still continue; in fact he appears to be becoming thoroughly unpopular, and no one expects him to remain long head of the Government. The Shah has already left Marseilles for Persia, and the Minister of War leaves to-day with some twenty cars for Shiraz and Bushire to meet His Majesty and accompany him to the capital. It is thought that as soon as the Shah returns here the Prime Minister will tender his resignation.

Dr. Milspaugh, the newly-appointed Director-General of Finance, arrives in Baghdad to-day and should be in Teheran next week. His arrival is eagerly awaited, and developments should not be long in taking place.

The Government has engaged the Postmaster at Liège as Director-General of Posts, in place of Mr. Molitor, who has acted in that capacity for some twelve years.

A large detachment of Government troops who have been taking part in the recent operations against the Kurdish rebel, Simko, in Azerbaijan, returned to Teheran yesterday, were received by Sardar Sipah on the Parade Ground, and had their colours decorated.

It is stated that Italy will suppress her post offices in Albania on January 1. A postal convention was recently signed making postal and telegraphic rates indentical within Albania and between Albania and Italy.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

BRITISH REFUGEES FROM SMYRNA.

To the Editor of THE NEAR EAST.

Sir,—Whilst I am well aware of the efforts which the British relief funds have made, and are making, to relieve the distress existing amongst the British refugees from Smyrna, who have been stranded for upwards of two months in Cyprus, Malta, Mitylene, and elsewhere, I fear that the reality and extent of this distress is hardly realised by the generous British public.

A feeling appears to prevail that these refugees are either people of means, in temporary pecuniary difficulties out of which they can safely be left to flounder by their own efforts, or people who have friends and relations in this country who can help them.

Unfortunately, this is not the case. The bulk of the British refugees are small merchants, commission agents or commercial employees, already brought to the verge of ruin by the losses and sufferings of the Great War, during which, if not treated with the same harshness as prisoners of war in Germany, they were prevented from conducting business and not infrequently deported or interned. Most of them have been living, during the past four years, more or less from hand to mouth, looking forward (I fear with monthly decreasing confidence) to the payment of their claims for compensation for past damages as the sole means of placing them in a position to re-embark on serious business.

The recent happenings in Anatolia have not only dashed all these hopes to the ground, but have further reduced those who entertained them to a far more desperate condition than they were in any time between 1914 and 1919. Their houses, their businesses, and their possessions gone beyond hope of recovery, many of them escaped, on the fatal thirteenth of September, with little more than the clothes they stood in. I myself remember receiving no less than three appeals (with which, by the same token, I had no means of complying) from the refugee ships to send off to friends "at least a toothbrush."

At this period of the year when, as the Lord Mayor of London has pointed out in the letter published a few days ago, every household in England is accustomed to partake more or less of the produce of Smyrna, I feel convinced that if they only realised the greatness of the need, few would refuse to contribute a trifle to the relief of those to whose efforts and sacrifices the revival and maintenance of the trade in that produce has been mainly due, and who, as successors of the old "Levant Trading Company," were doing their best to keep up the tradition of British enterprise and British straight dealing in the Near East.

Donations should be addressed either to the Lord Mayor of London or to the Hon. Treasurer, Imperial War Relief Fund, General Buildings, Aldwych, W.C.2.

I am, etc.,
HARRY H. LAMB,
late H.B.M. Consul-General at Smyrna.

December 11.

THE GREEK EXECUTIONS.

To the Editor of THE NEAR EAST.

Sir,—Allow me to express my entire concurrence with the view taken by your correspondent "J. H. W." In the introduction to my book entitled "Fontenoy" I wrote:—

> There was more truth than Voltaire imagined in his famous sarcasm that Admiral Byng was shot *pour encourager les autres*. Although naval regeneration was chiefly due to the spirit breathed into his comrades by Nelson, the stern but salutary lesson taught half a century earlier was not without result. Thenceforward every officer knew that he must "take, burn, sink, or destroy" the enemy's ships, or answer for any neglect of duty with his life.

So with politicians, whose incompetence, self-seeking, or impulsiveness have time and again involved their country in disaster. The evil that such men do lives after them; but it is generally slow to make its appearance. Hence the personal immunity which they have hitherto enjoyed.

But a graver issue is raised by our treatment of Greece. Ought we, in any circumstances, to meddle in the domestic policy of a foreign country? History answers this question in the negative. The Coalition of Kings formed in 1792 against the young French Republic, and the Duke of Brunswick's insolent menaces, stirred a proud and sensitive people to madness. . . . The invasion of France which followed was responsible for the September massacres; and every step in its progress produced fresh excesses. Indeed, the Reign of Terror would not stain the annals of France had she been allowed to work out her own political salvation.

Again, the support we gave to reactionary forces in Russia has served but to strengthen the régime which we sought to destroy. If our politicians were not deaf to the lessons of history they would realise that it is a blunder worse than a crime to bully a little nation at a time of sore distress.—

I am, etc.,
F. H. S.

December 8.

THE NEW TURKEY.

At a meeting of the Near and Middle East Association, held on December 12, at the residence of Lord Islington, 20, Portman Square, a paper was read by M. Felix Valyi on "The Reform of Islam and the Problem of Turkey." Major-General Lord Edward Gleichen, acting chairman of committee, who was in the chair, in his introductory remarks, explained the objects of the Association, and called upon those present to do all that they could to increase the membership. M. Felix Valyi spoke eloquently of the new order in Turkey. Reform and progress in Turkey could only come from within, never under European pressure, and through the Angora movement he claimed that the Turks had secured what they needed, a strong and independent Moslem nation which would work out its own salvation by its own strength and intelligence. He hoped that Europe would stand on one side and adopt a sympathetic attitude to a Turkey engaged in reorganising her social, judicial, and financial institutions.

Prince Soumbaloff, the Georgian Minister, endorsed M. Valyi's views, and stated that the Georgians were impressed with the prospects of the new Turkey.

Sir Thomas Arnold, in reply to a request to state his views on the separation of the Sultanate and Khalifate, stated that he could not prophesy what was going to happen, but the new system was obviously workable; it reproduced the position of the Khalifate under the Mamelukes, and there was the undoubted tendency of the Moslem world to accept accomplished facts.

The Delhi Correspondent of *The Times* states that the quintuplets to which a Brahmin woman gave birth on November 22 at Rohtak, in the Punjab, have all died, owing to the persistent curiosity of crowds invading the hospital.

PRESS ON THE NEAR EAST.

The Future of Turkey.

In the *New Leader* of December 8 Professor A. J. Toynbee looks round upon "The International Scene," summing up the problem of Turkey in these words :—

> It is perfectly natural that the Turks should desire to get rid of the Greeks, for the intensification of Nationalism, first on the Greek side and latterly on the Turkish, has made it increasingly difficult for the two peoples to live together. The modern Greek immigrants brought with them not only economic productivity, but a political programme; in 1919 the trader was followed by the soldier, and since then nearly one-third of Anatolia has been ravaged. The first impulse of the Turks is to make their "national home" secure at the cost of leaving it a desert, and at the moment they seem likely to carry this policy through to its full consequences. The Spanish-speaking Jews of the Levant may still find toleration and keep a flicker of commerce alive, as Hindu traders have done in Afghanistan; but the possibility must be faced that Anatolia may lapse into the condition of Afghanistan during the last half-century, or into that of Spain after those same Jews and the Spanish Muslims were evicted. In this event the Turks' pursuit of national security and sovereign independence will land them in a dilemma, for Turkey can be neither secure nor independent unless she more or less holds her own economically, and for the Turks to do this by themselves without the collaboration of native Greeks and Armenians, or of Western resident aliens, they will need several generations of training and adaptation. Like Afghanistan in the nineteenth century, and Abyssinia and Japan in the seventeenth century, they may possibly look for a solution in artificial isolation, but the conditions are not parallel. These other countries possessed natural physical barriers in their mountains or their insularity which enabled them both to close their gates without unduly incommoding the rest of the world, and to keep them closed by force against anyone who challenged their policy. But the Turkey of the National Pact and of the Note of September 23 is geographically incapable of isolation, since her national territory is traversed by the international commercial thoroughfare of the Straits. Sooner or later a Turkish Government at Constantinople will find it impossible to carry out a policy which might have been feasible at Angora. In other words, the Turks may ultimately have to choose between the possession of Constantinople and the pushing of national uniformity and sovereign independence to their extreme logical conclusions.

The Freedom of the Straits.

Writing in the *Fortnightly Review* of December on the subject of "A New Orientation for English Policy," an author signing himself "Y." comments thus on the Lausanne Conference and the question of the Straits :—

> It is a bad sign, I fear, that whereas our one object should be the speedy and complete attainment of peace in the Near East, the problem is to be made more difficult of solution by the introduction of the question of the Freedom of the Straits and the intrusion of new factors in Bulgarian claims on the Ægean, and the ulterior interests of Yugo-Slavia as a sort of support or substitute for those of Greece. That is the worst course that could be taken towards satisfying Italy, and nothing could be more wanton or unwise than to provoke and alienate old friends whose co-operation was decisive in the Great War. Mr. Lloyd George pandered to the taste of "the groundlings" when he boasted at Newcastle that in holding on to Chanak we had acted "without France and without Italy." The immediate and most pressing question for the country is the preservation of peace, and the only sure proof that it has been attained will be the return of our troops and our warships to their home stations. Lord Curzon, whose early admirers will be glad that he is coming into his own kingdom at last, has declared that the country has "had enough of war, and that Jingoism is dead in England," but unless he is very wary and dexterous, he will find it difficult to extricate us from the morass of illicit commitments to which some of his late colleagues were parties.
>
> The Freedom of the Straits is one of those phrases that capture popular applause, but, unfortunately, it cannot be treated on the assumption that all the Powers and minor States are agreed among themselves as to its precise meaning and as to the best measures to be taken to uphold it. The larger half of the British Fleet is in or near the Straits at this moment. Consequently, their freedom is, and has been for some time past, dependent on our approval. An instance of this was given when we allowed Greek warships to go into the Black Sea to bombard Angoran ports and villages and to sink their vessels. That was not a kind of freedom to commend itself to the Turkish Grand National Assembly. Nor would the freedom based on the construction of another Gibraltar in the Narrows be an agreeable solution to the Mediterranean Powers, although, of course, we should be able to satisfy ourselves that our conception of freedom was perfect. It may be suggested that the only solution which would give satisfaction to everybody else will be one that does not require the presence of British forces on land or on water within the Straits to enforce their freedom.
>
> In plain words, the Freedom of the Straits, like the Freedom of the Seas, should be left as a general principle accepted by all the signatories of a peace, but, as a fact, dependent on circumstances, changes and conditions that cannot be foreseen or provided against. As long as peace prevailed in the Near East and Europe generally it would be to no one's interest to violate it. When war comes again the solution would rest with the strongest, but there is no surer way of consolidating the action of the Allies than to show them that we are pursuing a course of restraint, and even of self-effacement. Our Navy exists primarily for the defence of our shores, and not as the means of thrusting ourselves into every complication with which we often have no reason to concern ourselves and where our naval preponderance may seem to make us dwarf our Allies and associates.

STATUE OF MR. MONTAGU.

Mr. Montagu is at present giving sittings to an Italian sculptor, Signor Ricardi, for a life-size statue of himself, to be presented to the city of Bombay at the instance of Mr. S. R. Bonanje (of Bombay), organiser of the Montagu Memorial Fund, which now amounts to several thousand pounds. The same artist has also been commissioned to execute a bust of Mr. Montagu for the Bombay Legislative Council.

Near East Bookshelf.

LLOYD GEORGIAN DIPLOMACY.

"OLD DIPLOMACY AND NEW, 1876-1922: FROM SALISBURY TO LLOYD GEORGE." By A. L. Kenned . With an Introduct on by Sir Vale ine Chirol. (London: John Murray. 18s. net.)

Mr. Kennedy has written an exceedingly able book, the object of which is to bring home to the British public how important to its well-being is the conduct of its international affairs, and how necessary it is to take stock of the recent ways of managing these affairs, in order that the faults disclosed may be avoided in the future. His method is to write a brief but well-informed history of the activities of the Foreign Office during the régimes of Lord Salisbury, Lord Rosebery, Lord Lansdowne, and Sir Edward Grey, followed by an account of what was done in its name by Mr. Lloyd George. Of the first part, want of space prevents our saying as much as we should like. His account of the "strong and resolute" Lord Salisbury, whom obviously he specially admires, in no way slurs over the grave mistakes by that statesman. The achievements of Lord Lansdowne, to whose breadth of view and "opportunism" in the best sense, with his "capacity to subordinate his own desire for fame to his sense of the public service," we owe the Japanese Alliance and the Entente Cordiale, are carefully sketched. In the case of Sir Edward Grey a line is drawn between the Peace and the War Foreign Secretary. "This great English gentleman could altogether forget the partisanship of internal political difficulties" in his conduct of foreign affairs, and he believed entirely in the virtue of making our foreign policy continuous. Before the War he skilfully steered Europe through many a difficult eddy, his conciliatoriness being usually most effectively used. But things were different when Germany made up her mind to war. He would clearly have preferred to keep England out of the War altogether, and his strenuous efforts to keep the peace of Europe were magnificent and in every way honourable to the nation which he represented. When Germany broke the Treaty which she had herself signed, binding herself to preserve the neutrality of Belgium, all doubt vanished. "His countrymen may congratulate themselves that the keeping of this Treaty tallied perfectly with national interests." But "his idealistic cast of mind was unsuited to the conditions of a world torn by war passions which he had striven nobly but unavailingly to still." Certain it is that Mr. Kennedy's account of Sir Edward's war diplomacy does not make cheerful reading. We would call special attention to his chapter on our efforts made to induce Bulgaria to keep neutral. In preparing this chapter he has had access to documents which have so far been denied to the public, and his brilliant narrative throws an entirely new light on our doings there, with their blunders and fatal hesitations, while it refers sympathetically to our Minister at Sofia, Sir Henry Bax-Ironside, whose position was made frankly impossible by his chief, while his advice was entirely neglected. We wish that we had space to give a summary of this most enlightening chapter, but, as it is, we must refer the interested reader to the book itself. Another particularly interesting chapter deals with the entry of Italy into the War. Here again the author has had access to special sources, and is able to show us how very nearly our enemies succeeded in keeping Italy neutral.

It is, however, when he reaches the era of Mr. Lloyd George that Mr. Kennedy's pen really gets going. As son of a distinguished diplomatist of the old school, he could hardly be expected to start with a prejudice in favour of Mr. Lloyd George's amateur efforts to do the work of the Foreign Office. "Mr. Lloyd George," he says, "did show the statesman's talent for distinguishing the episodic from the permanent. He has shown brilliant agility in translating the nation's mood of the moment into action; but that is hardly statesmanship." And again: "He has been like the captain of a cricket team who disposed his fieldsmen or changed his bowlers according to the advice shouted by the crowd." Add to this a persistent opportunism, using the word in its worst sense, and the result is "haphazard diplomacy," which has a necessary tendency towards dishonesty and, at best, breeds distrust in the hearts of foreign nations and thus lowers our prestige. If we allow that Mr. Kennedy fully recognises the splendid services rendered by the late Prime Minister in the War, and the good work done by him in stimulating general interest in foreign policy and in trying to put into practice his realisation that the root of foreign policy is now in the people as a whole, we think that we have indicated his attitude as nearly as is possible in a few words. His facts are well marshalled, and he strives to be perfectly impartial. The result is condemnation of the whole system and something like a certainty that it will not be attempted again. His conclusion is that diplomacy must be done by trained diplomats, though he looks to some democratisation of the diplomatic service and considerable changes in the methods of life of our diplomatists abroad, enabling them to get far more into real touch with the countries where they are serving.

Sir Valentine Chirol contributes a wise and informing Introduction, in which he summarises in a masterly manner the enormous changes which have occurred in the social, economic, and political conditions of the world during the period dealt with by Mr. Kennedy. "That diplomacy itself should have been profoundly affected by them was inevitable, but whether the changes which it has undergone suffice to justify the distinction which he (Mr. Kennedy) draws between an 'old' and a 'new' diplomacy may perhaps be doubted." If the "new" diplomacy has failed, it has to be remembered that it has had to deal with things undreamt of by the "old."

We think it a pity that the book has not been given more adequate maps. Most of them we seem to recognise as having been in *The Times*. They were welcome there, but something better was wanted in a book of this class. We must also complain of the practical joke played on the readers by labelling as "Europe after the Congress of Paris" a very small coloured map apparently taken from a primer of geography, representing Europe as it was in 1914!

C. S.-W.

BALKANIA.

"THE BALKAN PENINSULA AND THE NEAR EAST: A HISTORY FROM THE EARLIEST TIMES TO THE PRESENT DAY." By Ferdinand Schevill, Professor of Modern European History at Chicago University. (London: G. Bell and Sons, Ltd. 20s.)

Professor Schevill has written the history of the Balkan Peninsula with a view to the elucidation and comprehension of the problems of the present day in the Near East. This is no light task, and although in an introductory chapter he divides his work into five periods or epochs (Hellenic, Roman, Byzantine, Ottoman, and, dating from the opening of the Nineteenth Century, an Epoch of Liberation), the author

Digitized by Google

succeeds in disposing of the first two of these and in giving an outline of Balkan climates, communications, natural features, and products in some thirty-five pages. In fairness to Professor Schevill, however, it must be stated that he appears to have omitted nothing in this *résumé* that is necessary to a clear understanding of the pages which follow.

The Byzantine Epoch takes the reader from the year 500 down to that critical moment in the middle of the Fourteenth Century when the Serbian Tsar, Stephen Dushan, having occupied the Western Provinces of the Greek Empire, was contemplating the assault of the capital itself, and when the Ottoman Turks, under Orkhan, obtained their first foothold in Europe, the Castle of Tzympe on the Dardanelles.

The Empire of Byzantium receives at the hands of Professor Schevill a much more sympathetic treatment than has usually been accorded to it by past historians, but this Empire, the inheritor of the laws and traditions of Rome, came to an end with the capture and sack of Constantinople by the Crusaders in 1204. The bulwark of Western civilisation against the East for five hundred years was destroyed—by the champions of Western civilisation in the East, and speculation as to what might have been the position of those same Crusaders and their countries, had it not been for the despised Byzantine Empire, is, if, unprofitable, certainly both alluring and strange.

There succeeded the Latin Empire, the empire that "never boasted a single day of health," but meanwhile the centre of interest had moved northwards. Bulgaria had risen once and been destroyed by the second Basil. Now, under the brothers Asen, it had once again attained freedom, but the very blows that contributed to the fall of Constantinople had also loosened the shackles of another Slav race, the Serbs, who were to reduce Bulgaria to vassalage at Kustendil, and then thirty-five years later, to vanish before the ever-advancing waves of Turkish invasion at Kossovo.

The Ottoman Epoch is described with all the care and interest of the preceding section. Here as before, commerce and art, customs and law, receive the attention which is necessary to a proper appreciation of the period, and there is an extremely valuable chapter on "Ottoman Institutions and Society." There are also many little appreciated points of resemblance between the Greek and Turkish Empires which are developed: the dependence of their fortunes on sea-power; their employment of and reliance on men of akin blood; their astonishing powers of at least temporary recuperation after a period of eclipse.

Professor Schevill also develops a theory that both Empires have suffered from the jealousy and false propaganda of the West, and, viewing the complete lack of partisanship with which he tells his story and the limited media of the dissemination of news available right down to the beginning of the Nineteenth Century, one is inclined to agree. The author records both good and evil with an impartiality that is admirable, and, one is sometimes compelled to believe, with an absence of all hope of discovering either virtue or unselfish motives in any of the parties whose history he is recording.

The final and most considerable section of the book, the Epoch of Liberation, carries us down to June of the present year. It is at one time the most interesting and the most difficult portion of the story, and one can only say that the author's aim of "a straightforward record of events" has met with unqualified success. The clarity and skill of the narrative are beyond praise, and every detail of the growth of the various States and of the multiple contending interests involved in each incident are explained with lucidity and illustrated by a series of excellent maps.

At the end of each section of the book is an extensive bibliography, and there are useful appendices on subjects ranging from the Republic of Ragusa to the Bogumil Heresy.

To conclude on a note of criticism, it seems extremely improbable that the author's interpretation of Germany's aims and acts in the period immediately preceding the outbreak of the late war will find much credence in this country; and, bad as the Near Eastern situation has appeared from time to time the quotation from a Syrian poet, "Once I wept all day long, now I weep for that day," seems an extreme of pessimism.

DIPLOMATIC CONUNDRUMS.

"INDISCRETIONS OF LADY SUSAN." By Lady Susan Townley (London: Thornton Butterworth, Ltd. 21s. net.)

Was Lady Susan Townley indiscreet, or was she the quintessence of discretion? Was it her indiscretions that made it impossible for Sir Walter Townley to be advanced in the Diplomatic Service, or was it her brilliance that carried him upward through ten diplomatic posts in twenty years? When our public schools have a diplomatic Side and Degrees in Diplomacy are conferred by our Universities, these, we can well believe, will be test questions for the youth of the day, and this volume, or annotated editions of it, will be the standard work of reference. In regard to one of those diplomatic posts, there is definite evidence that promotion was directly due to the two horses that won the Grand National and the Lincoln Handicap. Had a grey mare anything to do with some of the other posts? A reviewer can know nothing about it. In any case, the pace throughout those twenty years was terrific—Lisbon, Berlin, Rome, Peking, Constantinople, Washington, Buenos Ayres, Bucharest, Teheran, The Hague. Of all these capitals Lady Susan Townley, as was to be expected of the author of "My Chinese Garden," writes piquantly; she has a vivid imagination and a keen sense of humour. The latter led to her incurring the wrath of the American Press, and it is not difficult to appreciate the feelings of the Foreign Office when it was asked to intervene officially. One shudders to think of the effect upon Anglo-American relations, if it had done so. Lady Susan Townley, as anyone will know whose residence in any of the ten capitals coincided with hers, was the life and soul of the respective Diplomatic Corps. She was a shrewd observer, and her character sketches, admirably true to life, reveal a sympathetic nature which her vivacity and daring frequently obscured. Her book should be read by every budding diplomatist—before he marries; and afterwards, by his wife.

PERSONAL AND GENERAL.

TO-DAY.

December 21 (New Style).
December 8 (Old Style).
Gumada I., 3, 1341 A.H. of the Moslem Calendar.
Tibet 2, 5683, of the Jewish Calendar.

Prince Habib Lotfallah has gone from London to Lausanne.

Major-General Sir Foster Newland has left London for Cairo.

Mr. and Mrs. S. Bilinski have arrived in London from Constantinople.

Sir Edwin Lutyens will return to London early next year from India.

Lieutenant-Colonel Sir Percy and Lady Sykes have arrived at Dinard.

Lieutenant-Colonel Vivian Gabriel has left Gubbio for Egypt and Cyprus.

M. Sangro Contouma, Attaché at the Greek Legation, left London last week for the Legation in Vienna to take up a new post.

M. N. Luper, a former Minister for Home Affairs in Roumania, and now leader of the Labour Party there, has left London for Bucharest.

Sir Basil Blackett, Controller of Finance at the Treasury, will leave to-day for India to take up his duties as finance member of the Legislative Council.

The Minister of the Kingdom of Serbs, Croats, and Slovenes has arranged to spend Christmas at Torquay with Madame Gavrilovitch and his family.

Mohammed Ali Khan, Counsellor at the Persian Legation, has left London for Tashkend (Turkestan), where he has been appointed Consul-General.

An attempt was recently made in Sofia on the life of M. Dashkaloff, Bulgarian Minister of Interior. Fortunately it failed, but the would-be assassin escaped.

The marriage took place at All Saints, Cairo, on November 22, 1922, between Frederick J. Whittall, late of Ceylon, and Miss Alithea Leila Williamson, of Smyrna, and sister of Mr. J. W. Williamson, of Meadi.

The engagement is announced of Major E. A. W. Lake, 127th Q.M.O. Baluch L.I., son of W. A. E. Lake, late Punjab Police, and Phyllis Marjorie, only daughter of J. G. Silcock, J.P., I.C.S. (ret.), and Mrs. Silcock, of Pendower, Tunbridge Wells.

A marriage has been arranged between Commander H. S. M. Harrison-Wallace, R.N., son of the late Captain James Harrison-Wallace, formerly of Newton Hall, Kennaway, Fife, and Hordley, Jamaica, and Eileen Maud, daughter of the late Colonel Sir Henry E. McCallum, G.C.M.G., formerly Governor of Ceylon, and of Lady McCallum.

The Archbishop of Sofia, Mgr. Stephane, has been paying a short visit to England. His Grace was received by the Archbishop of Canterbury and in London by Cardinal Bourne. Mgr. Stephane, who was present at receptions given last week by Mr. and Mrs. Leland Buxton and by Sir Edward Boyle, has returned to Sofia. His visit was the first ever made to London by a dignitary of the Bulgarian Church.

The marriage has been arranged to take place at the English Church, Lausanne, on December 26, of Mr. William Jackson Perkins, O.B.E., M.C., of Moda, Constantinople, son of Colonel W. J. Perkins, C.M.G., V.D., Deputy Lieutenant of Surrey, and Mrs. Perkins, of Guildford, Surrey, to Millicent Edith Whitehouse, daughter of Canon F. Whitehouse, Hon. C.F., British Embassy Chaplain, Constantinople, and Mrs. Whitehouse.

Sunday was the anniversary of the birth of King Alexander, King of the Serbs, Croats, and Slovenes. King George sent a message of congratulation through M. Michel Gavrilovitch, the Minister in London, and cards were left at the Legation on behalf of the Prime Minister, the Secretary for Foreign Affairs, the Lord Chamberlain, the State Chamberlain, and others. The Minister and the personnel of the Legation attended the Russian Church of St. Philip, Buckingham Palace Road, on Sunday morning, when a Te Deum was sung. Others present included the Consul-General and Mme. Yovanovitch, General Constantine Dessino, M. Sabline, M. Gabriel Wolkoff, M. Bark, formerly Russian Minister of Finance, and Mme. Bark, Professor Meyendorff, M. Ivanoff, and several Russian naval and military officers. Following the service the Minister and Mme. Gavrilovitch gave a luncheon party, and during the day the Minister, on behalf of the members of the colony, sent a congratulatory message to King Alexander.

APPOINTMENTS, Etc.

M. D. Inglessis has been appointed Greek Consul-General in London.

Mr. Arthur Page, K.C., has been appointed a Judge of the High Court at Calcutta.

The King has appointed Mr. J. F. R. Vaughan-Russell to be His Majesty's Vice-Consul at Beyrout.

M. D. Sophiano has been appointed First Secretary to the Greek Legation, and has entered upon his duties.

The *Manchester Guardian* Constantinople correspondent states that the Grand National Assembly has appointed Nihad Rechad Bey to be Ambassador in London.

SCHOOL OF ORIENTAL STUDIES.
London Institution. Finsbury Circus, E.C.2.

ORIENTAL LANGUAGES AND RELIGIONS.

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

AFGHANISTAN.

At the Royal United Service Institution last week, and under the auspices of the Central Asian Society, Colonel S. F. Muspratt, C.S.I., D.S.O., I.A., gave a most interesting lecture, presided over by Lord Carnock, upon "Afghanistan." Colonel Muspratt was one of the two military members of Sir Henry Dobbs' mission in Afghanistan last year, and during his eleven months' stay in the country was enabled accurately to gauge its people and its possibilities. As a background to the picture which he presented, he sketched the events leading up to the beginning of 1921, when the mission which nearly a year later was to conclude the Afghan-British Treaty, began its labours. Conditions at this time in Afghanistan were not favourable to the British, for though the late Ameer Habibullah Khan had with splendid loyalty preserved neutrality, various events had, subsequent to his assassination, contributed to make the Afghans assume a very independent and sometimes intractable frame of mind. Delay after delay was encountered by Sir Henry Dobbs' mission, and the monotony of the period was broken only by the delivery of ultimatums. These, said the lecturer, were meant seriously, preparations to pack up being made, but always in time there arrived the dove (a most reliable bird) of compromise! Finally, and when the burden of the negotiations had devolved almost on Sir Henry alone, a Treaty was arrived at in November, 1921. Of the value of this Treaty Colonel Muspratt said it was yet early to speak, but so far it had worked well, and he had every hope that it would prove satisfactory. The independence which it appeared to give to the Afghans gave to them an infinity of pleasure and to us no harm; and there was no subsidy attached to this Treaty. Of the various members of this mission, and of the Afghan *vis-à-vis* there, the lecturer gave a valuable and most entertaining account. One of the latter was the Minister of Finance, whose commercial training seemed to have consisted solely of an unfortunate speculation in roubles—a fact which accounted for his persistent demand from the British Government of a sum of forty-two million rupees for having remained neutral in the War! The present Ameer, said Colonel Muspratt, had a high sense of public duty, which led him regularly and personally to supervise the work of his Foreign Office, War Office, and so forth. He had no extravagant tendencies, except, perhaps, the common Moslem love of building.

Later in his lecture Colonel Muspratt showed several lantern slides, among them being pictures of buildings in Kabul, including the Afghan Foreign Office, some barracks, the tomb of Abdur Rahman, and the Kabul River. In conclusion, he attempted a summary of the possibilities of Afghanistan. The Afghans, he said, who were an intensely patriotic people, would not allow their country to be exploited. Only one concession—to a motor-lorry company—had ever been granted, and that had an untimely end. The Afghans were an ambitious people, and the thought of territorial expansion, especially towards Central Asia, was not often absent. Any signs of Russian weakening in this region would probably be seized upon. But there was no need to fear a dissolution of the present satisfactory relations between Great Britain and Afghanistan. Afghanistan respected firmness, and so long as Great Britain had the power and the will to protect her legitimate interests all would be well.

In the subsequent discussion Sir Hamilton Grant, Sir Michel O'Dwyer, Sir Mortimer Durand, and the Hon. Secretary of the Central Asian Society, Colonel A. C. Yate, took part. Sir Hamilton Grant paid tribute to the accurate, humorous, and picturesque account of Afghanistan that Colonel Muspratt had given. He also spoke eloquently of the late Ameer Habibullah's loyalty to Great Britain, and of the difficulty with which he persuaded some members of the Indian Government of Afghan good faith. He believed in the Afghan, and disliked intensely the policy of bluff and browbeating. Sir Hamilton gave some interesting reminiscences of the inhospitable nature of the Afghan climate, which he experienced when it was so cold that ink froze on the pen before it could be put on paper. Sir Michel O'Dwyer's personal experience of Afghanistan was confined to a captivity which lasted fifteen minutes, but as Governor-General of the Punjab during the War he had seen much of the Afghan traders who came through the territory for which he was responsible to do their business. With these he found it necessary to deal firmly, and quoted with approval the lecturer's remarks upon "the will and power to protect our legitimate interests." Sir Mortimer Durand contrasted the conditions in Afghanistan as Colonel Muspratt had described them with those he experienced thirty years ago; and finally Colonel Yate amusingly described his captivity, which lasted for about three weeks, in the hands of the Afghans.

NEWS IN BRIEF.

According to the latest return the Iraq levies, who are composed of Arabs, Kurds, and Assyrians, number 4,800, and their estimated cost for the financial year is £600,000.

The War Office states that, apart from the troops lent temporarily to Constantinople, there has been a reduction in our forces in Egypt in the last twelve months of 12,800.

It is officially stated that the question of the future administration of Aden is still under discussion. The Government of India will be fully consulted before any action is taken.

Captain G. Finch, who led the climbing party which reached the highest point attained on Mount Everest, gave a lecture on the expedition at Gothenburg last week. Captain Finch received the diploma of honorary member of the Gothenburg Geographical Society.

A Babylonian brick from the ruins of Nineveh, bearing the stamp of Nebuchadnezzar, date 605 B.C., was one of the items included in the sale by Messrs. Knight, Frank and Rutley at "The Nash," near Worcester, which commenced on December 12. Before the war the German excavations on the site of Babylon city itself led to the discovery that every brick examined bore the name of the monarch in whose reign it had been made.

For the first time in Afghan history a national budget has been prepared. The Afghan Press, in commenting on this interesting event, claims that revenue and expenditure have been balanced, far-reaching and self-denying economies having effected this result. The Ameer, for instance, now lives almost entirely on his private income, and draws hardly at all upon the State.

THURSDAY, DECEMBER 21, 1922.

THE THREAT TO THE INDIAN LEGISLATURES.

The present lull on the surface of Indian politics is, as we have recently explained, due in great measure to the momentary perplexities of the extremist or revolutionary party. Their aims, unfortunately, are unchanged, but the methods they have hitherto adopted have definitely failed, and of late they have been seeking for some more effective weapon to employ against the Government established by Parliament. We propose to discuss to-day the particular weapon which is being advocated by some of the best brains in the party, the idea of securing election to the legislatures and wrecking them from within. The plan of operations is, of course, no secret. The leaders who recommend this course count on making all legislation impossible, on refusing all supply, and on forcing the administration to govern by the exceptional procedure provided in the Constitution for use only in grave emergencies. They consider that success in this direction will suffice to wreck the Constitution as a whole, and that Parliament will be forced to concede the claims which they put forward. Some of our contemporaries appear to be of opinion that these results would, in fact, follow, but that the election of extremists in sufficient numbers is so improbable that the danger need not be seriously considered. Our own view is the exact opposite. We think it is quite probable that, if the extremists eventually decide to make a concerted effort, they can at the next elections secure majorities in some, though not in all, of the provincial legislatures, but we do not agree that they could thereby wreck the Constitution or compel Parliament to do more than make some adjustments in the machinery it has sanctioned. The probability of success at the elections appears to us to follow necessarily from the inexperience of the electorate. Their new privileges came to them as a surprise, and during the last two years they have been allowed to learn very little, because their representatives, taken as a whole, have not realised the need for activity in the constituencies. When, in a year's time, these representatives ask for renewed support, they will in any case have to face a certain amount of disillusionment, and if, in addition, they have to face candidates with no record of past legislative failures, but with ample promises for the future, supported by an organisation notoriously unscrupulous, and backed by large funds, then there would be no occasion for wonder if the electorate should decide to give the newcomers a chance, not because their revolutionary aims are approved, but because their promises make the more convincing appeal. We think, then, that if a concerted effort is made, some at least of the provincial legislatures can be effectively put out of action.

Such a result would not, in our judgment, suffice to defeat the intentions of Parliament. It would demonstrate, not the failure of the policy to introduce responsible government by degrees, but merely the unsuitability of some of the machinery designed to secure the progressive realisation of that policy. It would, in fact, justify the hesitation of those critics who have urged that the elaborate structure of councils, ministers, and legislatures could not be based with safety on the ballot-box, but required for its success a system of representation developed out of indigenous institutions, not imported from the distant West. If we have not hitherto adopted these views, it is because we have considered first that the ballot-box, if it should prove serviceable, offered the shortest road to the goal, and, secondly, that no other machinery would have been accepted by the political classes, who necessarily depended at the outset on Western inspiration. The situation we have now to consider is the possible or probable failure of the ballot-box to secure adequate representation of the people, and the consequent capture of the legislatures by a wealthy and highly organised minority, aiming at reaction through revolution, and anxious to rivet on the people for all time the fetters which it is the object of Parliament to remove. Should such a situation arise, we do not believe that Parliament would abandon its ideals, but we think it would be quick to alter its machinery. In order to do so, practically no legislation would be required. A few sentences in the Government of India Act might require amendment, but the principal task would be to frame new electoral rules, in which the ballot-box would be discarded, and alternative methods prescribed for securing representatives of the true opinion of the country.

In considering the alternative methods which are possible, we may leave the towns and cities out of account. They can claim barely one-tenth of the whole representation, and if we set out to base the legislatures on indigenous institutions, it is to the country that we must look. In the country, the village stands ready to hand. It is an institution of immemorial antiquity, and each village, regarded as a unit, has a definite public opinion of its own. It would be quite possible to obtain from each village a definite vote either on certain issues, or on a list of candidates, and a representative system organised on this basis would be entirely suitable to the conditions, if it were not for the prevalence of the village-bully, who is probably as ancient an institution as the village itself, and who might under such a system secure a disproportionate share of the representation. If his activities should prevent the adoption of a system of representation by villages, it would be possible to fall back upon another ancient institution, the caste or craft. Most castes have already their own chosen representatives, often united in loose federations over large areas. It would be comparatively easy to frame a system of representation under which each caste should return its due proportion of members chosen by its own machinery, and a legislature constituted on this basis would be a microcosm of the population concerned such as could be produced by no arrangement based purely on locality. It would be premature to discuss these alternatives in detail. It is quite possible that existing dissensions among the extremist party may operate to prevent the present system from being exposed to a crucial test: it is also possible that the ballot-box, if it should be so tested, may emerge triumphant from the ordeal: and our present object is merely to show that, even should the extremists attain to the initial success for which some of them confidently hope, the realisation of their ultimate objects would be brought no nearer. The policy adopted by Parliament would still stand, and much of the machinery would remain intact. It would suffice to discard western methods of election, which in the East possess no peculiar sanctity, and to turn to indigenous institutions to provide the representatives on whom the effective working of that machinery must depend.

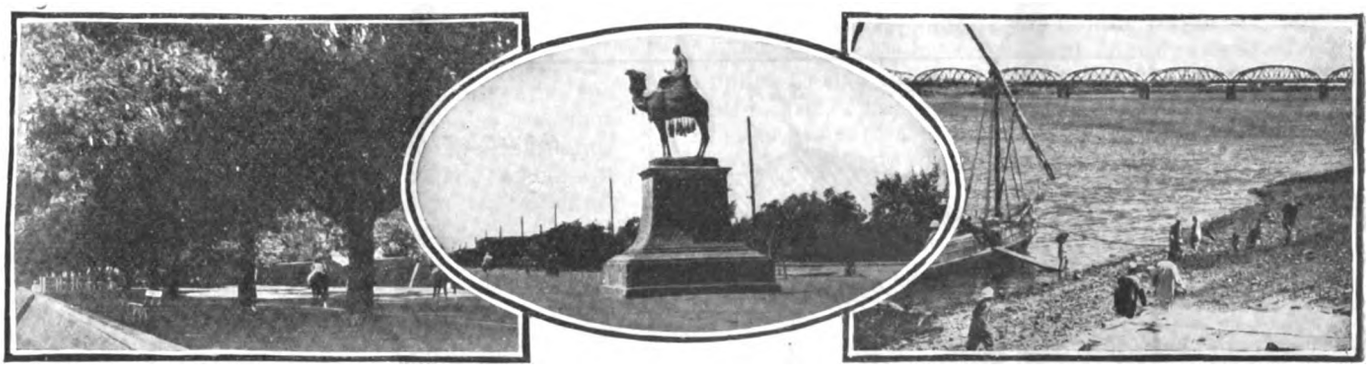
THE SUDAN.—I.



EGYPT AND THE SUDAN.

The Question of the Nile Waters.

The insistence on the part of the Egyptians, which finds expression in the draft Constitution as well as in the programmes of political parties, that the Sudan must remain an integral part of independent Egypt, may be merely a gesture of Nationalism; but it is only fair that there should be due acknowledgment of Egypt's peculiar position in regard to the Nile waters, which renders her legitimately concerned to see adequate safeguards provided for the future of her water supply. Political control over the Sudan, no doubt, suggests itself to the Egyptians as the best way of eliminating risks; but as it necessarily conflicts with British and Sudanese interests, it is not a feasible solution of the problem. Nor is it necessary as a means for making Egypt's vital interests in the river absolutely safe; for, although in their more exuberant moments the Nationalists may want to prepare for the day when they will be throwing down the gauntlet to the British, they overlook the fact that Great Britain is never likely to have the least desire to punish Egypt by effecting her economic ruin. Consequently, British and Egyptian interests in the regulation of the Nile waters are identical, and so long as British control of the Sudan endures, an independent Egypt needs only to be represented on a joint Board of Control to ensure that her point of view will receive the full measure of attention that the circumstances at the time permit.

Inasmuch as the rejection of the Egyptian claim to the Sudan presupposes a satisfactory solution of the Nile problem, an impartial review of the whole question may not be without interest at this juncture.

Egypt's position in regard to the Nile is certainly extraordinary. From the sea to her Sudan frontier, a distance of roughly seven hundred miles, abstraction of water for her numerous irrigation canals draws upon and sometimes exhausts the present supply of water in the Nile, which neither in those seven hundred miles nor for eight hundred miles more receives any tributary. At the latter distance from Egypt the River Atbara joins the Nile, and about a hundred and ninety miles farther up, the junction of the Blue and the White Nile occurs and together these two streams form the main river. In other words, the river on which the cultivation of Egypt depends is not only not supplied nor composed inside her borders, but does not even begin to be so for from eight hundred to nearly one thousand miles beyond them. So long as there was nothing beyond those borders but the Dark Continent this might not matter, and so far as concerned her water supply Egypt might treat the lives and doings of the tribes upon the banks of the Upper Nile with as much indifference as those of the hippopotami; and, later on, though the Sudan passed virtually under the control of the British, the question of rights between the possessors of the Upper and the Lower waters still could not arise in an acute form for the sufficient reason that the British were also virtually in control of Egypt. Practically the riverain population, whether dark or light, were all British.

"Providence" or "Foreigner."

The recent rapid development of national consciousness, however, has reminded Egypt, budding into independence, that her vital water supply is in other hands than her own, and that they are hands that are unpleasantly competent to control the supply in question. At one time Providence alone could distribute plentiful years, or the reverse, to Egypt, and the latter sort were received with pious submission. She now affects to consider

THE NILE AND ITS TRIBUTARIES.

Digitized by Google

that she has more ground for apprehension if this power over her may in future rest not with Providence, but with a "foreign" Government.

Besides the fact that the first tributaries of the Nile are at a great distance from Egypt, the course which they and other tributaries follow and the position of the sources of the Nile are also a serious consideration. The Atbara rises in the highlands of Abyssinia, and the bulk, if not the whole, of the rain which feeds it falls outside the Sudan's borders. The Blue Nile issues from Lake Tsana, not far from the head waters of the Atbara, and ultimately, after an immense loop which carries it far south, turns to the north-east, and follows a parallel direction with that stream. It enters the Sudan at Roseires, and between that point and Khartoum has two comparatively insignificant tributaries, the Rahad and the Dinder. Except for their contribution, or, rather, such part of it as comes from rain falling on Sudan territory, the whole of the Blue Nile also comes from Abyssinia.

Tributaries of the Nile.

On the White Nile, the first tributaries appear at Malakal, at the great distance of about five hundred miles above Khartoum. These are the Sobat on the right bank, and the Bahr-el-Ghazal on the left. The contribution of the Sobat is considerable; the river rises in Abyssinia, and it is believed the greater part of its total flow comes from the same quarter. The Bahr-el-Ghazal, on the other hand, is a composition of many streams, all of which rise in the Sudan territory. Its present discharge is not large, but it is believed that the rainfall on its watershed is heavy, and, at all events, it is known that the stream which eventually joins the White Nile is subject to great losses on the way. It is not beyond the bounds of possibility that these might in future, if it were so desired, be considerably reduced, and the Bahr-el-Ghazal be made to supply a valuable contribution to the Nile.

From Malakal, ascending the main stream, or White Nile, there is a further interval of about five hundred and fifty miles before any more tributaries are encountered, and in this great stretch the river not only receives no contribution from any other stream, but, on the contrary, passes through a region of immense lagoons and marshes which draw from and enormously reduce its flow after it leaves Mongalla, at the head of this area, and before it arrives, greatly diminished, at Malakal. Between Mongalla and Nimule, about one hundred and twenty-five miles farther up stream, a few small tributaries occur on the right bank. Above Nimule, or thereabouts, the White Nile is no longer in Sudan territory, but in the Protectorate of Uganda. From Nimule, after about the same distance as from Mongalla to that point, Lake Albert, which may be regarded as the principal source of the river, is at last reached. Lake Albert is equally divided between Uganda and the Belgian Congo, the political boundary lying along its centre line. The Victoria Nile, joining Lakes Albert and Victoria, traverses about midway along its course the area of marsh or lagoon known as Lake Chioga. Lake Victoria is reached at about two hundred and fifty miles from Lake Albert, following the course of the river, and this inland sea is now entirely under British control. To the fact already noticed, that the Nile has no tributaries in Egyptian territory, and that the first occur in the Sudan, from eight hundred to one thousand miles beyond Egyptian boundaries, the further facts must be added that the Atbara, the Blue Nile, and the Sobat rise and largely develop in Abyssinia and that the sources of the White Nile are partly under British and partly under Belgian control.

For this state of things the Egyptian's only consolation, and he does not value it much, is that the Bahr-el-Ghazal is somewhat less of a foreign stream, in that it alone is not doubly removed from Egypt, but is at least confined in its source and supplies to the Sudan, which is her next neighbour on the Nile. There are, as a matter of fact, other considerations of a physical nature and independent of political geography which make the remoter circumstances of the Nile of less importance to Egypt that at first appears. For example, it is a matter of indifference to her that the annual Nile flood is the result of Abyssinian rainfall, for it does not matter where the flood comes from, nothing can stop it, nor at any time of the year is withdrawal of water for irrigation ever to be contemplated in those mountainous highlands. Similarly the configuration of the land round Lake Albert offers little temptation to either Uganda or the Belgian Congo to draw upon its waters; the same also applies largely to the contribution from Lake Victoria. It is true that from the neighbourhood of Lake Chioga on the Victoria Nile, cotton has been exported in the last few years and has reached the respectable total of 5,000 tons per annum, or roughly 15,000 Egyptian bales, and further, it is believed that this quantity might be greatly increased, though it is not known how much water would be required; but, on the other hand, acre by acre, the requirements could not be very large, as the whole area is far inside the African rain belt. In short, physical conditions largely counteract the advantages that non-Egyptian Governments might otherwise be tempted to find in the presence of the sources and upper waters of the Nile in their territory. This is fortunate for Egypt, as it is obvious that any attempt by her to alter the political boundaries of East and Central Africa would be an impossible task. Egyptian opinion, it is believed, fully recognises this.

The Political Aspect.

The political case which Egyptians put forward is this: When it comes to the point, as it has done now, Egypt is found to have only a very partial share in the control of the upper waters which go to compose the Egyptian Nile. On the other hand, she has the right—the right of user—to all the Nile water necessary for her agriculture as it stands to-day; and further she states she has a right to more water than she now uses, which will be required for the cultivation of new land required to receive and support the normal increase in her population. She claims, therefore, that, in addition to the necessary reservation of the water needed for her present area, the supply required for new land should also be earmarked for her, and that such political arrangements must be made as will ensure, without the possibility of failure, that water so reserved and so earmarked shall be for all time at the disposal of her inhabitants.

In support of these claims the principal argument is that Egypt has about fourteen million inhabitants all dependent, without exception, on Nile water, while the population of the Sudan is about three and a-half millions, of whom about two millions are Arabs, and the remainder black. Of the Arabs only about a half depend upon the Nile, while the black population cannot be said to form an agricultural population at all, and certainly do not lift water for whatever little cultivation they engage in. The parts they inhabit have sufficient rains to produce all the grain they require.

The immediate objections to the Egyptian claim which will occur to anyone, can be expressed in the questions: What are the rights of the other parties on the Nile? and, Is there no limit to the supply which is to be earmarked for new land?

The answer to the first lies briefly in the restatement of the small figures of Sudan population just quoted; the answer to the second is that the

Digitized by Google

new land which can be irrigated, and consequently the supply of water required for it, is very clearly restricted by the configuration of Egypt, and further that the limit does not embrace any enormous area, nor is there any question of earmarking water now for use only in a distant future.

Limits of Egyptian Cultivation.

The possible extension of the Egyptian cultivated area is not only limited, but is comparatively small, the equivalent approximately of an increase of the present area by one-third; and, further, it could, if it were desired, be all put under cultivation in a little over thirty years. In a word, agricultural Egypt is not an infant that may be expected to grow for a long time yet, and to what size, whether big or little no one can tell, but it is already nearly grown up.

The answer that the present population of the Sudan is small and that the Sudan population dependent on the Nile is smaller still, does not, however, prove that it will always be so. If the Sudan Government so decided, though water storage works would be expensive, the million and a half blacks might be turned into cultivators on land brought into use by irrigation. The water required passes their doors in the White Nile and its tributaries run through, and in fact, rise in the heart of their territory; and though it is always to be remembered that Egypt is rainless and the Sudan is not, still the riverain area of the Sudan is greater than that of Egypt, and, as a possible consumer of Nile water, the Sudan is certainly not to be despised.

The problem of the claims of the two parties is complicated by the fact that at a certain time of the year, during the Nile flood, there is a huge excess of water in the river over the quantity that Egypt uses. From mid-July to mid-February there is always more than enough for her present demands. Even in 1913, when the flood was much lower than any recorded for 150 years, and from longer, though less reliable, records has been estimated to have been such a failure as occurs only once in 240 years, there was still an excess of water which ran waste to the sea. It is true that certain areas in Upper Egypt did not on that occasion receive water, and others had not enough, but that was not because there was not sufficient water in the river, but because of the absence of regulating works to head up the water high enough for it to flow into the canals serving those areas. That is to say, that even in this remarkably poor year had Egypt possessed the proper regulating works her present area might have been fully cultivated during the flood, and water have been left over and to spare for the Sudan. During the remainder of the twelve months, from mid-February to mid-July, Egypt is, on the other hand, in many years actually short of water, and is practically always short during the latter part of the time, and there can be no question of water being to spare for other users. In a word, there is seldom too much water in the Nile in summer, but never too little during the flood.

For the "Lean Years."

The obvious remedy—to store water over from the plentiful season to the time of shortage—is the remedy, which, after surmounting certain serious difficulties that need not be entered into, the engineers have adopted, and mean to pursue both in Egypt and the Sudan. For the Sudan is in the same predicament. The period from mid-July to mid-February, when she might draw upon excess water, is not long enough for such crops as cotton, and if such crops are to be cultivated, she must store what she requires and hold it over, and this she is doing. On the Blue Nile the Sennar Dam is being built to enable cotton to be cultivated on into March and possibly the earlier days of April on the Gezira plain, south of Khartoum. Egypt, for her part, has also begun, though she has at present suspended, a work upon the White Nile which will store during the flood sufficient water to prevent any shortage occurring again in her summer supplies, and at the same time permit of a beginning of the cultivation of new land. So far, that is to say, both countries have embarked upon schemes controlling the Nile for their respective benefit without detriment to either, and as far ahead as can be foreseen, they can continue hand in hand to develop, by further undertakings, as much land as they need with the same advantage to themselves and the same respect for each other's rights. Not only can the Sudan develop an area which will not subtract water from the quantity of water now all used by Egypt, but she will be able to irrigate very much more without preventing in any degree Egypt's development of all her own new land.

The position of Egypt's present area, together with her new area, will then be the same as that of her present area; it will have acquired, by using it, the right to the water it requires; thereafter Egypt will be fully grown, and, with the right to the water necessary to support her full growth guaranteed, she will be indifferent to what further development, if any, there may be of cultivation from the Nile in the Sudan.

Imaginary Dangers.

Not to overlook any feature of this programme, it is to be observed that it demands that Egypt shall develop every acre of her land that can be reached by Nile water, while for the Sudan it only asks that much, if not all, of her similarly placed land may be allowed to develop. But it is unnecessary to go into this question. Apart from all question of the claims of the much larger Egyptian population to complete its development at all costs, the fact that Egypt is so near to her full agricultural expansion would make barren any discussion of how far the full development of Egypt may ultimately set a limit to irrigation in the Sudan. The Sudan may never reach that degree of development by the Nile at which she would have to say, "More could be done, but may not be, because the rights of the fully developed Egypt prevent it." The remoteness of the Sudan, physical and climatic difficulties, the scarcity and character of her inhabitants, make the date of this imaginary check so remote for the present that it is not a consideration of political importance. The programme is amply sufficient which so allots the Nile as to allow Egypt to develop all, and the Sudan much, of their respective territories.

The fact remains that without the good will of the Sudan Egypt cannot build the works on the Upper Nile that will enable her to reach her full development, nor, by reason of her geographical position, can she be sure of her present supply without the same good will, and she requires assurance that the Sudan will not absorb any of that supply, but only develop her area with water which Egypt does not require and allows to go to waste to the sea. The Sudan, however, has apparently never contemplated using any of the water that Egypt requires, and there is no reason to suppose that she ever will. She is actually proceeding to impound a portion of the water which is at present wasted annually, to prevent any possible drain on the river at the season of the year when the total volume is sufficient only for Egypt alone.

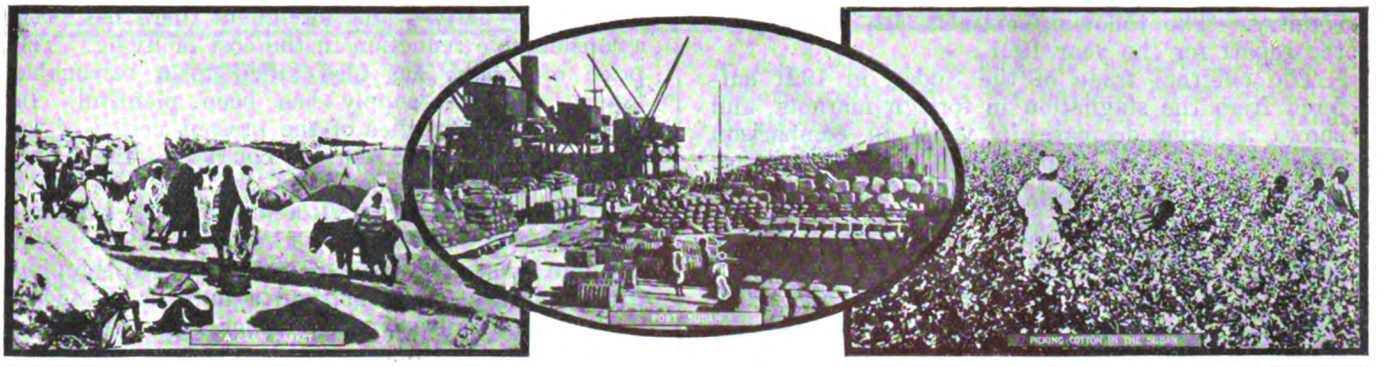
TRADE WITH THE SUDAN



THE SUDAN TRADING COMPANY.

Head Office : **Khartoum.**

Branches :

Port Sudan, El Obeid, Nahud, and principal stations in the Sudan, Alexandria, Cairo, Port Said (Egypt).

General Wholesale Import Merchants and Exporters of Sudan Produce.

London Agency:

35, Billiter Buildings, E.C.3.

ECONOMICAL EXCAVATIONS

We specialise in Dragline Excavators, suitable for drainage, irrigation, trenching and general work.

Full range of standard models available with bucket capacities from 3/4 to 9 cubic yards.

If you have any excavations to carry out, ask us for particulars of Ruston Draglines and Shovels.

RUSTON & HORNSBY LTD.

LINCOLN :: ENGLAND

SUDAN NOTES.

THE SUDAN AGENCY, CAIRO.

The Sudan Agency in Cairo, which has been for many years situated in a building that formed part of the Egyptian War Office, was transferred on October 1 to 6, Midan Tewfik, as the Ministry of War required the former building for its own use. For the general public the transfer is of considerable advantage, as the Sudan Agency is now more centrally situated and easily accessible.

APPOINTMENTS.

The following candidates have been selected for appointment to the Sudan Political Service :—J. F. P. Maclaren, T. P. Creed, M.C., A. R. C. Bolton, M.C., D. J. Coates, J. E. Lawson Johnstone, T. R. Blackley, J. W. Robertson, J. G. S. Macphail, C. B. Tracey.

KHARTOUM MUNICIPAL COUNCIL.

The Khartoum Municipal Council represents the first experiment in municipal government in the Sudan. Formed about a year ago, the Council may now be regarded as being in established working order. A number of committees have been formed, and these report to the Council through their chairmen. As the Council affords the most practical channel for the expression of public opinion, its attitude towards many of the problems which have been the subject of criticism in the past will be watched with interest.

CONTOMICHALOS, DARKE & CO., LTD.

Registered Office : **35, Billiter Buildings, E.C.3.**

Sudan Branches :

Port Sudan, Khartoum, Suakim, Tokar, Kassala.

STEAMSHIP, INSURANCE, FORWARDING AND BUNKERING AGENTS, COTTON AND COTTONSEED EXPORTERS.

General Agents in the Sudan for :

The Clan Line of Steamers; Ellerman's City & Hall Lines; The Ellerman & Bucknall Steamship Co., Ltd.; The Harrison Line; The Sun Line; The Bank Line (Andrew Weir & Co.); The Hansa Line; The London Assurance; etc., etc.

Through freights quoted from Sudan to all U.K. Continental and U.S.A. ports, and from Port Sudan to the principal stations in the Sudan.

Bunker Coals always in stock at Port Sudan, and steamers supplied at short notice.

For full particulars apply to London and/or Khartoum Offices.

Seventh and Revised Edition.

Macmillan's Guide to EGYPT & THE SUDAN

Including a Description of the Route through UGANDA to MOMBASA. Seventh Edition, with 26 Maps and Plans. 7/6 net.

THE HANDBOOK OF PALESTINE

Edited by HARRY CHARLES LUKE, B.Litt., M.A., and EDWARD KEITH-ROACH. With an Introduction by the Right Hon. Sir HERBERT SAMUEL, P.C., G.B.E. With Frontispiece and Map. Crown 8vo. 12s. net.

The Times.—"It is in no sense a competitor of any existing guide-book, but specializes in that class of information which, while generally only touched upon lightly in such publications, is of great interest both to the pilgrim and tourist and also to the resident and the student of the history, development, and present conditions in Palestine."

MACMILLAN & CO., LTD., LONDON, W.C.2.

PASSPORT FORMALITIES.

A new Ordinance consolidating old regulations and adding new provisions was issued by the Sudan Government on October 15, 1922.

Under Chapter II. of this Ordinance all persons who wish to enter the Sudan through Halfa or the Red Sea ports must be in possession of a passport or other paper of identity. This passport must be endorsed with permission to enter the Sudan, which can be obtained from the Sudan Agent in Cairo or from the Governors of Halfa and the Red Sea Province. The fee for endorsement is 50 m/ms. The Governor of the Red Sea Province has, however, authority to allow at his discretion passengers in transit, via the Red Sea ports, to land at these ports for temporary purposes without fulfilling these formalities.

The Civil Secretary and the Governors of Halfa and the Red Sea Provinces have the right to order the master of the ship to remove any person to whom permission to enter has been refused with a view to his repatriation.

Chapter V. of the Ordinance deals with permission to trade in those districts which the Governor-General may from time to time declare as closed. These districts at the present time are the Bahr El Ghazal, Mongalla, Upper Nile, and Nuba Mountains Provinces, the Sobat-Pibor Districts, the Southern and Western parts of Darfur Province, and those parts of the Fung and Kassala Provinces which lie within ten miles of the Abyssinian frontier. Permits to trade in these closed districts can be obtained from the Civil Secretary or the Governors of the Provinces in which the closed district lies. The fee payable for a permit to trade in these districts is 50 m/ms.

By an order of the Governor-General published under this Ordinance, the undermentioned districts are declared closed for all persons except natives of the Sudan, and officers of the Egyptian Army, and Sudan Government officials. Permission to enter these districts can only be obtained from the Civil Secretary and the Governor of the Province in which the closed district lies. These districts are Darfur, Bahr El Ghazal, and Mongalla Provinces, the Sobat-Pibor District, parts of Halfa and Dongola Provinces to the west of the Nile, the greater part of Kordofan, Nuba Mountains, and Upper Nile Provinces, and those parts of Fung and Kassala Provinces which lie within ten miles of the Abyssinian boundaries.

THE FOREIGN TRADE OF THE SUDAN.

The annual report of the Central Economic Board of the Sudan Government provides a comprehensive survey of the economic situation of the country. The following extracts are taken from the report for the year 1921 :—

The external trade of the Sudan in 1921 suffered from the stagnation in foreign markets, and shows a large decrease in value in comparison with that of the year 1920. This decrease amounted to £3.971,854, equivalent to 32.68 per cent.. the value having fallen from £12,151,143 in 1920 to £8,179,289 in 1921. Figures for previous years were :—1919, £7,878,225; 1918, £8,248,921; 1917, £6,889,443; 1916, £5,254,087. Until 1916 the total value of Sudan's external trade had not reached £4,000,000.

In 1920 the high value of trade was principally due to inflated prices. In 1921 the prices of imported articles were lower than those of the previous year, but the increase in tonnage of imports very nearly counterbalanced this decrease in values. The value of exports, however, shows a very large decrease, due partly to a fall in quantities, especially in the number of cattle and sheep exported, but mainly to the decrease in the fall in the price of cotton.

The values of exports for the last four years were :—1921, £2,057,230; 1920, £4,712,652; 1919, £2.740,759; 1918, £3,923,771. The figures for imports in the same period, with the percentage of the total represented by Government imports in brackets, were :—1921, £5,806,070 (46.3 per cent.); 1920, £7,006,865 (43); 1919, £4,805,745 (37.5); 1918, £4,024,582 (25).

The chief articles of export are :—Cattle, sheep, and goats, goatskins, hides, cotton seed, cotton ginned, sesame, dates, ground nuts, gum, millet (dura), ivory. Quantities in 191 were fairly well maintained, with the exception of cattle (1921, 16,719 head; 1920, 34,760 head), sheep and goats (1921, 53,131 head; 1920, 166,245 head), goatskins (152,866 and 399,024 respectively). The export of cotton ginned (5,022 tons and 3,953 tons), cotton seed (9,290 tons and 7,469 tons), sesame (12,593 tons and 8,910 tons), and ground nuts (4,203 tons and 2,846 tons) exceeded the maxima of any previous year, and that of dura (1921, 31,407 tons; 1920. 6,314 tons) was above the average for the years 1911-20. The export of dates (3,479 tons and 5,082 tons) was up to the average of the previous decade (3,480 tons), though less than in 1920; the quantity of gum (11,023 tons and 12,109 tons) was not unsatisfactory considering the universal depression in trade. Although the quantity of cotton exported is the largest recorded, the value of the export shows a decrease of no less than £E1,226,849 as compared with that of 1920. This decrease, together with the decrease in the value of the exports of cattle and sheep (£E629,198), accounts for no less than £E1,856,047 out of the total decrease in exports of £E2,655,422.

Imports.—Among the chief items of import may be mentioned flour, wheat, sugar, coffee, tea, coal, petroleum, petroleum cases, soap, cotton fabrics, and empty sacks. With the exception of flour (1921, 6,360 tons; 1920, 5,500 tons) and sugar (6,730 tons and 14,821 tons), the imports for 1921 were up to the pre-war level, and in some instances considerably above it. As compared with 1920, the quantities of sugar, coffee (3,377 tons and 4,219 tons), tea (736 tons and 1,071 tons), and empty sacks (2,757 tons and 3,406 tons) imported show a decrease, but there was a large increase in the import of cotton fabrics (3,982 tons and 2,965 tons).

General Remarks.—The remarkably heavy rains of the summer of 1920, following upon two years of comparative drought, led to a record output of agricultural produce. Grazing for animals was also exceptionally good.

Both for natives and foreigners there has been a considerable reduction in the cost of living. The price of labour has also fallen to a reasonable figure, and the supply has been plentiful. In spite of the difficulties of the present period of readjustment to more normal conditions the country will be all the better in the long run for a return to a healthier level of prices, both for commodities and for labour.

There has also been a reduction in shipping freights during the year, and a number of Sudan Government railway and steamer rates have also been reduced. In last year's report a hope was expressed that reduction in transport charge might enable Sudan dura (millet) to be exported to Europe, even if only at a small profit, all restrictions on the export of this grain having been removed as soon as the food supply had been rendered secure by the large crop of 1920-1921. Although export took some time to develop, dura began to come forward in such large quantities during the summer that the railways, owing to washouts after abnormal rainfall in the Northern Sudan, found difficulty in getting consignments through to Port Sudan; altogether, 31,407 tons of dura were exported, of which 22,551 tons were exported to Europe, 21,260 tons being taken by the United Kingdom. This export, though very small indeed in comparison with that of grain exports of many other countries, has been a boon to the cultivator, though it has afforded him a price in the grain districts of only 30 Pt.—40 Pt. per ardeb (Pt. 225—Pt. 300 per ton).

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K., Continent and India.

NOTES AND NEWS.

London, Tuesday morning.

The Phœnix Oil Merger.

At the adjourned meeting of the Roumanian Consolidated Oilfields the proposals for the merging of the company in the Phœnix Oil and Transport Company were agreed to by a great majority. This result was only in accordance with expectations, for the union is obviously in the best interests of both companies. Together they possess all the potentialities of a great enterprise, and it is not going too far to anticipate a notable future for the concern. The capabilities and prospects of the new undertaking were strongly emphasised at the meeting by Sir Watson Rutherford. "I doubt," he declared, "if any petroleum concern in the world, however great the prospects it may have to-day, started out with a better foundation—with proved properties and with an assured amount of working capital as large as that. Roumania is the nearest oilfield to the best markets, and Roumanian oil is of the highest quality. I consider the future inevitably points to a triumphant success."

The F.B.I. Meeting.

At the annual general meeting of the Federation of British Industries a not very encouraging view of the general trade prospects was given by the retiring president, Colonel O. C. Armstrong. He agreed that we have seen the worst of the "slump," and that any further movement is likely to be in the upward direction, but he questioned whether the prevailing optimism is justifiable. "At the present moment," he declared, "the feeling that trade prospects are brighter than they have been at any time within the last eighteen months is very generally prevalent. The belief is perhaps more instinctive than capable of tangible proof, but in such issues instinct often outstrips reason, and we can only hope that reason may follow in the wake." The signs of improvement, he pointed out, would be a cause for encouragement if we were in the position we held in 1913, but he estimated that the national income was not 80 per cent. of what it was before the war, and he laid stress on the point that "if our national expenditure is maintained at anything like its present level it will, failing a marked increase in our national income, strain our powers to meet our liabilities, balance our Budget, and leave any appreciable national savings to be dealt with at the end of the year."

Industry and Capital.

Colonel Armstrong went on to discuss the position of industry in regard to capital, and pointed out that, though for the moment money appeared to be fairly plentiful, it had to be borne in mind that large sums at present invested represented the working capital of many industries, which had become liquid owing to bad trade, and had been invested in easily realisable securities. He added that when trade revived there would be heavy realisations of these investments, and a still further demand for money to finance trade, and that it would probably be found, then, that instead of money being plentiful, it would be very scarce. There were only two sources, in his view, to which it was possible to look for substantial help—a material reduction of the national expenditure and an increase of the scope of the country's trade. "We cannot afford," he declared, "to neglect taking any steps which may lie within our power to secure the rehabilitation of the European countries, and it is incumbent on us to do our utmost to enable them to stabilise their currencies and balance their Budgets, though I am afraid for the present that anything we may do in this direction should be more on political than on financial lines. In regard to new markets, it would seem to be indicated that a most strenuous attempt should be made to develop them within the limits of our Empire, where, at all events, we are dealing with kith and kin, and where we need not fear that hostile tariff barriers, unfair restrictions against our trade, and other disabilities will be imposed upon us." Colonel Armstrong further urged that a strong committee should be formed to consider whether any joint scheme could be devised either by individual trades or by trades collectively to stimulate foreign trade.

Prospects in Roumania.

In recent issues we have reproduced lectures on Yugoslavia and Bulgaria at the City of London College. This week we give a report of the third lecture of the series by M. Michaescu on the position of Roumania. The account he gives of his country's potentialities is full and informative, and shows very plainly the great possibilities that lie before Roumania. To one point, however, the lecturer might with advantage have devoted much more attention, and that is the oil position. Whatever the extent of Roumania's other resources, it is beyond question that it will be very largely on her oil supplies that she must depend to put her again among the leading European nations, and it is because of her petroleum that the view is generally and justly held that the leu will be easily the first among the Balkan currencies to regain parity. The lecturer touched *en passant* on the customs tariff, and I am afraid I am not altogether in agreement with his views on this matter. The point is not whether the tariff is relatively less onerous than before the war, but that, by increasing the duties, Roumania has taken a line not calculated to further reconstruction.

Commerce and Industry.

(Reports from Our Own Correspondents.)

ROUMANIA.

Bucharest, December 12.

A Belgian Delegation.

A Belgian Financial Delegation has recently arrived in Bucharest to negotiate with the Minister of Finance with a view to reaching an arrangement concerning the 170 million lei Roumanian Rentes in Belgian possession, which the Roumanian Commission, sitting at Brussels, refused to stamp on the ground that they were bought from Germans after Roumania had joined in the war. It is thought that the mission is not likely to be successful, as the Minister of Finance is determined to take his stand on legal technicalities, and on the fact that Belgian laws forbade Belgian subjects to purchase such securities during the war from enemy subjects.

Relations With Austria.

Herr Seipel, the Austrian Chancellor, will shortly pay a visit to Bucharest, when he will initiate economic negotiations of unusual importance between the two countries. Herr Seipel proposes to make a convention with Roumania, whereby Austria will supply Roumania with sundry industrial products in exchange for agricultural produce, and especially cattle.

Merchants' Debts Abroad.

The delegation of the Bucharest Chamber of Commerce which left here some time ago to arrange for the settlement of Roumanian merchants' old debts abroad in foreign high currencies, announces from Paris that negotiations with the French creditors have been brought to a successful issue. Great hopes are entertained that similar results will be obtained from the negotiations with the creditors in England, Belgium, Italy, and America.

New Oil Regulations.

A special committee at the Ministry of Industry and Commerce is drafting the new oil regulations. It appears that the Minister is now convinced that many of the claims set forth by the oil companies are justified, and the new regulations will in consequence provide for important increases in the prices of oil products, but with the obligation on the part of the producers to supply fully home requirements. The new regulations are expected to come into force on January 1.

THE ESSENCE OF INSURANCE IS SECURITY.

Prohibition of Export of Eggs.

Wholesalers have been buying up eggs in very large quantities throughout the summer with the intention of exporting them in a preserved state during the winter months to countries with high currencies, whereby on former occasions they have realised enormous profits. The result of this accumulation of stocks, of course, has been the establishment throughout the country of high prices for this indispensable commodity. The wholesalers have been persistently urging the Minister of Commerce to grant them export permits, but the Minister has not only refused to allow this export, but has given orders that the entire quantity of eggs—a few hundred wagons—should be disposed of in the country for the purpose of satisfying home needs, and in case of refusal should be sold by auction.

The Weather and Crops.

This year winter has set in earlier than usual, and during the last two weeks we have been having abundant snow and subsequent frost. Sowing had naturally to be suspended owing to the soil being frozen. Fortunately, farmers have not lost time, and took advantage of the fair weather, which lasted about three weeks between the time the rains ceased and the frost set in.

According to official data it appears that the total area sown under wheat during this autumn amounts to about 1,600,000 hectares, besides a modest area sown under rye and other cereals. The area under wheat is not satisfactory, but considering this year's adverse climatic conditions, it represents, however, a figure which ensures a wheat crop sufficiently large to cover all next year's home requirements. Advantage will naturally be taken in the spring to sow the rest of the arable land under wheat, maize, oats, barley, oilseeds, etc., the yield of which is mostly destined for export.

GREECE.

Athens, December 10.

New Manganese Deposits.

Large deposits of manganese have been discovered in the Thessalian mountains near the farm of Zarko-Maria, and it is understood that a syndicate is already under formation for the purpose of exploiting the find.

MOROCCO'S MINERAL RESOURCES.

The *Information Financiere* states that, whereas lead and zinc are abundant in Algeria and Tunis, they are rare in Morocco. Copper, on the other hand, is much more abundant than in Algeria, and the Protectorate also possesses deposits of tin, a metal previously unknown in North Africa. None of these ores, however, has as yet been worked commercially. The east of the Protectorate possesses a considerable quantity of manganese, and a field is now being prospected to the north-east of Figuig which contains manganese, iron ore, lead, and copper. The Protectorate possesses large reserves of iron ore and phosphates, the latter being estimated to amount to not less than four milliard tons in the single basin of El-Boroudj-Oued-Zem.

GREEK COUPON PAYMENTS.

Coupons of the Greek five per cent. loans of 1881 and 1884 falling due on January 1 should be presented for payment at Hambros Bank, Ltd., 45, Bishopsgate, for payment of 32 per cent. in gold of their face value; coupons of the four per cent. monopoly loan of 1887 for payment of 43 per cent. in gold of their face value; coupons of the five per cent. funding loan of 1893 for payment of 32 per cent. in gold of their face value; in accordance with instructions received from the International Financial Commission, Athens. Coupons of the four per cent. loan of 1902 should also be presented for payment.

ROUMANIA'S ECONOMIC POSITION.

The Transport Problem.

M. Gregoire Michaescu, Commercial Attaché to the Roumanian Legation, gave an interesting lecture at the City of London College on December 11 on present conditions in Roumania.

Roumania, he said, was the richest country in Europe. Before the country's political position in Europe was established Roumania supplied with cereals, timber, sheep, and skins the Turks, Genoese, Venetians, Spaniards, and even the English. Through the War of Independence in 1877 Roumania began her political existence. It was the Germans who first realised and appreciated the wealth of the country. Their sentiments, however, were not on the side of Germany so much as that of France, but Germany succeeded in establishing an important exchange of products between the capitals. In 1880 the goods imported into Roumania from Germany amounted in value to about 7 million lei, while the figures for France were 35,000,000 lei. In 1910 the amount from Germany had risen to 138 million lei, while that from France had fallen to 25 million lei.

From the earliest times Germany's policy was to master Roumania both politically and economically, firstly because she considered Roumania a link between Western Europe and other Continents, and secondly because it was an important economic centre. The Danube was highly appreciated by Germany as a most important, and the shortest, way to Baghdad and India. It would appear that Germany's whole attention was concentrated on the Danube because the heaviest conditions with regard to it were imposed by the Treaty—of so-called Peace—of Bucharest of 1918.

In 1920 when they had a mobilised army of about a million men, an area of about 14½ million hectares, or nearly 36 million acres (44 per cent. of the cultivable surface of the country) was cultivated, and they obtained a medium harvest out of which they could export only 100,000 truck-loads of cereals and flour. In 1921 practically double this area was cultivated, and the harvest was satisfactory, and they hoped that in normal times they would be in a position to export more than 600,000 truck-loads of cereals alone. In 1921 the export of cereals amounted to 1,500,000 tons.

Roumania was a large cultivator of vineyards, and, generally, they produced a very good and very cheap wine. Unhappily this year the production was nil on account of heavy rains. In 1914 Roumania was classified as the fourth among the oil-producing countries with 1,800,000 tons out of 54,000,000 tons. The most important oil products exported were benzine, lamp oil, and lubricating oil, of which 233,000 tons were sent to Great Britain. The quantity exported in 1921 was 300,000 tons, out of 1,100,000 tons produced. The great reduction was due to the destruction through the war, and the lack of machinery and the impossibility of replacing it owing to the adverse rates of exchange.

In old Roumania and the annexed territories the amount of coal (lignite) produced in 1920 was nearly 2,000,000 tons, a sufficiently large quantity in view of the needs of the country, but they would still need larger quantities of coal, and especially of furnace coke for their factories. Roumania had another very important source of wealth, and that was the "natural gas" called "gas methane." In 1912 four factories alone used 210,000,000 cubic metres of that gas, the equivalent of a caloric power of 5,200 calories per cubic metre, or the equivalent of 103,700 tons of fuel oil. Roumania possessed enormous quantities of the purest mineral salt. The Government had the monopoly of its exploitation, and 40 per cent. of the production was exported in 1920, in particular to the Balkan countries.

They also had veins of gold and silver. In 1913 2,334 kilos of gold and 3,607 kilos of silver were extracted. They possessed deposits of zinc, lead, asphalt, and copper, but these did not exist in very large quantities. The reserve of pyrites was estimated at 5,000,000 tons. Manganese, chromate, aluminium, and quicksilver were also exploited. The exploitation of iron ore was only slightly developed; therefore, they had to import more than half of the amount required for their needs.

Roumania being an agricultural country, cattle, horses, pigs, sheep, goats, and poultry were bred in large numbers. This industry was very flourishing before the war. At the present time, as they had had to replace the stock taken away by the enemy or lost through the unfavourable post-war conditions, the export was much reduced. The area covered by forests in Roumania was a little over seven million hectares (about 18 million acres). The timber obtained was, as a rule, of very good quality.

Inadequate means of transport had impeded the progress of all these activities. The Government was endeavouring to improve the railways. For this purpose they had bought, and were still buying, locomotives and wagons. They had also sent passenger carriages and locomotives to be repaired where they could obtain a guarantee for their immediate return. The repairing workshops were working at full power in order to execute necessary work. The Government had done all in their power to restore normal conditions. The work, however, could not be done as quickly as desired, because not only was the length of railway line greater than before, but there was also a shortage of materials, and the workshops were not equipped with rolling-stock and the up-to-date machinery for such important requirements. Before the war Roumania had 3,700 kiloms (about 2,000 miles) of railway lines, on which 932 locomotives, moving 1,652 passenger and 24,138 goods carriages, were running. In 1922 the country had 11,768 kiloms (over 7,000 miles) of railway lines, with only 1,376 locomotives and 6,433 passenger and 104,000 goods carriages. Only half of this rolling-stock was being worked, as the remainder required attention.

Although they still had very great difficulties to face in solving the transport question, and although their production was still very much reduced, they were in a position to export cereals, oil products, timber, cattle, fruit, salt, etc., in the first nine

months of this year to the value of over 5 milliards of lei.

If they examined the present Customs tariff they would notice that, generally speaking, the old taxes were increased between five and ten times. But if they compared the value of money before and after the war they would see that for Great Britain, for instance, all the articles were far less taxed than they would be had they kept pace with the depreciation of Roumanian money. One or two examples might be of interest. A duty of 21 lei was imposed on one kilo of fine woollen cloth. It was a heavy tax for the Roumanian public, but what did it mean in English money? Something like 7½d. per kilo, while, according to the old tariff, it had to pay over 2s. 6d. The cotton yarn most heavily taxed bore a duty of 20 lei (or 15s.) per 100 kilos; to-day the same article was taxed 80 lei (or 3s. 3d.) per 100 kilos. Galvanised sheet-iron was taxed 8 lei (6s. 4d.) per 100 kilos; to-day the same article was taxed 90 lei (something over 2s. 6d.). In his opinion the taxes were not heavy for the British exporter, and as they had a good many trustworthy importers and merchants, and as they needed agricultural machinery and implements, the present conditions were most favourable for business.

COMPANY NOTES AND REPORTS.

Bombay, Baroda and Central India Railway.

The report of the Bombay, Baroda and Central India Railway Company for the half-year ended September 30 states that the cabled estimate of results of working show net earnings of Rs.1,38,41,814, against Rs.1,12,49,831 for the corresponding half-year, the percentage of working expenses to gross earnings being 75, compared with 77.71. The directors recommend the payment in January next, in respect of the year 1922-23, of an interim dividend of 1½ per cent., making, with a guaranteed interest of 1½ per cent. for the half-year to December, 1922, a total payment in January of 3 per cent.

Baku Consolidated Oilfields.

The report of the Baku Consolidated Oilfields, Ltd., states that since the last report the properties of the company in Russia have remained under the control of the Soviet Government. At the request of His Majesty's Government the company has furnished a detailed statement of claim in respect of these properties. The directors are advised that the oil lands of the company, which have been "nationalised," are worth to-day a much higher figure than that at which they stand in the balance-sheet, but this part of the claim could obviously be met by the return of the properties. There is a further claim in respect of 108,000 tons of oil commandeered, which can also be settled in kind by restoring to the company a corresponding amount of oil from the large stocks in the hands of the Soviet Government. There then remains the question of compensation for plant and machinery, as also the value of oil extracted from the company's lands since "nationalisation." Throughout the period under review the Russian situation has constantly engaged the earnest consideration of the directors, who have continued their efforts to obtain restitution of the company's property in Russia. The directors are anxious to see an early resumption of trading relations between this country and Russia, provided the legitimate rights of the company are not prejudiced. While they are of opinion that no resumption is possible until the rights of private ownership are recognised, they hope that wiser counsels are beginning to prevail with the Soviet Government.

Egyptian Salt and Soda.

The report of the Egyptian Salt and Soda Company for the year ended August 31, 1922, shows gross profits of £E110,147. The general administration expenses were £E6,154, and the interest on debentures £E2,738, leaving a net profit of £E101,254. The directors have set aside for depreciation £E11,535, provision for replacement and renewal of plant, railway material, etc., £E5,000, provision for eventualities £E5,000, leaving the balance of profit of £E79,718, which, with £E54,025 brought in, makes £E133,744. The directors propose a dividend of 17½ per cent. (3s. 6d. per share), carrying forward £E48,808.

A decree has been published restoring the monopoly of the French flag for shipping traffic between France and Algeria. Ten days' grace is given to foreign vessels.

COMMERCIAL BREVITIES.

The ordinary general meeting of the Crédit Foncier Egyptien will be held at the head office, Cairo, on January 19.

During the present year 319,034 decares has been planted with tobacco in Bulgaria, as compared with 218,742 decares planted in 1921.

The Finance Committee of the Indian Legislature has sanctioned a credit of £113,000, the estimated cost of the Indian Pavilion at the British Empire Exhibition.

The British Burmah Petroleum Co., Ltd., announce that the production of crude oil for November, including the Rangoon Oil Co.'s output, amounted to 61,606 barrels.

The Suez Canal Co. announce payment of the following amounts on coupons due January 1 next:—Capital shares, 119.55 frs. net; Jouissance shares, 109.39 frs.; founder shares, 63.25 frs. net.

The exports of tobacco from Bulgaria during 1921 totalled 19,454,647 kilogs., valued at 568,588,055 levas. The Bulgarian tobacco imported into the United Kingdom last year amounted to 96,636 kilogs., valued at 3,377,635 levas.

The Postmaster-General states that the air mail for Baghdad, which left London on November 30, reached Baghdad on December 9. The air mail for London, which left Baghdad on December 8, reached Cairo on December 11.

The traffic receipts of the Egyptian Delta Light Railways for the week ended November 20 amounted to £E13,659; total for the year, £E213,198. For the corresponding period of last year receipts amounted to £E13,120; total for the year, £E245,020.

The Bengal Telephone Corporation, Limited, announce that fully-paid scrip certificates must be lodged at the offices of the P. and O. Banking Corporation, Ltd., 122, Leadenhall Street, E.C., for payment of the interest due December 31, 1922, of £3 4s. 6d., less tax, per £100 bond.

The accounts of the Algerian Oilfields for the year to September 30 show expenditure, less loss on investments realised, of £1,586, increasing debit to general expenditure brought down to £9,317. Shares in Trinidad Esmeralda Estate and other companies, at cost, figure as an asset for £51,582.

The East Indian Railway Company recommends a dividend from surplus profits of 16s. per cent. on deferred annuity capital and deferred annuity capital Class "D" in addition to a guaranteed interest of £2 per cent. for the half-year ending January 31, and 4s. per cent. compensation paid by the Secretary of State for India on account of income-tax.

Land Bank of Egypt.—The Comptoir National d'Escompte de Paris, 8-13, King William Street, E.C., have received instructions to pay, on January 1, coupons and drawn bonds of the 3½ per cent. loan of the above bank at the fixed exchange of 25.27½ frs. to the £, and coupons of the 4 per cent. loan at the rate of exchange of the day on Paris.

It is now prohibited to import or sell in the Sudan any beer, wines, spirits, or other alcoholic liquors except under licence from the Governor, and also to sell or transfer alcoholic liquor to any native of Arabia or of any part of Africa, except of Egypt north of Shellal, and of the Union of South Africa, except under a general order from the Governor to the contrary.

The transfer books and register of members of the Anglo-Persian Oil Co., Ltd., in respect of 7,000,000 8 per cent. cumulative first preference shares of £1 each; 3,500,000 9 per cent. cumulative second preference shares of £1 each, and 8,100,000 ordinary shares of £1 each, will be closed from December 27 to January 10, both days inclusive, for the preparation of dividend warrants payable January 31 in respect of the above shares.

The directors of Messrs. Harrisons and Crosfield have declared dividends on the cumulative preference shares at the rate of 6 per cent. per annum for three months ending December 31, less tax at 5s. in the £, and on the preferred ordinary shares at the rate of 10 per cent. per annum for six months ending December 31, less tax at 5s. in the £. Warrants will be posted on January 1 to holders on the register at that date, including approved transferees in respect of the transfers lodged not later than December 15.

Near East Markets.

LONDON PRODUCE REPORT.

Cheaper Dried Fruit.

(*From Our Own Correspondent.*)

London, Monday Night.

Sugar.—Home refined has been in fair request at unchanged prices. Tate's cubes at 56s. 3d., London granulated at 50s. 1½d., and Lyle's granulated at 50s. 4½d., are all unaltered. Foreign descriptions have been fairly steady. West Indian crystallised shows no change at 45s. 3d., as also white Mauritius at 47s. 9d. White Java is 9d. lower at 47s. 9d. Quotations are:—December, 21s. 9d.; January, 21s. 10½d.; February, 22s. 1½d.; March, 22s. 4½d.; and May, 22s. 7½d.

Coffee.—There has been no change throughout. East Indian comes to business at 110s., and Nairobi has been done at 94s. Costa Rica is a firm feature at 116s. The futures market has been lifeless. Quotations are:—December, 60s. 9d.; March, 60s. 9d.; May, 60s. 6d.; and July, 60s.

Desiccated Coconut.—There has been no change in the position with regard to this commodity. Supplies on hand are getting smaller each day.

Rice.—Now the Christmas season is approaching, little demand has been in evidence for all grades, but the market has remained very firm.

Green Fruit.—Arrivals of Spanish oranges during the week have been exceedingly heavy, but the demand is so poor that there is a likelihood in the next few days of arrivals being in excess of the demand. Quotations are:—Denia and Valencia oranges, 14s. 6d. to 35s. box (360's to 300's). Shipments of lemons have not been so heavy during the past week, but a steady request has been noticeable throughout. There is no alteration in the position with regard to bold fruit. Quotations are:—Messina lemons (new crop), 14s. to 25s. box (300's), 26s. to 50s. case (300's). Another exceptional week for box fruit apples is to be noted, and with heavy arrivals an excellent demand is being maintained. Grapes are in favour, while prices are variable.

Dried Fruit.—With the arrival of the festive season all kinds of dried fruit have been in marked request. Large quantities of Smyrna sultanas have arrived, which caused a slump in prices of about 15s. to 20s. cwt. The request for natural figs is still disappointing, and trade is almost at a standstill for this quality, but layers and locoums—a small consignment of which has recently arrived by the s.s. Pavia—are being met with a ready market. Almonds have been firm, while the demand has been good.

Oilseeds.—A harder tone has prevailed. Indian linseed is 1½d. up at 20s. 9d., while La Plata has risen 3d. at 19s. 6d. Rapeseed has been fairly steady. Toria has shed 4½d. at 17s. 10½d., while bold Ferozepore is unchanged at 17s. 7½d. Cottonseed has advanced in all cases. Egyptian at 11s. 6d. is 4½d. up, and Sakellaridis has gained 5d. at 11s. 3d. Indian has advanced 1½d. at 9s. 1½d.

Oils.—Prices are again firmer. Linseed oil is 1s. up at 39s. 6d., while refined has firmed up 6d. at 45s. 6d. Crude rape oil shows an increase of 4s. at 42s. 6d. Cottonseed oil remains as last week. Egyptian has been done at 36s. 6d. and refined is quoted at 43s. Technical is 37s. 6d., and deodorised is 45s.

Oilcakes.—Prices have been variable. Cottonmeal cake has gained 30s. at 300s., but linseed cake has dropped 20s. at 270s. Cottonseed and coconut cake are both unchanged at 160s. and 180s. respectively.

EGYPTIAN CROPS.

The Bulletin of the Egyptian Ministry of Agriculture gives the following particulars of crop conditions in November:—

Maize (Nili).—The weather was on the whole favourable. Harvesting is almost general. The yield is expected to be below the average.

Millet (Nili).—The hot weather has improved the state of late sown crops. Harvesting is expected to begin shortly.

Rice (Sêfi).—Harvesting is over. The crop has somewhat suffered from lateness of sowing and shortage of summer-water. The yield is expected to be below the average. The total yield will be much less than last year, owing to small area under this crop.

Rice (Nili).—The state of late sown crops is now satistory. Harvesting started. The yield is expected to be above normal.

Sugar-cane.—The weather, although damp during nights in some provinces, was, on the whole, favourable, and water supply sufficient. Slight attacks of borer have been reported from several provinces. Mealy bug was also noticed in Minya, Asyût, and Girga Provinces. The general condition of the crop is satisfactory.

Bersim.—The weather was favourable and water supply sufficient. The first cutting of early-sown crop is in progress in several provinces. Slight attacks of cotton worm and cut-worm were reported from nearly everywhere. The condition of the crop is fairly satisfactory.

Wheat, Barley, and Beans.—Weather was favourable and water supply sufficient. Sowing and manuring are in progress.

Lentils.—Sowing continued under favourable conditions.

Helba.—The crop is growing satisfactorily. Some of the early sown crop is now being cut for local consumption.

SUDAN PRODUCE.

Gum.

The C.E.B. report for October states that the exports of gum during the month were 472,738 kilos of hashab, of the value of £E23,233, 36,017 kilos of bleached of the value of £E2,178, and 93,306 kilos of talh of the value of £E1,757 via Port Sudan, and 12,410 kilos of talh via Halfa.

Kordofan Province.—Fifty-three kantars of 100 rottles (45 kilos) of gum were sold in El Obeid market during October, as against 4,441 kantars during the same month last year, at an average price of £E1.457 per kantar. The arrivals at El Obeid from Nahud were 482 kantars, as against 1,868 kantars last year. 128 kantars were sold in Nahud market during the month, as against 912 kantars last year, the average price being £E1.310 per kantar. No gum was sold either in Um Ruaba or Rahad markets during the month of October.

Fung Province.—Fifty-four tons of gum were exported by rail from Sennar River Siding during October.

Kassala Province.—Nine kantars of gum hashab and 4¾ kantars of talh gum were exported from Gedaref during the month.

Cotton.

Kassala Province.—Gash Area: The Inspector of Agriculture, who has just returned from an inspection of this area, reports that the cultivation is very promising, and a large amount has been watered and a fair amount of cotton sown. North of Illabili sowing has just been completed, as the land is still wet from the flood. It is expected that the best cotton will come from this area, as it has not recently been flooded and is free from grass and trees. In the Igr, Mekali, and Gammam areas the cotton is good. Some damage has been caused by a small worm which attacks the young cotton and causes the young shoots to wilt and die. This must be put down to the failure to get all the old stalks cut and burnt before the flood this year. With the exception of the Komoi-selool area, all stalks of 1920 and 1921 crops have now been cut except for isolated patches, which are receiving attention. The Western gash has received only sufficient water for the wells, and the cultivation of cotton there is negligible.

Blue Nile Province.—Cotton on the farm is reported to be doing well, but thirp has appeared to a slight extent on the experimental farm.

Dura.

Seven thousand five hundred and forty-seven tons of dura were exported from the Sudan in October, viz.:—6,151 tons to the United Kingdom, 556 tons to Egypt, 386 tons to Algeria, 315 tons to Malta, and 139 tons to Arabia. The total exports of dura for the period January to October, 1922, are 33,190 tons, as compared with 29,314 tons in the same period in 1921, an increase of 3,876 tons.

Kassala Province.—Market prices per ardeb of 300 rottles (135 kilos). Kassala, 450 m/ms; Gedaref, 512 m/ms; Mefaza, 285 m/ms. Dura on the rain lands down the Gash is ripe and ready for harvesting, but has suffered from birds. The Gash flood dura is late, but so far is healthy and free from disease.

Red Sea Province.—Reports show that the dura crop will be a fair one, though not as satisfactory as that of last year.

Fung Province.—Market prices of dura at Singa per ardeb of 300 rottles (135 kilos): Highest P.T. 22, lowest P.T. 15. 463 tons of dura were exported by rail from Sennar River Siding.

Sesame.

White Nile Province.—56 ardeb of 330 rottles (148 kilos) of sesame were exported from Dueim and 500 ardebs from Tendelti. The market price at Dueim was £E2, at Kosti £E1.700 m/ms, and at Tendelti £E1.500 m/ms. per ardeb.

Fung Province.—Market prices at Singa per ardeb of 300 rottles (135 kilos): Highest £E1.125 m/ms., lowest 875

Digitized by Google

m/ms. 104 tons of sesame were exported by rail from Sennar River Siding.

Kordofan Province.—17 ardebs of sesame were sold in El Obeid market at an average price of 120 P.T. per ardeb of 330 rottles (148 kilos).

Ground Nuts.

Upper Nile Province.—The ground nut crop at Renk has ripened and is reported to be better than last year's crops.

White Nile Province.—The market price of ful Sudani at Kosti was P.T. 70 per ardeb of 200 rottles (90 kilos).

Dates.

Halfa Province.—An October report states the first consignment of the new date crop reached Halfa on October 14, and prices are so far better than those of last year. Prices per 100 kilos:—Gondeila, £E1.800; Barakawi, £E1.700; Gargouda, £E1.500.

Livestock Hides and Skins.

Darfur Province.—1,646 head of cattle were imported from Wadai during September.

Berber Province.—2,816 sheep and goats and 198 cattle were sold in Damer Market during the month, of which 528 and 8 respectively were exported. The revival of the Damer market anticipated in September has not been realised, owing to the quarantine restrictions on cattle at Shellal and the continued lack of demand for sheep in Egypt. On the anticipated release of restrictions at Shellal revival may be expected. Plenty of animals are offered for sale, but buyers are few. Average prices:—Sheep, £E0.754 m/ms; cattle, £E2.362 m/ms; 247 Rashaida camels were exported during the month.

Kassala Province.—662 head of cattle were exported from Gedaref during September and 367 head in October.

Halfa Province.—Exports of animals, etc., to Egypt:—Cattle, 247; sheep, 465; goats, 21; hides, 5; skins, 300.

Red Sea Province.—Two camels, 80 head of cattle, 135 sheep, and 307 skins passed through the quarantine.

Rainfall and Cultivation.

Bahr el Ghazal Province.—At Wau 1.571 inches of rain fell, which is three inches less than last year and seven inches under the average for September. There has been a great deal more rain in the districts than actually in Wau. In the north and around Wau the harvest has commenced. More rain is required, and although the crops look well they are late. The maize crop in the Western District has been good.

Kassala Province.—A heavy storm of 128 millimetres fell at Gallabat on the night of September 5, as a result of which the frontier khor swept over the gardens washing them out and damaging 15 houses in the village. Rain cultivation throughout the province is reported good, though there is one report of damage owing to excessive rains.

The state of the rainfall cultivation is reported to be uniformly satisfactory and to be free of pests. There are, however, reports of flocks of sparrows at Mefaza, and damage has been done by birds, chiefly doves, to the rain dura down the Gash. The crops on the irrigated areas are promising

Halfa Province.—A little rain fell in Halfa on October 14, and also further north on the Halfa-Shellal reach.

Blue Nile Province.—The heavy rain on the night of September 30 delayed the ripening of the crops. This rain was extremely valuable, but seems only to have fallen near the river and Managil and other parts of the Province near the White Nile Boundary did not benefit. Reports as to the ultimate yield of the crops vary considerably. There is undoubtedly a lot of very good dura, but it is not nearly as general as in 1920.

Roads and Communications.

Bahr el Ghazal Province.—September.—Clearing roads has commenced. This year a new and better type of rest house is to be constructed in the Central District, and it is hoped to be able to complete those on the Wau-Meshra, Wau-Diem-Zobeir and Wau-Tonj roads. Next year the rest houses on the other roads will be similarly dealt with. The great distances make it difficult to look adequately after the rest houses and prevent damage. In Rumek District, the chiefs have carried out the first clearing of the roads on their own initiative, which is encouraging. The ambatch raft on the River Naam broke, but is being repaired and another made for the same river at Old M'Volo.

The District Commissioner made a journey in a ferry boat down the river Naam. He reports the river wide and clear, but, of course, it is useless for navigation, as it runs into the swamps. The journey came to an abrupt ending owing to a hippopotamus charging the boat when tied to the bank and damaging the rudder. These animals are very numerous in the river, over 100 being counted in one pool. Owing to the heavy floods the Raga ferry was again sunk, and the boat on the River Sopo has disappeared.

Red Sea Province.—Thirty-nine merchant ships of a net registered tonnage of 106,792 entered Port Sudan during the month.

'BALKAN' NATIONAL INSURANCE COMPANY
FOUNDED 1895.

Capital paid up	5,000,000
Total reserves as per December 31st, 1920	53,200,000
Premium Income during 1920	28,300,000
Amounts insured of Life Branch exceed	150,000,000

Branches maintained: Fire, Life, Marine, Casualty and Re-insurance of all branches.

HEAD OFFICE: SOFIA, BULGARIA.

CURRENT PRICES.

General Produce.—Bacon (Continental), 112s. per cwt.; (Canadian), 102s. 6d. cwt.; (American), 91s. 6d. cwt.; butter (Danish), 201s. cwt.; (Australian), 163s. cwt.; (New Zealand), 173s. cwt.; cheese (Canadian), 124s. cwt.; (New Zealand), 123s. cwt.; lard, 80s. 6d. cwt.; eggs (Danish), 25s. 6d. per 120; (Styrian), 15s. 9d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 9½d. lb.; cocoa (Ceylon good to fine), 76s. cwt.; coffee (Costa Rica), 120s. cwt.; (East Indian), 115s. cwt.; (Central American), 90s. 6d. cwt.; (Jamaica), 74s. cwt.; (Mocha Longberry), 94s. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 107s. 6d. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. lb.; pepper (Singapore black), 3¾d. lb.; (Muntok white), 6¼d. lb.; pimento, 2 1-3d. lb.; raisins (Valencias), 65s. cwt.; currants (Vostizza), 70s. cwt.; currants (Amalias), 61s. 6d. cwt.; sultanas (Smyrna), 100s. cwt.; sugar (Tate's cubes), 55s. 9d. cwt.; (Lyle's granulated), 50s. 3d. cwt; (Mauritius crystals), 47s. 7½d. cwt.; (West Indian crystallised), 44s. 4½d. cwt.; (centrifugal), 17s. 4½d cwt.; tapioca (fair Singapore), 3d. lb.; rice (Rangoon No 2), 15s. 10½d. cwt.; bran (Rangoon), £6 11s. 3d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 7½d. lb.; tea (Indian common to good common), 1s. 6d. lb.; (medium to good), 1s. 11d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 6d. lb.; (medium to good), 1s. 11½d. lb; (fine to finest), 3s. lb.; Java (common to good common), 1s. 5d. lb.; wheat (English white), 42s. qr.; wheat (Australian), 40s. 6d. qr.; oats, (English), 28s. 6d. qr.; oats (La Plata, ex ship), 28s. 3d. qr.; maize (La Plata), 35s. 4½d. qr.; flour, 37s. 3d. sack.

Chemicals.—Acids: Boric, 56s. cwt.; oxalic, 7½d. lb.; citric, 1s. 9½d lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 1s. 6d. ton; arsenic (white powdered), £55 10s. ton; benzole (standard), 1s. 9½d gallon; bleaching powder (35 per cent.), £12 12s. 6d. ton; borax crystals, 28s. 6d. cwt.; cream of tartar, 96s. 3d. cwt. Potassium: Bichromate, 6½d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £36 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium. Crystals, 107s. 6d. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5¼d. lb.; alkali (58 per cent.), £7 18s. 9d. ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £14 ton; prussiate, 11d. lb.; nitrate, £13 5s. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £38 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 10s. ton: sulphate of copper, £26 7s. 6d. ton; sulphate of iron, 55s. ton.

Hides and Skins.—Ox and heifer (first), 90 lb. and up, 8⅜d. lb.; 80 to 89 lb., 8⅜d. lb.; 70 to 79 lb., 8⅜d. lb.; 60 to 69 lb., 8d. lb.; 59 lb. and under, 7½d. lb.; (second), 90 lb. and up, 8d. lb.; 80 to 89 lb., 8d. lb.; 70 to 79 lb., 8d. lb; 60 to 69 lb., 7½d. lb.; 59 lb and under, 6d. lb.; cows (first), 60 lb. and up, 7d. lb.; 59 lb. and under, 6⅜d. lb.; (second), 60 lb. and up, 5⅝d. lb.; 59 lb. and under, 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 5⅜d. lb.; (second), 4⅜d. lb.; (third), 2½d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7.8 to 13.8; Durbhangas, 6 to 8; Patnas, 5 to 6. Salted cows, 6 to 9. Arsenic hides (buffalo), 4.8 to 8.8. Skins: Calf, 8 to 10 per 20 lb.; goat, 240 to 285 per 100 pieces

Metals.—Aluminium, £100 ton; antimony (English regulus), £29 ton; bismuth, 10s. lb.; copper (standard), £62 11s. 3d. ton; copper (electro), £69 15s. ton; gold bars, 90s. 1d. oz.; iron (No. 3 Cleveland), 92s. 6d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £17 10s. ton; lead (soft foreign), £25 18s. 9d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 45s. unit; nickel, £137 10s. ton; platinum, 440s. oz.; graphite (80-90), £12 10s. ton; quicksilver, £12 2s. 6d. bottle; spelter (G.O.B.), £38 10s. ton; tin (standard), £180 17s. 6d. ton; wolfram, 14s. 6d. unit; zinc sheets, £41 15s. ton; tin plates (20 x 14), 19s. 10½d. box; silver bars, 31 13-16d. oz.

Miscellaneous.—Cotton (American), 14.33d. lb.; Egyptian (Sakel), 17.10d. lb.; jute (first grade), c.i.f. £36 10s. ton; jute (lightnings), £34 15s. ton. Oilseeds: Linseed (La Plata), £19 2s. 6d. ton; palm kernels, £17 5s. 7½d. ton; castor seed (Bombay), £16 18s. 9d. ton; sesame seed (China), £21 7s. 6d. ton; soya beans, £11 6s. 9d. ton; olive (Spanish), £74 ton; rape (crude), £41 15s. ton; soya, £35 15s. ton; petroleum, 1s. 1½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex tank), 65s. ton, coconut (Ceylon), £39 7s. 6d. ton; cotton (crude), £36 5s. ton.

Stock and Share Markets.

BRIGHTER TONE PREVAILS.

Gilt-Edged Harder.

(From Our Own Correspondent.)

London, Tuesday morning.

Towards the end of last week a distinctly better tone developed in the Stock Markets, and yesterday it was possible to describe the conditions as cheerful in almost every group. This change is to be attributed to a variety of factors, chief among them being the improvement in the political outlook. Then the appreciation in some of the currencies has had an effect particularly on the foreign group, and another factor has been the improved trade outlook. Considering the position on the Stock Exchange for so many weeks past, the altered tone is very welcome, particularly at the approach of the festive season. It would be a mistake to think that all is clear sailing yet, however. There is little cause for disquiet with regard to Lausanne, where a happy issue of one of the world's principal problems seems to be emerging, but the Reparations question remains the problem of the day, and until it is settled on a basis that will further reconstruction, the position will remain obscure, and we must be prepared for vicissitudes in the markets.

While on the subject of the improved tone in the markets, there is a point to which I have previously referred on more than one occasion which needs further emphasis. As I have pointed out, trade prospects are among the factors responsible for the improvement, but when the real trade revival comes the effect on many markets for some considerable time will be the reverse of this. There will inevitably be realisations to provide for the needs of industry, and this will depress stocks. This will particularly apply to the gilt-edged descriptions; such groups as Industrials, Oils, and Rubbers are not likely to be influenced adversely to any great extent, and in their case any effect that may be produced should be far more than counterbalanced by other factors.

Rubbers Variable.

Rubbers have not been affected by the improvement in conditions, and this market, indeed, has displayed a somewhat variable tendency during the week. The raw commodity has remained quite firm round about 1s. 2d., but the shares have fluctuated, and, while a moderate amount of business has been done, it is quite evident that so far there is no real support for this market. But its turn will certainly come, and it is not likely to be very long delayed, for, while at 1s. 2d. the companies can make a fair profit, there is little doubt that before long we shall see rubber round about 1s. 6d. Next year should certainly see the resumption of dividends in many cases.

Gilt-Edged Firm.

Gilt-edged have been very firm, and prices in most cases are well above the previous week's levels. Consols at 56 have gained $\frac{3}{8}$, while War Loan Fives are 9-16 up at 99 13-16. The Conversion Loan has gained 7-16 at 75¼, while Fundings are $\frac{3}{8}$ up at 86. Indian stocks have been steady. The 7 per cent. stock is unchanged at 111, the 5½ per cent. stock is 99⅜xd, the 3½ per cent. stock is unchanged at 63¼, while the 3 per cent. stock at 54⅞ is $\frac{3}{8}$ up.

The Foreign group has made a much better showing as a result of the improvement in the exchanges. French stocks have been notably strong. War Loan Fives at 31½ are 2½ up, while the 4 per cents. are also 2½ up at 25½. German 3 per cents. have hardened to 15-16, a gain of ¼, while Italian Rentes are ½ down at 22.

In Near Eastern securities Turkish Unified have been a very firm spot on developments at Lausanne, and at 29½ are 3 up. Greek Monopolies have been dull, and are 1½ lower at 21½. Czecho-Slovak 8 per cents. are a point lower at 90½. Russians have been steady. The 4 per cents. are unchanged at 6, the 4½ per cents. are the same at 6½, while the 5 per cents. remain at 9. South American issues have been steady, with Argentines, Brazilians, and Chileans particularly firm spots. In Far Eastern securities Chinese stocks have developed some weakness.

Industrials Steady.

The Industrial group has not been affected by the prevailing conditions to any great extent, and the position is not materially different from what it has been for weeks past. Business remains on a very restricted scale, except in the case of a few specialities, but the tone of the market remains quite firm, a fact which speaks volumes as to what is likely to happen in this group once there is a real improvement in the trade outlook.

Textiles have been a firm spot. Coats at 66s. are 1s. up, while Courtaulds are 1s. 3d. up at 59s. 9d. Listers have gained 9d. at 28s. 9d. Tobaccos are about the same. Bats are unchanged at 88s. 9d., while Imperial Tobaccos remain at 72s. 9d. Iron and Steel shares have been fairly firm. Vickers have gained 1s. 3d. at 15s., Armstrongs are 1s. 3d. up at 19s. 9d., Dorman Longs are 3d. up at 18s. 6d., while Guest Keens at 38s. are 9d. up. Dunlop Rubbers are 3d. lower at 9s. 3d.

In the Indian Railway group Bengal Nagpur have gained ¼ at 94¼, and Burmas are 2½ down at 101½.

The shipping group has made a good showing. P. and O. Deferred are 2 up at 327, Cunards are 3d. up at 22s. 3d., Furness Withys at 34s. 6d. show a gain of 3d., while Khedivial Mails are 1¾.

Oils Strong.

There has been a marked recovery in the Oil group during the week, and yesterday quite a firm tone prevailed in almost all sections.

Anglo-Persians have been a good spot, and at 4 7-16 are 5-16 up, while Burmahs are 1-16 up at 5. Mexican Eagles are 2⅜, at which they are 3-32 up. Shell Transport have hardened to 4⅛, at which they show a rise of 3-16, while Lobitos at 5⅞ have gained ¼. In the Trinidad group Apex are 2 x.d., Centrals are 1⅜, at which they are 1-16 lower, while Leaseholds at 1 5-32 have gained 3-32.

The Russian group has been steady. Spies are 3d. down at 5s., Anglo-Maikop are unchanged at 2s. 9d., North Caucasians remain at ⅝, Ural Caspians at 9-16 are 1-32 down, while Uroz are 1½d. down at 6s. 10½d.

Among Egyptians, Anglo-Egyptian B at 1 5-16 are 1-32 up. In the Roumanian group Phœnix have hardened, and at 25s. 3d. are 1s. 9d. up, while Roumanian Consolidated are 3d. up at 12s. 3d. Steaua Romanas are 1½ down at 8s. 9d., Dacia Romanos are 2s. up at ¾, while Hamilton's Oil Concessions at 1s. 9d. are 4½d. up. I would once more point out that at the present time, in my opinion, Phœnix are the best purchase in this group, and, bought round about 25s., should show a substantial profit before very long.

FOREIGN EXCHANGES.

The foreign exchange market during the past week has been rather variable. The rumour of a pending American loan to Germany caused an improvement in almost all the exchanges. The rates affected most were the Paris, Berlin, and New York quotations. At one time during the week New York had reached 4.66 dollars to the pound sterling, and is now 4.64⅜. France finally closes at 60.80 to 62.85f. to the pound sterling. Berlin has improved, and closes at 25,000 to 31,000 marks, as against 37,000 to 39,000 marks to the pound at the same period last week. Other exchanges which have improved are Brussels, Prague, Constantinople, Sofia, and Athens. Belgrade has fallen away to 400-450 dinars, as against 360 to 380 dinars last week.

Country.	Method of Quoting.	Parity of Exchange	Latest Quotations.
Alexandria ...	Piastres to £.....	97½	97 7/16
Athens	Drachmae to £...	25.22½	350-390
Belgrade	Dinars to £	25.22½	400-450

Cotton and Cotton Goods.

THE EGYPTIAN MARKET.

Futures Dull.

The Commercial Co. of Egypt report as follows for the week ended December 8:—

Since our last report the futures market has been rather poor in tone, and prices show substantial declines. The causes of the weakness are numerous—lack of demand from abroad, heavy accumulation of stocks due to the continuation of large daily arrivals from up-country, substantial increase of original forecasts of final yield of the crop, and, finally, the unsettled state of the political situation both local and international. Owing to the above, commerce has taken rather less interest in the market. A large percentage of what purchases have been effected have been for straddle account against sales of Americans either in Liverpool or New York; a great proportion of the long position in our market must be put down to this class of business, which has been transacted for both local and foreign operators. Dealings in Ashmouni have been restricted, but this cotton keeps firm owing to the high level of prices of Americans.

Spot.—Minet-el-Bassal has only been fairly active this week, and sales amount to about 16,600 bales, of which we estimate 10,200 bales Sakellaridis, 6,000 bales uppers and 400 bales brown. Demand from abroad is only moderate, and spinners are apparently not ready buyers. Arrivals are still good. Exports show a considerable decrease from last week, and the stock shows an increase, and is over 2¾ million kantars.

Sakellaridis.—All styles have been dealt in. The prices of spot against contracts of good and above are slightly dearer than last week, good fair is a little cheaper, and other grades are without quotable change.

Uppers.—Business has been done in all styles. Prices of spot against contracts are rather dearer for fair and fully fair, and without much change for the other grades.

Brown.—A good business has been done. Prices of spot against contracts are without change except fair and fully fair, which are rather dearer.

White.—Is neglected, and no business has been reported.

Crop.—As a result of a tour in the interior we find that the crop has turned out a good deal larger than expected. We now estimate the crop from 5,500,000 to 5,750,000 kantars, including the interior carry-over at August 31 last.

LIVERPOOL REPORT.

Markets Stagnant.

Messrs. Reynolds and Gibson report as follows for the week ended December 13:—

Yet another lifeless week has passed in this section of the trade, the only redeeming feature being a slight improvement in tone, which has resulted in prices showing a somewhat harder tendency. In actual business, a further falling off has occurred, the estimated sales, after appearing daily for the first four days of the week as 200 bales, dropped to-day to a miserable 100 bales, an event which has not occurred on our market since last January. The inquiry has continued to be of fair dimensions, but can hardly be described as of an exciting character. Sakellaridis, 16½d. to 18d., has figured prominently (on paper), and uppers round about 15½d., take second place. Rather more interest has been displayed in brown cotton, but we have not heard of any actual business going through. The usual inquiry for low cottons, 8d. to 12d., still persists. White, pilion, and Sudan have been almost totally neglected. A very limited business has taken place in the finer qualities of Sakellaridis.

C.i.f. business has remained very quiet in spite of numerous tempting offers from Alexandria. The American ginners' census report, issued on the 8th instant, and the Washington agricultural bureau final report, which was issued last night, proved to be very close to general expectations, though the latter has received a mildly "bullish" interpretation. Very little change in our markets has been registered as a result, and it would appear that we must simply wait with what patience we can assume for a definite trade revival. The above-mentioned reports have at least cleared the air of uncertainty, and in so far should have a beneficial effect on the situation as a whole. Already, this is being reflected to some extent in the healthier tone noticeable in the Manchester reports during the last few days A little inquiry for cloth has been in evidence, and India has been doing more business with us by all accounts. Yarns have been more in request, and prices are harder than when we last wrote. The Lancashire spinners are in a difficult position. They are undoubtedly being undercut abroad by foreign competitors, and even if the cost of the raw material declines, the effect will be equally distributed, and they will still be undercut. The only solution seems to be a drastic overhauling by our spinners and manufacturers of the costs of production, if our lost trade is to be regained. Any improvement in the market for raw cotton must start from that end, if it is to be anything more than a passing phase. Total sales. 900 bales. Quotations are raised 15 points all round. Fully good fair Sakellaridis, 17.65d.

COTTON TRADE REVIEW.

No Improvement in Conditions.

The Manchester Cotton Trade Review of the Imperial Ottoman Bank for the week ended December 16 states:—

General.—There is no improvement to report as regards the conditions prevailing during the past week. Inquiries from India and China are heard of, though it is comparatively seldom that they are actually brought to book, and when such is the case it usually means that the yarn of which the goods are manufactured is bought below cost and that the prices accepted are exceedingly low.

Yarn.—Business continues very quiet, with spinners still unable to clear their much reduced output. Such transactions as go through are on very unfavourable terms from the spinners' point of view. Quotations are much the same as last week. Shipments during November amounted to 15,113,600 lbs., as compared with 16,031,700 lbs. in the previous month and 20,619,400 in November last year.

Cloth.—The same state of affairs prevails in this section as in recent weeks. Possibly there has been a shade more inquiry, but the position remains exceedingly unsatisfactory, particularly for those manufacturers who spin their own yarn. There is nothing of particular interest to report regarding individual markets. Shipments last month were 398,726,300 square yards, against 353,654,000 in October and 363,633,000 in November last year. It is interesting to note that last month shipments to Switzerland were the second largest of any country.

Raw Cotton—A very steady tone has prevailed, with prices but slightly changed on the week. The final crop estimate of the Washington Agricultural Bureau has been published at 9,964,000 bales. The report was without any effect on the market, being pretty much as anticipated. Closing prices are as follows:—American Fully Middling, 14.61; Egyptian Fully Good Fair, 17.65.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated December 4:—

Season.—During the week ending December 3 monsoon was active in south of Peninsula. Condition of Crops (January 1).—Generally unchanged. Markets.—November 30: Bombay cotton market steady. Fine M.G. Oomras Rs.417.8 December-January; Rs.411.8 March. Bombay cotton arrivals from September 1 to November 25 were 143,000 bales as compared with 420,000 bales during the same period of the last year. Bombay imported piece goods market dull and local goods quiet. December 2: Calcutta Jute market quiet. Hessians very quiet, but steady. Ready 9 porters Rs.20.2; 11 porters Rs.23.10. Heavies firm. Fair demand for B twills at Rs.46 April-June. At tea sale on November 28 there was a good demand for all grades, but prices were practically unchanged from last week's prices. Dusts were very strong, indicating further advance of 1 anna 2 pies to 1 anna 4 pies per lb. This sale's average price was 15 annas 10 pies per lb. against last week's price of 15 annas 3 pies. 517,288 packages were sold to date at an average price of 12 annas 6 pies per lb. December 2: Rangoon rice market weak. Big mills received no offers; small mills Rs.465, but no buyers. Paddy weak; Rs.180 rail, Rs.187 boat. Shellac.—November 28: Fair demand in the beginning of the week. Spot T.N. changing hands at Rs.160. Later, position easier. Sellers quoting spot T.N. at Rs.155. No change in Bank rates.

The twenty-third ordinary general meeting of the Egyptian Salt and Soda Co. will be held at the company's offices, 5, Rue Adib, Alexandria, Egypt, on Friday, December 29, at 4.30 p.m.

Sir William Joynson Hicks, Secretary of the Department of Overseas Trade, has appointed Mr. A. M. Samuel, M.P., and Mr. F. G. Penny, M.P., to be members of the Exports Credits Advisory Committee.

NEW STRICK LINE STEAMER.

The s.s. Registan.

After satisfactory trials, which took place on November 30, the steamer Registan was taken over by Messrs. F. C. Strick and Co., Ltd., London, from the builders, Messrs. William Gray and Co., Ltd., West Hartlepool. The main dimensions of the vessel are: Length overall, 362 ft. 9 in.; breadth, 52 ft. 6 in.; depth moulded, 29 ft. 4½ in., with a deadweight carrying capacity of over 6,900 tons.

The propelling machinery, built at the Central Marine Engine Works of the builders, consists of triple expansion engines, with cylinders 26 in., 42 in., 70 in. diameter by 48 in. stroke, and three boilers 15 ft. diameter by 12 ft. 2 in. in length, adapted for a working pressure of 200 lb. per sq. inch. An oil fuel burning installation is fitted, working in conjunction with Howden's system of forced draught.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Elysia for Bombay (Liverpool, January 4).

Anchor Brocklebank Line.—S.s Matheran for Port Said, Colombo, Madras, and Calcutta (London, December 21); s.s. Manipur for Calcutta (Birkenhead, December 29); s.s. Malakand for Port Said, Colombo, Madras, and Calcutta (London, January 6); s.s. Malancha for Calcutta (Birkenhead, January 10); s.s. Mahanada for Calcutta (Birkenhead, London 20); s.s. Anchoria for Port Said, Colombo, Madras, and Calcutta (London, January 20).

Bibby Line.—S.s. Warwickshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, January 3); s.s. Herefordshire for Rangoon (Middlesbrough, January 13).

British India Line.—S.s. Margha for Colombo, Madras, and Calcutta (London, December 22); s.s. Masula for Bombay and Karachi (London, December 30); s.s. Manela for Colombo, Madras, and Calcutta (London, January 5); s.s. Pruth for Bombay and Karachi (London, January 13).

Clan Line.—S.s. Clan Murdoch for Bombay and Persian Gulf (Birkenhead, December 27); s.s. Clan Mackellar for Colombo, Madras, and Calcutta (Birkenhead, December 28); s.s. Clan Ogilvy for Bombay and Persian Gulf (Birkenhead, January 8).

Cunard Line.—S.s. Sea Victory for Genoa, Leghorn, Naples, Palermo, Messina, Catania, etc. (Liverpool, December 21); s.s. Brescia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, January 4).

Ellerman Line.—S.s. Flaminian for Gibraltar, Malta, and Patras (Liverpool, December 29); s.s. Bavarian for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Gravosa, Venice, and Trieste (Liverpool, January 6); s.s. Falernian for Gibraltar, Malta, and Alexandria (Liverpool, January 10).

Ellerman's "City" Line.—S.s. City of Christiania for Calcutta (Birkenhead, December 28).

Ellerman's "Hall" Line.—S.s. Melford Hall for Bombay, and Malabar coast ports (Liverpool, December 30); s.s. Rialto for Karachi and the Punjab (Liverpool, December 30).

Prince Line.—S.s Cyprian Prince for Tunis, Malta, Alexandria, Beyrout, Jaffa, and Haifa (Manchester, December 22).

DESTROYED OIL WELLS.

In the House of Commons on December 14 Sir Philip Dawson asked whether on December 3, 1916, an undertaking was given in writing from the British Minister to the Roumanian Foreign Minister that the Roumanian Government would be indemnified by the Allied countries for the losses which might result from destruction of oil wells; what steps had been taken by His Majesty's Government to ascertain their liability to British companies and to honour their obligation of indemnity thereunder; and whether, having regard to the urgency of a settlement to many of the British companies, and to the fact that it was six years since the destruction of their properties, the Government would expedite a settlement?

Mr. McNeill said that the answer to the first part of the question was in the affirmative. The liability of His Majesty's Government was to the Roumanian Government and not to individual companies. His Majesty's Government were in communication with the Roumanian Government as to the method in which companies concerned would receive compensation.

The death is announced of Sir Carl Meyer, Bart., Chairman of the London Committee of De Beers, and a member of the Board of the National Bank of Egypt.

The Bibby Line announce reductions in passenger fares to Marseilles and the East from Liverpool. First-class fares are now £66 to Colombo and £76 to Rangoon.

The thirty-third ordinary general meeting of the Imperial Bank of Persia will be held on December 28, at 12 o'clock noon, at Cannon Street Hotel, Cannon Street, E.C.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

Aleppo, October 31.

The crops are completely harvested. As a result of the operations of dealers in futures the prices of cereals were maintained during the first half of October, but owing to the continual arrivals prices have weakened by 15 to 20 per cent. Wheat is now quoted at Ps. 330 per 100 kilos, as compared with Ps. 365, and barley is Ps. 155, as against Ps. 165.

The picking of cotton has been carried out to time. The yield of the crop will not give the anticipated total of 15,000 bales. The estimate now is about 10,000 bales. The olive crop is very abundant, and the price of the oil is constantly falling.

Trade in imports has been brisker during the month; the presence of some merchants from the interior and the approach of winter have contributed to this improvement. There has been an increased demand for certain flannel goods, but despite the rise of 10 to 12 per cent. at Manchester, prices here have not undergone a corresponding increase in consequence of the large stocks.

The consumption of sugar has been 30 to 40 per cent. more than in the previous month, and a small rise has to be recorded. The prices of coffee, tea, and spices are maintained, and the demand is greater.

As regards exports, the market in washed wool is more and more animated. The rise in prices in America and the increased demand have interested holders, who, as the present stock is much reduced, anticipate a new rise. 800 bales consigned from Ourfa and Mardine have increased the disposable stock. Ourfa wool, generally in great request, owing to its good quality, has been sold at 8 per cent. more than Aleppo wool. During the month 750 bales were shipped to America, via Alexandretta.

The demand for pistachio nuts in America is continually on the increase. Stocks are reduced, and the price has risen by 10 to 12 per cent. 250 sacks have been shipped to America.

Jaffa, November 18.

Apparently there is a shortage of orange cases, and consequently the price of the article has gone up, and is sold at 1s. 3d. a case.

Nablus, November 18.

The market is more active than previously, as a result of arrivals from the villages of the district of olive oil of the new crop for use in the soap works. Some of the works have commenced to operate, but others are waiting for the price of the oil to fall to make their purchases. Oil is quoted here at £62 per ton, a price considered dear by the manufacturers in comparison with the price at which soap is sold.

The British Overseas Bank is now in its new premises, 33, Gracechurch Street, E.C.3.

The ordinary general meeting of the Associated Cotton Ginners of Egypt, Ltd., will be held at Alexandria on December 28. The transfer books will be closed until December 29.

The Mortgage Company of Egypt, Ltd., announce that warrants in payment of the dividend on the 5 per cent. cumulated preferred shares for the half-year ending December 31 will be posted on December 30.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Egypt.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer, Egypt and the Sudan Governments' Office, London. January 2.

Wood Naphtha and Tierol.—The Egyptian Customs Administration invites tenders for the supply of 130,000 kilogs. of wood naphtha (wood spirit) and 5,000 kilogs. of tierol, for denaturing ethyl alcohol. January 6 (D.O.T.).

Uniforms, etc.—The Director, Personnel and Equipment Department, Ministry of the Interior, Cairo, invites tenders for the supply of uniforms, black cloth, serge, khaki drill, khaki, tarbooshes, boots, etc. January 15.

Lithographic Printing Plates.—The Survey Department of the Ministry of Finance, Egypt, invites tenders for the supply of aluminium and zinc lithographic printing plates. Quotations are required to be in Egyptian currency and inclusive of customs duties and free delivery into the Department's Stores at Giza, Egypt. January 15 (D.O.T.).

General Stores.—The Ports and Lighthouses Administration, Alexandria, invites tenders for the supply of general stores, etc., required for 1923-24. The stores specified include bunting, hose, ropes, canvas, oils, paints, asbestos packing, and other asbestos material, belting, builders' hardware, brushes, chemicals, electrical goods, hardware, etc. Tenders, which must be on the proper form, must be enclosed in sealed envelopes, bearing indication of the nature of the tender, and will be received by the Director-General, Ports and Lighthouses Administration, Alexandria, up to noon on January 17 (D.O.T.).

String.—The Central Stationery Stores, Ministry of Finance, Cairo, invite tenders for the supply of 1,000 kilos string, coloured. January 18.

Blankets, etc.—The Sub-Director of Stores, Ministry of Education, Sharia Qasr el Aini, Cairo, invites tenders for the supply of large quantities of Moroccan woollen blankets, cotton sheeting, tulle for mosquito nets, table serviettes, china plates, copper dishes, glass tumblers, metal spoons, forks, knives, etc., required for the school-year 1923-1924. January 20.

Table and Linen Requisites.—The Ministry of Public Instruction, Cairo, invites tenders for the supply of table and linen requisites for the school year 1923-24. January 20 (D.O.T.).

Paper and Stationery.—The Egyptian Minister of Finance invites tenders for the supply of paper, stationery, and general office material required by the Central Stores, Ministry of Finance, for the year 1923-24. Local representation is essential. January 25 (D.O.T.).

Clothing, etc.—The Ministry of the Interior, Stores Department, Egypt, invites tenders for the supply of stores required for the year 1923. The range of articles required is extensive, and includes greatcoats, jackets and tunics, trousers, breeches (in various materials—e.g., khaki drill and serge, white drill, blue cloth, etc.), uniform cloth, hosiery, hard haberdashery, blankets, gloves, boots, leggings, puttees, belts, soap, haversacks, chevrons (fabric and metal), tarbooshes, police whistles and chains, ribbon, etc. (D.O.T.).

India.

Covered Goods Wagons and Locomotives, Goods Engines, and Tenders.—The directors of the East Indian Railway invite tenders for the supply of Locomotive goods engines and tenders (2 8.0 superheated type). January 3.

Camp Kettles, Strawboards, Enamelled Ware, and Tracing Cloth.—The High Commissioner for India invites tenders for the supply of:—1. Camp kettles, complete No. 4,000; and spare covers for ditto, No. 7,300. 2. Strawboards of various sizes, No. 575,000. 3. Enamelled ware (mugs, pans, plates, etc.). 4. Tracing cloth, dull back, "Dowse" or similar make, rolls 3,500. Forms of tender may be obtained from the Director-General, India Store Department, Branch No. 10, Belvedere Road, Lambeth, S.E.1. January 5.

CONTRACTS SECURED.

Messrs. William Beardmore and Co., Ltd., have obtained a contract for the supply of five heavy and powerful locomotives of the Mallet articulated type, metre gauge, for the Burmese Railways.

It is announced that in future the Ellerman liners will call at Southampton on outward journeys from the Continent to the Far East. The new service will be inaugurated by the City of Simla early in the New Year.

NOTES OF THE WEEK.

Owing to the Christmas holidays it is necessary to go to press with this issue of THE NEAR EAST *on December 23, although it is dated, and will be distributed on, December 28.*

The Problem of Irak.

The attitude of the Allies at Lausanne towards the Turkish claim upon Mosul has been so emphatic that it would seem to be out of the question that—as some people fear— there may be some danger of this essential portion of Irak being sacrificed at the last moment to the need for securing final agreement at the Conference. As it may be taken for granted that the outcome of the Government's consideration of the Irak question will be in the direction of greater administrative responsibility for the Irakis and a reduction of the financial burden hitherto borne by the British taxpayer, it would be a gross breach of faith on Britain's part to hand over to the Arab administration a territory seriously diminished, and as a business proposition economically unworkable. As a move in the agitation, confined to very narrow circles, against Irak, there has been an attempt to make capital out of Sir Percy Cox's approaching retirement. It was stated in these columns early in October that the present High Commissioner would shortly be retiring, and would be succeeded by Sir Henry Dobbs. The latter is now on his way to Irak, and Sir Percy Cox may be expected to leave next spring.

The Bulgarian Army.

Much satisfaction is expressed in Bulgaria at the Allies' decision to authorise the Bulgarian Government to raise and maintain a force of three thousand soldiers on the compulsory system for the protection of its frontiers. Naturally, it is hoped that leave to recruit the whole army on a compulsory basis will sooner or later be accorded. Certainly the attempt to raise a force on a voluntary basis has been proved to be outside the field of practical politics, incredibly costly, and quite unsatisfactory, and with the changes now taking place in the Balkans it is not surprising that the Bulgarians should feel some anxiety in regard to their powers of defence. Possibly a compromise may be reached in the direction of allowing the reintroduction of compulsory service, but limiting the force thus raised very strictly in numbers. The difficulty of length of service would, of course, remain, but with goodwill even that might be surmounted; and Bulgaria, we believe, would be willing to make great sacrifices in order to solve the problem.

The Ex-Khedive's Activities.

That the ex-Khedive of Egypt always worked steadily in his own interests and never spared even a second thought for those of anybody else has long been notorious. He is still following his old game, and it would be interesting to know how far his influence has been able to make itself felt among the Egyptians of late. In any case, it is satisfactory to learn that some of his former subjects have reached a sound opinion on his tactics. For a short time, our readers will remember, there was at least an appearance of friendly co-operation between the Zaghloulist and the old Nationalist or Extremist missions at Lausanne. But that is at an end now. Some of the Extremist delegates lately left Lausanne for Angora, and the head of the Zaghloulist delegation, in announcing the news to Egypt, added that the ex-Khedive was actively working with the Hisb-el-Watani (Extremists) against the national interests of Egypt. It is possible that Abbas Hilmi's powers for mischief are not very great at the present time, but as Egypt more and more takes charge of her own affairs he may want very close watching.

The Sudan Rising.

The information which we gave last week regarding the Sudan rising may now be supplemented with one or two details. The Angessana, or Ingassena, are a very primitive tribe of negroid pagans, speaking a language of their own, and, like all tribes at that stage of development, they are very much under the influence of their wise men—in this case known as "rain-makers." The latter are a privileged class wielding much the same power apparently as the "medicine man" or "witch doctor" of other African tribes, and they realise quite clearly that the advent of a decent Government means the enlightenment of their people and an end of their own power. Accordingly, they oppose Government as far as in them

Digitized by Google

lies, and on this occasion one of them seems to have been able to persuade quite a strong force of young men to attack the Government post at Soda, where there were a few police. Unfortunately for them, the dupes found that the rain-makers' spells for converting the police bullets into water were not entirely successful, enthusiasm cooled, and the attack broke down.

Arab Freedom.

The envoy at Lausanne of King Hussein of the Hejaz has informed an interviewer that in his Royal master's opinion the moment has now arrived to ask the Allies to "fulfil their promises and stand by their declarations that the Arab communities be free." With the desire for freedom—always a passion with the true Arab—most of our readers, like ourselves, will heartily sympathise. But in regard to those "promises" and "declarations" it would be well if King Hussein or his representative would be more specific. Throughout the greater part of the Arabian peninsula proper the Arabs are surely as free to-day as they have ever been—if not freer. The Emir Abdullah of Transjordania and his brother, King Faisal of Irak, have expressed themselves as satisfied with the steps towards complete freedom already taken for those regions. Syria and Palestine are not perfectly content, but they are not looking to the Hejaz for their salvation. Perhaps that is King Hussein's trouble: he has dreamed a dream of a united Arabia under one rule and has pictured himself as ruler. The other Arabs, to be blunt, do not regard that picture as an entirely attractive one, and the sooner King Hussein recognises the fact the better for his peace of mind and the peace of the Arab lands.

"A Moslem Palestine."

An illustration of the increasing solidarity of Moslem opinion is afforded by the recent visit to Angora of Sheikh Abdul Kader Muzaffar, a member of the Palestinian Delegation. The Sheikh, who lately returned to Jerusalem, has been telling his fellow-citizens there that his mission was religious rather than political in character, as he had been concerned with possible Zionist encroachments on the Moslem Holy Places. He had, he said, explained the position to the various delegations from India, Persia, Afghanistan, Turkestan, and other Moslem countries, and they had promised to institute propaganda for a Moslem Palestine. There is, perhaps, nothing to take exception to in the Sheikh's mission or his method of fulfilling it; but it will be recognised that seeds have been sown which may bring forth surprising fruits in time.

Lord Carnarvon's Discovery.

Interest in Lord Carnarvon's great find in the Valley of the Kings continues to grow, and the opening of the sealed chamber (or chambers) is eagerly awaited. The opinion of the experts is that the sealed chamber will almost certainly prove to be the tomb of King Tutankhamen, and it is recognised that the suite forms the finest example of the burial place of one of the Pharaohs yet discovered. But for those very reasons we must possess our souls in patience. The clearing of the store chambers will necessarily be a slow matter; for the position and condition of every article will have to be studied before it is moved, and very many of them will require special strengthening and preparation before their dispatch to Cairo. Lord Carnarvon and Mr. Carter have received many offers of assistance from other experts, and some, at least, of those offers have been accepted, but the task is a big one, and it would not be surprising if the mystery of the sealed chamber remains a mystery for at least several weeks longer.

British Egyptology.

In referring to this find in his letter this week our Cairo Correspondent mentions the unwisdom of certain well-meaning people who, in their eagerness to see some of the treasures brought to this country, cannot refrain from discussing the subject. It is to be hoped that the hint will be taken; for reasons that need not be given, no good purpose could be served by pressing any "claims" that Great Britain might be considered to have, and, on the other hand, a great deal of harm might soon be done. What we should like to see is the British public, both at home and abroad, showing its interest in the work in practical fashion by subscribing to the Egypt Exploration Society, or one of the other bodies of the kind. General Sir John Maxwell, President of the Egypt Exploration Society, recently addressed to the Press an appeal for £5,000 a year, to enable the Society to arrange expeditions to Abydos and Tel el-Amarna. He wrote: "The results to archæology, the encouragement to British students, and the enrichment of our Museum would make this appear an insignificant sum. . . ." That is very true, but, frankly, we fear it is most improbable that it will be raised. British Egyptology is in a bad way financially. Let us hope that Lord Carnarvon's discovery may go far to removing that reproach, but at present we detect no signs of adequate public support.

The Year in India.

No one who is in a position to look at India as a whole can ignore the great improvement in the situation during the last twelve months. The old tranquillity, or lethargy, has not, indeed, been restored, and probably it never will be, while there are still possibilities of more or less serious trouble in particular localities, in addition to the continued menace of the extremist party, whose future policy is being debated while we write; the New Year may thus bring fresh anxieties, but the progress which has been made should suffice to encourage both the Government and the people to face the future with confidence. The causes which have brought this improvement about are too numerous and complex to be discussed fully on this occasion, but foremost among them must be placed the effective restoration of law and order. A year ago some of the provincial administrations were still grappling with the paid and organised revolutionary forces, who styled themselves volunteers, and who made life almost impossible for ordinary decent people; to-day one hears of nothing of the kind, and that contrast may serve as a measure of the change which has been effected, not by any heroic legislation, but simply by the steady pressure of the policeman and the magistrate.

The Economic Situation.

While, however, all due credit must be given to the magistracy and the police, even the most summary review of the situation must recognise the important part played by the weather of the closing year. Good rains almost throughout the country have given good crops already and the promise of a bountiful harvest next spring. The restrictions on the export of grain—an evil legacy from the days of war—have disappeared. Food prices have been falling to an extent which has put the towns in better temper, but as yet not so rapidly as to discourage the peasant; and if any unemployment exists it is not on a scale to call for administrative action. All this means that there is so much the less material lying ready to the agitators' hands, and it is quite possible that some

Digitized by Google

of them may presently settle down to honest work. It is too soon to speculate on the prospects of a good market abroad for the surplus produce which will be available in the spring, but the indications are somewhat less unfavourable than they were, and, if foreign buyers materialise, the economic recovery of the country should progress rapidly in the coming year.

India, a Nation?

A curious sidelight on the popular belief that India is already a unified and homogeneous nation is furnished by some recent proceedings in the Bengal Legislative Council. Calcutta has long been pestered with a singularly obnoxious type of hooligan, known locally as *goonda*. Most of them come from up the country, and they are still regarded as foreigners by good Bengalees. The Government is now, apparently with general consent, promoting legislation to empower them to deport these pests to the places whence they came, and, regarded as a practical measure of police, the idea has much to recommend it; but we find some difficulty in squaring it with the current conception of Indian citizenship. London does not deport Yorkshiremen, or even Welshmen, who make themselves obnoxious; nor, we believe, is New York free to get rid of undesirable invaders from the Middle West. It is not wholly inconceivable that the example now furnished by Calcutta should be followed by reprisals in other parts of India, where Bengalees are exceedingly unpopular. But, apart from that possibility, we think it is a matter for regret that the great province should shirk the expenditure on police necessary to keep her Indian visitors in order.

THE WEEK AT HOME.

London, Friday Evening.

The End of 1922.

Christmas brings full shops and empty newspapers; the end of the year and new resolutions; bills for the head of the family and presents for the rest. On the whole, 1922 has not been so bad. Trade has begun to improve; there has been no economic disaster; and although nobody owns to having any money, there is plenty of money about for new companies. Optimism is in the air, and I do not think it is wholly due to the prospect of turkey and plum-pudding.

A year ago we were wondering whether the Coalition Government would last for ever or be out in a week. Now we have a new Government that bids fair to last, which is something to be thankful for; a new House of Commons which is quite extraordinarily interesting, and will prove lively in 1923; and we are back in the old familiar paths of party government, and can denounce each other and dine together afterwards in the good old way, to the confusion of the intelligent foreigner.

All this is to the good. On the other hand, Mr. Lloyd George did not settle Europe (which settled him instead). We are no nearer an accommodation with France and Germany than before; Germany is still trying to get out of paying Reparations, and France still refuses to recognise her external debt or to tax herself. Both appear to be living in a fool's paradise; we certainly are not—the income-tax man gives no chance of that.

Foreign Debts and Loans.

There has been a revival of propaganda as to the imminent collapse of Germany. But it is confined to the pro-German papers like the *Westminster Gazette*, and we have heard this song so often already that nobody pays any more attention to it. The real position in Germany is perfectly well understood—the middle classes are being starved out; the industrial magnates and the working classes are flourishing. That country is playing a risky game, but Britain is not inclined to encourage her; and the upshot of all these Continental troubles has been that the average man in the street is thinking more of developing the British Empire than of attempting the hopeless task of bringing order out of chaos in Europe.

Interest for the moment has shifted from Europe to America. The Chancellor of the Exchequer sails in a few days for Washington to discuss the position of the British debt; he follows M. Clemenceau, who did not make much impression. Indeed, he could not expect to do so. The fact is that France has annoyed the United States by refusing to recognise her debt, whereas Britain has not only done so, but has paid up the interest, and has restored her exchange nearly to parity, while the French exchange goes down and down.

If M. Clemenceau had wanted to raise a French loan in the United States he could not have done so, whereas it is well understood that British credit stands so high in New York that she can talk business. I gather from an article in the current *Outlook*—which is always well informed on American affairs—that the United States will propose that the British debt to America shall be repaid by instalments over a long period of years, and so long as America gets the capital back she will allow a purely nominal rate of interest. Let us hope that the lesson will not be lost on the Continent.

Naval Armaments.

Another point that has emerged during the past week or two is that the Continent is not taking the Washington Agreement seriously. Neither France nor Italy has ratified the plan for the limitation of battleships; Britain, on the contrary, has already scrapped some of her vessels. There has been no particular indignation over here at this result; merely a shrug of the shoulders, and an appreciation of the reasons which determined the British Government to lay down two new battleships. After all, we remember the French attitude over submarines at Washington, and the impression produced by that episode has been deepened by an article in the current *Edinburgh Review* describing the French plan of using their black African troops to fight in the next European war. By this means, no doubt, France hopes to compensate for her declining home population; and it is even suggested in some quarters, which look rather far ahead, that she proposes to follow Germany in the attempt to establish the hegemony of Europe. It is curious how this ambition, the shadow of the old Roman Empire, recurs again and again, and how its recurrence draws Britain into European affairs against her will.

Mesopotamia and Mandates.

As to Imperial matters, the year has been marked by a violent Press campaign against the retention of Mesopotamia; and the *Daily Mail*, under Lord Rothermere (of Anti-Waste fame), has been shrieking itself hoarse on the subject. But the public takes these protestations at a discount, and I have seen no evidence of any real public indignation. Perhaps the *Mail* itself realises this; Lord Rothermere has not the touch of genius which made his brother, Lord Northcliffe, occasionally so effective.

The New London.

A walk through London nowadays makes the thorough-paced Cockney feel like a country cousin. Half Regent Street is being pulled down and rebuilt; Oxford Circus seems strangely unfamiliar, and things are beginning to happen in the house-breaking and building way in the Strand. The building trade at least promises to be busy in 1923, and one cannot regret it, for a great deal of London

Digitized by Google

is hopelessly dowdy and out of date. Perhaps the day will come when some of the more depressing suburbs are pulled down; at present they seem to get more drab every year, but the Victorian builders of the inner suburbs apparently defied time.

The Divorce Laws.

The perennial divorce controversy has broken out again in aggravated form, and bishops, novelists, and others of more or less importance are again arguing with the lawyers and each other, with Lord Buckmaster as the centre of the storm. In the last Parliament, it will be remembered, a Divorce Bill passed through the Lords, but was rejected by the Commons; the present Government is not pledged to deal with the subject, and, like all Governments, it is frightened of this hornets' nest.

Divorce and temperance seem the two subjects most likely to turn reasonable men into fanatics, and for that reason, no doubt, the ordinary politician avoids both. A good many people are unhappily married, but there is no security that they will vote for you if you set them free. And the majority of folk who take no personal interest in the question are not particularly interested, except in reading the most scandalous cases. For that reason I doubt whether anything will be done.

The Drought Again.

Last summer, of evil memory, was sufficiently wet for the ordinary man to believe that the shortage of water from 1921 had been fully made up. But the meteorologists are sounding a warning note again. It appears that summer rains, however heavy, do little more than provide for vegetation and evaporation (and, one may add, spoil cricket); it is the autumn and winter rains that really give us our reserves of water. It happens that the present autumn has been extraordinarily dry, and the November rainfall in particular showed a large deficiency. Unless we get heavy falls in England before the spring the pasturage prospects for next summer seem depressing.

Methodist Reunion.

There has been some correspondence in the papers and a great deal of private discussion of late over the proposals for a reunion of the Methodist churches. Few sects can have suffered more from schism during the past 150 years; but changed conditions, and probably declining numbers, have led the heads of the community to consider a general reform and complete unification. To an outsider the differences of ceremonial and doctrine appear to be small, but there is an obvious undercurrent of opposition from the more conservative wing. However, since three-fourths of the total congregations are said to be in favour of the new proposals, it is probable that, in some form or other, they will be carried through.

Recent Books.

Some years ago Professor Saintsbury declared that he would never write another book. Luckily he has not carried out his threat. Since then there has been his "Cellar-Book," and he has now added "A Scrap Book" (Macmillan). "My present Beatrice," he writes, "may be a poor thing, but when I said that I should write no more I did not know that I was going to write her. And whether she will be Mr. Baxter's Absolutely Last Word or not I do not know now." Let us hope not. The present volume contains as much politics as literature, and Mr. Saintsbury, as a sound Tory, thumps Liberals, Labour men, and Trade Unionists all round. He contrives to get in some good hard knocks, and finds several loose joints in the armour of "progress."

"The Collected Essays and Addresses of the Right Hon. Augustine Birrell" (Dent) make three handsome volumes, and they will be much sought after. A few years ago it seemed that Mr. Birrell would go down to history as the least successful Secretary for Ireland ever known, but since Sir Hamar Greenwood has deprived him of that distinction, his fame may now more happily rest on the light essays which he has practised with more success in literature than politics.

A little volume of verse by Katharine Tynan called "Evensong" (Basil Blackwell) contains some beautiful little poems.

When "The Farington Diary" (Hutchinson) first came out in the *Morning Post* I read only one or two extracts, and they seemed tame after the leading articles. But in book form this diary of an eighteenth-century artist who met all the celebrities is more interesting, and although it would be absurd to compare it to Pepys, I think, on the whole, it is better reading than the dull Evelyn. As a fair sample, I quote a passage about the Royal Academy banquet of 1796: "I observed to Mr. Long that we could not but regret that Mr. Pitt did not seem to feel much for art, and that he had never visited us, which Lord North, in his administration had done. I added that it had been said that Mr. Pitt possessed everything but taste. He replied that it was a reason of a private nature which had prevented Mr. Pitt from attending our dinners, and that he could assure me Mr. Pitt had a great pleasure in considering works of art."

I hate kicking a man when he is down, but I must honestly say that "My War Experiences" (Hurst and Blackett), by the ex-Crown Prince of Germany, is not a good book. I doubt the accuracy of some of the statements; it is loose, and obviously partial; and it cannot in any sense be said to compete with the narratives of Ludendorff and others on the German side. Its interest is purely personal, and there is not much interest in that particular person at the moment.

OCELLUS.

ANIMALS FROM IRAQ FOR THE ZOO.

Sir Percy Cox, Captain Cheesman, and other officers now in Mesopotamia have sent another welcome gift of animals to the London Zoological Gardens, says *The Times*. The new consignment consists of a male Gmelin's sheep, a wild boar, two Persian gazelles, and a white-tailed sea-eagle. Gmelin's sheep, sometimes called the red sheep, from the ruddy colouration in adult rams, is found in Cyprus and over a large area of the Middle East, the mainland races being generally larger than the island form. The horns are heavy, and curved backwards and inwards in a bold spiral, but are not very large, a head of 24 in. being good. The Persian gazelles are the familiar rather small, pale gazelles of the Near East. The wild boar and the sea-eagle are both identical with the members of the species found all through Europe. The Mesopotamian animals were brought freight free to Swansea by the British Tankers Company.

EGYPT.

Cairo, December 14.

The Question of Zaghloul Pasha.

The agitation in favour of the release of Zaghloul Pasha has very much increased during the last few days. The cause is undoubtedly the publication of official reports from Gibraltar to the effect that his health was such that any change in temperature might prove dangerous. Naturally these reports created considerable anxiety, and their publication was not unnaturally regarded as the prelude to permission being granted him to go to Europe, for, in the face of the political conditions that existed locally, it was difficult to conceive for what other reason a report which was bound to create alarm could have been made public. No news having since been received that Zaghloul Pasha had been transferred, the agitation in favour of his release has become very accentuated, and even the hurried publication of a further official bulletin that his health is good and that the climate suits him has by no means allayed the alarm or diminished the outcry for his release.

Opinion is gradually gaining ground amongst European and English residents that it would be politic to allow Zaghloul Pasha to go to Europe, though it is admitted that it would be dangerous to allow him to return to Egypt. So long as martial law exists he can, of course, be kept out of the country. Once that régime is removed his return could not be prevented; but, after all, it is for the Egyptians themselves, once they have secured a return to a normal régime, to protect themselves against any internal political dangers that may arise thereafter, and the question of the steps which should be taken either to keep Zaghloul Pasha out of Egypt or to provide against the political consequences of his return is eminently one for them to handle. They must not always expect us to pull the chestnuts out of the fire for them.

The Egyptological Discoveries.

Pending the arrival of the necessary materials for preservation, and of the experts engaged to assist in the packing of the objects found, and in the deciphering of the inscriptions, the chambers discovered by Lord Carnarvon and Mr. Howard Carter have been closed up again. The Earl of Carnarvon left on Monday last for England, where various matters connected with the work still to be done require his attention. Mr. Howard Carter has been busy throughout the last week in collecting material in Cairo, and he returned last night to Luxor in order to make all the necessary arrangements preparatory to reopening the tomb.

The various objects will have to be very carefully handled, as not only are many of them very fragile, but they must be specially treated to protect them from the effect of contact with the outside air. As and when sufficient cases are ready, they will be transported by steamer to Cairo, where they will be stored in the Museum preparatory to being examined by Mr. Carter and the Egyptian Government antiquity experts.

The local Press and, it would appear, some of the home papers are very much concerned with regard to the eventual fate of the objects found in these chambers and the partition which should take place. All such discussions, conjectures, and criticisms are premature, and should be sternly discouraged. Until whatever other chambers exist behind the sealed wall have been opened it will be quite impossible to say exactly what all these chambers represent, and until a decision has been come to on that point there can be no question of the division or the retention of the objects in question. For the time being, and, indeed, until an authoritative decision can be come to with regard to these chambers, no discussion as to the destiny of the objects will take place between the excavators and the authorities, and the advice and criticism which kind friends in the local and home Press have rushed forward to give in this connection are entirely misplaced.

Public Security and Foreigners.

It may be remembered that last May it was decided to appoint an Egyptian as Director-General of Public Security and to entrust to Mr. Monteith-Smith, who had up to then filled that post, the task of dealing with all public security matters in which European subjects might be concerned. A note has now been issued defining Mr. Monteith-Smith's duties.

All charges of crime or misdemeanour brought by or against foreign subjects must be immediately notified to him, and he or his representative must attend all important administrative inquiries in this connection. He must also be notified of all important occurrences which may endanger the life or property of any foreign subject, and he must collaborate with the Egyptian Director-General in suggesting the steps to be taken in connection with such occurrences. All complaints made by or against foreign subjects concerning public security matters must be dealt with by him. His opinion must be obtained before any permits are given or refused to a foreign subject, before the issue by the Public Security Department of any regulations affecting foreign subjects, and with regard to the deportation of foreign subjects for reasons of public security or public morality. Finally, he must examine conjointly with the Egyptian Director-General any proposals regarding the appointment, organisation, staff, or powers of the Commandants of Police in Cairo, Alexandria, and the Suez Canal.

Aftermath of Recent Outrages.

On Monday last a military court, presided over by Lieut.-Col. C. R. Terrot, D.S.O., 5/6 Dragoons, dealt with the case of the four Egyptians impli-

cated in the shooting outrage of which Mr. Thomas Brown, the Director of the Horticultural Section of the Ministry of Agriculture, was the victim last August. Judge Hugh Holmes was Judge Advocate, Mr. F. Maxwell was once again Prosecutor, and the defence was undertaken by Mr. Duncan Wallace, Tewfik Bey Doss, and Mr. Meimarachi. The accused are four fellaheen, one of whom kept a kiosk or café close to Mr. Brown's house at Giza. All four pleaded not guilty, and the whole of the first two days was taken up with the hearing of witnesses, a large number of whom were called by the defence. All were acquitted, the Court finding that there was no proof, and, in fact, in the case of two, dismissing the charges without calling upon them to offer any defence. On Saturday the military court will deal with the case of the Egyptian accused of attempting the life of Mohamed Bedr Eddine Bey, the Director-General of Public Security.

ALBANIA.

Tirana, December 5.

The New Government.

As I announced in my letter of three weeks ago, the change in the Government ought to be effected without any strain or crisis. In fact, the new Government has come into power in a very quiet way; the President of the Council, Jaafer Ypi, was promoted to the High Council (Council of the Regency), and his place was filled by Ahmed Zogu, who holds the portfolio of the Interior.

It was on the 2nd inst. that Parliament raised Jaafer Ypi to the High Council, and on the same day the High Council invited Ahmed Zogu (Ahmed Mati) to form a Cabinet. An hour later Ahmed presented himself before Parliament with his new Cabinet, read his programme, and obtained a vote of confidence—by 37 votes to 15. The new Cabinet is the same as that formed in December, 1921, under Jaafer Ypi. That is to say:—

Minister of Justice	HUSSEIN VRIONI
Minister of the Interior	AHMED MATI
Minister of War.....	ISMAIL HAKKI TATZATI
Minister of Finance	NICHOLAS THACI
Minister of Public Works	SPIRO KOLEKA
Minister of Public Instruction..	REXHEB MITROVITZA
Minister of Foreign Affairs	PANDELI EVANGHELI

The High Council.

According to the Statute of Lushnia, the High Council ought to be composed of four members, but actually it had only two members, the other two having resigned early in March, 1922. On the 2nd inst. Parliament elected Jaafer Ypi and Gjon (John) Coba, and thus completed the High Council.

Postal Convention with Italy.

A postal convention has just been signed between Albania and Italy, regulating the exchange of posts between the two countries and the question of the two cables that unite their shores. It will shortly be presented to Parliament for ratification.

Another convention, concerning commercial relations between Albania and Italy, is under consideration at the present time.

Refugees from Turkey.

A great many Albanians who had been living in Constantinople have arrived at Saranta, having been compelled to leave the capital after the arrival of the Kemalists. They report that under the new régime Albanians are badly treated by the police, and are obliged to leave the country in haste.

United States' Representative.

Mr. U. Grant Smith, lately appointed Minister Plenipotentiary in Albania of the United States, has arrived at Tirana. Yesterday he presented his credentials.

The Lausanne Conference.

Albania has just been invited to take part in the Lausanne Conference. MM. M. Frasheri and L. Gurakuqi have been appointed as the country's representatives.

PERSIA.

Teheran, November 22.

The American Advisers.

Dr. Millspaugh, with his chief assistant, arrived here last Saturday, and after being introduced to the Parliament and Cabinet on Sunday, took up his duties at the Ministry of Finance the following day. He has been accommodated at the Mukhber ed Dowleh's Park, the residence allotted three years ago by the Persian Government to Mr. Armitage-Smith, and since inhabited by the Russian Legation after the destruction by fire of their own buildings in the former Atabeg's Park. Six more American advisers with their wives and children are due in Baghdad shortly, so we shall soon see a substantial addition to the American colony in Teheran.

General News.

The Shah has arrived in Bombay, and will therefore arrive in Bushire in a few days, where the Minister of War, Sardar Sipah, will welcome His Majesty, and accompany him back to the capital by way of Shiraz and Ispahan.

Sarem ed Dowleh, who, as Minister of Finance in Vossough ed Dowleh's Cabinet, was a signatory to the Anglo-Persian Agreement of August, 1919, has been appointed Governor-General of Fars in place of Nosrat es Saltaneh, the Shah's uncle, who has resigned.

CORRESPONDENCE.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper.

ALBANIAN FRONTIERS.

To the Editor of THE NEAR EAST.

Sir,—I have noticed a kindly and courteous review of my little book on "The Second Year of the League in Respect to the Albanian Question." I do not wish to go over ground very much of which has already been well trodden, but I really think the reviewer has not quite appreciated the position. It is this:

The Yugoslavs had a recognised right by treaty to the frontiers of 1913, both as regards the boundaries of Serbia and Montenegro. Italy, as she officially announced, was, in the early days of October, 1921, still determined to allow Serbia no extension of those frontiers. Consequently the Allies were not united until the very last moment. It would, of course, have been quite different if they had been. The legal position taken up was that Albania had claims to the recognition of her nationality, but had no recognised or legal frontiers. The fact, therefore, that Serbia gave up the Lim territory is the exception that proves the rule. Her legal right to this area was unassailable, and she could not reasonably be expected to give it up unless she obtained greater advantages elsewhere. In my opinion, Albania did as well, or better, than could have been expected under the painful circumstances. I believe any contrary view is based on the assumption that Albania had rights under the Treaty of London of 1913, both to her existence as an independent State and to frontiers. This view is an arguable one, but it was not accepted by the Powers, and, what is of more importance, on the admission of Albania to the League the legal section of the secretariat, which has not been charged with partiality, adopted this view.

The correct way, therefore, to look at the solution of the problem is, I think, the following:—A revision of the frontiers was agreed on all hands to be desirable, but, in view of the superior legal position of Serbia, Albania seems to me to have got as much as was possible under the circumstances, and, personally, I should say that it was a great triumph for her to obtain the cession of any part of Serbian territory to which Serbia had, and to which she had not, a recognised legal right. No one, so far as I know, would contend that the frontier was an ideal one, but it is a much better one than that of 1913, and the whole trouble is really caused by the injustice and unwisdom of that original settlement. At the same time, it is important, in view of the sanctity of treaties, that the substance of pre-War treaties should, wherever possible, be upheld. In the conflict between the sanctity of treaties and ethnic justice serious anomalies must always occur, but I would mention—and it is extraordinarily important—that even President Wilson did not claim that his principles applied to the righting of ancient wrongs or revision of pre-War treaties. So far as I know, the area of Lim represents the only cession thus made by any Allied Power of territory legally held previous to 1914. It is no secret that most of the Allies were in favour of Roumania's surrendering a part of the Dobruja to Bulgaria, but Roumania stood on her legal right, and prevailed. The fact that Serbia did not take up this attitude as regards Lim ought really to predispose Albanians in her favour. To argue that it would have enabled further concessions to be obtained seems to me to miss the point.—I am, etc.,

PRESS ON THE NEAR EAST.

The Opportunity in Egypt.

The *Manchester Guardian* of December 18 contains an article upon "The Opportunity in Egypt," in which, after tracing events in Egypt from the Armistice to the present time, it remarks that the Ministry of Nessim Tewfik Pasha "starts with the advantage of being formed without British interference, and of having the support of the Zaghlulist party," and thinks that at the moment a golden opportunity presents itself:—

> But the occasion must be taken soon if success is to be gained. Nessim cautiously abstained from any definite promises on taking office; but his silence is already beginning to alienate the Zaghlulists, and it cannot be too often insisted that any settlement which ignores Zaghlul ignores the great mass of Egyptian opinion and is foredoomed to failure. The immediate need is to get the Constitution ratified and established, preparatory to the constructive discussion of the "reserved questions"; and the immediate difficulty will be to ensure that these questions, particularly that of the Sudan, really are "reserved." To this end it is not sufficient to use pressure on the Egyptian Ministry; that would leave it in exactly the same position as its predecessor. We have to enable it to rely on national consent in omitting the Sudan clause and giving the Constitution a fair trial. The key of this consent is Zaghlul, now an exile at Gibraltar, and we cannot handle that key so long as our stringent enforcement of martial law keeps him and his fellow-delegates excluded from the discussion. Sooner or later we shall have to treat with him. Would it not be the wise as well as the generous policy to begin forthwith? Martial law, it is true, cannot be abolished till an Act of Indemnity is passed; but Lord Allenby has himself held out the hope that, even before this, its operation might be suspended in regard to politics. Now, surely, is the time to make a genuine conciliatory move of this character. We have a new Government, not pledged to the repressive policy of the last. It has the power, by a revision of that policy, to bring the Egyptian settlement at one stride within the domain of possibility. If nothing is done, there is every ground to fear that matters will drag on in the same inconclusive way that they have for the past year, with increasing exacerbation of feeling on both sides. On all accounts it is urgently desirable that the Government should at an early date give the whole question a fresh consideration.

Firmness in India.

The *Morning Post* of December 21 contains an article entitled "A Programme for India," in which it reiterates its demands for strong action in India. Having commented upon the "programme" addressed recently by the Communist,

Digitized by Google

Mr. N. Roy, to the Indian National Congress, it says :—

> We have no doubt that there is at present in India an underground organisation (as there is in this country), subsidised by Moscow and Berlin, for the propagation of these doctrines; but it will be interesting to see whether the Indian National Congress will nibble. For our part we have never troubled very much about the cherished division of the Indian agitators into "Moderates" and "Extremists," no more than we trouble to distinguish in Russia between Bolshevik and Menshevik, or in Ireland between Free Stater and Republican. They have their internal feuds; but all are our enemies. Yet we dare say that the class of Indian capitalists and large landowners may be driven by this programme seriously to consider whether they are wise in toying with a movement which for them has such dire possibilities. Unfortunately that class is composed of people without sufficient moral courage to stand against the extremists. When they are told that the British Government intends to hand over the real power to the Indian politicians they side with the agitators in order to be on the winning side. And when they see the whole Civil Service rapidly passing into revolutionary hands, they do not dare to side with the vanishing remnants of British power. The only chance to retain the support of these classes is to regain the reality of power, from which we have parted under the foolish belief that we could reconcile the irreconcilable. Unless that is done India will drift from us, and the "Moderates" will follow helplessly in the wake of the "Extremists" into an anarchy as terrible to consider and as disastrous to the world at large as the collapse of the Russian Empire. The British Government must recognise that in maintaining the peace and good government of India it has a trust to the world at large. As Lord Sydenham showed in the House of Lords the other day, the American Government made in the Philippines the same mistake as we have made in India. But the Americans apparently have had the courage to amend their ways and to return to the true principles of an Eastern administration from which we have departed. Whole provinces in India are rapidly falling into the most shocking state of disorder and bankruptcy, and unless we make a true reformation, and place the Provincial and Central Governments once again in competent hands, we shall lose India, no matter whether this extreme programme of the Bolsheviks is adopted or the more "moderate" politicians persevere in their present course of making good government impossible.

The Question of the Straits.

Under the above heading the *Manchester Guardian* of December 21 deals with the signs, recently manifested at Lausanne, that Russia and Turkey are drifting apart. Turkey may be satisfied, it says, but without the good will of Russia no settlement is secure :—

> The position of Russia is perfectly simple, if not altogether defensible. Her desire, like that of every other State, is for security. She is not and is never likely to be a great naval Power. She is poor, and she does not wish to be put to the expense of building a great fleet to protect her Black Sea coasts. She is quite willing that the Turks should hold the key to the Black Sea in full control, because Turkey can never be a very formidable Power, and she counts on her self-interest to keep the gate permanently locked. In many ways that arrangement would suit Turkey also very well, since it would give complete protection against attack by sea to Constantinople and undisputed control to the Turks of the vital link between the eastern and the western part of their dominions. But, on the other hand, it would leave Turkey pretty much the handmaid, or servitor, of Russia. Moreover, Turkey has not at the moment a perfectly free choice. If she is pressed by Russia on the one hand she is pressed a good deal more strongly by the Allies on the other. So, as might be expected, she has chosen to bargain and to compromise.

It then details the Allied scheme for the Straits, and continues :—

> So far as the Turks are concerned, it would seem, therefore, that at least in the main the question of the Straits may be regarded as settled and that any remaining points of difference are not likely to present much difficulty. No similar concessions have been made or, it would seem, attempted to meet the very real difficulties and objections of the Russians, and Mr. Chicherin complains rather bitterly that throughout he has been treated by Lord Curzon with extreme coldness and in a spirit totally different from that to which he and his friends had become accustomed at the hands of Mr. Lloyd George and in the more genial atmosphere of Genoa. If the complaint is well founded it is a thousand pities, for on any large view our relations with Russia matter far more than our relations with Turkey, and it would have been infinitely worth while to explore the possibility of agreement, as to which Lord Curzon appears to have maintained an attitude of complete indifference and a closed mind.

It sums up its opinion of "the solution which has now been forced on the Turks" thus :—

> Under this arrangement ships of war of every Power are to be admitted in peace-time up to the strength of the strongest Black Sea Power, and in war-time, when Turkey herself is not a belligerent, there is to be no restriction whatever. There is no gain to us in this beyond the possibility of attacking the southern coasts of Russia if we should be at war with her. It would be infinitely more to our advantage and to that of the peace of the world if we entered into an arrangement with Russia which would prevent her from attacking us and make it far more unlikely that we should want to attack her.

Articles to Note.

PRE-KIEVAN SOUTH RUSSIA.

"IRANIANS AND GREEKS IN SOUTH RUSSIA." By M. Rostovtzeff. (Oxford: The Clarendon Press. 84s.)

There are few countries in Europe, we imagine, a study of the history of which will repay better than that of Russia. Russia, whose importance, now only potential, perhaps, but soon enough to be actual, no one will dispute, has been insufficiently studied by European scholars, and adequate proof of this statement is found in the tendency to identify the history of Russia with the history of the Slavonic race. It is commonly assumed that before the advent of the Slavs in the fifth and sixth centuries A.D., and, particularly, that before the establishment of the State of Kiev, the story of Russia is unimportant, or if of any importance, then only in so far as it was the settling ground of a few European colonists. Now this assumption, as Dr. Rostovtzeff sees the matter, is wrong, entirely wrong: the history of Russia is much longer than is supposed, and has a demonstrable unity. In his own words: "The Russia of Kiev was at the same time the last link of an ancient historical chain and the first of a new one." In order to establish this case, he has examined, chiefly by means of archæological evidence, the pre-Kievan history of South Russia, of South Russia, that is, in the pre-historic, the proto-historic, and the classic periods.

But let it not be supposed that there is in this book anything that savours of national bias; there is nothing here that is not built on purest historical methods, nothing that even hints at partiality. It is a most brilliant piece of research, inference, and writing: and we believe that Dr. Rostovtzeff has proved his case.

This volume is the first coherent attempt to utilise the very important archæological discoveries in South Russia for the purpose of history. Hitherto these discoveries had, in the main, been estimated either in archæological values only or as evidence of Greek influence on the native world and not *vice versa*. If any further inference were drawn, it was to point to the instability of life in South Russia and to the consequent achievement of Europeans there in establishing any kind of order. It is, therefore, to this alleged instability, this chaos, that Dr. Rostovtzeff first addresses himself. He sets out by laying down that the nomads from the East who successively invaded South Russia—the Cimmerians, the Scythians, and the Sarmatians—imposed themselves on the sedentary agricultural population, whose commercial relations, moreover, they inherited. So long, therefore, as they were able to defend the territory they had conquered, they remained there, founding more or less stable kingdoms. This fact is supremely important, and can perhaps be more readily seized if it is realised that the Scythian kingdom on the steppes, an almost completely Iranian formation, was the northern counterpart of the kingdom of Darius and Xerxes. To this stability, indeed, the Greek colonies on the Black Sea owed their existence, and, thanks to it, definite civilisations and cultures were able to flourish.

Into the archæological details which Dr. Rostovtzeff prefers in support of his thesis we are not competent to enter, and must content ourselves with indicating a few of his generalisations from them. In his chapter on the prehistoric civilisations, he maintains that during the bronze and copper ages civilised life in the western part of South Russia never ceased, and that it was probably the Sauromatians, the Sindians, the Mæotians, and the Taurians who created the civilisation of the copper age, and who, later, handed it on to the Cimmerians and the Scythians. Thence he proceeds to better-known ground. With the creation of a kingdom in the eighth century B.C. by the Cimmerians came commercial intercourse between South Russia and the Mediterranean, and the fisheries of the Sea of Azof and of the Cimmerian Bosphorus were so thoroughly exploited that by the time of the Scythian State, in the sixth century, the Greek colonies on the Black Sea were wealthy and populous. The peaceful nature of the relations between these Greek colonies and the Scythians, who were masters of the land, Dr. Rostovtzeff satisfactorily explains by expressing his belief that the Scythians were Iranians and, therefore, never liked the sea, but liked very much to profit by Greek enterprise in this direction. He gets really to the heart of his matter, and to more familiar ground, when he examines the Greek colonies, and traces their story down to the Roman period. The whole basis of his sketch lies in his conviction that when the traders from the South, the Achæans, Carians, and others, who early knew of the iron and gold of the Black Sea, came to trade with the dwellers on its shores, they found not barbarians, but fairly civilised people. It was this fact, coupled with the later-acquired knowledge of the richness of the Black Sea in fish, that drew them farther and farther inland. Thus grew up the State of the Bosphorus, which for two centuries lasted as an independent Power. Of its constitution, its relations with Athens, and its final extinction a most fascinating account is given, and this part of the book, particularly, contains evidence of most unusual insight and a sense of proportion: the summary in which he pays tribute to the universality and flexibility of the Greek genius in moulding foreign surroundings and adapting itself to unfamiliar conditions, as exampled in this State of the Bosphorus, is quite masterly.

We have already indicated that Dr. Rostovtzeff has, incidentally in the course of this history, upset several commonly held theories. One of these assumptions is the complete destruction of the Scythians (though now that, as we understand, a popular school of writers in Bolshevist Russia have adopted this name, more light may be directed on the supposed corpse): they are held to have been absorbed by the Sarmatians. But so long as Rome was supreme on the Black Sea, the Scythians continued to exist in the Crimea and in the Dobruja—a fact which Dr. Rostovtzeff thinks will be better realised with the course of archæological research in Roumania and Bulgaria. However that may be, the fact that the Sarmatians were more cultured Iranians than were the Scythians is indisputable: they penetrated the Greek cities on the Black Sea and Iranised them. The Bosphoran State, founded on a mixed basis, became in this Roman period more mixed than ever, until, in fact, its Greek aspect was less prominent than its neo-Iranian. It was here and about this time that the polychrome style developed, and it was

FRENCH SELF-TAUGHT, GRAMMAR WITH KEY

By J. LAFITTE, B.esL., Principal French Master, City of London School

For learning the Language by the Natural Method. It contains Classified Vocabularies, Travelling by Rail, Road and Sea. Cycling, Motoring, Post, Telegraph, etc. Commercial, Naval and Military Terms, etc., Conversations, so arranged that they may be learned AT A GLANCE, with ENGLISH PHONETIC PRONUNCIATION, Tables of Money with Illustration of Coinage, etc.

A course of simple and practical lessons in the Grammar and construction of the French language, progressively arranged and fully illustrated with model sentences; useful exercises throughout, and an Alphabetical Vocabulary.

Crown 8vo., 316 pp. Green Cloth, 6s. net. Postage 4d. extra.

Sold by all BOOKSELLERS. Write for Prospectus & Catalogue No. 25, post free

hence, from Graeco-Iranian South Russia, that it radiated to Central Europe. This fact is but one example of Sarmatian civilisation, which must have been wide; and yet it is often forgotten, when one speaks of the migrations of the Goths, who came after the Sarmatians and fused with them, that it was as much Sarmatian culture as Gothic which was spread over the Roman world. Having established this point, the author passes easily and finally to his main contention: that South Russia was always one of the most important centres of civilisation. Here, he says, "three main currents are traceable: an eastern current, proceeding from both Iranian and Mesopotamian Asia by two routes --the Caucasus route and the Russian steppe route; a southern current from Asia Minor and Greece, which brought with it the splendid civilisation of Greece; and a western and northern current, by means of which Russia partook in the civilisation of Central and Northern Europe."

Dr. Rostovtzeff had perforce to produce this volume in difficulties. His reference books are yet in Petrograd, and many photographs that he would like to have included are not available. He, himself, says he does not know when he will return to Russia, for conditions there are almost impossible to the scholar. But not quite, for, according to a communication sent by Dr. Ellis H. Minns (who is our greatest authority on the subject of South Russia, and to whom, incidentally, the book under discussion is in part dedicated) to the *Cambridge Review* of November 24, the Soviet Government is doing what it can to assist archæological research, particularly at Olbia, which district is frequently drawn upon for evidence by Dr. Rostovtzeff.

We are painfully aware of the inadequacy of this review, and can only state that it is not due to lack of interest in Dr. Rostovtzeff's effort. His capital contention we consider sound, and for the admirable and refreshing way in which he sets out and illustrates his theses we have no praise high enough. We look upon this work, indeed, as a masterpiece of scholarly and original writing. To say that it is worthily produced when it has been in the hands of the Clarendon Press would be to dub oneself an obvious blockhead: one can only gasp at the sheer perfection with which the text has been printed and the plates, often exceedingly beautiful, have been reproduced.

EUROPE'S LAST HALF CENTURY.

"EUROPE SINCE 1870." By Edward Raymond Turner. (London: William Heinemann. 21s. net.)

American professors are constantly sending us over elaborately compiled summaries of almost every subject under the sun. Some of these we could quite well do without, but others we accept with sincere gratitude. This book comes in the latter category. Professor Turner has succeeded in presenting, in a space of 546 pages of excellent and liberal type, a really useful summary of the bewildering mass of events which occurred all over Europe from 1870 to 1920, together with sufficient indication of the course of previous history which led to these events. The standard of accuracy is astonishingly high, and our author seems to be as much at home in one country as in another. He marshals his facts skilfully, and not the least praiseworthy element in the book is the rigid exclusion of unnecessary detail without vitiation of general conclusions. He allows himself no "tall" writing, and his scrupulous impartiality—due, we suppose, largely to the perspective of a view across the broad Atlantic—surprises a European reader. We trust that we have said enough to indicate our opinion that we owe Professor Turner a deep debt for a book which will be of real use to every good European who sympathises with Mr. Bonar Law in wondering where he stands. Besides this, it is an excellent text-book of a period of which most Englishmen are profoundly ignorant. The numerous maps greatly add to the usefulness of the work.

C. S.-W.

TWO ARTISTS IN SEARCH OF A SPANISH GUITAR.

"Poor Folk in Spain." By Jan and Cora Gordon. Illustrated by the Authors. (London: The Bodley Head. 12s. 6d. net.)

Mr. and Mrs. Gordon are both artists, and this is the story of how they spent four summer months in Spain painting, and living as cheaply and simply as was possible. It was the first time they had been there, and they warn us that "this is not properly a book about Spain in the true sense of the word; it is a book about ourselves." It is in no way meant for a guide-book. "We are not going to retail second-hand history," they tell us. At first we were afraid of a certain self-consciousness on the part of the authors, as though they should wish to point out too aggressively that they, thank Heaven, were not as other tourists were who stayed at the Grand Hotels and did all the obvious things. This air of slightly conscious virtue disappears, however, in their eagerness to make us share their adventures, which were certainly not such as fall to the lot of the ordinary tourist who lacks the spirit of adventure. They were lent a house in the town of Murcia and a studio in Jijona, near Alicante; they spent some time in a village in the mountains of Murcia called Verdolay; they also sampled a variety of small inns. Mr. Gordon wanted to learn to play the guitar and to obtain a really fine instrument, and some of the most amusing and delightful passages tell of the search for a suitable teacher and for the maker of the perfect guitar.

Although the authors do not possess that magic touch which makes the great intimate travel books almost the most enthralling form of literature, the spell with which Borrow or Stevenson holds the reader from start to finish of a journey, they have a gift for re-creating circumstances and making their scenes vivid, and they succeed in establishing that sense of familiarity between themselves and the reader without which this kind of personal narrative is lifeless.

After reading their pleasantly related experiences we are left with a quite definite idea of the part of the country which they visited, and of the general character of the people of its villages and small towns, and with a feeling of enjoyment at having been present when the travellers recalled the adventures into which they had allowed opportunity to lead them. The impression which is left on our minds is the clearer for the illustrations contributed by both authors, which have plenty of movement and gaiety, although one or two are rather distractingly fantastic. The two drawings of a girl singing and of three couples dancing a jota in the streets of Jijona are powerful in line and in feeling.

MISSION OF HELP TO INDIA.

Canon Lovett, Rural Dean of Southampton, has left England almost at a moment's notice to join the Mission of Help to India. He is to preach missions at Lahore Cathedral, Simla, Ranchi, and elsewhere. With him has gone Canon Spencer-Elliott, of Sheffield, who opens with a mission at Cawnpore. The Rev. R. J. Wood, Vicar of Holbeck, Leeds, will start at the beginning of the year. He is to take missions in the hill stations during the hot weather. The Rev. T. H. Masters unfortunately fell ill with dysentery at Bareilly during his first mission. It is doubtful whether he will be able to resume his work.

PERSONAL AND GENERAL.

TO-DAY.

December 28 (New Style).
December 15 (Old Style).
Gumada I., 10, 1341 A.H. of the Moslem Calendar.
Tibet 9, 5683 of the Jewish Calendar.

The Earl of Dunmore has left for Bombay.

Sir Henry and Lady Bax-Ironside have left Grosvenor Place for Cologne.

Rikabi Pasha, Prime Minister of Transjordania, left London last week for Paris.

The Earl of Lanesborough, who has arrived at Cairo, will remain abroad until July.

Brigadier-General Sir William and Lady Manning will leave 10, Wilton Place for Ceylon at the end of January.

Ebrahim Khan Gharagozlow, Secretary to the Persian Legation in London, is on his way from Teheran to England.

The Council of the Royal Society of Arts have appointed Sir John H. Marshall, Director-General of Archæology in India, to deliver the annual Sir George Birdwood Memorial Lecture for 1923. The subject will be "The Influence of Race on Early Indian Art."

The engagement is announced between E. J. Judah, son of the late J. E. Judah and Mrs. Judah, of Calcutta, and grandson of the late Hon. E. R. Belilios, C.M.G., of Hong Kong, and Sylvia S. Frank, elder daughter of Mr. and Mrs. Leopold Frank, of 49, Westbourne Terrace, W.

The following rewards for distinguished service in connection with the military operations in Southern and Western Darfur, 1921, are dated July 13 of this year:—To be Brevet Lt.-Col., Maj. S. T. Grigg, D.S.O., M.C., W. Yorks R.; to be Brevet Major, Capt. W. Hunt, O.B.E., M.C., M.B., R.A.M.C.; Military Cross, Capt. R. A. Colville, Camerons.

A marriage has been arranged, and will shortly take place, between Aubrey William Graham, only son of Brigadier-General and Mrs. Martin, grandson of the late Colonel and the Lady Harriette Holroyd-Smyth, of Ballynatray, County Waterford, and Lulihi Joan, only daughter of Mrs. Prest, of Thurston, Bury St. Edmunds, and the late W. B. Kingsbury, of Colombo.

It is announced that the Military Cross has been awarded to Lieutenant Henry Robinson Swinburn, 15th Sikhs, for distinguished service in the field during the recent operations in Kurdistan. It is also announced that the Distinguished Flying Cross has been awarded Flying Officers S. T. B. Cripps and G. D. Daly, of the Royal Air Force, for gallant and distinguished service during active operations in Kurdistan, and that a bar to the D.F.C. has been awarded Flight-Lieutenants W. H. Park, M.C., D.F.C., and F. O. Soden, D.F.C., of the Royal Air Force, for similar service.

APPOINTMENTS, Etc.

It is officially announced that General Sir Walter Norris Congreve, V.C., K.C.B., M.V.O., has been selected as General Officer Commanding-in-Chief, Southern Command, in succession to the late Lieutenant-General Sir George Montague Harper.

OBITUARY.

The death took place last week in London, at the age of thirty-six, of the Maharaja of Cooch Behar. Sir Jitendra, Maharaja Bhup Bahadur of Cooch Behar, was the son of Maharaja Sir Nripendra, the well-known sportsman and the author of "Thirty-seven Years of Big Game Shooting in India." He was a patron of the Turf both in this country and in India.

THE PERSIA SOCIETY.

President: Lord Lamington, G.C.M.G., G.C.I.E.

Founded in 1911 to study all questions of common interest to Great Britain and Persia.

Subscription £1 per annum. Further particulars may be obtained of the Honorary Secretary, 74, Grosvenor St., W.1.

THURSDAY, DECEMBER 28, 1922.

LAUSANNE AND CONSTANTINOPLE.

A verdict on the Lausanne Conference cannot be passed until the Conference is over; but a considerable amount of ground has been covered by the discussions, and, although no single question may have reached the stage at which it can be put on one side as definitely settled, certain tendencies have revealed themselves so clearly that it will be strange if a true appreciation of the Near Eastern problem is not more widely held than it was a month ago. In the first place, the Allied Powers have reason to be thankful that they have recovered in Lausanne much of, if not all, the unity of purpose that they had lost in this sphere and still lack in others. It will not do, perhaps, to set too much store on this phenomenon in view of the overriding importance of Reparations in comparison with any other international question; but it is a step in the right direction when misunderstandings on minor points are removed, even if more serious divergences of opinion remain in regard to weightier matters. At the root of the trouble as far as Great Britain, France, and Italy were concerned was the exaggerated importance attached by certain French and Italian politicians to the value to their respective countries of Turkey's economic potentialities. All three Powers may be acquitted of designs on Turkish territorial integrity, but both France and Italy hoped by currying favour with the Angora Nationalists to find in Turkey a convenient stepping-stone to their own economic recovery. The process of disillusionment had begun before, but in Lausanne the French and Italians have not only had their sense of proportion restored, but have also learned that, if Great Britain has to be regarded as a rival in the Near East, she is not a rival of the kind that can be usefully forestalled by underhand methods, which merely prejudice those who indulge in them.

Of the part played by Turkey in Lausanne the worst that can be said is that it has been true to type. The Allies have reason to congratulate themselves that the task of dealing with the Turkish delegation has been in Lord Curzon's hands, and that it did not devolve on anyone less familiar with the Orient. If the Turks have seemed to overstep the limits of exasperation and obstruction it is only fair to remember that it is not the first time that a delegation will have had to play to its own gallery at home. Provided that the Conference achieves its end and is able to draft a peace settlement that will be ratified by Turkey and by the Allies, the tedious or tortuous ways by which the goal has been reached will be of little moment compared with the result. Those who looked for a new spirit in Turkey will be the most disappointed, for, apart from the fact that he has avoided breaking up the Conference, by abandoning untenable positions at the eleventh hour, Ismet Pasha has shown no qualities that would differentiate him from Turkish delegates of previous days. It would, however, be a mistake to lay too much stress upon this point. Lausanne will have provided practically the first occasion that Turkish Nationalism, since its rise to power, will have come into close touch with international realities. Hitherto, for intellectual and moral guidance it has not been able to look beyond M. Araloff, the Soviet plenipotentiary at Angora, and M. Franklin-Bouillon; even the opportunity afforded by the presence of Fethi Bey in London was not profitably used by the late British Cabinet. The enlightenment of Ismet Pasha, which was begun by General Harington at Mudania, has been considerably advanced by Lord Curzon at Lausanne, and if a settlement is reached and formally accepted by Turkey, whatever her mental reservations may be, it will mean that the process of enlightenment has been passed on to other Turkish leaders, even though it may be far from having leavened the whole body.

The view of the foreign community in Constantinople is that the Turk is unchangeable, and that, for his own ends, he will make promises and give guarantees, fully resolved to ignore or circumvent them. Everyone who has any knowledge of what Constantinople residents have passed through recently must sympathise with their feeling of pessimism. It is not forgotten that as the mental strain has fallen almost exclusively on them during the last few months, so in the future the actual hardships involved in an unreal settlement will be theirs. They have, however, no practical alternative to offer to the solution that is being evolved at Lausanne. There is far less likelihood of Angora breaking with Moscow if the Turks are to receive only encouragement to strengthen the existing bonds. It is admitted that economic and financial realities are compelling Turkey to come to a closer understanding with Great Britain, France, and America, but the pessimists refuse to allow that there is any change of attitude in this temporary yielding to necessity. That is quite possible; but statesmanship suggests that every effort should be made to prolong the closer understanding until a change of attitude becomes inevitable. Any success achieved at Lausanne will be due largely to the newly established unity of purpose in regard to the Near East between Britain, France, and Italy. If this can be maintained in the future, an entirely new factor will have been introduced in Near Eastern affairs, the effect of which may make itself felt for the permanent good of Turkey. Hitherto, both before the War and since the Armistice, the Turks have been able to find justification for any line of conduct in the support of one Power or another. They were never allowed to see themselves or their intellectual and moral standards in their true perspective. At Lausanne for the first time they have had opportunity to learn how far short of reality falls their claim to be regarded to-day as on a level with any Great Power; but if they are wise they will have appreciated the readiness of the Powers to assist them to reach that stage.

RAGUSA: CITY OF ENCHANTMENT.

By E. C. DAVIES.

From Trieste it is no far cry to lovely Ragusa, but the wise traveller will avoid the express steamers, and, choosing an "intermediate boat," will saunter leisurely down one of the loveliest coasts in the world, passing beautiful fjords and enchanting islands, and at last arriving before a magical walled city set in the blue waters of the Adriatic. From the sea Ragusa frowns a little, for her massive walls and towers were built of old for defence, though to-day palms and giant aloes flourish on every cranny of the masonry right down to the sea, while oleanders, white and crimson, paint her gaily in their season.

To pass under the massive archway of the Porta Pile, with its frowning bastions and ancient watch-tower, is to glimpse the reality of the history of this tiny republic-city which, throughout the whole of the Middle Ages, retained its independence, even when the Moslem had his way over the whole of the neighbouring lands. By skilful diplomacy and the realisation of the value of the Levantine trade, the citizens succeeded in manœuvring their liberties even when the balance of power swung between Hungary and Venice. The civic history of Ragusa is full of pride, renowned for fine traditions and far-sighted policy. Even in the early Middle Ages the city possessed a hospital where Sisters of Mercy tended the sick: no refugee was ever abandoned to his enemies, and the slave trade was declared illegal in the beginning of the 18th century by the Ragusans. The wonderful old pharmacy of the Franciscan monastery—itself a place worth visiting, with delightful cloisters, the capitals of whose columns are carved with strange beasts—is the third oldest in Europe and dates from 1307, and much of the old pottery that held the herbs and simples concocted by the ancient monks is still extant.

In 1667 a terrible earthquake befel the city, and during that time the valuable library and all the Church treasures of the monastery were destroyed, as was much of the ancient city. The newest street in Ragusa was rebuilt in 1667! This, the Strodone, is wonderfully picturesque; its gold-smiths' and silversmiths' shops and booths for oriental carpets and embroideries forming a wonderful background for the peasants, clad in delightful garments, who throng in from the countryside. Some of the men wear the red fez on their dark heads, others a kind of turban, and array themselves in full blue trousers and leather sandals, gold-embroidered vest, and short red jackets, while the women present an equally charming appearance in full pleated white skirts, edged with a bright border, their bodices adorned with gold filigree jewellery and their heads covered with gay-coloured handkerchiefs. Others from a district some little distance from the town wear white-pleated head-dresses over a quaint little round cap, while the Herzegovinian women look perhaps the most pic-turesque of all, with their white veils, surmounted by tiny caps gay with flowers and fastened by silver pins. Over their white dresses, woven from coarse linen, they fasten richly embroidered aprons of beautiful colours, and the whole effect is wonderfully attractive.

In the side streets of Ragusa, narrow and winding, you may see fine old palaces with balconies of magnificent iron work; and facing the market place, where country people bargain over their wares, is the beautiful Logana or Customs house. This was the ancient mint, and in its upper rooms the nobles of Ragusa in the old days met for social gatherings. One can imagine them richly dressed looking down on the square from the charming loggia or from the hall with its Venetian Gothic windows. Close to the clock tower stands a lovely fountain, pigeon-haunted, and not far from that is the Rector's Palace—the gem of all the Ragusan buildings, a poem in stone of the Renaissance period; of which the inscription proudly states "Giorgio Orsini, the Dalmatian, finished this alone." It is equally as beautiful as the far-famed Doges' Palace of Venice, and within its treasury are jewels and notable caskets of exquisite workmanship.

One could not make a tour of Ragusa without paying a visit to the peaceful cloisters of the Dominican Monastery, with its fine court, where the orange trees grow, and its marvellous treasures of illuminated missals of old Slav workmanship. In the church is a picture said to be by the hand of Titian, and before the altar is a great Byzantine cross, placed there to stay the plague of 1348.

One has to climb above Ragusa to realise how formidable must have been the strength of the massive old walls in the days before modern artillery rendered fortification an obsolete weapon of defence. Looking down on the city from the heights of Fort Imperiale, one has a matchless view; for landwards are the wild mountains of Herzegovina, and, looking out to sea on a clear day, all the islands of the Southern Dalmatian archipelago are visible.

There are endless walks and excursions to be made all round Ragusa—Lapad, covered with dark pine woods, and the hermit chapel of San Biagio, from which at sunset the whole coast is seen bathed in golden light; the cypress trees on the horizon silhouetted darkly against the sky, the water an indescribable sapphire. There are gardens with locust trees and flowering aloes, pink oleanders and stately palms, crumbling walls wrapped lovingly by ivy, dark cypress groves and grey of olive trees, a wealth of flowers and creeper clothing the rocks which fall sheer to the blue waves beneath. Rosemary and myrtle scent the air, and from the Tarpeian rock—whence in days of old criminals guilty of treason or sacrilege were flung into the sea—the walls and towers of Ragusa make an unforgettable sunset picture.

And if you are desirous of more distant expeditions there is the wonderful garden of Count Gozze at Canossa, reached by sea from Ragusa, and famous for its immense plane trees; or, still more distant, the source of the Ombla River, reached by road from Canossa. This is one of those curious subterranean sources from which, under a great shelf of rock, the river—no tiny stream, but a full torrent—rushes out, first to dash itself over a rock

precipice and afterwards to widen out into a reach of calm, still water with reedy banks, whence it flows gently onwards to the sea.

There are lovely drives from Ragusa, albeit the roads are not too good, but the surpassing beauty of the scenery more than atones for the lack of a metalled highway. One may penetrate into Herzegovina and visit Trebinje, or see the quaint costumes of the Val di Breno, coming back in the sunset, the most beautiful of all hours on the Dalmatian coast, when the pageant of the sea and sky is unforgettably beautiful and the mediæval walls and towers of Ragusa are bathed in rosy light as one approaches nearer to the fairy city, a Circe from which no traveller to the Dalmatian coast-lands can readily tear himself to return to the more prosaic realities of Western Europe.

MUSICAL NOTES.

The Mozart Festival.

The Mozart Festival at the "Old Vic" has come and gone, and, without disparagement to other opera companies, I am afraid that we shall have to wait another year before we can see on the stage again the full spirit of Mozart. There will no doubt in the course of the coming year be better singing and playing of Mozart operas than that which we recently heard at the "Old Vic"; in particular, we may expect something accomplished from the British National Opera Company, who are shortly to begin their season at Covent Garden. But though in this company, and perhaps in others, some stars may shine, it is extremely doubtful whether we shall get the sunny *ensemble* which is characteristic of Mr. Clive Carey's productions at the "Old Vic." "Figaro," "Don Giovanni," and "The Magic Flute" we had there, and it was not easy to prefer one to any other.

For myself I liked "Don Giovanni" best, but probably for the personal reason that Mr. Clive Carey was playing the Don, and therefore was able directly to inspire the whole show. In his performance there were no rough edges; he revelled and sang with pure Mozartian polish. And equally praiseworthy, though not so effective, was his Papageno in "The Magic Flute." I have sometimes said that Mr. Carey's services to art have been greater than his personal artistry, but I am beginning to think that that is a heresy which I must soon recant. In any case, he is an exquisite player of Mozart.

It is extraordinary that anyone should any longer be in ignorance of the artistic value of the "Old Vic." Nearly everything that is done there is popular, and nearly everything good. A very high place for it in the history of dramatic and musical institutions is assured.

British Music in Serbia.

At last there has been started a movement for the propaganda of British music in the Near East. Mr. Thomas F. Dunhill has left for Serbia to give several orchestral concerts there. Of his actual progress I have no particulars, but he intends to give the Yugoslavs an opportunity to hear such things as Elgar's "Variations," Vaughan-Williams' "Wasps," Holst's "Beni-Mora" suite, Ireland's "Forgotten Rite," and his own new symphony. With the exception of the symphony, which I believe is still in MS., and which will receive its first performance in Serbia, all these works have been frequently mentioned in this column. They are all quite worthy and representative of modern British achievement, and it will be very interesting to see how the Serbs receive them. The "Enigma Variations" are almost certain to be popular—they are whithersoever they are taken; "The Wasps" is a light work that is effective, but not much more than that; the "Forgotten Rite," a very beautiful specimen of Ireland's too scanty orchestral work, will surely appeal to the trained musicians of Yugoslavia; and I look forward to reading that some thousands of those Mohammedans in Yugoslavia of whom M. Mussolini recently spoke have hailed with familiar delight the "Beni-Mora" suite, which depicts a town in and the desert of North Africa. Incidentally, Yovanovitch Bratza, the young and extremely accomplished Serbian fiddler, is to appear at all the orchestral concerts; so that there is jam on the pill for the Yugoslav patients!

ANDANTE.

PATROL BOATS IN PERSIAN GULF.

Two patrol boats are to be sent for duty in the Persian Gulf Division of the East Indies Squadron. They will be chosen from the three PC-boats Nos. 70, 71, and 72, which are among those now on the disposal list at Portsmouth. They are of 694 tons, with engines of 3,500 horse-power, and are armed with one 4-in. and two 12-pr. guns. The "PC"-boats were a development of the original "P," or patrol-boats, and were adapted as decoy ships. They were at first termed "PQ"-boats, but the designation was altered to avoid confusion with the "Q"-boats proper. Nos. 70 to 72 were ordered in 1917 and commissioned in the following year. After the Armistice they were utilised for a time on anti-submarine duties at Portland. The vessels at present in the Persian Gulf are the sloops Crocus, Cyclamen, and Espiègle, and the yacht Triad, the last named being the ship of the senior naval officer, Captain A. R. Palmer.

Negotiations have been successfully terminated between the Hungarian Government and a British representative with regard to the regular aircraft traffic from London to India, which is to pass through Brussels, Berlin, Budapest, Constantinople, and Baghdad.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

NOTES AND NEWS.

London, Friday evening.

The New Year.

The year is drawing to its close with the outlook distinctly brighter than was the case a year ago. The chief problems with which we have been confronted are still unsolved, unfortunately, but the different way in which they are now being dealt with encourages the hope that before long the ship of trade will be sailing in smoother waters. Developments at Lausanne are decidedly promising, and if the Turkish question and the Reparations problem (which is by far the more difficult of the two) are settled, a very great stride forward in the direction of world reconstruction will have been taken. The past twelve months have been most trying for the business community—a long-drawn-out agony of unfulfilled hopes and endless anxieties—and the end of the year will occasion no regrets. May the festive period definitely mark the close of the depression! The omens are certainly propitious, and in the firm belief that they will prove accurate I take leave to wish my readers a Happy New Year.

Great Britain, Russia and Persia.

Our Teheran correspondent has some very interesting things to say with regard to developments in Persia this week. The pronounced anti-British campaign, which has been in evidence for a very considerable period, is now abating, he reports, and it is the Russians who are now coming in for most of the abuse. Of course, the change was bound to happen, and the only surprising thing is that disillusionment as to Russia's disinterested policy has not commenced long ago. The straw that has brought about the change in sentiment has been the prohibitive tariff imposed on goods imported into Russia from Persia, which has evidently made the Persians wonder whether, after all, Russia was only seeking their goodwill, and whether, in preferring Russia to Great Britain, they had not exchanged the substance of goodwill for a very shadowy pretence of it.

German "Grand Gesture."

The same correspondent deals with the much-heralded arrival at Enzeli of the German ship from Hamburg. With their accustomed thoroughness, the Germans left nothing undone in the way of publicity in regard to this characteristic enterprise of theirs. Unfortunately, the actual arrival of the steamer was rather in the nature of an anti-climax. A merchant vessel was expected with large quantities of goods, but the Argonaut, our correspondent states, turned out to be only a small torpedo-boat with a few hundred tons of goods on board. In future the Persians are not likely to be unduly impressed by such undertakings.

The Phœnix Oil Report.

The eagerly-awaited report of the Phœnix Oil and Transport Company has now appeared, and will be found elsewhere in this issue. The report deals with the period from the company's inception to December 31 last, and covers, therefore, only what may perhaps best be referred to as the stage of reconstruction, when the company's efforts were concentrated on repairing the damage done by the Germans and generally on the work of development. Since that period the progress of the undertaking has been very marked, and, as will be seen from the report for November, which is given with the annual report, the production for that month was 4,100 tons, and this is by no means the highest figure that has been attained during the past year. Satisfactory developments in one of the fields will, it is anticipated, result in an appreciable increase in the figures for the current month. Were the Phœnix Company to stand alone, its position warrants the view that its future would be assured, and that it would play a leading part among the Roumanian oil companies; as it is, its association with the Orion Oil and the Roumanian Consolidated companies gives every ground for the expectation that in time the Phœnix will develop into one of the principal oil companies. It will be noted that there is no reference in the report to the dividend that it was expected would be declared this time. Presumably it is the amalgamation with the Roumanian Consolidated that has occasioned the postponement, but if there is to be no dividend this time the shareholders have little need for regret, since it is very evident that in due course they can look forward to reaping an abundant return on their investments.

Indo-Burma Oilfields.

On another page in this issue we give the second report of the Indo-Burma Oilfields (1920), Ltd., for the year ended March 31 last, which records the commencement of the producing stage, and also gives details of the proposals for the reorganisation

BANK OF ROUMANIA LIMITED

A general Banking business with Roumania is conducted, and correspondence from those having interests in that country is invited.

Digitized by Google

of the company's capital. The production stage, it will be noted, was only reached in the last month covered by the accounts, and so no separate profit and loss account is submitted. On the Yenanma field forty-six wells had been drilled up to October 31, and twenty-eight of them had been brought into production, and averaged approximately seven barrels per day, as compared with an estimate of three barrels. On the Padaukpin field, where the production started later, an average of nineteen barrels per day was attained, as against an estimate of ten barrels. These results must be regarded as distinctly promising. Unfortunately, there has been a check in the production development at Yenanma, where there are indications that the first area selected for drilling is limited in extent. It is stated that it has not been found possible to place refinery products permanently on the Indian markets, mainly owing to the smallness of the output, and, pending larger production, it is proposed to close down the refinery temporarily.

Capital Reorganisation Scheme.

As regards the capital reorganisation scheme, it is stated that it is proposed, subject to the consent of the debenture stockholders, to reduce the face value of the ordinary shares issued from £1 to 10s., thus decreasing the issued capital to £750,000, and to convert the unissued 500,000 £1 shares into 5,000,000 pre-preference shares of 2s. each, which will be entitled to 90 per cent. of the ultimate profits and assets. Shareholders are to be offered eleven preference shares at par for every ten ordinary shares held, which would absorb 1,650,000 shares, the yield being £165,000. The issue has been underwritten at 5 per cent., and a call for three years at 3s. on 1,650,000 shares, of which shareholders will receive a call of half the shares subscribed by them. The outstanding feature of the proposals is the large allocation of profits and assets to the new capital, and it will be surprising if this does not give rise to some criticism.

COMMENTATOR.

The traffic receipts of the Egyptian Delta Light Railways, Ltd., for the week ended November 30 amounted to £E11,581; total for the year, £E224,779. For the corresponding period of last year receipts amounted to £E13,304; total for the year, £E258,324.

COMMERCIAL BANK OF GREECE

London & Constantinople Agents: The Commercial Bank of the Near East, Ltd.

AGENTS IN ALL PARTS OF GREECE, THE LEVANT AND ABROAD.

The Bank conducts every kind of Banking and Stock Exchange business, and extends special facilities to merchants and traders interested in business with Greece. It acts as Agent for many Foreign Banks. It is specially organised for Exchange transactions, the execution of mail and cable transfers throughout Greece, and for the collection of clean and documentary Drafts and Bills.

MERCHANDISE DEPARTMENT.

The Bank undertakes the warehousing and sale of goods consigned.

DEVELOPMENT OF PALESTINE.

Work of the Economic Board.

The report of the Executive Committee of the Economic Board for Palestine (Sir Robert Waley Cohen, Chairman; W. S. Cohen, Hon. Secretary) for the year ended June 30, submitted at the second general meeting of the board, held on December 19, at 7, Queen Square, W.C.1, states:—

Uncertainty as to the political future of Palestine has delayed the execution of the programme of work laid down in the chairman's speech at the first general meeting, as it was not possible to obtain money for investment in Palestine until the Mandate question was settled. Active operations could not, therefore, be begun until July 24, 1922, when the Mandate was finally approved by the Council of the League of Nations, and accepted by his Majesty's Government at the sitting in London. The first step was the incorporation in Palestine on August 31, 1922, of the Palestine Corporation, Limited. The objects of this company were fully explained at last year's meeting. It is intended to be the financial instrument by which capital is obtained for enterprises in Palestine which have been examined and approved by the Economic Board and the Board of the Corporation, on which the following gentlemen have kindly consented to serve:—Sir Robert Waley Cohen, K.B.E. (Chairman), S. Japhet, Esq., Henry Mond, Esq., Michel Polak, Esq., Field-Marshal Sir William R. Robertson, Bart., G.C.B., G.C.M.G, K.C.V.O., D.S.O., Lieut.-Col. F. D. Samuel, D.S.O. Mr. A. Goldwater, A.R.S.M., has been appointed the general manager of the Corporation in Palestine, and will be responsible to the board for the management of the undertakings in which they are interested.

It was intended that the capital of the corporation should consist of 100,000 deferred shares of £1 each, obtained by private subscription, and 400,000 ordinary shares which should be issued to the public. The financial and political situation has however, been such that it has been impossible to make a public issue with any prospect of success, and the issue of the ordinary shares has therefore temporarily been postponed. 87,500 of the 100,000 £1 deferred shares have been allotted, and we anticipate that the balance of these shares will be taken up shortly. It is intended to make a public issue of ordinary shares at the earliest possible moment, in order to take advantage of the opportunities which already exist in Palestine, or which it is known are likely to arise in the near future. The most important of these are the Rutenberg scheme and the construction of a port.

The Rutenberg scheme has now been fully investigated and approved by a number of eminent consulting engineers both in this country and the United States, and the Palestine Corporation has recently obtained an independent report on it which is entirely favourable, from a British firm of consulting engineers of the highest standing. The reports show that the scheme is well-conceived, that it is likely to prove remunerative, and that it will have far-reaching effects on the development of Palestine. The Palestine Corporation has accordingly offered to participate on certain conditions in the company which is projected to take over the concessions and carry out the scheme, and will give what assistance it can to bring this great undertaking to a successful issue.

Investments in the following companies have been made or are projected by the Palestine Corporation:—

The Palestine Salt Company, Ltd.—This company, which was mentioned last year, has now been incorporated with a capital of £E40,000, of which £E15,000 has been provided by the Palestine Corporation, and will produce salt by the evaporation of sea-water at Athlit, near Haifa. The preliminary work of excavation and canalisation is nearly complete, and it is anticipated that the company will be in a position to supply the salt requirements of Palestine in accordance with a contract into which it has entered with the Government.

Levant Bonded Warehouses Company, Ltd.—The corporation has invested £E2,850 in this company, which has been formed with a capital of £E20,000 to take over and extend the business hitherto carried on in Palestine by the Egyptian Bonded Warehouses Company, who have provided one-half of the capital, and will continue to manage the undertaking. It is intended to increase the warehouse accommodation at Jaffa and Haifa as necessity arises, and the company is considered to have a promising future.

Dead Sea Transport and Trading Company, Ltd.—Negotiations in connection with this company have now reached a more definite stage, and it is hoped will shortly be brought to a conclusion. The corporation has agreed, on certain conditions, to participate to the extent of £E5,000 in the company to be formed. Its object, as was explained last year, is to develop trade between the southern parts of Transjordania and Palestine by means of a transport system on the Dead Sea.

Digitized by Google

A number of other applications have been received for further capital, which are still the subject of investigation or negotiation, and it appears to be clear that much larger funds than are at present at the disposal of the corporation can be profitably employed in Palestine. It cannot be denied that trade and industry are seriously handicapped by the high cost of living in Palestine. This has, however, fallen somewhat during the past year, and a further fall may be confidently predicted whenever port facilities are provided, and whenever the Government finds it possible to reduce the present excessive freights on the railways.

Central Bank of Co-Operative Institutions.

The organisations interested in Palestine have for some years given their attention to the question of providing credit for small traders, artisans, and farmers, whose needs and credit are too small for them to make use of ordinary banking facilities. Several co-operative credit unions and co-operative associations of farmers exist in Palestine, and have done useful work. They have been financed partly by the Jewish Colonisation Association (Commission Palestinienne), and partly by advances made by the Anglo-Palestine Company, secured on the collective funds and liabilities of the society to whom the advance is made. The board were approached by the Joint Distribution Committee and the Palestine Development Council of the United States, who desired to create an institution with a capital of £E100,000 to develop this important work, and offered to provide £E75,000, if £E25,000 were contributed in Europe. The institution was incorporated in Palestine in July last, with a share capital of £E30,000, of which £E25,000 has been contributed by the Palestine Development Council and £E5,000 by the members of the Economic Board, and a loan capital of £E70,000, of which the Joint Distribution Committee have provided £E50,000 and the Jewish Colonisation Association £E20,000. These loans carry only 3 per cent. interest, and the interest on the Share Capital is limited to 6 per cent.

Sir Alfred Mond, chairman of the executive committee, in moving the adoption of the report, after referring to the financial activities of the board, said that one of the arguments which they had quite justifiably pointed out to the Arabs and the people of this country was that the Jews were going to find the money for the economical development of Palestine, a development very advantageous to the Arab population and also to this country. He had often been asked what was being done and why more was not being done in that direction. That was a very important point. When the Arab began to see that money was going into the country, that employment was being given, that he was going to get higher wages, that he was going to sell his agricultural produce at better prices, that he was going to make some money out of Palestine, his whole attitude towards the problem would become a very different one. The Arab was no fool; he was quite a keen commercial person, and he was quite as fond of making money as anybody else he had met. The agitators who had lived so long on misrepresentation, a vicious misrepresentation, that it was intended to replace Arab labour with Jewish labour—all that line of argument fell to the ground as soon as work was going on. He knew Mr. Rutenberg told him when he was starting the Jaffa scheme that he took special care to give some of the work of unloading the machinery to Arab contractors, and the feeling there had begun to change already. That was why he pressed economic development. It was perhaps the most important point at the moment, but continuous delay created scepticism. The Rutenberg scheme had been very carefully investigated for the Palestine Corporation and the Economic Board by one of the best men in this country, and by the General Electric Co. of America and other considerable firms, and he thought the consensus of opinion was extremely favourable. As regarded the technical aspects of the scheme, they presented no difficulty. Technically, it was a simple and straightforward proposition. The financial aspects of the scheme had been and were being considered, for on its ultimate success depended the future development of the country.

With regard to the port, no progress had been made. He understood the Government of Palestine had now got an engineering expert out there to make another report. Until the Palestine Government made up its mind on this subject whether it wanted a port, or what it did want, it was impossible for them to render any assistance in that matter.

COMMERCE AND INDUSTRY.

PERSIA.

Teheran, November 22.

Gunboats from Germany?

The Cabinet has, at the request of the Customs Administration and at the suggestion of the Ministry of Finance, approved a credit of 24,000 tomans (some £5,000) for the purchase in Germany of four gunboats to check smuggling on the shores of the Caspian. The order will be placed through the Persian Legation in Berlin.

The Oil Concessions.

The Northern Oil Concession has been given much attention in the Mejliss of late, and the Commission is continually sitting to discuss the matter. It is hoped that, with the arrival of the American advisers, a decision, so long delayed, may at last be reached, and the concession granted to one or other of the applicants.

In this connection it is interesting that four or five of the principal merchants here have addressed a letter to the Prime Minister applying for the concession, or at least for one province to exploit, and the matter of excluding one of the five Northern Provinces from the concession has been much discussed in the Parliament.

Hostility to Russian Tariff.

The anti-British campaign still continues in the local Press, though in a less marked degree, and the Russians are now coming in for their share of abuse and criticism. The Persians' chief cause of complaint against the Soviet authorities is the imposition of a prohibitive tariff on all goods imported into Russia from Persia, especially from Resht and Ghilan into Baku. By the terms of the Russo-Persian Agreement of 1921 Russia undertook, by the most favoured nation clause, to grant Persia special facilities for trade between the two countries, but now, on the contrary, the Customs duties imposed on all goods entering Russia from Persia are so high as to be prohibitive, and exports from this country into South Russia are, in consequence, practically at a standstill. In fact, a considerable quantity of merchandise which has been lying in the Customs House at Baku has recently been brought back to Resht by the Persian exporters, as its sale in Russia after payment of the high import duty would have involved a serious loss.

Shipping Intelligence.

GERMAN SHIPPING "ENTERPRISE."

(From Our Own Correspondent.)

Teheran, November 22.

The long-expected German boat from Hamburg has at last arrived at the Caspian port of Enzeli, and its arrival has been somewhat in the nature of a disappointment. Instead of a large merchantman, it proved to be merely a torpedo-boat of the former German Navy converted into a merchant vessel, and its cargo, which consisted mostly of sugar, boots, and a few bales of sundry goods, was only some hundred odd tons, and, therefore, not likely to affect the market one way or the other. On arrival, the ship was flying the Persian, Russian, and German flags, and a large dinner was given by the Russian Consul in Enzeli, noticeable principally for the strong anti-British feeling displayed. It appears that the voyage from Hamburg can be made in under a month, and it is proposed to start a regular service next year, when the ports are free from ice.

FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—

Anchor Line.—S.s. Elysia for Bombay (Liverpool, January 4); s.s. Vindelia for Bombay (Liverpool, January 16).

Anchor Brocklebank Line.—S.s. Manipur for Calcutta (Birkenhead, December 29); s.s. Malakand for Port Said, Colombo, Madras, and Calcutta (London, January 6); s.s. Malancha for Calcutta (Birkenhead, January 10); s.s. Mahanada for Calcutta (Birkenhead, January 20); s.s. Anchoria for Port Said, Colombo, Madras, and Calcutta (London, January 20).

Bibby Line.—S.s. Warwickshire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, January 3); s.s. Herefordshire for Rangoon (Middlesbrough, January 13); s.s. Leicestershire for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, January 17).

British India Line.—S.s. Masula for Bombay and Karachi (London, January 5); s.s. Manela for Colombo, Madras, and Calcutta (London, January 5); s.s. Pruth for Bombay and Karachi (London, January 13); s.s. Malda for Colombo, Madras, and Calcutta (London, January 19).

Clan Line.—S.s. Clan Mackellar for Colombo, Madras, and Calcutta (Birkenhead, December 28); s.s. Clan Ogilvy for Bombay and Persian Gulf (Birkenhead, January 8); s.s. Clan Murray for Colombo, Madras, and Calcutta (Birkenhead, January 11).

Cunard Line.—S.s. Brescia for Gibraltar, Ceuta, Melilla, Algiers, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Sulina, Poti, and Batoum (Swansea, January 4); s.s. Pavia for Genoa, Leghorn, Naples, Palermo, Messina, and Catania (Liverpool, January 18).

Ellerman Line.—S.s. Flaminian for Gibraltar, Malta, and Patras (Liverpool, December 29); s.s. Bavarian for Gibraltar, Genoa, Leghorn, Naples, Palermo, Messina, Catania, Bari, Gravosa, Venice, and Trieste (Liverpool, January 6); s.s. Falernian for Gibraltar, Malta, and Alexandria (Liverpool, January 10).

Ellerman's "City" Line.—S.s. City of Christiania for Calcutta (Birkenhead, December 28); s.s. City of Sydney for Calcutta (Birkenhead, January 8).

Ellerman's "Hall" Line.—S.s. Melford Hall for Bombay, and Malabar coast ports (Liverpool, December 30); s.s. Rialto for Karachi and the Punjab (Liverpool, December 30).

Ellerman's Westcott and Laurance Line.—S.s. Bulgarian for Gibraltar, Piræus, Salonika, Constantinople, Bourgas, Varna, and Constantza (London, January 10); s.s. Gitano for Gibraltar, Malta, and Alexandria (London, January 17).

Glen and Shire Line.—S.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, December 28); s.s. Glenluce for Port Said, Port Swettenham, Singapore, etc. (London, January 11); s.s. Glenade for Port Said, Port Swettenham, Singapore, etc. (London, January 25); s.s. Glenariffe for Port Said, Port Swettenham, Singapore, etc. (London, February 8).

Harrison Line.—S.s. Craftsman for Calcutta (Liverpool, January 8).

Holt Line.—S.s. Helenus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, December 28); s.s. Polyphemus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, January 18); s.s. Ixion for Port Said, Port Swettenham, Singapore, etc. (Glasgow, January 25).

Johnston Line.—S.s. Aviemore for all ports, including Syra, Smyrna, and Constantinople (Liverpool, January 13); s.s. Peruvian, for Piræus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (the first steamer of the season for Galatz and Braila) (Liverpool, February 10).

Moss Line.—S.s. Etrib for Casablanca, Gibraltar, Algiers, Malta, Famagusta, Beyrout, Jaffa, Haifa, and Port Said (Liverpool, January 6)

Papayanni Line.—S.s. Gulf of Suez for Algiers, Malta, Piræus, Syra, Volo, Salonika, Smyrna, and Constantinople (Liverpool, December 30); s.s. Destro for Malta and Alexandria (Liverpool, January 3).

P. and O. Line.—S.s. Malwa for Bombay (London, December 29); s.s. Kaisar-I-Hind for Bombay (London, January 5); s.s. Khyber for Bombay (London, January 12); s.s. Padua for Colombo, Madras, and Calcutta (London, January 26); s.s. Caledonia for Bombay (London, January 26).

LOSSES IN SMYRNA.

The Federation of British Industries have communicated with the Board of Trade, setting out the four typical instances of ways in which British subjects have suffered loss through the recent events at Smyrna, and asking whether it was possible to make any claim, and, if so, the channel through which it should be made:—

(a) Goods belonging to British manufacturers or merchants which were destroyed in the fire, but which were insured against ordinary fire risks only and not against war risks.

(b) Goods which escaped the fire but which were looted after the entry of the Turkish troops.

(c) Goods which have been sold at much below their value by the Turkish authorities in Smyrna.

(d) Sums owed to British firms by Greek and Armenian merchants who have either been killed or have become penniless refugees.

The Board of Trade, in reply, stated that claims should be registered with the Reparations Department, Stamford Street, S.W.

It is announced that a number of Italian capitalists propose to start a company to work an aerial line betweeen Rome and Alexandria, to be extended subsequently to Erythrea.

LONDON PRODUCE REPORT.

Sugar Steady.

(From Our Own Correspondent.)

London, Monday Evening.

Sugar.—Home refined has been in steady request at the last prices. Tate's cubes are 56s. 3d., London granulated is 50s. 1½d., and Lyle's granulated has been done at 50s. 4½d. Foreign descriptions have been a firm feature, with no change in prices. West Indian crystallised remains at 45s. 3d., as also white Mauritius at 47s. 9d. White Java has come to business at 47s. 9d. Quotations are:—December, 21s. 9d.; January, 21s. 10½d.; February, 22s. 1½d.; March, 22s. 4½d.; and May, 22s. 7½d.

Coffee.—No change is to be noted in all cases. East Indian and Costa Rica are firm at 110s. and 116s. respectively. Nairobi is quoted at 94s. Quotations are:—December, 59s. 6d.; March, 60s.; May, 60s.; and July, 60s.

Oilseeds.—A variable tone has prevailed throughout. Indian linseed shows a gain of 6d. at 21s. 3d.; while La Plata has shed 3d. at 19s. 3d. Rapeseed is lower, with Toria 1½d. down at 17s. 9d., and bold Ferozepore 4½d. lower at 17s. 3d. Cottonseed has been fairly steady. Egyptian and Sakellarides are both unaltered at 11s. 6d. and 11s. 3d. respectively. Indian has gained 1½d. at 9s. 3d.

Oils.—Steadiness is to be noted in all cases. Linseed oil is quoted at 39s. 6d. Rape oil is firm with crude at 42s. 6d. and refined at 45s. 6d. Cottonseed oil shows no change throughout. Egyptian is 36s. 6d., and refined 43s. Technical and deodorized have been done at 37s. 6d. and 45s. respectively.

Oilcakes.—There has been no alteration in quotations. Cottonmeal cake is 300s., and linseed cake is 270s. Cottonseed cake and coconut cake both remain at 160s. and 180s. respectively.

INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news, received from the Director-General of Commercial Intelligence, Calcutta, dated December 18:—Season.—During the earlier part of the week ending December 17 moderate rain fell in Burma, Punjab, and Central India. Condition of Crops.—Prospects unchanged. Markets, December 13.—Bombay cotton market steady. Fine M.G. Oomras Rs. 403 December-January; Rs. 404 March. Bombay cotton arrivals from September 1 to December 9, 1922, were 300,000 bales, as compared with 570,000 bales during the same period of the last year. The arrivals during the week from December 3 to 9 were 84,000 bales, as compared with 78,000 bales during the same week of last year. Bombay imported piece-goods market very dull. Prices weak and inquiries discouraging. Local goods also very dull. December 16.—Calcutta jute market steady. Hessians quiet, Ready 9 porters Rs. 19.8; 11 porters Rs. 23.2. Heavy goods steady. B. twills Rs. 46. At tea sale on December 12 market was practically unchanged. Excepting common Pekoes and Souchongs, which were slightly easier, there was an advance of ½ anna for Pekoes and 1 anna for Orange Pekoes, owing to demand for Bombay and Persia. This sale's average price was Rs. 1 pies 3 per lb., as against last week's average price of 15 annas 10 pies per lb.; 595,919 packages sold to date at an average price of 12 annas 9 pies per lb. December 16.—Rangoon rice market.—Sellers quoted Rs. 410 for small mills and Rs. 380 for specials. Small millers quoted Rs. 427.8 for Meedong, but no business was done. Paddy Rs. 160 rail and Rs. 163 boat. Shellac.—December 12.—Market firm. T.N. shellac spot Rs. 159 to Rs. 162. Closed at Rs. 162 buyers. Bank Rate.—Imperial Bank of India rate raised to 6 per cent. from December 14.

The early winter rains have greatly improved the Indian crop prospects, and a bumper wheat crop is expected, says Router's Delhi correspondent in a message dated December 18. The outlook, indeed, is the best since the record harvest in 1913. Despite the export of wheat, prices are steadily falling.

TRADE IN BULGARIA.

There is no appreciable change in the commercial situation (says the Buigarska Banka in a report dated December 1). The return to the country of considerable sums in leva in payment for tobacco exported has not produced any effect on the money market, which remains tight. The fall in the foreign exchanges occasions some uneasiness among importers—holders of stocks paid for at much higher rates. The disposal of these stocks will be difficult, the more so as the banks are continuing their policy of restricting credits.

There has been some unimportant business in cocoons for export at 420-430 leva. The export for Italy continues. Dealings in the new tobacco crop have taken place at Nova-Zagora and Kavakli round about 30-45 leva. The demand for Germany is maintained. There have been few transactions in hides, and the export is insignificant.

CONDITIONS IN ROUMANIA.

The Transport Problem.

The following report has been received by Messrs. Watson and Youell from Galatz, dated December 12:—

Autumn sowings are on a small scale, owing to the lack of mechanical and up-to-date methods of cultivation, whereby it was impossible to take due advantage of favourable conditions after the harvest and the long spell of rain from the middle of October until well into the month of November. The weather was alternatively mild and frosty up to the end of November, when snow covered the country. According to official reports, about 750,000 to 1,000,000 hectares of land have been cultivated, mostly with wheat, but as the production will probably not leave much margin beyond the quantity required for home consumption, producers are being urged to pay special attention to wheat sowings in the spring and to intensify their efforts, the Government assisting in respect to seed.

Progress in reconstruction of the permanent way is slow, but is engaging the serious attention of the Government, who are considering several important proposals which have been made recently. No reliable information has transpired yet, but it is reported that the visit of Sir Basil Zaharoff and the connection of Messrs. Vickers, Ltd., with the Resitza Works in Transylvania may lead to important developments next year. In the meantime the Railway Direction have commenced replacing the wide Russian gauge in Bessarabia by the standard gauge, and it is now possible to send goods from Bessarabian stations direct to Moldavia without transhipment. In consequence of energetic steps having been taken, thefts and pilferage are less common than last year, but there is still much room for improvement. The Railway Direction made a very good move in coming to terms with groups of business concerns by which these latter, in consideration of trucks being allotted to them for their exclusive use for a period of two years, undertook to effect the necessary repairs, and thus a considerable extra number were put into commission. This is especially assisting the timber trade, and enables larger quantities to be exported. Questions relating to the unification of the railway systems, viz., those of the new territories with that of the old kingdom, the diminishing of State control and placing the entire system under commercial management, are under discussion by the Roumanian Parliament, and results are looked forward to with great interest. Lighter traffic has been very slack this year, there having been no grain worth mentioning loaded at up-river ports for transport to oversea shipping centres.

According to statistics of the Ministry of Finance, the following quantities have been exported this year up to September 30:—Grain, mostly barley and oats, 948,000 tons; timber, 1,100,000 tons; petroleum products, 320,000 tons. Grain shippers are now loading barley and oats at lower Danube ports into lighters for winter depots at Sulina, and are arranging to have floating elevators at their disposal at that port for transhipment purposes. In present circumstances these depots cannot be expected to be of

much account, but we hear of one exporting firm arranging for 30,000 tons. This will be the commencement of post-war Sulina chartering, and there will also be shipments from Constanza during the winter.

Timber is grown in the forests of Moldavia, Bukovina, and Transylvania, the exports from the latter since the war going mostly by rail to Hungary. France has contracted for large quantities over the next year to be transported by rail to the devastated areas from the Bukovina forests, and a demand has set in recently from the U.K. There is also a fair demand from Greece.

The building trade in the country is extremely active, especially in the capital and chief towns, where the populations since the war have enormously increased. The town of Galatz, for instance, with a pre-war population of 80,000, and actually of 240,000, has added some 2,000 buildings this year. The cost of labour and material is very heavy, and shows no sign of reduction. Work goes slowly, owing to the scarcity of labour and insufficient currency. Rents are excessive, and likely to remain so until housing accommodation becomes more plentiful.

The weather at the beginning of this month was mild, with occasional fogs and slight frost at nights, followed by snow and rain. Since the 10th inst. it has turned fine and frostier, and yesterday and to-day the thermometer registered 9 degs. of frost at 10 a.m. The water in the Danube from above the Iron Gates downwards is high, and there is a three-knot current running past Galatz. For the present, therefore, there is no cause for alarm, but naturally everybody is hurrying up to get engagements shipped and steamers despatched from the river.

CURRENT PRICES.

General Produce.—Bacon (Continental), 112s. 6d. per cwt.; (Canadian), 102s. 6d. cwt.; (American), 91s. cwt.; butter (Danish), 201s. cwt.; (Australian), 163s. 4½d. cwt.; (New Zealand), 173s. cwt.; cheese (Canadian), 124s. cwt.; (New Zealand), 123s. cwt.; lard, 80s. 6d. cwt.; eggs (Danish), 25s. 6d. per 120; (Styrian), 15s. 9d. per 120; chillies, 130s. cwt.; cloves (Zanzibar), 9½d. lb.; cocoa (Ceylon good to fine), 76s. cwt.; coffee (Costa Rica), 121s. cwt.; (East Indian), 115s. 6d. cwt.; (Central American), 90s. 6d. cwt; (Jamaica), 74s. cwt.; (Mocha Longberry), 94s. 3d. cwt.; (Santos superior), 71s. cwt.; (Nairobi), 107s. 6d. cwt.; ginger (washed Cochin), 52s. 6d. cwt.; nutmegs (110's to 80's), 1s. 1d. lb.; pepper (Singapore black), 3¾d. lb. (Muntok white), 6¼d. lb.; pimento, 2 1-3d. lb.; raisins (Valencias), 65s. 9d. cwt.; currants (Vostizza), 71s. cwt.; currants (Amalias), 61s. 7½d. cwt.; sultanas (Smyrna), 100s. 6d. cwt.; sugar (Tate's cubes), 55s. 9d. cwt.; (Lyle's granulated), 50s. 3d. cwt.; (Mauritius crystals), 47s. 7½d. cwt.; (West Indian crystallised), 44s. 4½d. cwt.; (centrifugal), 17s. 4½d. cwt.; tapioca (fair Singapore), 3d. lb.; rice (Rangoon No. 2), 15s. 10½d.; bran (Rangoon), £6 11s. 3d. ton; cinnamon (firsts), 10½d. lb.; mace (fair Singapore), 1s. 7½d. lb.; tea (Indian common to good common), 1s. 6d. lb.; (medium to good), 1s. 11d. lb.; (fine to finest), 2s. 10d. lb.; Ceylon (common to good common), 1s. 6d. lb.; (medium to good), 1s. 11½d. lb.; (fine to finest), 3s. lb.; Java (common to good common), 1s. 5d. lb.; wheat (English white), 42s. 3d. qr.; wheat (Australian), 40s. 7½d. qr.; oats (English), 28s. 6d. qr.; oats (La Plata, ex ship), 28s. 3d. qr.; maize (La Plata), 35s. qr.; flour, 37s. 3d. sack.

Chemicals.—Acids: Boric, 56s. cwt.; oxalic, 7½d. lb.; citric, 1s. 6d. lb.; tartaric, 1s. 3d. lb.; ammonia (sulphate), £16 2s. ton; arsenic (white powdered), £55 10s. ton; benzole (standard), 1s. 9½d. gallon; bleaching powder (35 per cent.), £12 12s. 6d. ton; borax crystals, 28s. 6d. cwt.; cream of tartar, £6s. 4½d. cwt. Potassium: Bichromate, 7d. lb.; chlorate, 4½d. lb.; caustic, £29 10s. ton; nitrate, £36 10s. ton; permanganate, 8d. lb.; prussiate yellow, 1s. 6d. lb.; sulphate (90 per cent.), £13 15s. ton. Sodium: Crystals, 107s. 6d. ton; bicarbonate, £10 12s. 6d. ton; bichromate, 5½d. lb.; alkali (58 per cent.), £8 ton; chlorate, 3½d. lb.; caustic (70 per cent.), £20 2s. 6d. ton; hyposulphite, £14 ton; prussiate, 11d. lb.; nitrate, £13 5s. ton; glycerine (crude, 80 per cent.), £48 ton; (industrial, 1,260 per cent.), £85 per ton; lemon oil, 2s. 7½d. lb.; quinine, 2s. 2d. oz.; red lead, £38 17s. 6d. ton; white lead, £41 7s. 6d. ton; white ground lead, £50 10s. ton; sulphate of copper, £26 7s. 6d. ton; sulphate of iron, 55s. ton.

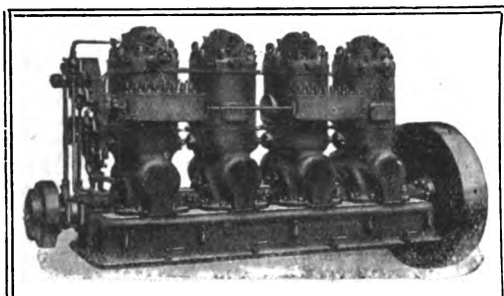
Hides and Skins.—Ox and heifer (first), 90 lb. and up, 8¾d. lb.; 80 to 89 lb., 8¾d. lb.; 70 to 79, 8¾d. lb.; 60 to 69 lb., 8d. lb.; 59 lb. and under, 7½d. lb.; (second), 90 lb. and up, 8d. lb.; 80 to 89 lb., 8d. lb.; 70 to 79 lb., 8d. lb.; 60 to 69 lb., 7½d. lb.; 59 lb. and under, 6d. lb.; cows (first), 60 lb. and up, 7d. lb.; 59 lb. and under, 6¾d. lb.; (second), 60 lb. and up, 5⅝d. lb.; 59 lb. and under 5½d. lb.; bulls (first), 5d. lb.; (second), 3½d. lb.; kips (first), 5⅜d. lb.; (second), 4⅜d. lb. (third), 2½d. lb. Calcutta Market (prices in rupees per 20 lb.):—Arsenic hides (cows): Agras, 7.8 to 13.8; Durbhangas, 6 to 8; Patnas, 5 to 6. Salted cows, 6 to 9. Arsenic hides (buffalo), 4.8 to 8.8. Skins: Calf, 8 to 10 per 20 lb.; goat, 240 to 285 per 100 pieces.

Metals.—Aluminium, £100 ton; antimony (English regulus), £29 2s. 6d. ton; bismuth, 10s. lb.; copper (standard), £62 11s. 3d. ton; copper (electro), £69 17s. 6d. ton; gold bars, 90s. oz.; iron (No. 3 Cleveland), 92s. 9d. ton; hematite (mixed number), 90s. ton; galvanised sheets (25 G), £17 10s. ton; lead (soft foreign), £25 19s. 3d. ton; manganese Poti, 1s. 1½d. unit; molybdenite, 45s. unit; nickel, £137 12s. 6d. ton; platinum, 440s. oz.; graphite (80-90), £12 7s. 6d. ton; quicksilver, £12 2s. 6d. bottle; spelter (G.O.B.), £38 10s. ton; tin (standard), £180 17s. 6d. ton; wolfram, 14s. 6d. unit; zinc sheets, £41 15s. ton; tin plates (20 x 14), 19s. 10½d. box; silver bars, 31 13-16d. oz.

Miscellaneous.—Cotton (American), 14.33d. lb.; Egyptian (Sakel), 17.10d. lb.; jute (first grade), c.i.f. £36 12s. 6d. ton; jute (lightnings), £34 16s. ton. Oilseeds: Linseed (La Plata), £19 3s. ton; palm kernels, £17 5s. 7½d. ton; castor seed (Bombay), £16 17s. 6d. ton; sesame seed (China), £21 7s. 9d. ton; soya beans, £11 6s. 9d. ton; olive (Spanish), £74 ton; rape (crude), £41 16s. 3d. ton; soya, £35 15s. ton; petroleum, 1s. 1½d. gallon; petrol, 1s. 8d. gallon; fuel oil (ex tank), 65s. ton; coconut (Ceylon), £39 7s. 6d. ton; cotton (crude), £36 6s. ton.

GREEK IMPORTATION OF WOODEN BUILDINGS.

A recent Greek Royal Decree provides that portable houses and other buildings of wood or of any other material with or without connecting pieces, also additions and accessories therefor, may be imported into Greece free of import and other duties until the end of 1925. The following articles only are considered to be "additions and accessories," and must be imported together with the houses of which they form an inseparable part:—Doors and windows, plate racks, cupboards and washstands, which form an inseparable part of a house; iron kitcheners, water closets; basins and their accessories; asphalt roofing paper; slates and asbestos tiles; rivets and bolts; paper and cork made of asbestos or cork filings for insulating purposes; oil cloth (canvas) coverings.



Power at Minimum Cost.
The extreme simplicity of the "Allen" Heavy Fuel Oil Engine renders it particularly suitable for placing in the hands of native or other unskilled attendants without any sacrifice of efficiency.
It is easy to start and runs unattended for long periods.

THE 'ALLEN' HEAVY FUEL OIL ENGINE

From 15 BHP to 200 BHP.

For Quotations apply direct to Head Office or to :—

BULGARIAN GOVERNMENT CONTRACTS

On various occasions British firms have approached the Department of Overseas Trade respecting the conditions of payment, inspection, etc., attached to the submission of tenders for material required by the Bulgarian Government. British firms have, in general, found these conditions difficult, and firms have in some cases submitted tenders on terms other than those stipulated by the Department of the Bulgarian Government concerned. The Secretary in charge of Commercial Affairs at H.M. Legation at Sofia has now called attention to this practice, and has pointed out that it is useless to submit offers which do not comply with the conditions laid down by the Bulgarian State Departments. He states that it is impossible to induce the Bulgarian Government to vary these conditions so long as competing firms of foreign nationality are prepared to accept them, as is at present the case.

Further, it occasionally happens that invitations to tender are issued in which conditions are not explicitly stated. In such cases it must be assumed that the general conditions apply. These conditions are as follows:—5 per cent. of the total amount of the tender must be deposited locally as a guarantee of good faith, and this deposit should be made through a local agent or representative who would be able to conform to the general practice. The deposit is returned to unsuccessful tenderers.

With regard to this deposit of 5 per cent. of the total amount of the tender, the Secretary in charge of Commercial Affairs points out that the local agent, if of suitable standing, is usually able to induce a Bulgarian bank to guarantee this amount on easy terms for the period between the submission of the tender and the final adjudication, thus obviating the actual placing of capital by the tendering firm.

Local agents would welcome any requests for advice addressed to them by firms desirous of tendering in individual inquiries if time permits, as in many cases the agent would be able to inform the firm whether a British tender would have reasonable prospects of success. The time specified for delivery in Bulgaria should be adhered to, and a statement that "early delivery" will be given is not sufficient.

In regard to payment, Bulgarian Government Departments pay 50 per cent. in sterling upon the signature of the contract against a bank guarantee for that amount, stating that in the event of default or faulty delivery the bank in question guarantees the refund to the Department concerned of the 50 per cent. paid in advance. The remaining 50 per cent. is paid in sterling after the reception of the goods in Bulgaria. Approximately three weeks must therefore elapse before protocols are made and payment effected. These facts should be taken into consideration by British firms when calculating their prices.

Stamp duty is payable on a contract at the rate of six per mille, and as the contract must necessarily be signed in the name of the supplier a provisional power of attorney should be given to a local agent or representative, who should be entrusted with the submission of the tender on behalf of the British firm, and the execution of all the necessary formalities in regard thereto.

The Commercial Secretary strongly recommends that such British firms as are desirous of submitting tenders should appoint agents in Sofia provided with powers of attorney to sign eventual contracts in their name. The Department of Overseas Trade is prepared to advise firms in the appointment of representatives who could be instructed in case of need by telegraph in the event of a favourable opening presenting itself.

ALEXANDRIA EXCHANGE.

Supplied by G. L. Mortera, Alexandria and Cairo.

Prices on December 8 were as follows:—Agricultural Bank of Egypt, £5½; Alexandria Water Company, Ltd., £9 9-16; Anglo-American Nile Steam, £3 9-32; Associated Cotton Ginners, £1 1-16; Banque d'Orient, 27½ fr.; Behera Ord., £E7⅝; Brasseries d'Egypte, 53 fr.; Building Lands of Egypt, £1 1-16; Cassi di Sconto Priv., 98½ fr.; Comptoir Fin. et Com. d'Egypte, £1 19-32; Consolidated Lands, PT5¾; Credit Foncier Fondateur, 1,045 fr.; Credit Foncier Act., 730 fr.; Credit Foncier 1886 Oblig., 317½ fr.; Eaux du Caire, Capital, 87 fr.; Eaux du Caire Jouissance, 125 fr.; Egypt and Levant, S.S. Ord., 27s. 6d.; Egyptian Delta Light Railways, £4½; Filature National d'Egypt, £10⅝; Immeubles d'Egypt Soc. an des., £6 15-16; Khedivial Mail S.S. Ord., 80s.; Khedivial Mail S.S. Company Pref., £3¾; Kom Ombo Ste an de Wadi, £4¼; Kom Ombo Ste. An. Fondateur, £33¼; Land Bank of Egypt, Parts de Fond, £54; Lots Turc, 34½ fr.; Menzaleh Canal Navigation, PT286; Grand Hotels d'Egypte, £8⅞; Ramleh Railways, £3⅜; Urbaines et Rurales, £3 15-16; Union Fonciere Fond., £½.

The share registers of Morums Oriental Stores, Ltd., will be closed until December 29.

COTTON AND COTTON GOODS.

Liverpool Report.

Messrs. Reynolds and Gibson report as follows for the week ended December 20:—

The slightly better tone noticeable at the end of last week has been maintained, and, although the inquiry has, if anything, shrunk in extent, rather more actual business has succeeded in trickling through, and prices are a shade harder in consequence. The only event of real importance has been the receipt from America of advices forecasting another "bull" campaign in that quarter, and if this comes to pass we shall, of course, experience the effect very speedily in our market here. Early in the New Year it is generally anticipated a substantial rise in the cost of the raw material will be witnessed. Meanwhile trade in Lancashire remains at a very low ebb, and spinners seem less inclined than ever to book ahead, in spite of the many signs of improving trade which are manifest throughout the country. Speaking broadly, both spinners and manufacturers are admittedly working with very little margin in hand, and it is possible that this conservative attitude may be carried too far. We do not doubt that the available supply of Egyptian cotton this season would be more than sufficient for Lancashire's needs alone, but we are not the only users of Egyptian cotton in the world, a fact often pointed out, but very often overlooked.

The receipts in Alexandria of cotton from up-country have shown signs, during the past week or two, of a decreasing tendency, and although the stock in Liverpool has risen again to the neighbourhood of 100,000 bales this is only to be expected at this period of the season, and as an offset against this the number of bales forwarded to spinners during the past four weeks has averaged over 9,300 bales per week. These figures are considerably higher than anything we have seen for a very long time over a similar period. The average deliveries since August 1 last now stand at a figure of 6,760 bales, which is the highest since 1919. We merely draw attention to the above in order to emphasise the fact that steady, if slow, progress is being made, and that the Egyptian trade is steadily working its way back into its normal position. Furthermore, these same figures promise well for the remainder of the season, unless anything untoward should occur in the meantime.

Frankly, we can see no reason for viewing the situation with anything but optimism. The end of the year is generally a slack water period, and this one is going to prove no exception by the look of things. The New Year, however, contains great possibilities. The inquiry locally has displayed no very significant feature beyond perhaps the almost entire absence of demand for good styles of Sakellaridis. The general tendency has been towards cotton between 13d. and 17d. Scarto and Afrita have not been so much in request, but Tokar and Sudan have shown signs of some revival in popularity, prices paid being generally in the neighbourhood of 16d. per lb. Uppers round about 15½d. have frequently been asked for. Advices from Alexandria indicate that prices there are firmly held, and we have had experience of this ourselves in the offers we have received from that quarter. It would appear that the bulk of the receipts in that city are passing into strong hands. C.i.f. business has been noticeably quiet again, and Manchester reports speak of a slightly better tone there, with rather more business doing for India and some of the minor outlets. China remains quiescent. The demand for yarns has improved somewhat and prices are firmer. Total sales, 2,000 bales (includes 120 Sudan). Quotations are advanced 15 points all round. Fully good fair Sakellaridis, 17.80d.

The transfer books of the 7 per cent. first debentures of the Bengal Iron Co., Ltd., will be closed until December 31.

Reuter's Belgrade correspondent, in a message dated December 19 states that an official communiqué issued by the Minister of Finance announces that as from December 20 the bourses in Yugoslavia will work on a new system by which the principle of liberty of operations in foreign bills and currency will be enforced, and the fixing of fictitious rates of exchange abandoned.

THE ALEXANDRIA WATER COMPANY, LIMITED.

Interim Dividend.

Notice is hereby given that an Interim Dividend of Four Shillings per £5 share on Coupon No. 68 is payable on and after the 15th December, 1922, at Messrs. Barclays Bank, Limited, 1, Pall Mall East, London, S.W.1, and 54, Lombard Street, London, E.C., or at the Anglo-Egyptian Bank, Limited, in Alexandria, upon the making of a declaration as to ownership in the form required by the above banks, form of which will be supplied upon application.—By order of the Board,

J. EASTON CORNISH.
For Manager,

Dated Alexandria, 17th November, 1922.

SPECIAL MARKET REPORTS.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Jaffa.

The report for November states :—The market has been animated by the demand for local consumption. The rise in prices is more marked every day ; it is due partly to the poor crop of sesame in the neighbourhood of Toul Karem.

The export of oranges commenced towards the end of the current month. The first shipments for Constantinople have yielded poor results owing to the political situation. Fortunately, they were not very important.

Stamboul, December 1.

Stocks of manufactured goods have notably decreased as a result of consignments to neighbouring countries and forced sales by merchants. The arrivals of cabots, in consequence of orders specially placed for the supply of this market, have been re-exported for the most part to Roumania and Russia.

Colonial Produce.—The prices of crystalised sugar in the markets of origin show a continual advance. Although the weakness of stocks has influenced the rates here, they remain nevertheless below the quotations of the markets of New York and Amsterdam. The small demand for the countries of the Black Sea Littoral and the rise of the dollar and sterling are the principal causes of this position. Stocks are 2,500-3,000 tons. Quotations per ton in transit are :—Java, £23 ; American, £23½-24 ; in Customs, American crystallised, £T36-36½ per 100 kilos. Business has been quiet in cube sugar, and stocks are insignificant. Quotations are :—In transit, £28-28½ per ton ; in Customs, £T40½-41 per 100 kilos.

Coffee.—While for several months there has been justification for founding great hopes in regard to this commodity, the transactions in November have been reduced to the lowest point. For reasons which we have related the Greek and Armenian merchants have abstained from placing even small orders. Some purchases afloat have been made by Turkish and Jewish merchants. Quotations per oke :—In transit, Ps. 70-75 ; in Customs, Ps. 96-101.

Rice.—Although the small stocks are not commensurate with the ultimate needs for local consumption, no orders have been placed. It is true that the Customs tariff applied to this commodity (Ps. 13 per oke) renders the sale difficult.

Flour.—Purchases are limited to the needs for local consumption. Present stocks amount to about 50,000 sacks, or a supply for eight days. The arrival is awaited of supplies estimated at 150,000 sacks from America, Bulgaria, and Roumania, the order for which was placed about a month ago.

Lord Balfour of Burleigh has resigned his seat on the board of the Alliance Bank of Simla.

Rohilkund and Kumaon Railway Co.—Ordinary stock transfer books will be closed from January 4 to 18, inclusive, for preparation of dividend warrants for the six months ended September 30, 1922.

Delhi, Umballa, Kalka Railway Co.—Ordinary stock transfer books will be closed from January 4 to 18, inclusive, for preparation of dividend warrants for the six months ended September 30, 1922.

Oil Notes and News.

PHŒNIX OIL AND TRANSPORT.

The report of the Phœnix Oil and Transport Company, Ltd., for the period from the inception of the company to December 31, 1921, states that since the date of the balance-sheet the amount outstanding under the heading "Unpaid instalments" has been received. Since the first annual ordinary general meeting held on December 28 last substantial progress has been made by the company, a statement regarding which will be made by the chairman at the forthcoming meeting. The directors have entered into an agreement with a view to acquiring the controlling interest in Roumanian Consolidated Oilfields, Ltd., and shareholders will be asked to ratify such agreement. The agreement and heads of agreement have already been approved at meetings of the debenture-holders and shareholders of Roumanian Consolidated Oilfields, Ltd., and will be explained by the chairman at the general meeting. The arrangement is considered by the directors to be highly beneficial to the company, and its ratification is strongly recommended. Should the shareholders approve of this arrangement, they will be asked to pass a resolution increasing the nominal capital of the company from £2,050,000 to £3,550,000 by the creation of 1,500,000 additional shares of £1 each, ranking in all respects *pari passu* with the existing shares.

November Progress Report.

The progress report of the Phœnix Oil and Transport Company, Ltd., and allied companies for November shows that the crude oil production for the month was 2,993 tons. The throughput of the refinery was 4,556 tons. Well No. 1 in the Runcu district continued to flow at rate of approximately 45 tons daily. The position of the wells in drilling at the end of November was as follows:—

Moreni Stavropoleos.—Well No. 6: depth 1,125 ft. Set 15½-inch casing; deepening. Well No. 8: depth 2,927 ft.; dismantled rotary rig and erected Pennsylvanian rig; ready to recommence drilling. Well No. 10: commenced drilling; depth 59 ft. Well No. 16: Commencing to cut out derrick.

Tuicani.—Well No. 2: depth 1,026 ft. Reamed to bottom and inserted 18-inch casing; preparing to insert 16-inch column and to deepen.

Chiciura.—Well No. 1: depth 1,618 ft., extracted all 16-inch column; cutting 18-inch column. Well No. 2: depth 1,840 ft. Well No. 3: depth 2,157 ft.; trial bailing.

Runcu.—Well No. 2: depth 1,718 ft.; official water test satisfactorily completed; changing over to Canadian system. Well No. 3: depth 729 ft.; rigging up rotary rig. Well No. 4: depth 626 ft. Well No. 5: depth 262 ft. Well No. 6: site prepared, ready to erect derrick.

Bordeni.—Well No. 27: depth 1,153 ft.; extracted 10-inch casing and ran in new 8½-inch column; ready to deepen.

Baicoi.—Well No. 5: depth 1,797 ft.; trial bailing and cleaning out plug of oilsand.

Work generally was seriously retarded during the whole month by exceptionally bad weather.

ORION OIL.

The progress report of the "Orion" Societate Anonima de Petrol for November shows that the crude oil production for the month was 4,100 tons. The throughput of the refinery was 6,975 tons, converted into lubricating oils 630 tons. The position of the wells in drilling at the end of November was as follows:—

Tintea Wells.—No. 45, depth 1,344 ft.; trial baling, No. 71, depth 1,643 ft. No. 79, depth 890 ft.; 10-inch casing inserted to 879 ft. No. 94, depth 1,369 ft.; inserted 1,346 ft. of 6-inch casing. No. 95, depth 3,184 ft.; reamed to 2,476 ft. No. 101, depth 1,174 ft.; 12-inch casing inserted to 834 ft. No. 103, depth 869 ft.; flow of oilsand occurred on slitting casing. No. 105, rigging up. No. 106, depth 111 ft., and 108 temporarily suspended owing to lack of labour.

Gropi Wells.—No. 302, depth 1,367 ft.; temporarily suspended owing to lack of labour.

Runcu Wells.—No. 602, depth 1,210 ft.; 10-inch casing inserted to 1,209 ft. No. 607, depth 1,194 ft.; casing inserted to 1,079 ft. No. 608, depth 1,154 ft.; casing inserted to 1,211 ft. No. 612, depth 65 ft.; progress delayed owing to lack of labour. No. 616, depth 1,372 ft.; and No. 621 depth, 1,294 ft.; progress delayed owing to lack of labour. No. 623, depth 33 ft.; levelling.

Moreni Wells.—No. 550, depth 2,843 ft.; cleaning to test water shut off. No. 555, depth 339 ft.

Satuc Wells.—No. 701, depth 1,879 ft.; preparing for water test.

Other wells temporarily shut down owing to lack of labour are:—

Tintea.—No. 2, 690 ft.; No. 18, 1,140 ft.; No. 40, 1,050 ft.; No. 68, 635 ft.; No. 83, 858 ft.; No. 84, 1,412 ft.; No. 86, 924 ft.

Baicoi.—No. 807, 1,869 ft.

Bana.—No. 503, 2,268 ft.

Note.—Runcu wells Nos. 601, 605 and 606 flowing intermittently; No. 602 reached oilsand; preparing to test.

Tintea well No. 45 struck oilsand; preparing to test.

BRITISH BURMAH.

The report of the British Burmah Petroleum Company for the year to July 31, 1922, states that the balance transferred from revenue account was £208,893; adding agency fees £3,670, dividend on shares in Rangoon Oil Company £7,556, interest £8,071, transfer fees £635, makes £228,826. Deducting sundry charges £58,729, Debenture interest £62,696, difference in exchange £6,186, depreciation £31,252, leaves £69,962, plus £9,915 brought in, surplus of realisation of investments £4,895, and refunds of taxes £29,244, makes available £114,016. The sinking fund account absorbs £32,556, and the directors recommend a balance dividend of 4½d. per share, making 7½d. per share, free of tax, payable on February 23 next to shareholders on the books on January 15, 1923. Including £7,556 received from Rangoon Oil Company, the total to be handed to the trustee of First Mortgage Debenture stock amounts to £32,556. Up to the present stock of the nominal value of £287,627 has been purchased for redemption, and further purchases will be made with £32,556 now payable. In December last an issue was made of £600,000 8½ per cent. second mortgage debenture stock at 98, redeemable at 105 on or before November 30, 1936, and a sinking fund for this purpose is to be established out of the profits at the rate of £42,000 per annum, the first payment thereto to be made out of profits for the year ending July 31, 1923. A substantial increase was shown in the net production in Burma, to which the additional output from Singu territories largely contributed. The year's throughput at refinery was also substantially higher, and shipments and sales of benzine, wax, and kerosene greatly exceeded those made during the previous twelve months. Financial results, however, fail to reflect improved field production and refinery throughput. This is due in the main to the low market prices for benzine and wax that prevailed during the period. The rate of exchange proved an adverse factor, as also did the continuing high cost of labour and materials. The directors anticipate an improvement in the results of the current year's operations. Substantial economies in fuel consumption have already been effected, and further economy will be effected when the supply of electrical power for operating wells in Twingone and Beme districts is in full commission. Meeting, Cannon Street Hotel, December 29, noon.

INDO-BURMAH.

The report of Indo-Burma Oilfields for the year ended March 31 states that the whole of the expenditure incurred has again been debited to capital account. The oil-bearing territory of the company—all situated in Burma—has been further increased, and at date consisted of the following:—77 well sites on Yenangyaung oilfields, 89.87 square miles in Yenanma district, 17.5 square miles in Padaukpin district, 7.5 square miles in Mindegyi district, 4 square miles known as Okpon Area (adjoining Padaukpin), 2 square miles known as Kane Area in Chindwin River district, and 4 square miles known as Monywa Area in Chindwin River district. Prospecting licences have been granted by the Government of Burma over 59.55 square miles of the above areas, and applications for the balance 65.32 square miles, extensions of Yenanma area) are now pending, and will doubtless be granted in due course.

Throughout the entire length of about 20 miles of the company's Yenanma territory the existence of oil and gas pressure is evidenced by the large number of strong seepages. Although time has not been sufficient to determine the geological problems involved, any suggestion that the present drilled area is the only productive one in the field need not, in the opinion of the company's geological staff, be seriously entertained. Including the hand-dug well at Padaukpin, the total output from both fields from January 6, when production first commenced at Yenanma, to December 9, was 10,132.9 tons. Thirty-one miles of main oil pipe lines, capable of handling 8,000 barrels a day, have now been laid between the fields and the Irrawaddy River, equipped with all the necessary pumping stations and tankage sufficient for an output considerably larger than present.

Digitized by Google

After many delays, due mainly to non-delivery of plant and machinery, the refinery was able to commence experimental working in the middle of March last, but it was six weeks later before regular running was possible. The directors had hoped that it would have been possible before this date to place refinery products permanently on Indian markets, but owing mainly to the smallness of output that has not been found possible. Pending larger production, it is proposed temporarily to close down the refinery.

The board has been giving constant and anxious consideration to the question of the provision of further working capital, and the issue of this report has been delayed owing to the importance of negotiations in progress. Assuming that the active programme of drilling development is to be continued, it is urgently necessary to provide additional working capital. The chief difficulty has been the existence of £250,000 debenture stock falling due for redemption within the next eighteen months. It is now proposed to ask debenture stockholders to extend the date of redemption to December 31, 1930, and for the three years ending December 31, 1925, to accept payment, if necessary, by interest warrants instead of cash. If the necessary consent is obtained, it is proposed to reduce the face value of the ordinary shares at present issued from £1 to 10s. each, and to convert the unissued 500,000 £1 shares into 5,000,000 preference shares of 2s. each. These shares will be entitled to 90 per cent. of distributable profits and assets. An offer will be made to shareholders of 11 preference shares at 2s. for every 10 ordinary shares now held. This will absorb 1,650,000 shares and will yield £165,000. The oil interests in Burma of the Premier Oil Company, including its rights to drilling on this company's properties, will be transferred to the company in consideration of 400,000 preference shares. The debenture stockholders will have the right to convert during the term of debenture stock into preference shares at the rate of 5s. per share, and 1,000,000 shares will be held in reserve for that purpose. The whole issue has been provisionally underwritten for cash commission of 5 per cent. and call for three years at 3s. per share on 1,650,000 shares, of which, however, the shareholders will receive a call of one-half the number of shares subscribed by them.

SPIES PETROLEUM.

The directors report that no accounts can be presented, as the company has not access to its books, which are in Russia. No material change in the situation in Russia has taken place during the past year, the properties of the company in the Caucasus still lying under the decree of nationalisation of the Soviet Government. The board have used every endeavour to come to an arrangement with the Russian Soviet Government for the return of properties and resumption of operations in Russia, but so far without success. As a result of interchange of views with other oil firms interested in Russia, the board subscribed to the principle that it is inadmissible for any party interested in the Russian oil business to acquire, directly or indirectly, the existing rights and interests of owners dispossessed by Soviet legislation. Trinidad.—The past year has been an exceedingly difficult one for the financing of new undertakings, but a company has been registered with a nominal capital for the purpose of taking over the properties in Trinidad in which the company is interested, and negotiations are in progress for obtaining the capital necessary.

The traffic receipts of the South Indian Railway Co., Ltd., for the week ended November 25 amounted to Rs.8,90,848; total for the year, Rs.3,18,63,127. For the corresponding period of last year, receipts amounted to Rs.67,039; total for the year, Rs.30,93,584.

BRADBURY, WILKINSON & COMPANY, LIMITED.

URAL CASPIAN OIL.

The accounts of the English company for the year to November 13, 1921, show a loss of £33,844, increasing debit balance to £43,516. The only information received from the fields since the last meeting is contained in a report written by a member of the staff who had remained at Gourieff until May, 1922, which says (*inter alia*):—

The whole of the Emba district, in which the property is situated, is under Soviet control, and on the Dossor field plots of all oil companies are united under one administration. During 1920 no work was done on the fields. In 1921 the administration appointed by the Soviet commenced exploiting the field, and during the year from all plots in Dossor a production of 4,000,000 poods was obtained and about 1,500,000 poods of crude oil were exported. In 1922, up to the date of his departure, the average daily output was about 20,000 poods, but no exports had taken place. In the course of this year the administration intended to erect two new drilling rigs on Ural Caspian Company's plot No. 4 at Dossor, and this work has already commenced. The Ural Caspian refinery and that of the Emba Company have been placed under one administration, and are being repaired. No output is reported for the period 1920-1922. Large stocks of products are lying at Rakusha.

The report is satisfactory as showing that apparently no very serious damage has been sustained. The directors' efforts to obtain restitution of property will be continued. They feel that the re-establishment of Russian business will require large sums of money, and it is impossible for any individual company to act in the matter single-handed. In resuming business in Russia it is imperative that the co-operation of the Russian people should be obtained.

ANGLO-MAIKOP CORPORATION.

The report of the Anglo-Maikop Corporation states that negotiations with the Soviet Government for the return of the company's property are still proceeding with the object of removing some of the difficulties imposed in the basis of agreement reached with the Moscow Concessions Committee. The directors record with regret the death on August 20 last of Mr. George Tweedy, who was managing director and took a prominent part in the efforts to overcome difficulties caused by reason of the Russian upheaval. The following have been appointed to the board:—Mr. C. Bailey, a director of some of the associated companies; Mrs. May Mellanby (daughter of the late Mr. George Tweedy); Hon. Eustace Dawnay, representing large interests in the corporation and associated companies. Not having been able to obtain the necessary accounts from the office in Russia prior to the Soviet occupation of the district, the board is still unable to submit accounts.

COMPANY NOTES AND REPORTS.

Imperial Bank of Persia.

The report of the Imperial Bank of Persia for the year ended September 20 states that the profits, after making provision for expenses of management and general charges in London, and at chief office, branches and agencies, income-tax, corporation tax and bad and doubtful debts, amount to £92,303 12s. 5d., to which has to be added £31,955 8s. 1d. brought forward from last account, making a total of £124,259 0s. 6d. From this sum £5,538 4s. 3d., the amount due to the Persian Government in terms of the concession, has to be deducted, leaving £118,720 16s. 3d., which the directors have dealt with in the following manner: Six months' interim dividend at the rate of 3s. per share, paid June 15 (free of income-tax), £15,000; transfer to reserve account, £30,000; transfer to bank premises account, £10,000; final dividend, at the rate of 6s. per share, payable on January 2, 1923 (free of income tax), making a total of 9s. per share for the year or 6.923 per cent. per annum, £30,000; carry forward to new account, £33,720 16s. 3d.; total, £118,720 16s. 3d.

Morums Oriental Stores.

The report of Morums Oriental Stores for the year to June 30, 1922, states that the situation in Egypt has been aggravated by further political upheavals, which resulted in riots and propaganda detrimental to British interests generally, and culminating in a boycott of British goods and business houses, in consequence of which the Christmas season, which is normally one of most remunerative periods of trade, was entirely lost. These adverse factors, combined with a further heavy fall in value of stocks on hand, have involved the company in a trading loss of £143,739. The directors have had under consideration for some time past the question of reorganising capital, and in view of the prospect of more settled conditions in Egypt are of opinion that the present time is opportune. Particulars of the proposals are given in a circular accompanying the report.

TENDERS INVITED.

Tenders are invited for the following contracts, and must be made by the dates mentioned.

(Particulars of tenders marked D.O.T. are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.)

Bulgaria.

Rails, Fishplates, etc.—The Bulgarian State Railway invites tenders for the supply of 4,812 tons of rails (19.91 kg. per metre), 249 tons of fishplates, 26 tons of bolts for fishplates, 407 tons of rail plates, 198 tons of dog spikes, and 1.6 ton of spring washers. January 30 (D.O.T.).

Egypt.

Tugs.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of two tugs. General Government conditions and specifications are obtainable from the Inspecting Engineer, Egypt and the Sudan Governments' Office, London. January 2.

Wood Naphtha and Tierol.—The Egyptian Customs Administration invites tenders for the supply of 130,000 kilogs. of wood naphtha (wood spirit) and 5,000 kilogs. of tierol, for denaturing ethyl alcohol. January 6 (D.O.T.).

Uniforms, etc.—The Director, Personnel and Equipment Department, Ministry of the Interior, Cairo, invites tenders for the supply of uniforms, black cloth, serge, khaki drill, khaki, tarbooshes, boots, etc. January 15.

Lithographic Printing Plates.—The Survey Department of the Ministry of Finance, Egypt, invites tenders for the supply of aluminium and zinc lithographic printing plates. Quotations are required to be in Egyptian currency and inclusive of customs duties and free delivery into the Department's Stores at Giza, Egypt. January 15 (D.O.T.).

General Stores.—The Ports and Lighthouses Administration, Alexandria, invites tenders for the supply of general stores, etc., required for 1923-24. The stores specified include bunting, hose, ropes, canvas, oils, paints, asbestos packing, and other asbestos material, belting, builders' hardware, brushes, chemicals, electrical goods, hardware, etc. Tenders, which must be on the proper form, must be enclosed in sealed envelopes, bearing indication of the nature of the tender, and will be received by the Director-General, Ports and Lighthouses Administration, Alexandria, up to noon on January 17 (D.O.T.).

String.—The Central Stationery Stores, Ministry of Finance, Cairo. invite tenders for the supply of 1,000 kilos string, coloured. January 18.

Blankets, etc.—The Sub-Director of Stores, Ministry of Education, Sharia Qasr el Aini, Cairo, invites tenders for the supply of large quantities of Moroccan woollen blankets, cotton sheeting, tulle for mosquito nets, table serviettes, china plates. copper dishes, glass tumblers, metal spoons, forks, knives, etc., required for the school-year 1923-1924. January 20.

Table and Linen Requisites.—The Ministry of Public Instruction, Cairo, invites tenders for the supply of table and linen requisites for the school year 1923-24. January 20 (D.O.T.).

Paper and Stationery.—The Egyptian Minister of Finance invites tenders for the supply of paper, stationery, and general office material required by the Central Stores, Ministry of Finance, for the year 1923-24. Local representation is essential. January 25 (D.O.T.).

School Materials.—The Sub-Director of Stores, Ministry of Education, Sharia Qasr el Aini, Cairo, invites tenders for the supply of large quantities of school materials, such as exercise books, Arabic reed pens, pencils, black ink of local manufacture, white and coloured chalk, pens, rulers, pieces of indiarubber, slates, etc., required for the school-year 1923-1924. January 31.

Clothing, etc.—The Ministry of the Interior, Stores Department, Egypt, invites tenders for the supply of stores required for the year 1923. The range of articles required is extensive, and includes greatcoats, jackets and tunics, trousers, breeches (in various materials—e.g., khaki drill and serge, white drill, blue cloth, etc.), uniform cloth, hosiery, hard haberdashery, blankets, gloves, boots, leggings, puttees, belts, soap, haversacks, chevrons (fabric and metal), tarbooshes, police whistles and chains, ribbon, etc. (D.O.T.).

India.

Camp Kettles, Strawboards, Enamelled Ware, and Tracing Cloth.—The High Commissioner for India invites tenders for the supply of:—1. Camp kettles, complete No. 4,000; and spare covers for ditto, No. 7,300. 2. Strawboards of various sizes, No. 575,000. 3. Enamelled ware (mugs, pans, plates, etc.). 4. Tracing cloth, dull back, "Dowse" or similar make, rolls 3,500. Forms of tender may be obtained from the Director-General, India Store Department, Branch No. 10, Belvedere Road, Lambeth, S.E.1. January 5.

Electrical Material.—The Commissioner, Corporation of Madras, invites tenders for the supply of the following electrical material: 30 K.V.A. transformers, three-phase, 5000/225, 8 Nos.; H.T. switchgear; 15,000 volt testing set; 30 ft. steel tubular poles, 700 Nos.; hard-drawn copper wire, No. 8 gauge, 10 tons; galvanised wire, No. 8 gauge, 6 tons; switchboard instruments. January 18.

The Bank is prepared to transact Banking business of every description in and connected with Persia and Mesopotamia; and in London grants Drafts, Telegraphic Transfers and Letters of Credit, and negotiates or collects Bills on Persia and the Near East.

London Office: 25, ABCHURCH LANE, E.C.4; Chief Office in Persia: TEHERAN.

IONIAN BANK, Ltd.

LONDON, GREECE, EGYPT.

The only British Bank or Financial House in Greece originally established in London and the Ionian Islands in 1839, subsequently incorporated by Royal Charter in 1844, and registered under the Companies Acts in 1883. The Bank now has branches and correspondents throughout Old Greece, the Ionian Islands, Macedonia, and the Islands recently rejoined to Greece; and is therefore able to offer special facilities to all British and Allied firms having business with that country.

In Egypt the Bank's principal office is at Alexandria; but it also has Branches at Cairo and throughout the cotton-growing districts, and specialises in all operations connected with the moving of the cotton crop.

For information as to terms of business, etc., apply to the HEAD OFFICE:
